*His social Position.* — There is reason to believe that St. Paul's social position in early life was above mediocrity. He inherited from his father the citizenship of Rome. A Jew, or a native of Tarsus, could have obtained this only by purchase, or in reward of distinguished services. If in the former way, the cost was larger than a poor man could have paid, or one in an obscure position would have cared to offer; if in the latter, the implication of a prominent and influential social standing is still more direct and certain. A similar inference might be drawn from the high, though cruel official eminence and trust confided to him by his fellow-countrymen before his conversion. It is worthy of remark, also, that alike in Judæa, before Festus, Felix, and Agrippa, on his voyage to Rome, and while permitted to live in his own hired house during his detention in Rome,

he was uniformly treated as a prisoner of distinction. Nor is our conclusion from these facts invalidated by his trade as a tent-maker; for it was customary for Jewish youth, of whatever condition in life, to learn some form of handicraft. We do not allude to this point because the mere accident of birth attaches to him the slightest preëminence above his colleagues from the fishing-boats on the Galilean Lake. But he lived at a period when the lines of social distinction were sharply drawn, and had not begun to be blended by the Gospel of human brotherhood, and whatever advantage of position he possessed must have opened to him avenues of influence which were closed against the original Apostles, and must have won for him larger freedom of access to the persons of exalted station, and even royal dignity, before whom he was often permitted to plead the cause of Christ. Then too, the higher his position, the larger was his sacrifice in joining the company of unlettered rustics and fishermen, and bearing with them the reproach of the despised Nazarene. Yet more, the farther he was removed from the condition of those who had little to lose by becoming Christians, the more improbable is his conversion on any theory of naturalism; the stronger the certainty that he had a vision of the Saviour on the way to Damascus, and was miraculously called to the apostleship.

However this may be, we cannot be mistaken in assigning a prominent place among his qualifications to his high-bred courtesy, — to his possession in an eminent degree of the traits belonging to that much abused, yet choice designation, a *gentleman*, — "the highest style of man;" for even the Christian is but half-regenerated, when the grace of God has not its outblossoming in gentleness, courtesy, and kindness in the whole intercourse of life. These traits are everywhere manifest in him. His style of address before high official personages is free equally from sycophancy and from rudeness, betraying alike the tact of a highly accomplished man, and the dignity of a Christian. In his epistles there is a pervading grace of manner, indicating at once the politeness of a loving heart, and familiarity with the most becoming modes of expressing that politeness. His very rebukes are conciliatory. He prepares the way for needed censure by merited praise. He conveys unpalatable truth at once with considerate gentleness and with unmistakable explicitness. He shows equal delicacy in the reluctant asking and the grateful acknowledgment of favors. His numerous salutations are gracefully diversified in form, and sometimes strikingly beautiful. His epistle to Philemon grows upon our admiration, when we compare it with the most courtly models of epistolary composition, ancient and modern. It was by this perfect urbanity that he became all things to all men, studying the *mollia tempora findi*, the fit opportunities and methods of access, and presenting the great truths of religion in the form best suited to disarm opposition and conciliate respect.

*Paul as an Orator.* — Let us now consider some of St. Paul's qualities as an orator and a writer. In estimating his genius as an orator, we cannot forget what he tells us of the impediments in the way of his success. He cites those who speak of his bodily presence as mean and his voice as contemptible; and there are traditions, undoubtedly authentic, of his having been a little, bald-headed man, with nothing in his outward aspect to in-

spire especial regard. This may have been the case, and his oratory have had for this only the more winning and commanding efficacy. The lack of physical gifts is often a source of added power to a soul full of great, burning, energizing thoughts. We have seen a deformed dwarf rise before a vast audience, in which at the outset the prestige of a distinguished reputation could not suppress the blended feeling of pity and aversion, and in a few moments he has obtained a purchase upon that audience which would have been denied to manly strength or beauty; for to their apprehension that curved spine has become a huge mass of brain, and of brain on fire, and that puny body seems a human frame no longer, but a conductor of successive thunder-strokes of fervid emotion from soul to soul. So too, have we heard a slender, harsh, shrill, or unmanageable voice, when the vehicle of brilliant thought or profound feeling, rise into an eloquence as far above all rhetorical rules as it was wide of them, so that we have almost forgotten that there were uttered words, and have felt as if it were that silent infusion of sentiment which we can imagine as superseding the need and use of language between unembodied spirits. We can conceive of Paul's person as paltry and unattractive, yet as irradiated in countenance, mien, and gesture, transfigured, glorified by the vividness of his conceptions, the intensity of his zeal, the ecstasy of his devotion. His voice, too, may have been such as no artificial training could have made melodious or effective; yet it must have surged and swelled, grown majestic in intonation and rhythm, trembled with deep emotion, risen into grandeur, as he spoke of Christ and of heaven, and have struck the sweetest chords under the inspiration of the cross. A soul like his could have assimilated the meanest apparatus of bodily organs to its own intense and noble vitality, could have become transparent through the most opaque medium, and have made itself profoundly felt even with a stammering tongue or in a barbarous dialect.

The prime element of an orator's efficiency is his character. His own soul is his chief instrument. What he can accomplish can never transcend the measure of what he is. His words and gestures are but small multipliers, of which his mass of mind and heart is the multiplier. Paul was the greatest and most efficient orator of his age, because he was the greatest and best man of his age, — because the question that mounted to his lips when he rose from the lightning-flash that closed his outward vision to open the inward eye to the realm of spiritual truth, "Lord, what wilt thou have me to do?" was thenceforward the question of his life, — because from that moment he "conferred not with flesh and blood," but only with the spirit of the living God, — because his whole vast nature was consecrated by an ineffaceable Corban to the service of Christ and the salvation of man.

Next to the power of personal character, the orator needs complete mastery of his subject and his position. We need not say how thoroughly Paul was master of his subject, — how his treasures heaped up from schools of philosophy, from travels in many lands, from vast and varied experience, were all so transmuted into spiritual truth, that, though one of the most learned men upon earth, he literally "knew nothing but Jesus Christ, and Him crucified." At the same time, no man ever has been more entirely the master of his position. He analyzes an assembly at first sight,

discerns at once where and how to strike, **what** there is in the condition of his hearers that may be made subservient to his purpose, how favor may be conciliated without a sacrifice of integrity, how the false believer or the sinner may be refuted or condemned on his own ground. He understands the rare art of so dividing an indifferent or unfriendly audience, as to draw over to his own side those who have any points of affinity with himself, however remote. Thus, in a mixed assembly in Jerusalem, he wins a patient hearing from the Pharisees, by putting foremost in his speech what always held the first place in his heart, the resurrection of the dead (Acts xxiii. 6 ff.). The most noteworthy instance of his skill in the management of a specific audience is to be found in his discourse at Athens. We need not enlarge on this topic here. It may suffice to refer the reader to Luke's report of the speech itself (Acts xvii. 22-31), and to the account of the circumstances of its delivery and of its wise adaptation to the Apostle's object, which has been given in a previous article (MARS' HILL, Amer. ed.).

*Paul as a Writer.* — We pass to notice some of this Apostle's characteristics as a writer. Among these we would name as most prominent the singular union, throughout the greater part of his epistles, of strong reasoning and vivid emotion. He is severely logical, and at the same time full of intense feeling. The keenest shafts of his logic are forged in the red heat of fervent devotion; his most glowing utterances of piety are often argumentative in their form; and some of those rapturous doxologies that break the continuity of his discourse occur in the midst of polemic discussions on mooted and abstruse points of Christian doctrine and duty.

St. Paul is often charged with obscurity. Much of this alleged obscurity results from the indifference of readers to the occasion on which each separate epistle was written, and the purpose which the writer had in view. Any letters, read as his generally are, would be obscure; for epistles are always to be interpreted in great part by the circumstances to which they owe their origin. In the case of Paul's writings, these circumstances are in every instance to be determined, or conjectured with the strongest show of probability, from the comparison of their text with the parallel history of the Acts of the Apostles and with other sources of information concerning the communities and persons to whom the epistles were severally addressed.

Another source of obscurity in these writings, obviated, however, by careful study, consists in St. Paul's use of Greek particles. No author makes more profuse and at the same time more discriminating use of particles than he; and whether a reader shall trace the continuity of his discourse, or shall see only abrupt transitions and trackless involutions of thought, depends very much on the degree of his conversance with the Pauline use of illatives, connectives, and that whole delicately organized network of conjunctions, prepositions, and adverbs which confuses and bewilders where it does not guide. Moreover, the mere classical scholar is at fault as to these epistles; for Paul often uses particles (as well as other words) in accordance, not with Greek, but with Hebrew idioms, — in the acceptance in which they are employed by the writers of the Septuagint.

There is, however, a sense in which St. Paul

writings are involved and desultory. His sentences are absolutely loaded down with meaning. He condenses in a single period exceptions, qualifications, subsidiary thoughts, cognate ideas, which an ordinary writer would spin out into a long paragraph. His digressions are, indeed, frequent; but they are always forays into a rich country which he lays under a heavy tribute; and he uniformly returns to his starting point, resumes the thread of his discourse, and never drops a discussion till he has brought it to a satisfactory close. He always has a definite purpose in view, and advances steadily in its pursuit, with a vast profusion of argument and illustration indeed, but all of it pertinent, all of it tending to raise the reader to his own lofty point of vision, and to inspire him with his own profound feeling of the infinite truths and immortal hopes which are the life-tide of his being.

St. Paul's rhetoric is as perfect as his logic. He never forgets the proportion which style should bear to the subject of discourse. He fills out more completely than any other writer extant Cicero's definition of the eloquent man, — *is, qui poterit parvi summis, rursus temperate, magna graviter, dicere*. How many are the passages in his writings, which in their blended beauty and majesty transcend the power of imitation, and distance all efforts of human genius hardly more in the divine inspiration that flooded his soul than in the mere instrumentalities of phrase and diction, — in the burning words that clothe the God-breathed thoughts! Was there ever a moral portraiture that could be compared with his delineation of charity? As trait after trait drops from his pen, the grace of love grows and spreads till it takes into its substance the whole of life, the whole of character, all relations, all obligations, — till, like the child in the apocalyptic vision, the earth-born virtue is "caught up unto God and to his throne," and we feel that it must indeed outlast faith and hope, constituting the very essence of the heavenly life, — superseding the doubtful reasonings and lame philosophy of this world, so that knowledge in its wonted processes shall cease, — becoming its own interpreter from spirit to spirit, so that tongues shall fail, and ransomed man shall be love as God is love. Or we might refer to that sublime chapter on the resurrection, in which the Apostle takes his stand by the broken sepulchre of the Redeemer, at the foot of the rock which the angel rolled away plants the ladder reaching from earth to heaven, and on rungs that are massive day-beams of the resurrection morning, leads up his tried and persecuted converts to those celestial heights where the corruptible is clothed in incorruption, — where goes forth forever the shout of triumph, "O death, where is thy sting? O grave, where is thy victory?"

*Value of Paul's Epistles.* — It remains for us to speak of the importance of the epistles of St. Paul as a portion of the Christian canon. But in entering on this subject we cannot deny that they have been a most copious fountain of false doctrine. There has never been a heresy so absurd, or a vagary so wild, as not to resort for its proof-texts, chiefly, to this portion of the sacred volume. This, however, has been due to two fundamental errors as to the interpretation of the Pauline epistles. The first is a misapprehension of their nature and uses. They have been regarded as primary and independent treatises on Christian theology, rather than as writings of specific purpose and limited application. The phraseology by

which St. Paul characterized and refuted ephemeral crudities and follies, and which is closely circumscribed in meaning by the history of the times has been generalized into universal propositions. His contemptuous estimate of the heartless routine of an effete ritual has been extended to the fundamental laws of personal and social duty, and Antinomians of the foulest type have justified their abominations by the very terms in which he inculcated a faith which makes men virtuous, in opposition to a ceremonial law which left them to unrebuked iniquity. In fine, his epistles have been treated, not as the commentaries of a divinely inspired man on the original and complete revelation through Christ, but as a supplementary revelation of paramount magnitude and moment. Thus, instead of tracing principles in their authoritative applications, men have transmuted the applications into principles. Even where no grave falsity or error has resulted from this source, it has tended to render the terminology of religion harmfully technical and complex, and to obscure the simple beauty of the truth as it fell from the Saviour's lips, by incorporating with it words and phrases which derived their origin and their sole fitness from conditions of the Jewish and Pagan mind that have long since passed into oblivion.

Another source of error from these epistles has been the habit of aphoristical interpretation, — the treatment of separate sentences, and fragments of sentences, as if they were complete in themselves, without needing to be modified by the context. No writings extant are so little adapted as St. Paul's to this mode of interpretation. They contain comparatively few independent sentences, isolated sentiments, statements not contingent for a portion of their meaning on what precedes or follows them. A sentence taken by itself is more likely to denote the opposite of what the writer meant by it, than it is to present his meaning with any good degree of definiteness and accuracy. He often traces out his adversary's line of argument, or assumes his postulates, in order to demonstrate the falsity of his inferences from them. He sometimes holds an imaginary colloquy with an objector and states the fallacy which he is aiming to expose, without indicating to the careless reader that he is not giving utterance to his own thoughts; and in some instances he regards the statement of a falsity as its sufficient refutation, — as virtually a *reductio ad absurdum*.

In treating of the uses of St. Paul's epistles, we would first refer to the essential place they hold among the evidences of Christianity. They at once establish their own genuineness, and furnish ample confirmation of the authenticity of the historical books of the New Testament. They bear unmistakable tokens of their having been written by the very Paul who appears as the chief historical personage in the Acts of the Apostles; and our conclusion in favor of their genuineness is constantly confirmed by the disinterring of minute, latent, manifestly undesigned coincidences in the epistles with statements in the Acts, and with the results of historical and archaeological research. Indeed, the Pauline origin of the greater part of these epistles is generally acknowledged even by the most skeptical of critics, and, when called in question, is disputed on grounds unappreciable to a mind of ordinary perspicacity. Now, these epistles imply, at the time when they were written, the existence of precisely the condition of things that must have

existed, if Jesus Christ lived and taught, died and rose from the dead, when, where, and as he is said to have done in the Gospels. They discuss just such questions as must needs have arisen in the course of Christian experience, — cases of casuistry, scruples of the morbidly conscientious, terms of toleration and fellowship, tests of religious character and progress, — in fine, questions parallel with those which converts from heathenism might, and no doubt do, ask at the present day. They are, for the most part, questions which could have been asked only by mere novices. Such discussions we do not find in the Gospels, which contain simply the form in which Christian truth is said to have fallen from the Master's lips, not the record of its workings on men's anterior beliefs and habits. This could have been the case only if the Gospels are genuine and authentic. If they were written by other than apostolic men, and at a later than the apostolic age, it is impossible that they should not have borne numerous marks of the then condition of Christian experience, — that they should not have adapted the Saviour's words to the then existing exigencies of the Church. That they contain only the rudiments, not the diversified applications, of Christian doctrine, can be accounted for only by the theory that they are literal history, written by men who had direct access to the historical fountains.

Not only do these epistles attest the primeval antiquity of our Gospels, but even that denied, they are themselves a luculent record of the very historical Christianity which is maintained by critics of the various skeptical schools to have been wholly post-apostolic and of very gradual growth. St. Paul's epistles were, all of them, written (we have positive proof that most of them were) before the close of the first century of the Christian era. They recognize a Christianity founded on the expressly divine sonship and mission, the sacrificial death and the resurrection of Jesus Christ. As to the latter event, St. Paul evidently had been at pains carefully to investigate the evidence. He states his belief of it, not on *a priori* or transcendental grounds, but on the testimony of numerous eye-witnesses, some of whose names he specifies, while we infer that he knew the names of many more, as he says that most of them were still living, though some had died; and he makes this salient fact in the Christian narrative the basis of all satisfying faith and efficient propagandism. In the historical Christianity had as clear and definite and undisputed a place in the faith of Paul and his contemporary Christians in the very generation that had seen the face and heard the voice of Jesus Christ, as it has in the belief of the most rigid adherent to the letter of Scripture in our own day. These epistles are thus fatal to the "development theory," according to which Christianity could not have attained its definite shape and consistency, or the person of Christ from that of a wise and virtuous Jewish peasant have towered by mythical accretions into the figure of the world's Redeemer and the heaven-born Son of God, until his contemporaries had all passed away and yielded place to a new generation.

Finally, these epistles are invaluable to us, and to Christians of every age, as embodying decisions, guided by the inspiration of God, on momentous questions of Christian ethics, and thus as a collateral interpretation of the mind of Christ as conveyed to us in the Gospels. They bear toward the Gospels very much the same relation that is borne to the Constitution of the United States by the recorded decisions of those judges who were intimately conversant with the views, aims, and purposes of its founders. To the Christian Church Jesus gave its constitution in his teachings and his life. But from the very nature of the case there were few or no decisions of mooted points under that constitution prior to his ascension; for the Church cannot be said to have existed before the day of Pentecost. In Paul we have a judge on whom the spirit of the Master rested, and who held for many years the foremost place in the ecclesiastical administration. To him were brought for adjudication numerous subjects of doubt and controversy, and his decisions remain on record in his epistles. The questions of those earlier ages have indeed long since passed away; but strictly analogous questions, depending on the very same principles for their solution, are constantly recurring. The heart's inmost experiences, needs, and cravings are the same in America in the nineteenth century that they were in Europe and Asia in the first; and in Paul's epistles we have an inexhaustible repertory of instruction, admonition, edification, and comfort for our several conditions and emergencies as the called of Christ and the heirs of heaven.

A. P. P.

## PAVEMENT. [GABBATHA.]

**PAVILION.** 1. *Sôcâ*, properly an inclosed place, also rendered "tabernacle," "covert," and "den," once only "pavilion" (Ps. xxvii. 5).

2. *Succâh*, usually "tabernacle" and "booth." [SUCCOTH.]

3. *Shaphrâr*, and *Shaphrâr*, a word used once only in Jer. xliii. 10, to signify glory or splendor, and hence probably to be understood of the splendid covering of the royal throne. It is explained by Jarchi and others "a tent." [TENT.]

H. W. P.

## \* PEACE. [SALUTATION.]

**PEACOCKS** (תְּרִיבִּי and תְּרִיבִּי, *tucçiyim*; τρωῶνες; *parvi*). Amongst the natural products of the land of Tarshish which Solomon's fleet brought home to Jerusalem mention is made of "peacocks;" for there can, we think, be no doubt at all that the A. V. is correct in thus rendering *tucçiyim*, which word occurs only in 1 K. x. 22, and 2 Chr. ix. 21; most of the old versions, with several of the Jewish Kabbis being in favor of this translation. Some writers have, however, been dissatisfied with the rendering of "peacocks," and have proposed "parrots," as Huet (*Diss. de Nav. Sal.* 7, § 6) and one or two others. Keil (*Diss. de Ophir*, p. 104, and *Comment. on 1 K. x. 22*), with a view to support his theory that Tarshish is the old Phœnician Tartessus in Spain derives the Hebrew name from *Tucca*, a town of Mauritania and

<sup>a</sup> תָּבַע, from תָּבַע, "enclose" (Ges. 952); סֻכָּה; *tabernaculum*.

<sup>b</sup> תָּבַע, from same root; סֻכָּה; *tabernaculum*;

also 2 Sam. xxii. 12, *latibulum*. In 1 K. xx. 16. Σοκχώθ, *umbraculum*.

<sup>c</sup> תְּרִיבִּי and Keri תְּרִיבִּי (Ges. 1460).

Numidia, and concludes that the "Aves Numidiæ" (Guinea Fowls) are meant: which birds, however, in spite of their name, never existed in Numidia, nor within a thousand miles of that country!

There can be no doubt that the Hebrew word is of foreign origin. Gesenius (*Theo.* p. 1502) cites many authorities to prove that the (*uccī* is to be traced to the Tamil or Malabaric *toçēi*, "peacock;" which opinion has recently been confirmed by Sir E. Tennent (*Ceylon*, ii. 102, and i. p. xx. 3d ed.), who says, "It is very remarkable that the terms by which these articles (ivory, apes, and peacocks) are designated in the Hebrew Scriptures are identical with the Tamil names, by which some of them are called in Ceylon to the present day, — *tuçeyim* may be recognized in *toçēi*, the modern name for these birds." Thus Keil's objection, "that this supposed *toçēi* is not yet itself sufficiently ascertained" (*Comment. on 1 K. x. 22*), is satisfactorily met.<sup>a</sup>

Peacocks are called "Persian birds" by Aristophanes, *Aves*, 484; see also *Acharn.* 63; *Diod. Sic.* ii. 53.

Peacocks were doubtless introduced into Persia from India or Ceylon; perhaps their first introduction dates from the time of Solomon; and they gradually extended into Greece, Rome, and Europe generally. The ascription of the quality of vanity to the peacock is as old as the time of Aristotle, who says (*Hist. An.* i. 1, § 15), "Some animals are jealous and vain like the peacock." The A. V. in Job xxxix. 13 speaks of "the goodly wings of the peacocks;" but this is a different Hebrew word and has undoubted reference to the "ostrich." W. H.

**PEARL** (פֶּרֶל, *gābīsh*: γαβίς: *eminētia*). The Heb. word occurs, in this form, only in Job xxviii. 18, where the price of wisdom is contrasted with that of *rāmōth* ("coral") and *gābīsh*; and the same word, with the addition of the syllable *el* (פֶּרֶלֶל), is found in Ez. xiii. 11, 13, xxxviii. 22, with *abnē*, "stones," i. e. "stones of ice." The ancient versions contribute nothing by way of explanation. Schultens (*Comment. in Job*, l. c.) leaves the word untranslated: he gives the signification of "pearls" to the Hebrew term *penūim* (A. V. "rubies") which occurs in the same verse. Gesenius, Fürst, Rosenmüller, Maurer, and commentators generally, understand "crystal" by the term, on account of its resemblance to ice. Lee (*Comment. on Job*, l. c.) translates *rāmōth vegābīsh* "things high and massive." Carey renders *gābīsh* by "mother-of-pearl," though he is by no means content with this explanation. On the whole the balance of probability is in favor of "crystal," since *gābīsh* denotes "ice" (not "hailstones," as Carey supposes, without the addition of *abnē*, "stones") in the passages of Ezekiel where the word occurs. There is nothing to which ice can be so well compared as to crystal. The objection to this interpretation is that crystal is not an article of much value; but perhaps reference may here be made to the beauty and pure lustre of rock crystal, or this substance may by the ancient Orientals have been held in high esteem.

<sup>a</sup> The Hebrew names for apes and ivory are clearly untranslatable to the Sanskrit; but though *toçēi* does not appear in Sanskrit, it has been derived from the Sans-

Pearls (μαργαρίται), however, are frequently mentioned in the N. T.: comp. Matt. xiii. 45, 46, where the kingdom of heaven is likened unto "a merchant-man seeking goodly pearls." Pearl formed part of women's attire (1 Tim. ii. 9; Rev. xvii. 4). "The twelve gates" of the heavenly Jerusalem were twelve pearls (Rev. xxi. 21); perhaps "mother-of-pearl" is here more especially intended.

Pearl Oyster.

Pearls are found inside the shells of various species of *Mollusca*. They are formed by the deposit of the nacreous substance around some foreign body as a nucleus. The *Unio margaritifera*, *Mytilus edulis*, *Ostrea edulis*, of our own country, occasionally furnish pearls; but "the pearl of great price" is doubtless a fine specimen yielded by the pearl oyster (*Tridacna margaritifera*) still found in abundance in the Persian Gulf, which has long been celebrated for its pearl fisheries. In Matt. vii. 6 pearls are used metaphorically for anything of value; or perhaps more especially, for "wise sayings," which in Arabic, according to Schultens (*Hariri Consess.* i. 12, ii. 102), are called pearls. (See Parkhurst, *Gr. Lex.* s. v. Μαργαρίτης. As to פֶּרֶלֶל, see RUBIES.) W. H.

**PED'AH'EL** (לְהַדִּיל) [*whom God delivers*]: פֶּדָאֵהֶל: *Phedahlēl*). The son of Ammilud, and prince of the tribe of Naphtali (Num. xxix. 28); one of the twelve appointed to divide the land west of Jordan among the nine and a half tribes.

**PEDAH'ZUR** (רֹכֵן) [*the rock*, i. e. *God delivers*]: פֶּדָאָסוּר; [Vat. in i. 10, פֶּדָאָסוּר, and so Alex. in vii. 54:] *Phadassur*). Father of Gamaliel, the chief of the tribe of Manasseh at the time of the Exodus (Num. i. 10, ii. 20, vii. 54, 59, x. 23).

**PEDAIAH** [3 syl.] (פְּדִיָּה) [*whom Jehovah delivers*]: פֶּדָאֵיָה; [Vat. Εδειαί:] Alex. Ειεδδία; [Comp. פֶּדָאֵיָה:] *Phadaiā*). I. The father of Zebudah, mother of king Jehoiakim (2 K. xxiii. 36). He is described as "of Rumlah," which has not with certainty been identified.

2. פֶּדָאֵיָה; [Vat. Φαλδαιας; in ver. 19, Vat. Alex. Σαλαθιηλ.] The brother of Salathiel, or Shealtiel, and father of Zerubbabel, who is usually called the "son of Shealtiel," being, as Lord A. Hervey (*Genealogies*, p. 100) conjectures, in reality, his uncle's successor and heir, in consequence

of the krit word *s'ikhin*, meaning furnished with a crest (Max Müller *Science of Language*, p. 190)

of the failure of issue in the direct line (1 Chr. iii. 17-19).

3. (Φαδαία.) Son of Parosh, that is, one of the family of that name, who assisted Nehemiah in repairing the walls of Jerusalem (Neh. iii. 25).

4. (Φαδαίας.) Apparently a priest; one of those who stood on the left hand of Ezra, when he read the Law to the people (Neh. vii. 4). In 1 Esdr. ix. 44, he is called PHALDAIUS.

5. (Φαδαία; [Vat.] FA. Φαλαία.) A Benjamite, ancestor of Sallu (Neh. xi. 7).

6. Φαδαία; [Vat. Φαλαία.] A Levite in the time of Nehemiah, appointed by him one of the "treasurers over the treasury," whose office it was "to distribute unto their brethren" (Neh. xiii. 13).

7. (פִּלְדַּיִם; Φαδαία [Vat. Φαλαία]; Alex. φαλδαι.) The father of Joel, prince of the half tribe of Manasseh in the reign of David (1 Chr. xxvii. 20).

\* PEEP in Is. viii. 19, x. 14 (A. V.), is used in the sense of *chirp*, or to utter a feeble, shrill sound, like that made by young birds on breaking from the shell (Lat. *pīpio*, Germ. *ripen*). The wizards or necromancers that pretended to evoke the shades of the departed spoke in the low shrill tones which, according to the popular superstition, belonged to the inhabitants of the underworld; see Gesenius or Rosenmüller on Is. viii. 19, and comp. Is. xxix. 4, where the word translated "whisper" (margin, "peep, or chirp") is the same which is rendered "peep" in the two passages referred to above. A.

PE'KAH פִּקַּח [opening or open-eyed, Ges.; oversight, Fürst]: φακέ; φακέας, Joseph.: Phacee, son of Remaliah, originally a captain of Pekahiah king of Israel, murdered his master, seized the throne, and became the 18th sovereign (and last but one) of the northern kingdom. His native country was probably Gilead, as fifty Gileadites joined him in the conspiracy against Pekahiah; and if so, he furnishes an instance of the same undaunted energy which distinguished, for good or evil, so many of the Israelites who sprang from that country, of which Jephthah and Elijah were the most famous examples (Stanley, *S. of P.* 327). [ELIJAH.] Under his predecessors Israel had been much weakened through the payment of enormous tribute to the Assyrians (see especially 2 K. xv. 20), and by internal wars and conspiracies. Pekah seems steadily to have applied himself to the restoration of its power. For this purpose he sought for the support of a foreign alliance, and fixed his mind on the plunder of the sister kingdom of Judah. He must have made the treaty by which he proposed to share its spoil with Rezin king of Damascus, when Jotham was still on the throne of Jerusalem (2 K. xv. 37); but its execution was long delayed, probably in consequence of that prince's righteous and vigorous administration (2 Chr. xxvii.). When, however, his weak son Ahaz succeeded to the crown of David, the allies no longer hesitated, and formed the siege of Jerusalem. The history of the war, which is sketched under AHAZ, is found in 2 K. xvi. and 2 Chr. xxviii.; and in the latter (ver. 6) we read that Pekah "slew in Judah one hundred and twenty thousand in one day, which were all valiant men," a statement which, even if we should be obliged to diminish the number now read in the text, from

the uncertainty as to numbers attaching to our present MSS. of the books of Chronicles (ΑΒΙΛΙΑΗ, CHRONICLES; Kennicott, *Hebrew Text of the Old Testament Considered*, p. 532), proves that the character of his warfare was in full accordance with Gileadite precedents (Judg. xi. 33, xii. 6). The war is famous as the occasion of the great prophecies in Isaiah vii.-ix. Its chief result was the capture of the Jewish port of Elath on the Red Sea; but the unnatural alliance of Damascus and Samaria was punished through the final overthrow of the ferocious confederates by Tiglath-pileser, king of Assyria, whom Ahaz called to his assistance, and who seized the opportunity of adding to his own dominions and crushing a union which might have been dangerous. The kingdom of Damascus was finally suppressed, and Rezin put to death, while Pekah was deprived of at least half of his kingdom, including all the northern portion, and the whole district to the east of Jordan. For though the writer in 2 K. xv. 29 tells us that Tiglath-pileser "took Ijon, and Abel-beth-maacah, and Janoah, and Kedesh, and Hazor, and Gilead, and Galilee, all the land of Naphtali," yet from comparing 1 Chr. v. 26, we find that Gilead must include "the Reubenites, and the Gadites, and half the tribe of Manasseh." The inhabitants were carried off, according to the usual practice, and settled in remote districts of Assyria. Pekah himself, now fallen into the position of an Assyrian vassal, was of course compelled to abstain from further attacks on Judah. Whether his continued tyranny exhausted the patience of his subjects, or whether his weakness emboldened them to attack him, we do not know; but, from one or the other cause, Hoshea the son of Elah conspired against him and put him to death. Josephus says that Hoshea was his friend (φίλου τινός επιβουλευσάντος αὐτῷ, Ant. ix. 13, § 1). Comp. Is. vii. 16, which prophecy Hoshea was instrumental in fulfilling. [HOSHEA.] Pekah ascended the throne B. C. 757. He must have begun to war against Judah B. C. 740, and was killed B. C. 737. The order of events above given is according to the scheme of Ewald's *Geschichte des Volkes Israel*, vol. iii. p. 602. Mr. Rawlinson (*Bampton Lectures for 1859*, Lect. iv.) seems wrong in assuming two invasions of Israel by the Assyrians in Pekah's time, the one corresponding to 2 K. xv. 29, the other to 2 K. xvi. 7-9. Both these narratives refer to the same event, which in the first place is mentioned briefly in the short sketch of Pekah's reign, while, in the second passage, additional details are given in the longer biography of Ahaz. It would have been scarcely possible for Pekah, when deprived of half his kingdom, to make an alliance with Rezin, and to attack Ahaz. We learn further from Mr. Rawlinson that the conquests of Tiglath-pileser are mentioned in an Assyrian fragment, though there is a difficulty, from the occurrence of the name *Menahem* in the inscription, which may have proceeded from a mistake of the engraver. Comp. the title, *son of Khuniri* (Omri), assigned to Jehu in another inscription; and see Rawlinson, note 35 on Lect. iv. As may be inferred from Pekah's alliance with Rezin, his government was no improvement, morally and religiously, on that of his predecessors. G. E. L. C.

PEKAHIAH (פִּקַּח) [Jehovan watches Fürst: or, opens his eyes, Ges.]: φακέσις; Alex. φακέσις: Phaceja, son and successor of Menahem

hem, was the 17th king of the separate kingdom of Israel. After a brief reign of scarcely two years, a conspiracy was organized against him by "one of his captains" (probably of his body guard), Pekah, son of Remaliah, and who, at the head of fifty Gileadites, attacked him in his palace, murdered him and his friends Argob and Arieah, and seized the throne. The date of his accession is B. C. 759, of his death 757. This reign was no better than those which had gone before; and the calf-worship was retained (2 K. xv. 22-26).

G. E. L. C.

**PE'KOD** (פֶּקוֹד), [see below] an appellative applied to the Chaldeans. It occurs only twice, namely, in Jer. I. 21, and Ez. xxiii. 23, in the latter of which it is connected with Shoa and Koa, as though these three were in some way subdivisions of "the Babylonians and all the Chaldeans." Authorities are undecided as to the meaning of the term. It is apparently connected with the root *pākad*, "to visit," and in its secondary senses "to punish," and "to appoint a ruler;" hence Pekod may be applied to Babylon in Jer. I. as significant of its impending punishment, as in the margin of the A. V. "visitation." But this sense will not suit the other passage, and hence Gesenius here assigns to it the meaning of "perfect" (*Theol.* p. 1121, as though it were but another form of *pākiū*). It certainly is unlikely that the same word would be applied to the same object in two totally different senses. Hitzig seeks for the origin of the word in the Sanskrit *bhavadān*, "noble"—Shoa and Koa being respectively "prince" and "lord;" and he explains its use in Jer. I. as a part for the whole. The LXX. treats it as the name of a district (φακούκ; Alex. φουδ) in Ezekiel, and as a verb (ἐκδικήσον) in Jeremiah.

W. L. B.

**PELA'IAH** [3 syl.] (פֶּלְאִיָּה [whom Jehovah distinguishes]). 1. ([*Phadāia*; Vat. *Phara*; Alex. *Phalasia*; *Pheleia*]). A son of Elioenai, one of the last members of the royal line of Judah (1 Chr. iii. 24).

2. (LXX. om. in Neh. viii.; *Phelia*; [Vat. FA.<sup>1</sup> omit;] Alex. [FA.<sup>3</sup>] *Phelēia*; *Phalūi*). One of the Levites who assisted Ezra in expounding the law (Neh. viii. 7). He afterwards sealed the covenant with Nehemiah (Neh. x. 10). He is called ΒΙΑΤΑΣ in 1 Esdr. ix. 48.

**PELALIAH** (פֶּלְלִיָּה [Jehovah judges]; *Phalasia*; [Vat. FA.<sup>1</sup> omit;] *Pheleia*). The son of Amzi, and ancestor of Adaiah a priest at Jerusalem after the return from Babylon (Neh. xi. 12).

**PELATIAH** (פֶּלְטִיָּה [Jehovah delivers]; *Phalētia*; [Vat. *Phalēti*; Alex. *Phalētia*;] *Phalūti*). 1. Son of Hananiah the son of Zerubbabel (1 Chr. iii. 21). In the LXX. and Vulg. he is further described as the father of Jesaiah.

2. (*Phalētia* [Vat. *tei*]; Alex. *Phalētia*). One of the captains of the marauding band of five hundred Simeonites, who in the reign of Hezekiah made an expedition to Mount Seir and smote the fugitive Amalekites (1 Chr. iv. 42).

3. (*Phalētia*; [FA.<sup>1</sup> *Phalētia*. corr. *Phalētia*;] *Pheleia*). One of the heads of the people, and probably the name of a family, who sealed the covenant with Nehemiah (Neh. x. 22).

4. (פֶּלְטִיָּה: *Phalētia*; [Vat.<sup>1</sup> in ver. 1, *Phalētia*;] *Pheleia*). The son of Benaiah, and one of the princes of the people against whom Ezekiel

was directed to utter the words of doom recorded in Ez. xi. 5-12. The prophet in spirit saw him stand at the east gate of the Temple, and, as he spoke, the same vision showed him Pelatiah's sudden death (Ez. xi. 1, 13).

**PE'LEG** (פֶּלֶג [stream, division]; *Phalēg*, [Alex.] *Phalēg*; [in 1 Chr. i. 25, Vat. *Phalēg*;] *Phuleg*), a son of Eber, and brother of Joktan (Gen. x. 25, xi. 16). The only incident connected with his history is the statement that "in his days was the earth divided"—an event which was embodied in his name, Peleg meaning "division." This notice refers, not to the general dispersion of the human family subsequently to the Deluge, but to a division of the family of Eber himself, the younger branch of whom (the Joktanids) migrated into southern Arabia, while the elder remained in Mesopotamia. The occurrence of the name *Phaliga* for a town at the junction of the Chaboras with the Euphrates is observable in consequence of the remark of Winer (*Realw.*) that there is no geographical name corresponding to Peleg. At the same time the late date of the author who mentions the name (Isidorus of Charax) prevents any great stress being laid upon it. The separation of the Joktanids from the stock whence the Hebrews sprang, finds a place in the Mosaic table, as marking an epoch in the age immediately succeeding the Deluge.

W. L. B.

**PE'LET** (פֶּלֶט [deliverance]; *Phalēg*; Alex. *Phalēt*; *Phlet*). 1. A son of Jaldai in an obscure genealogy (1 Chr. ii. 47).

2. (Ἰωφάλητ; Alex. *Phalēt*; *Phallet*). The son of Azmaveth, that is, either a native of the place of that name, or the son of one of David's heroes. He was among the Benjamites who joined David in Ziklag (1 Chr. xii. 3).

**PE'LETH** (פֶּלֶת [swiftness]; *Phalēth*; *Pheleth*). 1. The father of On the Reubenite, who joined Dathan and Abiram in their rebellion (Num. xvi. 1). Josephus (*Ant.* iv. 2, § 2), omitting all mention of On, calls Peleth *Phalōōs*, apparently identifying him with PHALU the son of Reuben. In the LXX. Peleth is made the son of Reuben, as in the Sam. text and version, and one Heb. MS. supports this rendering.

2. ([Vat. *Phalēth*]; *Phleth*). Son of Jonathan and a descendant of Jerahmeel through Onam, his son by Atarah (1 Chr. ii. 33).

**PELETHITES** (פֶּלְתִּיָּה: *Phalēti*; *Phelēti*; [Vat. *Phalētti*, *Phelēthi*, *Phalēti*; Alex. *Phelēthi*, *Phelēthi*, *Phalēthi*; FA. in 1 Chr., *Phalēti*;] *Phelethi*), mentioned only in the phrase

פֶּלְתִּיָּה וְיִרְמְיָה, rendered in the A. V. "the Cherethites and the Pelethites." These two collectives designate a force that was evidently David's body-guard. Their names have been supposed either to indicate their duties, or to be gentile nouns. Gesenius renders them "executioners and runners," comparing the פֶּלְתִּיָּה, "executioners and runners" of a later time (2 K. xi. 4, 19); and the unused roots פֶּלְתִּיָּה and פֶּלְתִּיָּה, as to both of which we shall speak later, admit this sense. In favor of this view, the supposed parallel phrase, and the duties in which these guards were employed, may be cited. On the other hand, the LXX. and Vulg. retain their names untranslated,

and the Syriac and Targ. Jon. translate them differently from the rendering above and from each other. In one place, moreover, the Gittites are mentioned with the Cherethites and Pelethites among David's troops (2 Sam. xv. 18); and elsewhere we read of the Cherethim, who bear the same name in the plural, either as a Philistine tribe or as Philistines themselves (1 Sam. xxx. 14; Ezr. xxv. 16; Zeph. ii. 5). Gesenius objects that David's body-guard would scarcely have been chosen from a nation so hateful to the Israelites as the Philistines. But it must be remembered that David in his later years may have mistrusted his Israelite soldiers, and relied on the Philistine troops, some of whom, with Ittai the Gittite, who was evidently a Philistine, and not an Israelite from Gath [ITTAI], were faithful to him at the time of Absalom's rebellion. He also argues that it is improbable that two synonymous appellations should be thus used together; but this is on the assumption that both names signify Philistines, whereas they may designate Philistine tribes. (See *Theo.* pp. 719, 1107.)

The Egyptian monuments throw a fresh light upon this subject. From them we find that kings of the XIXth and XXth dynasties had in their service mercenaries of a nation called SHAYRETANA, which Rameses III. conquered, under the name "SHAYRETANA of the Sea." This king fought a naval battle with the SHAYRETANA of the Sea, in alliance with the TOKKAREE, who were evidently, from their physical characteristics, a kindred people to them, and to the PELESATU, or Philistines, also conquered by him. The TOKKAREE and the PELESATU both wear a peculiar dress. We thus learn that there were two peoples of the Mediterranean kindred to the Philistines, one of which supplied mercenaries to the Egyptian kings of the XIXth and XXth dynasties. The name SHAYRETANA, of which the first letter was also pronounced KH, is almost letter for letter the same as the Hebrew Cherethim; and since the SHAYRETANA were evidently cognate to the Philistines, their identity with the Cherethim cannot be doubted. But if the Cherethim supplied mercenaries to the Egyptian kings in the thirteenth century B. C., according to our reckoning, it cannot be doubted that the same name in the designation of David's body-guard denotes the same people or tribe. The Egyptian SHAYRETANA of the sea are probably the Cretans. The Pelethites, who, as already remarked, are not mentioned except with the Cherethites, have not yet been similarly traced in Egyptian geography, and it is rash to suppose their name to be the same as that of the Philistines,

פְּלִשְׁתִּי, for פְּלִשְׁתִּי; for, as Gesenius remarks, this contraction is not possible in the Semitic languages. The similarity, however, of the two names would favor the idea which is suggested by the mention together of the Cherethites and Pelethites, that the latter were of the Philistine stock as well as the former. As to the etymology of the names, both may be connected with the migration of the Philistines. As already noticed, the former has

been derived from the root פָּרַת, "he cut, cut off, destroyed," in Niphal "he was cut off from his country, driven into exile, or expelled," so that we might as well read "exiles" as "executioners."

The latter, from פָּלַת, an unused root, the Arab

فَلَّت, "he escaped, fled," both being cognate to פָּלַת, "he was smooth," thence "he slipped away, escaped, and caused to escape," where the rendering "the fugitives" is at least as admissible as "the runners." If we compare these two names so rendered with the gentle name of the Philistine nation itself, פְּלִשְׁתִּי, "a wanderer, stranger,"

from the unused root פָּלַשׁ, "he wandered or emigrated," these previous inferences seem to become irresistible. The appropriateness of the names of these tribes to the duties of David's body-guard would then be accidental, though it does not seem unlikely that they should have given rise to the adoption in later times of other appellations for the royal body-guard, definitely signifying "executioners and runners." If, however,

הַפְּלִשְׁתִּי הַיָּמִינִי meant nothing but executioners and runners, it is difficult to explain the change to הַיָּמִינִי הַפְּלִשְׁתִּי. R. S. P.

PELI'AS (Πελίας; Alex. Παιδειας; Pelias). A corruption of BEDEIAH (1 Esdr. ix. 34; comp. Ezr. x. 35). Our translators followed the Vulgate.

PELICAN (קַאֲתִי, *kāth*: πελεκάν, ὄρνεον, χαμαιλέον, καταβάκτης: *onocrotalus, pelican*). Amongst the unclean birds mention is made of the *kāth* (Lev. xi. 18; Deut. xiv. 17). The suppliant psalmist compares his condition to "a *kāth* in the wilderness" (Ps. cii. 6). As a mark of the desolation that was to come upon Edom, it is said that "the *kāth* and the bittern should possess it" (Is. xxxiv. 11). The same words are spoken of Nineveh (Zeph. ii. 14). In these two last places the A. V. has "cormorant" in the text, and "pelican" in the margin. The best authorities are in favor of the pelican being the bird denoted by *kāth*. The etymology of the name, from a word meaning "to vomit," leads also to the same conclusion, for it doubtless has reference to the habit which this bird has of pressing its under mandible against its breast, in order to assist it to disgorge the contents of its capacious pouch for its young. This is, with good reason, supposed to be the origin of the fable about the pelican feeding its young with its own blood, the red nail on the upper mandible serving to complete the delusion.<sup>b</sup>

The expression "pelican of the wilderness" has, with no good reason, been supposed by some to prove that the *kāth* cannot be denoted by this bird. Shaw (*Trav.* ii. 303, 8vo ed.) says "the pelican must of necessity starve in the desert," as it is essentially a water bird. In answer to this objection, it will be enough to observe that the term

<sup>a</sup> Michaelis Philistæos פְּלִשְׁתִּי, dictos esse censet, utpote *ezsules* (v. rad. Niph. no. 3) ut idem valet quod ΑΛΛόφινιαι (*Theo.* p. 719).

<sup>b</sup> The reader is referred to a curious work by a Scotch divine, Archibald Simson by name, entitled

"Hieroglyphica Animalium, Vegetabilium et Metallorum, quæ in Scripturis sacris reperiuntur," Edinb. 1622, 4to. In this work are some wild fancies about the pelican, which serve to show the state of zoology etc., at the period in which the author lived.

*wilderness* ("wilderness") is by no means restricted to barren sandy spots destitute of water. "The idea," says Prof. Stanley, "is that of a wide open space, with or without actual pasture; the country of the nomads, as distinguished from that of the agricultural and settled people" (S. of P. p. 486, 5th ed.).<sup>a</sup> Pelicans (*Pelecanus onocrotalus*) are often seen associated in large flocks; at other times single individuals may be observed sitting in lonely and pensive silence on the ledge of some rock a few feet above the surface of the water. (See Kitto, *Pict. Bib.* on Ps. cii. 6.) It is not quite clear what is the particular point in the nature or character of the pelican with which the psalmist compares his pitiable condition. Some have supposed that it consists in the loud cry of the bird: compare "the voice of my sighing" (ver. 5). We are inclined to believe that reference is made to its general aspect as it sits in apparent melancholy mood, with its bill resting on its breast. There is, we think, little doubt but that the pelican is the *káuth* of the Hebrew Scriptures. Oehmman's opinion that the *Pelecanus graculus*, the shag cormorant (*Verm. Samm.* iii. 57), and Bochart's, that the "bittern" is intended, are unsupported by any good evidence. The *P. onocrotalus* (common pel-

*Pelecanus onocrotalus.*

ican) and the *P. crispus* are often observed in Palestine, Egypt, etc. Of the latter Mr. Tristram observed an immense flock swimming out to sea within sight of Mount Carmel (*Ibis*, i. 37).<sup>b</sup>

W. H.

**PEL'ONITE, THE** (פֶּלֹנִי) [see below]:

δ Φελαωνί [Vat. -νει], Alex. ο Φαλλωνι, 1 Chr. xi. 27: δ Φελλωνί, [Vat. FA. ο Φεδωνει,] 1 Chr. xi. 36: δ εκ Φαλλοῦς, [Comp. δ Φαλλωνί,] 1 Chr. xxvii. 10: *Phulonites, Phelonites, Phallonites*. Two of David's mighty men, Helez and Ahijah, were called Pelonites (1 Chr. xi. 27, 36). From 1 Chr. xxvii. 10, it appears that the former was of the tribe of Ephraim, and "Pelonite" would there-

fore be an appellation derived from his place of birth or residence. But in the Targum of R. Joseph it is evidently regarded as a patronymic, and is rendered in the last mentioned passage "of the seed of Pelan." In the list of 2 Sam. xxiii. Helez is called (ver. 26) "the Paltite," that is, as Bertheau (on 1 Chr. xi.) conjectures, of Beth-Palet, or Beth-Phelet, in the south of Judah. But it seems probable that "Pelonite" is the correct reading. [See PALTITE.] "Ahijah the Pelonite" appears in 2 Sam. xxiii. 34 as "Eliam the son of Ahithophel the Gilonite," of which the former is a corruption; "Ahijah" forming the first part of "Ahithophel," and "Pelonite" and "Gilonite" differing only by פ and ג. If we follow the LXX. of 1 Chr. xxvii. the place from which Helez took his name would be of the form Phallu, but there is no trace of it elsewhere, and the LXX. must have had a differently pointed text. In Heb. *pelóni* corresponds to the Greek δ δεινα, "such a one:" it still exists in Arabic and in the Spanish *Don Fulano*, "Mr. So-and-so." W. A. W.

**PEN.** [WRITING.]

**PEN'IEL** (פְּנִיֵּאל; Samar. פנו אל [see below]: εἶδος θεῶν: *Phnuel*, and so also Peshito). The name which Jacob gave to the place in which he had wrestled with God: "He called the name of the place 'Face of El,' for I have seen Elohim face to face" (Gen. xxxii. 30). With that singular correspondence between the two parts of this narrative which has been already noticed under **MAHANAIM**, there is apparently an allusion to the bestowal of the name in xxxiii. 10, where Jacob says to Esau, "I have seen thy face as one sees the face of Elohim." In xxxii. 31, and the other passages in which the name occurs, its form is changed to **PENUEL**. On this change the lexicographers throw no light. It is perhaps not impossible that *Penuel* was the original form of the name, and that the slight change to *Peniel* was made by Jacob or by the historian to suit his allusion to the circumstance under which the patriarch first saw it. The Samaritan Pentateuch has *Penu-el* in all. The promontory of the *Ras es-Shukh*, on the coast of Syria above *Beirut*, was formerly called *Theoprosopon*, probably a translation of *Peniel*, or its Phœnician equivalent. G.

**PENIN'NAH** (פְּנִינָה) [*coral*]: Φενννα:

*Phennna*), one of the two wives of Elkanah, the other being Hannah, the mother of Samuel (1 Sam. i. 2).

\* **PENKNIFE** (Jer. xxxvi. 23). [**KNIFE.**]

**PENNY, PENNYWORTH.** In the A. V., in several passages of the N. T., "penuny," either alone or in the compound "pennyworth," occurs as the rendering of the Greek δηνάριον, the name of the Roman *denarius* (Matt. xx. 2, xxii. 19; Mark vi. 37, xii. 15; Luke xx. 24; John vi. 7; Rev. vi. 6). The denarius was the chief Roman silver coin, from the beginning of the coinage of the city to the early part of the third century. Its name continued to be applied to a silver piece as late as the time of the earlier Byzantines. The states that arose from the ruins of the Roman

<sup>a</sup> As a matter of fact, however, the pelican, after having filled its pouch with fish and mollusks, often flies retro miles inland away from water, to some spot where it consumes the contents of its pouch.

<sup>b</sup> *P. crispus* breeds in vast numbers in the flat plain of the Dobrudscha (in European Turkey); its habits there bear out your remark of the pelican retiring inland to digest its food.—H. B. TRISTRAM

empire imitated the coinage of the imperial mints, and in general called their principal silver coin the denarius, whence the French name *denier* and the Italian *denaro*. The chief Anglo-Saxon coin, and for a long period the only one, corresponded to the denarius of the Continent. It continued to be current under the Normans, Plantagenets, and Tudors, though latterly little used. It is called penny, denarius, or denier, which explains the employment of the first word in the A. V. [In Udal's version of the Paraphrase of Erasmus (1549) the word is Anglicized by "denarie."] R. S. P.

**PENTATEUCH, THE.** The Greek name given to the five books commonly called the Five Books of Moses (*ἡ πεντάτευχος* sc. *βιβλος*; Pentateuchus sc. liber; the fivefold book; from *τεῦχος*, which meaning originally "vessel instrument," etc., came in Alexandrine Greek to mean "book"). In the time of Ezra and Nehemiah it was called "the Law of Moses" (Ezr. vii. 6); or "the book of the Law of Moses" (Neh. viii. 1); or simply "the Book of Moses" (Ezr. vi. 18; Neh. xiii. 1; 2 Chr. xv. 4, xxxv. 12). This was beyond all reasonable doubt our existing Pentateuch. The book which was discovered in the Temple in the reign of Josiah, and which is entitled (2 Chr. xxxiv. 14) "the book of the Law of Jehovah by the hand of Moses," was substantially, it would seem, the same volume, though it may have undergone some revision by Ezra. In 2 Chr. xxxiv. 30, it is styled "the book of the Covenant," and so also in 2 K. xxiii. 2, 21, whilst in 2 K. xxii. 8 Hilkiah says, "I have found 'the book of the Law.'" Still earlier in the reign of Jehoshaphat we find a "book of the Law of Jehovah" in use (2 Chr. xvii. 9). And this was probably the earliest designation, for a "book of the Law" is mentioned in Deuteronomy (xxxi. 26), though it is questionable whether the name as there used refers to the whole Pentateuch, or only to Deuteronomy; probably, as we shall see, it applies only to the latter. The present Jews usually call the whole by the name of *Torah*, i. e. "the Law," or *Torath Mosheh*, "the Law of Moses." The Rabbinical title is חֲמִשָּׁתָּה סְפָרִים, "the five-fifths of the Law." In the preface to the Wisdom of Jesus the son of Sirach, it is called "the Law," which is also a usual name for it in the New Testament (Matt. xii. 5, xxii. 36, 40; Luke x. 26; John viii. 5, 17). Sometimes the name of Moses stands briefly for the whole work ascribed to him (Luke xxiv. 27). Finally, the whole Old Testament is sometimes called *a potiori parte*, "the Law" (Matt. v. 18; Luke xvi. 17; John vii. 49, x. 34, xii. 34). In John xv. 25; Rom. iii. 19, words from the Psalms, and in 1 Cor. xiv. 21 from Isaiah, are quoted as words of the Law.

The division of the whole work into five parts has by some writers been supposed to be original. Others (as Leusden, Hävernick, and Lengerke), with more probability, think that the division was made by the Greek translators. For the titles of the several books are not of Hebrew but of Greek origin. The Hebrew names are merely taken from the first words of each book, and in the first instance only designated particular sections and not whole books. The MSS. of the Pentateuch form a single roll or volume, and are divided not into books, but into the larger and smaller sections called *Parashyoth* and *Sedarim*. Besides this, the Jews

distribute all the laws in the Pentateuch under the two heads of affirmative and negative precepts. Of the former they reckon 248; because, according to the anatomy of the Rabbins, so many are the parts of the human body: of the latter they make 365, which is the number of days in the year, and also the number of veins in the human body. Accordingly the Jews are bound to the observance of 613 precepts: and in order that these precepts may be perpetually kept in mind, they are wont to carry a piece of cloth foursquare, at the four corners of which they have fringes consisting of 8 threads a-piece, fastened in 5 knots. These fringes are called *ציצית*, a word which in numbers denotes 600: add to this the 8 threads and the 5 knots, and we get the 613 precepts. The five knots denote the five books of Moses. (See *Iab. Talmud, Miccoth*, sect. 3; *Maimon. Pref. to Jad Ha-chazakah*; *Leusden, Philol.* p. 53.) Both Philo (*de Abraham, ad init.*) and Josephus (*c. Apton.* i. 8) recognize the division now current. As no reason for this division can satisfactorily be found in the structure of the work itself, Vaihinger supposes that the symbolical meaning of the number five led to its adoption. For ten is the symbol of completion or perfection, as we see in the ten commandments [and so in Genesis we have ten "generations"], and therefore five is a number which as it were confesses imperfection and prophesies completion. The Law is not perfect without the Prophets, for the Prophets are in a special sense the bearers of the Promise; and it is the Promise which completes the Law. This is questionable. There can be no doubt, however, that this division of the Pentateuch influenced the arrangement of the Psalter in five books. The same may be said of the five Megilloth of the Hagiographa (Canticles, Ruth, Lamentations, Ecclesiastes, and Esther), which in many Hebrew Bibles are placed immediately after the Pentateuch.

For the several names and contents of the Five Books we refer to the articles on each Book, where questions affecting their integrity and genuineness are also discussed. In the article on Genesis the scope and design of the whole work is pointed out. We need only briefly observe here that this work, beginning with the record of Creation and the history of the primitive world, passes on to deal more especially with the early history of the Jewish family. It gives at length the personal history of the three great Fathers of the family: it then describes how the family grew into a nation in Egypt, tells us of its oppression and deliverance, of its forty years' wandering in the wilderness, of the giving of the Law, with all its enactments both civil and religious, of the construction of the Tabernacle, of the numbering of the people, of the rights and duties of the priesthood, as well as of many important events which befell them before their entrance into the Land of Canaan, and finally concludes with Moses' last discourses and his death. The unity of the work in its existing form is now generally recognized. It is not a mere collection of loose fragments carelessly put together at different times, but bears evident traces of design and purpose in its composition. Even those who discover different authors in the earlier books, and who deny that Deuteronomy was written by Moses are still of opinion that the work in its present form is a connected whole, and was at least re-

luted to its present shape by a single reviser or editor."

The question has also been raised, whether the Book of Joshua does not, properly speaking, constitute an integral portion of this work. To this question Ewald (*Gesch.* i. 175), Knobel (*Genesis*, Vorbem. § 1, 2), Lengerke (*Kenntn.* lxxxiii.), and Stähelin (*Krit. Unters.* p. 91) give a reply in the affirmative. They seem to have been led to do so, partly because they imagine that the two documents, the Elohist and Jehovistic, which characterize the earlier books of the Pentateuch, may still be traced, like two streams, the waters of which never wholly mingle though they flow in the same channel, running on through the book of Joshua; and partly because the same work which contains the promise of the land (Gen. xv.) must contain also — so they argue — the fulfillment of the promise. But such grounds are far too arbitrary and uncertain to support the hypothesis which rests upon them. All that seems probable is, that the book of Joshua received a final revision at the hands of Ezra, or some earlier prophet, at the same time with the books of the Law.

The fact that the Samaritans, who it is well known did not possess the other books of Scripture, have besides the Pentateuch a book of Joshua (see *Chronicon Samaritanum*, etc., ed. Juyrboll, Lugd. Bat. 1848), indicates no doubt an early association of the one with the other; but is no proof that they originally constituted one work, but rather the contrary. Otherwise the Samaritans would naturally have adopted the canonical recension of Joshua. We may therefore regard the Five Books of Moses as one separate and complete work. For a detailed view of the several books we must refer, as we have said, to the Articles where they are severally discussed. The questions which we have left for this article are those connected with the authorship and date of the Pentateuch as a whole.

It is necessary here at the outset to state the exact nature of the investigation which lies before us. Many English readers are alarmed when they are told, for the first time, that critical investigation renders it doubtful whether the whole Pentateuch in its present form was the work of Moses. On this subject there is a strange confusion in many minds. They suppose that to surrender the recognized authorship of a sacred book is to surrender the truth of the book itself. Yet a little reflection should suffice to correct such an error. For who can say now who wrote the books of Samuel, or Ruth, or Job, or to what authorship many of the Psalms are to be ascribed? We are quite sure that these books were not written by the persons whose names they bear. We are scarcely less sure that many of the Psalms ascribed to David were not written by him, and our own translators have signified the doubtfulness of the inscriptions by separating them from the Psalms, of which in the Hebrew text they were made to form a constituent

part. These books of Scripture, however, and these divine poems, lose not a whit of their value or of their authority because the names of their authors have perished. Truth is not a thing dependent on names. So likewise, if it should turn out that portions of the Pentateuch were not written by Moses, neither their inspiration nor their trustworthiness is thereby diminished. All will admit that one portion at least of the Pentateuch — the 34th chapter of Deuteronomy, which gives the account of Moses' death — was not written by him. But in making this admission the principle for which we contend is conceded. Common sense compels us to regard this chapter as a later addition. Why then may not other later additions have been made to the work? If common sense leads us to such a conclusion in one instance, critical examination may do so on sufficient grounds in another.<sup>b</sup>

At different times suspicions have been entertained that the Pentateuch as we now have it is not the Pentateuch of the earliest age, and that the work must have undergone various modifications and additions before it assumed its present shape.

So early as the second century we find the author of the Clementine Homilies calling in question the authenticity of the Mosaic writings. According to him the Law was only given orally by Moses to the seventy elders, and not consigned to writing till after his death; it subsequently underwent many changes, was corrupted more and more by means of the false prophets, and was especially filled with erroneous anthropomorphic conceptions of God, and unworthy representations of the characters of the Patriarchs (*Hom.* ii. 38, 43, iii. 4, 47; *Neander Gnost. Systeme*, 380). A statement of this kind, unsupported, and coming from an heretical, and therefore suspicious source, may seem of little moment: it is however remarkable, so far as it indicates an early tendency to cast off the received traditions respecting the books of Scripture; whilst at the same time it is evident that this was done cautiously, because such an opinion respecting the Pentateuch was said to be for the advanced Christian only, and not for the simple and unlearned.

Jerome, there can be little doubt, had seen the difficulty of supposing the Pentateuch to be altogether, in its present form, the work of Moses; for he observes (*contra Helvid.*): "Sive Mosen dicere volueris auctorem Pentateuchi sive Esram ejusdem instauratorem operis," with reference apparently to the Jewish tradition on the subject. Aben Ezra (†1167), in his *Comm.* on Deut. i. 1, threw out some doubts as to the Mosaic authorship of certain passages, such as Gen. xii. 6, Deut. iii. 10, 11, xxxi. 9, which he either explained as later interpolations, or left as mysteries which it was beyond his power to unravel. For centuries, however, the Pentateuch was generally received in the Church without question as written by Moses. The age

<sup>a</sup> See Ewald, *Geschichte*, i. 175; and Stähelin, *Kritisch. Unters.* p. 1.

<sup>b</sup> It is strange to see how widely the misconception which we are anxious to obviate extends. A learned writer, in a recent publication, says, in reference to the alleged existence of different documents in the Pentateuch: "This exclusive use of the one Divine Name in some portions, and of the other in other portions, it is said, characterizes two different authors writing at different times; and consequently Genesis is

composed of two different documents, the one Elohist, the other Jehovistic, which moreover differ in statement; and consequently this book was not written by Moses, and is neither inspired nor trustworthy" (*Aids to Faith*, p. 190). How it follows that a book is neither inspired nor trustworthy because its authorship is unknown we are at a loss to conceive. A large part of the canon must be sacrificed, if we are only to receive books whose authorship is satisfactorily ascertained.

of criticism had not yet come. The first signs of its approach were seen in the 17th century. In the year 1651 we find Hobbes writing: "Videtur Pentateuchus potius de Mose quam a Mose scriptus" (*Leviathan* c. 33). Spinoza (*Tract. Theol.-Polit.* c. 8, 9, published in 1679) set himself boldly to controvert the received authorship of the Pentateuch. He alleged against it (1) later names of places, as Gen. xiv. 14 comp. with Judg. xviii. 29; (2) the continuation of the history beyond the days of Moses, Ex. xvi. 35 comp. with Josh. v. 12; (3) the statement in Gen. xxxvi. 31, "before there reigned any king over the children of Israel." Spinoza maintained that Moses issued his commands to the elders, that by them they were written down and communicated to the people, and that later they were collected and assigned to suitable passages in Moses' life. He considered that the Pentateuch was indebted to Ezra for the form in which it now appears. Other writers began to suspect that the book of Genesis was composed of written documents earlier than the time of Moses. So Vitringa (*Observ. Sacr.* i. 3); Le Clerc (*de Script. Pentateuchi*, § 11), and R. Simon (*Hist. Critique du V. T.* lib. i. c. 7, Rotterdam, 1685). According to the last of these writers, Genesis was composed of earlier documents, the Laws of the Pentateuch were the work of Moses, and the greater portion of the history was written by the public scribe who is mentioned in the book. Le Clerc supposed that the priest who, according to 2 K. xvii. 27, was sent to instruct the Samaritan colonists, was the author of the Pentateuch.

But it was not till the middle of the last century that the question as to the authorship of the Pentateuch was handled with anything like a discerning criticism. The first attempt was made by a layman, whose studies we might have supposed would scarcely have led him to such an investigation. In the year 1753, there appeared at Brussels a work, entitled: "Conjectures sur les Mémoires originaux, dont il parait que Moïse s'est servi pour composer le Livre de Genèse." It was written in his 69th year by Astruc, Doctor and Professor of Medicine in the Royal College at Paris, and Court Physician to Louis XIV. His critical eye had observed that throughout the book of Genesis, and as far as the 6th chapter of Exodus, traces were to be found of two original documents, each characterized by a distinct use of the names of God; the one by the name Elohim, and the other by the name Jehovah. Besides these two principal documents, he supposed Moses to have made use of ten others in the composition of the earlier part of his work. Astruc was followed by several German writers on the path which he had traced; by Jerusalem in his *Letters on the Mosaic Writings and Philosophy*; by Schulzens, in his *Dissertatio quæ disquiratur, unde Moses res in libro Geneseos descriptas dederit*; and with considerable learning and critical acumen by Ilgen (*Urkunden der Jerusalemischen Tempelarchiv*, 1er Theil, Halle, 1798), and Eichhorn (*Einleitung in d. A. T.*).

But this "documentary hypothesis," as it is called, was too conservative and too rational for some critics. Vater, in his *Commentar üb. den Pentateuch*, 1815, and A. T. Hartmann, in his *Linguist. Einl. in d. Stud. der Bücher des A. Test.* 1818, maintained that the Pentateuch consisted merely of a number of fragments loosely strung together without order or design. The former supposed a collection of laws, made in the times of

David and Solomon, to have been the foundation of the whole: that this was the book discovered in the reign of Josiah, and that its fragments were afterwards incorporated in Deuteronomy. All the rest, consisting of fragments of history and of laws written at different periods up to this time, were, according to him, collected and shaped into their present form between the times of Josiah and the Babylonish Exile. Hartmann also brings down the date of the existing Pentateuch as late as the Exile. This has been called the "Fragmentary hypothesis." Both of these have now been superseded by the "Supplementary hypothesis," which has been adopted with various modifications by De Wette, Bleek, Stähelin, Tuch, Lengerke, Hupfeld, Knobel, Bunsen, Kurtz, Delitzsch, Schultz, Vaihinger, and others. They all alike recognize two documents in the Pentateuch. They suppose the narrative of the Elohist, the more ancient writer, to have been the foundation of the work, and that the Jehovist or later writer making use of this document, added to and commented upon it, sometimes transcribing portions of it intact, and sometimes incorporating the substance of it into his own work.

But though thus agreeing in the main, they differ widely in the application of the theory. Thus, for instance, De Wette distinguishes between the Elohist and the Jehovist in the first four Books, and attributes Deuteronomy to a different writer altogether (*Einl. ins A. T.* § 150 ff.). So also Lengerke, though with some differences of detail in the portions he assigns to the two editors. The last places the Elohist in the time of Solomon, and the Jehovistic editor in that of Hezekiah; whereas Tuch puts the first under Saul, and the second under Solomon. Stähelin, on the other hand, declares for the identity of the Deuteronomist and the Jehovist: and supposes the last to have written in the reign of Saul, and the Elohist in the time of the Judges. Hupfeld (*die Quellen der Genesis*) finds, in Genesis at least, traces of three authors, an earlier and a later Elohist, as well as the Jehovist. He is peculiar in regarding the Jehovistic portion as an altogether original document, written in entire independence, and without the knowledge even of the Elohist record. A later editor or compiler, he thinks, found the two books, and threw them into one. Vaihinger (in Herzog's *Encyclopädie*) is also of opinion that portions of three original documents are to be found in the first four books, to which he adds some fragments of the 32d and 34th chapters of Deuteronomy. The Fifth Book, according to him, is by a different and much later writer. The Pre-elohist he supposes to have flourished about 1200 B. C., the Elohist some 200 years later, the Jehovist in the first half of the 8th century B. C., and the Deuteronomist in the reign of Hezekiah.

Delitzsch agrees with the writers above mentioned in recognizing two distinct documents as the basis of the Pentateuch, especially in its earlier portions; but he entirely severs himself from them in maintaining that Deuteronomy is the work of Moses. His theory is this: the kernel or first foundation of the Pentateuch is to be found in the Book of the Covenant (Ex. xix.-xxiv.), which was written by Moses himself, and afterwards incorporated into the body of the Pentateuch, where it at present stands. The rest of the Laws given in the wilderness, till the people reached the plains of Moab, were communicated orally by Moses and taken down by the priests, whose business it was

thus to provide for their preservation (Deut. xvii. 11, comp. xxiv. 8, xxxiii. 10; Lev. x. 11, comp. xv. 31). Inasmuch as Deuteronomy does not presuppose the existence in writing of the entire earlier legislation, but on the contrary recapitulates it with the greatest freedom, we are not obliged to assume that the proper codification of the Law took place during the forty years' wandering in the desert. This was done, however, shortly after the occupation of the land of Canaan. On that sacred soil was the first definite portion of the history of Israel written; and the writing of the history itself necessitated a full and complete account of the Mosaic legislation. A man, such as Eleazar the son of Aaron, the priest (see Num. xxvi. 1, xxxi. 21), wrote the great work beginning with the first words of Genesis, including in it the Book of the Covenant, and perhaps gave only a short notice of the last discourses of Moses, because Moses had written them down with his own hand. A second — who may have been Joshua (see especially Lev. xxxii. 44; Josh. xxiv. 26, and comp. on the other hand 1 Sam. x. 25), who was a prophet, and spake as a prophet, or one of the elders to whom Moses' spirit rested (Num. xi. 25), and many of whom survived Joshua (Josh. xxiv. 31) — completed the work, taking Deuteronomy, which Moses had written, for his model, and incorporating it into his own book. Somewhat in this manner arose the *Torah* (or Pentateuch), each narrator further availing himself when he thought proper of other written documents.

Such is the theory of Delitzsch, which is in many respects worthy of consideration, and which has been adopted in the main by Kurtz (*Gesch. d. A. B. i. § 20, and ii. § 99, 6*), who formerly was opposed to the theory of different documents, and sided rather with Hengstenberg and the critics of the extreme conservative school. There is this difference, however, that Kurtz objects to the view that Deuteronomy existed before the other books, and believes that the rest of the Pentateuch was committed to writing before, not after, the occupation of the Holy Land. Finally, Schultz, in his recent work on Deuteronomy, recognizes two original documents in the Pentateuch, the Elohistie being the base and groundwork of the whole, but contends that the Jehovistic portions of the first four books, as well as Deuteronomy, except the concluding portion, were written by Moses. Thus he agrees with Delitzsch and Kurtz in admitting two documents and the Mosaic authorship of Deuteronomy, and with Stähelin in identifying the Deuteronomist with the Jehovist. That these three writers more nearly approach the truth than any others who have attempted to account for the phenomena of the existing Pentateuch, we are convinced. Which of the three hypotheses is best supported by facts and by a careful examination of the record, we shall see hereafter.

One other theory has, however, to be stated before we pass on.

The author of it stands quite alone, and it is not likely that he will ever find any disciple bold enough to adopt his theory: even his great admirer Bunsen forsakes him here. But it is due to Ewald's great and deserved reputation as a scholar, and to his uncommon critical sagacity, briefly to state what that theory is. He distinguishes, then, seven different authors in the great Book of Origines or Primitive History (comprising the Pentateuch and Joshua). The oldest histor-

ical work, of which but a very few fragments remain, is the Book of the Wars of Jehovah. Then follows a biography of Moses, of which also but small portions have been preserved. The third and fourth documents are much more perfect: these consist of the Book of the Covenant, which was written in the time of Samson, and the Book of Origines, which was written by a priest in the time of Solomon. Then comes, in the fifth place, the third historian of the primitive times, or the first prophetic narrator, a subject of the northern kingdom in the days of Elijah or Joel. The sixth document is the work of the fourth historian of primitive times, or the second prophetic narrator, who lived between 800 and 750. Lastly comes the fifth historian, or third prophetic narrator, who flourished not long after Joel, and who collected and reduced into one corpus the various works of his predecessors. The real purposes of the history, both in its prophetic and its legal aspects, began now to be discerned. Some steps were taken in this direction by an unknown writer at the beginning of the 7th century, B. C.; and then in a far more comprehensive manner by the Deuteronomist, who flourished in the time of Manasseh, and lived in Egypt. In the time of Jeremiah appeared the poet who wrote the Blessing of Moses, as it is given in Deuteronomy. A somewhat later editor incorporated the originally independent work of the Deuteronomist, and the lesser additions of his two colleagues, with the history as left by the fifth narrator, and thus the whole was finally completed. "Such," says Ewald (and his words, seriously meant, read like delicate irony), "were the strange fortunes which this great work underwent before it reached its present form."

Such is a brief summary of the views which have been entertained by a large number of critics, many of them men of undoubted piety as well as learning, who have found themselves compelled, after careful investigation, to abandon the older doctrine of the Mosaic authorship of the Pentateuch, and to adopt, in some form or other, the theory of a compilation from earlier documents.

On the other side, however, stands an array of names scarcely less distinguished for learning, who maintain not only that there is a unity of design in the Pentateuch — which is granted by many of those before mentioned — but who contend that this unity of design can only be explained on the supposition of a single author, and that this author could have been none other than Moses. This is the ground taken by Hengstenberg, Hävernick, Drechsler, Ranke, Welte, and Keil. The first mentioned of these writers has no doubt done admirable service in reconciling and removing very many of the alleged discrepancies and contradictions in the Pentateuch: but his zeal carries him in some instances to attempt a defense the very ingenuity of which betrays how unsatisfactory it is; and his attempt to explain the use of the Divine Names, by showing that the writer had a special design in the use of the one or the other, is often in the last degree arbitrary. Drechsler, in his work on the *Unity and Genuineness of Genesis* (1838), fares no better, though his remarks are the more valuable because in many cases they coincide, quite independently, with those of Hengstenberg. Later, however, Drechsler modified his view, and supposed that the several uses of the Divine Names were owing to a didactic purpose on the part of the writer according as his object was to show a particular re-

ation of God to the world, whether as Elohim or as Jehovah. Hence he argued that, whilst different streams flowed through the Pentateuch, they were not from two different fountain-heads, but varied according to the motive which influenced the writer, and according to the fundamental thought in particular sections; and on this ground, too, he explained the characteristic phraseology which distinguishes such sections. Ranke's work (*Untersuchungen über den Pentateuch*) is a valuable contribution to the exegesis of the Pentateuch. He is especially successful in establishing the inward unity of the work, and in showing how inseparably the several portions, legal, genealogical, and historical, are interwoven together. Kurtz (in his *Einheit der Genesis*, 1846, and in the first edition of his first volume of the *Geschichte des Alten Bundes*) followed on the same side; but he has since abandoned the attempt to explain the use of the Divine Names on the principle of the different meanings which they bear, and has espoused the theory of two distinct documents. Keil, also, though he does not despair of the solution of the problem, confesses (*Luther. Zeitschr.* 1851-52, p. 235) that "all attempts as yet made, notwithstanding the acumen which has been brought to bear to explain the interchange of the Divine Names in Genesis on the ground of the different meanings which they possess, must be pronounced a failure." Ebrard (*Das Alter des Jehova-Namens*) and Tiele (*Stuhl. und Krit.* 1852) doubt nearly the same admission. This manifest doubtfulness in some cases, and desertion in others from the ranks of the more conservative school, is significant. And it is certainly unfair to claim consistency and unanimity of opinion for one side to the prejudice of the other. The truth is, that diversities of opinion are to be found among those who are opposed to the theory of different documents, as well as amongst those who advocate it. Nor can a theory which has been adopted by Delitzsch, and to which Kurtz has become a convert, be considered as either irrational or irreligious. It may not be established beyond doubt, but the presumptions in its favor are strong; nor, when properly stated, will it be found open to any serious objection.

II. We ask in the next place what is the testimony of the Pentateuch itself with regard to its authorship?

1. We find on reference to Ex. xxiv. 3, 4, that "Moses came and told the people all the words of Jehovah and all the judgments," and that he subsequently "wrote down all the words of Jehovah." These were written on a roll called "the book of the covenant" (ver. 7), and "read in the audience of the people." These "words" and "judgments" were no doubt the Sinaitic legislation so far as it had as yet been given, and which constituted in fact the covenant between Jehovah and the people. Upon the renewal of this covenant after the idolatry of the Israelites, Moses was again commanded by Jehovah to "write these words" (xxxiv. 27).

α Delitzsch, however, will not allow that כִּתְבֵי מֹשֶׁה means in the already existing book, but in one which was to be taken for the occasion; and he refers to Num. v. 23, 1 Sam. x. 25, 2 Sam. xi. 15, for a similar use of the article. כִּתְבֵי he takes here, as in Is. xxx. 8, to mean a separate leaf or plate on which the record was to be made. But the three passages to which he refers do not help him. In the first two

"And," it is added, "he wrote upon the tables the words of the covenant, the ten commandments." Leaving Deuteronomy aside for the present, there are only two other passages in which mention is made of the writing of any part of the Law, and those are Ex. xvii. 14, where Moses is commanded to write the defeat of Amalek in a book (or rather in the book, one already in use for the purpose?); and Num. xxxiii. 2, where we are informed that Moses wrote the journeyings of the children of Israel in the desert and the various stations at which they encamped. It obviously does not follow from these statements that Moses wrote all the rest of the first four books which bear his name. Nor on the other hand does this specific testimony with regard to certain portions justify us in coming to an opposite conclusion. So far nothing can be determined positively one way or the other. But it may be said that we have an express testimony to the Mosaic authorship of the Law in Deut. xxxi. 9-12, where we are told that "Moses wrote this Law" (וְהִלְכָה הַלְוִיִּם), and delivered it to the custody of the priests with a command that it should be read before all the people at the end of every seven years, on the Feast of Tabernacles. In ver. 24 it is further said, that when he "had made an end of writing the words of this Law in a book till they were finished," he delivered it to the Levites to be placed in the side of the ark of the covenant of Jehovah, that it might be preserved as a witness against the people. Such a statement is no doubt decisive, but the question is, How far does it extend? Do the words "this Law" comprise all the Mosaic legislation as contained in the last four books of the Pentateuch, or must they be confined only to Deuteronomy? The last is apparently the only tenable view. In Deut. xvii. 18, the direction is given that the king on his accession "shall write him a copy of this Law in a book out of that which is before the priests the Levites." The words "copy of this Law," are literally "repetition of this Law" (מִשְׁנֵה הַתּוֹרָה), which is another name for the book of Deuteronomy, and hence the LXX. render here τὸ δευτερονόμιον τοῦτο, and Philo τῆν ἐπινομιδα, and although it is true that Onkelos uses מִשְׁנֵה (Mishneh) in the sense of "copy," and the Talmud in the sense of "duplicate" (Carpzov on Schickard's *Jus reg. Hebræor.* pp. 82-84), yet as regards the passage already referred to in xxxi. 9, &c., it was in the time of the second Temple received as an unquestionable tradition that Deuteronomy only, and not the whole Law was read at the end of every seven years, in the year of release. The words are מִתְחִלַּת חֻמֶשׁ אֱלֹהֵי הַדְּבָרִים, "from the beginning of Deuteronomy" (*Sota*, e. 7; Maimon. *Jad ha-chazakah* in Hilchoth Chagiga, c. 3; Re-land, *Antiq. Sac.* p. iv. § 11).<sup>b</sup>

Besides, it is on the face of it very improbable

a particular book kept for the purpose is probably intended; and in 2 Sam. xi. 15, the book or leaf is meant which had already been mentioned in the previous verse. Hence the article is indispensable.

<sup>b</sup> "The passage of the *Sifri*," says Delitzsch on Genesis, p. 63, "one of the oldest Midrashim of the school of Rab (†247), on Deut. xvii. 18, to which Rashi refers on *Sota* 41<sup>a</sup>, is as clear as it is important: 'וְהוֹלֵךְ אֵת מִשְׁנֵה הַתּוֹרָה הַזֹּאת' him (the king) copy 'הוֹלֵךְ אֵת מִשְׁנֵה הַתּוֹרָה הַזֹּאת' in

that the whole Pentateuch should have been read at a national feast, whereas that Deuteronomy, summing up, spiritualizing, and at the same time enforcing the Law should so have been read, is in the highest degree probable and natural. It is in confirmation of this view that all the later literature, and especially the writings of the prophets, are full of references to Deuteronomy as the book with which they might expect the most intimate acquaintance on the part of their hearers. So in other passages in which a written law is spoken of we are driven to conclude that only some part and not the whole of the Pentateuch is meant. Thus in chap. xxvii. 3, 8, Moses commands the people to write "all the words of this Law very plainly" on the stones set up on Mount Ebal. Some have supposed that only the Decalogue, others, that the blessings and curses which immediately follow, were so to be inscribed. Others again (as Schulz, *Deuteron.* p. 87) think that some summary of the Law may have been intended; but it is at any rate quite clear that the expression "all the words of this Law" does not refer to the whole Pentateuch. This is confirmed by Josh. viii. 32. There the history tells us that Joshua wrote upon the stones of the altar which he had built on Mount Ebal "a copy of the Law of Moses (*mishneh torath Mosheh* — the same expression which we have in Deut. xvii. 18), which he wrote in the presence of the children of Israel. . . . And afterward he read all the words of the Law, the blessings and cursings, according to all that is written in the book of the Law." On this we observe, first, that "the blessings and the cursings" here specified as having been engraven on the plaster with which the stones were covered, are those recorded in Deut. xxvii., xxviii., and, next, that the language of the writer renders it probable that other portions of the Law were added. If any reliance is to be placed on what is apparently the oldest Jewish tradition (see p. 2412, note *b*), and if the words rendered in our version "copy of the Law" mean "repetition of the Law," i. e. the book of Deuteronomy, then it was this which was engraven upon the stones and read in the hearing of Israel. It seems clear that the whole of the existing Pentateuch cannot be meant, but either the book of Deuteronomy only, or some summary of the Mosaic legislation. In any case nothing can be argued from any of the passages to which we have referred as to the authorship of the first four books. Schultz, indeed, contends that with chap. xxx. the discourses of Moses end, and that therefore whilst the phrase "this law," whenever it occurs in chaps. i.—xxx., means only Deuteronomy, yet in chap. xxxi., where the narrative is resumed and the history of Moses brought to a conclusion, "this law" would naturally refer to the whole previous legislation. Chapter xxxi. brings, as he says, to a termination, not Deuteronomy only, but the previous books as well; for without it they would be incomplete. In a section, therefore, which concludes the whole, it is reasonable to suppose that the words "this law" designate the whole. He appeals, moreover (against Delitzsch), to the Jewish tradition, and to the words of Josephus, *ὁ ἀρχιερεὺς ἐπὶ βήματος ὑψηλοῦ*

*σταθῆς* . . . ἀναγινώσκέτω τοὺς νόμους πᾶσι, and also to the absence of the article in xxxi. 24, where Moses is said to have made an end of writing the Law in a Book (עַל כְּתָב), whereas when different portions are spoken of, they are said to have been written in *the* Book already existing (Ex. xvii. 14; 1 Sam. x. 25; Josh. xxiv. 26). It is scarcely conceivable, he says, that Moses should have provided so carefully for the safe custody and transmission of his own sermons on the Law, and have made no like provision for the Law itself, though given by the mouth of Jehovah. Even therefore if "this Law" in xxxi. 9, 24, applies in the first instance to Deuteronomy, it must indirectly include, if not the whole Pentateuch, at any rate the whole Mosaic legislation. Deuteronomy everywhere supposes the existence of the earlier books, and it is not credible that at the end of his life the great Legislator should have been utterly regardless of the Law which was the text, and solicitous only about the discourses which were the comment. The one would have been unintelligible apart from the other. There is, no doubt, some force in these arguments; but as yet they only render it probable that if Moses were the author of Deuteronomy, he was the author of a great part at least of the three previous books.

So far, then, the direct evidence from the Pentateuch itself is not sufficient to establish the Mosaic authorship of every portion of the Five Books. Certain parts of Exodus, Leviticus, and Numbers, and the whole of Deuteronomy to the end of chap. xxx., is all that is expressly said to have been written by Moses.

Two questions are yet to be answered. Is there evidence that parts of the work were not written by Moses? Is there evidence that parts of the work are later than his time?

2. The next question we ask is this: Is there any evidence to show that he did not write portions of the work which goes by his name? We have already referred to the last chapter of Deuteronomy which gives an account of his death. Is it probable that Moses wrote the words in Ex. xi. 3, "Moreover the man Moses was very great in the land of Egypt, in the sight of Pharaoh's servants, and in the sight of the people;" — or those in Num. xii. 3, "Now the man Moses was very meek above all the men which were upon the face of the earth?" On the other hand, are not such words of praise just what we might expect from the friend and disciple — for such perhaps he was — who pronounced his eulogium after his death — "And there arose not a prophet since in Israel like unto Moses, whom Jehovah knew face to face" (Deut. xxxiv. 10)?

3. But there is other evidence, to a critical eye not a whit less convincing, which points in the same direction. If, without any theory casting its shadow upon us, and without any fear of consequences before our eyes, we read thoughtfully only the Book of Genesis, we can hardly escape the conviction that it partakes of the nature of a compilation. It has, indeed, a unity of plan, a coherence of parts, a shapeliness and an order, which satisfy

book for himself in particular, and let him not be satisfied with one that he has inherited from his ancestors. מִשְׁנָה מִשְׁנָה nothing else but מִשְׁנָה מִשְׁנָה (Deuteronomy). Not this exclusively, how-

ever, because in ver. 19 is said, to observe *all* the words of this Law. If so, then why is Deuteronomy only mentioned? Because on the day of assembly Deuteronomy only was read."

as that as it stands it is the creation of a single mind. But it bears, also, manifest traces of having been based upon an earlier work; and that earlier work itself seems to have had imbedded in it fragments of still more ancient documents. Before proceeding to prove this, it may not be unnecessary to state, in order to avoid misconception, that such a theory does not in the least militate against the divine authority of the book. The history contained in Genesis could not have been narrated by Moses from personal knowledge; but whether he was taught it by immediate divine suggestion, or was directed by the Holy Spirit to the use of earlier documents, is immaterial in reference to the inspiration of the work. The question may therefore be safely discussed on critical grounds alone.

We begin, then, by pointing out some of the phenomena which the book of Genesis presents. At the very opening of the book, peculiarities of style and manner are discernible, which can scarcely escape the notice of a careful reader even of a translation, which certainly are no sooner pointed out than we are compelled to admit their existence.

The language of chapter i. 1-ii. 3 (where the first chapter ought to have been made to end) is totally unlike that of the section which follows, ii. 4-iii. 23. This last is not only distinguished by a peculiar use of the divine names — for here, and nowhere else in the whole Pentateuch, except Ex. ix. 30, have we the combination of the two, Jehovah Elohim — but also by a mode of expression peculiar to itself. It is also remarkable for preserving an account of the creation distinct from that contained in the first chapter. It may be said, indeed, that this account does not contradict the former, and might therefore have proceeded from the same pen. But, fully admitting that there is no contradiction, the representation is so different that it is far more natural to conclude that it was derived from some other, though not antagonistic, source. It may be argued that here we have, not as in the first instance the Divine idea and method of creation, but the actual relation of man to the world around him, and especially to the vegetable and animal kingdoms: that this is therefore only a resumption and explanation of some things which had been mentioned more broadly and generally before. Still in any case it cannot be denied that this second account has the character of a supplement; that it is designed, if not to correct, at least to explain the other. And this fact, taken in connection with the peculiarities of the phraseology and the use of the divine names in the same section, is quite sufficient to justify the supposition that we have here an instance, not of independent narrative, but of compilation from different sources.

To take another instance. Chapter xiv. is beyond all doubt an ancient monument — papyrus-roll it may have been, or inscription on stone, which has been copied and transplanted in its original form into our present book of Genesis. Archaic it is in its whole character: distinct, too, again, from the rest of the book in its use of the name of God. Here we have El 'Elyon, "the Most High God," used by Melchizedec first, and then by Abraham, who adopts it and applies it to Jehovah, as if to show that it was one God whom he worshipped and whom Melchizedec acknowledged, though they knew Him under different appellations.

We believe, then, that at least these two portions of Genesis — chap. ii. 4-iii. 24, and chap. xiv. — are original documents, preserved, it may have been, like the genealogies, which are also a very prominent feature of the book, in the tents of the patriarchs, and made use of either by the Elohist or the Jehovist for his history. Indeed, Eichhorn seems to be not far from the truth when he observes, "The early portion of the history was composed merely of separate small notices; whilst the family history of the Hebrews, on the contrary, runs on in two continuous narratives: these, however, again have not only here and there some passages inserted from other sources, as chap. xiv., xxxiii. 18-xxxiv. 31, xxxvi. 1-43, xlix. 1-27, but, even where the authors wrote more independently, they often bring together traditions which in the course of time had taken a different form, and merely give them as they had received them, without intimating which is to be preferred" (*Einl. in A. T.* iii. 91, § 412).

We come now to a more ample examination of the question as to the distinctive use of the divine names. Is it the fact, as Astruc was the first to surmise, that this early portion of the Pentateuch, extending from Gen. i. to Ex. vi, does contain two original documents characterized by their separate use of the divine names and by other peculiarities of style? Of this there can be no reasonable doubt. We do find, not only scattered verses, but whole sections thus characterized. Throughout this portion of the Pentateuch the name יהוה (Jehovah)

prevails in some sections, and אלהים (Elohim) in others. There are a few sections where both are employed indifferently; and there are, finally, sections of some length in which neither the one nor the other occurs. A list of these has been given in another article. [GENESIS.] And we find, moreover, that in connection with this use of the divine names there is also a distinctive and characteristic phraseology. The style and idiom of the Jehovah sections is not the same as the style and idiom of the Elohim sections. After Ex. vi. 2-vii. 7, the name Elohim almost ceases to be characteristic of whole sections; the only exceptions to this rule being Ex. xiii. 17-19 and chap. xviii. Such a phenomenon as this cannot be without significance. If, as Hengstenberg and those who agree with him would persuade us, the use of the divine names is to be accounted for throughout by a reference to their etymology — if the author uses the one when his design is to speak of God as the Creator and the Judge, and the other when his object is to set forth God as the Redeemer — then it still cannot but appear remarkable that only up to a particular point do these names stamp separate sections of the narrative, whereas afterwards all such distinctive criterion fails. How is this fact to be accounted for? Why is it that up to Ex. vi. each name has its own province in the narrative, broad and clearly defined, whereas in the subsequent portions the name Jehovah prevails, and Elohim is only interchanged with it here and there? But the alleged design in the use of the divine names will not bear a close examination. It is no doubt true that throughout the story of creation in i. 1-ii. 3 we have Elohim — and this squares with the hypothesis. There is some plausibility also in the attempt to explain the compound use of the divine names in the next section, by the fact that here we have the transition from the History of Creation to the

History of Redemption; that here consequently we should expect to find God exhibited in both characters, as the God who made and the God who redeems the world. That after the Fall it should be Jehovah who speaks in the history of Cain and Abel is on the same principle intelligible, namely, that this name harmonizes best with the features of the narrative. But when we come to the history of Noah the criterion fails us. Why, for instance, should it be said that "Noah found grace in the eyes of Jehovah" (vi. 8), and that "Noah walked with Elohim" (vi. 9)? Surely on the hypothesis it should have been, "Noah walked with Jehovah," for Jehovah, not Elohim, is His Name as the God of covenant, and grace, and self-revelation. Hengstenberg's attempt to explain this phrase by an opposition between "walking with God" and "walking with the world" is remarkable only for its ingenuity. Why should it be more natural or more forcible even then to imply an opposition between the world and its Creator, than between the world and its Redeemer? The reverse is what we should expect. To walk with the world does not mean with the created things of the world, but with the *spirit* of the world; and the emphatic opposition to that spirit is to be found in the spirit which confesses its need and lays hold of the promise of Redemption. Hence to walk with *Jehovah* (not Elohim) would be the natural antithesis to walking with the world. So, again, how on the hypothesis of Hengstenberg, can we satisfactorily account for its being said in vi. 22, "Thus did Noah; according to all that God (*Elohim*) commanded him, so did he;" and in vii. 5, "And Noah did according unto all that *Jehovah* commanded him;" while again in vii. 9 *Elohim* occurs in the same phrase? The elaborate ingenuity by means of which Hengstenberg, Drechsler, and others attempt to account for the specific use of the several names in these instances is in fact its own refutation. The stern constraint of a theory could alone have suggested it.

The fact to which we have referred that there is this distinct use of the names Jehovah and Elohim in the earlier portion of the Pentateuch, is no doubt to be explained by what we are told in Ex. vi. 3, "And Elohim spake unto Moses, and said unto him, I am Jehovah; and I appeared unto Abraham, unto Isaac, and unto Jacob as El-Shaddai, but by my name Jehovah was I not known to them." Does this mean that the name Jehovah was literally unknown to the Patriarchs? that the first revelation of it was that made to Moses in ch. iii. 13, 14? where we read: "And Moses said unto God, Behold, when I come unto the children of Israel, and shall say unto them, The God of your fathers hath sent me unto you: and they shall say to me, What is His Name? what shall I say unto them? And God said unto Moses, I AM THAT I AM: and He said, Thus shalt thou say unto the children of Israel, I AM hath sent me unto you."

This is undoubtedly the first *explanation* of the name. It is now, and now first, that Israel is to be made to understand the full import of that Name. This they are to learn by the redemption out of Egypt. By means of the deliverance they are to recognize the character of their deliverer. The God of their fathers is not a God of power only, but a God of "faithfulness and of love, the God who has made a covenant with his chosen, and who therefore will not forsake them. This

seems to be the meaning of the "I AM THAT I AM" (אֲנִי אֲנִי אֲנִי אֲנִי), or as it may perhaps be better rendered, "I am He whom I prove myself to be." The abstract idea of self-existence can hardly be conveyed by this name; but rather the idea that God is what He is *in relation to his people*. Now, in this sense it is clear God had not fully made Himself known before.

The name Jehovah may have existed, though we have only two instances of this in the history, — the one in the name Moriah (Gen. xxii. 2), and the other in the name of the mother of Moses (Ex. vi. 20), who was called Jochebed; both names formed by composition from the divine name Jehovah. It is certainly remarkable that during the patriarchal times we find no other instance of a proper name so compounded. Names of persons compounded with El and Shaddai we do find, but not with Jehovah. This fact abundantly shows that the name Jehovah was, if not altogether unknown, at any rate not understood. And thus we have "an undesigned coincidence" in support of the accuracy of the narrative. God says in Exodus, He was not known by that name to the patriarchs. The Jehovistic writer of the patriarchal history, whether Moses or one of his friends, uses the name freely as one with which he himself was familiar, but it never appears *in the history* and life of the Patriarchs as one which was familiar to them. On the other hand, passages like Gen. iv. 26, and ix. 26, seem to show that the name was not altogether unknown. Hence Astruc remarks: "Le passage de l'Exode bien entendu ne prouve point que le nom de Jehova fut un nom de Dieu inconnu aux Patriarches et révéla à Moïse le premier, mais prouve seulement que Dieu n'avoit pas fait connoître aux Patriarches toute l'étendue de la signification de ce nom, au lieu qu'il l'a manifestée à Moïse." The expression in Ex. vi. 3, "I was not known, or did not make myself known," is in fact to be understood with the same limitation as when (John i. 17) it is said, that "Grace and truth came by Jesus Christ" as in opposition to the Law of Moses, which does not mean that there was no Grace or Truth in the Old Covenant; or as when (John vii. 39) it is said, "The Holy Ghost was not yet, because Jesus was not yet glorified," which does not of course exclude all operation of the Spirit before. [JEHOVAH, Amer. ed.]

Still this phenomenon of the distinct use of the divine names would scarcely of itself prove the point, that there are two documents which form the groundwork of the existing Pentateuch. But there is other evidence pointing the same way. We find, for instance, the same story told by the two writers, and their two accounts manifestly intertoven; and we find also certain favorite words and phrases which distinguish the one writer from the other.

(1.) In proof of the first, it is sufficient to read the history of Noah.

In order to make this more clear, we will separate the two documents, and arrange them in parallel columns:—

## JEHOVAH.

Gen. vi. 5. And Jehovah saw that the wickedness of man was great in the earth, and that every imagination of the thoughts of his heart was

## ELOHIM.

Gen. vi. 12. And Elohim saw that the earth, and behold it was corrupt; for all flesh had corrupted his way upon the earth

Jehovah.

Elohim.

only evil continually. And it repented Jehovah, etc.

7. And Jehovah said, I will blot out man whom I have created from off the face of the ground.

vii. 1. And Jehovah said to Noah . . . . . These have I seen righteous before me in this generation.

vii. 2. Of all cattle which is clean thou shalt take to thee by sevens, male and his female, and of all cattle which is not clean, two, male and his female.

3. Also of fowl of the air by sevens, male and female, to preserve seed alive on the face of all the earth.

vii. 4. For in yet seven days I will send rain upon the earth forty days and forty nights, and I will blot out all the substance which I have made from off the face of the ground.

vii. 5. And Noah did according to all that Jehovah commanded him.

13. And Elohim said to Noah, The end of all flesh is come before me, for the earth is filled with violence because of them, and behold I will destroy them with the earth.

vi. 9. Noah a righteous man was perfect in his generation. With Elohim did Noah walk.

vi. 19. And of every living thing of all flesh, two of all shalt thou bring into the ark to preserve alive with thee: male and female shall they be.

20. Of fowl after their kind, and of cattle after their kind, of every thing that creepeth on the ground after his kind, two of all shall come unto thee: that thou mayest preserve (them) alive.

vi. 17. And I, behold I do bring the flood, waters upon the earth, to destroy all flesh wherein is the breath of life, from under heaven, all that is in the earth shall perish.

vi. 22. And Noah did according to all that Elohim commanded him; so did he.

Without carrying this parallelism further at length, we will merely indicate by references the traces of the two documents in the rest of the narrative of the Flood: vii. 1, 6, on the Jehovah side, answer to vi. 18, vii. 11, on the Elohim side; vii. 7, 8, 9, 17, 23, to vii. 13, 14, 15, 16, 18, 21, 22; viii. 21, 22, to ix. 8, 9, 10, 11.

It is quite true that we find both in earlier and later writers repetitions, which may arise either from accident or from want of skill on the part of the author or compiler; but neither the one nor the other would account for the constant repetition which here runs through all parts of the narrative.

(2.) But again we find that these duplicate narratives are characterized by peculiar modes of expression; and that, generally, the Elohist and Jehovistic sections have their own distinct and individual coloring.

We find certain favorite phrases peculiar to the Elohist passages. Such, for instance, are אֲרָצָה, "possession;" אֲרָץ מְגוּרִים, "land of sojournings;" לְדוּרוֹתֵיכֶם, or דּוּרוֹתֵיכֶם, "after your, or their, generations;" לְמִינוֹ, or לְמִינָהּ, "after his, or her, kind;" בְּעֵצֶם, "on the self-same day;" אֶרֶץ פְּדָן, "Padan Aram"—for which in the Jehovistic portions we always find אֶרֶץ נַחְרָיִם,

"Aram Naharaim," or simply אֶרֶץ, "Aram;" אֶרֶץ פְּדָן וְרָבָה, "be fruitful and multiply;" אֶרֶץ בְּרִית, "establish a covenant"—the Jehovistic phrase being אֶרֶץ בְּרִית, "to make (lit. 'cut') a covenant." So again we find אֶרֶץ בְּרִית, "sign of the covenant;" אֶרֶץ עוֹלָם, "everlasting covenant;" זָכָר וּנְקֵבָה, "male and female" (instead of the Jehovistic אִישׁ וְאִשְׁתּוֹ), נִשְׂרָץ "swarming or creeping thing;" and נִשְׂרָץ, the common superscription of the genealogical portions, אֵלֶּה הַנּוֹלָדוֹת, "these are the generations of," etc., are, if not exclusively, yet almost exclusively, characteristic of those sections in which the name Elohim occurs.

There is therefore, it seems, good ground for concluding that, besides some smaller independent documents, traces may be discovered of two original historical works, which form the basis of the present book of Genesis and of the earlier chapters of Exodus.

Of these there can be no doubt that the Elohist is the earlier. The passage in Ex. vi. establishes this, as well as the matter and style of the document itself. Whether Moses himself was the author of either of these works is a different question. Both are probably in the main as old as his time; the Elohist certainly is, and perhaps older. But other questions must be considered before we can pronounce with certainty on this head.

4. But we may now advance a step further. There are certain references of time and place which prove clearly that the work, in its present form, is later than the time of Moses. Notices there are scattered here and there which can only be accounted for fairly on one of two suppositions, namely, either a later composition of the whole, or the revision of an editor who found it necessary to introduce occasionally a few words by way of explanation or correction. When, for instance, it is said (Gen. xii. 6, comp. xiii. 7), "And the Canaanite was then (אֵן) in the land," the obvious meaning of such a remark seems to be that the state of things was different in the time of the writer; that now the Canaanite was there no longer; and the conclusion is that the words must have been written after the occupation of the land by the Israelites. In any other book, as Vaihinger justly remarks, we should certainly draw this inference.

The principal notices of time and place which have been alleged as bespeaking the Pentateuch a later date are the following:—

(a.) References of time. Ex. vi. 26, 27, need not be regarded as a later addition, for it obviously sums up the genealogical register given just before, and refers back to ver. 13. But it is more naturally reconcilable with some other authorship than that of Moses. Again, Ex. xvi. 33-36, though it must have been introduced after the rest of the book was written, may have been added by Moses himself, supposing him to have composed the rest of the book. Moses there directs Aaron to lay up the manna before Jehovah, and then we read: "As Jehovah commanded Moses, so Aaron laid it up before the Testimony (i. e. the Ark) to be kept

And the children of Israel did eat manna forty years, until they came to a land inhabited; they did eat manna until they came unto the borders of the land of Canaan." Then follows the remark, "Now an omer is the tenth part of an ephah." It is clear then that this passage was written not only after the ark was made, but after the Israelites had entered the Promised Land. The plain and obvious intention of the writer is to tell us when the manna ceased, not, as Hengstenberg contends, merely how long it continued. So it is said (Josh. v. 12), "And the manna ceased on the morrow after they had eaten of the old corn of the land," etc. The observation, too, about the omer could only have been made when the omer as a measure had fallen into disuse, which it is hardly supposable could have taken place in the lifetime of Moses. Still these passages are not absolutely irreconcilable with the Mosaic authorship of the book. Verse 35 may be a later gloss only, as Le Clerc and Rosenmüller believed.

The difficulty is greater with a passage in the book of Genesis. The genealogical table of Esau's family (ch. xxxvi.) can scarcely be regarded as a later interpolation. It does not interrupt the order and connection of the book; on the contrary, it is a most essential part of its structure; it is one of the ten "generations" or genealogical registers which form, so to speak, the backbone of the whole. Here we find the remark (ver. 31), "And these are the kings that reigned in the land of Edom, before there reigned any king over the children of Israel." Le Clerc supposed this to be a later addition, and Hengstenberg confesses the difficulty of the passage (*Auth. d. Pent. ii.* 202). But the difficulty is not set aside by Hengstenberg's remark that the reference is to the prophecy already delivered in xxxv. 11, "Kings shall come out of thy loins." No unprejudiced person can read the words, "before there reigned any king over the children of Israel," without feeling that, when they were written, kings had already begun to reign over Israel. It is a simple historical fact that for centuries after the death of Moses no attempt was made to establish a monarchy amongst the Jews. Gideon indeed (Judg. viii. 22, 23) might have become king, or perhaps rather military dictator, but was wise enough to decline with firmness the dangerous honor. His son Abimelech, less scrupulous and more ambitious, prevailed upon the Shechemites to make him king, and was acknowledged, it would seem, by other cities, but he perished after a turbulent reign of three years, without being able to perpetuate his dynasty. Such facts are not indicative of any desire on the part of the Israelites at that time to be ruled by kings. There was no deep-rooted national tendency to monarchy which could account for the observation in Gen. xxxvi. on the part of a writer who lived centuries before a monarchy was established. It is impossible not to feel in the words, as Ewald observes, that the narrator almost envies Edom because she had enjoyed the blessings of a regular well-ordered kingdom so long before Israel. An historical remark of this kind, it must be remembered, is widely different from the provision made in Deuteronomy for the possible case that at some later time a monarchy

would be established. It is one thing for a writer framing laws, which are to be the heritage of his people and the basis of their constitution for all time, to prescribe what shall be done when they shall elect a king to reign over them. It is another thing for a writer comparing the condition of another country with his own to say that the one had a monarchical form of government long before the other. The one might be the dictate of a wise sagacity forecasting the future; the other could only be said at a time when both nations alike were governed by kings. In the former case we might even recognize a spirit of prophecy: in the latter this is out of the question. Either then we must admit that the book of Genesis did not exist as a whole till the times of David and Solomon, or we must regard this particular verse as the interpolation of a later editor. And this last is not so improbable a supposition as Vaihinger would represent it. Perfectly true it is that the whole genealogical table could have been no later addition: it is manifestly an integral part of the book. But the words in question, ver. 31, may have been inserted later from the genealogical table in 1 Chr. i. 43; and if so, it may have been introduced by Ezra in his revision of the Law.<sup>a</sup>

Similar remarks may perhaps apply to Lev. xviii. 28: "That the land spue not you out also when ye defile it, as it spued out the nation that was before you." This undoubtedly assumes the occupation of the Land of Canaan by the Israelites. The great difficulty connected with this passage, however, is that it is not a supplementary remark of the writer's, but that the words are the words of God directing Moses what he is to say to the children of Israel (ver. 1). And this is not set aside even if we suppose the book to have been written, not by Moses, but by one of the elders after the entrance into Canaan.

(b.) In several instances older names of places give place to those which came later into use in Canaan. In Gen. xiv. 14, and in Deut. xxxiv. 1, occurs the name of the well-known city of Dan. But in Josh. xix. 47 we are distinctly told that this name was given to what was originally called Ieshem (or Laish) by the children of Dan after they had wrested it from the Canaanites. The same account is repeated still more circumstantially in Judg. xviii. 27-29, where it is positively asserted that "the name of the city was Laish at the first." It is natural that the city should be called Dan in Deut. xxxiv., as that is a passage written beyond all doubt after the occupation of the Land of Canaan by the Israelites. But in Genesis we can only fairly account for its appearance by supposing that the old name Laish originally stood in the MS., and that Dan was substituted for it on some later revision. [DAN.]

In Josh. xiv. 15 (comp. xv. 13, 54) and Judg. i. 10 we are told that the original name of Hebron before the conquest of Canaan was Kirjath-Arba. In Gen. xxiii. 2 the older name occurs, and the explanation is added (evidently by some one who wrote later than the occupation of Canaan), "the same is Hebron." In Gen. xiii. 18 we find the name of Hebron standing alone and without any explanation. Hence Keil supposes that this was

<sup>a</sup> Psalm xiv. furnishes a curious instance of the way in which a passage may be introduced into an earlier book. St. Paul, quoting this psalm in Rom. iii. 10, subjoins other passages of Scripture to his quota-

tion. Hence the LXX. have transferred these passages from the Epistle into the Psalm, and have been followed by the Vulg. and Arab.

the original name, that the place came to be called Kirjath-Arba in the interval between Abraham and Moses, and that in the time of Joshua it was customary to speak of it by its ancient instead of its more modern name. This is not an impossible supposition; but it is more obvious to explain the apparent anachronism as the correction of a later editor, especially as the correction is actually given in so many words in the other passage (xxiii. 2).

Another instance of a similar kind is the occurrence of Hornah in Num. xiv. 45, xxi. 1-3, compared with Judg. i. 17. It may be accounted for, however, thus: In Num. xxi. 3 we have the origin of the name explained. The book of Numbers was written later than this, and consequently, even in speaking of an earlier event which took place at the same spot, the writer might apply the name, though at that point of the history it had not been given. Then in Judg. i. 17 we have the *Canaanite* name Zephath (for the Canaanites naturally would not have adopted the Hebrew name given in token of their victory), and are reminded at the same time of the original Hebrew designation given in the Wilderness.

So far, then, judging the work simply by what we find in it, there is abundant evidence to show that, though the main bulk of it is Mosaic, certain detached portions of it are of later growth. We are not obliged, because of the late date of these portions, to bring down the rest of the book to later times. This is contrary to the express claim advanced by large portions at least to be from Moses, and to other evidence, both literary and historical, in favor of a Mosaic origin. On the other hand, when we remember how entirely during some periods of Jewish history the Law seems to have been forgotten, and again how necessary it would be after the seventy years of exile to explain some of its archaisms and to add here and there short notes to make it more intelligible to the people, nothing can be more natural than to suppose that such later additions were made by Ezra and Nehemiah.

III. We are now to consider the evidence lying outside of the Pentateuch itself, which bears upon its authorship and the probable date of its composition. This evidence is of three kinds: first, direct mention of the work as already existing in the later books of the Bible; secondly, the existence of a book substantially the same as the present Pentateuch amongst the Samaritans; and, lastly, allusions less direct, such as historical references, quotations, and the like, which presuppose its existence.

1. We have direct evidence for the authorship of the Law in Josh. i. 7, 8, "according to all the Law which Moses my servant commanded thee," — "this book of the Law shall not depart out of thy mouth," — and viii. 31, 34, xxiii. 6 (in xxiv. 26, "the book of the Law of God"), in all which places Moses is said to have written it. This agrees with what we have already seen respecting Deuteronomy and certain other portions of the Pentateuch which are ascribed in the Pentateuch itself to Moses. They cannot, however, be cited as proving that the Pentateuch in its present form and in all its parts is Mosaic.

The book of Judges does not speak of the book of the Law. A reason may be alleged for this difference between the books of Joshua and Judges. In the eyes of Joshua, the friend and immediate successor of Moses, the Law would possess unspeakable value. It was to be his guide as the

Captain of the people, and on the basis of the Law was to rest all the life of the people both civil and religious, in the land of Canaan. He had received, moreover, from God Himself, an express charge to observe and do according to all that was written in the Law. Hence we are not surprised at the prominent position which it occupies in the book which tells us of the exploits of Joshua. In the book of Judges on the other hand, where we see the nation departing widely from the Mosaic institutions, lapsing into idolatry, and falling under the power of foreign oppressors, the absence of all mention of the Book of the Law is easily to be accounted for.

It is a little remarkable, however, that no direct mention of it occurs in the books of Samuel. Considering the express provision made for a monarchy in Deuteronomy, we should have expected that on the first appointment of a king some reference would have been made to the requirements of the Law. A prophet like Samuel, we might have thought, could not fail to direct the attention of the newly made king to the Book in accordance with which he was to govern. But it he did this, the history does not tell us so; though there are, it is true, allusions which can only be interpreted on the supposition that the Law was known. The first mention of the Law of Moses after the establishment of the monarchy is in David's charge to his son Solomon, on his death-bed (1 K. ii. 3). From that passage there can be no doubt that David had himself framed his rule in accordance with it, and was desirous that his son should do the same. The words "as it is written in the Law of Moses," show that some portion, at any rate, of our present Pentateuch is referred to, and that the Law was received as the Law of Moses. The allusion, too, seems to be to parts of Deuteronomy, and therefore favors the Mosaic authorship of that book. In viii. 9, we are told that "there was nothing in the ark save the two tables of stone which Moses put there at Horeb." In viii. 53, Solomon uses the words, "As thou spakest by the hand of Moses thy servant;" but the reference is too general to prove anything as to the authorship of the Pentateuch. The reference may be either to Ex. xix. 5, 6, or to Dent. xiv. 2.

In 2 K. xi. 12, "the testimony" is put into the hands of Joash at his coronation. This must have been a book containing either the whole of the Mosaic Law, or at least the Book of Deuteronomy, a copy of which, as we have seen, the king was expected to make with his own hand at the time of his accession.

In the Books of Chronicles far more frequent mention is made of "the Law of Jehovah," or "the book of the Law of Moses;" — a fact which may be accounted for partly by the priestly character of those books. Thus we find David's preparation for the worship of God is "according to the Law of Jehovah" (1 Chr. xvi. 40). In his charge to Solomon occur the words "the Law of Jehovah thy God, the statutes and the judgments which Jehovah charged Moses with concerning Israel" (xxii. 12, 13). In 2 Chr. xii. it is said that Rehoboam "forsook the Law of Jehovah;" in xiv. 4, that Asa commanded Judah "to seek Jehovah the God of their fathers, and to do the Law and the commandment." In xv. 3, the prophet Azariah reminds Asa that "now for a long season Israel hath been without the true God, and without a teaching priest, and without Law;" and in xvii. 9, we find Jehoshaphat appointing certain princes to

gether with priests and Levites, to teach: "they taught in Judah, and had the book of the Law of Jehovah with them." In xxv. 4, Amaziah is said to have acted in a particular instance "as it is written in the Law in the book of Moses." In xxxi. 3, 4, 21, Hezekiah's regulations are expressly said to have been in accordance with "the Law of Jehovah." In xxxiii. 8, the writer is quoting the word of God in reference to the Temple — "so that they will take heed to do all that I have commanded them, according to the whole Law and the statutes, and the ordinances by the hand of Moses." In xxxiv. 14, occurs the memorable passage in which Hilkiah the priest is said to have "found a book of the Law of Jehovah (given) by Moses." This happened in the eighteenth year of the reign of Josiah. And accordingly we are told in xxxv. 26, that Josiah's life had been regulated in accordance with that which was "written in the Law of Jehovah."

In Ezra and Nehemiah we have mention several times made of the Law of Moses, and here there can be no doubt that our present Pentateuch is meant; for we have no reason to suppose that any later revision of it took place. At this time, then, the existing Pentateuch was regarded as the work of Moses. Ezra iii. 2, "as it is written in the Law of Moses the man of God;" vi. 18, "as it is written in the book of Moses;" vii. 6, Ezra, it is said, "was a ready scribe in the Law of Moses." In Neh. i. 7, &c., "the commandments, judgments, etc., which Thou commandedst Thy servant Moses," viii. 1, &c., we have the remarkable account of the reading of "the book of the Law of Moses." See also ix. 3, 14, xiii. 1-3.

The books of Chronicles, though undoubtedly based upon ancient records, are probably in their present form as late as the time of Ezra. Hence it might be supposed that if the reference is to the present Pentateuch in Ezra, the present Pentateuch must also be referred to in Chronicles. But this does not follow. The book of Ezra speaks of the Law as it existed in the time of the writer; the books of Chronicles speak of it as it existed long before. Hence the author of the latter (who may have been Ezra) in making mention of the Law of Moses refers of course to that recension of it which existed at the particular periods over which his history travels. *Substantially*, no doubt, it was the same book; and there was no special reason why the Chronicler should tell us of any corrections and additions which in the course of time had been introduced into it.

In Dan. ix. 11, 13, the Law of Moses is mentioned, and here again, a book differing in nothing from our present Pentateuch is probably meant.

These are all the passages of the Old Testament in which "the Law of Moses," "the book of the Law," or such like expressions occur, denoting the existence of a particular book, the authorship of which was ascribed to Moses. In the prophets and in the Psalms, though there are many allusions to the Law, evidently as a written document, there are none as to its authorship. But the evidence hitherto adduced from the historical books is unquestionably strong; first in favor of an

early existence of the main body of the Pentateuch — more particularly of Genesis and the legal portions of the remaining books; and next, as showing a universal belief amongst the Jews that the work was written by Moses.

2. Conclusive proof of the early composition of the Pentateuch, it has been argued, exists in the fact that the Samaritans had their own copies of it, not differing very materially from those possessed by the Jews, except in a few passages which had probably been purposely tampered with and altered; such for instance as Ex. xii. 40; Dent. xxvii. 4. The Samaritans, it is said, must have derived their book of the Law from the Ten Tribes, whose land they occupied; on the other hand, it is out of the question to suppose that the Ten Tribes would be willing to accept religious books from the Two. Hence the conclusion seems to be irresistible that the Pentateuch must have existed in its present form before the separation of Israel from Judah; the only part of the O. T. which was the common heritage of both.

If this point could be satisfactorily established, we should have a limit of time in one direction for the composition of the Pentateuch. It could not have been later than the times of the earliest kings. It must have been earlier than the reign of Solomon, and indeed than that of Saul. The history becomes at this point so full, that it is scarcely credible that a measure so important as the codification of the Law, if it had taken place, could have been passed over in silence. Let us, then, examine the evidence. What proof is there that the Samaritans received the Pentateuch from the Ten Tribes? According to 2 K. xvii. 24-41, the Samaritans were originally heathen colonists belonging to different Assyrian and Arabian tribes, who were transplanted by Shalmaneser to occupy the room of the Israelites whom he had carried away captive. It is evident, however, that a considerable portion of the original Israelitish population must still have remained in the cities of Samaria. For we find (2 Chr. xxx. 1-20) that Hezekiah invited the remnant of the Ten Tribes who were in the land of Israel to come to the great Passover which he celebrated, and the different tribes are mentioned (vv. 10, 11) who did, or did not respond to the invitation. Later, Esarhaddon adopted the policy of Shalmaneser and a still further deportation took place (Ezr. iv. 2). But even after this, though the heathen element in all probability preponderated, the land was not swept clean of its original inhabitants. Josiah, it is true, did not, like Hezekiah, invite the Samaritans to take part in the worship at Jerusalem. But finding himself strong enough to disregard the power of Assyria, now on the decline, he virtually claimed the land of Israel as the rightful apportionment of David's throne, adopted energetic measures for the suppression of idolatry, and even exterminated the Samaritan priests. But what is of more importance as showing that some portion of the Ten Tribes was still left in the land, is the fact, that when the collection was made for the repairs of the Temple, we are told that the Levites gathered the money "of the hand of Manasseh and Ephraim, and of all the remnant of Israel," as well as "of Judah and Benjamin"

<sup>a</sup> It is a curious and interesting fact, for the knowledge of which we are indebted to Sir H. Rawlinson, that Sargos penetrated far into the interior of Arabia, and carrying off several Arabian tribes, settled them in Samaria. This explains how Geshem the Arabian

came to be associated with Sanballat in the government of Judæa, as well as the mention of Arabians in the army of Samaria (Illustrations of Egyptian History, etc., in the *Trans. of Roy. Soc. Lit.*, 1860, part 1. pp. 148, 149).

(2 Chr. xxxiv. 9). And so also, after the discovery of the Book of the Law, Josiah bound not only "all who were present in Judah and Benjamin" to stand to the covenant contained in it, but he "took away all the abominations out of all the countries that pertained to the children of Israel, and made all that were present in Israel to serve, even to serve Jehovah their God. And all his days they departed not from serving Jehovah the God of their fathers" (2 Chr. xxxiv. 32, 33).

Later yet, during the vice-royalty of Gedaliah, we find still the same feeling manifested on the part of the Ten Tribes which had shown itself under Hezekiah and Josiah. Eighty devotees from Shechem, from Shiloh, and from Samaria, came with all the signs of mourning, and bearing offerings in their hand, to the Temple at Jerusalem. They thus testified both their sorrow for the desolation that had come upon it, and their readiness to take a part in the worship there, now that order was restored. And this, it may be reasonably presumed, was only one party out of many who came on a like errand. All these facts prove that, so far as was the intercourse between Judah and the remnant of Israel from being embittered by religious animosities, that it was the religious bond that bound them together. Hence it would have been quite possible during any portion of this period for the mixed Samaritan population to have received the Law from the Jews.

This is far more probable than that copies of the Pentateuch should have been preserved amongst those families of the Ten Tribes who had either escaped when the land was shaven by the razor of the king of Assyria, or who had straggled back thither from their exile. If even in Jerusalem itself the Book of the Law was so scarce, and had been so forgotten, that the pious king Josiah knew nothing of its contents till it was accidentally discovered; still less probable is it that in Israel, given up to idolatry and wasted by invasions any copies of it should have survived.

On the whole, we should be led to infer that there had been a gradual fusion of the heathen settlers with the original inhabitants. At first the former, who regarded Jehovah as only a local and national deity like one of their own false gods, endeavored to appease Him by adopting in part the religious worship of the nation whose land they occupied. They did this in the first instance, not by mixing with the resident population, but by sending to the king of Assyria for one of the Israelitish priests who had been carried captive. But in process of time, the amalgamation of races became complete, and the worship of Jehovah superseded the worship of idols, as is evident both from the wish of the Samaritans to join in the Temple worship after the Captivity, and from the absence of all idolatrous symbols on Gerizim. So far, then, the history leaves us altogether in doubt as to the time at which the Pentateuch was received by the Samaritans. Copies of it *might* have been left in the northern kingdom after Shalmaneser's invasion, though this is hardly probable; or they might have been introduced thither during the religious reforms of Hezekiah or Josiah.

But the actual condition of the Samaritan Pentateuch is against any such supposition. It agrees so remarkably with the existing Hebrew Pentateuch, and that, too, in those passages which are manifestly interpolations and corrections as late as the time of Ezra, that we must look for some other period to which to refer the adoption of the Books

of Moses by the Samaritans. This we find after the Babylonish exile, at the time of the institution of the rival worship on Gerizim. Till the return from Babylon there is no evidence that the Samaritans regarded the Jews with any extraordinary dislike or hostility. But the manifest distrust and suspicion with which Nehemiah met their advances when he was rebuilding the walls of Jerusalem provoked their wrath. From this time forward, they were declared and open enemies. The quarrel between the two nations was further aggravated by the determination of Nehemiah to break off all marriages which had been contracted between Jews and Samaritans. Manasseh the brother of the high-priest (so Josephus calls him, *Ant.* xi. 7, § 2), and himself acting high-priest, was one of the offenders. He refused to divorce his wife, and took refuge with his father-in-law Sanballat, who consoled him for the loss of his priestly privilege in Jerusalem by making him high-priest of the new Samaritan temple on Gerizim. With Manasseh many other apostate Jews who refused to divorce their wives, fled to Samaria. It seems highly probable that these men took the Pentateuch with them, and adopted it as the basis of the new religious system which they inaugurated. A full discussion of this question would be out of place here. It is sufficient merely to show how far the existence of a Samaritan Pentateuch, not materially differing from the Hebrew Pentateuch, bears upon the question of the antiquity of the latter. And we incline to the view of Prideaux (*Connect.* book vi. chap. iii.), that the Samaritan Pentateuch was in fact a transcript of Ezra's revised copy. The same view is virtually adopted by Gesenius (*De Pent. Sam.* pp. 8, 9).

3. We are now to consider evidence of a more indirect kind, which bears not so much on the Mosaic authorship as on the early existence of the work as a whole. This last circumstance, however, if satisfactorily made out, is, indirectly at least, an argument that Moses wrote the Pentateuch. Heugstenberg has tried to show that all the later books, by their allusions and quotations, presuppose the existence of the Books of the Law. He traces, moreover, the influence of the Law upon the whole life, civil and religious, of the nation after their settlement in the land of Canaan. He sees its spirit transfused into all the national literature, historical, poetic, and prophetic: he argues that except on the basis of the Pentateuch as already existing before the entrance of the Israelites into Canaan, the whole of their history after the occupation of the land becomes an inexplicable enigma. It is impossible not to feel that this line of proof is, if established, peculiarly convincing, just in proportion as it is indirect and informal, and beyond the reach of the ordinary weapons of criticism.

Now, beyond all doubt, there are numerous most striking references both in the Prophets and in the books of Kings to passages which are found in our present Pentateuch. One thing at least is certain, that the theory of men like Von Bohlen, Vatke, and others, who suppose the Pentateuch to have been written in the times of the latest kings, is utterly absurd. It is established in the most convincing manner that the legal portions of the Pentateuch already existed in writing before the separation of the two kingdoms. Even as regards the historical portions, there are often in the later books almost verbal coincidences of expression, which render it more than probable that these also existed in writing. All this has been argued with much learning, the

most indefatigable research, and in some instances with great success by Hengstenberg in his *Authentic des Pentateuchs*. We will satisfy ourselves with pointing out some of the most striking passages in which the coincidences between the later books and the Pentateuch (omitting Deuteronomy for the present) appear.

In Joel, who prophesied only in the kingdom of Judah; in Amos, who prophesied in both kingdoms; and in Hosea, whose ministry was confined to Israel, we find references which imply the existence of a written code of laws. The following comparison of passages may satisfy us on this point: Joel ii. 2 with Ex. x. 14; ii. 3 with Gen. ii. 8, 9 (comp. xiii. 10); ii. 17 with Num. xiv. 13; ii. 20 with Ex. x. 19; iii. 1 [ii. 28, E. V.] with Gen. vi. 12; ii. 13 with Ex. xxxiv. 6; iv. [iii.] 18 with Num. xxv. 1. — Again, Amos ii. 2 with Num. xxi. 28; ii. 7 with Ex. xxiii. 6, Lev. xx. 3; ii. 8 with Ex. xxii. 29, &c.; ii. 9 with Num. xiii. 32, &c.; iii. 7 with Gen. xviii. 17; iv. 4 with Lev. xxiv. 3, and Deut. xiv. 28, xxvi. 12; v. 12 with Num. xxxv. 31 (comp. Ex. xxiii. 6 and Am. ii. 7); v. 17 with Ex. xii. 12; v. 21, &c. with Num. xxix. 35, Lev. xxiii. 36; vi. 1 with Num. i. 17; vi. 6 with Gen. xxxvii. 25 (this is probably the reference: Hengstenberg's is wrong); vi. 8 with Lev. xxvi. 19; vi. 14 with Num. xxxiv. 8; viii. 6 with Ex. xxi. 2, Lev. xxv. 39; ix. 13 with Lev. xxvi. 3-5 (comp. Ex. iii. 8). — Again, Hosea i. 2 with Lev. xx. 5-7; ii. 1 [i. 10] with Gen. xxii. 17, xxxii. 12; ii. 2 [i. 11] with Ex. i. 10; iii. 2 with Ex. xxi. 32; iv. 8 with Lev. vi. 17, &c., and vii. 1, &c.; iv. 10 with Lev. xxvi. 26; iv. 17 with Ex. xxxii. 9, 10; v. 6 with Ex. x. 9; vi. 2 with Gen. xvii. 18; vii. 8 with Ex. xxxiv. 12-16; xii. 6 [A. V. 5] with Ex. iii. 15; xii. 10 [9] with Lev. xxiii. 43; xii. 15 [14] with Gen. ix. 5.

In the books of Kings we have also references as follows: 1 K. xx. 42 to Lev. xxvii. 29; xxi. 3 to Lev. xxv. 23, Num. xxxvi. 8; xxi. 10 to Num. xxxv. 30, comp. Deut. xvii. 6, 7, xix. 15; xxii. 17 to Num. xxvii. 16, 17. — 2 K. iii. 20 to Ex. xxxiv. 38, &c.; iv. 1 to Lev. xxv. 39, &c.; v. 27 to Ex. iv. 6, Num. xii. 10; vi. 18 to Gen. xix. 11; vi. 28 to Lev. xxvi. 29; vii. 2, 19 to Gen. vii. 11; vii. 3 to Lev. xiii. 46 (comp. Num. v. 3).

But now if, as appears from the examination of all the extant Jewish literature, the Pentateuch existed as a canonical book; if, moreover, it was a book so well known that its words had become household words among the people; and if the prophets could appeal to it as a recognized and well-known document, — how comes it to pass that in the reign of Josiah, one of the latest kings, its existence as a canonical book seems to have been almost forgotten? Yet such was evidently the fact. The circumstances, as narrated in 2 Chr. xxxiv. 14, &c., were these: In the eighteenth year of his reign, the king, who had already taken active measures for the suppression of idolatry, determined to execute the necessary repairs of the Temple, which had become seriously dilapidated, and to restore the worship of Jehovah in its purity. He accordingly directed Hilkiah the high priest to take charge of the moneys that were contributed for the

purpose. During the progress of the work, Hilkiah, who was busy in the Temple, came upon a copy of the Book of the Law — which must have long lain neglected and forgotten — and told Shaphan the scribe his discovery. The effect produced by this was very remarkable. The king, to whom Shaphan read the words of the book, was filled with consternation when he learnt for the first time how far the nation had departed from the Law of Jehovah. He sent Hilkiah and others to consult the prophetess Huldah, who only confirmed his fears. The consequence was that he held a solemn assembly in the house of the Lord, and “read in their ears all the words of the book of the covenant that was found in the house of the Lord.”

How are we to explain this surprise and alarm in the mind of Josiah, betraying as it does such utter ignorance of the Book of the Law, and of the severity of its threatenings — except on the supposition that as a written document it had well-nigh perished? This must have been the case, and it is not so extraordinary a fact perhaps as it appears at first sight. It is quite true that in the reign of Jehoshaphat pains had been taken to make the nation at large acquainted with the Law. That monarch not only instituted “teaching priests,” but we are told that as they went about the country they had the Book of the Law with them. But that was 300 years before, a period equal to that between the days of Luther and our own; and in such an interval great changes must have taken place. It is true that in the reign of Ahaz the prophet Isaiah directed the people, who in their hopeless infatuation were seeking counsel of ventriloquists and necromancers, to turn “to the Law and to the Testimony;” and Hezekiah, who succeeded Ahaz, had no doubt reigned in the spirit of the prophet's advice. But the next monarch was guilty of outrageous wickedness, and filled Jerusalem with idols. How great a desolation might one wicked prince effect, especially during a lengthened reign! To this we must add, that at no time, in all probability, were there many copies of the Law existing in writing. It was probably then the custom, as it still is in the East, to trust largely to the memory for its transmission. Just as at this day in Egypt, persons are to be found, even illiterate in other respects, who can repeat the whole Kurán by heart, and as some modern Jews are able to recite the whole of the Five Books of Moses, so it probably was then: the Law, for the great bulk of the nation, was orally preserved and inculcated. The ritual would easily be perpetuated by the mere force of observance, though much of it doubtless became perverted, and some part of it perhaps obsolete, through the neglect of the priests. Still it is against the perfunctory and lifeless manner of their worship, not against their total neglect, that the burning words of the prophets are directed. The command of Moses, which laid upon the king the obligation of making a copy of the Law for himself, had of course long been disregarded. Here and there perhaps only some prophet or righteous man possessed a copy of the sacred book. The bulk of the nation were without it. Nor was there any

a See Mr. Grove's very interesting paper on Nabulus and the Samaritans in *Vacation Tourists*, 1861. Speaking of the service of the *yom kippur* in the Samaritan synagogue, he says that the recitation of the Pentateuch was continued through the night, “without

even the feeble lamp which on every other night is the year but this burns in front of the holy books. The two priests and a few of the people know the whole of the Torah by heart” (p. 346).

reason why copies should be brought under the notice of the king. We may understand this by a parallel case. How easy it would have been in our own country, before the invention of printing, for a similar circumstance to have happened. How many copies, do we suppose, of the Scriptures were made? Such as did exist would be in the hands of a few learned men, or more probably in the libraries of monasteries.<sup>a</sup> Even after a translation, like Wycliffe's, had been made, the people as a whole would know nothing whatever of the Bible; and yet they were a Christian people, and were in some measure at least instructed out of the Scriptures, though the volume itself could scarcely ever have been seen. Even the monarch, unless he happened to be a man of learning or piety, would remain in the same ignorance as his subjects. Whatever knowledge there was of the Bible and of religion would be kept alive chiefly by means of the Liturgies used in public worship. So it was in Judah. The oral transmission of the Law and the living witness of the prophets had superseded the written document, till at last it had become so scarce as to be almost unknown. But the hand of God so ordered it that when king and people were both zealous for reformation, and ripest for the reception of the truth, the written document itself was brought to light.

On carefully weighing all the evidence hitherto adduced, we can hardly question, without a literary skepticism which would be most unreasonable, that the Pentateuch is to a very considerable extent as early as the time of Moses, though it may have undergone many later revisions and corrections, the last of these being certainly as late as the time of Ezra. But as regards any direct and unimpeachable testimony to the composition of the whole work by Moses we have it not. Only one book out of the five—that of Deuteronomy—claims in express terms to be from his hand. And yet, strange to say, this is the very book in which modern criticism refuses most peremptorily to admit the claim. It is of importance therefore to consider this question separately.

All allow that the Book of the Covenant in Exodus, perhaps a great part of Leviticus, and some part of Numbers, were written by Israel's greatest leader and prophet. But Deuteronomy, it is alleged, is in style and purpose so utterly unlike the genuine writings of Moses that it is quite impossible to believe that he is the author. But how then set aside the express testimony of the book itself? How explain the fact that Moses is there said to have written all the words of this Law, to have consigned it to the custody of the priests, and to have charged the Levites sedulously to preserve it by the side of the ark? Only by the bold assertion that the fiction was invented by a later writer, who chose to personate the great Lawgiver in order to give the more color of consistency to his work! The author first feigns the name of Moses that he may gain the greater consideration under the shadow of his name, and then proceeds to reëact, but in a broader and more spiritual manner, and with true prophetic inspiration, the chief portions of the earlier legislation.

But such an hypothesis is devoid of all probability. For what writer in later times would ever have presumed, unless he were equal to Moses, to correct or supplement the Law of Moses? And if he were equal to Moses, why borrow his name (as Ewald supposes the Deuteronomist to have done) in order to lend greater weight and sanction to his book? The truth is, those who make such a supposition import modern ideas into ancient writings. They forget that what might be allowable in a modern writer of fiction would not have been tolerated in one who claimed to have a Divine Commission, who came forward as a prophet to rebuke and to reform the people. Which would be more weighty to win their obedience, "Thus saith Jehovah," or "Moses wrote all these words"?

It has been argued indeed that in thus assuming a feigned character the writer does no more than is done by the author of Ecclesiastes. He in like manner takes the name of Solomon that he may gain a better hearing for his words of wisdom. But the cases are not parallel. The Preacher only pretends to give an old man's view of life, as seen by one who had had a large experience and no common reputation for wisdom. Deuteronomy claims to be a Law imposed on the highest authority, and demanding implicit obedience. The first is a record of the struggles, disappointments, and victory of a human heart. The last is an absolute rule of life, to which nothing may be added, and from which nothing may be taken (iv. 2, xxxi. 1).

But, besides the fact that Deuteronomy claims to have been written by Moses, there is other evidence which establishes the great antiquity of the book.

1. It is remarkable for its allusions to Egypt,<sup>b</sup> which are just what would be expected supposing Moses to have been the author. Without insisting upon it that in such passages as iv. 15-18, or vi. 8, xi. 18-20 (comp. Ex. xiii. 16), where the command is given to wear the Law after the fashion of an amulet, or xxvii. 1-8, where writing on stones covered with plaster is mentioned, are probable references to Egyptian customs, we may point to more certain examples. In xx. 5 there is an allusion to Egyptian regulations in time of war; in xxv. 2 to the Egyptian bastinado; in xi. 10 to the Egyptian mode of irrigation. The references which Delitzsch sees in xxii. 5 to the custom of the Egyptian priests to hold solemn processions in the masks of different deities, and in viii. 9 to Egyptian mining operations, are by no means so certain. Again, among the curses threatened are the sicknesses of Egypt, xxviii. 60 (comp. vii. 15). According to xxviii. 68, Egypt is the type of all the oppressors of Israel: "Remember that thou wast a slave in the land of Egypt," is an expression which is several times made use of as a motive in enforcing the obligations of the book (v. 15, xxiv. 18, 22; see the same appeal in Lev. xix. 34, a passage occurring in the remarkable section Lev. xvii.-xx., which has so much affinity with Deuteronomy). Lastly, references to the sojourning in Egypt are numerous: "We were Pharaoh's bondmen in Egypt," etc. (vi. 21-23; see also vii. 8, 18, xi. 3); and these occur even in the laws, as in the law of the king

<sup>a</sup> That even in monasteries the Bible was a neglected and almost unknown book, is clear from the story of Luther's conversion.

<sup>b</sup> It is a significant fact that Ewald, who will have it that Deuteronomy was written in the reign of Ma-

nasseh, is obliged to make his supposed author live in Egypt, in order to account plausibly for the acquaintance with Egyptian customs which is discernible in the book.

(xvii. 16), which would be very extraordinary if the book had only been written in the time of Manasseh.

The phraseology of the book, and the archaisms found in it, stamp it as of the same age with the rest of the Pentateuch. The form **הוּא**, instead of **היא**, for the feminine of the pronoun (which occurs in all 195 times in the Pentateuch), is found 36 times in Deuteronomy. Nowhere do we meet with **היא** in this book, though in the rest of the Pentateuch it occurs 11 times. In the same way, like the other books, Deuteronomy has **בַּעַר** of a maiden, instead of the feminine **בַּעֲרָה**, which is only used once (xxii. 19). It has also the third pers. pret. **לָ**, which in prose occurs only in the Pentateuch (Ewald, *Lehrbuch*, § 142 b). The demonstrative pronoun **הַהֵלֵל**, which (according to Ewald, § 183 a, is characteristic of the Pentateuch) occurs in Deut. iv. 42, vii. 22, xix. 11, and nowhere else out of the books of Moses, except in the late book, 1 Chr. xx. 8, and the Aramaic Ezra, v. 15.

The use of the **ל** *locule*, which is comparatively rare in later writings, is common to Deuteronomy with the other books of the Pentateuch; and so is the old and rare form of writing **וְהַמְצִיאֲנִי**, and the termination of the future in **יִן**. The last, according to König (*A. T. Stud.* 2 Heft), is more common in the Pentateuch than in any other book: it occurs 58 times in Deuteronomy. Twice even in the preterite, viii. 3, 16, a like termination presents itself; on the peculiarity of which Ewald (§ 190 b, note) remarks, as being the original and fuller form. Other archaisms which are common to the whole five books are: the shortening of the Hiphil, **לְרָאִיתִי**, i. 33; **לְעִיָּנִי**, xxvi. 12, &c.; the use of **קָרָא=קָרָה**, "to meet;" the construction of the passive with **יָרָא** of the object (for instance, xx. 8); the interchange of the older **שָׁעַב** (xix. 4) with the more usual **פָּבַעַשׁ**; the use of **זָכַר** (instead of **זָכַר**), xvi. 16, xx. 13, a form which disappears altogether after the Pentateuch; many ancient words, such as **אָגִיב**, **יָקוּם**, **יָטִיר**, **יָטִיר** (xv. 12). Amongst these are some which occur besides only in the book of Joshua, or else in very late writers, like Ezekiel, who, as is always the case in the decay of a language, studiously imitated the oldest forms; some which are found afterwards only in poetry, as **אֶלְפִי** (vii. 13, xxviii. 4, &c.), and **מְרִיָּה**, so common in Deuteronomy. Again, this book has a number of words which have an archaic character. Such are, **הַרְמִיָּה** (for the later **מְרִיָּה**); **מְרִיָּה** (instead of **סֵל**); the old Canaanite **עֲצֵי הַתְּרוֹת הַצֹּאֲן**, "offspring of the flocks;" **יִשְׂרָאֵל**, which as a name of Israel is borrowed, Is. xli. 2; **הַהֲוִיָּה**, i. 41, "to act wholly;" **הַסִּיָּת**, "to be silent;" **הַעֲנִיָּה**, xv.

14, "to give," lit. "to put like a collar on the neck;" **הַרְמִיָּה**, "to play the lord;" **מְרִיָּה**, "sickness."

2. A fondness for the use of figures is another peculiarity of Deuteronomy. See xxix. 17, 18; xxviii. 13, 44; i. 31, 44; viii. 5; xxviii. 29, 49. Of similar comparisons there are but few (Delitzsch says but three) in the other books. The results are most surprising when we compare Deuteronomy with the Book of the Covenant (Ex. xix.-xxiv.) on the one hand, and with Ps. xc. (which is said to be Mosaic) on the other. To cite but one example: the images of devouring fire and of the bearing on eagles' wings occur only in the Book of the Covenant and in Deuteronomy. Comp. Ex. xxiv. 17, with Deut. iv. 24, ix. 3; and Ex. xix. 4, with Deut. xxxii. 11. So again, not to mention numberless undesigned coincidences between Ps. xc. and the book of Deuteronomy, especially chap. xxxii., we need only here cite the phrase **מַעֲשֵׂה יָדָיו** (Ps. xc. 17), "work of the hands," as descriptive of human action generally, which runs through the whole of Deut. ii. 7, xiv. 29, xvi. 15, xxiv. 19, xxviii. 12, xxx. 9. The same close affinity, both as to matter and style, exists between the section to which we have already referred in Leviticus (ch. xvii.-xx.), so manifestly different from the rest of that book), the Book of the Covenant (Ex. xix.-xxiv.), and Deuteronomy.

In addition to all this, and very much more might be said — for a whole harvest has been gleaned on this field by Schultz in the Introduction to his work on Deuteronomy — in addition to all these peculiarities which are arguments for the Mosaic authorship of the book, we have here, too, the evidence strong and clear of post-Mosaic times and writings. The attempt by a wrong interpretation of 2 K. xxii. and 2 Chr. xxxiv. to bring down Deuteronomy as low as the time of Manasseh fails utterly. A century earlier the Jewish prophets borrow their words and their thoughts from Deuteronomy. Amos shows how intimate his acquaintance was with Deuteronomy by such passages as ii. 9, iv. 11, ix. 7, whose matter and form are both colored by those of that book. Hosea, who is richer than Amos in these references to the past, whilst, as we have seen, full of allusions to the whole Law (vi. 7, xii. 4, &c., xiii. 9, 10), in one passage, viii. 12, using the remarkable expression, "I have written to him the ten thousand things of my Law," manifestly includes Deuteronomy (comp. xi. 8 with Deut. xxix. 22), and in many places shows that that book was in his mind. Comp. iv. 13 with Deut. xii. 2; viii. 13 with Deut. xxviii. 68; xi. 3 with Deut. i. 31; xiii. 6 with Deut. viii. 11-14. Isaiah begins his prophecy with the words, "Hear, O heavens, and give ear, O earth," taken from the mouth of Moses in Deut. xxxii. 1. In fact, echoes of the tones of Deuteronomy are heard throughout the solemn and majestic discourse with which his prophecy opens. (See Caspari, *Beiträge zur Einl. in d. Buch Jesaja*, p. 203-210.) The same may be said of Micah. In his protest against the apostasy of the nation from the Covenant with Jehovah, he appeals to the mountains as the sure foundations of the earth, in like manner as Moses, Deut. xxxii. 1, to the heavens and the earth. The controversy of Jehovah with his people (Mic. vi. 3-5) is a compendium, as it were, of the history of the Pentateuch from Exodus onwards, whilst the expression **בֵּית עֲבָדָיו**, "Slave-house" of Egypt

is taken from Deut. vii. 8, xiii. 5. In vi. 8, there is, no doubt, an allusion to Deut. x. 12, and the threatenings of vi. 13-16 remind us of Deut. xxviii. as well as of Lev. xxvi.

Since, then, not only Jeremiah and Ezekiel, but Amos and Hosea, Isaiah and Micah, speak in the words of Deuteronomy, as well as in words borrowed from other portions of the Pentateuch, we see at once how untenable is the theory of those who, like Ewald, maintain that Deuteronomy was composed during the reign of Manasseh, or, as Vaihinger does, during that of Hezekiah.

But, in truth, the book speaks for itself. No imitator could have written in such a strain. We scarcely need the express testimony of the work to its own authorship. But, having it, we find all the internal evidence conspiring to show that it came from Moses. Those magnificent discourses, the grand roll of which can be heard and felt even in a translation, came warm from the heart and fresh from the lips of Israel's Lawgiver. They are the outpourings of a solicitude which is nothing less than parental. It is the father uttering his dying advice to his children, no less than the prophet counseling and admonishing his people. What book can vie with it either in majesty or in tenderness? What words ever bore more surely the stamp of genuineness? If Deuteronomy be only the production of some timorous reformer, who, conscious of his own weakness, tried to borrow dignity and weight from the name of Moses, then assuredly all arguments drawn from internal evidence for the composition of any work are utterly useless. We can never tell whether an author is wearing the mask of another, or whether it is he himself who speaks to us.

In spite, therefore, of the dogmatism of modern critics, we declare unhesitatingly for the Mosaic authorship of Deuteronomy.

Briefly, then, to sum up the results of our inquiry.

1. The book of Genesis rests chiefly on documents much earlier than the time of Moses, though it was probably brought to very nearly its present shape either by Moses himself, or by one of the elders who acted under him.

2. The books of Exodus, Leviticus, and Numbers, are to a great extent Mosaic. Besides those portions which are expressly declared to have been written by him (see above), other portions, and especially the legal sections, were, if not actually written, in all probability dictated by him.

3. Deuteronomy, excepting the concluding part, is entirely the work of Moses, as it professes to be.

4. It is not probable that this was written before the three preceding books, because the legislation of Exodus and Leviticus as being the more formal is manifestly the earlier, whilst Deuteronomy is the spiritual interpretation and application of the Law. But the letter is always before the spirit; the thing before its interpretation.

5. The first composition of the Pentateuch as a whole could not have taken place till after the Israelites entered Canaan. It is probable that Josiah, and the elders who were associated with him, would provide for its formal arrangement, custody, and transmission.

6. The whole work did not finally assume its present shape till its revision was undertaken by Ezra after the return from the Babylonish Captivity.

#### IV. Literature.

1. Amongst the earlier Patristic expositors may be mentioned —

Augustine, *De Genesi contra Manich.*; *De Genesi ad litteram*; *Locutiones (Gen. — Jud.)*, and *Questiones in Heptateuchum*.

Jerome, *Liber Questionum Hebraicarum in Genesim*.

Chrysostom, *In Genesim, Homiliae et Sermones*. (Opp. Montfaucon, vol. vi. With these will also be found those of Severian of Gabala.)

Theodoret, *Questiones in Gen., Ex., Lev., Numer., Deut., etc.*

Ephraem Syrus, *Explicuit in Genesim*.

Cyril of Alexandria, *Glaphyra in libros Mosis*.

2. In the Middle Ages we have the Jewish commentators — Isaaki or Rashi (an abbreviation of his name Rabbi Solomon Isaaki, sometimes wrongly called Jarchi) of Troyes, in the 11th century; Aben-Ezra of Toledo in the 12th; David Kimchi of Narbonne in the 13th.

3. Of the Reformation period: —

The commentary of Calvin on the Five Books is a masterpiece of exposition.

Luther wrote, both in German and in Latin, commentaries on Genesis, the last being finished but a short time before his death.

4. Later we have the commentaries of Calovius, in his *Biblia Illustrata*, and Mercerus, in *Genesim*; Rivetus, *Exercitationes in Genesim, and Commentarii in Exodum*, in his *Opp. Theolog.* vol. i. Roter. 1865; Grotius, *Anot. ad Vet. Test.* in *Opp.* vol. i.; Le Clerc (Clericus), *Mosis Prophetæ Lib. V.* in the 1st vol. of his work on the (Old Testament) Amst. 1710, with a special dissertation, *De Scriptore Pentateuchi Mose*; Spencer, *De Legibus Hebraeorum*.

5. The number of books written on this subject in Germany alone during the last century, is very considerable. Reference may be made to the General Introductions of Michaelis, Eichhorn (5 vols. 1823), Jahn (1814), De Wette (7th ed. 1852), Keil (1st ed. 1853), Hävernick (1856), Bleek (1861), Stähelin (1862). Further, on the one hand, to Hengstenberg's *Authentic des Pentateuchs* (1836, 1839); Ranke's *Untersuchungen* (1834); Drechsler, *Einheit, etc., der Genesim* (1838); König, *Alt. Stud.* (2 Heft, 1839); Kurtz, *Gesch. des Alten Bundes* (2d ed. 1853); and on the other to Ewald, *Geschichte des Volkes Israels*; Von Lengerke, *Kennan* (1844); Stähelin, *Krit. Untersuchungen* (1843); Bertheau, *Die Sieben Gruppen, etc.*

As Commentaries on the whole or parts of the Pentateuch may be consulted —

(1) Critical: — Rosenmüller, *Scholia*, vol. i. 3d ed. (1821); Knobel (on all the books), in the *Kurzgef. Exeget. Handbuch*; Tuch, *Die Genesim* (1838); Schumann, *Genesim* (1829); Bunsen, *Bibelwerk*.

(2) Exegetical: — Baumgarten, *Theol. Comment.* (1843); Schröder, *Dns Erste Buch Mose* (1846); Delitzsch, *Genesim* (3d ed. 1861); Schultz, *Deuteronomium* (1859). Much will be found bearing on the general question of the authorship and date of the Pentateuch in the Introductions to the last two of these works.

In England may be mentioned Graves's *Lectures on the last four Books of the Pentateuch*, who argues strenuously for the Mosaic authorship. So also do Rawlinson on *The Pentateuch*, in *Aids to Faith*, 1862; and McCaul on the *Mosaic Cosmogony*, in the same volume; though the former admits that Moses made free use of ancient documents in compiling Genesis.

Davidson, on the other hand, in *Horne's Intro-*

*lection*, vol. ii. (10th ed. 1856,, argues for two documents, and supposes the Jehovist to have written in the time of the Judges, and the Elohist in that of Joshua, and the two to have been incorporated in one work in the reign of Saul or David. He maintains, however, the Mosaic authorship of Deuteronomy. [In his *Introd. to the Old Test.*, vol. i. (Lond. 1862), Davidson has abandoned this view of Deuteronomy. — A.]

The chief American writers who have treated of the Pentateuch are Stuart, *Crit. Hist. and Defence of the O. T. Canon*; and Bush, *Commentaries on the Five Books*. J. J. S. P.

\* The foregoing able discussion certainly makes all needful concessions to the modern critics of the Pentateuch, and its concluding propositions might be still more conservatively stated. It is, perhaps, enough to say that Genesis apparently rests to a considerable extent (rather than "chiefly") on earlier documents. The second, third, and fourth of the closing propositions may be quite firmly held. It is too much to concede (5thly) that the composition of the Pentateuch as a whole "could not have taken place till after the Israelites entered Canaan." For, the revision admitted in the sixth proposition needed to be but slight, in order to produce all the present marks of later date. After half a century of debate, we are in a position to see that, notwithstanding all the scholarship and acuteness that have been brought to attack the authorship and authenticity of the Pentateuch, few movements in the history of criticism have comprised a greater amount of arbitrary and extravagant assertion, irrelevant reasoning, mutual contradiction, and unwarranted conclusion. Meanwhile the style and structure of these books has undergone a searching investigation, many interesting features have been brought to light, several untenable positions abandoned, and some important concessions made. The most unsparring criticism is now compelled to admit: (1.) The essential and systematic unity of the present Pentateuch (Ewald, *Geschichte*, i. 92; Tuch, *Genesis*, Vorr. xxi.; Knobel, *Genesis*, § 16; Hupfeld, *Die Quellen*, p. 196). (2.) The general historic truthfulness of the narrative, from the dispersion of the nations onward, excepting its miraœulous portions (Knobel, *Genesis*, p. 23; *Exodus*, p. 22; Tuch, *Genesis*, p. 11, &c.). (3.) The extraordinary character, career, and influence of Moses; even Ewald recognizing that age (*Geschichte*, ii. 239, &c.) as "a wonderfully elevated period, a focus of most surprising power, resolution, and activity;" the deliverance of the nation as an event of "unparalleled importance;" the victory at the Red Sea as a far brighter day than Marathon or Salamis; and Moses himself as "the mighty originator and leader of this entire new national movement," its "law-giver and prophet." So also Knobel to the same effect (*Ex.* 22), and Bunsen (*Bibelwerk, Die Mosaische Geschichte*). (4.) The important fact that portions of the Mosaic narrative certainly are as old as the time of Moses, and even older. Thus De Wette declares of the odes in Num. xxi. 17, 18, 27-30, that they may with certainty be referred to the time of Moses (*Einkl.* § 149); Knobel, that Moses published his laws in writing, "though it is uncertain to what extent" (*Komm. Numb.* p. 192). Davidson, following Bleek chiefly, specifies more than twenty chapters which must have come from Moses with very slight change (*Introd.* i. 109), among which the passage Ex. xxv. - xxxi.

was "probably written down by him in its present state." Ewald pronounces Lamech's song to be very ancient, belonging to a time anterior to Moses (i. 75, note); the fourteenth of Genesis of the highest antiquity, also coming down from "before the age of Moses" (i. 80, 146). He admits the preservation of actual laws, sayings, and songs of Moses and his contemporaries (ii. 29-32), among which are the Decalogue, and Num. vi. 24-26, x. 35, 36, xxi. 17, 18, 27-30; Ex. iii. 15, xvii. 16, xv. 1-21. Such admissions, however grudging and scanty, from the ablest, wildest, and most captious of scholarly critics, show the necessities of the case; and they carry with them consequences which are more easily blinked than faced. It remained for one whose scholarship was extemporized like that of the Bishop of Natal, to deem it "quite possible, and indeed as far as our present inquiries have gone, highly probable, that Moses may be an historical character," although, "this is merely conjectural" (Colenso, *Pent.* ii. 70).

The most objectionable features of the modern German criticism of the Pentateuch have been its constant dogmatism, its frequent extravagance, the steady rationalistic bias under which it has been conducted, and, quite commonly, the hiatus between its premises and its conclusions. The following observations may cast further light on the subject.

(i.) It is proper to admit that the question of the authorship of the Pentateuch has been so presented as to affect its historic value and its authority. Ewald and others ask us to accept it as containing traditions originating at a period remote from the events, vouched for by no responsible authority, and, though containing a basis of truth, yet uncertain and unsatisfactory in detail, and of course destitute of proper value even as history. Whereas, if it comes from Moses, it carries not only the historic weight of a narrative by an actor in the events, but the extraordinary weight of Moses's character and circumstances. The attempt at disintegration has been made also an attempt at invalidation. Dr. Colenso openly avows this issue (*Pent.* ii. 62). Anonymous books of the Canon are indeed received with entire confidence and reverence. But an important difference is, that in the present instance there are claims of authorship positively put forth by the writer, and as positively denied by the critics. Not only do Kurtz and Delitzsch, but De Wette, Knobel, and Davidson, affirm that the book of Deuteronomy (as a whole) claims to have been written by Moses. Davidson coolly remarks, that "this was a bold step for the unknown author" (*Introd.* i. 375), and De Wette, that "the obscurity and unfitnes of these claims deprive them of all value as proofs" (*Introd.* § 162). Consequently when these writers openly deny the fact, they impeach the veracity of the book. This aspect of the case it is not necessary nor wise to overlook.

(ii.) At the same time the extravagances and the mutual divergences and conflicts of the critics are a legitimate subject of consideration, in estimating the force of their conclusions. Many able scholars seem to have lost sobriety and fairness on this subject. They adduce arguments which would have no weight in any other discussion, — which they are themselves obliged to admit are not conclusive. What is more preposterous than the theory of Vater and Hartmann, that the Pentateuch

consists only of a series of fragments strung together without order or design? What wilder than the claim of the learned Ewald to a critical sagacity which can detect some seven principal documents and writers, followed by the Deuteronomist (also drawing largely on "many documents"), and several other editors? Meanwhile the advocates of the "supplement" theory are by no means agreed in any one aspect of the case—whether it be the number, the dates, or the respective portions of the writers. It is hardly an adequate statement to say of De Wette, Bleek, Stähelin, Tuch, Lengerke, Hupfeld, Knobel, Bunsen, Kurtz, Delitzsch, Schultz, Vaihinger, that they all alike recognize two documents." They hold this, and more also. Tuch, indeed, recognizes in the first four books but two main documents, together with various sections from independent sources; and De Wette, after two or three changes, adopted the same opinion. He however makes the Deuteronomist to be a third distinct writer; while Stähelin identifies the Deuteronomist with the Jehovist. Vaihinger finds in Genesis alone three writers, a pre-Elohistic, an Elohistic, and a Jehovist; also a separate writer for Deuteronomy. Hupfeld finds four persons concerned in the composition of Genesis: two Elohists, a Jehovist, and a compiler. He differs also from most of his compeers in supposing that the Jehovist knew nothing of the Elohistic work; while he holds to a separate Deuteronomist. Knobel finds four writers besides the Deuteronomist: a ground-work, a law-book, a war-book, and a Jehovist. Bleek thinks that an Elohistic document, whose limits he wisely declines to specify, lay at the foundation of the earlier parts of the Pentateuch, but that the supplementer or Jehovist of David's time had before him various other documents, longer or shorter, including a second account of creation, the song of Lamech, the narrative of Abram's expedition (Gen. xiv.), the sketch of Nimrod (Gen. x. 8-12), the section concerning the Sons of God (vi. 1-4), Jacob's blessing (xlix. 1-27), and other passages; together with whole chapters and smaller fragments in the central books from the hand of Moses, *e. g.* Lev. i. - vii., xi. - xvi., xvii., xxv.; Num. i., ii., iv., v. 1-3, vi. 22-27, x. 1-8, xix., xxi. 14, 15, 17, 18, 27-30; Ex. xx. 2-14, xxx. - xxxi. 17. Deuteronomy he refers to a later writer in the time of Hezekiah or Josiah. Bunsen, in his *Bibelwerk*, is also very indefinite. He, indeed, holds that the first four books were put into their present shape by a narrator of Hezekiah's time; but simply says that this writer had before him "writings from the hand of Moses, and other ancient documents which had survived the desolations of the Judges' times, and of which he found collections already made, consisting of prose-epic narratives, poetic utterances, and songs (Ibid. v. Abth. ii. pp. 108, 258, 261). He, however, expressly declares that the name Jehovah was a name of patriarchal times, which had gone into disuse and lost its significance till renewed under Moses; and he asserts that the Jehovistic narrative of Gen. ii. 5 f., is "neither an appendage nor supplement, much less a repetition of the previous narrative." Yet these writers, thus widely differing, agree on one point,—the late origin of the Pentateuch. But here Kurtz, Delitzsch, and Schultz part company with them. While they recognize two distinct sources in the historical parts of the Pentateuch, they agree in ascribing to Moses himself the book of Deuter-

onomy as a whole, and the "book of the Covenant" together with various smaller sections, and in referring the whole Pentateuch to Moses or to persons appointed and instructed by him. It will be seen that the unity of view among these writers is therefore somewhat nominal. And when we examine their analysis of particular passages we meet with great diversities. The two names of God, indeed, furnish a general ground of agreement until Ex. vi. 3. But even prior to that point no little diversity is found (*e. g.* Gen. vii.), and often very direct collisions. Gen. xx. contains the name Elohim five times and Jehovah but twice; yet Knobel makes the entire passage Jehovistic, against Tuch and Delitzsch, the former of whom pronounces the whole tone of the language and mode of view Elohistic. Again, the *connected* narrative (Gen. xxviii. 10 - xxxiii.) contains both the divine names quite abundantly, Elohim largely preponderating, with certain characteristics of style, which, as Tuch maintains, mark the Elohistic. To this writer accordingly he refers it, after deducting some troublesome portions. But Knobel assigns only eleven and a half verses in detached sections to the Elohistic, and thirty-four verses in six fragments to the Jehovist, twelve detached passages to a "law-book," and thirteen other sections, verses, and half verses, to a "war-book" used by the Jehovist. Such instances, which might be multiplied indefinitely, show alike the unlimited license which these theorists assume, and the general uncertainty and confusion that spreads through their speculations. The chief point of agreement is the easy proposition that these were documents used in the composition.

(iii.) Our attention is naturally arrested by the great liberties which these theorists take with the narrative. There is neither law nor limit to the disintegration. Each writer is for the most part a law unto himself, and the limits of the dismemberment are the exigencies of his theory. Knobel dissects the forty-first chapter of Genesis into some twenty fragments, from three different writers; and Davidson (following Boehmer) into forty; while Tuch refers the whole chapter, and Hupfeld, Stähelin, and Delitzsch none of it, to the Elohistic, or groundwork. Gen. xxxv. is divided by Knobel into ten distinct sections, by Davidson into fifteen. Davidson dissects Gen. xxi. into twelve fragments from four writers, and ch. xxxi. into thirty-five fractions from the same writers; Knobel into nine and six fragments, respectively. The other analysts widely differ from them here and elsewhere. Again, the excision of verses, clauses, and even single words is resorted to without the slightest hesitation, when the theory requires. Thus in Gen. v. the single verse 29, and in ch. vii. the last clause of ver. 16 is by all these critics remanded from the midst of Elohistic passages to the Jehovist. Hupfeld removes an intermediate half-verse in Gen. xii. 4, xxxv. 16, 21; Tuch drops out Gen. xii. 7; Knobel, xvi. 2, xxv. 21-23, xxix. 3, vii. 5, and parts of x. 25, xii. 8, xiii. 10, 18, xxxix. 2. Tuch, Knobel, and Delitzsch, leave to the Elohistic only ver. 29 of ch. xix. In ch. xxi. Knobel cuts off from the Elohistic the first clause of ver. 1, and the word "Jehovah" of the last clause; and of ch. xvii. he remarks that the whole chapter, "except 'Jehovah' of the first verse, is an unchanged portion of the groundwriting." Similar methods are abundantly employed to sustain the allegation of a difference of phraseology in the respective

writes. Knobel declares that  $\text{ל} \text{ק} \text{שׁוֹפֵר}$  occurs only in the Jehovist; and having found two cases (Gen. xxvii. 38, xxix. 11), he simply forces the third by cutting away the last half of xxi. 16, and referring it also to the Jehovist. In ver. 14 of the same chapter he also removes the single phrase "putting on his shoulder;" to sustain his theory that the Jehovist is more minute in description than the Elohist. Davidson declares that the expression "angel of God," or "angel of Jehovah," never occurs in the Elohist; and, to escape the force of Gen. xxi. 17, and xxxi. 11, he ascribes the first, notwithstanding the invariable Elohim before and after, to the redactor, and the second, similarly situated and twice containing Elohim, to a second Elohist. He finally surrenders his position on this subject of diverse phraseology, by declaring that his "argument is based on the prevailing, not the exclusive usage in each" (*Introd. to the O. T.* p. 30). For other specimens of this arbitrary and inconsistent method, see EXODUS. Surely it is a cheap process to build theories of such materials.

(iv.) It is instructive to observe the somewhat steady retrogression of these theories in the hand of their birth. The "fragment hypothesis" of Vater and Hartmann was long ago exploded by the doctrine of an elaborate editorship. The "supplement hypothesis" that followed was unable to sustain itself in any one form; but relief was sought by various enlargements of the number of documents. Thus Dr. Davidson in 1862, after accepting a theory of four principal writers in Genesis, still finds it necessary to add, that "probably the Elohist used several brief documents besides oral tradition. So, too, the Jehovist may have done." Bunsen and Bleek, who are among the latest of these speculators, are extremely vague and cautious in details. And in regard to the supposed date of the Elohist and the Jehovist, we have the following remarkable scale of approach to the time of Moses, not quite in chronological order: Lengerke (1844) refers the Elohist to the time of Solomon, and the supplementer to that of Hezekiah; Tuch (1838) to the times of Saul and Solomon; Bleek to the times of Saul or the Judges and of David; Stihelin, of the Judges and of Saul; Delitzsch (1852), of Moses and of Joshua, or one of the elders who survived him; Kurtz (1853, 2d ed.) supposes Deuteronomy and sections of the other books written by Moses in the Desert, and the Pentateuch completed, perhaps by one of Aaron's sons, immediately after the occupation of the promised land; and Schultz (1859) makes the later writer or Jehovist to be also the author of Deuteronomy, and none other than Moses himself. This movement is both hopeful and significant, notwithstanding that the later dates still find abundant advocates.

(v.) It is well to mark the obvious inconclusiveness of much of the reasoning of these hypotheses. The most elaborate showing of documents does not, as seems often to be assumed, disprove Mosaic authorship. Moses may have used them — unless they can be positively shown to be of later date. He may be, as Schultz holds, the very Jehovist. A modern historian, like Baneroft, incorporates directly into his narrative large quotations from other accounts. He is glad to avail himself of the very words of actors and eye-witnesses. But he is no less the author of the history, when he employs,

and as it were vouches for, these original accounts. Accordingly, we may freely recognize the use of older documents and firmly hold Moses to be the historian, — as do Rosenmüller, Jahn, Buch, Stuart, Lewis, Rawlinson, Murphy, and even Keil. Why should not the account of Creation, Paradise, and the Fall, have been handed down? And of so stupendous an event as the Flood, that has imprinted itself on the memory of almost all nations, even the most degraded, why should not the careful narrative, reading in the original like the minute record of an eye-witness, have descended down the chosen line of Shem from the scene itself? Why reject the striking indications that Gen. xiv. is a narrative older than the time of Moses, slightly modernized? On the other hand, a few external marks of a later period — a name or two, here and there an explanatory remark or interpolated comment, such as the lapse of several hundred years might naturally occasion, and which a modern editor would attach in the form of foot-notes, — by no means prove the later composition of the book, more especially if there are valid reasons on other grounds to believe the contrary. Still more hollow is the attempt to argue a later date by accumulated references to passages which cannot themselves be shown to have had a later origin, *e. g.* Gen. xiii. 18 (Hebron), xl. 15 (the Hebrews), Deut. xvii. 14-20 (the future monarchy). Dr. Davidson, who has gathered up a large array of reasons for believing the later date of Deuteronomy, is obliged repeatedly to admit the inconclusiveness of several portions of his argument. He devotes ten pages to a showing of the differences between its legislation and that of the other books; and yet concedes that the changes and modifications "are not radical ones," and are "only a development of the first"; and that it is "possible indeed to conceive of Moses" making these very modifications (*Introd.* i. 353, 363). Again after presenting a catalogue of historic deviations from the other books, he closes by granting that "there is no positive contradiction between them" (p. 367). And yet these utterly inconclusive considerations are steadily paraded as proofs. In order to show a difference in the tone of thought, Davidson is not ashamed to cite the injunction, "circumcise the foreskin of your heart," in evidence that "the ceremonial law was less valued" than (p. 369). The scholarly Knobel does not hesitate to swell his catalogue of diversities of style by instancing long lists of words limited in their use by the very nature of the subject, such as the technical words concerning the sacrifices. Nor should we overlook the cool assumption which has prevailed from De Wette to Davidson, and which begs the whole question of a revelation, by taking for granted that a narrative of miracles disproves a contemporaneous origin; or the equally vicious assumption which invalidates much of Bleek's arguing, that not only any prophetic utterance or allusion, but anything which can be construed as an anticipative transaction, must have been written after the event so anticipated. It is in such modes that no little of this reasoning is carried on.

(vi.) We cannot fail to observe how very few are the clear marks of a later hand, whether anachronisms or seeming interpolations. Considering the labor expended, the undoubted results are small. The fact of glosses or interpolations upon the original narrative has long been admitted. The Rabbins noticed eighteen passages of this kind, not all

equally clear. Sixty years ago Jahn specified nine or ten short passages (Ex. vi. 14-29, vii. 7, xi. 3; Deut. ii. 10-12, 20-24, iii. 9-11, 13, 14, x. 6-9; Num. xxxii. 41), as undoubtedly not belonging to the text, and Num. xii. 3 as doubtful. Modern writers have cited others, often on unsatisfactory grounds. Of clear anachronisms, the number is exceedingly slight. Of course the account of Moses' death was by a later hand; and a sufficient intimation is given in the book itself, in the declaration (Deut. xxxi. 24 ff.) that when Moses finished the Book of the Law, he handed it over to the Levites to keep. In modern books the account of the author usually precedes the work, though in some cases it is otherwise, as in Sleidan's work on the reign of Charles V., of which all the complete editions proceed without a break, to give an account of the death and burial of the author. The word "Dan" (Gen. xiv. 14) we incline to regard as later, though reasons can be given to the contrary; "Hebron" and "Hormah" we do not. [DAN, HEBRON, HORMAH.] The Gilgal of Deut. xi. 30 is clearly a different place from that which was first named in Josh. v. 9. See Keil on Joshua. "The Canaanite was then in the land" (Gen. xii. 6, xiii. 7), admits of three explanations, maintained respectively by Knobel, Delitzsch, and Kalisch, either of which removes all implication of a later date; "already in the land," says Kalisch, "for they were never entirely extirpated." "Before there reigned any king over Israel" (Gen. xxxvi. 31), might spring from the time of the kings; or (Delitzsch) it might be written from the stand-point of the previous promise, v. 11. "I was stolen from the land of the Hebrews" (Gen. xl. 1, 5), is a natural expression to the Egyptians, who had known "Abram the Hebrew," and who knew the people of that land as Hebrews (Gen. xxxix. 14, xii. 12). "As the land spued out the nations before you" (Levit. xviii. 28) ceases to carry any weight when we translate, as the Hebrew equally admits, and as ver. 20 implies, "will have spued out." The phrase "unto this day," sometimes cited, is so indefinite, in one instance denoting merely a part of Jacob's lifetime (Gen. xlviii. 15) and in another (Josh. vi. 25) a part of Rahab's life, that even Davidson does not insist on it. "Seaward," meaning westward (Gen. xii. 8, &c.), and "beyond Jordan" (Gen. i. 11), meaning east of Jordan, are cited as indications of a Palestinian writer. But if Gesenius is right in declaring the Hebrew to have had its early home in Palestine, both phrases would be simply old and settled terms of the language, with a fixed geographical meaning. Ex. xvi. 35, 36 certainly has the aspect of a later origin, notwithstanding the defense of Hengstenberg, Keil, Hävernick, and Murphy. These are the strongest cases of supposed anachronisms: of which but one is absolutely certain, and only two or three others present any considerable claims; while all together, if admitted, would make but a small show. Other cases are instanced, but with less plausibility. For we cannot for a moment admit the principle by which Bleek cites prospective laws, like Levit. xvii. 14-20, xix. 14, xx. 5, 6, as proofs of later composition.

The attempt of Colenso and others to show that the use of the word Jehovah itself indicates a late origin, and to sustain this position by reference to the Jehovistic and Elohistie Psalms is destitute of any solid basis. Too many questions concerning the date, authorship, and arrangement of the

Psalms are unsettled, to make the argument of any account. But (1) in order to make a great contrast between the earlier and later psalms in the use of the word Jehovah, Colenso parts company with the men of his school, and accepts the historic assertions of early date in the titles — when it will serve his turn; and he rejects them, when they will not answer his purpose, as in Ps. xxiv. and xlii. the former of which is exclusively Jehovistic, — rejects them for the circular reason that these psalms do "contain the name of Jehovah so often." (2.) Of the six psalms accepted by him as early psalms, one half contain the name Jehovah. (3.) It is questionable whether the Davidic psalms of the three later books are by David or his royal successors. [PSALMS]. (4.) Some have held that the arrangement of the Psalms was governed by the preponderant use of the Divine names. (5.) The attempt is futile in the face of the historic statement in Ex. vi. 3, that God had made Himself emphatically known to Moses as Jehovah, while the earlier names Jochebed and probably Moriah, are proofs that this was not the first disclosure of the name itself; a fact which further appears in a large number of other names found in I Chron. ii. 8, 25, 32, iv. 2, vii. 2, 3, 8, xxiii. 8, 17, 19, 20 — although Colenso remarks that the chronicler "simply invented the names," and Davidson observes that "little weight attaches to these, because the Hebrews often altered older names for later ones!"

The apparent number of explanatory glosses is greater than that of the seeming anachronisms; but the clear cases are not numerous. Here opinions will differ. Some passages so clearly break the connection as to be commonly admitted. It is perhaps conceded by sober critics that Deut. x. 6, 7 (probably 6-9) is an interpolation (or, certainly a misplacement); also most or all of iii. 9-14 and ii. 10-12, 20-23. (Rosenmüller, however, ascribes the last mentioned to Moses at the end of his life, and Hengstenberg and Keil refer all three to him.) Jahn would add Num. xxxii. 41, and, with no very obvious necessity, such historic supplements as the titles Deut. i. 1-4, iv. 44-49, and others not specified. Many would include (Rosenmüller, Eichhorn, Jahn) the assertion of Moses' meekness (Num. xii. 3), and (with Jahn) other remarks concerning him, Ex. vi. 26, 27, vii. 7, xi. 3; while some writers still maintain that these remarks are demanded by the connection and occasion, and that Moses could be divinely guided thus to speak the truth concerning himself. These are the strongest cases that are adduced. Others are cited, of which the most that can be said is that they might be interpolations; and also that they might not. It is of no avail for Bleek to allege Num. xv. 32, "while the children of Israel were in the wilderness"; for they had left the wilderness before the death of Moses. On the whole there is almost reason for surprise that so very few passages can be found in the Pentateuch which could not have come from the hand of Moses himself. In a composition so ancient we should naturally look for more, rather than fewer marks of editorial revision.

(vii.) We can now look at the strength of the evidence that Moses was the author of the book as a whole. Hardly any thing is lacking to the completeness of the concurrent testimony. We can merely call attention to it in the most meagre of outlines. 1. The supposition is rendered entirely admissible by all the circumstances of the case

(a.) The art of writing was in abundant use, and the Israelites in Egypt had lived in the midst of it. (b.) The requisite impulse for a written composition had arrived, in the completion of a great national and religious epoch, and the permanent establishment of laws and institutions founded on a great deliverance. (c.) The occasion had come for such a book as the Pentateuch, incorporating the institutions with the history. (d.) The requisite person had appeared in Moses, — the man whom even Ewald names "the mighty originator and leader of this entire new national movement," a "master-mind" "putting forth the highest energies and sublimest efforts of the spirit" with "clear insight and self-possession," "the greatest and most original of prophets," with endowments so remarkable that the same spirit "has in no other prophet produced results so important in the history of the world as in Moses." Such a work became such a man; and such a man might be supposed to possess the requisite "insight" for such a work.

2. The fact of his authorship is sustained by positive and concurrent evidence, in great variety and abundance. It is easier for objectors to overlook than to meet it. (a.) The Pentateuch itself declares of Moses, and of him only, that he was concerned in its composition. Nearly the whole of Deuteronomy, as even De Wette, Knobel, and Davidson concede, claims to have been written by him. Statements are explicitly made concerning portions of Exodus and Numbers to the same effect: Ex. xxiv. 7, xxxiv. 27, 28, xvii. 14; Num. xxxiii. 1-3. In one of these passages (Ex. xvii. 14) the direction is given to write "it in the book" (not a book, as E. V.). Similar allusions to such a book, and to the Law as a written law, are found in Deut. xvii. 18, 19, xxxi. 9-11, 24, xxviii. 58, 61, xxix. 20, 21, 27, xxx. 10. Meanwhile we find God giving explicit directions (Ex. xv. 16-21, 22) to deposit his communications to Moses in the ark; corresponding to this direction is the claim, repeated over and over, that such utterances are the precise utterances of Jehovah, e. g. Lev. xxvii. 34; Num. xxvi. 13; while the expressions, "the Lord spake unto Moses, saying," and "the Lord said unto Moses," occur in connection with various groups of commandments in Exodus, Leviticus, and Numbers more than 100 times — besides other similar forms; and some fifty times in announcing the performance of many of these commandments, we are told that it took place "as the Lord commanded Moses," or, "according to the commandment of the Lord by the hand of Moses." These constant claims to be *exact* statements of God's commandments by Moses, placed beside the direction to deposit in the ark, constitute the clearest and most pervading assertion of the Mosaic authorship of the main portion of the three central books. (b.) Deuteronomy, confessedly asserting its own Mosaic origin, everywhere presupposes the earlier books; and it re-asserts and vouches for all the main portions of their history from the dispersion of the race to the death of Aaron and the arrangements for Moses' successor, while its comments include directly and implicitly all the leading features of their legislation. As Schultz remarks, it is incredible that at the end of his life the great legislator should have been regardless of the text of his law, and solicitous only about the discourses which were the comment. (c.) The subsequent books of the O. T. abundantly presuppose the Pentateuch, and in every instance in which they

allude to the authorship, they refer it to Moses. This topic has been sufficiently developed in the original article. (d.) It was the undisputed testimony of the Jewish nation at and before the time of Christ that Moses wrote the Pentateuch. Such is the testimony of Philo from Alexandria, and of Josephus from Jerusalem. (Philo, Mangey, II. 141, 149, Josephus, Bekker, III. ii. 5, xii. etc.) So also the Talmud from Babylon, in a passage apparently of great antiquity. Their statements are supported by the occasional references of the N. T., which at the lowest estimate show the current view by referring a passage from Exodus, Leviticus, or Deuteronomy alike to "Moses," and by recognizing the whole O. T. as consisting, according to the then prevailing classification, of "the law of Moses, the prophets and the psalms," or hagiographa (Luke xxiv. 44). (e.) The Lord Jesus Christ and the writers of the N. T. add their testimony. The Law is the law of Moses (John vii. 23; Acts xv. 5; Heb. x. 28), or simply Moses (Acts xxi. 21). Moses gave the Law (John i. 17, vii. 19). Statements found in the several books are statements of Moses (Luke xx. 37, Rom. x. 5, Acts ii. 22; Matt. xix. 8). The entire utterances of the Pentateuch concerning the priesthood are what "Moses spake concerning the priesthood" (Heb. vii. 14). The Saviour directly declares (John vi. 46, 47), that Moses "wrote of me," and that he left "writings" then in the hands of the Jews. See also Luke xxiv. 27, 44, Acts xxvi. 22, xxviii. 23, xv. 21; 2 Cor. iii. 15, Luke xvi. 29, 31. Those only who hold the views of Colenso and Davidson will deem it sufficient to say that the Saviour only shared the ignorance of his age. Nor will it satisfy the conditions of the case to say that He simply accommodated himself to the prevalent view by the *argumentum ad hominem*; for Christ's declaration in John v. 46, 47, is too direct and self-originated to be easily disposed of otherwise than (in Alford's words) as "a testimony to the fact of Moses having written those books which were then and are still known by his name." (f.) The force of all these testimonies is increased by the fact that they are absolutely uncontradicted. While the Pentateuch itself, the subsequent books of the O. T., the Jewish nation, the Saviour and the Apostles, point to Moses with such entire unanimity that the echo comes back from foreign nations, in Manetho, Hecateus, Strabo, Tacitus, referring the Jewish laws and institutions to Moses alone, not one hint is to be found in the whole range of history or literature that any person later or other than Moses composed either the volume or any integral portion of it. Never was testimony more unbroken.

3. The direct testimony is confirmed by various collateral indications, which we can only suggest. (a.) Traces of the Pentateuch in the other books of the O. T. extending almost up to the time of Moses, — except as the authenticity and early date of those books also are denied. (b.) Various archaisms characteristic of the five books, and of those almost or quite alone: e. g.  $\text{N}^{\text{H}}$  as a feminine 195 times (36 in Deuteronomy), and in no certain instance elsewhere;  $\text{N}^{\text{H}}$  as a feminine; the demonstrative  $\text{N}^{\text{H}}$ , found but twice elsewhere; the Kal future ending  $\text{N}^{\text{H}}$  for  $\text{N}^{\text{H}}$ ; the far greater predominance of the full future  $\text{N}^{\text{H}}$  the

abundant use of ה local; כָּבֵשׁ for כָּבַשׁ here only, fifteen times: זָכַר for זָכָר; הָיָה, תָּבַב, גִּזְלָה, שָׁגַר, אָסִין, יָקוּם, אָבִיב, מָרִיתִים, and others, only here. The word מָרִיתִים disappears afterwards, except in poetry; מָיִן

occurs 29 times, afterwards but once; נָהָה 21 times, and but once afterwards. There is a prevalence of rough consonants; thus נָחַת, 13 times in the Pentateuch, and twice only elsewhere, while

the softer form שָׁחַת, is found 38 times in the later books (c.) Egyptian words and traces of Egyptian residence. Among the Hebrew words corresponding to Egyptian ones, as given by Gesenius, Bunsen, and Seyffarth, are הָיָה, אֵיפֶקֶה, גְּמָא, שְׁוֹפָר, רָאָם, כּוּס, אֲמָה, הַבָּה, מְפָח, אָרַח, and many others. The word

הָיָה, occurring twenty-one times in the Pentateuch, afterwards disappears, except twice in Ezekiel. The word אֲפֶקֶה, which had Ethiopic and apparently Egyptian affinities, went gradually into disuse, and was replaced, except in poetry, by פָּר.

(d.) Marks of the wilderness. (Constant reference to tents and camps (Ex. xix. 17, &c.): regulations for marching and halting (Num. ii. etc.); and the absence of allusions to permanent dwellings except prospectively. The minute and elaborate directions for constructing and transporting the tabernacle for the ark, would never have been committed to writing except at the time. The wood of the Tabernacle and its furniture (shittim) was the product of the desert; while the cypress of Palestine never appears in the Pentateuch. The cedar, which is the growth of Palestine and Syria, is mentioned, but in a very remarkable manner, — never as a building-material, but in slight quantities, on two occasions, in cleansing from the leprosy (Lev. civ.), and in forming water of purification for the unclean (Num. xix. 6). Now we learn elsewhere that cedar was imported from Syria into Egypt for furniture, small boxes, coffins, and various objects connected with the dead, and was also used in ointments for elephantiasis, ulcers, and some other complaints. The uses designated thus remind us of Egypt, the quantities employed conform to the circumstances of a journey which restricted it to small amounts. Yet the later books of the Bible abound in allusions to the cedar as the noblest of rees and building materials. Certain regulations were made for the wilderness and afterwards relaxed, Lev. xvii. 34; Deut. xii. 15, 20, 21. The law for leprosy contemplates both the condition of the people in the wilderness and in their future home. Some regulations concerning uncleanness suppose all the people in the vicinity of the Tabernacle. Some instances of supplementary legislation are founded on occurrences or laws of the wilderness; thus in regard to the Passover, the regulation, Num. ix. 3-11, grows out of Num. v. 2. Laws in regard to Sabbath-breaking and blasphemy, Levit. xxiv., Num. xv. 32-36, originated in like manner. Stanley shows (*Jewish Church*, i. 189) that the regulations concerning clean and unclean animals, in several of their specifications, include

what was peculiarly "the game of the wilderness." The consecration of the whole tribe of Levi, as the same writer remarks (i. 188), is a clear memoria of that early period, since at no later time was there furnished any such occasion; and the provision of cities of refuge (i. 191) points back to a nomadic life and the morals of the desert. (c.) Delitzsch shows that there was no subsequent period of the nation from which the Law as a whole could have sprung; neither the barbarous times of the Judges, nor the insignificant time of Saul; whereas the reigns of David and Solomon, rich as they are in historic materials, give no indication whatever that the Law then first assumed written form. It did not originate after the division of the kingdoms, for Israel and Judah alike acknowledged its sway. Nor in the exile; for the people in returning from the exile return also to the *thorah* as the original divine basis of their long shattered commonwealth. And as to Ezra, both history and tradition disclose him only as a restorer and never as an originator. (f.) Finally, those who deny the authorship by Moses, cannot suggest, much less agree upon any plausible substitute.

(viii.) Let us now summarily notice the invalidity of all the objections raised, as against this evidence. The "higher criticism" has failed to shake the testimony. Von Bohlen's attempt to show errors in the allusions to Egyptian customs notably recoiled. The arithmetical objections marshaled by Colenso have been superabundantly demolished. The alleged errors and false implications concerning the wilderness have been largely addressed to our ignorance; and many of the objections have been shown also to have sprung from ignorance; whereas every new research brings to light new correspondences between the narrative and the circumstances. The cited anachronisms shrink into the smallest compass; and, so far as they exist, can be legitimately accounted for as revisions. The apparent interpolations are themselves indications of the antiquity of the text. The assertion, that "the mythological, traditional, and exaggerated element" (Davidson) — that is, the miraculous — shows that Moses could not have been the author, is a mere begging of the whole question of the supernatural. The argument that there is not difference enough between the language of the Pentateuch and of the later books, breaks down in several ways: It is conceded by the objectors (e. g. Davidson, i. 104) that there are differences, but they are alleged to be insufficient, — a matter of degree and a question of opinion. That the diversities should not be great is explicable from the isolation, the consolidation, and complete intercommunication of the nation, as well as from the uniformity of their mode of life, and the fixedness of their institutions and their civilization. It is paralleled by the fact that the Syriac of the Peshito in the second century is substantially the same as that of Syriac writers of the 13th century. And furthermore, it is admitted on all hands, by De Wette, Knobel, Bleek, Ewald, that portions of the Pentateuch are actually as old as Moses; and Knobel even admits the difficulty of deciding what is Mosaic and what is not; while the difference between the admitted psalms of David and the language of Ezra's time — though a period far more eventful in historic changes — are not such as to have made the Psalms difficult of apprehension at the latter period. Again, "repetitions, duplicate

and diverse narratives" — if all the cited instances were real — do not bear upon this question. No more does the alleged composite character of the book; for, to whatever extent a compilation, unless there be positive proof of later date, nothing prevents Moses from having been the "redactor" or the "Jehovist." Without here going further into that question, we will only say that while Hengstenberg has too vehemently repelled the idea of a composite character, and has gone to extremes in the endeavor to find always a special reason for the use of Elohim and Jehovah respectively, on the other hand, the opposite school have gone to a still greater extreme in the attempt to dissect and precisely to determine the sources of each part of the composition. It is a well-considered remark of Kurtz at the close of his *History of the Old Covenant*: "We venture to express it as our confident persuasion that the question as to the origin and composition of the Pentateuch is far from having been settled, either by Hävernick, Hengstenberg, or Keil, on the one hand, or by Tuch, Stähelin, and Delitzsch on the other, and still less by Ewald or Hupfeld."

There is nothing then to invalidate the clear evidence that Moses was the author, unless it be the few detached words and passages seemingly of later growth. But it has been well said by the writer of the preceding article, "we are not obliged because of the later date of these portions to bring down the rest of the book to later times." Indeed no procedure is, under the circumstances, more unreasonable, provided they can be satisfactorily explained otherwise. But they can be thus explained. The succession of prophets continued till Ezra and Nehemiah, more than a thousand years after Moses. In view of the lapse of time and of the effects of the exile, (1) it is a perfectly natural supposition that explanatory additions should have been made by some of these later prophets. (2.) The Scriptures render the supposition probable by their notices of Ezra. He is not only in general "the scribe" (Neh viii. 4), but he is "a ready scribe in the Law of Moses" (Ez. vii. 6), "a scribe of the words of the commandments of the Lord and of his statutes to Israel" (vii. 11), who "had prepared his heart to seek the Law of the Lord and to do it, and to teach in Israel statutes and judgments" (ver. 10). He is also declared not only to have brought the Law of Moses before the people, and to have read it publicly in their hearing through a succession of days (Ez. viii. 1-5, 18), but he and his coadjutors "read in the Law of God distinctly, and gave the sense, and caused them to understand the reading" (viii. 8). Now let Ezra but have done for the Scriptures permanently and in view of the permanent necessity, that which he did orally and transiently on this occasion, and we have the phenomena fully explained. (3.) Accordingly there are traditional indications that this kind of supplementary work was actually performed. The Babylonian Talmud, in a well-known passage apparently of great antiquity (see Westcott, *The Bible in the Church*, pp. 35-37), ascribes eight verses of the Pentateuch [the last eight] to Joshua; and the same passage declares that several of the books of the O. T. were "written" (or reduced to their

present form) by others than their proper authors among them "the men of the Great Synagogue"; while Ezra and Nehemiah end the list with writing their own books and completing the books of Chronicles. Concurrent with this is the tradition of 2 Esdras (xiv. 20-40), handed down also by the early fathers, fabulously embellished indeed, and ascribing to Ezra the reproduction of the lost Scriptures by immediate inspiration. But, as Dr. Davidson well said in his *Biblical Criticism* (i. 103), "the historic basis of the view that Ezra bore a leading part in collecting and revising the sacred books is not shaken by the fabulous circumstances in the writings of the early fathers, in passages of the Talmud, and in later Jewish authors." We may well accept this method of explaining the phenomenon.

We accordingly reach the conclusion that nothing adduced by recent discussions need shake our belief that Moses was the author of the Pentateuch. We may accept the traces of earlier narratives, as having been employed and authenticated by him; and we may admit the marks of later date as indications of a surface revision by authorized persons not later than Ezra and Nehemiah.

Among the later publications are Murphy on *Genesis* (1864) and *Exodus* (1866); Kalisch on *Genesis, Exodus, and Leviticus* (1858-1867); Lange on *Genesis*; Jacobus on *Genesis*; Macdonald's *Introduction to the Pentateuch* (1861); Davidson's *Introduction to the Old Testament* (1862-63); and *The Book of Genesis; the Common Version revised for the Amer. Bible Union, with Explanatory Notes*, by T. J. Conant (N. Y. 1868). See also a discussion of the historic character and authorship of the Pentateuch, in the *Bibl. Sacra* for April and July, 1863, and July and October, 1864, by the present writer. S. C. B.

**PENTECOST** (הַגְּבֹרִים בַּפְּנִימִי בְּפִרְיָהּ) (Ex. xxiii. 16): ἑορτὴ θεισμοῦ πρωτογεννημάτων: *solenmnitas messis primitivorum*; "the feast of harvest, the first fruits of thy labors;" רֵגַל שְׂבֻעֹת (Ex. xxxiv. 22; Deut. xvi. 10): ἑορτὴ ἑβδομάδων: *solenmnitas hebdomadarum* "the feast of weeks:" יוֹם הַפְּנִימִים יוֹם (Num. xxviii. 26, cf. Lev. xxiii. 17): ἡμέρα τῶν νέων: *dies primitivorum*; "the day of first fruits"). In later times it appears to have been called יוֹם הַמַּשִּׁים (see Joseph. *B. J.* ii. 3, § 1); and hence, ἡμέρα τῆς Πεντηκοστῆς (Tob. ii. 1; 2 Macc. xii. 32; Acts ii. 1, xx. 16; 1 Cor. xvi. 3). But the more common Jewish name was עֵצְבֵיתָה<sup>a</sup> (in Chaldaee, עֵצְבֵיתָה; Ἀσσαθὰ, in Joseph. *Ant.* iii. 10, § 6). The second of the great festivals of the Hebrews. It fell in due course on the sixth day of Sivan, and its rites, according to the Law, were restricted to a single day. The most important passages relating to it are, Ex. xxiii. 16, Lev. xxiii. 15-22, Num. xxviii. 26-31, Deut. xvi. 9-12.

I. The time of the festival was calculated from the second day of the Passover, the 16th of Nisan. The Law prescribes that a reckoning should be kept from "the morrow after the Sabbath" <sup>b</sup> (Lev.

<sup>a</sup> This word in the O. T. is applied to the seventh day of the Passover and the eighth day of Tabernacles, but not to the day of Pentecost. [Passover, note a, p. 2421.] On its application to Pentecost, which is found

in the Mishna (*Rosh hash.* i. 2, and *Chagigah*, ii. 4 &c.), in the Targum (Num. xxviii. 26), in Josephus, and elsewhere, see § 5.

<sup>b</sup> There has been from early times some difference

xxiii. 11, 15) [PASSOVER, II. 3] to the morrow after the completion of the seventh week, which would of course be the fiftieth day (Lev. xxiii. 15, 16; Deut. xvi. 9). The fifty days formally included the period of grain-harvest, commencing with the offering of the first sheaf of the barley-harvest in the Passover, and ending with that of the two first loaves which were made from the wheat-harvest, at this festival.

It was the offering of these two loaves which was the distinguishing rite of the day of Pentecost. They were to be leavened. Each loaf was to contain the tenth of an ephah<sup>a</sup> (i. e. about 3½ quarts) of the finest wheat flour of the new crop (Lev. xxiii. 17). The flour was to be the produce of the land.<sup>b</sup> The loaves, along with a peace-offering of two lambs of the first year, were to be waved before the Lord and given to the priests. At the same time a special sacrifice was to be made of seven lambs of the first year, one young bullock and two rams, as a burnt-offering (accompanied by the proper meat and drink offerings), and a kid for a sin-offering (Lev. xxiii. 18, 19). Besides these offerings, if we adopt the interpretation of the Rabbinical writers, it appears that an addition was made to the daily sacrifice of two bullocks, one ram, and seven lambs, as a burnt-offering (Num. xxviii. 27).<sup>c</sup> At this, as well as the other festivals, a free-will offering was

of opinion as to the meaning of the words **מִקְרַת הַפֶּסַח** **הַשֵּׁבִיעִי**. It has however been generally held, by both Jewish and Christian writers of all ages, that the Sabbath here spoken of is the first day of holy convocation of the Passover, the 15th of Nisan, mentioned Lev. xxiii. 7. In like manner the word **שַׁבָּת** is evidently used as a designation of the day of atonement (Lev. xxiii. 32); **שַׁבְּתוֹן** (*sabbati observatio*) is applied to the first and eighth days of Tabernacles and to the Feast of Trumpets. That the LXX. so understood the passage in question can hardly be doubted from their calling it "the morrow after the first day" (i. e. of the festival): *ἡ ἐπαύριον τῆς πρώτης*. The word in vv. 15 and 16 has also been understood as "week," used in the same manner as *σάββατα* in the N. T. (Matt. xxviii 1; Luke xviii. 12; John xx. 1, &c.). But some have insisted on taking the Sabbath to mean nothing but the seventh day of the week, or "the sabbath of creation," as the Jewish writers have called it; and they see a difficulty in understanding the same word in the general sense of *week* as a period of seven days, contending that it can only mean a regular week, beginning with the first day, and ending with the Sabbath. Hence the Bathusian (or Sadducean) party, and in later times the Karaites, supposed that the omer was offered on the day following the weekly Sabbath which might happen to fall within the seven days of the Passover. The day of Pentecost would thus always fall on the first day of the week. *Zitzig (Ostern und Pfingsten, Heidelberg, 1837)* has put forth the notion that the Hebrews regularly began a new week at the commencement of the year, so that the 7th, 14th, and 21st of Nisan were always Sabbath days. He imagines that "the morrow after the Sabbath" from which Pentecost was reckoned, was the 22d day of the month, the day after the proper termination of the Passover. He is well answered by Bähr (*Symbolik*, ii. 620), who refers especially to Josh. v. 11, as proving, in connection with the law in Lev. xxiii. 14, that the omer was offered on the 16th of the month. It should be observed that the words in that passage,

**עֲבַד־הָאֵץ**, mean merely *corn of the land*, not *in A. V. "the old corn of the land."* "The morrow

to be made by each person who came to the sanctuary, according to his circumstances (Deut. xvi. 10). [PASSOVER, p. 2342, note d.] It would seem that its festive character partook of a more free and hospitable liberality than that of the Passover, which was rather of the kind which belongs to the mere family gathering. In this respect it resembled the Feast of Tabernacles. The Levite, the stranger, the fatherless, and the widow, were to be brought within its influence (Deut. xvi. 11, 14). The mention of the gleanings to be left in the fields at harvest for "the poor and the stranger," in connection with Pentecost, may perhaps have a bearing on the liberality which belonged to the festival (Lev. xxiii. 22). At Pentecost (as at the Passover) the people were to be reminded of their bondage in Egypt, and they were especially admonished of their obligation to keep the Divine law (Deut. xvi. 12).

II. Of the information to be gathered from Jewish writers respecting the observance of Pentecost, the following particulars appear to be the best worthy of notice. The flour for the loaves was sifted with peculiar care twelve times over. They were made either the day before, or, in the event of a Sabbath preceding the day of Pentecost, two days before the occasion (*Menachoth*, vi. 7, xi. 9). They are said to have been made in a particular form. They were seven palms in length and four in breadth

after the Passover" (**מִקְרַת הַפֶּסַח**), might at first sight seem to express the 15th of Nisan; but the expression may, on the whole, with more probability, be taken as equivalent with "the morrow after the Sabbath," that is, the 16th day. See Keil on Josh. v. 11; Masius and Drusius, on the same text, in the *Crit. Sac.*; Bähr, *Symb.* ii. 621; Selden, *De Anno Civili*, ch. 7; Bartenora, in *Chagigah*, ii. 4; Buxt. *Syn. Jud.* xx.; Fagius, in Lev. xxiii. 15; Drusius, *Notæ Majores* in Lev. xxiii. 16. It is worthy of remark that the LXX. omit *τῆ ἐπαύριον τοῦ πάσχα*, according to the texts of Tischendorf and Theile.

<sup>a</sup> The **עֲשָׂרוֹן**, or *tenth* (in A. V. "tenth deal"), is explained in Num. v. 15, **עֲשִׂירִית הָאֵפָה**, "the tenth part of an ephah." It is sometimes called

**עֹמֶר**, *omer*, literally, *a handful* (Ex. xvi. 36), the same word which is applied to the first sheaf of the Passover. (See Joseph. *Ant.* viii. 2, § 9.) [WEIGHTS AND MEASURES.]

<sup>b</sup> This is what is meant by the words in Lev. xxiii. 17, which stand in the A. V. "out of your habitations," and in the Vulgate, "ex omnibus habitaculis vestris." The Hebrew word is **בַּיִת**, *a house, as the home of a family*, but **מִבְּיַב**, *a place of abode, as the territory of a nation*. The LXX. has, *ἀπὸ τῆς κατοικίας ὑμῶν*; Jonathan, "e loco habitatumum vestrum." See Drusius, in *Crit. Sac.*

<sup>c</sup> The differing statements respecting the proper sacrifices for the day in Lev. xxiii. 18, and Num. xxviii. 27, are thus reconciled by the Jewish writers (Mishna, *Menachoth*, iv. 2, with the notes of Bartenora and Maimonides). Josephus appears to add the two statements together, not quite accurately, and does not treat them as relating to two distinct sacrifices (*Ant.* iii. 10, § 6). He enumerates, as the whole of the offerings for the day, a single loaf, two lambs for a peace-offering, three bullocks, two rams and fourteen lambs for a burnt-offering, and two kids for a sin-offering. Bähr, Winer, and other modern critics regard the statements as discordant, and prefer that of Num. xxviii. as being most in harmony with the sacrifices which belong to the other festivals.

(*Menachoth*, xi. 4, with Maimonides' note). The two lambs for a peace-offering were to be waved by the priest, before they were slaughtered, along with the loaves, and afterwards the loaves were waved a second time along with the shoulders of the lambs. One loaf was given to the high-priest and the other to the ordinary priests who officiated <sup>a</sup> (Maimon. in *Tamid*, c. 8, quoted by Otho). The bread was eaten that same night in the Temple, and no fragment of it was suffered to remain till the morning (Joseph. *B. J.* vi. 5, § 3; *Ant.* iii. 10, § 6).

Although, according to the Law, the observance of Pentecost lasted but a single day, the Jews in foreign countries, since the Captivity, have prolonged it to two days. They have treated the Feast of Trumpets in the same way. The alteration appears to have been made to meet the possibility of an error in calculating the true day.<sup>b</sup> It is said by Bartonora and Maimonides that, while the Temple was standing, though the religious rites were confined to the day, the festivities, and the bringing in of gifts, continued through seven days (Notes to *Chagigah*, ii. 4). The Hallel is said to have been sung at Pentecost as well as at the Passover (Lightfoot, *Temple Service*, § 3). The concourse of Jews who attended Pentecost in later times appears to have been very great (Acts ii.; Joseph. *Ant.* xiv. 13, § 14, xvii. 10, § 2; *B. J.* ii. 3, § 1).

No occasional offering of first-fruits could be made in the Temple before Pentecost (*Biccurim*, i. 3, 6). Hence probably the two loaves were designated "the first of the first-fruits" (Ex. xxiii. 19) [PASSOVER, p. 2343, note *d*], although the offering of the omer had preceded them. The proper time for offering first-fruits was the interval between Pentecost and Tabernacles (*Bicc.* i. 6, 10; comp. Ex. xxiii. 16). [FRUIT-FRUIT.]

The connection between the omer and the two loaves of Pentecost appears never to have been lost sight of. The former was called by Philo, *προεόριος ἑτέρας ἑορτῆς μεζουος* (*De Sept.* § 21, v. 25; comp. *De Decem Orac.* iv. 302, ed. Tauch.). The interval between the Passover and Pentecost was evidently regarded as a religious season.<sup>d</sup> The custom has probably been handed down from ancient times, which is observed by the modern Jews, of keeping a regular computation of the fifty days by a formal observance, beginning with a short prayer on the evening of the day of the omer, and continued on each succeeding day by a solemn declaration of its number in the succession, at evening

prayer, while the members of the family are standing with respectful attention (*Buxt. Syn. Jud.* xx. 440).

III. Doubts have been cast on the common interpretation of Acts ii. 1, according to which the Holy Ghost was given to the Apostles on the day of Pentecost. Lightfoot contends that the passage, *ἐν τῷ συμπληροῦσθαι τῆν ἡμέραν τῆς Πεντηκοστῆς*, means when the day of Pentecost had passed, and considers that this rendering is countenanced by the words of the Vulgate, "cum compleretur dies Pentecostes." He supposes that Pentecost fell that year on the Sabbath, and that it was on the ensuing Lord's Day that ἦσαν ἅπαντες δρομομαδῶν ἐπὶ τὸ αὐτὸ (*Exercit. in Act.* ii. 1). Hitzig, on the other hand (*Ostern und Pfingsten*, Heidelberg, 1837), would render the words, "As the day of Pentecost was approaching its fulfillment." Neander has replied to the latter, and has maintained the common interpretation (*Planting of the Christian Church*, i. 5, Bohn's ed.).

The question on what day of the week this Pentecost fell must of course be determined by the mode in which the doubt is solved regarding the day on which the Last Supper was eaten. [PASSOVER, III.] If it was the legal paschal supper, on the 14th of Nisan, and the Sabbath during which our Lord lay in the grave was the day of the omer, Pentecost must have followed on the Sabbath. But if the Supper was eaten on the 13th, and He was crucified on the 14th, the Sunday of the Resurrection must have been the day of the omer, and Pentecost must have occurred on the first day of the week.

IV. There is no clear notice in the Scriptures of any historical significance belonging to Pentecost. But most of the Jews of later times have regarded the day as the commemoration of the giving of the Law on Mount Sinai. It is made out from Ex. xix. that the Law was delivered on the fiftieth day after the deliverance from Egypt (Selden, *De Jur. Nat. et Gent.* iii. 11). It has been conjectured that a connection between the event and the festival may possibly be hinted at in the reference to the observance of the Law in Deut. xvi. 12. But neither Philo nor Josephus has a word on the subject. There is, however, a tradition of a custom which Schöttgen supposes to be at least as ancient as the Apostolic times, that the night before Pentecost was a time especially appropriated for thanking God for the gift of the Law.<sup>e</sup> Several of the Fathers noticed

Casaubon, Lightfoot, Godwyn, Carpozov, and many others.

<sup>e</sup> The less educated of the modern Jews regard the fifty days with strange superstition, and, it would seem, are always impatient for them to come to an end. During their continuance, they have a dread of sudden death, of the effect of malaria, and of the influence of evil spirits over children. They relate with gross exaggeration the case of a great mortality which, during the first twenty-three days of the period, befell the pupils of Akiba, the great Mishnaical doctor of the second century, at Jaffa. They do not ride, or drive, or go on the water, unless they are impelled by absolute necessity. They are careful not to whistle in the evening, lest it should bring ill luck. They scrupulously put off marriages till Pentecost. (Staunton, *La Vie Juive en Alsace* (Paris, 1860), p. 124; Mills, *British Jews*, p. 207.)

<sup>f</sup> Philo expressly states that it was at the Feast of Trumpets that the giving of the Law was commemorated (*De Sept.* c. 22). [TRUMPETS, FEAST OF.]

<sup>g</sup> *Hor. Heb.* in Act. ii. 1. Schöttgen conjectures

<sup>a</sup> In like manner, the leavened bread which was offered with the ordinary peace-offering was waved and given to the priest who sprinkled the blood (*Lev.* vii. 13, 14).

<sup>b</sup> Lightfoot, *Exercit. Heb.* Acts ii. 1; Reland, *Ant.* iv. 4, 5; Selden, *De Ann. Civ.* c. vii.

<sup>c</sup> He elsewhere mentions the festival of Pentecost with the same marked respect. He speaks of a peculiar feast kept by the Therapeutae as *προεόριος μεγίστης ἑορτῆς* sc. Πεντηκοστῆς (*De Vit.* *Contemp.* v. 334).

<sup>d</sup> According to the most generally received interpretation of the word *δευτερόπαρος* (Luke vi. 1), the period was marked by a regularly designated succession of Sabbaths, similar to the several successions of Sundays in our own calendar. It is assumed that the day of the omer was called *ἐντέρας* (in the LXX., *Lev.* xxiii. 11, ἡ ἐπαύριον τῆς πρώτης). The Sabbath which came next after it was termed *δευτερόπαρος*; the second, *δευτεροδέτερον*; the third, *δευτερότριτον*; and so onwards, till Pentecost. This explanation was first proposed by Scaliger (*De Emend. Temp.* lib. vi. p. 557), and has been adopted by Frischmuth, Petavius,

the coincidence of the day of the giving of the Law with that of the festival, and made use of it. Thus Jerome says, "Supputemus numerum, et inveniemus quinquagesimo die egressionis Israel ex Ægypto in vertice montis Sinai legem datam. Unde et Pentecostes celebratur solemnitas, et postea Evangelii sacramentum Spiritus Sancti descensione completur" (*Epist. ad Fabiolam, Mansio XII.*). St. Augustine speaks in a similar manner: "Pentecosten etiam, id est, a passione et resurrectione Domini, quinquagesimum diem celebramus, quo nobis Sanctum Spiritum Paracletum quem promiserat misit: quod futurum etiam per Judæorum pascha significatum est, cum quinquagesimo die post celebrationem ovis occisæ, Moyses digito Dei scriptam legem accepit in monte" (*Contra Faustum, lib. xxxii. c. 12.*). The later Rabbis spoke with confidence of the commemoration of the Law as a prime object in the institution of the feast. Maimonides says, "Festum septimanarum est dies ille, quo lex data fuit. Ad hujus diei honorem pertinet quod dies a præcedenti solemnitate (Pascha) ad illum usque diem numerantur" (*More Novechim, iii. 41.*). Abarbanel recognizes the fact, but denies that it had anything to do with the institution of the feast, observing, "lex divina non opus habet sanctificatione diei, quo ejus memoria recolatur." He adds, "causa festi septimanarum est initium messis tritici" (*in Leg. 262*). But in general the Jewish writers of modern times have expressed themselves on the subject without hesitation, and, in the rites of the day, as it is now observed, the gift of the Law is kept prominently in view.<sup>a</sup>

V. If the feast of Pentecost stood without an organic connection with any other rites, we should have no certain warrant in the Old Testament for regarding it as more than the divinely appointed solemn thanksgiving for the yearly supply of the most useful sort of food. Every reference to its meaning seems to bear immediately upon the completion of the grain-harvest. It might have been a Gentile festival, having no proper reference to the election of the chosen race. It might have taken a place in the religion of any people who merely felt that it is God who gives rain from heaven and fruitful seasons, and who fills our hearts with food and gladness (Acts xiv. 17). But it was, as we have seen, essentially linked on to the Passover, that festival, which, above all others, expressed the fact of a race chosen and separated from other nations.

It was not an insulated day. It stood as the culminating point of the Pentecostal season. If the offering of the omer was a supplication for the Divine blessing on the harvest which was just commencing, and the offering of the two loaves was a thanksgiving for its completion, each rite was brought into a higher significance in consequence of the omer forming an integral part of the Passover. It was thus set forth that He who had delivered his people from Egypt, who had raised

that the Apostles on the occasion there spoken of were assembled together for this purpose, in accordance with Jewish custom.

"Some of the Jews adorn their houses with flowers, and wear wreaths on their heads, with the declared purpose of testifying their joy in the possession of the Law. They also eat such food as is prepared with milk, because the purity of the divine law is likened to milk. (Compare the expression, "the sincere milk of the word," 1 Pet. ii. 2.)

It is a fact of some interest, though in nowise connected with the present argument, that, in the service

them from the condition of slaves to that of free men in immediate covenant with Himself, was the same that was sustaining them with bread from year to year. The inspired teacher declared to God's chosen one, "He maketh peace in thy borders, He filleth thee with the finest of the wheat" (Ps. cxlvii. 14). If we thus regard the day of Pentecost as the solemn termination of the consecrated period, intended, as the seasons came round, to teach this lesson to the people, we may see the fitness of the name by which the Jews have mostly called it, **עֲשׂוּתָא**, the concluding assembly.<sup>b</sup> [PASSOVER, p. 2343, note a.]

As the two loaves were leavened, they could not be offered on the altar, like the unleavened sacrificial bread. [PASSOVER, IV. 3 (b).] Abarbanel (*in Lev. xxiii.*) has proposed a reason for their not being leavened which seems hardly to admit of a doubt. He thinks that they were intended to represent the best produce of the earth in the actual condition in which it ministers to the support of human life. Thus they express, in the most significant manner, what is evidently the idea of the festival.

We need not suppose that the grain-harvest in the Holy Land was in all years precisely completed between the Passover and Pentecost. The period of seven weeks was evidently appointed in conformity with the Sabbatical number, which so frequently recurs in the arrangements of the Mosaic Law [FEASTS; JUBILEE.] Hence, probably, the prevailing use of the name, "The Feast of Weeks," which might always have suggested the close religious connection in which the festival stood to the Passover.

It is not surprising that, without any direct authority in the O. T., the coincidence of the day on which the festival was observed with that on which the Law appears to have been given to Moses, should have strongly impressed the minds of Christians in the early ages of the Church. The Divine Providence had ordained that the Holy Spirit should come down in a special manner, to give spiritual life and unity to the Church, on that very same day in the year on which the Law had been bestowed on the children of Israel which gave to them national life and unity. They must have seen that, as the possession of the Law had completed the deliverance of the Hebrew race wrought by the hand of Moses, so the gift of the Spirit perfected the work of Christ in the establishment of his kingdom upon earth.

It may have been on this account that Pentecost was the last Jewish festival (as far as we know) which St. Paul was anxious to observe (Acts xx. 16, 1 Cor. xvi. 8), and that Whitsuntide came to be the first annual festival instituted in the Christian Church (Hessey's *Bampton Lectures*, pp. 88, 96). It was rightly regarded as the Church's birthday, and the Pentecostal season, the period between it and Easter, bearing as it does such a clear analogy

of the synagogue, the book of Ruth is read through at Pentecost, from the connection of its subject with harvest. (Buxt. *Syn. Jud.* xx.; [Stauben,] *La Vie Juive en Alsace*, pp. 129, 142.)

<sup>b</sup> So Godwyn, Lightfoot, Reland, Bähr. The full name appears to have been **עֲשׂוּתָא דְּשִׁבְעָתַיִם**, the concluding assembly of the Passover. The designation of the offering of the omer used by Philo, *προεόρτιος ἑτέρας ἑορτῆς μείζωτος*, strikingly tends for the same purpose.

to the fifty days of the old Law, thus became the ordinary time for the baptism of converts (Tertullian, *De Bupt.* c. 19; Jerome, in *Zech.* xiv. 8).

(Carpzov, *App. Crit.* iii. 5; Reland, *Ant.* iv. 4; Lightfoot, *Temple Service*, § 3; *Exercit. in Act.* ii. 1; Bähr, *Symbolik*, iv. 3; Spencer, *De Leg. Heb.* t. ix. 2, iii. viii. 2; Meyer, *De Fest. Heb.* ii. 13; Hupfeld, *De Fest. Heb.* ii.; Iken, *De Duobus Panibus Pentecost.* Brem. 1729; Mishna, *Menuchoth* and *Biccurim*, with the Notes in Surenhusius; Orusius, *Notæ Majores in Lev.* xxiii. 15, 21 (*Crit. Sac.*); Otho, *Lev. Rab.* s. *Festa*; Buxtorf, *Syn. Jud.* c. xx.) S. C.

**PENU'EL** (פְּנֵאֵל) [*face of God*]: in Gen. εἶδος θεοῦ, elsewhere Φανουήλ: *Phanuel*. The usual, and possibly the original, form of the name of a place which first appears under the slightly different form of PENEEL (Gen. xxxii. 30, 31). From this narrative it is evident that it lay somewhere between the torrent Jabbok and Succoth (comp. xxxii. 22 with xxxiii. 17). This is in exact agreement with the terms of its next occurrence, when Gideon, pursuing the hosts of the Midianites across the Jordan into the uplands of Gilead, arrives first at Succoth, and from thence mounts to Penuel (Judg. viii. 5, 8). It had then a tower, which Gideon destroyed on his return, at the same time slaying the men of the place because they had refused him help before (ver. 17). Penuel was rebuilt or fortified by Jeroboam at the commencement of his reign (1 K. xii. 25), no doubt on account of its commanding the fords of Succoth and the road from the east of Jordan to his capital city of Shechem, and also perhaps as being an ancient sanctuary. Succoth has been identified with tolerable certainty at *Saküt*, but no trace has yet been found of Penuel. G.

\* **PENU'EL** (פְּנֵאֵל), see above: Φανουήλ: *Phanuel*.

1. A descendant of Judah the "father" or founder of Gedor (1 Chr. iv. 4).
2. A son of Shashak, and one of the chiefs of the tribe of Benjamin. He dwelt at Jerusalem (1 Chr. viii. 25, 28). A.

**PE'OR** (פְּעֹרָה), "the Peor," with the def. article [*opening, cleft*]: τὸ ὄ Φοργόρ: *mons Phohor* [*Phogor*]. A mountain in Moab, from whence, after having without effect ascended the lower or less sacred summits of Bamoth-Baal and Pisgah, the prophet Balaam was conducted by Balak for his final conjurations (Num. xxiii. 28 only).

Peor — or more accurately "the Peor" — was "facing Jeshimon." The same thing is said of Pisgah. But unfortunately we are as yet ignorant of the position of all three, so that nothing can be inferred from this specification. [NEBO.]

In the *Onomasticon* ("Fogor;" "Bethphogor;" "Danaba") it is stated to be above the town of Libias (the ancient Beth-aram), and opposite Jericho. The towns of Beth peor and Dinhaba were on the mountain, six miles from Libias, and seven from Heshbon, respectively. A place named *Fückharah* is mentioned in the list of towns south of *Es-Salt* in the appendix to the 1st edit. of Dr. Robinson's *Bibl. Res.* (iii. App. 169), and this is placed by Van de Velde at the head of the *Wady Eshteh*, miles N. E. of *Heshbân*. But in our present igno-

rance of these regions all this must be mere conjecture.

Gesenius (*Thes.* 1119 a) gives it as his opinion that Baal-Peor derived his name from the mountain, not the mountain from him.

A Peor, under its Greek garb of Phagor, appears among the eleven names added by the LXX. [Josh xv. 59] to the list of the allotment of Judah, between Bethlehem and Aitan (Etham). It was known to Eusebius and Jerome, and is mentioned by the latter in his translation of the *Onomasticon* as Phara. It probably still exists under the name of *Beit Fâghûr* or *Kirbet Fâghûr*, 5 miles S. W. of Bethlehem, barely a mile to the left of the road from Hebron (Tobler, *3te Wanderung*). It is somewhat singular that both Peor and Pisgah, names so prominently connected with the East of Jordan, should be found also on the West.

The LXX. also read the name, which in the Hebrew text is PAU and PAI, as Peor; since in both cases they have *Phogôr*.

2. (פְּעֹרָה), without the article: φοργόρ: *idolum Phohor* [*Phogor*], *I'phohor* [*Phogor*], *Beel Phogor*.) In four passages (Num. xxv. 18, twice; xxxi. 16; Josh. xxii. 17) Peor occurs as a contraction for Baal-peor; always in reference to the licentious rites of Shittim which brought such destruction on Israel. In the three first cases the expression is, the "matter," or "for the sake" (literally "word" in each) "of Peor;" in the fourth, "iniquity, or crime, of Peor." G.

**PER'AZIM, MOUNT** (רֶגֶל פְּרָזִים) [*mount of breaches*]: ὄρος ἀσβεβῶν: *mons divisorum*. A name which occurs in Is. xxviii. 21 only, — unless the place which it designates be identical with the BAAL-PERAZIM mentioned as the scene of one of David's victories over the Philistines. Isaiah, as his manner was (comp. x. 26), is referring to some ancient triumphs of the arms of Israel as symbolical of an event shortly to happen —

Jehovah shall rise up as at Mount Perazim,  
He shall be wroth as in the valley of Gibeon.

The commentators almost unanimously take his reference to be to David's victories, above alluded to, at Baal Perazim, and Gibeon (Gesenius; Strachey), or to the former of these on the one hand, and Joshua's slaughter of the Canaanites at Gibeon and Beth-horon on the other (Eichhorn; Rosenmüller; Michaelis). Ewald alone — perhaps with greater critical sagacity than the rest — doubts that David's victory is intended, "because the prophets of this period are not in the habit of choosing such examples from his history" (*Propheten*, i. 261).

If David's victory is alluded to in this passage of the prophet, it furnishes an example, similar to that noticed under OREB, of the slight and casual manner in which events of the gravest importance are sometimes passed over in the Bible narrative. But for this later reference no one would infer that the events reported in 2 Sam. v. 18-25, and 1 Chr. xiv. 8-17, had been important enough to serve as a parallel to one of Jehovah's most tremendous judgments. In the account of Josephus (*Ant.* vii. 4, § 1), David's victory assumes much larger proportions than in Samuel and Chronicles. The attack is made not by the Philistines only, but by "all

α The LXX. have here represented the Hebrew letter *Ain* by *g*, as they have also in Raguel, Gomorrah, Athaliah, etc.

β Perhaps considering the word as derived from רָשַׁע, which the LXX. usually render by ἀσεβής.

Syria and Phœnicia, with many other warlike nations besides." This is a good instance of the manner in which Josephus, apparently from records now lost to us, supplements and completes the scanty narratives of the Bible, in agreement with the casual references of the Prophets or Psalmists. He places the scene of the encounter in the "groves of weeping," as if alluding to the Baca of Ps. lxxxiv.

The title *Mount Perazim*, when taken in connection with the *Baal Perazim* of 2 Sam. v., seems to imply that it was an eminence with a heathen sanctuary of Baal upon it. [BAAL, vol. i. p. 209 a.] G.

PERESH (פֶּרֶשׁ) [*excrement, dung*]: Φαρές; [Vat. omits:] Phares). The son of Machir by his wife Maachah (1 Chr. vii. 16).

PEREZ (פֶּרֶז) [*a breach, rent*]: Φαρές; [Vat. Neh. xi. 6, Σερες:] Phares). The "children of Perez," or Pharez, the son of Judah, appear to have been a family of importance for many centuries. In the reign of David one of them was chief of all the captains of the host for the first month (1 Chr. xxvii. 3); and of those who returned from Babylon, to the number of 468, some occupied a prominent position in the tribe of Judah, and are mentioned by name as living in Jerusalem (Neh. xi. 4, 6). [PHAREZ.]

PEREZ-UZ'ZA (פֶּרֶז וְצֵצָה): Διακοπή Οὐζά: *divisio Oze*, 1 Chr. xiii. 11; and

PEREZ-UZ'ZAH (פֶּרֶז וְצֵצָה) [*breach of Uzzah*]: [Διακοπή Οὐζά:] *percussio Oze*, 2 Sam. vi. 8. The title which David conferred on the threshing-floor of Nachon, or Cidon, in com-

memoration of the sudden death of Uzzah: "And David was wroth because Jehovah had broken this breach on Uzzah, and he called the place 'Uzzah's breaking' unto this day." The word *perez* was a favorite with David on such occasions. He employs it to commemorate his having "broken up" the Philistine force in the valley of Rephaim (2 Sam. v. 20). [BAAL PERAZIM.] He also uses it in a subsequent reference to Uzzah's destruction in 1 Chr. xv. 13.

It is remarkable that the statement of the continued existence of the name should be found not only in Samuel and Chronicles, but also in Josephus, who says (*Ant.* vii. 4, § 2), as if from his own observation, "the place where he died is even now (ἔτι νῦν) called 'the cleaving of Oza.'"

The situation of the spot is not known. [ΝΑ-ΧΘΟΝ.] If this statement of Josephus may be taken literally, it would however be worth while to make some search for traces of the name between Jerusalem and Kirjath-jearim. G.

PERFUMES (קְטָוִרִים). The free use of perfumes was peculiarly grateful to the Orientals (Prov. xxvii. 9), whose olfactory nerves are more than usually sensitive to the offensive smells engendered by the heat of their climate (Burckhardt's *Travels* ii. 85). The Hebrews manufactured their perfumes chiefly from spices imported from Arabia, though to a certain extent also from aromatic plants growing in their own country. [SPICES.] The nodes in which they applied them were various; occasionally a bunch of the plant itself was worn about the person as a nosegay, or inclosed in a bag (Cant. i. 13); or the plant was reduced to a powder and used in the way of fumigation (Cant. iii. 6);

Perga.

or again, the aromatic qualities were extracted by some process of boiling, and were then mixed with oil, so as to be applied to the person in the way of ointment (John xii. 3); or, lastly, the scent was carried about in smelling-bottles<sup>b</sup> suspended from the girdle (Is. iii. 20). Perfumes entered largely into the Temple service, in the two forms of incense and ointment (Ex. xxx. 22-38). Nor were they less used in private life: not only were they applied to the person, but to garments (Ps. xlv. 8; Cant.

iv. 11), and to articles of furniture, such as beds (Prov. vii. 17). On the arrival of a guest the same compliments were probably paid in ancient as in modern times; the rooms were fumigated; the person of the guest was sprinkled with rose-water; and then the incense was applied to his face and beard (Dan. ii. 46; Lane's *Mod. Egypt.* ii. 14). When a royal personage went abroad in his litter, attendants threw up "pillars of smoke"<sup>c</sup> about his path (Cant. iii. 6). Nor is it improbable that

<sup>a</sup> Or, with equal accuracy, and perhaps more convenience, "one called it," that is, "it was called" — as in 2 K. xviii. 4. [NEHUSHTAN.]

<sup>b</sup> שֵׁנֵי הַנְּשִׂמָּוֹת; lit. "houses of the soul."

<sup>c</sup> A similar usage is recorded of the Indian princes "Quum rex semet in publico conspici patitur, turbula argentea ministri ferunt, totumque iter per quod ferri destinavit odoribus complent" (Curtius, viii. § 23).

other practices, such as scenting the breath by chewing frankincense (Lane, i. 246), and the skin by washing in rose-water (Burckhardt's *Arab.* i. 58), and fumigating drinkables (Lane, i. 185; Burckhardt, i. 52), were also adopted in early times. The use of perfumes was omitted in times of mourning, whence the allusion in Is. iii. 24, "instead of sweet smell there shall be stink." The preparation of perfumes in the form either of ointment or incense was a recognized profession among the Jews (Ex. xxx. 25, 35; Eccl. x. 1). [INCENSE; OINTMENT.] W. L. B.

PERGA (Πέργη: [*Perge*]), an ancient and important city of Pamphylia, situated on the river Cestius, at a distance of 60 stadia from its mouth, and celebrated in antiquity for the worship of Artemis (Diana), whose temple stood on a hill outside the town (Strab. xiv. p. 667; Cic. *Ferr.* i. 20; Plin. v. 26; Mela, i. 14; Ptol. v. 5, § 7). The goddess and the Temple are represented in the coins of Perga. The Cestius was navigable to Perga; and St. Paul landed here on his voyage from Paphos (Acts xiii. 13). He visited the city a second time on his return from the interior of Pamphylia, and preached the Gospel there (Acts xiv. 25). For further details see PAMPHYLIA. There are still extensive remains of Perga at a spot called by the Turks *Eski-Kalesi* (Leake, *Asia Minor*, p. 132; Fellows, *Asia Minor*, p. 190).

PERGAMOS<sup>b</sup> (ἡ Πέργαμος, or τὸ Πέργαμον). A city of Mysia, about three miles to the N. of the river *Bakyr-tchai*, the Caicus of antiquity, and twenty miles from its present mouth. The name was originally given to a remarkable hill, presenting a conical appearance when viewed from the plain. The local legends attached a sacred character to this place. Upon it the Cabiri were said to have been witnesses of the birth of Zeus, and the whole of the land belonging to the city of the same name which afterwards grew up around the original Pergamos, to have belonged to these. The sacred character of the locality, combined with its natural strength, seems to have made it, like some others of the ancient temples, a bank for chiefs who desired to accumulate a large amount of specie; and Lysimachus, one of Alexander's successors, deposited there an enormous sum — no less than 9,000 talents — in the care of an Asiatic eunuch named Philetærus. In the troublous times which followed the break up of the Macedonian conquests, this officer betrayed his trust, and by successful temporizing, and perhaps judicious employment of the funds at his command, succeeded in retaining the treasure and transmitting it at the end of twenty years to his nephew Eumenes, a petty dynast in the neighborhood. Eumenes was succeeded by his cousin Attalus, the founder of the Attalic dynasty of Pergamene kings, who by allying himself with the rising Roman power laid the foundation of the future greatness of his house. His successor, Eumenes II., was rewarded for his fidelity to the Romans in their wars with Antiochus and Perseus by a gift of all the territory which the former had possessed to the north of the Taurus range. The great wealth which accrued to him from this source was employed in laying out a magnificent residential

city, and adorning it with temples and other public buildings. His passion, and that of his successor, for literature and the fine arts, led them to form a library which rivaled that of Alexandria; and the impulse given to the art of preparing sheepskins for the purpose of transcription, to gratify the taste of the royal *diletanti*, has left its record in the name *perchment* (*charta pergamena*). Eumenes's successor, Attalus II., is said to have bid 600,000 sesterces for a picture by the painter Aristides, at the sale of the plunder of Corinth; and by so doing to have attracted the attention of the Roman general Mummius to it, who sent it off at once to Rome, where no foreign artist's work had then been seen. For another picture by the same artist he paid 100 talents. But the great glory of the city was the so-called Nicephorium, a grove of extreme beauty, laid out as a thank-offering for a victory over Antiochus, in which was an assemblage of temples, probably of all the deities, Zeus Athenè, Apollo, Æsculapius, Dionysus, and Aphrodité. The Temple of the last was of a most elaborate character. Its façade was perhaps inlaid after the manner of *pietra dura* work; for Philip V. of Macedonia, who was repulsed in an attempt to surprise Pergamos during the reign of Attalus II., vented his spite in cutting down the trees of the grove, and not only destroying the Aphrodisium, but injuring the stones in such a way as to prevent their being used again. At the conclusion of peace it was made a special stipulation that this damage should be made good.

The Attalic dynasty terminated B. C. 133, when Attalus III., dying at an early age, made the Romans his heirs. His dominions formed the province of *Asia propria*, and the immense wealth which was directly or indirectly derived from this legacy, contributed perhaps even more than the spoils of Carthage and Corinth to the demoralization of Roman statesmen.

The sumptuousness of the Attalic princes had raised Pergamos to the rank of the first city in Asia as regards splendor, and Pliny speaks of it as without a rival in the province. Its prominence, however, was not that of a commercial town, like Ephesus or Corinth, but arose from its peculiar features. It was a sort of union of a pagan cathedral city, an university town, and a royal residence, embellished during a succession of years by kings who all had a passion for expenditure and ample means of gratifying it. Two smaller streams, which flowed from the north, embracing the town between them, and then fell into the Caicus, afforded ample means of storing water, without which, in those latitudes, ornamental cultivation (or indeed cultivation of any kind) is out of the question. The larger of those streams — the *Bergama-tchai*, or Cestius of antiquity — has a fall of more than 150 feet between the hills to the north of Pergamos and its junction with the Caicus, and it brings down a very considerable body of water. Both the Nicephorium, which has been spoken of above, and the Grove of Æsculapius, which became yet more celebrated in the time of the Roman empire, doubtless owed their existence to the means of irrigation thus available; and furnished the appliances for those licentious rituals

α Π[ε]ρ[γ]α; A. V. "apothecary."

<sup>b</sup> \* The name should have been written Pergamus or Pergamum in the A. V. The translators usually

adopted the Latin termination of the names of such places. A similar exception to the rule occurs in the use of Assos for Assus (Acts xx. 13, 14). (See Trench, *Authorized Version*, etc., p. 73, 2d ed.) H

of pagan antiquity which flourished wherever there were groves and hill-altars. Under the Attalic kings, Pergamos became a city of temples, devoted to a sensuous worship; and being in its origin, according to pagan notions, a sacred place, might not unnaturally be viewed by Jews and Jewish Christians, as one "where was the throne of Satan" (*ὅπου ὁ θρόνος τοῦ Σατανᾶ*, Rev. ii. 13).

After the extinction of its independence, the sacred character of Pergamos seems to have been put even more prominently forward. Coins and inscriptions constantly describe the Pergamenes as *νεωκόροι* or *νεωκόροι πρώτοι τῆς Ἀσίας*. This title always indicates the duty of maintaining a religious worship of some kind (which indeed naturally goes together with the usufruct of religious property). What the deities were to which this title has reference especially, it is difficult to say. In the time of Martial, however, Æsculapius had acquired so much prominence that he is called *Pergameus deus*. His grove was recognized by the Roman senate in the reign of Tiberius as possessing the rights of sanctuary. Pausanias, too, in the course of his work, refers more than once to the Æsculapian ritual at Pergamos as a sort of standard. From the circumstance of this notoriety of the Pergamene Æsculapius, from the title *Σωτήρ* being given to him, from the *serpent* (which Judaical Christians would regard as a symbol of evil) being his characteristic emblem, and from the fact that the medical practice of antiquity included charms and incantations among its agencies, it has been supposed that the expressions *ὁ θρόνος τοῦ Σατανᾶ* and *ὅπου ὁ Σατανᾶς κατοικεῖ* have an especial reference to this one pagan deity, and not to the whole city as a sort of focus of idolatrous worship. But although undoubtedly the Æsculapian worship of Pergamos was the most famous, and in later times became continually more predominant from the fact of its being combined with an excellent medical school (which among others produced the celebrated Galen), yet an inscription of the time of Marcus Antoninus distinctly puts Zeus, Athenè, Dionysus, and Asclepius in a coördinate rank, as all being special tutelary deities of Pergamos. It seems unlikely, therefore, that the expressions above quoted should be so interpreted as to isolate one of them from the rest.

It may be added, that the charge against a portion of the Pergamene Church that some among them were of the school of Balaam, whose policy was "to put a stumbling-block before the children of Israel, by inducing them *φαγεῖν εἰδωλόθυσια καὶ πορνεῦσαι*" (Rev. ii. 14), is in both its particulars very inappropriate to the Æsculapian ritual. It points rather to the Dionysus and Aphroditè worship; and the sin of the Nicolaitans, which is condemned, seems to have consisted in a participation in this, arising out of a social amalgamation of themselves with the native population. Now, from the time of the war with Antiochus at least, it is certain that there was a considerable Jewish population in Pergamene territory. The decree of the Pergamenes quoted by Josephus (*Ant.* xiv. 10, § 22) seems to indicate that the Jews had farmed the tolls in some of the harbors of their territory, and likewise were holders of land. They are—in accordance with the expressed desire of the Roman senate—allowed to levy port-dues upon all vessels except those belonging to king Ptolemy. The growth of a large and wealthy class naturally leads to its obtaining a share in political rights, and the

only bar to the admission of Jews to privileges of citizenship in Pergamos would be their unwillingness to take any part in the religious ceremonies, which were an essential part of every relation of life in pagan times. The more lax, however, might regard such a proceeding as a purely formal act of civil obedience, and reconcile themselves to it as Naaman did to "bowing himself in the house of Rimmon" when in attendance upon his sovereign. It is perhaps worth noticing, with reference to this point, that a Pergamene inscription published by Boeckh, mentions by two names (*Nicostratus*, who is also called *Trypho*) an individual who served the office of gymnasiarch. Of these two names the latter, a foreign one, is likely to have been borne by him among some special body to which he belonged, and the former to have been adopted when, by accepting the position of an official, he merged himself in the general Greek population.

(Strab. xiii. 4; Joseph. *Ant.* xiv.; Martial, ix. 17; Plin. *II. N.* xxxv. 4, 10; Liv. xxxii. 33, 4; Polyb. xvi. 1, xxxii. 23; Boeckh, *Inscript.* Nos. 3538, 3550, 3553; Philostratus, *De Vit. Soph.* p. 45, 106; Tchihatcheff, *Asie Mineure*, p. 230; Arundell, *Discoveries in Asia Minor*, ii. 304.) J. W. B.

PERIDA (פֶּרִידָא [kernel]: פֶּרִידָא; [Vat. FA. פֶּרִידָא:] Alex. פֶּרִידָא: Pharida). The children of Perida returned from Babylon with Zerubbabel (Neh. vii. 57). In Ezr. ii. 55 the name appears as PERUDA, and in 1 Esdr. v. 33 as PHARIDA. One of Kennicott's MSS. has "Peruda" in Nehemiah.

#### PERIZZITE, THE, and PERIZZITES

(פֶּרִיזִי, in all cases in the Heb. singular [see below]: *οἱ Φερεζῆται*; in Ezr. only *ὁ Φερεθεῖ* [Vat.; Rom. Alex. *ὁ Φερεζῖ*]: *Pherezeus*). One of the nations inhabiting the Land of Promise before and at the time of its conquest by Israel. They are not named in the catalogue of Gen. x.; so that their origin, like that of other small tribes, such as the Avites, and the similarly named Gerizzites, is left in obscurity. They are continually mentioned in the formula so frequently occurring to express the Promised Land (Gen. xv. 20; Ex. iii. 8, 17, xxiii. 23, xxxiii. 2, xxxiv. 11; Deut. vii. 1, xx. 17; Josh. iii. 10, ix. 1, xxiv. 11; Judg. iii. 5; Ezr. ix. 1; Neh. ix. 8). They appear, however, with somewhat greater distinctness on several occasions. On Abram's first entrance into the land it is said to have been occupied by "the Canaanite and the Perizzite" (Gen. xiii. 7). Jacob also, after the massacre of the Shechemites, uses the same expression, complaining that his sons had "made him to stink among the inhabitants of the land, among the Canaanite and the Perizzite" (xxxiv. 30). So also in the detailed records of the conquest given in the opening of the book of Judges (evidently from a distinct source to those in Joshua), Judah and Simeon are said to have found their territory occupied by "the Canaanite and the Perizzite" (Judg. i. 4, 5), with Bezek (a place not yet discovered) as their stronghold, and Adoni-bezek their most noted chief. And thus too a late tradition, preserved in 2 Esdr. i. 21, mentions only "the Canaanites, the Pheresites, and the Philistines," as the original tenants of the country. The notice just cited from the book of Judges locates them in the southern part of the Holy Land. Another independent and equally remarkable fragment of the history of the conquest

seems to speak of them as occupying, with the Rephaim, or giants, the "forest country" on the western flanks of Mount Carmel (Josh. xvii. 15-18). Here again the Canaanites only are named with them. As a tribe of mountaineers, they are enumerated in company with Amorite, Hittite, and Jebusite in Josh. xi. 3, xii. 8; and they are catalogued among the remnants of the old population whom Solomon reduced to bondage, both in 1 K. ix. 20, and 2 Chr. viii. 7. By Josephus the Perizzites do not appear to be mentioned.

The signification of the name is not by any means clear. It possibly meant rustics, dwellers in open, unwall'd villages, which are denoted by a similar word.<sup>b</sup> Ewald (*Geschichte*, i. 317) inclines to believe that they were the same people with the Hittites. But against this there is the fact that both they and the Hittites appear in the same lists; and that not only in mere general formulas, but in the records of the conquest as above. Redslob has examined the whole of these names with some care (in his *Altestam. Namen der Israelitenstaats*, 1846), and his conclusion (p. 103) is that, while

the *Chavoth* were villages of tribes engaged in the care of cattle, the *Perázoth* were inhabited by peasants engaged in agriculture, like the *Fellahs* of the Arabs. G.

PERSEPOLIS (Περσέπολις: *Persepolis*) is mentioned only in 2 Macc. ix. 2, where we hear of Antiochus Epiphanes attempting to burn its temples, but provoking a resistance which forced him to fly ignominiously from the place. It was the capital of Persia Proper, and the occasional residence of the Persian court from the time of Darius Hystaspis, who seems to have been its founder, to the invasion of Alexander. Its wanton destruction by that conqueror is well known. According to Q. Curtius the destruction was complete, as the chief building material employed was cedar-wood, which caused the conflagration to be rapid and general (*De Rebus Alex. Magn.* v. 7). Perhaps the temples, which were of stone, escaped. At any rate, if ruined, they must have been shortly afterwards restored, since they were still the depositories of treasure in the time of Epiphanes.

Persepolis has been regarded by many as iden-

Persepolis.

tical with Pasargadæ, the famous capital of Cyrus (see Niebuhr's *Lectures on Ancient History*, i. 115; Ouseley, *Travels*, ii. 316-318). But the positions are carefully distinguished by a number of ancient writers (Strab. xv. 3, § 6, 7; Plin. *H. N.* vi. 26; Arrian, *Exp. Alex.* vii. 1; Ptolem. vi. 4); and the ruins, which are identified beyond any reasonable doubt, show that the two places were more than 40 miles apart. Pasargadæ was at *Murgaub*, where the tomb of Cyrus may still be seen; Persepolis was 42 miles to the south of this, near Istakher, on the site now called the *Chehl-Minar*, or Forty Pillars. Here, on a platform hewn out of the solid rock, the sides of which face the four cardinal points, are the remains of two great palaces, built respectively by Darius Hystaspis and his son Xerxes, besides a number of other edifices, chiefly temples. These ruins have been so frequently described that it is unnecessary to do more than refer

the reader to the best accounts which have been given of them (Niebuhr, *Reise*, ii. 121; Chardin, *Voyages*, ii. 245; Ker Porter, *Travels*, i. 576; Heeren, *Asiatic Nations*, i. 143-196; Rich, *Residence in Kurdistan*, vol. ii. pp. 218-222; Ferguson, *Palaces of Nineveh and Persepolis Restored*, pp. 89-124, &c.). They are of great extent and magnificence, covering an area of many acres. At the foot of the rock on which they are placed, in the plain now called *Merdasht*, stood probably the ancient town, built chiefly of wood, and now altogether effaced.

Persepolis may be regarded as having taken the place of Pasargadæ, the more ancient capital of Persia Proper, from the time of Darius Hystaspis. No exact reason can be given for this change, which perhaps arose from mere royal caprice, Darius having taken a fancy to the locality, near which he erected his tomb. According to Athenæus the

<sup>a</sup> See MANASSEH, vol. ii. p. 1770 b

<sup>b</sup> *Copher hap-perazi*. A. V. "country villages" (1 Sam. vi. 18); *Arei hap-perazi*, "unwall'd towns" (Deut. iii. 5). In both these passages the LXX. un-

derstand the Perizzites to be alluded to, and translate accordingly. In Josh. xvi. 10 they add the Perizzites to the Canaanites as inhabitants of Gezer.

court resided at Persepolis during three months of each year (*Deimosoph.* xii. 513, f), but the conflicting statements of other writers (Xen. *Cyrop.* viii. 6, § 22, *Plut. de Exil.* ii. 604; Zonar. iii. 26, &c.) make this uncertain. We cannot doubt, however, that it was one of the royal residences; and we may well believe the statement of Strabo, that, in the later times of the empire, it was, next to Susa, the richest of all the Persian cities (*Geograph.* xv. 3, § 6). It does not seem to have long survived the blow inflicted upon it by Alexander; for after the time of Antiochus Epiphanes it disappears altogether from history as an inhabited place. [For fuller information see Rawlinson's *Ancient Monarchies*, iv. 11, 237-267.—H.] G. R.

PERSEUS [2 syl.] (*Περσεύς*: *Persēs*), the eldest (illegitimate or supposititious?) son of Philip V. and last king of Macedonia. After his father's death (b. c. 179) he continued the preparations for the renewal of the war with Rome, which was seen to be inevitable. The war, which broke out in b. c. 171, was at first ably sustained by Perseus; but in 168 he was defeated by L. Æmilius Paullus at Pydna, and shortly afterwards surrendered with

Perseus, King of Macedonia.

Tetradrachm of Perseus (Attic talent). Obv. Head of King, r. bound with fillet. Rev. ΒΑΣΙΛΕΥΣ ΠΕΡΣΕΩΣ, Eagle on thunderbolt; all within wreath.

his family to his conquerors. He graced the triumph of Paullus, and died in honorable retirement at Alba. The defeat of Perseus put an end to the independence of Macedonia, and extended even to Syria the terror of the Roman name (1 Macc. viii. 5). B. F. W.

PER'SIA (פֶּרְסִיָּה, i. e. *Pāras*: *Περσίς*: *Persis*) was strictly the name of a tract of no very large dimensions on the Persian Gulf, which is still known as *Fars* or *Forsiston*, a corruption of the ancient appellation. This tract was bounded on the west by Susiana or Elam, on the north by Media, on the south by the Persian Gulf, and on the east by Carmania, the modern *Kerman*. It was, speaking generally, an arid and unproductive region (*Herod.* ix. 122; *Arr. Exp. Alex.* v. 4; *Plat. Leg.* iii. 695, A); but contained some districts of considerable fertility. The worst part of the country was that towards the south, on the borders of the Gulf, which has a climate and soil like Arabia, being sandy and almost without streams, subject to pestilential winds, and in many places covered with particles of salt. Above this miserable region is a tract very far superior to it, consisting of rocky mountains—the continuation of Zagros, among which are found a good many fertile valleys and plains, especially towards the north, in the vicinity of Shiraz. Here is an important stream, the *Bendamisir*, which flowing through the beautiful valley of

*Merdasht*, and by the ruins of Persepolis, is then separated into numerous channels for the purpose of irrigation, and, after fertilizing a large tract of country (the district of *Kurjan*), ends its course in the salt lake of *Buktigan*. Vines, oranges, and lemons, are produced abundantly in this region; and the wine of *Shiraz* is celebrated throughout Asia. Further north an arid country again succeeds, the outskirts of the Great Desert, which extends from Kerman to Mazenderan, and from Kashiān to Lake Zerrah.

Ptolemy (*Geograph.* vi. 4) divides Persia into a number of provinces, among which the most important are Parætaenē on the north, which was sometimes reckoned to Media (*Herod.* i. 101; *Steph. Byz. ad voc.* Παράτακα), and Mardyēnē on the south coast, the country of the Mardi. The chief towns were Pasargade, the ancient, and Persepolis, the later capital. Pasargade was situated near the modern village of *Murgaub*, 42 miles nearly due north of Persepolis, and appears to have been the capital till the time of Darius, who chose the far more beautiful site in the valley of the Bendamisir, where the *Chehl Minar* or "Forty Pillars" still stand. [See PERSEPOLIS.] Among other cities of less importance were Parætaea and Gabæ in the mountain country, and Taocē upon the coast. (See *Strab.* xv. 3, § 1-8; *Plin. H. N.* vi. 25, 26; *Ptolem. Geog.* vi. 4; *Kinneir's Persia Empire*, pp. 54-80; *Malcolm, History of Persia*, i. 2; *Ker Porter, Travels*, i. 458, &c.; *Rich, Journey from Bushire to Persepolis*, etc.)

While the district of *Fars* is the true original Persia, the name is more commonly applied, both in Scripture and by profane authors, to the entire tract which came by degrees to be included within the limits of the Persian Empire. This empire extended at one time from India on the east to Egypt and Thrace upon the west, and included, besides portions of Europe and Africa, the whole of Western Asia between the Black Sea, the Caucasus, the Caspian, and the Jaxartes, upon the north, the Arabian desert, the Persian Gulf, and the Indian Ocean upon the south: According to Herodotus (iii. 89), it was divided into twenty governments, or satrapies; but from the inscriptions it would rather appear that the number varied at different times, and, when the empire was most flourishing, considerably exceeded twenty. In the inscription upon his tomb at *Naksh-i-Rustam* Darius mentions no fewer than thirty countries as subject to him besides Persia proper. These are Media, Susiana, Parthia, Aria, Bactria, Sogdiana, Chorasmia, Zarangia, Arachosia, Sattagydia, Gandaria, India, Scythia, Babylonia, Assyria, Arabia, Egypt, Armenia, Cappadocia, Sapparda, Ionia, (European) Scythia, the islands (of the Ægean), the country of the Scodra, (European) Ionia, the lands of the Tacabri, the Budians, the Cushites or Ethiopians, the Mardians, and the Colchians.

The only passage in Scripture where Persia designates the tract which has been called above "Persia Proper" is *Ez. xxxviii. 5*. Elsewhere the Empire is intended. G. R.

PER'SIANS (פֶּרְסִיָּים: *Περσῶν*: *Persæ*) The name of the people who inhabited the country

called above "Persia Proper," and who thence conquered a mighty empire. There is reason to believe that the Persians were of the same race as the Medes, both being branches of the great Aryan stock, which under various names established their sway over the whole tract between Mesopotamia and Burmah.<sup>a</sup> The native form of the name is *Parsa*, which the Hebrew פָּרְסָיִם fairly represents, and which remains but little changed in the modern "Parsee." It is conjectured to signify "the Tigers."

1. *Character of the Nation.* — The Persians were a people of lively and impressive minds, brave and impetuous in war, witty, passionate, for Orientals truthful, not without some spirit of generosity, and of more intellectual capacity than the generality of Asiatics. Their faults were vanity, impulsiveness, a want of perseverance and solidity, and an almost slavish spirit of sycophancy and servility towards their lords. In the times anterior to Cyrus they were noted for the simplicity of their habits, which offered a strong contrast to the luxuriousness of the Medes; but from the date of the Median overthrow, this simplicity began to decline; and it was not very long before their manners became as soft and effeminate as those of any of the conquered peoples. They adopted the flowing Median robe (Fig. 1) which was probably of silk, in lieu of the old national costume (Fig. 2) — a close-fitting tunic and trousers of leather (Herod. i. 71; compare i. 135); beginning at the same time the practice of wearing on their persons chains, bracelets, and collars of gold, with which precious metal they also adorned their horses. Polygamy was commonly practiced among them; and besides legitimate wives a Persian was allowed any number of concubines. They were fond of the pleasures of the table, indulging in a great variety of food, and spending a long time over their meals, at which they were accustomed to swallow large quantities of wine. In war they fought bravely, but without discipline, generally gaining their victories by the vigor of their first attack; if they were strenuously resisted, they soon flagged; and if they suffered a repulse, all order was at once lost, and the retreat speedily became a rout.

2. *Religion.* — The religion which the Persians brought with them into Persia Proper seems to have been of a very simple character, differing from natural religion in little, except that it was deeply tainted with Dualism. Like the other Aryans, the Persians worshipped one Supreme God, whom they called *Aura-mazda* [or *Ahura-mazda*] (Oromasdes) — a term signifying (as is believed) "the Great Giver of Life." From Oromasdes came all blessings — "he gave the earth, he gave the heavens, he gave mankind, he gave life to mankind" (Inscriptions, *passim*) — he settled the Persian kings upon their thrones, strengthened them, established them, and granted them victory over all their enemies. The royal inscriptions rarely mention any other god. Occasionally, however, they indicate a slight and modified polytheism. Oromasdes is "the chief of the gods,"<sup>sc</sup> that there are other gods besides

him; and the highest of these is evidently *Mithra*, who is sometimes invoked to protect the monarch, and is beyond a doubt identical with "the sun." To the worship of the sun as *Mithra* was probably attached, as in India, the worship of the moon, under the name of *Homa*, as the third **greatest** god. Entirely separate from these — their active resister and antagonist — was *Ahriman* (Arimanius) "the Death-dealing" — the powerful, and (probably) self-existing Evil Spirit, from whom war, disease, frost, hail, poverty, sin, death, and all other evils had their origin. *Ahriman* was Satan, carried to an extreme — believed to have an existence of his own, and a real power of resisting and defying God. *Ahriman* could create spirits, and as the beneficent *Auramazda* had surrounded himself with good angels, who were the ministers of his mercies towards mankind, so *Ahriman* had surrounded himself with evil spirits, to carry out his malevolent purposes. Worship was confined to Au-

Fig. 1. Median dress.

Fig. 2. Old Persian dress.

*ramazda*, and his good spirits; *Ahriman* and his demons were not worshipped, but only hated and feared.

The character of the original Persian worship was simple. They were not destitute of temples, as Herodotus asserts (Herod. i. 131; compare *Beh Inscr.* col. i. par. 14, § 5); but they had probably no altars, and certainly no images. Neither do they appear to have had any priests. Processions were formed, and religious chants were sung in the temples, consisting of prayer and praise intermixed, whereby the favor of *Auramazda* and his good spirits was supposed to be secured to the worshippers. Beyond this it does not appear that they had any religious ceremonies. Sacrifices, apparently were unknown;<sup>b</sup> though thank-offerings may have been made in the temples.

<sup>a</sup> \* For a fuller account of the origin of the Persians and of other topics discussed in the article, see Rawlinson's *Ancient Monarchies*, iv. 343 ff.

<sup>b</sup> \* In his *Ancient Monarchies*, iv. 334, Prof. Rawlinson admits that the Persians sacrificed certain animals, and may have sacrificed human victims in extreme cases, in some periods of their history.

From the first entrance of the Persians, as immigrants, into their new territory, they were probably brought into contact with a form of religion very different from their own. Magianism, the religion of the Scythic or Turanian population of Western Asia, had long been dominant over the greater portion of the region lying between Mesopotamia and India. The essence of this religion was worship of the elements — more especially, of the subtlest of all, fire. It was an ancient and imposing system, guarded by the venerable hierarchy of the Magi, boasting its fire-altars where from time immemorial the sacred flame had burnt without intermission, and claiming to some extent mysterious and miraculous powers. The simplicity of the Aryan religion was speedily corrupted by its contact with this powerful rival, which presented special attractions to a rude and credulous people. There was a short struggle for preëminence, after which the rival systems came to terms. Dualism was retained, together with the names of Auramazda and Ahriman, and the special worship of the sun and moon under the appellations of Mithra and Homa; but to this was superadded the worship of the elements and the whole ceremonial of Magianism, including the divination to which the Magian priesthood made pretense. The worship of other deities, as Tanata or Anaitis, was a still later addition to

Persian Warriors. (From Persepolis.)

the religion, which grew more complicated as time went on, but which always maintained as its leading and most essential element that Dualistic principle whereon it was originally based.

3. *Language.* — The language of the ancient Persians was closely akin to the Sanskrit, or ancient language of India. We find it in its earliest stage in the Zendavesta [more properly called 'Avesta,' simply] — the sacred book of the whole Aryan race, where, however, it is corrupted by a large admixture of later forms. The inscriptions of the Achæmenian kings give us the language in its second stage, and, being free from these later additions, are of the greatest importance towards determining what was primitive, and what more recent in this type of speech. Modern Persian is its degenerate representative, being, as it is, a motley idiom, largely impregnated with Arabic; still, however, both in its grammar and its vocabulary, it is mainly Aryan: and historically, it must be regarded as the continuation of the ancient tongue, just as Italian is of Latin, and modern of ancient Greek.

4. *Division into Tribes, etc.* — Herodotus tells us that the Persians were divided into ten tribes, of which three were noble, three agricultural, and four nomadic. The noble tribes were the Pasargadæ, who dwelt, probably, in the capital and its immediate neighborhood; the Maraphians, who are per-

haps represented by the modern *Mafce*, a Persian tribe which prides itself on its antiquity; and the Maspian, of whom nothing more is known. The three tribes engaged in agriculture were called the Panthialeans, the Derusians, and the Germanians, or (according to the true orthography) the Carmanians. These last were either the actual inhabitants of *Kerman*, or settlers of the same race, who remained in Persia while their fellow-tribesmen occupied the adjoining region. The nomadic tribes are said to have been the Dahi, who appear in Scripture as the "Dehavites" (Ezr. iv. 9), the Mardi, mountaineers famous for their thievish habits (Steph. Byz.), together with the Sagartians and the Derbices or Dropici, colonists from the regions east of the Caspian. The royal race of the Achæmenidæ was a phratry or clan of the Pasargadæ (Herod. i. 126); to which it is probable that most of the noble houses likewise belonged. Little is heard of the Maraphians, and nothing of the Maspian, in history; it is therefore evident that their nobility was very inferior to that of the leading tribe.

5. *History.* — In remote antiquity it would appear that the Persians dwelt in the region east of the Caspian, or possibly in a tract still nearer India. The first Fargard of the Vendidad seems to describe their wanderings in these countries, and shows the general line of their progress to have been from east to west, down the course of the Oxus, and then, along the southern shores of the Caspian Sea, to Rhages, and Media. It is impossible to determine the period of these movements; but there can be no doubt that they were anterior to B. c. 880, at which time the Assyrian kings seem for the first time to have come in contact with Aryan tribes east of Mount Zagros. Probably the Persians accompanied the Medes in their migration from Khorassan, and, after the latter people took possession of the tract extending from the river *Kur* to Ispahan, proceeded still further south, and occupied the region between Media and the Persian Gulf. It is uncertain whether

they are to be identified with the *Bartsu* or *Partsu* of the Assyrian monuments. If so, we may say that from the middle of the 9th to the middle of the 8th century B. c. they occupied southeastern Armenia, but by the end of the 8th century had removed into the country which thenceforth went by their name. The leader of this last migration would seem to have been a certain Achæmenes, who was recognized as king of the newly-occupied territory, and founded the famous dynasty of the Achæmenidæ, about B. c. 700. Very little is known of the history of Persia between this date and the accession of Cyrus the Great, near a century and a half later. The crown appears to have descended in a right line through four princes — Teispes, Cambyzes I., Cyrus I., and Cambyzes II., who was the father of Cyrus the Conqueror. Teispes must have been a prince of some repute, for his daughter, Atossa, married Pharnaces, king of the distant Cappadocians (Diod. Sic. ap. Phot. *Bibliothec.* p. 1158). Later, however, the Persians found themselves unable to resist the growing strength of Media, and became tributary to that power about B. c. 630, or a little earlier. The line of native kings was continued on the throne, and the internal administration was probably untouched; but external independence was altogether lost until the revolt under Cyrus.

Of the circumstances under which this revolt took place we have no certain knowledge. The stories told by Herodotus (i. 108-129) and Nicolas of Damascus (*Fr.* 66) are internally improbable; and they are also at variance with the monuments, which prove Cyrus to have been the son of a Persian king. [See **CYRUS**.] We must therefore discard them, and be content to know that after about seventy or eighty years of subjection, the Persians revolted from the Medes, engaged in a bloody struggle with them, and finally succeeded, not only in establishing their independence, but in changing places with their masters, and becoming the ruling people. The probable date of the revolt is B. C. 558. Its success, by transferring to Persia the dominion previously in the possession of the Medes, placed her at the head of an empire, the bounds of which were the Halys upon the west, the Euxine upon the north, Babylonia upon the south, and upon the east the salt desert of Iran. As usual in the East, this success led on to others. Croesus the Lydian monarch, who had united most of Asia Minor under his sway, venturing to attack the newly-risen power, in the hope that it was not yet firmly established, was first repulsed, and afterwards defeated and made prisoner by Cyrus, who took his capital, and added the Lydian empire to his dominions. This conquest was followed closely by the submission of the Greek settlements on the Asiatic coast, and by the reduction of Caria, Caunus, and Lycia. The empire was soon afterwards extended greatly towards the northeast and east. Cyrus rapidly overran the flat countries beyond the Caspian, planting a city, which he called after himself (*Arr. Exp. Alex.* iv. 3), on the Jaxartes (*Syhun*); after which he seems to have pushed his conquests still further to the east, adding to his dominions the districts of Herat, Cabul, Candahar, Seistan, and Beloochistan, which were thenceforth included in the empire. (See *Ctes. Pers. Exc.* § 5, *et seq.*; and compare *Plin. II. N.* vi. 23.) In B. C. 539 or 538, Babylon was attacked, and after a stout defense fell before his irresistible bands. [**BABYLON**.] This victory first brought the Persians into contact with the Jews. The conquerors found in Babylon an oppressed race,—like themselves abhorers of idols,—and professors of a religion in which to a great extent they could sympathize. This race, which the Babylonian monarchs had torn violently from their native land and settled in the vicinity of Babylon, Cyrus determined to restore to their own country; which he did by the remarkable edict recorded in the first chapter of Ezra (*Ez.* i. 2-4). Thus commenced that friendly connection between the Jews and Persians, which prophecy had already foreshadowed (*Is.* xlv. 28, xlv. 1-4), and which forms so remarkable a feature in the Jewish history. After the conquest of Babylon, and the consequent extension of his empire to the borders of Egypt, Cyrus might have been expected to carry out the design, which he is said to have entertained (*Herod.* i. 153), of an expedition against Egypt. Some danger, however, seems to have threatened the northeastern provinces, in consequence of which his purpose was changed; and he proceeded against the Massagetae or the Derbices, engaged them, but was defeated and slain. He reigned, according to Herodotus, twenty-nine years.

Under his son and successor, Cambyses III., the conquest of Egypt took place (B. C. 525), and the

Persian dominions were extended southward to Elephantine and westward to Euesperidæ on the North-African coast. This prince appears to be the Ahasuerus c. Ezra (iv. 6), who was asked to alter Cyrus's policy towards the Jews, but (apparently) declined all interference. We have in Herodotus (book iii.) a very complete account of his warlike expeditions, which at first resulted in the successes above mentioned, but were afterwards unsuccessful, and even disastrous. One army perished in an attempt to reach the temple of Ammon, while another was reduced to the last straits in an expedition against Ethiopia. Perhaps it was in consequence of these misfortunes that, in the absence of Cambyses with the army, a conspiracy was formed against him at court, and a Magian priest, Gomates (*Gaumata*) by name, professing to be Smerdis (*Bardiya*), the son of Cyrus, whom his brother, Cambyses, had put to death secretly, obtained quiet possession of the throne. Cambyses was in Syria when news reached him of this bold attempt; and there is reason to believe that, seized with a sudden disgust, and despairing of the recovery of his crown, he fled to the last resort of the unfortunate, and ended his life by suicide (*Behistun Inscription*, col. i. par. 11, § 10). His reign had lasted seven years and five months.

Gomates the Magian found himself thus, without a struggle, master of Persia (B. C. 522). His situation, however, was one of great danger and delicacy. There is reason to believe that he owed his elevation to his fellow-religionists, whose object in placing him upon the throne was to secure the triumph of Magianism over the Dualism of the Persians. It was necessary for him therefore to accomplish a religious revolution, which was sure to be distasteful to the Persians, while at the same time he had to keep up the deception on which his claim to the crown was professedly based, and to prevent any suspicion arising that he was not Smerdis, the son of Cyrus. To combine these two aims was difficult; and it would seem that Gomates soon discarded the latter, and entered on a course which must have soon caused his subjects to feel that their ruler was not only no Achaemenian, but no Persian. He destroyed the national temples, substituting for them the fire-altars, and abolished the religious chants and other sacred ceremonies of the Oromasdians. He reversed the policy of Cyrus with respect to the Jews, and forbade by an edict the further building of the Temple (*Ez.* iv. 17-22). [**ARTAXERXES**.] He courted the favor of the subject-nations generally by a remission of tribute for three years, and an exemption during the same space from forced military service (*Herod.* iii. 67). Towards the Persians he was haughty and distant, keeping them as much as possible aloof from his person, and seldom showing himself beyond the walls of his palace. Such conduct made him very unpopular with the proud people which held the first place among his subjects, and, the suspicion that he was a mere pretender having after some months ripened into certainty, a revolt broke out, headed by Darius, the son of Hystaspes, a prince of the blood-royal, which in a short time was crowned with complete success. Gomates quitted his capital, and, having thrown himself into a fort in Media, was pursued, attacked and slain. Darius, then, as the chief of the conspiracy, and after his father the next heir to the throne, was at once acknowledged king. The reign of Gomates lasted seven months.

The first efforts of Darius were directed to the reestablishment of the Oromasdan religion in all its purity. He "rebuilt the temples which Gomates the Magian had destroyed, and restored to the people the religious chants and the worship of which Gomates the Magian had deprived them" (*Beh. Inscr.* col. i. par. 14). Appealed to, in his second year, by the Jews, who wished to resume the construction of their Temple, he not only allowed them, confirming the decree of Cyrus, but assisted the work by grants from his own revenues, whereby the Jews were able to complete the Temple as early as his sixth year (*Ez.* vi. 1-15). During the first part of the reign of Darius, the tranquillity of the empire was disturbed by numerous revolts. The provinces regretted the loss of those exemptions which they had obtained from the weakness of the pseudo-Smerdis, and hoped to shake off the yoke of the new prince before he could grasp firmly the reins of government. The first revolt was that of Babylon, where a native, claiming to be Nebuchadnezzar, the son of Nabonadius, was making; but Darius speedily crushed this revolt and executed the pretender. Shortly afterwards a far more extensive rebellion broke out. A Mede, named Phraortes, came forward and, announcing himself to be "Xathrites, of the race of Cyaxares," assumed the royal title. Media, Armenia, and Assyria immediately acknowledged him; the Median soldiers at the Persian court revolted to him; Parthia and Hyrcania after a little while declared in his favor; while in Sagartia another pretender, making a similar claim of descent from Cyaxares, induced the Sagartians to revolt; and in Margiana, Arachotia, and even Persia Proper, there were insurrections against the authority of the new king. His courage and activity, however, seconded by the valor of his Persian troops and the fidelity of some satraps, carried him successfully through these and other similar difficulties; and the result was, that, after five or six years of struggle, he became as firmly seated on his throne as any previous monarch. His talents as an administrator were, upon this, brought into play. He divided the whole empire into satrapies, and organized that somewhat complicated system of government on which they were henceforth administered (*Rawlinson's Herodotus*, ii. 555-568). He built himself a magnificent palace at Persepolis, and another at Susa [PERSEROLIS, SHUSHIAN]. He also applied himself, like his predecessors, to the extension of the empire; conducted an expedition into European Scythia, from which he returned without disgrace; conquered Thrace, Pæonia, and Macedonia towards the west, and a large portion of India on the east, besides (apparently) bringing into subjection a number of petty nations (see the *Nakhsh-i-Rustam* Inscription). On the whole he must be pronounced, next to Cyrus, the greatest of the Persian monarchs. The latter part of his reign was, however, clouded by reverses. The disaster of Mardonius at Mount Athos was followed shortly by the defeat of Datis at Marathon; and, before any attempt could be made to avenge that blow, Egypt rose in revolt (B. C. 486), massacred its Persian garrison, and declared itself independent. In the palace at the same time there was dissension; and when, after a reign of thirty-six years, the fourth Persian monarch died (B. C. 485), leaving his throne to a young prince of strong and ungoverned passions, it was evident that the empire had reached its highest point of greatness, and was already verging towards its decline.

Xerxes, the eldest son of Darius by Atossa daughter of Cyrus, and the first son born to Darius after he mounted the throne, seems to have obtained the crown, in part by the favor of his father, over whom Atossa exercised a strong influence, in part by right, as the eldest male descendant of Cyrus, the founder of the empire. His first act was to reduce Egypt to subjection (B. C. 484), after which he began at once to make preparations for his invasion of Greece. It is probable that he was the Ahasuerus of Esther. [AHASUERUS.] The great feast held in Shushan the palace in the third year of his reign, and the repudiation of Vashti, fall into the period preceding the Grecian expedition, while it is probable that he kept open house for the "princes of the provinces," who would from time to time visit the court, in order to report the state of their preparations for the war. The marriage with Esther, in the seventh year of his reign, falls into the year immediately following his flight from Greece, when he undoubtedly returned to Susa, relinquishing warlike enterprises, and henceforth devoting himself to the pleasures of the seraglio. It is unnecessary to give an account of the well-known expedition against Greece, which ended so disastrously for the invaders. Persia was taught by the defeats of Salamis and Platæa the danger of encountering the Greeks on their side of the Ægean, while she learned at Mycææ the retaliation which she had to expect on her own shores at the hands of her infuriated enemies. For a while some vague idea of another invasion seems to have been entertained by the court;<sup>a</sup> but discreeter counsels prevailed, and relinquishing all aggressive designs, Persia from this point in her history stood upon the defensive, and only sought to maintain her own territories intact, without anywhere trenching upon her neighbors. During the rest of the reign of Xerxes, and during part of that of his son and successor, Artaxerxes, she continued at war with the Greeks, who destroyed her fleets, plundered her coasts, and stirred up revolt in her provinces; but at last, in B. C. 449, a peace was concluded between the two powers, who then continued on terms of amity for half a century.

A conspiracy in the seraglio having carried off Xerxes (B. C. 465), Artaxerxes his son, called by the Greeks *Μακροχειρ*, or "the Long-Handed," succeeded him, after an interval of seven months, during which the conspirator Artabanus occupied the throne. This Artaxerxes, who reigned forty years, is beyond a doubt the king of that name who stood in such a friendly relation towards Ezra (*Ezr.* vii. 11-28) and Nehemiah (*Neh.* ii. 1-9, &c.). [ARTAXERXES.] His character, as drawn by Ctesias, is mild but weak; and under his rule the disorders of the empire seem to have increased rapidly. An insurrection in Bactria, headed by his brother Hystaspes, was with difficulty put down in the first year of his reign (B. C. 464), after which a revolt broke out in Egypt, headed by Inarus the Libyan and Amyrteus the Egyptian, who, receiving the support of an Athenian fleet, maintained themselves for six years (B. C. 460-455) against the whole power of Persia, but were at last overcome by Megabyzus, satrap of Syria. This powerful and haughty noble soon afterwards (B. C. 447), on

<sup>a</sup> The force collected in Pamphylia, which Cimon defeated and dispersed (B. C. 466), seems to have been intended for aggressive purposes.

occasion of a difference with the court, himself became a rebel, and entered into a contest with his sovereign, which at once betrayed and increased the weakness of the empire. Artaxerxes is the last of the Persian kings who had any special connection with the Jews, and the last but one mentioned in Scripture. His successors were Xerxes II., Sogdianus, Darius Nothus, Artaxerxes Mueon, Artaxerxes Ochus, and Darius Codomanus, who is probably the "Darius the Persian" of Nehemiah (xii. 22). These monarchs reigned from B. C. 424 to B. C. 330. None were of much capacity; and during their reigns the decline of the empire was scarcely arrested for a day, unless it were by Ochus, who reconquered Egypt, and gave some other signs of vigor. Had the younger Cyrus succeeded in his attempt, the regeneration of Persia was, perhaps, possible. After his failure the seraglio grew at once more powerful and more cruel. Eunuchs and women governed the kings, and dispensed the favors of the crown, or wielded its terrors, as their interests or passions moved them. Patriotism and loyalty were alike dead, and the empire must have fallen many years before it did, had not the Persians early learnt to turn the swords of the Greeks against one another, and at the same time raised the character of their own armies by the employment, on a large scale, of Greek mercenaries. The collapse of the empire under the attack of Alexander is well known, and requires no description here. On the division of Alexander's dominions among his generals Persia fell to the Seleucidae, under whom it continued till after the death of Antiochus Epiphanes, when the conquering Parthians advanced their frontier to the Euphrates, and the Persians came to be included among their subject-tribes (B. C. 164). Still their nationality was not obliterated. In A. D. 226, three hundred and ninety years after their subjection to the Parthians, and five hundred and fifty-six years after the loss of their independence, the Persians shook off the yoke of their oppressors, and once more became a nation. The kingdom of the Sasanidae, though not so brilliant as that of Cyrus, still had its glories; but its history belongs to a time which scarcely comes within the scope of the present work.

PERISIS (Περσίς, ["a Persian woman: " *Persis*]). A Christian woman at Rome (Rom. xvi. 12) whom St. Paul salutes, and commends with special affection on account of some work which she had performed with singular diligence (see Origin *in loco*). W. T. B.

PERUDA (פֶּרֻדָּא [kernel, Ges.]: φαρουδά; [Comp. φαρουδά:] *Pharuda*). The same as PERIDA (Ezr. ii. 55). The LXX. reading is supported by one of Kennicott's MSS.

PESTILENCE. [PLAGUE.]

PETER (Πέτρος, the Greek for כֶּתֶבֶת: Κηφᾶς, *Cephas*, i. e. "a stone" or "rock," on which name see note at the end of this article: [*Petrus*]). His original name was Simon, שִׁמְעוֹן, i. e. "hearer." The two names are commonly combined, Simon Peter, but in the early part of his history, and in the interval between our Lord's death and resurrection, he is more frequently named Simon; after that event he bears almost exclusively the more honorable designation Peter, or, as St. Paul sometimes writes, Cephas. The notices of this Apostle's early life are few, but not unimportant, and enable us to form some estimate of the circumstances under which his character was formed, and prepared for his great work. He was the son of a man named Jonas (Matt. xvi. 17; John i. 42, xxi. 16), and was brought up in his father's occupation, a fisherman on the sea of Tiberias.<sup>a</sup> The occupation was of course a humble one, but not, as is often assumed, mean or servile, or incompatible with some degree of mental culture.

<sup>a</sup> There is a tradition that his mother's name was Johanna (Coteller, *Patres Apost.* ii. 63).

His family were probably in easy circumstances. He and his brother Andrew were partners of John and James, the sons of Zebedee, who had hired servants; and from various indications in the sacred narrative we are led to the conclusion that their social position brought them into contact with men of education. In fact the trade of fishermen, supplying some of the important cities on the coasts of that inland lake, may have been tolerably remunerative, while all the necessaries of life were cheap and abundant in the singularly rich and fertile district where the Apostle resided. He did not live, as a mere laboring man, in a hut by the sea-side, but first at Bethsaida, and afterwards in a house at Capernaum, belonging to himself or his mother-in-law, which must have been rather a large one, since he received in it not only our Lord and his fellow-disciples, but multitudes who were attracted by the miracles and preaching of Jesus. It is certain that when he left all to follow Christ, he made what he regarded, and what seems to have been admitted by his Master, to have been a considerable sacrifice. The habits of such a life were by no means unfavorable to the development of a vigorous, earnest, and practical character, such as he displayed in after years. The labors, the privations, and the perils of an existence passed in great part upon the waters of that beautiful but stormy lake, the long and anxious watching through the nights, were calculated to test and increase his natural powers, his fortitude, energy, and perseverance. In the city he must have been brought into contact with men engaged in traffic, with soldiers, and foreigners, and may have thus acquired somewhat of the flexibility and geniality of temperament all but indispensable to the attainment of such personal influence as he exercised in after-life. It is not probable that he and his brother were wholly uneducated. The Jews regarded instruction as a necessity, and legal enactments enforced the attendance of youths in schools maintained by the community.<sup>a</sup> The statement in Acts iv. 13, that "the council perceived they (*i. e.* Peter and John) were unlearned and ignorant men," is not incompatible with this assumption. The translation of the passage in the A. V. is rather exaggerated, the word rendered "unlearned" (*ιδιωται*) being nearly equivalent to "laymen," *i. e.* men of ordinary education, as contrasted with those who were specially trained in the schools of the Rabbis. A man might be thoroughly conversant with the Scriptures, and yet be considered ignorant and unlearned by the Rabbis, among whom the opinion was already prevalent that "the letter of Scripture was the mere shell, an earthen vessel containing heavenly treasures, which could only be discovered by those who had been taught to search for the hidden cabalistic meaning." Peter and his kinsmen were probably taught to read the Scriptures in childhood. The history of their country, especially of the great events of early days, must have been familiar to them as attendants at the synagogue,

<sup>a</sup> A law to this effect was enacted by Simon ben-Shetach, one of the great leaders of the Pharisaic party under the Asmonean princes. See Jost, *Geschichte des Judenthums*, i. 246.

<sup>b</sup> See E. Renan, *Histoire des Langues Sémitiques*, p. 224. The only extant specimen of that patois is the *Book of Adam* or "*Codex Nasiræus*," edited by Norberg, Lond. Goth. 1815-16. [See especially LANGUAGE OF THE N. TEST., Amer. ed.]

<sup>c</sup> See Luzzorf, s. v. גליליא.

and their attention was there directed to those portions of Holy Writ from which the Jews derived their anticipations of the Messiah.

The language of the Apostles was of course the form of Aramaic spoken in northern Palestine, a sort of *patois*, partly Hebrew, but more nearly allied to the Syriac.<sup>b</sup> Hebrew, even in its debased form, was then spoken only by men of learning, the leaders of the pharisees and scribes.<sup>c</sup> The men of Galilee were, however, noted for rough, and inaccurate language, and especially for vulgarities of pronunciation.<sup>d</sup> It is doubtful whether our Apostle was acquainted with Greek in early life. It is certain that there was more intercourse with foreigners in Galilee than in any district of Palestine, and Greek appears to have been a common, if not the principal, medium of communication. Within a few years after his call St. Peter seems to have conversed fluently in Greek with Cornelius, at least there is no intimation that an interpreter was employed, while it is highly improbable that Cornelius, a Roman soldier, should have used the language of Palestine. The style of both of St. Peter's epistles indicates a considerable knowledge of Greek — it is pure and accurate, and in grammatical structure equal to that of St. Paul. That may, however, be accounted for by the fact, for which there is very ancient authority, that St. Peter employed an interpreter in the composition of his epistles, if not in his ordinary intercourse with foreigners.<sup>e</sup> There are no traces of acquaintance with Greek authors, or of the influence of Greek literature upon his mind, such as we find in St. Paul, nor could we expect it in a person of his station even had Greek been his mother-tongue. It is on the whole probable that he had some rudimental knowledge of Greek in early life,<sup>f</sup> which may have been afterwards extended when the need was felt, but not more than would enable him to discourse intelligibly on practical and devotional subjects. That he was an affectionate husband, married in early life to a wife who accompanied him in his apostolic journeys, are facts inferred from Scripture, while very ancient traditions, recorded by Clement of Alexandria (whose connection with the church founded by St. Mark gives a peculiar value to his testimony), and by other early but less trustworthy writers, inform us that her name was Perpetua, that she bore a daughter, or perhaps other children, and suffered martyrdom. It is uncertain at what age he was called by our Lord. The general impression of the Fathers is that he was an old man at the date of his death, A. D. 64, but this need not imply that he was much older than our Lord. He was probably between thirty and forty years of age at the date of his call.

That call was preceded by a special preparation. He and his brother Andrew, together with their partners James and John, the sons of Zebedee, were disciples of John the Baptist (John i. 35). They were in attendance upon him when they were first

<sup>d</sup> See Reuss, *Geschichte der H. S.* § 41.

<sup>e</sup> Reuss (*l. c.* § 49) rejects this as a mere hypothesis but gives no reason. The tradition rests on the authority of Clement of Alexandria, Irenæus, and Tertullian. See the notes on Euseb. *H. E.* iii. 39, v. 8, and vi. 25.

<sup>f</sup> Even highly educated Jews, like Josephus, spoke Greek imperfectly (see *Ant.* xx. 11, § 2). On the antagonism to Greek influence, see Jost, *l. c.* i. 196, and M. Nicolas, *Les Doctrines religieuses des Juifs*, i. c. 2.

called to the service of Christ. From the circumstances of that call, which are recorded with graphic minuteness by St. John, we learn some important facts touching their state of mind and the personal character of our Apostle. Two disciples, one named by the Evangelist St. Andrew, the other in all probability St. John himself, were standing with the Baptist at Bethany on the Jordan, when he pointed out Jesus as He walked, and said, Behold the Lamb of God! That is, the antitype of the victims whose blood (as all true Israelites, and they more distinctly under the teaching of John, <sup>a</sup> believed) prefigured the atonement for sin. The two at once followed Jesus, and upon his invitation abode with Him that day. Andrew then went to his brother Simon, and saith unto him, We have found the Messiah, the anointed One, of whom they had read in the prophets. Simon went at once, and when Jesus looked on him He said, Thou art Simon the son of Jona; thou shalt be called Cephas. The change of name is of course deeply significant. As son of Jona (a name of doubtful meaning, according to Lampe equivalent to Johanan or John, *i. e.* grace of the Lord; according to Lange, who has some striking but fanciful observations, signifying dove) he bore as a disciple the name Simon, *i. e.* hearer, but as an Apostle, one of the twelve on whom the Church was to be erected, he was hereafter (*κληθήσῃ*) to be called Rock or Stone. It seems a natural impression that the words refer primarily to the original character of Simon: that our Lord saw in him a man firm, steadfast, not to be overthrown, though severely tried; and such was generally the view taken by the Fathers: but it is perhaps a deeper and truer inference that Jesus thus describes Simon, not as what he was, but as what he would become under his influence — a man with predispositions and capabilities not unfitted for the office he was to hold, but one whose permanence and stability would depend upon union with the living Rock. Thus we may expect to find Simon, as the natural man, at once rough, stubborn, and mutable, whereas Peter, identified with the Rock, will remain firm and unmovable unto the end.<sup>b</sup>

This first call led to no immediate change in St. Peter's external position. He and his fellow disciples looked henceforth upon our Lord as their teacher, but were not commanded to follow him as regular disciples. There were several grades of disciples among the Jews, from the occasional hearer, to the follower who gave up all other pursuits in order to serve a master. At the time a recognition of his Person and office sufficed. They returned to Capernaum, where they pursued their usual business, waiting for a further intimation of his will.

The second call is recorded by the other three Evangelists; the narrative of St. Luke being apparently supplementary<sup>c</sup> to the brief, and so to speak, official accounts given by Matthew and Mark. It took place on the sea of Galilee near Capernaum

— where the four disciples, Peter and Andrew James and John, were fishing. Peter and Andrew were first called. Our Lord then entered Simon Peter's boat, and addressed the multitude on the shore; after the conclusion of the discourse He wrought the miracle by which He foreshadowed the success of the Apostles in the new, but analogous, occupation which was to be theirs, that of fishers of men. The call of James and John followed. From that time the four were certainly enrolled formally among his disciples, and although as yet invested with no official character, accompanied Him in his journeys, those especially in the north of Palestine.

Immediately after that call our Lord went to the house of Peter, where He wrought the miracle of healing on Peter's wife's mother, a miracle succeeded by other manifestations of divine power which produced a deep impression upon the people. Some time was passed afterwards in attendance upon our Lord's public ministrations in Galilee, Decapolis, Perea, and Judæa: though at intervals the disciples returned to their own city, and were witnesses of many miracles, of the call of Levi, and of their Master's reception of outcasts, whom they in common with their zealous but prejudiced countrymen had despised and shunned. It was a period of training, of mental and spiritual discipline preparatory to their admission to the higher office to which they were destined. Even then Peter received some marks of distinction. He was selected, together with the two sons of Zebedee, to witness the raising of Jairus' daughter.

The special designation of Peter and his eleven fellow disciples took place some time afterwards, when they were set apart as our Lord's immediate attendants, and as his delegates to go forth wherever He might send them, as apostles, announcers of his kingdom, gifted with supernatural powers as credentials of their supernatural mission (see Matt. x. 2-4; Mark iii. 13-19, the most detailed account — Luke vi. 13). They appear then first to have received formally the name of Apostles, and from that time Simon bore publicly, and as it would seem all but exclusively, the name Peter, which had hitherto been used rather as a characteristic appellation than as a proper name.

From this time there can be no doubt that St. Peter held the first place among the Apostles, to whatever cause his precedence is to be attributed. There was certainly much in his character which marked him as a representative man; both in his strength and in his weakness, in his excellences and his defects he exemplifies the changes which the natural man undergoes in the gradual transformation into the spiritual man under the personal influence of the Saviour. The precedence did not depend upon priority of call, or it would have devolved upon his brother Andrew, or that other disciple who first followed Jesus. It seems scarcely probable that it depended upon seniority, even sup-

<sup>a</sup> See Lücke, Tholuck, and Lange, on the Gospel of St. John.

<sup>b</sup> Lücke describes this character well, as that firmness or rather hardness of power, which, if not purified, easily becomes violence. The deepest and most beautiful observations are those of Origen on John, tom. ii. c. 80.

<sup>c</sup> This is a point of great difficulty, and hotly contested. Many writers of great weight hold the occurrence to be altogether distinct; but the generality of

commentators, including some of the most earnest and devout in Germany and England, appear now to concur in the view which I have here taken. Thus Trench *On the Parables*, Neander, Lücke, Lange, and Ebrard. The object of Strauss, who denies the identity, is to make out that St. Luke's account is a mere myth. The most satisfactory attempt to account for the variations is that of Spanheim, *Dubia Evangelicæ*, ii. 341.

posing, which is a mere conjecture,<sup>a</sup> that he was older than his fellow disciples. The special designation by Christ, alone accounts in a satisfactory way for the facts that he is named first in every list of the Apostles, is generally addressed by our Lord as their representative, and on the most solemn occasions speaks in their name. Thus when the first great secession took place in consequence of the offense given by our Lord's mystic discourse at Capernaum (see John vi. 66-69), "Jesus said unto the twelve, Will ye also go away? Then Simon Peter answered Him, Lord, to whom shall we go? Thou hast the words of eternal life: and we believe and are sure that Thou art that Christ, the Son of the living God." Thus again at Casarea Philippi, soon after the return of the twelve from their first missionary tour, St. Peter (speaking as before in the name of the twelve, though, as appears from our Lord's words, with a peculiar distinctness of personal conviction) repeated that declaration, "Thou art the Christ, the Son of the living God." The confirmation of our Apostle in his special position in the Church, his identification with the rock on which that Church is founded, the ratification of the powers and duties attached to the apostolic office,<sup>b</sup> and the promise of permanence to the Church, followed as a reward of that confession. The early Church regarded St. Peter generally, and most especially on this occasion, as the representative of the apostolic body, a very distinct theory from that which makes him their head, or governor in Christ's stead. Even in the time of Cyprian, when communion with the Bishop of Rome as St. Peter's successor for the first time was held to be indispensable, no powers of jurisdiction, or supremacy, were supposed to be attached

<sup>a</sup> \* This conjecture is chiefly founded on his being the only one of the apostles who is mentioned as married (Matt. viii. 14; Mark i. 30; Luke iv. 38, and comp. 1 Cor. ix. 5). The representation of Peter with a bald head by artists has no doubt the same origin, though said also to follow a distinct tradition. H.

<sup>b</sup> The accounts which have been given of the precise import of this declaration may be summed up under these heads: 1. That our Lord spoke of Himself, and not of St. Peter, as the rock on which the Church was to be founded. This interpretation expresses a great truth, but it is irreconcilable with the context, and could scarcely have occurred to an unbiased reader, and certainly does not give the primary and literal meaning of our Lord's words. It has been defended, however, by candid and learned critics, as Glass and Dathe. 2. That our Lord addresses Peter as the type or representative of the Church, in his capacity of chief disciple. This is Augustine's view, and it was widely adopted in the early Church. It is hardly borne out by the context, and seems to involve a false metaphor. The Church would in that case be founded on itself in its type. 3. That the rock was not the person of Peter, but his confession of faith. This rests on much better authority, and is supported by stronger arguments. The authorities for it are given by Suicer, v. Πέτρος, § 1, note 3. Yet it seems to have been originally suggested as an explanation, rather than an interpretation, which it certainly is not in a literal sense. 4. That St. Peter himself was the rock on which the Church would be built, as the representative of the Apostles, as professing in their name the true faith, and as entrusted specially with the duty of preaching it, and thereby laying the foundation of the Church. Many learned and candid Protestant divines have acquiesced in this view (e. g. Pearson, Hammond, Bengel, Rosenmüller, Schleusner, Kuinoel, Bloomfield, etc.). It is borne out by the facts that St. Peter on

to the admitted precedence of rank.<sup>c</sup> *Præsentia inter pares*, Peter held no distinct office, and certainly never claimed any powers which did not belong equally to all his fellow Apostles.

This great triumph of Peter, however, brought other points of his character into strong relief. The distinction which he then received, and it may be his consciousness of ability, energy, zeal and absolute devotion to Christ's person, seem to have developed a natural tendency to rashness and forwardness bordering upon presumption. On this occasion the exhibition of such feelings brought upon him the strongest reproof ever addressed to a disciple by our Lord. In his affection and self-confidence Peter ventured to reject as impossible the announcement of the sufferings and humiliation which Jesus predicted, and heard the sharp words, "Get thee behind me, Satan, thou art an offense unto me; for thou savourest not the things that be of God, but those that be of men." That was Peter's first fall; a very ominous one; not a rock, but a stumbling stone,<sup>d</sup> not a defender, but an antagonist and deadly enemy of the faith, when the spiritual should give place to the lower nature in dealing with the things of God. It is remarkable that on other occasions when St. Peter signalized his faith and devotion, he displayed at the time, or immediately afterwards, a more than usual deficiency in spiritual discernment and consistency. Thus a few days after that fall he was selected together with John and James to witness the transfiguration of Christ, but the words which he then uttered prove that he was completely bewildered, and unable at the time to comprehend the meaning of the transaction.<sup>e</sup> Thus again, when his zeal

the day of Pentecost, and during the whole period of the establishment of the Church, was the chief agent in all the work of the ministry, in preaching, in admitting both Jews and Gentiles, and laying down the terms of communion. This view is wholly incompatible with the Roman theory, which makes him the representative of Christ, not personally, but in virtue of an office essential to the permanent existence and authority of the Church. Passaglia, the latest and ablest controversialist, takes more pains to refute this than any other view; but wholly without success: it being clear that St. Peter did not retain, even admitting that he did at first hold, any primacy of rank after completing his own special work; that he never exercised any authority over or independently of the other Apostles; that he certainly did not transmit whatever position he ever held to any of his colleagues after his decease. At Jerusalem, even during his residence there, the chief authority rested with St. James; nor is there any trace of a central power or jurisdiction for centuries after the foundation of the Church. The same arguments, *mutatis mutandis*, apply to the keys. The promise was literally fulfilled when St. Peter preached at Pentecost, admitted the first converts to baptism, confirmed the Samaritans, and received Cornelius, the representative of the Gentiles, into the Church. Whatever privileges may have belonged to him personally, died with him. The authority required for the permanent government of the Church was believed by the Fathers to be deposited in the episcopate, as representing the apostolic body, and succeeding to its claims.

<sup>c</sup> See an admirable discussion of this question in Rothe's *Anfänge der Christlichen Kirche*.

<sup>d</sup> Lightfoot suggests that such may have been the real meaning of the term "rock." An amusing instance of the blindness of party feeling. See *Hors. Heb.* on John, vol. xii. p. 237.

<sup>e</sup> As usual, the least favorable view of St. Peter's

and courage prompted him to leave the ship and walk on the water to go to Jesus (Matt. xiv. 29), a sudden failure of faith withdrew the sustaining power; he was about to sink when he was at once reproved and saved by his Master. Such traits, which occur not infrequently, prepare us for his last great fall, as well as for his conduct after the Resurrection, when his natural gifts were perfected and his deficiencies supplied by "the power from on high." We find a mixture of zeal and weakness in his conduct when called upon to pay tribute-money for himself and his Lord, but faith had the upper hand, and was rewarded by a significant miracle (Matt. xvii. 24-27). The question which about the same time Peter asked our Lord as to the extent to which forgiveness of sins should be carried, indicated a great advance in spirituality from the Jewish standing-point, while it showed how far as yet he and his fellow disciples were from understanding the true principle of Christian love (Matt. xviii. 21). We find a similar blending of opposite qualities in the declaration recorded by the synoptical evangelists (Matt. xix. 27; Mark x. 28; Luke xviii. 28), "Lo, we have left all and followed Thee." It certainly bespeaks a consciousness of sincerity, a spirit of self-devotion and self-sacrifice, though it conveys an impression of something like ambition; but in that instance the good undoubtedly predominated, as is shown by our Lord's answer. He does not reprove Peter, who spoke, as usual, in the name of the twelve, but takes that opportunity of uttering the strongest prediction touching the future dignity and paramount authority of the Apostles, a prediction recorded by St. Matthew only.

Towards the close of our Lord's ministry St. Peter's characteristics become especially prominent. Together with his brother, and the two sons of Zebedee, he listened to the last awful predictions and warnings delivered to the disciples in reference to the second advent (Matt. xxiv. 3; Mark xiii. 3, who alone mentions these names; Luke xxi. 7). At the last supper Peter seems to have been particularly earnest in the request that the traitor might be pointed out, expressing of course a general feeling, to which some inward consciousness of infirmity may have added force. After the supper his words drew out the meaning of the significant, almost sacramental act of our Lord in washing his disciples' feet, an occasion on which we find the same mixture of goodness and frailty, humility and deep affection, with a certain taint of self-will, which was at once hushed into submissive reverence by the voice of Jesus. Then, too, it was that he made those repeated protestations of unalterable fidelity, so soon to be falsified by his miserable fall. That event is, however, of such critical import in its bearings upon the character and position of the Apostle, that it cannot be dismissed without a careful, if not an exhaustive discussion.

Judas had left the guest-chamber when St. Peter put the question, Lord, whither goest Thou? words

which modern theologians generally represent as savoring of idle curiosity, or presumption, but in which the early fathers (as Chrysostom and Augustine) recognized the utterance of love and devotion. The answer was a promise that Peter should follow his Master, but accompanied with an intimation of present unfitness in the disciple. Then came the first protestation, which elicited the sharp and stern rebuke, and distinct prediction of Peter's denial (John xiii. 36-38). From comparing this account with those of the other evangelists (Matt. xxvi. 33-35; Mark xiv. 29-31; Luke xxii. 33, 34), it seems evident that with some diversity of circumstances both the protestation and warning were thrice repeated. The tempter was to sift all the disciples, our Apostle's faith was to be preserved from failing by the special intercession of Christ, he being thus singled out either as the representative of the whole body, or as seems more probable, because his character was one which had special need of supernatural aid. St. Mark, as usual, records two points which enhance the force of the warning and the guilt of Peter, namely, that the cock would crow twice, and that after such warning he repeated his protestation with greater vehemence. Chrysostom, who judges the Apostle with fairness and candor, attributes this vehemence to his great love, and more particularly to the delight which he felt when assured that he was not the traitor, yet not without a certain admixture of forwardness and ambition, such as had previously been shown in the dispute for preëminence. The fiery trial soon came. After the agony of Gethsemane, when the three, Peter, James, and John were, as on former occasions, selected to be with our Lord, the only witnesses of his passion, where also all three had alike failed to prepare themselves by prayer and watching, the arrest of Jesus took place. Peter did not shrink from the danger. In the same spirit which had dictated his promise he drew his sword, alone against the armed throng, and wounded the servant (*τον δούλον*, not a servant) of the high-priest, probably the leader of the band.<sup>a</sup> When this bold but unauthorized attempt at rescue was reproved, he did not yet forsake his Master, but followed Him with St. John into the focus of danger, the house of the high-priest.<sup>b</sup> There he sat in the outer hall. He must have been in a state of utter confusion: his faith, which from first to last was bound up with hope, his special characteristic, was for the time powerless against temptation. The danger found him unarmed. Thrice, each time with greater vehemence, the last time with blasphemous asseveration, he denied his Master. The triumph of Satan seemed complete. Yet it is evident that it was an obscuration of faith, not an extinction. It needed but a glance of his Lord's eye to bring him to himself. His repentance was instantaneous, and effectual. The light in which he himself regarded his conduct, is clearly shown by the terms in which it is related by St. Mark. The inferences are weighty as regards his

conduct and feelings is given by St. Mark *i. e.* by himself.

<sup>a</sup> \* The leader of the band would naturally be the chiliarch mentioned by John (xviii. 12); and at all events a slave (*δούλος*) would not be likely to be placed over the "servants" or apparitors (*ὑποοῦραι*) of the Jewish council. The man whom Peter struck may have been specially officious in laying hold of Jesus (ΜΑΛΧΟΣ). H

<sup>b</sup> \* The Saviour foretold that all the disciples would forsake him (Matt. xxvi. 31; Mark xiv. 27); and this took place, according to every intimation, at the time of the apprehension in the garden, and hence before the entrance into the hall. Peter and John, however, were no doubt the first of the disciples to recover from this panic. H

personal character, which represents more completely perhaps than any in the New Testament, the weakness of the natural and the strength of the spiritual man: still more weighty as bearing upon his relations to the apostolic body, and the claims resting upon the assumption that he stood to them in the place of Christ.

On the morning of the resurrection we have proof that St. Peter, though humbled, was not crushed by his fall. He and St. John were the first to visit the sepulchre; he was the first who entered it. We are told by Luke (in words still used by the Eastern Church as the first salutation on Easter Sunday) and by St. Paul,<sup>a</sup> that Christ appeared to him first among the Apostles — he who most needed the comfort was the first who received it, and with it, as may be assumed, an assurance of forgiveness. It is observable, however, that on that occasion he is called by his original name, Simon, not Peter; the higher designation was not restored until he had been publicly reinstated, so to speak, by his Master. That reinstatement took place at the sea of Galilee (John xxi.), an event of the very highest import. We have there indications of his best natural qualities, practical good sense, promptness and energy; slower than St. John to recognize their Lord, Peter was the first to reach Him; he brought the net to land. The thrice repeated question of Christ, referring doubtless to the three protestations and denials, were thrice met by answers full of love and faith, and utterly devoid of his hitherto characteristic failing, presumption, of which not a trace is to be discerned in his later history. He then received the formal commission to feed Christ's sheep; not certainly as one endued with exclusive or paramount authority, or as distinguished from his fellow-disciples, whose fall had been marked by far less aggravating circumstances; rather as one who had forfeited his place, and could not resume it without such an authorization. Then followed the prediction of his martyrdom, in which he was to find the fulfilment of his request to be permitted to follow the Lord.<sup>b</sup>

With this event closes the first part of St. Peter's history. It has been a period of transition, during which the fisherman of Galilee had been trained first by the Baptist, then by our Lord, for the great work of his life. He had learned to know the Person and appreciate the offices of Christ: while his own character had been chastened and elevated by special privileges and humiliations, both reaching their climax in the last recorded transactions. Henceforth, he with his colleagues were to establish and govern the Church founded by their Lord, without the support of his presence.

The first part of the Acts of the Apostles is occupied by the record of transactions, in nearly all of which Peter stands forth as the recognized leader of the Apostles; it being, however, equally

clear that he neither exercises nor claims any authority apart from them, much less over them. In the first chapter it is Peter who points out to the disciples (as in all his discourses and writings drawing his arguments from prophecy) the necessity of supplying the place of Judas. He states the qualifications of an Apostle, but takes no special part in the election. The candidates are selected by the disciples, while the decision is left to the searcher of hearts. The extent and limits of Peter's primacy might be inferred with tolerable accuracy from this transaction alone. To have one spokesman, or foreman, seems to accord with the spirit of order and humility which ruled the Church, while the assumption of power or supremacy would be incompatible with the express command of Christ (see Matt. xxiii. 10). In the 2d chapter again, St. Peter is the most prominent person in the greatest event after the resurrection, when on the day of Pentecost the Church was first invested with the plenitude of gifts and powers. Then Peter, not speaking in his own name, but with the eleven (see ver. 14), explained the meaning of the miraculous gifts, and showed the fulfilment of prophecies (accepted at that time by all Hebrews as Messianic), both in the outpouring of the Holy Ghost and in the resurrection and death of our Lord. This discourse, which bears all the marks of Peter's individuality, both of character and doctrinal views,<sup>c</sup> ends with an appeal of remarkable boldness.

It is the model upon which the apologetic discourses of the primitive Christians were generally constructed. The conversion and baptism of three thousand persons, who continued steadfastly in the Apostle's doctrine and fellowship, attested the power of the Spirit which spake by Peter on that occasion.

The first miracle after Pentecost was wrought by St. Peter (Acts iii.); and St. John was joined with him in that, as in most important acts of his ministry; but it was Peter who took the cripple by the hand, and bade him "in the name of Jesus of Nazareth rise up and walk," and when the people ran together to Solomon's porch, where the Apostles, following their Master's example, were wont to teach, Peter was the speaker; he convinces the people of their sin, warns them of their danger, points out the fulfilment of prophecy, and the special objects for which God sent his Son first to the children of the old covenant.<sup>d</sup>

The boldness of the two Apostles, of Peter more especially as the spokesman, when, "filled with the Holy Ghost," he confronted the full assembly, headed by Annas and Caiaphas, produced a deep impression upon those cruel and unscrupulous hypocrites; an impression enhanced by the fact that the words came from ignorant and unlearned men. The words spoken by both Apostles, when commanded not to speak at all nor teach in the

<sup>a</sup> A fact very perplexing to the Tübingen school, being utterly irreconcilable with their theory of antagonism between the Apostles at first.

<sup>b</sup> \* Peter's inquiry, on this occasion, respecting the fate of John after his own martyrdom had been foretold (John xxi. 18-22), seems to have arisen from a feeling of jealousy towards John. The severity of Christ's answer to his question ("If I will that he tarry till I come, what is that to thee?"), and the evangelist's recital of the special marks of favor which the Saviour had conferred on himself (ver. 20), admit otherwise of no easy explanation. (For a fuller ex-

position of this view see "Biblical Notes," *Bibl. Sacra* for 1868, xxv. 783.)

<sup>c</sup> See Schmid, *Biblische Theologie*, ii. 153; and Weiss, *Der petrinische Lehrbegriff*, p. 14.

<sup>d</sup> This speech is at once strikingly characteristic of St. Peter, and a proof of the fundamental harmony between his teaching and the more developed and systematic doctrines of St. Paul: differing in form, to an extent utterly incompatible with the theory of Baur and Schwegler touching the object of the writer of the Acts; identical in spirit, as issuing from the same source.

name of Jesus, have ever since been the watch-words of martyrs (iv. 19, 20).

This first miracle of healing was soon followed by the first miracle of judgment. The first open and deliberate sin against the Holy Ghost, a sin combining ambition, fraud, hypocrisy, and blasphemy, was visited by death, sudden and awful as under the old dispensation. St. Peter was the minister in that transaction. As he had first opened the gate to penitents (Acts ii. 37, 38), he now closed it to hypocrites. The act stands alone, without a precedent or parallel in the Gospel; but Peter acted simply as an instrument, not pronouncing the sentence, but denouncing the sin, and that in the name of his fellow Apostles and of the Holy Ghost. Penalties similar in kind, though far different in degree, were inflicted, or commanded on various occasions by St. Paul. St. Peter appears, perhaps in consequence of that act, to have become the object of a reverence bordering, as it would seem, on superstition (Acts v. 15), while the numerous miracles of healing wrought about the same time, showing the true character of the power dwelling in the Apostles, gave occasion to the second persecution. Peter then came into contact with the noblest and most interesting character among the Jews, the learned and liberal tutor of St. Paul, Gamaliel, whose caution, gentleness, and dispassionate candor, stand out in strong relief contrasted with his colleagues, but make a faint impression compared with the steadfast and uncompromising principles of the Apostles, who after undergoing an illegal scourging, went forth rejoicing that they were counted worthy to suffer shame for the name of Jesus. Peter is not specially named in connection with the appointment of deacons, an important step in the organization of the church; but when the Gospel was first preached beyond the precincts of Judæa, he and St. John were at once sent by the Apostles to confirm the converts at Samaria, a very important statement at this critical point, proving clearly his subordination to the whole body, of which he was the most active and able member.

Up to that time it may be said that the Apostles had one great work, namely, to convince the Jews that Jesus was the Messiah; in that work St. Peter was the master builder, the whole structure rested upon the doctrines of which he was the principal teacher: hitherto no words but his are specially recorded by the writer of the Acts. Henceforth he remains prominent, but not exclusively prominent, among the propagators of the Gospel. At Samaria he and John established the precedent for the most important rite not expressly enjoined in Holy Writ, namely, confirmation, which the Western Church<sup>a</sup> has always held to belong exclusively to the functions of bishops as successors to the ordinary powers of the Apostolate. Then also St. Peter was confronted with Simon Magus, the first teacher of heresy. [SIMON MAGUS.] As in the case of Ananias he had denounced the first sin against holiness, so in this case he first declared the penalty due to the sin called after Simon's name. About three years later (compare Acts ix. 26, and Gal. i. 17, 18) we have two accounts of the first meeting of St. Peter and St. Paul. In

<sup>a</sup> Not so the Eastern, which combines the act with baptism, and leaves it to the officiating priest. It is one of the points upon which Photius and other eastern controversialists lay special stress.

the Acts it is stated generally that Saul was at first distrusted by the disciples, and received by the Apostles upon the recommendation of Barnabas. From the Galatians we learn that St. Paul went to Jerusalem specially to see Peter; that he abode with him fifteen days, and that James was the only other Apostle present at the time. It is important to note that this account—which, while it establishes the independence of St. Paul, marks the position of St. Peter as the most eminent of the Apostles—rests not on the authority of the writer of the Acts, but on that of St. Paul; as though it were intended to obviate all possible misconceptions touching the mutual relations of the Apostles of the Hebrews and the Gentiles. This interview was followed by other events marking Peter's position—a general apostolical tour of visitation to the churches hitherto established (*διερχόμενον διὰ πάντων*, Acts ix. 32), in the course of which two great miracles were wrought on Æneas and Tabitha, and in connection with which the most signal transaction after the day of Pentecost is recorded, the baptism of Cornelius. That was the crown and consummation of Peter's ministry. Peter who had first preached the resurrection to the Jews, baptized the first converts, confirmed the first Samaritans, now, without the advice or coöperation of any of his colleagues, under direct communication from heaven, first threw down the barrier which separated proselytes of the gate<sup>b</sup> from Israelites, first establishing principles which in their gradual application and full development issued in the complete fusion of the Gentile and Hebrew elements in the Church. The narrative of this event, which stands alone in minute circumstantiality of incidents, and accumulation of supernatural agency, is twice recorded by St. Luke. The chief points to be noted are, first, the peculiar fitness of Cornelius, both as a representative of Roman force and nationality, and as a devout and liberal worshipper, to be a recipient of such privileges; and secondly, the state of the Apostle's own mind. Whatever may have been his hopes or fears touching the heathen, the idea had certainly not yet crossed him that they could become Christians without first becoming Jews. As a loyal and believing Hebrew he could not contemplate the removal of Gentile disqualifications, without a distinct assurance that the enactments of the law which concerned them were abrogated by the divine legislator. The vision could not therefore have been the product of a subjective impression. It was, strictly speaking, objective, presented to his mind by an external influence. Yet the will of the Apostle was not controlled, it was simply enlightened. The intimation in the state of trance did not at once overcome his reluctance. It was not until his consciousness was fully restored, and he had well considered the meaning of the vision, that he learned that the distinction of cleanness and uncleanness in outward things belonged to a temporary dispensation. It was no mere acquiescence in a positive command, but the development of a spirit full of generous impulses, which found utterance in the words spoken by Peter on that occasion,—both in the presence of Cornelius, and afterwards at Jerusalem. His conduct gave great offense to all his countrymen (Acts xi. 2), and it needed all his authority, corroborated

<sup>b</sup> A term to which objection has been made, but shown by Jost to be strictly correct.

by a special manifestation of the Holy Ghost, to induce his fellow-Apostles to recognize the propriety of this great act, in which both he and they saw an earnest of the admission of Gentiles into the Church on the single condition of spiritual repentance. The establishment of a church in great part of Gentile origin at Antioch, and the mission of Barnabas, between whose family and Peter there were the bonds of near intimacy, set the seal upon the work thus inaugurated by St. Peter.

This transaction was soon followed by the imprisonment of our Apostle. Herod Agrippa having first tested the state of feeling at Jerusalem by the execution of James, one of the most eminent Apostles, arrested Peter. The hatred, which at that time first showed itself as a popular feeling, may most probably be attributed chiefly to the offense given by Peter's conduct towards Cornelius. His miraculous deliverance marks the close of this second great period of his ministry. The special work assigned to him was completed. He had founded the Church, opened its gates to Jews and Gentiles, and distinctly laid down the conditions of admission. From that time we have no continuous history of Peter. It is quite clear that he retained his rank as the chief Apostle, equally so, that he neither exercised nor claimed any right to control their proceedings. At Jerusalem the government of the Church devolved upon James the brother of our Lord. In other places Peter seems to have confined his ministrations to his countrymen—as Apostle of the circumcision. He left Jerusalem, but it is not said where he went. Certainly not to Rome, where there are no traces of his presence before the last years of his life; he probably remained in Judæa, visiting and confirming the churches; some old but not trustworthy traditions represent him as preaching in Cæsarea and other cities on the western coast of Palestine; six years later we find him once more at Jerusalem, when the Apostles and elders came together to consider the question whether converts should be circumcised. Peter took the lead in that discussion, and urged with remarkable cogency the principles settled in the case of Cornelius. Purifying faith and saving grace (xv. 9 and 11) remove all distinctions between believers. His arguments, adopted and enforced by James, decided that question at once and forever. It is, however, to be remarked, that on that occasion he exercised no power which Romanists hold to be inalienably attached to the chair of Peter. He did not preside at the meeting; he neither summoned nor dismissed it; he neither collected the suffrages nor pronounced the decision.<sup>a</sup>

It is a disputed point whether the meeting between St. Paul and St. Peter, of which we have an

account in the Galatians (ii. 1-10), took place at this time. The great majority of critics believe that it did, and this hypothesis, though not without difficulties, seems more probable than any other which has been suggested.<sup>b</sup> The only point of real importance was certainly determined before the Apostles separated, the work of converting the Gentiles being henceforth specially intrusted to Paul and Barnabas, while the charge of preaching to the circumcision was assigned to the elder Apostles, and more particularly to Peter (Gal. ii. 7-9). This arrangement cannot, however, have been an exclusive one. St. Paul always addressed himself first to the Jews in every city; Peter and his old colleagues undoubtedly admitted and sought to make converts among the Gentiles. It may have been in full force only when the old and new Apostles resided in the same city. Such at least was the case at Antioch, where St. Peter went soon afterwards. There the painful collision took place between the two Apostles; the most remarkable, and, in its bearings upon controversies at critical periods, one of the most important events in the history of the Church. St. Peter at first applied the principles which he had lately defended, carrying with him the whole Apostolic body, and on his arrival at Antioch ate with the Gentiles, thus showing that he believed all ceremonial distinctions to be abolished by the Gospel: in that he went far beyond the strict letter of the injunctions issued by the Council.<sup>c</sup> That step was marked and condemned by certain members of the Church of Jerusalem sent by James. It appeared to them one thing to recognize Gentiles as fellow-Christians, another to admit them to social intercourse, whereby ceremonial defilement would be contracted under the law to which all the Apostles, Barnabas and Paul included, acknowledged allegiance.<sup>d</sup> Peter, as the Apostle of the circumcision, fearing to give offense to those who were his special charge, at once gave up the point, suppressed or disguised his feelings,<sup>e</sup> and separated himself not from communion, but from social intercourse with the Gentiles. St. Paul, as the Apostle of the Gentiles, saw clearly the consequences likely to ensue, and could ill brook the misapplication of a rule often laid down in his own writings concerning compliance with the prejudices of weak brethren. He held that Peter was infringing a great principle, withstood him to the face, and using the same arguments which Peter had urged at the Council, pronounced his conduct to be indefensible. The statement that Peter compelled the Gentiles to Judaize, probably means, not that he enjoined circumcision, but that his conduct, if persevered in, would have that effect, since they would naturally take any steps which might remove the barriers to familiar intercourse with the first Apostles of Christ. Pe-

<sup>a</sup> In accordance with this representation, St. Paul names James before Cephas and John (Gal. ii. 9).

<sup>b</sup> Lange (*Das Apostolische Zeitalter*, ii. 378) fixes the date about three years after the Council. Wieseler has a long excursus to show that it must have occurred after St. Paul's second apostolic journey. He gives some weighty reasons, but wholly fails in the attempt to account for the presence of Barnabas, a fatal objection to his theory. See *Der Brief an die Galater*, *Excursus*, p. 579. On the other side are Theodor, Pearson, Eichhorn, Olshausen, Meyer, Neander, Hovvyn, Schaff, etc. [See note b, p. 2372. The history of Barnabas is too imperfectly known to render the objection above of any decisive weight. — H.]

<sup>c</sup> This decisively overturns the whole system of Baur, which rests upon a supposed antagonism between St. Paul and the elder Apostles, especially St. Peter. St. Paul grounds his reproof upon the inconsistency of Peter, not upon his Judaizing tendencies.

<sup>d</sup> See Acts xviii. 18-21, xx. 16, xxi. 18-24, passages borne out by numerous statements in St. Paul's epistles.

<sup>e</sup> Ὑπέστανεν, συννηκερίθησαν, ὑπόκρισις, must be understood in this sense. It was not hypocrisy in the sense of an affectation of holiness, but in that of an outward deference to prejudices which certainly neither Peter nor Barnabas any longer shared.

was wrong, but it was an error of judgment; an act contrary to his own feelings and wishes, in deference to those whom he looked upon as representing the mind of the Church; that he was actuated by selfishness, national pride, or any remains of superstition, is neither asserted nor implied in the strong censure of St. Paul: nor, much as we must admire the earnestness and wisdom of St. Paul, whose clear and vigorous intellect was in this case stimulated by anxiety for his own special charge, the Gentile Church, should we overlook Peter's singular humility in submitting to public reproof from one so much his junior, or his magnanimity both in adopting St. Paul's conclusions (as we must infer that he did from the absence of all trace of continued resistance), and in remaining on terms of brotherly communion (as is testified by his own written words), to the end of his life (1 Pet. v. 10; 2 Pet. iii. 15, 16).

From this time until the date of his epistles, we have no distinct notices in Scripture of Peter's abode or work. The silence may be accounted for by the fact that from that time the great work of propagating the Gospel was committed to the marvelous energies of St. Paul. Peter was probably employed for the most part in building up and completing the organization of Christian communities in Palestine and the adjoining districts. There is, however, strong reason to believe that he visited Corinth at an early period; this seems to be implied in several passages of St. Paul's first epistle to that church,<sup>a</sup> and it is a natural inference from the statements of Clement of Rome (1 *Epistle to the Corinthians*, c. 4). The fact is positively asserted by Dionysius, Bishop of Corinth (A. D. 180 at the latest), a man of excellent judgment, who was not likely to be misinformed, nor to make such an assertion lightly in an epistle addressed to the Bishop and Church of Rome.<sup>b</sup> The reference to collision between parties who claimed Peter, Apollos, Paul, and even Christ for their chiefs, involves no opposition between the Apostles themselves, such as the fabulous Clementines and modern infidelity assume. The name of Peter as founder, or joint founder, is not associated with any local church save those of Corinth, Antioch,<sup>c</sup> or Rome, by early ecclesiastical tradition. That of Alexandria may have been established by St. Mark after Peter's death. That Peter preached the Gospel in the countries of Asia, mentioned in his first epistle, appears from Origen's own words (*κεκρυμμέναι οἴκειν*) to be a mere conjecture, not in itself improbable, but of little weight in the absence of all positive evidence, and of all personal reminiscences in the epistle itself. From that epistle,

<sup>a</sup> See Routh, *Rel. Sacra*, i. 179.

<sup>b</sup> The attempt to set aside the evidence of Dionysius, on the ground that he makes an evident mistake in attributing the foundation of the Corinthian Church to Peter and Paul, is futile. If Peter took any part in organizing the Church, he would be spoken of as a joint founder. Schaff supposes that Peter may have first visited Corinth on his way to Rome towards the end of his life.

<sup>c</sup> It is to be observed that even St. Leo represents the relation of St. Peter to Antioch as precisely the same with that in which he stands to Rome (Ep. 92).

<sup>d</sup> Origen, ap. Euseb. iii. 1, adopted by Epiphanius (*Her. xxvii.*) and Jerome (*Catal.* c. 1).

<sup>e</sup> On the other hand, the all but unanimous opinion of ancient commentators that Rome is designated has been adopted, and maintained with great ingenu-

however, it is to be inferred that towards the end of his life, St. Peter either visited, or resided for some time at Babylon, which at that time, and for some hundreds of years afterwards, was a chief seat of Jewish culture. This of course depends upon the assumption, which on the whole seems most probable, that the word Babylon is not used as a mystic designation of Rome, but as a proper name, and that not of an obscure city in Egypt, but of the ancient capital of the East. There were many inducements for such a choice of abode. The Jewish families formed there a separate community,<sup>f</sup> they were rich, prosperous, and had established settlements in many districts of Asia Minor. Their language, probably a mixture of Hebrew and Nabatean, must have borne a near affinity to the Galilean dialect. They were on far more familiar terms than in other countries with their heathen neighbors, while their intercourse with Judæa was carried on without intermission. Christianity certainly made considerable progress at an early time in that and the adjoining districts, the great Christian schools at Edessa and Nisibis probably owed their origin to the influence of Peter, the general tone of the writers of that school is what is now commonly designated as Petrine. It is no unreasonable supposition that the establishment of Christianity in those districts may have been specially connected with the residence of Peter at Babylon. At that time there must have been some communications between the two great Apostles, Peter and Paul, thus stationed at the two extremities of the Christian world. St. Mark, who was certainly employed about that time by St. Paul, was with St. Peter when he wrote the epistle. Silvanus, St. Paul's chosen companion, was the bearer, probably the amanuensis of St. Peter's epistle: not improbably sent to Peter from Rome, and charged by him to deliver that epistle, written to support Paul's authority, to the churches founded by that Apostle on his return.

More important in its bearings upon later controversies is the question of St. Peter's connection with Rome.

It may be considered as a settled point that he did not visit Rome before the last year of his life. Too much stress may perhaps be laid on the fact that there is no notice of St. Peter's labors or presence in that city in the Epistle to the Romans; but that negative evidence is not counterbalanced by any statement of undoubted antiquity. The date given by Eusebius<sup>g</sup> rests upon a miscalculation, and is irreconcilable with the notices of St. Peter in the Acts of the Apostles. Protestant critics, with scarcely one exception,<sup>h</sup> are unanimous upon this point, and Roman controversialists are

ity and some very strong arguments, by Schaff (*Geschichte der Christlichen Kirche*, p. 300), Neander, Steiger, De Wette, and Wieseler. Among ourselves, Pearson takes the name Babylon literally, though with some difference as to the place so named.

<sup>f</sup> For many interesting and valuable notices see Jost, *Geschichte des Judenthums*, i. 337, ii. 127.

<sup>g</sup> He gives A. D. 42 in the *Chronicon* (i. e. in the Armenian text), and says that Peter remained at Rome twenty years. In this he is followed by Jerome, *Catal.* c. 1 (who gives twenty-five years), and by most Roman Catholic writers.

<sup>h</sup> Thiersch is the only exception. He belongs to the Irvingite sect, which can scarcely be called Protestant. See *Versuch*, p. 104. His ingenious arguments are answered by Lange, *Das apostolische Zeitalter*, p. 381, and by Schaff, *Kirchengeschichte*, p. 306.

far from being agreed in their attempts <sup>a</sup> to remove the difficulty.

The fact, however, of St. Peter's martyrdom at Rome rests upon very different grounds. The evidence for it is complete, while there is a total absence of any contrary statement in the writings of the early Fathers. We have in the first place the certainty of his martyrdom, in our Lord's own prediction (John xxi. 18, 19). Clement of Rome, writing before the end of the first century, speaks of it,<sup>b</sup> but does not mention the *place*, that being of course well known to his readers. Ignatius, in the undoubtedly genuine Epistle to the Romans (ch. iv.), speaks of St. Peter in terms which imply a special connection with their church. Other early notices of less weight coincide with this, as that of Papias (Euseb. ii. 15), and the apocryphal *Prædicatio Petri*, quoted by Cyprian. In the second century, Dionysius of Corinth, in the Epistle to Soter, Bishop of Rome (ap. Euseb. *H. E.* ii. 25), states, as a fact universally known, and accounting for the intimate relations between Corinth and Rome, that Peter and Paul both taught in Italy, and suffered martyrdom about the same time.<sup>c</sup> Irenæus, who was connected with St. John, being a disciple of Polycarp, a hearer of that Apostle, and thoroughly conversant with Roman matters, bears distinct witness to St. Peter's presence at Rome (*Adv. Hæc.* iii. 1 and 3). It is incredible that he should have been misinformed. In the next century there is the testimony of Caius, the liberal and learned Roman presbyter (who speaks of St. Peter's tomb in the Vatican), that of Origen, Tertullian, and of the ante and post-Nicene Fathers, without a single exception. In short, the churches most nearly connected with Rome, and those least affected by its influence, which was as yet but inconsiderable in the East, concur in the statement that Peter was a joint founder of that church, and suffered death in that city. What the early Fathers do not assert, and indeed implicitly deny, is that Peter was the sole founder or resident head of that Church, or that the See of Rome derived from him any claim to supremacy: at the utmost they place him on a footing of equality with St. Paul.<sup>d</sup> That fact is sufficient for all purposes of fair controversy. The denial of the statements resting on such evidence seems almost to indicate an uneasy consciousness, truly remarkable in those who believe that they have, and who in fact really have, irrefragable grounds for rejecting the pretensions of the Papacy.

The time and manner of the Apostle's martyrdom are less certain. The early writers imply, or distinctly state, that he suffered at, or about the

same time (Dionysius, *κατὰ τὸν αὐτὸν καιρὸς* with St. Paul, and in the Neronian persecution. All agree that he was crucified, a point sufficiently determined by our Lord's prophecy. Origen (ap. Eus. iii. 1), who could easily ascertain the fact, and though fanciful in speculation, is not inaccurate in historical matters, says that at his own request he was crucified with his head downwards. This statement was generally received by Christian antiquity: nor does it seem inconsistent with the fervent temperament and deep humility of the Apostle to have chosen such a death: one, moreover, not unlikely to have been inflicted in mockery by the instruments of Nero's wanton and ingenious cruelty.

The legend found in St. Ambrose is interesting, and may have some foundation in fact. When the persecution began, the Christians at Rome, anxious to preserve their great teacher, persuaded him to flee, a course which they had Scriptural warrant to recommend, and he to follow; but at the gate he met our Lord. "Lord, whither goest thou?" asked the Apostle. "I go to Rome," was the answer, "there once more to be crucified." St. Peter well understood the meaning of those words, returned at once and was crucified.<sup>e</sup>

Thus closes the Apostle's life. Some additional facts, not perhaps unimportant, may be accepted on early testimony. From St. Paul's words it may be inferred with certainty that he did not give up the ties of family life when he forsook his temporal calling. His wife accompanied him in his wanderings. Clement of Alexandria, a writer well informed in matters of ecclesiastical interest, and thoroughly trustworthy, says (*Strom.* iii. p. 448) that "Peter and Philip had children, and that both took about their wives, who acted as their coadjutors in ministering to women at their own homes; by their means the doctrine of the Lord penetrated without scandal into the privacy of women's apartments." Peter's wife is believed, on the same authority, to have suffered martyrdom, and to have been supported in the hour of trial by her husband's exhortation. Some critics believe that she is referred to in the salutation at the end of the First Epistle of St. Peter. The Apostle is said to have employed interpreters. Basilides, an early Gnostic, professed to derive his system from Glaucias, one of these interpreters. This shows at least the impression, that the Apostle did not understand Greek, or did not speak it with fluency. Of far more importance is the statement that St. Mark wrote his Gospel under the teaching of Peter, or that he embodied in that Gospel the substance of our Apostle's oral instructions. This statement

<sup>a</sup> The most ingenious attempt is that of Windischmann, *Vindicia Petrine*, p. 112 f. He assumes that Peter went to Rome immediately after his deliverance from prison (Acts xii.), *i. e.* A. D. 44, and left in consequence of the Claudian persecution between A. D. 49 and 51.

<sup>b</sup> *Μαρτυρῆσας ἐπορεύθη εἰς τὸν ὀφειλόμενον τόπον τῆς ἑξέτης* (1 Cor. v.). The first word might simply mean "bore public witness;" but the last is conclusive.

<sup>c</sup> One of the most striking instances of the hypercritical skepticism of the Tübingen school is Baur's attempt to prove that this distinct and positive statement was a mere inference from the epistle of Clement. The intercourse between the two churches was unbroken from the Apostles' times.

<sup>d</sup> Cotelier has collected a large number of passages from the early Fathers, in which the name of Paul *precedes* that of Peter (*Pat. Apost.* i. 414: see also

Valesius, *Eus. H. E.* iii. 21). Fabricius observes that this is the general usage of the Greek Fathers. It is also to be remarked that when the Fathers of the 4th and 5th centuries — for instance, Chrysostom and Augustine — use the words ὁ Ἀπόστολος, or *Apostolus*, they mean Paul, not Peter. A very weighty fact.

<sup>e</sup> See Tillmont, *Mém.* i. p. 187, and 555. He shows that the account of Ambrose (which is not to be found in the Bened. edit.) is contrary to the apocryphal legend. Later writers rather value it as reflecting upon St. Peter's want of courage or constancy. That St. Peter, like all good men, valued his life, and suffered reluctantly, may be inferred from our Lord's words (John xxi.); but his flight is more in harmony with the principles of a Christian than willful exposure to persecution. Origen refers to the words then said to have been spoken by our Lord, but quotes an apocryphal work (*On St. John*, tom. ii.).

rests upon such an amount of external evidence,<sup>a</sup> and is corroborated by so many internal indications, that they would scarcely be questioned in the absence of a strong theological bias. The fact is doubly important in its bearings upon the Gospel, and upon the character of our Apostle. Chrysostom, who is followed by the most judicious commentators, seems first to have drawn attention to the fact, that in St. Mark's Gospel every defect in Peter's character and conduct is brought out clearly, without the slightest extenuation, while many noble acts and peculiar marks of favor are either omitted, or stated with far less force than by any other Evangelist. Indications of St. Peter's influence, even in St. Mark's style, much less pure than that of St. Luke, are traced by modern criticism.<sup>b</sup>

The only written documents which St. Peter has left, are the First Epistle, about which no doubt has ever been entertained in the Church; and the Second, which has both in early times, and in our own, been a subject of earnest controversy.

FIRST EPISTLE.—The external evidence of authenticity is of the strongest kind. Referred to in the Second Epistle (iii. 1); known to Polycarp, and frequently alluded to in his Epistle to the Philipians; recognized by Papias (ap. Euseb. *II. E.* iii. 39); repeatedly quoted by Irenæus, Clemens of Alexandria, Tertullian, and Origen; it was accepted without hesitation by the universal Church.<sup>c</sup> The internal evidence is equally strong. Schwegler the most reckless, and De Wette the most vacillating of modern critics, stand almost alone in their denial of its authenticity.

It was addressed to the churches of Asia Minor, which had for the most part been founded by St. Paul and his companions. Supposing it to have been written at Babylon (see above), it is a probable conjecture that Silvanus, by whom it was transmitted to those churches, had joined St. Peter after a tour of visitation, either in pursuance of instructions from St. Paul, then a prisoner at Rome, or in the capacity of a minister of high authority in the Church, and that his account of the condition of the Christians in those districts determined the Apostle to write the epistle. From the absence of personal salutations, and other indications, it may perhaps be inferred that St. Peter had not hitherto visited the churches; but it is certain that he was thoroughly acquainted both with their external circumstances and spiritual state. It is clear that Silvanus is not regarded by St. Peter as one of his own coadjutors, but as one whose personal character he had sufficient opportunity of appreciating (v. 12). Such a testimonial

as the Apostle gives to the soundness of his faith, would of course have the greatest weight with the Hebrew Christians, to whom the epistle appears to have been specially, though not exclusively addressed.<sup>d</sup> The assumption that Silvanus was employed in the composition of the epistle is not borne out by the expression, "by Silvanus, I have written unto you," such words according to ancient usage applying rather to the bearer than to the writer or amanuensis. Still it is highly probable that Silvanus, considering his rank, character, and special connection with those churches, and with their great Apostle and founder, would be consulted by St. Peter throughout, and that they would together read the epistles of St. Paul, especially those addressed to the churches in those districts: thus, partly with direct intention, partly it may be unconsciously, a Pauline coloring, amounting in passages to something like a studied imitation of St. Paul's representations of Christian truth, may have been introduced into the epistle. It has been observed above that there is good reason to suppose that St. Peter was in the habit of employing an interpreter; nor is there anything inconsistent with his position or character in the supposition that Silvanus, perhaps also St. Mark, may have assisted him in giving expression to the thoughts suggested to him by the Holy Spirit. We have thus at any rate, a not unsatisfactory solution of the difficulty arising from correspondences both of style and modes of thought in the writings of two Apostles who differed so widely in gifts and acquirements.<sup>e</sup>

The objects of the epistle, as deduced from its contents, coincide with these assumptions. They were: 1. To comfort and strengthen the Christians in a season of severe trial. 2. To enforce the practical and spiritual duties involved in their calling. 3. To warn them against special temptations attached to their position. 4. To remove all doubt as to the soundness and completeness of the religious system which they had already received. Such an attestation was especially needed by the Hebrew Christians, who were wont to appeal from St. Paul's authority to that of the elder Apostles, and above all to that of Peter. The last, which is perhaps the very principal object, is kept in view throughout the epistle, and is distinctly stated, ch. v. ver. 12.

These objects may come out more clearly in a brief analysis.

The epistle begins with salutations and general description of Christians (i. 1, 2), followed by a statement of their present privileges and future inheritance (3-5); the bearings of that statement upon their conduct under persecution (6-9); reference, according to the Apostle's wont, to proph

<sup>a</sup> Papias and Clem. Alex., referred to by Eusebius, *H. E.* ii. 15; Tertullian, *c. Marc.* iv. c. 5; Irenæus, *II.* i. and iv. 9. Petavius (on Epiphanius, p. 428) observes that Papias derived his information from John the Presbyter. For other passages see Fabricius (*Bibl. Gr.* tom. iii. 132). The slight discrepancy between Eusebius and Papias indicates independent sources of information.

<sup>b</sup> Gieseler, quoted by Davidson.

<sup>c</sup> No importance can be attached to the omission in the mutilated fragment on the Canon, published by Muratori. See Routh, *Reliq. Sac.* i. 396, and the note of Freindall, which Routh quotes, p. 424. Theodoros of Mopsuestia, a shrewd but rash critic, is said to have rejected all, or some, of the Catholic epistles; but the statement is ambiguous. See Davidson (*Int.* iii. 391), whose translation is incorrect.

<sup>d</sup> This is the general opinion of the ablest commentators. The ancients were nearly unanimous in holding that it was written for Hebrew converts. But several passages are evidently meant for Gentiles: *e. g.* i. 14, 18; ii. 9, 10; iii. 6; iv. 3. Reuss, an original and able writer, is almost alone in the opinion that it was addressed chiefly to Gentile converts (p. 133). He takes *παροικιοι* and *σκηνοπηγοι* as = *בְּנֵי אֲרָם*, Israelites by faith, not by ceremonial observance (*nicht nach dem Cultus*). See also Weiss, *Der petrinische Lehrbegriff.* p. 23, n. 2.

<sup>e</sup> The question has been thoroughly discussed by Hug, Ewald, Bertholdt, Welss, and other critics. The most striking resemblances are perhaps 1 Pet. i. 3, with Eph. i. 3; ii. 18, with Eph. vi. 5; iii. 1, with Eph. v. 22; and v. 5, with v. 21: but allusions nearly as distinct are found to the Romans, Corinthians, Colossians, Thessalonians, and 1 Philémon

uses concerning both the sufferings of Christ and the salvation of his people (10-12); exhortations based upon those promises to earnestness, sobriety, hope, obedience, and holiness, as results of knowledge of redemption, of atonement by the blood of Jesus, and of the resurrection, and as proofs of spiritual regeneration by the word of God. Peculiar stress is laid upon the cardinal graces of faith, hope, and brotherly love, each connected with and resting upon the fundamental doctrines of the Gospel (13-25). Abstinence from the spiritual sins most directly opposed to those graces is then enforced (ii. 1); spiritual growth is represented as dependent upon the nourishment supplied by the same Word which was the instrument of regeneration (2, 3); and then, by a change of metaphor, Christians are represented as a spiritual house, collectively and individually as living stones, and royal priests elect, and brought out of darkness into light (4-10). This portion of the epistle is singularly rich in thought and expression, and bears the peculiar impress of the Apostle's mind, in which Judaism is spiritualized, and finds its full development in Christ. From this condition of Christians, and more directly from the fact that they are thus separated from the world, pilgrims and sojourners, St. Peter deduces an entire system of practical and relative duties, self-control, care of reputation, especially for the sake of Gentiles; submission to all constituted authorities; obligations of slaves, urged with remarkable earnestness, and founded upon the example of Christ and his atoning death (11-25); and duties of wives and husbands (iii. 1-7). Then generally all Christian graces are commended, those which pertain to Christian brotherhood, and those which are especially needed in times of persecution, gentleness, forbearance, and submission to injury (8-17): all the precepts being based on imitation of Christ, with warnings from the history of the deluge, and with special reference to the baptismal covenant.

In the following chapter (iv. 1, 2) the analogy between the death of Christ and spiritual mortification, a topic much dwelt on by St. Paul, is urged with special reference to the sins committed by Christians before conversion, and habitual to the Gentiles. The doctrine of a future judgment is inculcated, both with reference to their heathen persecutors as a motive for endurance, and to their own conduct as an incentive to sobriety, watchfulness, fervent charity, liberality in all external acts of kindness, and diligent discharge of all spiritual duties, with a view to the glory of God through Jesus Christ (3-11).

This epistle appears at the first draught to have terminated here with the doxology, but the thought of the fiery trial to which the Christians were exposed stirs the Apostle's heart, and suggests additional exhortations. Christians are taught to rejoice in partaking of Christ's sufferings, being thereby assured of sharing his glory, which even in this life rests upon them, and is especially manifested in their innocence and endurance of persecution: judgment must come first to cleanse the house of God, then to reach the disobedient: suffering according to the will of God, they may commit their souls to Him in well doing as unto a faithful Creator. Faith and hope are equally conspicuous in these exhortations. The Apostle ben (v. 1-4) addresses the presbyters of the

churches, warning them as one of their own body as a witness (*μαρτυρος*) of Christ's sufferings, and partaker of future glory, against negligence, covetousness, and love of power: the younger members he exhorts to submission and humility, and concludes this part with a warning against their spiritual enemy, and a solemn and most beautiful prayer to the God of all grace. Lastly, he mentions Silvanus with special commendation, and states very distinctly what we have seen reason to believe was a principal object of the epistle, namely, that the principles inculcated by their former teachers were sound, the true grace of God, to which they are exhorted to adhere.<sup>a</sup> A salutation from the church in Babylon and from St. Mark, with a parting benediction, closes the epistle.

The harmony of such teaching with that of St. Paul is sufficiently obvious, nor is the general arrangement or mode of discussing the topics unlike that of the Apostle of the Gentiles; still the indications of originality and independence of thought are at least equally conspicuous, and the epistle is full of what the Gospel narrative and the discourses in the Acts prove to have been characteristic peculiarities of St. Peter. He dwells more frequently than St. Paul upon the future manifestation of Christ, upon which he bases nearly all his exhortations to patience, self-control, and the discharge of all Christian duties. There is not a shadow of opposition here, the topic is not neglected by St. Paul, nor does St. Peter omit the Pauline argument from Christ's sufferings; still what the Germans call the eschatological element predominates over all others. The Apostle's mind is full of one thought, the realization of Messianic hopes. While St. Paul dwells with most earnestness upon justification by our Lord's death and merits, and concentrates his energies upon the Christian's present struggles, St. Peter fixes his eyes constantly upon the future coming of Christ, the fulfillment of prophecy, the manifestation of the promised kingdom. In this he is the true representative of Israel, moved by those feelings which were best calculated to enable him to do his work as the Apostle of the circumcision. Of the three Christian graces hope is his special theme. He dwells much on good works, but not so much because he sees in them necessary results of faith, or the complement of faith, or outward manifestations of the spirit of love, aspects most prominent in St. Paul, St. James, and St. John, as because he holds them to be tests of the soundness and stability of a faith which rests on the fact of the resurrection, and is directed to the future in the developed form of hope.

But while St. Peter thus shows himself a genuine Israelite, his teaching is directly opposed to Judaizing tendencies. He belongs to the school, or, to speak more correctly, is the leader of the school, which at once vindicates the unity of the Law and the Gospel, and puts the superiority of the latter on its true basis, that of spiritual development. All his practical injunctions are drawn from Christian, not Jewish principles, from the precepts, example, life, death, resurrection, and future coming of Christ. The Apostle of the Circumcision says not a word in this epistle of the perpetual obligation, the dignity, or even the bearings of the Mosaic Law. He is full of the Old Testament; his style and thoughts are charged with its imagery, but he contemplates and applies its teaching in the light of the Gospel; he regards the privileges and glory of the ancient people of God entirely in their spiritual

<sup>a</sup> The reading *σήμερον* is in all points preferable to that of the *textus receptus*, *ἔσται κατὰ τὸ*.

development in the Church of Christ. Only one who had been brought up as a Jew could have had his spirit so impregnated with these thoughts; only one who had been thoroughly emancipated by the Spirit of Christ could have risen so completely above the prejudices of his age and country. This is a point of great importance, showing how utterly opposed the teaching of the original Apostles, whom St. Peter certainly represents, was to that Judaistic narrowness which speculative rationalism has imputed to all the early followers of Christ, with the exception of St. Paul. There are in fact more traces of what are called Judaizing views, more of sympathy with national hopes, not to say prejudices, in the epistles to the Romans and Galatians, than in this work. In this we see the Jew who has been born again, and exchanged what St. Peter himself calls the unbearable yoke of the Law for the liberty which is in Christ. At the same time it must be admitted that our Apostle is far from tracing his principles to their origin, and from drawing out their consequences with the vigor, spiritual discernment, internal sequence of reasoning, and systematic completeness which are characteristic of St. Paul.<sup>a</sup> A few great facts, broad solid principles on which faith and hope may rest securely, with a spirit of patience, confidence, and love, suffice for his unspeculative mind. To him objective truth was the main thing; subjective struggles between the intellect and spiritual consciousness, such as we find in St. Paul, and the intuitions of a spirit absorbed in contemplation like that of St. John, though not by any means alien to St. Peter, were in him wholly subordinated to the practical tendencies of a simple and energetic character. It has been observed with truth, that both in tone and in form the teaching of St. Peter bears a peculiarly strong resemblance to that of our Lord, in discourses bearing directly upon practical duties. The great value of the epistle to believers consists in this resemblance; they feel themselves in the hands of a safe guide, of one who will help them to trace the hand of their Master in both dispensations, and to confirm and expand their faith.

SECOND EPISTLE. — The Second Epistle of St. Peter presents questions of far greater difficulty than the former. There can be no doubt that, whether we consider the external or the internal evidence, it is by no means easy to demonstrate its genuineness. We have few references, and none of a very positive character, in the writings of the early Fathers; the style differs materially from that of the First Epistle, and the resemblance, amounting to a studied imitation, between this epistle and that of St. Jude, seems scarcely reconcilable with the position of St. Peter. Doubts as to its genuineness were entertained by the greatest critics of the early Church; in the time of Eusebius it was reckoned among the disputed books, and was not formally admitted into the Canon until the year 393, at the Council of Hippo. The opinion of critics of what is called the liberal school, including all shades from Lücke to Baur, has been decidedly

unfavorable, and that opinion has been adopted by some able writers in England. There are, however, very strong reasons why this verdict should be reconsidered. No one ground on which it rests is unassailable. The rejection of this book affects the authority of the whole Canon, which, in the opinion of one of the keenest and least scrupulous critics (Reuss) of modern Germany, is free from any other error. It is not a question as to the possible authorship of a work like that of the Hebrews, which does not bear the writer's name: this epistle must either be dismissed as a deliberate forgery, or accepted as the last production of the first among the Apostles of Christ. The Church, which for more than fourteen centuries has received it, has either been imposed upon by what must in that case be regarded as a Satanic device, or derived from its spiritual instruction of the highest importance. If received, it bears attestation to some of the most important facts in our Lord's history, casts light upon the feelings of the Apostolic body in relation to the elder church and to each other, and, while it confirms many doctrines generally inculcated, is the chief, if not the only, voucher for eschatological views touching the destruction of the framework of creation, which from an early period have been prevalent in the Church.

The contents of the epistle seem quite in accordance with its asserted origin.

The customary opening salutation is followed by an enumeration of Christian blessings and exhortation to Christian duties, with special reference to the maintenance of the truth which had been already communicated to the Church (i. 1-13). Referring then to his approaching death, the Apostle assigns as grounds of assurance for believers his own personal testimony as eye-witness of the transfiguration, and the sure word of prophecy, that is the testimony of the Holy Ghost (14-21). The danger of being misled by false prophets is dwelt upon with great earnestness throughout the second chapter, their covetousness and gross sensuality combined with pretences to spiritualism, in short all the permanent and fundamental characteristics of Antinomianism, are described, while the overthrow of all opponents of Christian truth is predicted (ii. 1-29) in connection with prophecies touching the second advent of Christ, the destruction of the world by fire, and the promise of new heavens and a new earth wherein dwelleth righteousness. After an exhortation to attend to St. Paul's teaching, in accordance with the less explicit admonition in the previous epistle and an emphatic warning, the epistle closes with the customary ascription of glory to our Lord and Saviour Jesus Christ.

We may now state briefly the answers to the objections above stated.

1. With regard to its recognition by the early church, we observe that it was not likely to be quoted frequently; it was addressed to a portion of the church not at that time much in intercourse with the rest of Christendom:<sup>b</sup> the documents of the primitive church are far too scanty to give weight to the argument (generally a questionable

<sup>a</sup> Thus Reuss, *Pierre n'a pas de système*. See also Strickner and Weiss, pp. 14, 17.

<sup>b</sup> Ritsehl's observations on the Epistle of St. James are at least equally applicable to this. It would be, comparatively speaking, little known to Gentile converts, while the Jewish party gradually died out, and was not at any time mixed up with the general move-

ment of the church. The only literary documents of the Hebrew Christians were written by Ebionites, to whom this epistle would be most distasteful. Had the book not been supported by strong external credentials, its general reception or circulation seem not accountable.

one) from omission. Although it cannot be proved to have been referred to by any author earlier than Origen, yet passages from Clement of Rome, Irenaeus, Justin Martyr, Theophilus of Antioch, and Irenaeus, suggest an acquaintance with this epistle; <sup>a</sup> to these may be added a probable reference in the Martyrdom of Ignatius, quoted by Westcott (*On the Canon*, p. 87), and another in the Apology of Melito, published in Syriac by Dr. Cureton. It is also distinctly stated by Eusebius, *H. E.* vi. 14, and by Photius, cod. 109, that Clement of Alexandria wrote a commentary on all the disputed epistles, in which this was certainly included. It is quoted twice by Origen, but unfortunately in the translation of Rufinus, which cannot be relied upon. Didymus refers to it very frequently in his great work on the Trinity. It was certainly included in the collection of Catholic Epistles known to Eusebius and Origen, a very important point made out by Olshausen (*Opuscula Theol.* p. 29). It was probably known in the third century in different parts of the Christian world: in Cappadocia to Firmilian, in Africa to Cyprian, in Italy to Hippolytus, in Phœnicia to Methodius. A large number of passages has been collected by Dietlein, which, though quite insufficient to prove its reception, add somewhat to the probability that it was read by most of the early Fathers. The historical evidence is certainly inconclusive, but not such as to require or to warrant the rejection of the epistle. The silence of the Fathers is accounted for more easily than its admission into the Canon after the question as to its genuineness had been raised. It is not conceivable that it should have been received without positive attestation from the churches to which it was first addressed. We know that the autographs of Apostolic writings were preserved with care. It must also be observed that all motive for forgery is absent. This epistle does not support any hierarchical pretensions, nor does it bear upon any controversies of a later age.

2. The difference of style may be admitted. The only question is, whether it is greater than can be satisfactorily accounted for, supposing that the Apostle employed a different person as his amanuensis. That the two epistles could not have been composed and written by the same person is a point scarcely open to doubt. Olshausen, one of the fairest and least prejudiced of critics, points out eight discrepancies of style, some perhaps unimportant, but others almost conclusive, the most important being the appellations given to our Saviour, and the comparative absence of references to the Old Testament in this epistle. If, however, we admit that some time intervened between the composition of the two works, that in writing the first the Apostle was aided by Silvanus, and in the second by another, perhaps St. Mark, that the circumstances of the churches addressed by him were considerably changed, and that the second was written in greater haste, not to speak of a possible

decay of faculties, the differences may be regarded as insufficient to justify more than hesitation in admitting its genuineness. The resemblance to the Epistle of St. Jude may be admitted without affecting our judgment unfavorably. Supposing, as some eminent critics have believed, that this epistle was copied by St. Jude, we should have the strongest possible testimony to its authenticity; <sup>b</sup> but if, on the other hand, we accept the more general opinion of modern critics, that the writer of this epistle copied St. Jude, the following considerations have great weight. It seems quite incredible that a forger, personating the chief among the Apostles, should select the least important of all the Apostolical writings for imitation; whereas it is probable that St. Peter might choose to give the stamp of his personal authority to a document bearing so powerfully upon practical and doctrinal errors in the churches which he addressed. Considering, too, the characteristics of our Apostle, his humility, his impressionable mind, so open to personal influences, and his utter forgetfulness of self when doing his Master's work, we should hardly be surprised to find that part of the epistle which treats of the same subjects colored by St. Jude's style. Thus in the First Epistle we find everywhere, especially in dealing with kindred topics, distinct traces of St. Paul's influence. This hypothesis has moreover the advantage of accounting for the most striking, if not all the discrepancies of style between the two epistles.

3. The doubts as to its genuineness appear to have originated with the critics of Alexandria, where, however, the epistle itself was formally recognized at a very early period. Those doubts, however, were not quite so strong as they are now generally represented. The three greatest names of that school may be quoted on either side. On the one hand there were evidently external credentials, without which it could never have obtained circulation; on the other, strong subjective impressions, to which these critics attached scarcely less weight than some modern inquirers. They rested entirely, so far as can be ascertained, on the difference of style. The opinions of modern commentators may be summed up under three heads. Many, as we have seen, reject the epistle altogether as spurious, supposing it to have been directed against forms of Gnosticism prevalent in the early part of the second century. A few <sup>c</sup> consider that the first and last chapters were written by St. Peter or under his dictation, but that the second chapter was interpolated. So far, however, is either of these views from representing the general results of the latest investigations, that a majority of names, <sup>d</sup> including nearly all the writers of Germany opposed to Rationalism, who in point of learning and ability are at least upon a par with their opponents, may be quoted in support of the genuineness and authenticity of this epistle. The statement that all critics of eminence and impar-

<sup>a</sup> The passages are quoted by Guerike, *Einleitung*, p. 462.

<sup>b</sup> See Dr. Wordsworth's Commentary on 2 Peter. His chief ground is that St. Peter predicts a state of affairs which St. Jude describes as actually existing. A very strong ground, admitting the authenticity of both epistles.

<sup>c</sup> E. g. Bunsen, Ullmann, and Lange.

<sup>d</sup> This account is not accurate. Bunsen regards as genuine only 2 Pet. i. 1-11, with the doxology at the end of the epistle. He supposes this very short letter

to be really the first Epistle of Peter, and to be referred to in 1 Pet. v. 12 (*Bibelwerk*, viii. 581-584; *Hippolytus and his Age*, 2d ed., i. 24 f.). Ullmann considers only the first chapter genuine (*Der 2e Brief Petri kritisch untersucht*, Heidelb. 1821). Lange supposes the interpolation to extend from 2 Pet. i. 20 to iii. 2, inclusive (art. *Petrus, der Apostel*, in *Herzog's Real-Encykl.* xi. 437).

<sup>e</sup> Nitzsche, Flatt, Dahlman [Jahl?], Windischmann, Heydenreich, Guerike, Pott, Augusti, Olshausen, Thiersch, Stier, and Dietlein.

Malice concur in rejecting it is simply untrue, unless it be admitted that a belief in the reality of objective revelation is incompatible with critical impartiality, that belief being the only common point between the numerous defenders of the canonicity of this document. If it were a question now to be decided for the first time upon the external or internal evidences still accessible, it may be admitted that it would be far more difficult to maintain this than any other document in the New Testament; but the judgment of the early church is not to be reversed without far stronger arguments than have been adduced, more especially as the epistle is entirely free from objections which might be brought, with more show of reason, against others now all but universally received: inculcating no new doctrine, bearing on no controversies of post-apostolical origin, supporting no hierarchical innovations, but simple, earnest, devout, and eminently practical, full of the characteristic graces of the Apostle, who, as we believe, bequeathed this last proof of faith and hope to the Church.

Some Apocryphal writings of very early date obtained currency in the Church as containing the substance of the Apostle's teaching. The fragments which remain are not of much importance, nor could they be conveniently discussed in this notice. The preaching (*κήρυγμα*) or doctrine (*διδάχνη*) of Peter,<sup>a</sup> probably identical with a work called the Preaching of Paul, or of Paul and Peter, quoted by Lactantius, may have contained some traces of the Apostle's teaching, if, as Grabe, Ziegler, and others supposed, it was published soon after his death. The passages, however, quoted by Clement of Alexandria are for the most part wholly unlike St. Peter's mode of treating doctrinal or practical subjects.<sup>b</sup> Another work, called the Revelation of Peter (*ἀποκάλυψις Πέτρου*), was held in much esteem for centuries. It was commented on by Clement of Alexandria, quoted by Theodotus in the *Eclogia*, named together with the Revelation of St. John in the Fragment on the Canon published by Muratori (but with the remark, "quam quidam ex nostris legi in Ecclesia nolunt"), and according to Sozomen (*E. II. vii. 19*) was read once a year in some churches of Palestine. It is said, but not on good authority, to have been preserved among the Coptic Christians. Eusebius looked on it as spurious, but not of heretic origin. From the fragments and notices it appears to have consisted chiefly of denunciations against the Jews, and predictions of the fall of Jerusalem, and to have been of a wild fanatical character. The most complete account of this curious work is given by Lücke in his general introduction to the *Revelation of St. John*, p. 47.

The legends of the Clementines are wholly devoid of historical worth; but from those fictions originating with an obscure and heretical sect, have been derived some of the most mischievous speculations of modern rationalists, especially as regards

<sup>a</sup> The two names are believed by critics — *i. e.* Cave, Grabe, Ittig, Mill, etc. — to belong to the same work. (See Schliemann, *Die Clementinen*, p. 253.)

<sup>b</sup> Rufinus and Jerome allude to a work which they call "judicium Petri;" for which Cave (Grabe) accounts by a happy conjecture, adopted by Nitzsche, Mayerhoff, Reuss, and Schliemann, that Rufinus found *πρω* for *κήρυγμα*, and read *κρίμα*.

\* Hilgenfeld supposes that the book referred to by Rufinus as "Dux Vire vel Judicium Petri" is identical

with the assumed antagonism between St. Paul and the earlier Apostles. It is important to observe, however, that in none of these spurious documents, which belong undoubtedly to the two first centuries, are there any indications that our Apostle was regarded as in any peculiar sense connected with the church or of Rome, or that he exercised or claimed any authority over the apostolic body, of which he was the recognized leader or representative. F. C. C.

[*ΚΗΦΙΑΣ* (*Κηφᾶς*) occurs in the following passages: John i. 42; 1 Cor. i. 12, iii. 22, ix. 5, xv. 5; Gal. ii. 9, i. 18, ii. 11, 14 (the last three according to the text of Lachmann and Tischendorf).]

Cephas is the Chaldee word *Cepha*, כֶּפֶה, itself a corruption of, or derivation from, the Hebrew *Ceph*, כֶּף, "a rock," a rare word, found only in Job xxx. 6, and Jer. iv. 29. It must have been the word actually pronounced by our Lord in Matt. xvi. 18, and on subsequent occasions when the Apostle was addressed by Him or other Hebrews by his new name. By it he was known to the Corinthian Christians. In the ancient Syriac version of the N. T. (*Peshito*), it is uniformly found where the Greek has *Petros*. When we consider that our Lord and the Apostles spoke Chaldee, and that therefore (as already remarked) the Apostle must have been always addressed as Cephas, it is certainly remarkable that throughout the Gospels, no less than 97 times, with one exception only, the name should be given in the Greek form, which was of later introduction, and unintelligible to Hebrews, though intelligible to the far wider Gentile world among which the Gospel was about to begin its course. Even in St. Mark, where more Chaldee words and phrases are retained than in all the other Gospels put together, this is the case. It is as if in our English Bibles the name were uniformly given, not Peter, but Rock; and it suggests that the meaning contained in the appellation is of more vital importance, and intended to be more carefully seized at each recurrence, than we are apt to recollect. The commencement of the change from the Chaldee name to its Greek synonym is well marked in the interchange of the two in Gal. ii. 7, 8, 9 (Stanley, *Apostolic Age*, pp. 116, 117.)]

\* *Literature.* — On the much debated question of St. Peter's residence in Rome, it may be sufficient to name the work of Ellendorf, *Ist Petrus in Rom u. Bischof d. röm. Kirche gewesen?* Darmstadt, 1841, trans. in the *Bibl. Sacra* for July, 1858, and Jan. 1859; and, on the other side, *Dux alle Gespenst . . . neu aufgeführt von J. Ellendorf . . . beschworen durch einen römischen Exorcisten* [A. J. Binterim], Düsseldorf, 1842. On this question, and on the life of Peter in general, one may also consult Schaff's *Hist. of the Apostolic Church* (N. Y. 1854), pp. 348-374.

tical with one which has been repeatedly published (*e. g.* by Bickell in his *Gesch. des Kirchenrechts* Glessen, 1843) as *Αἱ διαταγαὶ αἱ κλήμεντος καὶ κανόνες ἐκκλησιαστικοὶ τῶν ἁγίων ἀποστόλων*, and has edited it as such in his *Nov. Test. extra Canonem receptum*, Fasc. iv. (Lips. 1863), pp. 93-106. This document has much in common with Book vii. cc. 1-20 of the Apostolical Constitutions and the last 4 chapters of the epistle ascribed to Barnabas. A.

For the literature of the subject, see Gieseler's *Ecl. Hist.* vol. i. § 27, and Winer's *Realwörterb.* art. *Petrus*.

On the critical questions concerning the epistles of Peter, the following works may be mentioned, in addition to the various Introductions to the New Test. (De Wette, Credner, Reuss, Bleek, Davidson, Guericke, etc.), works on the history of the Apostolic and post-Apostolic Church (Neander, Baur, Schwegler, Thiersch, Lange, Schaff, etc.), and the Commentaries: E. T. Mayerhoff, *Hist. crit. Einleitung in die petrinischen Schriften*, Hamb. 1835. F. Windischmann (Cath.), *Vindiciæ Petrinæ*, Ratisb. 1836. Arts. in the *Theol. Stud. u. Krit.* by Seyler (1832, pp. 44-70) and Bleek (1836, pp. 1021-1072). Baur, *Der erste petrinische Brief*, in the *Theol. Jahrb.* 1856, pp. 193-240. "J. Q." On the *Epistles of Peter*, two elaborate arts. in *Kitto's Journal of Sacred Literature* for Jan. and July, 1861, the latter relating to the 2d Epistle, and the apocryphal writings ascribed to Peter. B. Weiss, *Die petrinische Frage*, in the *Theol. Stud. u. Krit.* for 1865, pp. 619-657 (1st Epist.), and 1866, pp. 255-308 (2d Epist.). E. R. Rauch, *Rettung der Originalität des ersten Briefes des Ap. Petrus*, in Winer's *Neues krit. Journ. d. theol. Lit.* (1828), viii. 385-442. E. Lecoultre, *Sur la prem. ép. de Pierre*, Gen. 1839.

On the Second Epistle of Peter in particular, see F. A. L. Nietzsche, *Ep. Petri posterior Auctori suo vindicata*, Lips. 1785. C. C. Flatt, *Genuina secunde Ep. Petri origo denuo defenditur*, Tub. 1806. J. C. W. Dahl, *De ἀδελφία Ep. Petr. posterioris atque Judæ*, Rost. 1807, 4to. (Pro.) E. A. Richter, *De Origine poster. Ep. Petri ex Ep. Judæ repetenda*, Vit. 1810, 4to. Ullmann, see note b, p. 2459. H. Olshausen, *De Integ. et Authent. posterioris Petri Epist.*, Regiom. 1822-23, 4to, reprinted in his *Opusc. Acad.*, and translated, with an introduction, by B. B. Edwards in the *Bibl. Repository* for July and Oct. 1836 (vol. viii.). E. Moutier, *La 2<sup>e</sup> ép. de P. et celle de Jude sont authentiques*, Strasb. 1829. P. E. Picot, *Recherches sur la 2<sup>e</sup> ép. de Pierre*, Gen. 1829. (Pro.) J. A. Delille, *Authenticité de la 2<sup>e</sup> ép. de Pierre*, Strasb. 1835. (Pro.) H. Magnus, *Excm. de l'authenticité de la 2<sup>e</sup> ép. de Pierre*, Strasb. 1835. (Con.) A. L. C. Heydenreich, *Ein Wort zur Vertheidigung l. Aechtheit des 2<sup>en</sup> Br. Petri*, Herborn, 1837. L. Audemars, *La 2<sup>e</sup> ép. de Pierre*, Gen. 1838. (Con.) A. L. Daumas, *Introd. crit. à la 2<sup>e</sup> ép. de P.* Strasb. 1845. (Con.)

For references to the more important general commentaries which include the Epistles of Peter, see the article JOHN, FIRST EPISTLE OF, vol. ii. p. 1441 a. Among the special commentaries, passing by earlier works, we may notice those of Semler, *Paraphrasis*, etc. in *Ep. I. Petri*, Hal. 1783; in *Ep. II. Petri et Ep. Judæ*, ibid. 1784. Morus, *Prælect.* in *Jac. et Petri Epp.*, Lips. 1794. C. G. Hensler, *Der 1<sup>e</sup> Br. Petri übers., mit einem Kommentar*, Sulzb. 1813. J. J. Hottinger, *Epp. Jacobi et Petri I. cum Vers. Germ. et Comm. Lat.*, Lips. 1815. W. Steiger, *Der erste Brief Petri . . . ausgelegt*, Berl. 1832, trans. by P. Fairbairn, 2 vols. Edinb. 1836 (*Bibl. Cab.* vols. xiii., tiv.). Wiesinger, *Der 1<sup>e</sup> Br. d. Ap. Petrus erklärt*, Königsb. 1856, and *Der 2<sup>e</sup> Br. d. Petrus u. d. Br. d. Judas*, ibid. 1862 (Bd. vi. Abth. 2 and 3 of Olshausen's *Bibl. Comm.*). T. Schott, *Der 1<sup>e</sup> Brief Petri erklärt*, Erlang. 1861, and *Der 2<sup>e</sup> Br. P. u. d. Br. Judä erklärt*, ibid. 1863. De

Wette, *Kurze Erkl. der Briefe des Petrus, Judas u. Jacobus*, 3<sup>e</sup> Ausg. bearb. von B. Brückner Leipzig. 1865 (Bd. iii. Abth. i. of his *Exeg. Handb.*). J. E. Huther, *Krit. exeg. Handb. üb. d. 1. Brief des Petrus, den Br. d. Judas, u. d. 2. Br. d. Petrus*, 3d ed. Götting. 1867 (Abth. xii. of Meyer's *Kommentar*). Fronmüller, *Die Briefe Petri u. d. Br. Judä, theol.-homilet. bearbeitet*, 2<sup>e</sup> Aufl. Bielefeld, 1861 (Theil xiv. of Lange's *Bibelwerke*); translated, with additions, by J. I. Mombert, N. Y. 1867, as part of vol. ix. of Lange's *Commentary*, edited by Dr. Schaff. W. O. Dietlein, *Der 2<sup>e</sup> Br. Petri*, Berl. 1851. (Uncritical.) F. Steinfass, *Der 2<sup>e</sup> Br. d. Ap. Petrus*, Rost. 1863. In English, we also have Abp. Leighton's *Practical Commentary on the First Ep. of Peter*, in numerous editions (highly esteemed); Barnes's *Notes (Epistles of James, Peter, John, and Jude*, N. Y. 1847); John Brown, *Expos. Discourses on the First Epistle of St. Peter*, 2d ed. 2 vols. Edinb. 1849, 8vo (reprinted in 1 vol., N. Y.); J. F. Demarest, *Trans. and Exposition of the First Ep. of Peter*, N. Y. 1851; *Comm. on the Second Ep. of Peter*, N. Y. 1865; and Dr. John Lillie, *Lectures on the First and Second Epistles of Peter*, N. Y. 1869, embracing a new translation of the epistles, and a commentary both critical and practical. Of the commentaries named above the most valuable are those of De Wette, Huther, and Wiesinger. See further the literature referred to under JUDE, EPISTLE OF.

On the doctrine of the epistles of Peter, in addition to the works on Biblical theology by Neander Reuss, Lutterbeck, Messner, Schmid, Lechler, and Baur, referred to under JOHN, GOSPEL OF, vol. ii. p. 1439 a, see B. Weiss, *Der petrinische Lehrbegriff*, Berl. 1855, 8vo, and the review by Baur in the *Theol. Jahrb.* 1856; also G. F. Simon, *Étude dogm. sur S. Pierre*, Strasb. 1858.

On the apocryphal writings ascribed to Peter one may consult Fabricius, *Cod. apocr. Novi Testamenti* (ed. 2da, 1719); Grabe's *Spicilegium*, vol. i. (ed. alt. 1714); Tischendorf's *Actu Apostolorum Apocrypha* (1851); and Hilgenfeld's *Novum Test. extra Canonem receptum*, Fasc. iv. (1866). Credner's speculations about the Gospel of Peter in his *Beiträge zur Einl. in die bibl. Schriften*, Bd. i. (1832), are completely demolished by Mr. Norton, in a Note to vol. i. of his *Genuineness of the Gospels*, 1st ed. (Bost. 1837), pp. ccxxxiii.-cclv. (not reprinted in the 2d ed. of that work). A.

**PETHAHIAH** (פֶּתְחִיָּאֵה; פֶּתְחִיָּאֵה; פֶּתְחִיָּאֵה; Alex. φεθεΐα; Pheteia). I. A priest, over the 19th course in the reign of David (1 Chr. xxiv. 16).

2. (φεθεΐα; [Vat. φαθαΐα; Alex. φεθεΐα; FA. φααΐα:] Phatai. Phathahia.) A Levite in the time of Ezra, who had married a foreign wife (Ezr. x. 23). He is probably the same who, with others of his tribe, conducted the solemn service on the occasion of the fast, when "the seed of Israel separated themselves from all strangers" (Neh. ix. 5), though his name does not appear among those who sealed the covenant (Neh. x.).

3. (φαθαΐα; [Vat. Παθαΐα; FA. Παθεΐα:] Fathahia.) The son of Meshezabael and descendant of Zerach the son of Judah (Neh. xi. 24), who was "at the king's hand in all matters concerning the people." The "king" here is explained by Rashi to be Darius: "he was an associate in the counsel of the king Darius for all matters affecting the people, to speak to the king concerning them."

**PETHOR** (פֶּתוֹר: *φαιθουρά*; [Alex. Βαθουρα: *ariolum*; in Deut., LXX. and Vulg. om.]), a town of Mesopotamia where Balaam resided (Num. xxi. 5; Deut. xxiii. 4). Its position is wholly unknown. W. L. B.

**PETHU'EL** (פֶּתוּאֵל: *Βαθουήλ: Phatuel*). The father of the prophet Joel (Joel i. 1).

\* The prophet's name was not uncommon (JOEL), and the addition of the father's name distinguished him from others who bore it. The name is probably = פֶּתוּאֵל, *man of God* (Fürst, Ges.). H.

**PEUL'THAI** [3 syl.] (פְּעוּלְתַי: [*wages of Jehovah*]: *φελαιθί*; Alex. *φολλαθί: Phollathi*). Properly "Peullethai;" the eighth son of Obed-edom (1 Chr. xxvi. 5).

**PHA'ATH MO'AB** [Vat.] *φθαλει Μωαβεις*; [Rom.] Alex. *φωαθ Μωαβ: Phocmo*), 1 Esdr. v. 11 = **PAHATH MOAB**. In this passage the number (2812) agrees with that in Ezra and disagrees with Nehemiah.

**PHACA'RETH** (φαχαρέθ; Alex. *φακαρεθ: Sachareth*) = **POCHERETH** of Zebaim (1 Esdr. v. 34).

**PHAI'SUR** [2 syl.] (φαισούρ; Alex. *φαισου: Fosere*). PASHUR, the priestly family (1 Esdr. ix. 22).

**PHALDAI'US** [3 syl.] (φαλδαίος; [Vat. *φαλδαίος*]: *Faldetus*) = **PEDAIAH** 4 (1 Esdr. ix. 44).

**PHALE'AS** [properly **PHAL'AS**] (φαλαίος; *Hellu*) = **PADON** (1 Esdr. v. 29).

**PHALEC** (φάλεκ [or *φάλεκ*, Elz., Tisch.]: *Phaleg*). PELEG the son of Eber (Luke iii. 35).

**PHAL'LU** (פְּחַלְלִי: [*distinguished*]: *φάλλος*; Alex. *φάλλουδ: Phallu*). Pallu the son of Reuben is so called in the A. V. of Gen. xli. 9.

**PHAL'TI** (פְּחַלְתִּי: [*deliverance of Jehovah*]: *φάλτι*; [Vat. *φάλτε:*] *Phalti*). The son of Laish of Gallim, to whom Saul gave Michal in marriage after his mad jealousy had driven David forth as an outlaw (1 Sam. xv. 44). In 2 Sam. iii. 15 he is called **PHAL'TIEL**. Ewald (*Gesch.* iii. 129) suggests that this forced marriage was a piece of policy on the part of Saul to attach Phalti to his house. With the exception of this brief mention of his name, and the touching little episode in 2 Sam. iii. 16, nothing more is heard of Phalti. Michal is there restored to David. "Her husband went with her along weeping behind her to Bahurim," and there, in obedience to Abner's abrupt command, "Go, return," he turns and disappears from the scene.

**PHAL'TIEL** (פְּחַלְתִּיֵּל: [*deliverance of Jehovah*]: *φάλτιήλ*; *Phaltiel*). The same as **PHAL'TI** (2 Sam. iii. 15).

**PHANU'EL** (φανουήλ: *Phanuel*). The father of Anna, the prophetess of the tribe of Aser (Luke ii. 36).

**PHAR'ACIM** (φαρακέμ: Alex. *φαρακειμ: Fanon*). The "sons of Pharaacia." were among the servants of the Temple who returned with Zerubbabel, according to the list in 1 Esdr. v. 31. No corresponding name is found in the parallel narratives of Ezra and Nehemiah.

**PHA'RAOH** [pron. *fá'ro*] (פַּרְעֹה: *φαραώ: Pharao*), the common title of the native kings of Egypt in the Bible, corresponding to P-RA or PH-RA, "the Sun," of the hieroglyphics. This identification, respecting which there can be no doubt, is due to the Duke of Northumberland and General Felix (Rawlinson's *Herod.* ii. 293). It has been supposed that the original was the same as the Coptic **οτρο** "the king," with the article, **πιοτρο, φοτρο**; but this word appears not to have been written, judging from the evidence of the Egyptian inscriptions and writings, in the times to which the Scriptures refer. The conjecture arose from the idea that Pharaoh must signify, instead of merely implying, "king," a mistake occasioned by a too implicit confidence in the exactness of ancient writers (Joseph. *Ant.* viii. 6, § 2; Euseb. ed. Scal. p. 20, v. 1).

By the ancient Egyptians the king was called "the Sun," as the representative on earth of the god RA, or "the Sun." It was probably on this account that more than one of the Pharaohs bear in the nomen, in the second royal ring, the title "ruler of Heliopolis," the city of Ra, HAK-AN, as in the case of Rameses III., a distinction shared, though in an inferior degree, if we may judge from the frequency of the corresponding title, by Thebes, but by scarcely any other city.<sup>a</sup> One of the most common regal titles, that which almost always precedes the nomen, is "Son of the Sun," SA-RA. The prenominal, in the first royal ring, regularly commences with a disc, the character which represents the sun, and this name which the king took on his accession, thus comprises the title Pharaoh: for instance, the prenominal of Psammithichus II., the successor of Necho, is RA-NUFR-HAT, "Pharaoh" or "Ra of the good heart." In the period before the Vith dynasty, when there was but a single ring, the use of the word RA was not invariable, many names not commencing with it, as SHUFU or KHUFU, the king of the IVth dynasty who built the Great Pyramid. It is difficult to determine, in rendering these names, whether the king or the divinity be meant: perhaps in royal names no distinction is intended, both Pharaoh and Ra being meant.

The word Pharaoh occurs generally in the Bible and always in the Pentateuch, with no addition, for the king of Egypt. Sometimes the title "king of Egypt" follows it, and in the cases of the last two native kings mentioned, the proper name is added, Pharaoh-Necho, Pharaoh-Hophra, with sometimes the further addition "king (or the king) of Egypt." It is remarkable that Shishak and Zerah (if, as we believe, the second were a king of Egypt), and the Ethiopians So and Tirhakah, are never distinctly called Pharaoh (the mention of a Pharaoh during the time of the Ethiopians probably referring to the Egyptian Sethos), and that the latter were foreigners and the former of foreign extraction.

As several kings are only mentioned by the title "Pharaoh" in the Bible, it is important to endeavor to discriminate them. We shall therefore here state what is known respecting them in order,

<sup>a</sup> The kings who bear the former title are chiefly of the name Rameses, "Born of Ra," the god of Heliopolis, which renders the title especially appropriate.

adding an account of the two Pharaohs whose proper names follow the title.

1. *The Pharaoh of Abraham.* — The Scripture narrative does not afford us any clear indications for the identification of the Pharaoh of Abraham. At the time at which the patriarch went into Egypt, according to Hales's as well as Ussher's chronology, it is generally held that the country, or at least Lower Egypt, was ruled by the Shepherd kings, of whom the first and most powerful line was the XVth dynasty, the undoubted territories of which would be first entered by one coming from the east. Manetho relates that Salatis, the head of this line, established at Avaris, the Zoan of the Bible, on the eastern frontier, what appears to have been a great permanent camp, at which he resided for part of each year. [ZOAN.] It is noticeable that Sarah seems to have been taken to Pharaoh's house immediately after the coming of Abraham; and if this were not so, yet, on account of his flocks and herds, the patriarch could scarcely have gone beyond the part of the country which was always more or less occupied by nomad tribes. It is also probable that Pharaoh gave Abraham camels, for we read, that Pharaoh "entreated Abram well for Sarah's sake: and he had sheep, and oxen, and he asses, and menservants, and maidservants, and she asses, and camels" (Gen. xii. 16), where it appears that this property was the gift of Pharaoh, and the circumstance that the patriarch afterwards held an Egyptian bondswoman, Hagar, confirms the inference. If so, the present of camels would argue that this Pharaoh was a Shepherd king, for no evidence has been found in the sculptures, paintings, and inscriptions of Egypt, that in the Pharaonic ages the camel was used, or even known there,<sup>a</sup> and this omission can be best explained by the supposition that the animal was hateful to the Egyptians as of great value to their enemies the Shepherds.

The date at which Abraham visited Egypt (according to the chronology we hold most probable), was about B. C. 2081, which would accord with the time of Salatis, the head of the XVth dynasty, according to our reckoning.

2. *The Pharaoh of Joseph.* — The history of Joseph contains many particulars as to the Pharaoh whose minister he became. We first hear of him as the arbitrary master who imprisoned his two servants, and then, on his birthday-feast, reinstated the one and hanged the other. We next read of his dreams, how he consulted the magicians and wise men of Egypt, and on their failing to interpret them, by the advice of the chief of the cup-bearers, sent for Joseph from the prison, and after he had heard his interpretation and counsel, chose him as governor of the country, taking, as it seems, the advice of his servants. The sudden advancement of a despised stranger to the highest place under the king is important as showing his absolute power and manner of governing. From this time we read more of Joseph than of Pharaoh. We are told, however, that Pharaoh liberally received Joseph's kindred, allowing them to dwell in the land of Goshen, where he had cattle. The last mention of a Pharaoh in Joseph's history is in the account of the death and burial of Jacob. It has been supposed from the following passage that the

position of Joseph had then become changed. "Joseph spake unto the house of Pharaoh, saying, If now I have found grace in your eyes, speak, I pray you, in the ears of Pharaoh, saying, My father made me swear, saying, Lo, I die: in my grave which I have digged for me in the land of Canaan, there shalt thou bury me. Now therefore let me go up, I pray thee, and bury my father, and I will come again. And Pharaoh said, Go up and bury thy father, according as he made thee swear" (Gen. i. 4-6). The account of the embalming of Jacob, in which we are told that "Joseph commanded his servants the physicians to embalm his father" (ver 2), shows the position of Joseph, which is more distinctly proved by the narrative of the subsequent journey into Palestine. "And Joseph went up to bury his father: and with him went up all the servants of Pharaoh, the elders of his house, and all the elders of the land of Egypt, and all the house of Joseph, and his brethren, and his father's house: only their little ones, and their flocks, and their herds, they left in the land of Goshen. And there went up with him both chariots and horsemen: and it was a very great company" (7-9). To make such an expedition as this, with perhaps risk of a hostile encounter, would no doubt require special permission, and from Joseph's whole history we can understand that he would have hesitated to ask a favor for himself, while it is most natural that he should have explained that he had no further motive in the journey. The fear of his brethren that after their father's death he would take vengeance on them for their former cruelty, and his declaration that he would nourish them and their little ones, prove he still held a high position. His dying charge does not indicate that the persecution had then commenced, and that it had not seems quite clear from the narrative at the beginning of Exodus. It thus appears that Joseph retained his position until Jacob's death; and it is therefore probable, nothing being stated to the contrary, that the Pharaoh who made Joseph governor was on the throne during the time that he seems to have held office, twenty-six years. We may suppose that the "new king" "which knew not Joseph" (Ex. i. 8) was head of a new dynasty. It is very unlikely that he was the immediate successor of this Pharaoh, as the interval from the appointment of the governor to the beginning of the oppression was not less than eighty years, and probably much more.

The chief points for the identification of the line to which this Pharaoh belonged, are that he was a despotic monarch, ruling all Egypt, who followed Egyptian customs, but did not hesitate to set them aside when he thought fit; that he seems to have desired to gain complete power over the Egyptians; and that he favored strangers. These particulars certainly appear to lend support to the idea that he was an Egyptianized foreigner rather than an Egyptian; and M. Mariette's recent discoveries at Zoan, or Avaris, have positively settled what was the great difficulty to most scholars in the way of this view, for it has been ascertained that the Shepherds, of at least one dynasty, were so thoroughly Egyptianized that they executed monuments of an Egyptian character, differing alone in a peculiarity of style. Before, however, we state the main heads of argument in favor of the idea that the Pharaoh of Joseph was a Shepherd, it will be well to mention the grounds of the theories that make him an Egyptian. Baron Bunsen supposed that he was

<sup>a</sup> It has been erroneously asserted that a hieroglyphic representing the head and neck of the camel is found on the Egyptian monuments.

**Sesertesen I.**, the head of the XIIth dynasty, on account of the mention in a hieroglyphic inscription of a famine in that king's reign. This identification, although receiving some support from the statement of Herodotus, that Sesostris, a name reasonably traceable to Sesertesen, divided the land and raised his chief revenue from the rent paid by the holders, must be abandoned, since the calamity recorded does not approach Joseph's famine in character, and as the age is almost certainly too remote. According to our reckoning this king began to reign about B. C. 2080, and Baron Bunsen places him much earlier, so that this idea is not tenable, unless we take the long chronology of the Judges, and hold the sojourn in Egypt to have lasted 430 years. If we take the Rabbinical date of the Exodus, Joseph's Pharaoh would have been a king of the XVIIIth dynasty, unless, with Bunsen, we lengthen the Hebrew chronology before the Exodus as arbitrarily as, in adopting that date, we shorten it after the Exodus. To the idea that this king was of the XVIIIth dynasty there is this objection, which we hold to be fatal, that the monuments of that line, often recording the events of almost every year, present no trace of the remarkable circumstances of Joseph's rule. Whether we take Ussher's or Hales's date of the Exodus, Joseph's government would fall before the XVIIIth dynasty, and during the Shepherd period. (By the Shepherd period is generally understood the period after the XIIth dynasty and before the XVIIIth, during which the foreigners were dominant over Egypt, although it is possible that they already held part of the country at an earlier time.) If, discarding the idea that Joseph's Pharaoh was an Egyptian, we turn to the old view that he was one of the Shepherd kings, a view almost inevitable if we infer that he ruled during the Shepherd period, we are struck with the fitness of all the circumstances of the Biblical narrative. These foreign rulers, or at least some of them, were Egyptianized, yet the account of Manetho, if we somewhat lessen the coloring that we may suppose national hatred gave it, is now shown to be correct in making them disregard the laws and religion of the country they had subdued. They were evidently powerful military despots. As foreigners ruling what was treated as a conquered country, if not actually won by force of arms, they would have encouraged foreign settlers, particularly in their own especial region in the east of Lower Egypt, where the Pharaoh of Joseph seems to have had cattle (Gen. xlvii. 5, 6). It is very unlikely, unless we suppose a special interposition of Providence, that an Egyptian Pharaoh, with the acquiescence of his counselors, should have chosen a Hebrew slave as his chief officer of state. It is stated by Eusebius that the Pharaoh to whom Jacob came was the Shepherd Apophis; and although it may be replied that this identification was simply a result of the adjustment of the dynasties to his view of Hebrew chronology, it should be observed that he seems to have altered the very dynasty of Apophis, both in its number (making it the XVIIIth instead of the XVth), and in its duration, as though he were convinced that this king was really the Pharaoh of Joseph, and must therefore be brought to his time. Apophis belonged to the XVth dynasty, which was certainly of Shepherds, and the most powerful foreign line, for it seems clear that there was at least one if not two more. This dynasty, according to our view of Egyptian chronology, ruled for either 284 years

(Africanus), or 259 years 10 months (Josephus), from about B. C. 2080. If Hales's chronology, which we would slightly modify, be correct, the government of Joseph fell under this dynasty, [and,] commencing about B. C. 1876, which would be during the reign of the last but one or perhaps the last king of the dynasty, was possibly in the time of Apophis, who ended the line according to Africanus. It is to be remarked that this dynasty is said to have been of Phœnicians, and if so was probably of a stock predominantly Shemite, a circumstance in perfect accordance with what we know of the government and character of Joseph's Pharaoh, whose act in making Joseph his chief minister finds its parallels in Shemite history, and in that of nations which derived their customs from Shemites. An Egyptian king would scarcely give so high a place to any but a native, and that of the military or priestly class; but, as already remarked, this may have been due to divine interposition.

This king appears, as has been already shown, to have reigned from Joseph's appointment (or, perhaps, somewhat earlier, since he was already on the throne when he imprisoned his servants), until Jacob's death, a period of at least twenty-six years, from B. C. cir. 1876 to 1850, and to have been the fifth or sixth king of the XVth dynasty.

3. *The Pharaoh of the Oppression.*—The first persecutor of the Israelites may be distinguished as the Pharaoh of the Oppression, from the second, the Pharaoh of the Exodus, especially as he commenced, and probably long carried on, the persecution. Here, as in the case of Joseph's Pharaoh, there has been difference of opinion as to the line to which the oppressor belonged. The general view is that he was an Egyptian, and this at first sight is a probable inference from the narrative, if the line under which the Israelites were protected be supposed to have been one of Shepherds. The Biblical history here seems to justify clearer deductions than before. We read that Joseph and his brethren and that generation died, and that the Israelites multiplied and became very mighty and filled the land. Of the events of the interval between Jacob's death and the oppression we know almost nothing; but the calamity to Ephraim's house, in the slaughter of his sons by the men of Gath, born as it seems in Egypt [BERIAH], renders it probable that the Israelites had become a tributary tribe, settled in Goshen, and beginning to show that warlike vigor that is so strong a feature in the character of Abraham, that is not wanting in Jacob's, and that fitted their posterity for the conquest of Canaan. The beginning of the oppression is thus narrated: "Now there arose a new king over Egypt, which knew not Joseph" (Ex. i. 8). The expression, "a new king" (comp. "another king," Acts vii. 18), does not necessitate the idea of a change of dynasty, but favors it. The next two verses are extremely important: "And he said unto his people, Behold, the people of the children of Israel [are] more and mightier than we: come on, let us deal wisely with them; lest they multiply, and it come to pass that, when there falleth out any war, they join also unto our enemies, and fight against us, and [so] get them up out of the land" (9, 10). Here it is stated that Pharaoh ruled a people of smaller numbers and less strength than the Israelites, whom he feared lest they should join with some enemies in a possible war in Egypt, and so leave the country. In order to weaken the Is-

raelites he adopted a subtle policy which is next related. "Therefore they did set over them taskmasters to afflict them with their burdens. And they built for Pharaoh treasure cities, Pithom and Raameses" (11). The name of the second of these cities has been considered a most important point of evidence. They multiplied notwithstanding, and the persecution apparently increased. They were employed in brickmaking and other labor connected with building, and perhaps also in making pottery (Ps. lxxxi. 6). This bondage producing no effect, Pharaoh commanded the two Hebrew midwives to kill every male child as it was born; but they deceived him, and the people continued to increase. He then made a fresh attempt to enfeeble them. "And Pharaoh charged all his people, saying, Every son that is born ye shall cast into the river, and every daughter ye shall save alive" (22). How long this last infamous command was in force we do not know, probably but for a short time, unless it was constantly evaded, otherwise the number of the Israelites would have been checked. It may be remarked that Aaron was three years older than Moses, so that we might suppose that the command was issued after his birth; but it must also be observed that the fear of the mother of Moses, at his birth, may have been because she lived near a royal residence, as appears from the finding of the child by Pharaoh's daughter. The story of his exposure and rescue shows that even the oppressor's daughter could feel pity, and disobey her father's command; while in her saving Moses, who was to ruin her house, is seen the retributive justice that so often makes the tyrant pass by and even protect, as Pharaoh must have done, the instrument of his future punishment. The etymology of the name of Moses does not aid us: if Egyptian, it may have been given by a foreigner; if foreign, it may have been given by an Egyptian to a foreign child. It is important that Pharaoh's daughter adopted Moses as her son, and that he was taught in all the wisdom of Egypt. The persecution continued, "And it came to pass in those days, when Moses was grown, that he went out unto his brethren, and looked on their burdens: and he spied an Egyptian smiting an Hebrew, one of his brethren. And he looked this way and that way, and when he saw that [there was] no man, he slew the Egyptian, and hid him in the sand" (ii. 11, 12). When Pharaoh attempted to slay Moses, he fled into the land of Midian. From the statement in Hebrews that he "refused to be called the son of Pharaoh's daughter; choosing rather to suffer affliction with the people of God, than to enjoy the pleasures of sin for a season; esteeming the reproach of Christ greater riches than the treasures in Egypt" (xi. 24-26), it is evident that the adoption was no mere form, and this is a point of evidence not to be slighted. While Moses was in Midian Pharaoh died, and the narrative implies that this was shortly before the events preceding the Exodus.

This Pharaoh has been generally supposed to have been a king of the XVIIIth or XIXth dynasty; we believe that he was of a line earlier than either. The chief points in the evidence in favor of the former opinion are the name of the city Raameses, whence it has been argued that one of the oppressors was a king Rameses, and the probable

change of line. The first king of this name known was head of the XIXth dynasty, or last king of the XVIIIth. According to Manetho's story of the Exodus, a story so contradictory to historical truth as scarcely to be worthy of mention, the Israelites left Egypt in the reign of Meneptah, who was great grandson of the first Rameses, and son and successor of the second. This king is held by some Egyptologists to have reigned about the time of the Rabbinical date of the Exodus, which is virtually the same as that which has been supposed to be obtainable from the genealogies. There is however good reason to place these kings much later; in which case Rameses I. would be the oppressor; but then the building of Raameses could not be placed in his reign without a disregard of Hebrew chronology. But the argument that there is no earlier known king Rameses loses much of its weight when we bear in mind that one of the sons of Aähhmes, head of the XVIIIth dynasty, who reigned about two hundred years before Rameses I., bore the same name, besides that very many names of kings of the Shepherd period, perhaps of two whole dynasties, are unknown. Against this one fact, which is certainly not to be disregarded, we must weigh the general evidence of the history, which shows us a king apparently governing a part of Egypt, with subjects inferior to the Israelites, and fearing a war in the country. Like the Pharaoh of the Exodus, he seems to have dwelt in Lower Egypt, probably at Avaris.<sup>a</sup> Compare this condition with the power of the kings of the later part of the XVIIIth and of the XIXth dynasties; rulers of an empire, governing a united country from which the head of their line had driven the Shepherds. The view that this Pharaoh was of the beginning or middle of the XVIIIth dynasty seems at first sight extremely probable, especially if it be supposed that the Pharaoh of Joseph was a Shepherd king. The expulsion of the Shepherds at the commencement of this dynasty would have naturally caused an immediate or gradual oppression of the Israelites. But it must be remembered that what we have just said of the power of some kings of this dynasty is almost as true of their predecessors. The silence of the historical monuments is also to be weighed, when we bear in mind how numerous they are, and that we might expect many of the events of the oppression to be recorded if the Exodus were not noticed. If we assign this Pharaoh to the age before the XVIIIth dynasty, which our view of Hebrew chronology would probably oblige us to do, we have still to determine whether he were a Shepherd or an Egyptian. If a Shepherd, he must have been of the XVth or the XVIIth dynasty; and that he was Egyptianized does not afford any argument against this supposition, since it appears that foreign kings, who can only be assigned to one of these two lines, had Egyptian names. In corroboration of this view we quote a remarkable passage that does not seem otherwise explicable: "My people went down aforetime into Egypt to sojourn there; and the Assyrian oppressed them without cause" (Is. lii. 4): which may be compared with the allusions to the Exodus in a prediction of the same prophet respecting Assyria (x. 24, 26). Our inference is strengthened by the discovery that kings bearing

<sup>a</sup> When Moses went to see his people and slew the Egyptian, he does not seem to have made any journey, and the burying in sand shows that the place was in

a part of Egypt like Goshen, encompassed by sandy deserts.

a name almost certainly an Egyptian translation of an Assyrian or Babylonian regal title, are among those apparently of the Shepherd age in the Turin Papyrus (Lepsius, *Königsbuch*, taf. xviii. xix. 275, 285).

The reign of this king probably commenced a little before the birth of Moses, which we place B. C. 1732, and seems to have lasted upwards of forty years, perhaps much more.

4. *The Pharaoh of the Exodus.*—What is known of the Pharaoh of the Exodus is rather biographical than historical. It does not add much to our means of identifying the line of the oppressors excepting by the indications of race his character affords. His life is spoken of in other articles. [PLAGUES, etc.] His acts show us a man at once impious and superstitious, alternately rebelling and submitting. At first he seems to have thought that his magicians could work the same wonders as Moses and Aaron, yet even then he begged that the frogs might be taken away, and to the end he prayed that a plague might be removed, promising a concession to the Israelites, and as soon as he was respited failed to keep his word. This is not strange in a character principally influenced by fear, and history abounds in parallels to Pharaoh. His vacillation only ended when he lost his army in the Red Sea, and the Israelites were finally delivered out of his hand. Whether he himself was drowned has been considered matter of uncertainty, as it is not so stated in the account of the Exodus. Another passage, however, appears to affirm it (Ps. cxxxvi. 15). It seems to be too great a latitude of criticism either to argue that the expression in this passage indicates the overthrow but not the death of the king, especially as the Hebrew expression "shaked off" or "threw in" is very literal, or that it is only a strong Semitic expression. Besides, throughout the preceding history his end is foreshadowed, and is, perhaps, positively foretold in Ex. ix. 15; though this passage may be rendered "For now I might have stretched out my hand, and might have smitten thee and thy people with pestilence; and thou wouldest have been cut off from the earth," as by Kalisch (*Commentary* in loc.), instead of as in the A. V.

Although we have already stated our reasons for abandoning the theory that places the Exodus under the XIXth dynasty, it may be well to notice an additional and conclusive argument for rejecting as unhistorical the tale preserved by Manetho, which makes Menptah, the son of Ramesses II., the Pharaoh in whose reign the Israelites left Egypt. This tale was commonly current in Egypt, but it must be remarked that the historian gives it only on the authority of tradition. M. Mariette's recent discoveries have added to the evidence we already had on the subject. In this story the secret of the success of the rebels was that they had allotted to them by Amenophis, or Menptah, the city of Avaris formerly held by the Shepherds, but then in ruins. That the people to whom this place was given were working in the quarries east of the Nile is enough of itself to throw a doubt on the narrative, for there appear to have been no quarries north of those opposite Memphis, from which Avaris was distant nearly the whole length of the Delta; but when it is found that this very king as well as his father, adorned the great temple of Avaris, the story is seen to be essentially false. Yet it is not improbable that some calamity occurred about this time, with which the Egyptians willfully or igno-

rantly confounded the Exodus: if they did so ignorantly, there would be an argument that this event took place during the Shepherd period, which was probably in after times an obscure part of the annals of Egypt.

The character of this Pharaoh finds its parallel among the Assyrians rather than the Egyptians. The impiety of the oppressor and that of Sennacherib are remarkably similar, though Sennacherib seems to have been more resolute in his resistance than Pharaoh. This resemblance is not to be overlooked, especially as it seems to indicate an idiosyncrasy of the Assyrians and kindred nations, for national character was more marked in antiquity than it is now in most peoples, doubtless because isolation was then general and is now special. Thus, the Egyptian monuments show us a people highly reverencing their gods and even those of other nations, the most powerful kings appearing as suppliants in the representations of the temples and tombs; in the Assyrian sculptures, on the contrary, the kings are seen rather as protected by the gods than as worshipping them, so that we understand how in such a country the famous decree of Darius, which Daniel disobeyed, could be enacted. Again the Egyptians do not seem to have supposed that their enemies were supported by gods hostile to those of Egypt, whereas the Assyrians considered their gods as more powerful than those of the nations they subdued. This is important in connection with the idea that at least one of the Pharaohs of the oppression was an Assyrian.

Respecting the time of this king we can only say that he was reigning for about a year or more before the Exodus, which we place B. C. 1652.

Before speaking of the later Pharaohs we may mention a point of weight in reference to the identification of these earlier ones. The accounts of the campaigns of the Pharaohs of the XVIIIth, XIXth, and XXth dynasties have not been found to contain any reference to the Israelites. Hence it might be supposed that in their days, or at least during the greater part of their time, the Israelites were not yet in the Promised Land. There is, however, an almost equal silence as to the Canaanite nations. The land itself, KANANA or KANAAN, is indeed mentioned as invaded, as well as those of KHETA and AMAR, referring to the Hittites and Amorites; but the latter two must have been branches of those nations seated in the valley of the Orontes. A recently discovered record of Thothmes III. published by M. de Rougé, in the *Revue Archéologique* (Nov. 1861, pp. 344 ff.), contains many names of Canaanite towns conquered by that king, but not one recognized as Israelite. These Canaanite names are, moreover, on the Israelite borders, not in the heart of the country. It is interesting that a great battle is shown to have been won by this king at Megiddo. It seems probable that the Egyptians either abstained from attacking the Israelites from a recollection of the calamities of the Exodus, or that they were on friendly terms. It is very remarkable that the Egyptians were granted privileges in the Law (Deut. xxiii. 7), and that Shishak, the first king of Egypt after the Exodus whom we know to have invaded the Hebrew territories, was of foreign extraction, if not actually a foreigner.

5. *Pharaoh, father-in-law of Mered.*—In the genealogies of the tribe of Judah, mention is made

of the daughter of Pharaoh, married to an Israelite; "Bithiah the daughter of a Pharaoh, which Mered took" (1 Chr. iv. 18). That the name Pharaoh here probably designates an Egyptian king we have already shown, and observed that the date of Mered is doubtful, although it is likely that he lived before, or not much after, the Exodus. [BITHIAH.] It may be added that the name Miriam, of one of the family of Mered (17), apparently his sister, or perhaps a daughter by Bithiah, suggests that this part of the genealogies may refer to about the time of the Exodus. This marriage may tend to aid us in determining the age of the sojourn in Egypt. It is perhaps less probable that an Egyptian Pharaoh would have given his daughter in marriage to an Israelite, than that a Shepherd king would have done so, before the oppression. But Bithiah may have been taken in war after the Exodus, by the surprise of a caravan, or in a foray.

6. *Pharaoh, father-in-law of Hadad the Edomite.*— Among the enemies who were raised up against Solomon was Hadad, an Edomite of the blood royal, who had escaped as a child from the slaughter of his nation by Joab. We read of him and his servants, "And they arose out of Midian, and came to Paran: and they took men with them out of Paran, and they came to Egypt, unto Pharaoh king of Egypt; who gave him an house, and appointed him victuals, and gave him land. And Hadad found great favor in the sight of Pharaoh, so that he gave him to wife the sister of his own wife, the sister of Tahpenes the queen. And the sister of Tahpenes bare him Genubath his son, whom Tahpenes weaned in Pharaoh's house: and Genubath was in Pharaoh's household among the sons of Pharaoh" (1 K. xi. 18-20). When, however, Hadad heard that David and Joab were both dead, he asked Pharaoh to let him return to his country, and was unwillingly allowed to go (21, 22). Probably the fugitives took refuge in an Egyptian mining-station in the peninsula of Sinai, and so obtained guides to conduct them into Egypt. There they were received in accordance with the Egyptian policy, but with the especial favor that seems to have been shown about this time towards the eastern neighbors of the Pharaohs, which may reasonably be supposed to have led to the establishment of the XXIIId dynasty of foreign extraction. For the identification of this Pharaoh we have chronological indications, and the name of his wife. Unfortunately, however, the history of Egypt at this time is extremely obscure, neither the monuments nor Manetho giving us clear information as to the kings. It appears that towards the latter part of the XXth dynasty the high-priests of Amen, the god of Thebes, gained great power, and at last supplanted the Rameses family, at least in Upper Egypt. At the same time a line of Tanite kings, Manetho's XXIst dynasty, seems to have ruled in Lower Egypt. From the latest part of the XXth dynasty three houses appear to have reigned at the same time. The feeble XXth dynasty was probably soon extinguished, but the priest rulers and the Tanites appear to have reigned contemporaneously, until they were both succeeded by the Bubastites of the XXIIId dynasty, of whom Sheshonk I., the Shishak of the Bible, was the first. The monuments have preserved the names of several of the high-priests, perhaps all, and probably of some of the Tanites; but it is a question whether Mane-

tho's Tanite line does not include some of the former, and we have no means of testing the accuracy of its numbers. It may be reasonably supposed that the Pharaoh or Pharaohs spoken of in the Bible as ruling in the time of David and Solomon were Tanites, as Tanis was nearest to the Israelite territory. We have therefore to compare the chronological indications of Scripture with the list of this dynasty. Shishak, as we have shown elsewhere, must have begun to reign in about the 24th or 25th year of Solomon (B. C. cir. 990-989). [CHRONOLOGY.] The conquest of Edom probably took place some 50 years earlier. It may therefore be inferred that Hadad fled to a king of Egypt who may have ruled at least 25 years probably ceasing to govern before Solomon married the daughter of a Pharaoh early in his reign; for it seems unlikely that the protector of David's enemy would have given his daughter to Solomon, unless he were a powerless king, which appears was not the case with Solomon's father-in-law. This would give a reign of 25 years, or 25 +  $x$  separated from the close of the dynasty by a period of 24 or 25 years. According to Africanus, the list of the XXIst dynasty is as follows: Smendes, 26 years; Psusemenes, 46; Nephelcheres, 4; Amenothis, 9; Osochor, 6; Psinaches, 9; Psusemenes, 14; but Eusebius gives the second king 41, and the last, 35 years, and his numbers make up the sum of 130 years, which Africanus and he agree in assigning to the dynasty. If we take the numbers of Eusebius, Osochor would probably be the Pharaoh to whom Hadad fled, and Psusemenes II. the father-in-law of Solomon; but the numbers of Africanus would substitute Psusemenes I., and probably Psinaches. We cannot, however, be sure that the reigns did not overlap, or were not separated by intervals, and the numbers are not to be considered reliable until tested by the monuments. The royal names of the period have been searched in vain for any one resembling Tahpenes. If the Egyptian equivalent to the similar geographical name Tahpanhes, etc., were known, we might have some clue to that of this queen. [TAHPENES; TAHAPANES.]

7. *Pharaoh, father-in-law of Solomon.*— In the narrative of the beginning of Solomon's reign, after the account of the deaths of Adonijah, Joab, and Shimei, and the deprivation of Abiathar, we read: "And the kingdom was established in the hand of Solomon. And Solomon made affinity with Pharaoh king of Egypt, and took Pharaoh's daughter, and brought her into the city of David, until he had made an end of building his own house, and the house of the LORD, and the wall of Jerusalem round about" (1 K. ii. 46, iii. 1). The events mentioned before the marriage belong altogether to the very commencement of Solomon's reign, excepting the matter of Shimei, which extending through three years is carried on to its completion. The mention that the queen was brought into the city of David, while Solomon's house, and the Temple, and the city-wall, were building, shows that the marriage took place not later than the eleventh year of the king, when the Temple was finished, having been commenced in the fourth year (vi. 1, 37, 38). It is also evident that this alliance was before Solomon's falling away into idolatry (iii. 3), of which the Egyptian queen does not seem to have been one of the causes. From this chronological indication it appears that the marriage must have taken place between about 24

and 11 years before Shishak's accession. It must be recollected that it seems certain that Solomon's father-in-law was not the Pharaoh who was reigning when Hadad left Egypt. Both Pharaohs, as already shown, cannot yet be identified in Manetho's list. [PHARAOH'S DAUGHTER.]

This Pharaoh led an expedition into Palestine, which is thus incidentally mentioned, where the building of Gezer by Solomon is recorded: "Pharaoh king of Egypt had gone up, and taken Gezer, and burnt it with fire, and slain the Canaanites that dwelt in the city, and given it [for] a present unto his daughter, Solomon's wife" (ix. 16). This is a very curious historical circumstance, for it shows that in the reign of David or Solomon, more probably the latter, an Egyptian king, apparently on terms of friendship with the Israelite monarch, conducted an expedition into Palestine, and besieged and captured a Canaanite city. This occurrence warns us against the supposition that similar expeditions could not have occurred in earlier times without a war with the Israelites. Its incidental mention also shows the danger of inferring, from the silence of Scripture as to any such earlier expedition, that nothing of the kind took place. [PALÆSTINE, p. 2291, a.]

This Egyptian alliance is the first indication, after the days of Moses, of that leaning to Egypt which was distinctly forbidden in the Law, and produced the most disastrous consequences in later times. The native kings of Egypt and the Ethiopians readily supported the Hebrews, and were unwilling to make war upon them, but they rendered them mere tributaries, and exposed them to the enmity of the kings of Assyria. If the Hebrews did not incur a direct punishment for their leaning to Egypt, it must have weakened their trust in the Divine favor, and paralyzed their efforts to defend the country against the Assyrians and their party.

The next kings of Egypt mentioned in the Bible are Shishak, probably Zerah, and So. The first and second of these were of the XXIIIrd dynasty, if the identification of Zerah with Userken be accepted, and the third was doubtless one of the two Shebeks of the XXVth dynasty, which was of Ethiopians. The XXIIIrd dynasty was a line of kings of foreign origin, who retained foreign names, and it is noticeable that Zerah is called a Cushite in the Bible (2 Chr. xiv. 9; comp. xvi. 8). Shebek was probably also a foreign name. The title "Pharaoh" is probably not once given to these kings in the Bible, because they were not Egyptians, and did not bear Egyptian names. The Shepherd kings, it must be remarked, adopted Egyptian names, and therefore some of the earlier sovereigns called Pharaohs in the Bible may be conjectured to have been Shepherds notwithstanding that they bear this title. [SHISHAK; ZERAH; So.]

8. *Pharaoh, the Opponent of Sennacherib.*—In the narrative of Sennacherib's war with Hezekiah, mention is made not only of "Tirhakah king of Cush," but also of "Pharaoh king of Mizraim." Rabshakeh thus taunted the king of Judah for having sought the aid of Pharaoh: "Lo, thou trustest in the staff of this broken reed, on Egypt;

whereon if a man lean, it will go into his hand, and pierce it: so [is] Pharaoh king of Egypt to all that trust in him" (Is. xxxvi. 6). The comparison of Pharaoh to a broken reed is remarkable, as the common hieroglyphics for "king," restricted to Egyptian sovereigns, SU-TEN, strictly a title of the ruler of Upper Egypt, commence with a bent reed, which is an ideographic symbolical sign proper to this word, and is sometimes used alone without any phonetic complement. This Pharaoh can only be the Sethos whom Herodotus mentions as the opponent of Sennacherib, and who may be reasonably supposed to be the Zet of Manetho, the last king of his XXXIrd dynasty. Tirhakah, as an Ethiopian, whether then ruling in Egypt or not, is, like So, apparently not called Pharaoh. [TIRHAKAH.]

9. *Pharaoh Necho.*—The first mention in the Bible of a proper name with the title Pharaoh is in the case of Pharaoh Necho, who is also called Necho simply. His name is written Necho, נֶכֶחַ, and

Nechoh, נֶכְחַ, and in hieroglyphics NEKU. This king was of the Saïte XXVIth dynasty, of which Manetho makes him either the fifth ruler (Africanus) or the sixth (Eusebius). Herodotus calls him Nekos, and assigns to him a reign of sixteen years, which is confirmed by the monuments.<sup>a</sup> He seems to have been an enterprising king, as he is related to have attempted to complete the canal connecting the Red Sea with the Nile, and to have sent an expedition of Phœnicians to circumnavigate Africa, which was successfully accomplished. At the commencement of his reign (B. C. 610) he made war against the king of Assyria, and, being encountered on his way by Josiah, defeated and slew the king of Judah at Megiddo. The empire of Assyria was then drawing to a close, and it is not unlikely that Necho's expedition tended to hasten its fall. He was marching against Carchemish on the Euphrates, a place already of importance in the annals of the Egyptian wars of the XIXth dynasty (*Set. Pap. Sallier*, 2). As he passed along the coast of Palestine, Josiah disputed his passage, probably in consequence of a treaty with Assyria. The king of Egypt remonstrated, sending ambassadors to assure him that he did not make war upon him, and that God was on his side. "Nevertheless Josiah would not turn his face from him, but disguised himself, that he might fight with him, and hearkened not unto the words of Necho from the mouth of God, and came to fight in the valley of Megiddo." Here he was wounded by the archers of the king of Egypt, and died (comp. 2 Chr. xxxv. 20-24; 2 K. xxiii. 29, 30). Necho's assertion, that he was obeying God's command in warring with the Assyrians, seems here to be confirmed. Yet it can scarcely be understood as more than a conviction that the war was predestined, for it ended in the destruction of Necho's army and the curtailment of his empire. Josiah seems from the narrative to have known he was wrong in opposing the king of Egypt; otherwise an act so contrary to the Egyptianizing policy of his house would scarcely have led to his destruction and be condemned in the

<sup>a</sup> According to this historian, he was the son of Psammetichus I.: this the monuments do not corroborate. Dr. Brugsch says that he married NEETAKERT, Nitocris, daughter of Psammetichus I. and queen SILEPUN-TEPET, who appears, like her mother, to have been the heiress of an Egyptian royal line,

and supposes that he was the son of Psammetichus by another wife (see *Histoire d'Égypte*, p. 262; comp. 248). If he married Nitocris, he may have been called by Herodotus by mistake the son of Psammetichus.

history. Herodotus mentions this battle, relating that Necho made war against the Syrians, and defeated them at Magdolos, after which he took Cadytis, "a large city of Syria" (ii. 159). There can be no reasonable doubt that Magdolos is Megiddo, and not the Egyptian town of that name [Μεγιδου], but the identification of Cadytis is difficult. It has been conjectured to be Jerusalem, and its name has been supposed to correspond to the ancient title "the Holy," **הקדוש**, but it is elsewhere mentioned by Herodotus as a great coast-town of Palestine near Egypt (iii. 5), and it has therefore been supposed to be Gaza. The difficulty that Gaza is not beyond Megiddo would perhaps be removed if Herodotus be thought to have confounded Megiddo with the Egyptian Magdolos, but this is not certain. (See Sir Gardner Wilkinson's note to *Her.* ii. 159, ed. Rawlinson.) It seems possible that Cadytis is the Hittite city KETESH, on the Orontes, which was the chief stronghold in Syria of those captured by the kings of the XVIIIth and XIXth dynasties. The Greek historian adds that Necho dedicated the dress he wore on these occasions to Apollo at the temple of Branchidae (*l. c.*). On Josiah's death his son Jehoahaz was set up by the people, but dethroned three months afterwards by Pharaoh, who imposed on the land the moderate tribute of a hundred talents of silver and a talent of gold, and put in his place another son of Josiah, Eliakim, whose name he changed to Jehoiakim, conveying Jehoahaz to Egypt, where he died (2 K. xxiii. 30-34; 2 Chr. xxxvi. 1-4). Jehoiakim appears to have been the elder son, so that the deposing of his brother may not have been merely because he was made king without the permission of the conqueror. Necho seems to have soon returned to Egypt; perhaps he was on his way thither when he deposed Jehoahaz. The army was probably posted at Carchemish, and was there defeated by Nebuchadnezzar in the fourth year of Necho (b. c. 607), that king not being, as it seems, then at his head (*Jer.* xli. 1, 2, 6, 10). This battle led to the loss of all the Asiatic dominions of Egypt; and it is related, after the mention of the death of Jehoiakim, that "the king of Egypt came not again any more out of his land: for the king of Babylon had taken from the river of Egypt unto the river Euphrates all that pertained to the king of Egypt" (2 K. xxiv. 7). Jeremiah's prophecy of this great defeat by Euphrates is followed by another, of its consequence, the invasion of Egypt itself; but the latter calamity did not occur in the reign of Necho, nor in that of his immediate successor, Psammetichus II., but in that of Hophra, and it was yet future in the last king's reign when Jeremiah had been carried into Egypt after the destruction of Jerusalem.

10. *Pharaoh Hophra.* — The next king of Egypt mentioned in the Bible is Pharaoh Hophra, the second successor of Necho, from whom he was separated by the six years' reign of Psammetichus II. The name Hophra is in hieroglyphics WAH-PYRAHAT, and the last syllable is equally omitted by Herodotus, who writes Apries, and by Manetho, who writes Uaphris. He came to the throne about b. c. 58, and ruled nineteen years. Herodotus makes him son of Psammetichus II., whom he calls Psammis, and great-grandson of Psammetichus I. The historian relates his great prosperity, how he attacked Sidon, and fought a battle at sea with the king of Tyre, until at length

an army which he had dispatched to conquer Cyrene was routed, and the Egyptians, thinking he had purposely caused its overthrow to gain entire power no doubt by substituting mercenaries for native troops, revolted, and set up Amasis as king. Apries, only supported by the Carian and Ionian mercenaries, was routed in a pitched battle. Herodotus remarks in narrating this, "It is said that Apries believed that there was not a god who could cast him down from his eminence, so firmly did he think that he had established himself in his kingdom." He was taken prisoner, and Amasis for awhile treated him with kindness, but when the Egyptians blamed him, "he gave Apries over into the hands of his former subjects, to deal with as they chose. Then the Egyptians took him and strangled him" (ii. 161-169). In the Bible it is related that Zedekiah, the last king of Judah, was aided by a Pharaoh against Nebuchadnezzar, in fulfillment of a treaty, and that an army came out of Egypt, so that the Chaldeans were obliged to raise the siege of Jerusalem. The city was first besieged in the ninth year of Zedekiah, b. c. 590, and was captured in his eleventh year, b. c. 588. It was evidently continuously invested for a length of time before it was taken, so that it is most probable that Pharaoh's expedition took place during 590 or 589. There may, therefore, be some doubt whether Psammetichus II. be not the king here spoken of; but it must be remembered that the siege may be supposed to have lasted some time before the Egyptians could have heard of it and marched to relieve the city, and also that Hophra may have come to the throne as early as b. c. 590. The Egyptian army returned without effecting its purpose (*Jer.* xxxvii. 5-8; *Ez.* xvii. 11-18; comp. 2 K. xxv. 1-4). Afterwards a remnant of the Jews fled to Egypt, and seem to have been kindly received. From the prophecies against Egypt and against these fugitives we learn more of the history of Hophra; and here the narrative of Herodotus, of which we have given the chief heads, is a valuable commentary. Ezekiel speaks of the arrogance of this king in words which strikingly recall those of the Greek historian. The prophet describes him as a great crocodile lying in his rivers, and saying "My river [is] mine own, and I have made [it] for myself" (xxix. 3). Pharaoh was to be overthrown and his country invaded by Nebuchadnezzar (xxix, xxx., xxxi., xxxii.). This prophecy was yet unfulfilled in b. c. 572 (xxix. 17-20). Jeremiah, in Egypt, yet more distinctly prophesied the end of Pharaoh, warning the Jews, — "Thus saith the Lord; Behold, I will give Pharaoh-hophra king of Egypt into the hand of his enemies, and into the hand of them that seek his life; as I gave Zedekiah king of Judah into the hand of Nebuchadnezzar king of Babylon, his enemy, and that sought his life" (xli. 30). In another place, when foretelling the defeat of Necho's army, the same prophet says, — "Behold, I will punish Amon in No, and Pharaoh, and Egypt, with their gods, and their kings; even Pharaoh, and [all] them that trust in him; and I will deliver them into the hand of those that seek their lives, and into the hand of Nebuchadnezzar king of Babylon, and into the hand of his servants" (xvi. 25, 26). These passages, which entirely agree with the account Herodotus gives of the death of Apries, make it not improbable that the invasion of Nebuchadnezzar was the cause of that disaffection of his subjects which ended in the overthrow and death of

A-<sup>s</sup> Pharaoh. The invasion is not spoken of by any reliable profane historian, excepting Berosus (Cory, *Anc. Frag.* 2d ed. pp. 37, 38), but the silence of Herodotus and others can no longer be a matter of surprise, as we now know from the Assyrian records in cuneiform of conquests of Egypt either unrecorded elsewhere or only mentioned by second-rate annalists. No subsequent Pharaoh is mentioned in Scripture, but there are predictions doubtless referring to the misfortunes of later princes until the second Persian conquest, when the prophecy, "there shall be no more a prince of the land of Egypt" (*Ex.* xxx. 13), was fulfilled. R. S. P.

**PHARAOH'S DAUGHTER; PHARAOH, THE DAUGHTER OF.** Three Egyptian princesses, daughters of Pharaohs, are mentioned in the Bible.

1. The preserver of Moses, daughter of the Pharaoh who first oppressed the Israelites. She appears from her conduct towards Moses to have been heiress to the throne, something more than ordinary adoption seeming to be indicated in the passage in Hebrews respecting the faith of Moses (xi. 23-26), and the designation "Pharaoh's daughter," perhaps here indicating that she was the only daughter. She probably lived for at least forty years after she saved Moses, for it seems to be implied in Hebrews (*l. c.*) that she was living when he fled to Midian. Artapanus, or Artabanus, a historian of uncertain date, who appears to have preserved traditions current among the Egyptian Jews, calls this princess Merrhis, and her father, the oppressor, Palmanoths, and relates that she was married to Chenephres, who ruled in the country above Memphis, for that at that time there were many kings of Egypt, but that this one, as it seems, became sovereign of the whole country (*Frag. Hist. Græc.* iii. pp. 220 ff.). Palmanoths may be supposed to be a corruption of Amenophis, the equivalent of Amen-hept the Egyptian name of four kings of the XVIIIth dynasty, and also, but incorrectly, applied to one of the XIXth, whose Egyptian name, Menptah, is wholly different from that of the others. No one of these however had, as far as we know, a daughter with a name resembling Merrhis, nor is there any king with a name like Chenephres of this time. These kings Amenophis, moreover, do not belong to the period of contemporary dynasties. The tradition is apparently of little value excepting as showing that one quite different from that given by Manetho and others was anciently current. [See PHARAOH, 3.]

2. Bithiah, wife of Mered an Israelite, daughter of a Pharaoh of an uncertain age, probably of about the time of the Exodus. [See BITHIAH; PHARAOH, 5.]

3. A wife of Solomon, most probably daughter of a king of the XXist dynasty. She was married to Solomon early in his reign, and apparently treated with distinction. It has been supposed that the Song of Solomon was written on the occasion of this marriage; but the idea is, we think, repugnant to sound criticism. She was at first brought into the city of David (1 K. iii. 1), and

afterwards a house was built for her (vii. 8, ix. 24), because Solomon would not have her dwell in the house of David, which had been rendered holy by the ark having been there (2 Chr. viii. 11). [See PHARAOH, 7.] R. S. P.

**PHARAOH, THE WIFE OF.** The wife of one Pharaoh, the king who received Hadad the Edomite, is mentioned in Scripture. She is called "queen," and her name, Tahpenes, is given. Her husband was most probably of the XXist dynasty [TAHPENES; PHARAOH, 6.] R. S. P.

**PHARATHO'NI<sup>a</sup>** (Rom. Ald. Comp. *Φαραθωνί*; Alex. *Φαραθων*; [Sin.<sup>1</sup> omits;] Joseph. *Φαραθώ*; Peshito, *Pherath*; Vulg. *Phara*). One of the cities of Judæa fortified by Bacchides during his contests with Jonathan Maccabæus (1 Macc ix. 50). In both MSS. [see note below] of the I.XX. the name is joined to the preceding—Thamnatha-Pharathon; but in Josephus, the Syriac, and Vulgate, the two are separated. Ewald (*Geschichte*, iv. 373) adheres to the former. Pharathon doubtless represents an ancient Pirathon, though hardly that of the Judges, since that was in Mt. Ephraim, probably at *Ferath*, a few miles west of *Nabbus*, too far north to be included in Judæa properly so called. G.

**PHARES** (*Φαρές*: *Phares*) PHAREZ or PEREZ, the son of Judah (Matt. i. 3; Luke iii 33).

**PHAREZ.** 1. (PEREZ, 1 Chr. xxvii. 3; PHARES, Matt. i. 3, Luke iii. 33, 1 Esdr. v. 5), (*פָּרֶז*: *Φαρές*: *Phares*, "a breach," Gen. xxxviii. 29), twin son, with Zerah, of Judah and Tamar his daughter-in-law. The circumstances of his birth are detailed in Gen. xxxviii. Pharez seems to have kept the right of primogeniture over his brother, as, in the genealogical lists, his name comes first. The house also which he founded was far more numerous and illustrious than that of the Zarithes. Its remarkable fertility is alluded to in Ruth iv. 12, "Let thy house be like the house of Pharez, whom Tamar bare unto Judah."<sup>b</sup> Of Pharez's personal history or character nothing is known. We can only speak of him therefore as a demarch, and exhibit his genealogical relations. At the time of the sojourn in the wilderness the families of the tribe of Judah were: of Shelah, the family of the Shelanites, or Shilonites; of Pharez, the family of the Pharzites; of Zerah, the family of the Zarithes. And the sons of Pharez were, of Hezron the family of the Hezronites, of Hamul the family of the Hamulites (Num. xxvi. 20, 21). After the death, therefore, of Er and Onan without children, Pharez occupied the rank of Judah's second son, and moreover, from two of his sons sprang two new chief houses, those of the Hezronites and Hamulites. From Hezron's second son Ram, or Aram, sprang David and the kings of Judah, and eventually Jesus Christ. [GENEALOGY OF JESUS CHRIST.] The house of Caleb was also incorporated into the house of Hezron [CALEB], and so were reckoned among the descendants of Pharez. Another line of Pla-

<sup>a</sup> Whence our translators borrowed the final i of this name does not appear: there is nothing in either of the originals to suggest it. The Geneva Vers. has *to* too. [The readings given above sufficiently account for the form of the word in the common English version. Mr. Grove does not seem to be aware that the

Vatican manuscript (B) does not contain the Books of Maccabees. — A.]

<sup>b</sup> \* Pharez is named there and in ver. 18 for the additional reason that he was the progenitor of Boaz at 1 perhaps of the Bethlehemites as a distinct clan. H

rez's descendants were reckoned as sons of Manasseh by the second marriage of Hezron with the daughter of Machir (1 Chr. ii. 21-23). In the census of the house of Judah contained in 1 Chr. iv., drawn up apparently in the reign of Hezekiah (v. 41), the houses enumerated in ver. 1 are Pharez, Hezron, Carmi, Ilur, and Shobal. Of these all but Carmi (who was a Zarhite, Josh. vii. 1) were descendants of Pharez. Hence it is not unlikely that, as is suggested in the margin of A. V., *Carmi* is an error for *Chelubai*. Some of the sons of Shelah are mentioned separately at vv. 21, 22. [PAHATH-MOAB.] In the reign of David the house of Pharez seems to have been eminently distinguished. The chief of all the captains of the host for the first month, Jashobeam, the son of Zabdiel (1 Chr. xxvii. 2, 3), so famous for his prowess (1 Chr. xi. 11), and called "the chief among the captains" (*ib.* and 2 Sam. xxiii. 8), was of the sons of Perez, or Pharez. A considerable number of the other mighty men seem also, from their patronymic or gentile names, to have been of the same house, those namely who are called Bethlehemites, Palitites (1 Chr. ii. 33-47), Tekoites, Netophathites,<sup>a</sup> and Ithrites (1 Chr. ii. 53, iv. 7). Zabab the son of Abhai, and Joab, and his brothers, Abishai and Asahel, we know were Pharizites (1 Chr. ii. 31, 36, 54, xi. 41). And the royal house itself was the head of the family. We have no means of assigning to their respective families those members of the tribe of Judah who are incidentally mentioned after David's reign, as Adnah, the chief captain of Judah in Jehoshaphat's reign, and Jehohanan and Anasiah, his companions (2 Chr. xvii. 14-16); but that the family of Pharez continued to thrive and multiply, we may conclude from the numbers who returned from captivity. At Jerusalem alone 468 of the sons of Perez, with Athaiah, or Uthai, at their head, were dwelling in the days of Zerubbabel (1 Chr. ix. 4; Neh. xi. 4-6), Zerubbabel himself of course being of the family (1 Esdr. v. 5). Of the lists of returned captives in Ezr. ii., Neh. vii., in Nehemiah's time, the following seem to have been of the sons of Pharez, judging as before from the names of their ancestors, or the towns to which they belonged: the children of Bani (Ezr. ii. 10; comp. 1 Chr. ix. 4); of Bigvai (ii. 14; comp. Ezr. viii. 14); of Ater (ii. 16; comp. 1 Chr. ii. 23, 54); of Jorah, or Hariph (ii. 18; Neh. vii. 24; comp. 1 Chr. ii. 51); of Beth-lehem and Netophah (ii. 21, 22; comp. 1 Chr. ii. 54); of Kirjath-arim (ii. 25; comp. 1 Chr. ii. 50, 53); of Harim (ii. 32; comp. 1 Chr. iv. 8); and, judging from their position, many of the intermediate ones also (comp. also the lists in Ezr. x. 25-43; Neh. x. 14-27). Of the builders of the wall named in Neh. iii. the following were of the house of Pharez: Zaccur the son of Imri (v. 2, by comparison with 1 Chr. ix. 4, and Ezr. viii. 14, where we ought, with many MSS., to read *Zaccur for Zabud*); Zadok the son of Baana (v. 4, by comparison with 2 Sam. xxiii. 29, where we find that Baana was a Netophathite, which agrees with Zadok's place here next to the Tekoites, since Beth-lehem, Netophah, and Tekoa, are often in close juxtaposition, comp. 1 Chr. ii. 54, iv. 4, 5, Ezr. ii. 21, 22, Neh. vii. 26, and the situation of the Netophathites close to Jerusalem, among the Benja-

mites, Neh. xii. 28, 29, compared with the mixture of Benjamites with Pharizites and Zarhites in Neh. iii. 2-7); the Tekoites (vv. 5 and 27, compared with 1 Chr. ii. 24, iv. 5); Jeho'ada, the son of Paseah (v. 6, compared with 1 Chr. iv. 12, where Paseah, a Chelubite, is apparently descended from Ashur, the father of Tekoa); Rephaiah, the son of Ilur (v. 9, compared with 1 Chr. ii. 20, 50, iv. 4, 12, Beth-Raphah); Hanan (v. 13 and 30), with the inhabitants of Zanoah (compared with 1 Chr. iv. 18); perhaps Malchiah the son of Rechab (v. 14, compared with 1 Chr. ii. 55); Nehemiah, son of Azbuk, ruler of Beth-zur (v. 16, compared with 1 Chr. ii. 45); and perhaps Baruch, son of Zabba, or Zaccai (v. 20), if for Zaccai we read Zaccur as the mention of "the other, or second, piece" makes probable, as well as his proximity to Meremoth in this record piece, as Zaccur was to Meremoth in their first pieces (vv. 2, 4).

The table on the opposite page displays the chief descents of the house of Pharez, and shows its relative greatness, as compared with the other houses of the tribe of Judah. It will be observed that many of the details are more topographical than genealogical, and that several towns in Dan, Simeon, and Benjamin, as Eshtaol, Zorah, Etam, and Gibeon, seem to have been peopled with Pharez's descendants. The confusion between the elder and younger Caleb is inextricable, and suggests the suspicion that the elder Caleb or Chelubai may have had no real, but only a genealogical existence, intended to embrace all those families who on the settlement in Canaan were reckoned to the house of Caleb, the son of Jephunneh, the Kenazite.

2. (Φόρος; [Vat. Φαρης:] *Phares*) = PAROSH (1 Esdr. viii. 30; comp. Ezr. viii. 3).

A. C. H.

PHAR'IRA (Φαρῖρά; [Vat. Φαρειδα:] *Alex. Φαρίδα: Phasida*) = PERIDA or PERUDA (1 Esdr. v. 33).

PHAR'ISEES (Φαρισῆαιοι; *Pharisæi*), a religious party or school amongst the Jews at the time of Christ, so called from *Perishin*, the Aramaic form of the Hebrew word *Perushim*, "separated." The name does not occur either in the Old Testament or in the Apocrypha; but it is usually considered that the Pharisees were essentially the same with the Assideans (i. e. *chasidim* = godly men, saints) mentioned in the 1st Book of Maccabees ii. 42, vii. 13-17, and in the 2d Book xiv. 6. And those who admit the existence of Maccabean Psalms find allusions to the Assideans in Psalms lxxix. 2, xxvii. 10, cxxxi. 9, 16, clix. 9, where *chasidim* is translated "saints" in the A. V. (See First's *Handwörterbuch*, i. 420 b.) In the 2d Book of Maccabees, supposed by Geiger to have been written by a Pharisee (*Urschrift und Uebersetzungen der Bibel*, p. 226), there are two passages which tend to illustrate the meaning of the word "separated;" one in xiv. 3, where Alcimus, who had been high-priest, is described as having defiled himself willfully "in the times of the mingling" — ἐν τοῖς τῆς ἐπιμιξίας χρόνοις, — and another in xiv. 38, where the zealous Razis is said to have been accused of Judaism, "in the former times when there was no mingling," ἐν τοῖς ἐμπροσθεν χρόνοις τῆς ἀμιξίας. In both cases the expression "mingling" refers to the time when Antiochus Epiphanes had partially succeeded in breaking down the barrier which divided the Jews

<sup>a</sup> Mahari the Netophathite was however a Zarhite (1 Chr. xxvii. 14), while Heldai, or Heled, the descendant of Othniel, was a Pharizite (1 Chr. xxvii. 15).

from his other subjects; and it was in the resolute determination to resist the adoption of Grecian customs, and the slightest departure from the requirements of their own Law, that the "Separated" took their rise as a party. Compare 1 Macc. i. 13-15, 41-49, 62, 63. Subsequently, however (and perhaps not wholly at first), this by no means exhausted the meaning of the word "Pharisees."

A knowledge of the opinions and practices of this party at the time of Christ is of great importance for entering deeply into the genius of the Christian religion. A cursory perusal of the Gospels is sufficient to show that Christ's teaching was in some respects thoroughly antagonistic to theirs. He denounced them in the bitterest language; and in the sweeping charges of hypocrisy which He made against them as a class, He might even, at first sight, seem to have departed from that spirit of meekness,<sup>a</sup> of gentleness in judging others, and of abstinence from the imputation of improper motives, which is one of the most characteristic and original charms of his own precepts. See Matt. xv. 7, 8, xxiii. 5, 13, 14, 15, 23; Mark vii. 6; Luke xi. 42-44, and compare Matt. vii. 1-5, xii. 29, xii. 19, 20, Luke vi. 28, 37-42. Indeed it is difficult to avoid the conclusion that his repeated denunciations of the Pharisees mainly exasperated them into taking measures for causing his death; so that in one sense He may be said to have shed his blood, and to have laid down his life in protesting against their practice and spirit. (See especially verses 53, 54 in the 11th chapter of Luke, which follow immediately upon the narration of what he said while dining with a Pharisee.) Hence to understand the Pharisees is, by contrast, an aid towards understanding the spirit of uncorrupted Christianity.

*Authorities.*—The sources of information respecting the Pharisees are mainly threefold. 1st. The writings of Josephus, who was himself a Pharisee (*Vit.* p. 2), and who in each of his great works professes to give a direct account of their opinions (*B. J.* ii. 8, § 2-14; *Ant.* xviii. 1, § 2, and compare xiii. 10, § 5-6, xvii. 2, § 4, xiii. 16, § 2, and *Vit.* p. 38). The value of Josephus's accounts

<sup>a</sup> This is thus noticed by Milton, from the point of view of his own peculiar ecclesiastical opinions: "The invincible warrior Zol, shaking loosely the slack reins, drives over the heads of scarlet prelates, and such as are insolent to maintain traditions bruising their stiff necks under his flaming wheels. Thus did the true prophets of old combat with the false. Thus Christ Himself, the fountain of meekness, found acrimony enough to be still gaiting and vexing the pretelical Pharisees."—Apology for Smectymnus.

<sup>b</sup> There are two Gemaras: one of Jerusalem, in which there is said to be no passage which can be proved to be later than the first half of the 4th century; and the other of Babylon, completed about 500 A. D. The latter is the most important, and by far the longest. It was estimated by Chiarini to be fifteen times as long as the Mishna. The whole of the Gemaras has never been translated; though a proposal to make such a translation was brought before the public by Chiarini (*Théorie du Judaïsme appliquée à la Réforme des Israélites*, A. D. 1830). But Chiarini died in 1832. Fifteen treatises of the Jerusalem Gemara, and two of the Babylonian, are given, accompanied by a Latin translation, in Ugolini's *Thesaurus*, vols. xii. -xx. Some interpret Gemara to be identical in meaning with Talmud, signifying "doctrine."

\* Ugolini's *Thesaurus* contains seventy treatises of

would be much greater, if he had not accommodated them, more or less, to Greek ideas, so that in order to arrive at the exact truth, not only much must be added, but likewise much of what he has written must be retranslated, as it were, into Hebrew conceptions. 2dly. The New Testament, including St. Paul's epistles, in addition to the Gospels and the Acts of the Apostles. St. Paul had been instructed by an illustrious Rabbi (Acts xxii. 3); he had been a rigid Pharisee (xxiii. 6, xxvi. 5), and the remembrance of the galling bondage from which he had escaped (Gal. iv. 9, 10, v. 1) was probably a human element in that deep spirituality, and that uncompromising opposition to Jewish ceremonial observances, by which he preëminently contributed to make Christianity the religion of the civilized world. 3dly. The first portion of the Talmud, called the Mishna, or "second law." This is by far the most important source of information respecting the Pharisees, and it may safely be asserted that it is nearly impossible to have adequate conceptions respecting them, without consulting that work. It is a digest of the Jewish traditions, and a compendium of the whole ritual law, reduced to writing in its present form by Rabbi Jehudah the Holy, a Jew of great wealth and influence, who flourished in the 2d century. He succeeded his father Simeon as patriarch of Tiberias, and held that office at least thirty years. The precise date of his death is disputed; some placing it in a year somewhat antecedent to 194, A. D. (see Graetz, *Geschichte der Juden*, iv. 251), while others place it as late as 220 A. D., when he would have been about 81 years old (*Jost's Geschichte des Judenthums und seiner Sekten*, ii. 118). The Mishna is very concisely written, and requires notes. This circumstance led to the Commentaries called Gemara<sup>b</sup> (*i. e.* Supplement, Completion, according to Buxtorf), which form the second part of the Talmud, and which are very commonly meant when the word "Talmud" is used by itself. The language of the Mishna is that of the later Hebrew, purely written on the whole, though with a few grammatical Aramaisms, and interspersed with Greek, Latin, and Aramaic words which had become naturalized. The work

the Jerusalem Gemara with a Latin translation, and three of the Babylonian; see, in addition to the vols. referred to above, vols. xxv. and xxx. Chiarini (*Le Talmud de Babylone trad. en langue française*, vols. i., ii., Leipz. 1821) has translated both the Mishna and Gemara of the first treatise in the Talmud (*Beracoth*, "Blessings"), and prefixed to it a full account of the Talmud by way of introduction. The treatise *Beracoth* has also been published in the original with a German translation, notes, etc., by E. M. Pinner, Berlin, 1842, fol., who has likewise prefixed to it an Introduction to the Talmud. For an account of the various books of the Talmud in English one may see the art. *Talmud* by S. Davidson in Kitto's *Cyclopædia of Bibl. Lit.*, 3d ed. (1866), iii. 988-945; the appendix to Robt. Young's translation of *The Ethics of the Fathers* (Pirke Aboth), Edinb. 1862; or Dr. I. Nordheimer's article, *The Talmud and the Rabbies*, in the *Amer. Bibl. Repository* for Oct. 1839. For fuller information about the Talmud, see Wolf, *Bibl. Hebræa*, ii. 657-968, and Pressel's art. *Talmud* in *Herzog's Real-Encycl.* xv. 615-665; also the famous art. on the Talmud by E. Deutsch in the *Quarterly Review* for Oct. 1867, and an art. by M. Grünbaum in the *North Amer. Review* for April, 1869. There is a brief popular account of the Talmud, by Dr. C. E. Stowe, in the *Atlantic Monthly* for June, 1838.

is distributed into six great divisions or orders. The first (*Zeraim*) relates to "seeds," or productions of the land, and it embraces all matters connected with the cultivation of the soil, and the disposal of its produce in offerings or tithes. It is preceded by a treatise on "Blessings" (*Beracoth*). The 2d (*Moed*) relates to festivals and their observances. The 3d (*Nashim*) to women, and includes regulations respecting betrothals, marriages, and divorces. The 4th (*Nezikin*) relates to damages sustained by means of man, beasts, or things; with decisions on points at issue between man and man in commercial dealings and compacts. The 5th (*Kodashim*) treats of holy things, of offerings, and of the temple-service. The 6th (*Toharoth*) treats of what is clean and unclean. These 6 Orders are subdivided into 61 Treatises, as reckoned by Maimonides; but want of space precludes describing their contents; and the mention of the titles would give little information without such description. For obtaining accurate knowledge on these points, the reader is referred to Surenhusius's admirable edition of the *Mishna* in 6 vols. folio, Amsterdam, 1698-1703, which contains not only a Latin translation of the text, but likewise ample prefaces and explanatory notes, including those of the celebrated Maimonides. Others may prefer the German translation of Jost, in an edition of the *Mishna* wherein the Hebrew text is pointed; but the German is in Hebrew letters, 3 vols. 4to, Berlin, [1832-34. There is also a German translation, with notes, by J. J. Rabe, in 6 vols. 4to, Onolzb. 1760-63, a copy of which is in the library of Yale College. — A.] And an English reader may obtain an excellent idea of the whole work from an English translation of 18 of its Treatises by De Sola and Raphall, London, 1843. There is no reasonable doubt, that although it may include a few passages of a later date, the *Mishna* was composed, as a whole, in the 2d century, and represents the traditions which were current amongst the Pharisees at the time of Christ. This may be shown in the following way. 1st. Josephus, whose autobiography was apparently not written later than A. D. 100, the third year of the reign of Trajan, is an authority to show that up to that period no important change had been introduced since Christ's death; and the general facts of Jewish history render it morally impossible that there should have been any essential alteration either in the reign of Trajan, the epoch of the great Jewish revolts in Egypt, Cyrene, and Cyprus; or in the reign of Hadrian, during which there was the disastrous second rebellion in Judæa. And it was at the time of the suppression of this rebellion that Rabbi Jehudah was born; the tradition being that his birth was on the very same day that Rabbi Akiba was flayed alive and put to death, A. D. 136-137. 2dly. There is frequent reference in the *Mishna* to the sayings and decisions of Hillel and Shammai, the celebrated leaders of two schools among the Pharisees, differing from each other on what would seem to Christians to be comparatively unimportant points. But Hillel and

Shammai flourished somewhat before the birth of Christ; and, except on the incredible supposition of forgeries or mistakes on a very large scale, their decisions conclusively furnish particulars of the general system in force among the Pharisees during the period of Christ's teaching. There is likewise occasional reference to the opinion of Rabbi Gamaliel, the grandson of Hillel, and the teacher of St. Paul. 3dly. The *Mishna* contains numerous ceremonial regulations, especially in the 5th Order, which presuppose that the Temple-service is still subsisting, and it cannot be supposed that these were invented after the destruction of the Temple by Titus. But these breathe the same general spirit as the other traditions, and there is no sufficient reason for assuming any difference of date between the one kind and the other. Hence for facts concerning the system of the Pharisees, as distinguished from an appreciation of its merits or defects, the value of the *Mishna* as an authority is greater than that of all other sources of information put together.

Referring to the *Mishna* for details, it is proposed in this article to give a general view of the peculiarities of the Pharisees; afterwards to notice their opinions on a future life and on free-will; and finally, to make some remarks on the proselytizing spirit attributed to them at the time of Christ. Points noticed elsewhere in this Dictionary will be as far as possible avoided. Hence information respecting Corban and Phylacteries, which in the New Testament are peculiarly associated with the Pharisees, must be sought for under the appropriate titles. See CORBAN and FRONTLETS.

I. The fundamental principle of the Pharisees common to them with all orthodox modern Jews is, that by the side of the written Law regarded as a summary of the principles and general laws of the Hebrew people, there was an oral law to complete and to explain the written Law. It was an article of faith that in the Pentateuch there was no precept, and no regulation, ceremonial, doctrinal, or legal, of which God had not given to Moses all explanations necessary for their application, with the order to transmit them by word of mouth (Klein's *Vérité sur le Talmud*, p. 9). The classical passage in the *Mishna* on this subject is the following: "Moses received the (oral) law from Sinai, and delivered it to Joshua, and Joshua to the elders, and the elders to the prophets, and the prophets to the men of the Great Synagogue" (*Pirke Abôth*, i.). This remarkable statement is so destitute of what would at the present day be deemed historical evidence, and would, it might be supposed, have been rendered so incredible to a Jew by the absence of any distinct allusion to the fact in the Old Testament, that it is interesting to consider by what process of argument the principle could ever have won acceptance. It may be conceived in the following way. The Pentateuch, according to the Rabbins, contains 613 laws, including 248 commands, and 365 prohibitions; but whatever may be the number of the laws, however minutely they may be anatomized, or into whatever form they may be thrown, there is nowhere an

<sup>a</sup> A passage in Deuteronomy (xvii. 8-11) has been interpreted so as to serve as a basis for an oral law. But that passage seems merely to prescribe obedience to the priests, the Levites, and to the judges in civil and criminal matters of controversy between man and

in ver. 11 has favored the rabbinical interpretation. In the "Festival Prayers" of the English Jews, p. 69, for Pentecost, it is stated, of God, in a prayer, "He explained it (the Law) to his people face to face, and on every point are ninety-eight explanations."

allusion to the duty of prayer, or to the doctrine of a future life. The absence of the doctrine of a future life has been made familiar to English theologians by the author of "The Divine Legation of Moses;" and the fact is so undeniable, that it is needless to dwell upon it farther. The absence of any injunction to pray has not attracted equal attention, but seems to be almost equally certain. The only passage which by any ingenuity has ever been interpreted to enjoin prayer is in Ex. xxiii. 25, where the words are used, "And ye shall serve Jehovah your God." But as the Pentateuch abounds with specific injunctions as to the mode of serving Jehovah; by sacrifices, by meat-offerings, by drink-offerings, by the rite of circumcision, by observing festivals, such as the Sabbath, the Passover, the feast of weeks, and the feast of tabernacles, by obeying all his ceremonial and moral commands, and by loving him, it is contrary to sound rules of construction to import into the general word "serve" Jehovah the specific meaning "pray to" Jehovah, when that particular mode of service is nowhere distinctly commanded in the Law. There being then thus no mention either of a future life, or of prayer as a duty,<sup>a</sup> it would be easy for the Pharisees at a time when prayer was universally practiced, and a future life was generally believed in or desired, to argue from the supposed inconceivability of a true revelation not commanding prayer, or not asserting a future life, to the necessity of Moses having treated of both orally. And when the principle of an oral tradition in two such important points was once admitted, it was easy for a skillful controversialist to carry the application of the principle much farther by insisting that there was precisely the same evidence for numerous other traditions having come from Moses as for those two; and that it was illogical, as well as presumptuous, to admit the two only, and to exercise the right of selection and private judgment respecting the rest.

It is not to be supposed that all the traditions which bound the Pharisees were believed to be direct revelations to Moses on Mount Sinai. In addition to such revelations, which were not disputed, although there was no proof from the written Law to support them, and in addition to interpretations received from Moses, which were either implied in the written Law or to be elicited from them by reasoning, there were three other classes of traditions. 1st. Opinions on disputed points, which were the result of a majority of votes. To this class belonged the secondary questions on which there was a difference between the schools of Hillel and Shammai. 2dly. Decrees made by prophets and wise men in different ages, in conformity with a saying attributed to the men of the Great Synagogue, "Be deliberate in judgment; train up many disciples; and make a fence for the Law." These carried prohibitions farther than the written Law or oral law of Moses, in order to protect the Jewish people from temptations to sin or pollution. For example, the injunction, "Thou shalt not see the

kid in his mother's milk,"<sup>b</sup> Ex. xxiii. 19, xxxiv. 96 Deut. xiv. 21; was interpreted by the oral law to mean that the flesh of quadrupeds might not be cooked, or in any way mixed with milk for food; so that even now amongst the orthodox Jews milk may not be eaten for some hours after meat. But this was extended by the wise men to the flesh of birds; and now, owing to this "fence to the Law," the admixture of poultry with any milk, or its preparations, is rigorously forbidden. When once a decree of this kind has been passed, it could not be reversed; and it was subsequently said that not even Elijah himself could take away anything from the 18 points which had been determined on by the school of Shammai and the school of Hillel. 3dly. Legal decisions of proper ecclesiastical authorities on disputed questions. Some of these were attributed to Moses, some to Joshua, and some to Ezra. Some likewise to Rabbis of later date, such as Hillel and Gamaliel. However, although in these several ways, all the traditions of the Pharisees were not deemed direct revelations from Jehovah, there is no doubt that all became invested, more or less, with a peculiar sanctity; so that, regarded collectively, the study of them and the observance of them became as imperative as the study and observance of the precepts in the Bible.

Viewed as a whole, they treated men like children, formalizing and defining the minutest particulars of ritual observances. The expressions of "bondage," of "weak and beggarly elements," and of "burdens too heavy for men to bear," faithfully represent the impression produced by their multiplicity. An elaborate argument might be advanced for many of them individually, but the sting of them consisted in their aggregate number, which would have a tendency to quench the fervor and the freshness of a spiritual religion. They varied in character, and the following instances may be given of three different classes: 1st, of those which, admitting certain principles, were points reasonable to define; 2dly, of points defined which were superfluously particularized; and 3dly, of points defined where the discussion of them at all was superstitious and puerile. Of the first class the very first decision in the Mishna is a specimen. It defines the period up to which a Jew is bound, as his evening service, to repeat the Shema. The Shema is the celebrated passage in Deut. vi. 4-9, commencing, "Hear, O Israel: the Lord our God is one Lord, and thou shalt love the Lord thy God with all thine heart, and with all thy soul, and with all thy might." It is a tradition that every Israelite is bound to recite this passage twice in the twenty-four hours, morning and evening—for which authority is supposed to be found in verse 7, where it is said of these words, "Thou shalt talk of them . . . when thou liest down and when thou risest up." The compulsory recitation of even these words twice a day might be objected to as leading to formalism; but, accepting the recitation as a religious duty, it might not be unreasonable that the range of time permitted for the recitation should be

<sup>a</sup> Mohammed was preceded both by Christianity and by the latest developments of Judaism from both of which he borrowed much. See, as to Judaism, Geiger's essay, *Was hat Mohammed aus dem Judenthume aufgenommen?* Still, one of the most marked characteristics of the Korân is the unwearied reiteration of the duty of prayer, and of the certainty of a future state of retribution.

<sup>b</sup> Although this prohibition occurs three times, no light is thrown upon its meaning by the context. The most probable conjecture is that given under the heading of IDOLATRY (ii. 1129 a), that it was aimed against some practice of idolaters. Mr. Laing gives a similar explanation of the Christian prohibition in Scandinavia against eating horse-flesh.

defined. The following is the decision on this point in the Mishna, *Beracoth* i.: "From what time do they recite the Shema in the evening? From the time that the priests are admitted to eat their oblations till the end of the first watch. The words of Rabbi Eliezer: but the wise men say, up to midnight. Rabban Gamaliel says, until the column of dawn has arisen. Case: His sons returning from a house of entertainment said, We have not yet recited the Shema; to whom he said, If the column of dawn has not yet arisen, you are bound to recite it. But not this alone; but wherever the wise men have said 'to midnight,' their injunction is in force until the column of dawn has arisen. . . . If so, why did the wise men say till midnight? In order to keep men far from transgression." The following is an instance of the second class. It relates to the lighting candles on the eve of the Sabbath, which is the duty of every Jew: it is found in the Mishna, in the treatise *Shabbath*, c. ii., and is printed in the Hebrew and English Prayer-Book, according to the form of the German and Polish Jews, p. 66, from which to avoid objections, this translation, and others, where it is possible, are taken. "With what sort of wick and oil are the candles of the Sabbath to be lighted, and with what are they not to be lighted? They are not to be lighted with the woolly substance that grows upon cedars, nor with undressed flax, nor with silk, nor with rushes, nor with leaves out of the wilderness, nor with moss that grows on the surface of water, nor with pitch, nor with wax, nor with oil made of cotton-seed, nor with the fat of the tail or the entrails of beasts. Nathan Hamody saith it may be lighted with boiled suet; but the wise men say, be it boiled or not boiled, it may not be lighted with it. It may not be lighted with burnt oil on festival-days. Rabbi Ishmael says it may not be lighted with train-oil because of honor to the Sabbath; but the wise men allow of all sorts of oil: with mixed oil, with oil of nuts, oil of radish-seed, oil of fish, oil of gourd-seed, of resin and gum. Rabbi Tarphun saith they are not to be lighted but with oil of olives. Nothing that grows out of the woods is used for lighting but flax, and nothing that grows out of woods doth not pollute by the pollution of a tent but flax: the wick of cloth that is doubled, and has not been singed, Rabbi Eleazar saith it is unclean, and may not be lighted withal; Rabbi Akibah saith it is clean, and may be lighted withal. A man may not split a shell of an egg and fill it with oil and put it in the socket of a candlestick, because it shall blaze, though the candlestick be of earthenware; but Rabbi Jehudah permits it: if the potter made it with a hole through at first, it is allowed, because it is the same vessel. No man shall fill a platter with oil, and give it place next to the lamp, and put the head of the wick in a platter to make it drop the oil; but Rabbi Jehudah permits it." Now in regard to details of this kind, admitting it was not unreasonable to make some regulations concerning lighting candles, it certainly seems that the above particulars are too minute, and that all which was really essential could have been brought within a much smaller compass. 3dly. A specimen of the 3d class may be pointed out in the beginning of the treatise on festivals (*Moel*), entitled *Beitzah*, an *Egg*, from the following case of the egg being the first point discussed in it. We are gravely informed that "an egg laid on a festival may be eaten, according to the school of Shammai; but the school of

Hillel says it must not be eaten." In order to understand this important controversy, which reminds us of the two parties in a well-known work who took their names from the end on which each held that an egg ought to be broken, it must be observed that, for a reason into which it is unnecessary to enter at present, it was admitted on all hands, both by the school of Hillel and the school of Shammai, that if a bird which was neither to be eaten nor killed laid an egg on a festival, the egg was not to be eaten. The only point of controversy was respecting an egg laid by a hen that would be afterwards eaten. Now the school of Hillel interdicted the eating of such an egg, on account of a passage in the 5th verse of the 16th chapter of *Exodus*, wherein Jehovah said to Moses respecting the people who gathered manna, "on the sixth day they shall prepare that which they bring in." For it was inferred from these words that on a common day of the week a man might "prepare" for the Sabbath, or prepare for a feast-day, but that he might not prepare for the Sabbath on a feast-day, nor for a feast-day on the Sabbath. Now, as an egg laid on any particular day was deemed to have been "prepared" the day before, an egg laid on a feast-day following a Sabbath might not be eaten, because it was prepared on the Sabbath, and the eating of it would involve a breach of the Sabbath. And although all feast-days did not fall on a day following the Sabbath, yet as many did, it was deemed better, *ex majori cautela*, "as a fence to the Law," to interdict the eating of an egg which had been laid on any feast-day, whether such day was or was not the day after the Sabbath (see Surenhusius's *Mishna*, ii. 282). In a world wherein the objects of human interest and wonder are nearly endless, it certainly does seem a degradation of human intelligence to exercise it on matters so trifling and petty.

In order, however, to observe regulations on points of this kind, mixed with others less objectionable, and with some which, regarded from a certain point of view, were in themselves individually not unreasonable, the Pharisees formed a kind of society. A member was called a *châbêr* (חַבֵּר), and those among the middle and lower classes who were not members were called "the people of the land," or the vulgar. Each member undertook, in the presence of three other members, that he would remain true to the laws of the association. The conditions were various. One of transcendent importance was that a member should refrain from everything that was not tithed (comp. Matt. xxiii. 23, and Luke xviii. 12). The Mishna says, "He who undertakes to be *trustworthy* (a word with a technical Pharisaical meaning) tithes whatever he eats, and whatever he sells, and whatever he buys, and does not eat and drink with the people of the land." This was a point of peculiar delicacy, for the portion of produce reserved as tithes for the priests and Levites was *holy*, and the enjoyment of what was holy was a deadly sin. Hence a Pharisee was bound, not only to ascertain as a buyer whether the articles which he purchased had been duly tithed, but to have the same certainty in regard to what he eat in his own house and when taking his meals with others. And thus Christ, in eating with publicans and sinners, ran counter to the first principles, and shocked the most deeply-rooted prejudices, of Pharisaism; for, independently of other obvious considerations, He ate and

drank with "the people of the land," and it would have been assumed as undoubted that He partook on such occasions of food which had not been duly ritually.

Perhaps some of the most characteristic laws of the Pharisees related to what was clean (*tâhôr*) and unclean (*tâmé*). Among all oriental nations there has been a certain tendency to symbolism in religion; and if any symbolism is admitted on such a subject, nothing is more natural than to symbolize purity and cleanliness of thought by cleanliness of person, dress, and actions. Again, in all climates, but especially in warm climates, the sanitary advantages of such cleanliness would tend to confirm and perpetuate this kind of symbolism; and when once the principle was conceded, superstition would be certain to attach an intrinsic moral value to the rigid observance of the symbol. In addition to what might be explained in this manner, there arose among the Jews — partly from opposition to idolatrous practices, or to what savored of idolatry, partly from causes which it is difficult at the present day even to conjecture, possibly from mere prejudice, individual antipathy, or strained fanciful analogies — peculiar ideas concerning what was clean and unclean, which at first sight might appear purely conventional. But, whether their origin was symbolical, sanitary, religious, fanciful, or conventional, it was a matter of vital importance to a Pharisee that he should be well acquainted with the Pharisaical regulations concerning what was clean and what was unclean; for, as among the modern Hindoos (some of whose customs are very similar to those of the Pharisees), every one technically unclean is cut off from almost every religious ceremony, so, according to the Levitical Law, every unclean person was cut off from all religious privileges, and was regarded as defiling the sanctuary of Jehovah (Num. vi. 20; compare Ward's *Hindoo History, Literature, and Religion*, ii. 147). On principles precisely similar to those of the Levitical laws (Lev. xx. 25, xxii. 4-7), it was possible to incur these awful religious penalties either by *eating* or by *touching* what was unclean in the Pharisaical sense. In reference to *eating*, independently of the slaughtering of holy sacrifices, which is the subject of two other treatises, the Mishna contains one treatise called *Cholin*, which is specially devoted to the slaughtering of fowls and cattle for domestic use (see Surenhusius, v. 114; and De Sola and Raphall, p. 325). One point in its very first section is by itself vitally distinctive; and if the treatise had contained no other regulation, it would still have raised an insuperable barrier between the free social intercourse of Jews and other nations. This point is, "that *any thing* slaughtered by a heathen should be deemed unfit to be eaten, like the

carcase of an animal that had died of itself, and like such carcase should pollute the person who carried it." <sup>a</sup> On the reasonable assumption that under such circumstances animals used for food would be killed by Jewish slaughterers, regulations the most minute are laid down for their guidance. In reference likewise to *touching* what is unclean, the Mishna abounds with prohibitions and distinctions no less minute; and by far the greatest portion of the 6th and last "Order" relates to impurities contracted in this manner. Referring to that "Order" for details, it may be observed that to any one fresh from the perusal of them, and of others already adverted to, the words "Touch not, taste not, handle not," seem a correct but almost a pale summary of their drift and purpose (Col. ii. 21); and the stern antagonism becomes vividly visible between them and Him who proclaimed boldly that a man was defiled not by anything he ate, but by the bad thoughts of the heart alone (Matt. xv. 11); and who, even when the guest of a Pharisee, pointedly abstained from washing his hands before a meal, in order to rebuke the superstition which attached a moral value to such a ceremonial act. (See Luke xi. 37-40; and compare the Mishna vi. 480, where there is a distinct treatise, *Yadain*, on the washing of hands.) <sup>b</sup>

It is proper to add that it would be a great mistake to suppose that the Pharisees were wealthy and luxurious, much more that they had degenerated into the vices which were imputed to some of the Roman popes and cardinals during the 200 years preceding the Reformation. Josephus compared the Pharisees to the sect of the Stoics. He says that they lived frugally, in no respect giving in to luxury, but that they followed the leadership of reason in what it had selected and transmitted as a good (*Ant.* xviii. 1, § 3). With this agrees what he states in another passage, that the Pharisees had so much weight with the multitude, that if they said anything against a king or a high-priest they were at once believed (xiii. 10, § 5); for this kind of influence is more likely to be obtained by a religious body over the people, through austerity and self-denial, than through wealth, luxury, and self-indulgence. Although there would be hypocrites among them, it would be unreasonable to charge all the Pharisees as a body with hypocrisy, in the sense wherein we at the present day use the word. A learned Jew, now living, charges against them rather the holiness of works than hypocritical holiness — *Werkheiligkeit, nicht Scheinheiligkeit* (Herzfeld, *Geschichte des Volkes Israel*, iii. 359). At any rate they must be regarded as having been some of the most intense formalists whom the world has ever seen; and looking at the average standard of excellence among mankind, it

<sup>a</sup> At the present day a strict orthodox Jew may not eat meat of any animal, unless it has been killed by a Jewish butcher. According to Mr. I. Disraeli (*The Genius of Judaism*, p. 154), the butcher searches the animal for any blemish, and, on his approval, causes a leaden seal, stamped with the Hebrew word *câshâr* (lawful), to be attached to the meat, attesting its "cleanness." Mr. Disraeli likewise points out that in Herodotus (ii. 88) a seal is recorded to have been used for a similar purpose by Egyptian priests, to attest that a bull about to be sacrificed was "clean," *καθαρός*. The Greek and Hebrew words are perhaps akin in origin, *s* and *th* being frequently interchanged in language.

<sup>b</sup> The Egyptians appear to have had ideas of "un-

cleanness" through tasting, touching, and handling, precisely analogous to those of the Levitical Law and of the Pharisees. The priests would not endure even to look at beans, deeming them not clean, *ουζίζουρις οὐ καθαρόν μιν εἶναι ὄσπριον* (*καθαρόν* is the Greek word in the LXX. for *tâhôr*). "No Egyptian," says Herodotus, "would salute a Greek with a kiss, nor use a Greek knife, or spits, or cauldron; or taste the meat of an ox which had been cut by a Greek knife. They drank out of bronze vessels, rinsing them perpetually. And if any one accidentally touched a pig, he would plunge into the Nile, without stopping to undress" (*Herodot.* ii. 37, 41, 47). Just as the Jews regarded all other nations, the Egyptians regarded all other nations, including the Jews: namely, as unclean.

a nearly certain that men whose lives were spent in the ceremonial observances of the Mishna, would cherish feelings of self-complacency and spiritual pride not justified by intrinsic moral excellence. The supercilious contempt towards the poor publican, and towards the tender penitent love that bathed Christ's feet with tears, would be the natural result of such a system of life.

It was alleged against them, on the highest spiritual authority, that they "made the word of God of none effect by their traditions." This would be true in the largest sense, from the purest form of religion in the Old Testament being almost incompatible with such endless forms (Mic. vi. 8); but it was true in another sense, from some of the traditions being decidedly at variance with genuine religion. The evasions connected with Corban are well known. To this may be added the following instances: It is a plain precept of morality and religion that a man shall pay his debts (P's. xxxvii. 21); but, according to the treatise of the Mishna called *Avodah zarah*, i. 1, a Jew was prohibited from paying money to a heathen three days before any heathen festival, just as if a debtor had any business to meddle with the question of how his creditor might spend his own money. In this way, Cato or Cicero might have been kept for a while out of his legal rights by an ignoble Jewish money-dealer in the Transiberine district. In some instances, such a delay in the payment of debts might have ruined a heathen merchant. Again, it was an injunction of the Pentateuch that an Israelite should "love his neighbor as himself" (Lev. xix. 18); and although in this particular passage it might be argued that by "neighbor" was meant a brother Israelite, it is evident that the spirit of the precept went much farther (Luke x. 27-29, &c.). In plain violation of it, however, a Jewish midwife is forbidden, in the *Avodah zarah*, ii. 1, to assist a heathen mother in the labors of childbirth, so that through this prohibition a heathen mother and child might have been left to perish for want of a Pharisee's professional assistance. A great Roman satirist, in holding up to view the unsocial customs of the Roman Jews, specifies as two of their traditions that they were not to show the way, or point out springs of water to any but the circumcised.

"Tradidit arcano quodcumque volumine Moses,  
Non monstrare vias eadem nisi sacra colenti,  
Quæsitum ad fontem solos deducere verpos."

JUVENAL, xiv. 102-4.

Now the truth of this statement has in our times been formally denied, and it seems certain that neither of these particular prohibitions is found in the Mishna; but the regulation respecting the Jewish midwives was more unsocial and cruel than the two practices referred to in the satirist's lines; and individual Pharisees, while the spirit of antagonism to the Romans was at its height, may have supplied instances of the imputed churlishness, al-

though not justified by the letter of their traditions. In fact, Juvenal did really somewhat understatement what was true in principle, not of the Jews universally, but of the most important religious party among the Jews, at the time when he wrote.

An analogy has been pointed out by Geiger (p. 104) between the Pharisees and our own Puritans; and in some points there are undoubted features of similarity, beginning even with their names. Both were innovators: the one against the legal orthodoxy of the Sadducees, the others against Episcopacy. Both of them had republican tendencies: the Pharisees glorifying the office of rabbi, which depended on learning and personal merit, rather than that of priest, which, being hereditary, depended on the accident of birth; while the Puritans in England abolished monarchoy and the right of hereditary legislation. Even in their zeal for religious education there was some resemblance: the Pharisees exerting themselves to instruct disciples in their schools with an earnestness never equaled in Rome or Greece; while in Scotland the Puritans set the most brilliant example to modern Europe of parochial schools for the common people. But here comparison ceases. In the most essential points of religion they were not only not alike, but they were directly antagonistic. The Pharisees were under the bondage of forms in the manner already described; while, except in the strict observance of the Sabbath, the religion of the Puritans was in theory purely spiritual, and they assailed even the ordinary forms of Popery and Prelacy with a bitterness of language copied from the denunciations of Christ against the Pharisees.

II. In regard to a future state, Josephus presents the ideas of the Pharisees in such a light to his Greek readers, that whatever interpretation his ambiguous language might possibly admit, he obviously would have produced the impression on Greeks that the Pharisees believed in the transmigration of souls. Thus his statement respecting them is, "They say that every soul is imperishable, but that the soul of good men only passes over (or transmigrates) into another body—*μεταβαίνειν εἰς ἕτερον σώμα*—while the soul of bad men is chastised by eternal punishment" (*B. J.* ii. 8, § 14; compare iii. 8, § 5, and *Ant.* xviii. 1, § 3, and Boettcher, *De Inferis*, pp. 519, 552). And there are two passages in the Gospels which might countenance this idea: one in Matt. xiv. 2, where Herod the tetrarch is represented as thinking that Jesus was John the Baptist risen from the dead (though a different color is given to Herod's thoughts in the corresponding passage, Luke ix. 7-9); and another in John ix. 2, where the question is put to Jesus whether the blind man himself<sup>a</sup> had sinned, or his parents, that he was born blind? Notwithstanding these passages, however, there does not appear to be sufficient reason for doubting that the Pharisees believed in a resurrection of the dead very much in the same sense as the early

<sup>a</sup> At least five different explanations have been suggested of the passage John ix. 2. 1st. That it alludes to a Jewish doctrine of the transmigration of souls. 2dly. That it refers to an Alexandrine doctrine of the preëxistence of souls, but not to their transmigration. 3dly. That the words mean, "Did this man sin, as the Greeks say, or did his parents sin, as we say, that he was born blind?" 4thly. That it involves the Rabbinical idea of the possibility of an infant's sinning in his mother's womb. 5thly. That it is founded on the

predestinarian notion that the blindness from birth was a preceding punishment for sins which the blind man afterwards committed: just as it has been suggested, in a remarkable passage, that the death before 1688 of the Princess Anne's infant children (three in number) was a preceding punishment for her subsequent abandonment of her father, James II. See Stewart's *Philosophy*, vol. ii. App. vi., and the Commentaries of De Wette and Lücke, *ad locum*.

Christians. This is most in accordance with St. Paul's statement to the chief priests and council (Acts xxiii. 6), that he was a Pharisee, the son of a Pharisee, and that he was called in question for the hope and resurrection of the dead — a statement which would have been peculiarly disingenuous, if the Pharisees had merely believed in the transmigration of souls; and it is likewise almost implied in Christ's teaching, which does not insist on the doctrine of a future life as anything new, but assumes it as already adopted by his hearers, except by the Sadducees, although he condemns some unspiritual conceptions of its nature as erroneous (Matt. xxii. 30; Mark xii. 25; Luke xx. 34-36). On this head the Mishna is an illustration of the ideas in the Gospels, as distinguished from any mere transmigration of souls; and the peculiar phrase, "the world to come," of which  $\delta$   $\alpha\iota\omega\acute{\nu}$   $\delta$   $\epsilon\rho\chi\acute{\alpha}\mu\epsilon\upsilon\omicron\varsigma$  was undoubtedly only the translation, frequently occurs in it (עוֹלָם הַבָּא), *Avoth*, ii. 7, iv. 16; comp. Mark x. 30; Luke xviii. 30). This phrase of Christians, which is anterior to Christianity, but which does not occur in the O. T., though fully justified by certain passages to be found in some of its latest books,<sup>a</sup> is essentially different from Greek conceptions on the same subject; and generally, in contradistinction to the purely temporal blessings of the Mosaic legislation, the Christian ideas that this world is a state of probation, and that every one after death will have to render a strict account of his actions, were expressed by Pharisees in language which it is impossible to misunderstand: "This world may be likened to a court-yard in comparison of the world to come; therefore prepare thyself in the antechamber that thou mayest enter into the dining-room" (*Avoth*, iv. 16). "Everything is given to man on security, and a net is spread over every living creature; the shop is open, and the merchant credits; the book is open, and the hand records; and whosoever chooses to borrow may come and borrow: for the collectors are continually going round daily, and obtain payment of man, whether with his consent or without it; and the judgment is true justice; and all are prepared for the feast" (*Avoth*, iii. 16). "Those who are born are doomed to die, the dead to live, and the quick to be judged; to make us know, understand, and be informed that He is God: He is the Former, Creator, Intelligent Being, Judge, Witness, and suing Party, and will judge thee hereafter. Blessed be He; for in his presence there is no unrighteousness, forgetfulness, respect of persons, nor acceptance of a bribe; for everything is his. Know also that everything is done according to the account, and let not thine evil imagination persuade thee that the grave is a place of refuge for thee: for against thy will wast thou formed, and against thy will wast thou born; and against thy will dost thou live, and against thy will wilt thou die; and against thy will must thou hereafter render an account, and receive judgment in the presence of the Supreme King of kings, the Holy God, blessed is He;" (*Avoth*, iv. 22). Still it must be borne in mind that the actions of which such a strict account was to be rendered were not merely those referred to by the spiritual prophets Isaiah and Micah (Is. i. 16, 17; Mic. vi. 8), nor even those

enjoyed in the Pentateuch, but included those fabulously supposed to have been orally transmitted by Moses on Mount Sinai, and the whole body of the traditions of the elders. They included, in fact, all those ceremonial "works," against the efficacy of which, in the deliverance of the human soul, St. Paul so emphatically protested.

III. In reference to the opinions of the Pharisees concerning the freedom of the will, a difficulty arises from the very prominent position which they occupy in the accounts of Josephus, whereas nothing vitally essential to the peculiar doctrines of the Pharisees seems to depend on those opinions, and some of his expressions are Greek, rather than Hebrew. "There were three sects of the Jews," he says, "which had different conceptions respecting human affairs, of which one was called Pharisees, the second Sadducees, and the third Essenes. The Pharisees say that some things, and not all things, are the work of fate; but that some things are in our own power to be and not to be. But the Essenes declare that Fate rules all things, and that nothing happens to man except by its decree. The Sadducees, on the other hand, take away Fate, holding that it is a thing of nought, and that human affairs do not depend upon it; but in their estimate all things are in the power of ourselves, as being ourselves the causes of our good things, and meeting with evils through our own inconsiderateness" (comp. xviii. 1, § 3, and *B. J.* ii. 8, § 14). On reading this passage, and the others which bear on the same subject in Josephus's works, the suspicion naturally arises that he was biassed by a desire to make the Greeks believe that, like the Greeks, the Jews had philosophical sects amongst themselves. At any rate his words do not represent the opinions as they were really held by the three religious parties. We may feel certain, that the influence of fate was not the point on which discussions respecting free-will turned, though there may have been differences as to the way in which the interposition of God in human affairs was to be regarded. Thus the ideas of the Essenes are likely to have been expressed in language approaching to the words of Christ (Matt. x. 29, 30, vi. 25-34), and it is very difficult to believe that the Sadducees, who accepted the authority of the Pentateuch and other books of the Old Testament, excluded God, in their conceptions, from all influence on human actions. On the whole, in reference to this point, the opinion of Graetz (*Geschichte der Juden*, iii. 509) seems not improbable, that the real difference between the Pharisees and Sadducees was at first practical and political. He conjectures that the wealthy and aristocratic Sadducees in their wars and negotiations with the Syrians entered into matters of policy and calculations of prudence, while the zealous Pharisees, disdaining worldly wisdom, laid stress on doing what seemed right, and on leaving the event to God: and that this led to differences in formal theories and metaphysical statements. The precise nature of those differences we do not certainly know, as no writing of a Sadducee on the subject has been preserved by the Jews, and on matters of this kind it is unsafe to trust unreservedly the statements of an adversary. [SADDUCEES.]

<sup>a</sup> The earliest text in support of the expression is perhaps "the new heavens and the new earth" prom-

ised by Isaiah (Is. lx. 17-22). Compare Dan. vii. 21 ii. 44; Is. xxvi. 19.

IV In reference to the spirit of proselytism among the Pharisees, there is undisputable authority for the statement that it prevailed to a very great extent at the time of Christ (Matt. xxiii. 15); and attention is now called to it on account of its probable importance in having paved the way for the early diffusion of Christianity. The district of Palestine, which was long in proportion to its breadth, and which yet, from Dan to Beersheba, was only 160 Roman miles, or not quite 148 English miles long, and which is represented as having been civilized, wealthy, and populous 1,000 years before Christ, would under any circumstances have been too small to continue maintaining the whole growing population of its children. But, through kidnapping (Joel iii. 6), through leading into captivity by military incursions and victorious enemies (2 K. xvii. 6, xviii. 11, xxiv. 15; Am. i. 6, 9), through flight (Jer. xliii. 4-7), through commerce (Joseph. *Ant.* xx. 2, § 3), and probably through ordinary emigration, Jews at the time of Christ had become scattered over the fairest portions of the civilized world. On the day of Pentecost, that great festival on which the Jews suppose Moses to have brought the perfect Law down from heaven (*Festival Prayers for Pentecost*, p. 6), Jews are said to have been assembled with one accord in one place at Jerusalem, "from every region under heaven." Admitting that this was an oriental hyperbole (comp. John xxi. 25), there must have been some foundation for it in fact; and the enumeration of the various countries from which Jews are said to have been present gives a vivid idea of the widely-spread existence of Jewish communities. Now it is not unlikely, though it cannot be proved from Josephus (*Ant.* xx. 2, § 3), that missions and organized attempts to produce conversions, although unknown to Greek philosophers, existed among the Pharisees (De Wette, *Exegetisches Handbuch*, Matt. xxiii. 15). But, at any rate, the then existing regulations or customs of synagogues afforded facilities which do not exist now either in synagogues or Christian churches for presenting new views to a congregation (Acts xvii. 2; Luke iv. 16). Under such auspices the proselytizing spirit of the Pharisees inevitably stimulated a thirst for inquiry, and accustomed the Jews to theological controversies. Thus there existed precedents and favoring circumstances for efforts to make proselytes, when the greatest of all missionaries, a Jew by race, a Pharisee by education, a Greek by language, and a Roman citizen by birth, preaching the resurrection of Jesus to those who for the most part already believed in the resurrection of the dead, confronted the elaborate ritual-system of the written and oral law by a pure spiritual religion: and thus obtained the coöperation of many Jews themselves in breaking down every barrier between Jew, Pharisee, Greek, and Roman, and in endeavoring to unite all mankind by the brotherhood of a common Christianity.

*Literature.*—In addition to the New Testament, Josephus, and the Mishna, it is proper to read Epiphanius *Adversus Hæreses*, lib. I. xvi.; and the notes of Jerome to Matt. xx. i. 23, xxiii. 1, &c., though the information given by both these writers is very imperfect.

In modern literature, see several treatises in Ugolino's *Thesaurus*, vol. xxii.; and Lightfoot's *Horæ Hebraicæ* on Matt. iii. 7, where a curious rabbinical description is given of seven sects of Pharisees, which, from its being destitute of any

intrinsic value, is not inserted in this article. See likewise Brucker's *Historia Critica Philosophiæ*, ii. 744-759; Milman's *History of the Jews*, ii. 71; Ewald's *Geschichte des Volkes Israel*, iv. 415-419; and the *Jahrhundert des Heils*, p. 5, &c. of Göröer, who has insisted strongly on the importance of the Mishna, and has made great use of the Talmud generally. See also the following works by modern learned Jews: Jost, *Geschichte des Judenthums und seiner Sekten*, i. 196; Grätz, *Geschichte der Juden*, iii. 508-518; Herzfeld, *Geschichte des Volkes Israel*, iii. 358-362; and Geiger, *Urschrift und Uebersetzungen der Bibel*, p. 103, &c. E. T.

PHAR'OSH (פָּרֹשׁ) [*a flea*]: *φῶρος*: *Pharos*. Elsewhere PAROSH. The same variation is found in the Geneva Version (Ezr. viii. 3).

PHAR'PAR (פָּרְפָר) [*swift, rapid*, *Gen.* Fürst], i. e. Parpar: [Rom. *Φαρφαρ*; Vat.] *ἄφαρφα*: Alex. *Φαρφαρα*: *Pharphara*. The second of the two "rivers of Damascus"—Abana and Parpar—alluded to by Naaman (2 K. v. 12).

The two principal streams in the district of Damascus are the *Barada* and the *Awaj*: in fact, there are no others worthy of the name of "river." There are good grounds for identifying the *Barada* with the Abana, and there seems therefore to be no alternative but to consider the *Awaj* as being the Parpar. But though in the region of Damascus, the *Awaj* has not, like the *Barada*, any connection with the city itself. It does not approach it nearer than 8 miles, and is divided from it by the ridge of the *Jebel Aswad*. It takes its rise on the S. E. slopes of Hermon, some 5 or 6 miles from *Beit Jenn*, close to a village called *Arny*, the name of which it bears during the first part of its course. It then runs S. E. by *Kefr Hawwar* and *Sasa*, but soon recovering itself by a turn northwards, ultimately ends in the *Bahret Hijmah*, the most southerly of the three lakes or swamps of Damascus, nearly due east of, and about 40 miles from, the point at which it started. The *Awaj* has been investigated by Dr. Thomson, and is described by him in the *Bibliotheca Sacra* for May, 1849; see also Robinson (*Bibl. Res.* iii. 447, 448). It is evidently much inferior to the *Barada*, for while that is extraordinarily copious, and also perennial in the

α The A at the commencement of this name suggests the Hebrew definite article; but no trace of it appears in the Hebrew MSS.

hottest seasons, this is described as a small lively <sup>a</sup> stream, not unfrequently dry in the lower part of its course. On the maps of Kiepert (1856) and Van de Velde (1858) the name of *Wady Barbar* is found, apparently that of a valley parallel to the *Army* near *Kefr Haawar*; but what the authority for this is the writer has not succeeded in discovering. Nor has he found any name on the maps or in the lists of Dr. Robinson answering to *Ta'arah*, توري, by which Pharpur is rendered in the Arabic version of 2 K. v. 12.

The tradition of the Jews of Damascus, as reported by Schwarz (54, also 20, 27), is curiously subversive of our ordinary ideas regarding these streams. They call the river *Fijeh* (that is the Barada) the Pharpur, and give the name *Amara* or *Karmion* (an old Talmudic name, see vol. i. p. 2 b) to a stream which Schwarz describes as running from a fountain called *el-Barady*, 1½ miles from *Beth Djana* (*Beit Jenn*), in a N. E. direction, to Damascus (see also the reference to the Nubian geographer by Gesenius, *The*. 1132 a). What is intended by this the writer is at a loss to know.

G.

PHARZITES, THE (פִּרְזִיטִים [patr., see Pharez]: ὁ φαρεσί: [Vat.] Alex. φαρες: *Pharesitæ*). The descendants of Pharez, the son of Judah (Num. xxvi. 20). They were divided into two branches, the Hezronites and the Hamulites.

PHASE'AH (פִּזְאָה [ame, Ges.; born at the Passover, Fürst]: φεσά; Alex. [φεσση; FA.] φαση: Phasea). PASEAH 2 (Neh. vii. 51).

PHASE'LIS (Φασηλῖς: *Phaselis*). A town on the coast of Asia Minor, on the confines of Lycia and Pamphylia, and consequently ascribed by the ancient writers sometimes to one and sometimes to the other. Its commerce was considerable in the sixth century B. C., for in the reign of Amasis it was one of a number of Greek towns which carried on trade somewhat in the manner of the Hanseatic confederacy in the Middle Ages. They had a common temple, the Hellenium, at *Nauceratis* in Egypt, and nominated *προστάται* for the regulation of commercial questions and the decision of disputes arising out of contracts, like the *prud'hommes* of the Middle Ages, who presided over the courts of pie powder (*pieds poudrés*, pedlars) at the different staples. In later times Phaselis was distinguished as a resort of the Pamphylian and Cilician pirates. Its port was a convenient one to make, for the lofty mountain of *Solyma* (now *Takhtalu*), which backed it at a distance of only five miles, is nearly 8,000 feet in height, and constitutes an admirable landmark from a great distance. Phaselis itself stood on a rock of 50 or 100 feet elevation above the sea, and was joined to the main by a low isthmus, in the middle of which was a lake, now a pestiferous marsh. On the eastern side of this were a closed port and a roadstead, and on the western a larger artificial harbor, formed by a mole run out into the sea. The remains of this may still be traced to a considerable extent below the surface of the water. The masonry of the pier which protected the small eastern port is nearly perfect. In this sheltered position the pirates could lie safely while they sold their

booty, and also reft, the whole region having been anciently so thickly covered with wood as to give the name of *Pityusa* to the town. For a time the Phaselites confined their relations with the Pamphylians to the purposes just mentioned; but they subsequently joined the piratical league, and suffered in consequence the loss of their independence and their town lands in the war which was waged by the Roman consul *Publius Servilius Isauricus* in the years 77-75 B. C. But at the outset the Romans had to a great extent fostered the pirates, by the demand which sprang up for domestic slaves upon the change of manners brought about by the spoliation of Carthage and Corinth. It is said that at this time many thousand slaves were passed through *Delos*—which was the mart between Asia and Europe—in a single day; and the proverb grew up there, *Ἐμπορε, κατάλευσον ἐξελού πάντα πέπρατα*. But when the Cilicians had acquired such power and audacity as to sweep the seas as far as the Italian coast, and interrupt the supplies of corn, it became time to interfere, and the expedition of *Servilius* commenced the work which was afterwards completed by *Pompey* the Great.

It is in the interval between the growth of the Cilician piracy and the Servilian expedition that the incidents related in the First Book of *Maccabees* occurred. The Romans are represented as requiring all their allies to render up to *Simon* the high-priest any Jewish exiles who may have taken refuge among them. After naming *Ptolemy*, *Demetrius* (king of Syria), *Attalus* (king of Pergamus), *Ariarathes* (of Pontus), and *Arsaces* (of Parthia), as recipients of these missives, the author adds that the consul also wrote *εἰς πάσας τὰς χώρας καὶ Σαμψάμην* (Grotius conjectures *Δαμψάκην*, and one MS. has *Μεσαρῖσση*) καὶ *Σπαρτιάταις καὶ εἰς Δῆλον καὶ εἰς Μύνδον καὶ εἰς Σικυώνα καὶ εἰς τὴν Καρίαν καὶ εἰς Σάμον καὶ εἰς τὴν Παμφυλίαν καὶ εἰς τὴν Λυκίαν καὶ εἰς Ἀλικαρνασσόν, καὶ εἰς Ῥόδον καὶ εἰς Φασηλίδα καὶ εἰς Κῶ καὶ εἰς Σίδην καὶ εἰς Ἀραδὸν καὶ εἰς Γόρτυναν καὶ Κνίδον, καὶ Κύπρον καὶ Κυρήνην* (1 Macc. xv. 23). It will be observed that all the places named, with the exception of Cyprus and Cyrene, lie on the highway of marine traffic between Syria and Italy. The Jewish slaves, whether kidnapped by their own countrymen (Ex. xxi. 16) or obtained by raids (2 K. v. 2), appear in early times to have been transmitted to the west coast of Asia Minor by this route (see Ez. xxvii. 13; Joel iii. 6).

The existence of the mountain *Solyma*, and a town of the same name, in the immediate neighborhood of *Phaselis*, renders it probable that the descendants of some of these Israelites formed a population of some importance in the time of *Strabo* (*Herod.* ii. 178; *Strab.* xiv. c. 3; *Liv.* xxxvii. 23; *Mela*, i. 14; *Beaufort, Karamania*, pp. 53-56).

J. W. B.

PHASSTRON (Φασιστρών; [Sin. Φασερων:] *Phaseron*; *Psivron*), the name of the head of an Arab tribe, "the children of Phasiron" (1 Macc. ix. 66), defeated by *Jonathan*, but of whom nothing more is known.

B. F. W.

PHASSARON (Φασσάρων; [Vat. φασ-

<sup>a</sup> Such is the meaning of the word *Pharpur*, treated as Hebrew according to Gesenius and Fürst. Dr.

Pusey, however (*Comm.* on Amos i. 8), renders it "crooked"

σμοος; Ald. Φασσαρόβι:] *Phasurius*. PASHUR (1 Esdr. v. 25).

PHE'BE. [PHĒBE.]

**PHE'NICE.** 1. See PHŒNICE, PHŒNICIA. 2. More properly PHŒNIX (Φοίνιξ, Acts xxvii. 12), though probably our translators meant it to be pronounced *Phénice* in two syllables, as composed to *Phœnicè* (Φοινίκη, Acts xi. 19) in three.

The place under our present consideration was a town and harbor on the south coast of CRETE: and the name was doubtless derived from the Greek word for the palm-tree, which Theophrastus says was indigenous in the island. [PALM-TREE.] The ancient notices of Phœnix converge remarkably to establish its identity with the modern *Lutro*. Besides Ptolemy's longitudes, we have Pliny's statement that it was (as *Lutro* is) in the narrowest part of the island. Moreover, we find applied to this locality, by the modern Greeks, not only the word *Phînika*, which is clearly *Phœnicæ*, but also the words *Anopolis* and *Aradena*. Now Stephanus Byzantinus says that Anopolis is the same with Aradene, and Hierocles says that Aradene is the same with Phœnix. The last authority adds also that the island of CLAUDA is very near. We see further that all these indications correspond exactly with what we read in the Acts. St. Paul's ship was at FAIR HAVENS, which is some miles to the E. of *Lutro*; but she was bound to the westward, and the sailors wished to reach Phœnix (xxvii. 8-12); and it was in making the attempt that they were caught by the gale and driven to Clauda (*ibid.* 13-16).

Still there were till lately two difficulties in the matter: and the recent and complete removal of them is so satisfactory, that they deserve to be mentioned. First, it used to be asserted, by persons well acquainted with this coast, that there is no such harbor hereabouts at all affording a safe anchorage. This is simply an error of fact. The matter is set at rest by abundant evidence, and especially by the late survey of our own officers, an extract from whose drawing, showing the excellent soundings of the harbor, was first published (1852) in the first edition of the *Life and Epistles of St. Paul*, ii. 332. An account by recent travellers will be found in the second edition of Smith's *Voyage and Shipwreck of St. Paul*, p. 256. The other difficulty is a verbal one. The sailors in the Acts describe Phœnix as *λυμένα τῆς Κρητῆς βλέποντα κατὰ λίβα καὶ κατὰ χῶρον*, whereas *Lutro* is precisely sheltered from these winds. But it ought to have been remembered that seamen do not recommend a harbor because of its exposure to certain winds; and the perplexity is at once removed either by taking *κατὰ* as expressing the direction in which the wind blows, or by bearing in mind that a sailor speaks of everything from his own point of view. The harbor of Phœnix or *Lutro* does "look" from the water toward the land which incloses it—in the direction of "southwest and northwest." J. S. H.

\* Mr. Twistleton's article on Phœnicæ, in some earlier copies of the *Dictionary*, was superseded (except a few sentences) by that of Dr. Howson (as would seem) on account of his different interpretation of *βλέποντα κατὰ λίβα*, etc. (see above). Mr. T. maintains that the words can mean only that "the harbor looked to the southwest and northwest," and will not bear any other explanation. Scholars generally have heretofore held this

opinion, which seems to exclude the supposition that *Lutro* and Phœnicæ are the same.

Mr. Smith (*Voyage and Shipwreck of Paul*, p. 87 ff., 3d ed.) and Dean Alford (on Acts xxvii. 12) understand *κατὰ* of the direction *whither* and not *whence*, and thus identify Phœnicæ with the modern *Lutro*. Captain Spratt of the Royal Navy (*Travels and Researches in Crete*, ii. 249, Lond. 1865) assigns good reasons for this identification, though, strangely enough, he separates *κατὰ λίβα*, etc., altogether from the question. He urges that the name *Phîneku* (from Φοίνιξ) is still current as applied to *Lutro*, and also that a Latin inscription found at *Lutro*, dating from the emperor Nerva (A. D. 96-98), shows that ships from Alexandria (see Acts xxvii. 6) resorted to this harbor. It is the only one, says this navigator, on the south of Crete which affords a safe winter refuge. Instead, however, of referring *βλέποντα* . . . *χῶρον* to the opening of the harbor, he understands it of the course of the voyage from Fair Havens to Phœnicæ, namely, first southwest and then beyond *Cora* Littinus for the rest of the way northwest. According to that view we learn absolutely nothing from the text respecting the situation of the harbor. But *βλέποντα* agreeing with *λυμένα* shows that the point of observation must be the port, and not the vessel.

It will be noticed that the above writers (Howson, Smith, Alford, Spratt), who assume *Lutro* and Phœnicæ to be the same, by no means agree in their mode of reconciling Luke's language with that conclusion. The argument on this side of the question would be stronger if that disagreement did not exist. Dr. Lechler represents in part a still different opinion. He accords with those who understand *κατὰ λίβα* and the like (correctly we think) of the quarter whence the winds blow; but suggests that Luke may be stating here only the common opinion or report in regard to Phœnicæ, and not his own testimony; for Paul's ship did not reach Phœnicæ, and the historian had no personal knowledge on the subject (see his *Der Apostel Geschichte*, p. 400, 3<sup>e</sup> Aufl., 1869). For a fuller criticism on this topic, see the writer's *Commentary on Acts*, pp. 420-422 (2d ed.).

The case is certainly not without its difficulty. Among the possibilities are that *Lutro* and Phœnicæ may not be the same; or, that Luke deviates here somewhat from the ordinary usage in speaking of winds; or, that the coast-line of the harbor may have changed in the course of time. The statements both of Pashley (*Travels in Crete*, Lond. 1837) and of Spratt show that upheavals and submergences have been frequent in Crete. We do not presume at present to decide the question. H.

**PHER'ESITES** (Φερεζῆται: *Pherezæi*), 1 Esdr. viii. 69; = PERIZZITES; comp. Ezr. ix. 1.

**PHER'EZITE; PHER'EZITES** (ὁ Φερεζῆται: *Pherezæus; Pherezæi*), Jud. v. 16; 2 Esdr. i. 21. The latter of these passages contains a statement in accordance with those of Gen. xiii. 7, xxxiv. 30; Judg. i. 4, &c., noticed under PERIZZITE.

\* **PHI-BE'SETH**, Ezek. xxx. 17. [PI-BESETII.]

**PHI'CHOL** (פִּיכּוֹל [*strong, mighty, Fürst*]

Samar. פִּי כּוֹל: Φιχώλα: Alex. Φιχολ: Joseph. Φίκολος: *Phichol*), chief captain of the army of Abimelech, king of the Philistines of Geras in the

days of both Abraham (Gen. xxi. 22, 32) and Isaac (xxvi. 26). Josephus mentions him on the second occasion only. On the other hand the LXX. introduce Ahuzzath, Abimelech's other companion, on the first also. By Gesenius the name is treated as Hebrew, and as meaning the "mouth of all." By Fürst (*Handwb.* ii. 215 a), it is derived from a root פִּחַל to be strong. But Hitzig (*Philistäer*, § 57) refers it to the Sanskrit *pitschula*, a tamarisk, pointing out that Abraham had planted a tamarisk in Beer-sheba, and comparing the name with Elah, Berosus, Tappuah, and other names of persons and places signifying different kinds of trees; and with the name *φίγαλος*, a village of Palestine (Joseph. *Ant.* xii. 4, § 2), and *φίγαλία* in Greece. Stark (*Gaza*, etc., p. 96) more cautiously avoids such speculations. The natural conclusion

from these mere conjectures is that Phichol is a Philistine name, the meaning and derivation of which are lost to us. G.

\* Phichol (whatever its origin) was no doubt a military title (like *mudir* or *mushir* in the East at present), and hence would be expected to recur in the history again and again. In speaking of Turkish officers now the name is very seldom heard, and they are known to the public almost exclusively by their titles (Thomson's *Land and Book*, ii. 352).

H.

**PHILADELPHIA** (ἡ Φιλαδέλφεια [*brotherly love*]: *Philadelphía*), Rev. iii. 7. A town on the confines of Lydia and Phrygia Catacecaumene, built by Attalus II., king of Pergamus. It was situated on the lower slopes of Tmolus, on the southern side of the valley of the *Ain-é-ghül Sou*,

Philadelphia (Macfarlane's *Apocalyptic Churches*).

a river which is probably the Cogamus of antiquity, and falls into the *Wadis-tehai* (the Hermus) in the neighborhood of *Sart-Kalesi* (Sardis), about 25 miles to the west of the site of Philadelphia. This latter is still represented by a town called *Allah-shehr* (city of God). Its elevation is 952 feet above the sea. The region around is highly volcanic, and geologically speaking belongs to the district of Phrygia Catacecaumene, on the western edge of which it lies. The soil was extremely favorable to the growth of vines, celebrated by Virgil for the soundness of the wine they produced; and in all probability Philadelphia was built by Attalus as a mart for the great wine-producing region, extending for 500 stades in length by 400 in breadth; for its coins have on them the head of Bacchus or a female Bacchant. Strabo compares the soil with that in the neighborhood of Catania in Sicily; and modern travellers describe the appearance of the country as resembling a billowy sea of disintegrated lava, with here and there vast trap-dykes protruding. The original population of Philadelphia seems to have been Macedonian, and the national character to have been retained even in the time of Pliny. There was, however, as appears from Rev. iii. 9, a synagogue of Hellenizing Jews there, as well as a Christian Church. The locality continued to be subject to constant earthquakes, which in the time

of Strabo rendered even the town-walls of Philadelphia unsafe; but its inhabitants held pertinaciously to the spot, perhaps from the profit which naturally accrued to them from their city being the staple of the great wine-district. But the expense of reparation was constant, and hence perhaps the poverty of the members of the Christian Church (*οἶδα . . . ὅτι μικρὰν ἔχεις δύναμιν*, Rev. iii. 8), who no doubt were a portion of the urban population, and heavily taxed for public purposes, as well as subject to private loss by the destruction of their own property. Philadelphia was not of sufficient importance in the Roman times to have law-courts of its own, but belonged to a jurisdiction of which Sardis was the centre.

It has been supposed by some that Philadelphia occupied the site of another town named *Callatebus*, of which Herodotus speaks, in his account of Xerxes's march, as famous for the production of a sugar from the *holcus sorghum* and sweetwort (*ἐν τῇ ἀνδρες δημοεργοὶ μέλι ἐκ αὐρίκης τε καὶ πυροῦ ποιεῖσι*, vii. 31). But by the way in which he mentions Callatebus (of which the name is only known from him) it would seem to have been not far from the Mæander, from which the ruins of *Allah-shehr* cannot be less distant than from 30 to 40 miles, while they are very near the Cogamus. The enormous plane tree, too, which struck Xerxes's attention, and the abundance of the *αὐρίκη*, ποῦ

o a region well furnished with springs of water, which is the case with the northern side of the Mæander, where Xerxes crossed it, and not so with the vicinity of *Allah-shchr*. At the same time the Persian king, in his two days' march from Cydrara to Sardis, must have passed very near the site of the future Philadelphia. (Strab. xii. c. 8, xiii. c. 4; Virg. *Georg.* ii. 98; Herod. vii. 31; Plin. *H. N.* v. 29; Arundell, *Discoveries in Asia Minor*, i. 34, &c.; Tchihatcheff, *Asie Mineure*, p. 237, &c.)

J. W. B.

**PHILARCHES.** This word occurs as a proper name in A. V. in 2 Macc. viii. 32, where it is really the name of an office (*ὁ φυλάρχης* = *ὁ φύλαρχος*, "the commander of the cavalry"). The Greek text seems to be decisive as to the true rendering; but the Latin version ("et Philarchen qui cum Timotheo erat . . .") might easily give rise to the error, which is very strangely supported by Grimm, *ad loc.*

B. F. W.

**PHILEMON** (*Φιλήμων* [*loving, affectionate*]: *Philemon*), the name of the Christian to whom Paul addressed his epistle in behalf of Onesimus. He was a native probably of Colossæ, or at all events lived in that city when the Apostle wrote to him; first, because Onesimus was a Colossian (Col. iv. 9); and secondly, because Archippus was a Colossian (Col. iv. 17), whom Paul associates with Philemon at the beginning of his letter (Philem. 1, 2). Wieseler (*Chronologic*, p. 452) argues, indeed, from Col. iv. 17, that Archippus was a Laodicean, but the *ἐπταρε* in that passage, on which the point turns, refers evidently to the Colossians (of whom Archippus was one therefore), and not to the church at Laodicea spoken of in the previous verse, as Wieseler without reason assumes. [LAODICEA, Amer. ed.] Theodoret (*Præm. in Epist. ad Phil.*) states the ancient opinion in saying that Philemon was a citizen of Colossæ, and that his house was pointed out there as late as the fifth century. The legendary history supplies nothing on which we can rely. It is related that Philemon became bishop of Colossæ (*Constit. Apost.* vii. 46), and died as a martyr under Nero.

It is evident from the letter to him that Philemon was a man of property and influence, since he is represented as the head of a numerous household, and as exercising an expensive liberality towards his friends and the poor in general. He was indebted to the Apostle Paul as the medium of his personal participation in the Gospel. All interpreters agree in assigning that significance to *σεαυτὸν μοι προσοφέλεις* in Philem. 19. It is not certain under what circumstances they became known to each other. If Paul visited Colossæ when he passed through Phrygia on his second missionary journey (Acts xvi. 6), it was undoubtedly there, and at that time, that Philemon heard the Gospel and attached himself to the Christian party. On the contrary, if Paul never visited that city in person, as many critics infer from Col. ii. 1, then the best view is, that he was converted during Paul's protracted stay at Ephesus (Acts xix. 10), about A. D. 54-57. That city was the religious and commercial capital of Western Asia Minor. The Apostle labored there with such success that "all they who dwell in Asia heard the word of the Lord Jesus." Phrygia was a neighboring province, and among the strangers who repaired to Ephesus and had an opportunity to hear the preaching of Paul, may have been the Colossian Philemon.

Paul terms Philemon *συνεργός* (ver. 1), which may denote a preacher of the word (2 Cor. viii. 23; Phil. ii. 25, etc.); but as nothing in the letter indicates that he performed this service, and as the appellation may designate other modes of labor (applied to Priscilla, Rom. xvi. 3), it probably has not the official sense in this instance. Meyer thinks that Philemon may have been an elder. It is evident that, on becoming a disciple, he gave no common proof of the sincerity and power of his faith. His character, as shadowed forth in the epistle to him, is one of the noblest which the sacred record makes known to us. He was full of faith and good works, was docile, confiding, grateful, was forgiving, sympathizing, charitable, and a man who on a question of simple justice needed only a hint of his duty to prompt him to go even beyond it (*ὑπερ ὃ λέγω ποιήσεις*). Any one who studies the epistle will perceive that it ascribes to him these varied qualities; it bestows on him a measure of commendation, which forms a striking contrast with the ordinary reserve of the sacred writers. It was through such believers that the primitive Christianity evinced its divine origin, and spread so rapidly among the nations.

H. B. H.

**PHILEMON, THE EPISTLE OF PAUL TO,** is one of the letters (the others are Ephesians, Colossians, Philippians) which the Apostle wrote during his first captivity at Rome. The arguments which show that he wrote the Epistle to the Colossians in *that city* and *at that period*, involve the same conclusion in regard to this; for it is evident from Col. iv. 7, 9, as compared with the contents of this epistle, that Paul wrote the two letters at the same time, and forwarded them to their destination by the hands of Tychicus and Onesimus, who accompanied each other to Colossæ. A few modern critics, as Schulz, Schott, Büttger, Meyer, maintain that this letter and the others assigned usually to the first Roman captivity, were written during the two years that Paul was imprisoned at Cæsarea (Acts xxiii. 35, xxiv. 27). But this opinion, though supported by some plausible arguments, can be demonstrated with reasonable certainty to be incorrect. [COLOSSIANS, EPISTLE TO THE.]

The *time* when Paul wrote may be fixed with much precision. The Apostle at the close of the letter expresses a hope of his speedy liberation. He speaks in like manner of his approaching deliverance, in his Epistle to the Philippians (ii. 23, 24), which was written during the same imprisonment. Presuming, therefore, that he had good reasons for such an expectation, and that he was not disappointed in the result, we may conclude that this letter was written by him about the year A. D. 63, or early in A. D. 64; for it was in the latter year, according to the best chronologists, that he was freed from his first Roman imprisonment.

Nothing is wanting to confirm the *genuineness* of this epistle. The external testimony is unimpeachable. It is not quoted so often by the earlier Christian fathers as some of the other letters; its brevity, and the fact that its contents are not didactic or polemic, account for that omission. We need not urge the expressions in Ignatius, cited as evidence of that apostolic Father's knowledge and use of the epistle; though it is difficult to regard the similarity between them and the language in

ver. 2C as altogether accidental. See Kirchofer's *Quellensammlung*, p. 205. The Canon of Muratori which comes to us from the second century (Credner, *Geschichte des Kanons*, p. 69), enumerates that as one of Paul's epistles. Tertullian mentions it, and says that Marcion admitted it into his collection. Sinope in Pontus, the birthplace of Marcion, was not far from Colossæ where Philemon lived, and the letter would find its way to the neighboring churches at an early period. Origen and Eusebius include it among the universally acknowledged writings (*δολογούμενα*) of the early Christian times. It is so well attested historically, that, as De Wette says (*Einführung ins Neue Testament*, p. 278), its genuineness on that ground is beyond doubt.

Nor does the epistle itself offer anything to conflict with this decision. It is impossible to conceive of a composition more strongly marked within the same limits by those unstudied assonances of thought, sentiment, and expression, which indicate an author's hand, than this short epistle as compared with Paul's other productions. Paley has a paragraph in his *Horæ Paulinæ*, which illustrates this feature of the letter in a very just and forcible manner. It will be found also that all the historical allusions which the Apostle makes to events in his own life, or to other persons with whom he was connected, harmonize perfectly with the statements or incidental intimations contained in the Acts of the Apostles or the other epistles of Paul. It belongs to a commentary to point out the instances of such agreement.

Baur (*Paulus*, p. 475) would divest the epistle of its historical character, and make it the personified illustration from some later writer, of the idea that Christianity unites and equalizes in a higher sense those whom outward circumstances have separated. He does not impugn the external evidence. But, not to leave his theory wholly unsupported, he suggests some linguistic objections to Paul's authorship of the letter, which must be pronounced unfounded and frivolous. He finds, for example, certain words in the epistle, which are alleged to be not Pauline; but to justify that assertion, he must deny the genuineness of such other letters of Paul as happen to contain these words. He admits that the Apostle could have said *σπλάγγνα* twice, but thinks it suspicious that he should say it three times. A few terms he adduces, which are not used elsewhere in the epistles; but to argue from these that they disprove the apostolic origin of the epistle, is to assume the absurd principle that a writer, after having produced two or three compositions, must for the future confine himself to an unvarying circle of words, whatever may be the subject he discusses, or whatever the interval of time between his different writings.

The arbitrary and purely subjective character of such criticisms can have no weight against the varied testimony admitted as decisive by Christian scholars for so many ages, upon which the canonical authority of the Epistle to Philemon is founded. They are worth repeating only as illustrating Baur's own remark, that modern criticism in assailing this particular book runs a greater risk of exposing itself to the imputation of an excessive distrust, a morbid sensibility to doubt and denial, than in questioning the claims of any other epistle ascribed to Paul.

Our knowledge respecting the *occasion and object* of the letter we must derive from declarations

or inferences furnished by the letter itself. For the relation of Philemon and Onesimus to each other, the reader will see the articles on those names. Paul, so intimately connected with the master and the servant, was anxious naturally to effect a reconciliation between them. He wished also (waiving the *ἀνῆκον*, the matter of duty or right) to give Philemon an opportunity of manifesting his Christian love in the treatment of Onesimus, and his regard, at the same time, for the personal convenience and wishes, not to say official authority, of his spiritual teacher and guide. Paul used his influence with Onesimus (*ἀνέπεμψα*, in ver. 12) to induce him to return to Colossæ, and place himself again at the disposal of his master. Whether Onesimus assented merely to the proposal of the Apostle, or had a desire at the same time to revisit his former home, the epistle does not enable us to determine. On his departure, Paul put into his hand this letter as evidence that Onesimus was a true and approved disciple of Christ, and entitled as such to be received not as a servant, but above a servant, as a brother in the faith, as the representative and equal in that respect of the Apostle himself, and worthy of the same consideration and love. It is instructive to observe how entirely Paul identifies himself with Onesimus, and pleads his cause as if it were his own. He intercedes for him as his own child, promises reparation if he had done any wrong, demands for him not only a remission of all penalties, but the reception of sympathy, affection, Christian brotherhood; and while he solicits these favors for another, consents to receive them with the same gratitude and sense of obligation as if they were bestowed on himself. Such was the purpose and such the argument of the epistle.

The result of the appeal cannot be doubted. It may be assumed from the character of Philemon that the Apostle's intercession for Onesimus was not unavailing. There can be no doubt that, agreeably to the express instructions of the letter, the past was forgiven; the master and the servant were reconciled to each other; and, if the liberty which Onesimus had asserted in a spirit of independence was not conceded as a boon or right, it was enjoyed at all events under a form of servitude which henceforth was such in name only. So much must be regarded as certain; or it follows that the Apostle was mistaken in his opinion of Philemon's character, and his efforts for the welfare of Onesimus were frustrated. Chrysostom declares, in his impassioned style, that Philemon must have been less than a man, must have been alike destitute of sensibility and reason (*πῶτος λίθος, πῶτον θῆριον*), not to be moved by the arguments and spirit of such a letter to fulfill every wish and intimation of the Apostle. Surely no fitting response to his pleadings for Onesimus could involve less than a cessation of everything oppressive and harsh in his civil condition, as far as it depended on Philemon to mitigate or neutralize the evils of a legalized system of bondage, as well as a cessation of everything violative of his rights as a Christian. How much further than this an impartial explanation of the epistle obliges us or authorizes us to go, has not yet been settled by any very general consent of interpreters. Many of the best critics construe certain expressions (*τὸ ἀγαθόν* in ver. 14 and *ὅτι ἐπεὶ ὁ λέγων* in ver. 21) as conveying a distinct expectation on the part of Paul that Philemon would liberate Onesimus. Nearly all agree that he

would hardly have failed to confer on him that favor, even if it was not requested in so many words, after such an appeal to his sentiments of humanity and justice. Thus it was, as Dr. Wordsworth remarks (*St. Paul's Epistles*, p. 328), "by Christianizing the master that the Gospel enfranchised the slave. It did not legislate about mere names and forms, but it went to the root of the evil, it spoke to the heart of man. When the heart of the master was filled with divine grace and was warmed with the love of Christ, the rest would soon follow. The lips would speak kind words, the hands would do liberal things. Every Onesimus would be treated by every Philemon as a beloved brother in Christ."

The Epistle to Philemon has one peculiar feature — its *æsthetic character* it may be termed — which distinguishes it from all the other epistles, and demands a special notice at our hands. It has been admired deservedly as a model of delicacy and skill in the department of composition to which it belongs. The writer had peculiar difficulties to overcome. He was the common friend of the parties at variance. He must conciliate a man who supposed that he had good reason to be offended. He must commend the offender, and yet neither deny nor aggravate the imputed fault. He must assert the new ideas of Christian equality in the face of a system which hardly recognized the humanity of the enslaved. He could have placed the question on the ground of his own personal rights, and yet must waive them in order to secure an act of spontaneous kindness. His success must be a triumph of love, and nothing be demanded for the sake of the justice which could have claimed everything. He limits his request to a forgiveness of the alleged wrong, and a restoration to favor and the enjoyment of future sympathy and affection, and yet would so guard his words as to leave scope for all the generosity which benevolence might prompt toward one whose condition admitted of so much alleviation. These are contraries not easy to harmonize; but Paul, it is confessed, has shown a degree of self denial and a tact in dealing with them, which in being equal to the occasion could hardly be greater.

There is a letter extant of the younger Pliny (*Epist.* ix. 21) which he wrote to a friend whose servant had deserted him, in which he intercedes for the fugitive, who was anxious to return to his master, but dreaded the effects of his anger. Thus the occasion of the correspondence was similar to that between the Apostle and Philemon. It has occurred to scholars to compare this celebrated letter with that of Paul in behalf of Onesimus; and as the result they hesitate not to say, that not only in the spirit of Christian love, of which Pliny was ignorant, but in dignity of thought, argument, pathos, beauty of style, eloquence, the communication of the Apostle is vastly superior to that of the polished Roman writer.

Among the later Commentaries on this epistle may be mentioned those of Rothe (*Interpretatio Historico-Exegetica*, Bremæ, 1844), Hagenbach (one of his early efforts, Basel, 1829), Koch (Zürich, 1848, excellent), Wiesinger (1851), one of the commentators of Olshausen's work, Meyer (1853), De Wette, Ewald (brief notes with a translation, *Wüttingen* (1857)), Alford, Wordsworth, Ellicott, and the Amer. Bible Union (N. Y. 1860). The celebrated Lavater preached thirty-nine sermons

on the contents of this brief composition and published them in two volumes. H B 11.

\* Among the patristic commentators Chrysostom excels in bringing out the delicate touches of the letter. In tom. v. of the *Critici Sacri* (Franf. 1695) the jurist, Scipio Gentilis, devotes eighty folio pages to Philemon. D. H. Wildschut treats *De v. dictionis et sermonis elegantia, in Epistola Pauli ad Philemonem* (Traj. ad Rhen., 1809). Rev. J. S. Buckminster has a sermon on the entire letter as a text (*Sermons*, pp. 78–92, Bost. 1815). Still later helps are, F. Kühne, *Der Epistel Pauli an Philemon, in Bibelstunden* (Leipzig. 1856); Bleek, *Vorlesungen üb. die Briefe an die Colosser, den Philemon, etc.* 1865; and J. J. Van Oosterzee, *Der Brief an Philemon*, in pt. xi. of Lange's *Bibelwerk des N. Test.* (1862), translated with additions by H. B. Hackett in Dr. Schaff's *Commentary* (N. Y. 1868). On the relation of the epistle to the subject of slavery see the opinions of eminent writers as quoted at the end of the above translation (pp. 29–31). H.

**PHILETUS** (Φίλητος [*beloved, or worthy of love*]: *Philetus*) was possibly a disciple of Hymenæus, with whom he is associated in 2 Tim. ii. 17 and who is named without him in an earlier epistle (1 Tim. i. 20). Waterland (*Importance of the Doctrine of the Holy Trinity*, ch. iv., *Works*, iii. 459) condenses in a few lines the substance of many dissertations which have been written concerning their opinions, and the sentence which was inflicted upon at least one of them: "They appear to have been persons who believed the Scriptures of the O. T., but misinterpreted them, allegorizing away the doctrine of the Resurrection, and resolving it all into figure and metaphor. The delivering over unto Satan seems to have been a form of excommunication declaring the person reduced to the state of a heathen; and in the Apostolical age it was accompanied with supernatural or miraculous effects upon the bodies of the persons so delivered." Walchius is of opinion that they were of Jewish origin; Hammond connects them with the Gnostics; Vitringa (with less probability) with the Sadducees. They understood resurrection to signify the knowledge and profession of the Christian religion, or regeneration and conversion, according to J. G. Walchius, whose lengthy dissertation, *De Hymenæo et Phileto*, in his *Miscellanea Sacra*, 1744, pp. 81–121, seems to exhaust the subject. Amongst writers who preceded him may be named Vitringa, *Observ. Sacr.* iv. 9, 922–930; Buddens, *Ecclesia Apostolica*, v. 297–305. See also, on the heresy, Burton, *Bampton Lectures*, and Dean Ellicott's notes on the Pastoral Epistles; and Potter on *Church Government*, ch. v., with reference to the sentence. The names of Philetus and Hymenæus occur separately among those of Caesar's household whose relics have been found in the Columbaria at Rome. W. T. B.

**PHILIP** (Φίλιππος [*lover of horses*]: *Philippus*). 1. The father of Alexander the Great (1 Macc. i. 1; v. i. 2), king of Macedonia, b. c. 359–336. 2. A Phrygian, left by Antiochus Epiph. as governor at Jerusalem (c. b. c. 170), where he behaved with great cruelty (2 Macc. v. 22), burning the fugitive Jews in caves (2 Macc. vi. 11), and taking the earliest measures to check the growing power of Judas Macc. (2 Macc. viii. 9). He is commonly identified with, 3. The foster brother (σύντροφος, 2 Macc. ix

29) of Antiochus Epiph., whom the king upon his death had appointed regent of Syria and guardian of his son Antiochus V., to the exclusion of Lysias (B. C. 164, 1 Macc. vi. 14, 15, 55). He returned with the royal forces from Persia (1 Macc. vi. 56) to assume the government, and occupied Antioch. But Lysias, who was at the time besieging "the Sanctuary" at Jerusalem, hastily made terms with Judas, and marched against him. Lysias stormed Antioch, and, according to Josephus (*Ant.* xii. 9, § 7), put Philip to death. In 2 Macc., Philip is said to have fled to Ptol. Philometor on the death of Antiochus (2 Macc. ix. 29), though the book contains traces of the other account (xiii. 23). The attempts to reconcile the narratives (Winer, s. v.) have no probability.

Philip V. of Macedon.

Diorachm of Philip V. (Attic talent). Obv.: Head of king, r, bound with fillet. Rev.: ΒΑΣΙΛΕΥΣ ΦΙΛΙΠΠΟΥ; club of Hercules: all within wreath.

4. Philip V., king of Macedonia, B. C. 220-179. His wide and successful endeavors to strengthen and enlarge the Macedonian dominion brought him into conflict with the Romans, when they were engaged in the critical war with Carthage. Desultory warfare followed by hollow peace lasted till the victory of Zama left the Romans free for more vigorous measures. Meanwhile Philip had consolidated his power, though he had degenerated into an unscrupulous tyrant. The first campaigns of the Romans on the declaration of war (B. C. 200) were not attended by any decisive result, but the arrival of Flaminius (B. C. 198) changed the aspect of affairs. Philip was driven from his commanding position, and made unsuccessful overtures for peace. In the next year he lost the fatal battle of Cynoscephalæ, and was obliged to accede to the terms dictated by his conquerors. The remainder of his life was spent in vain endeavors to regain something of his former power; and was embittered by cruelty and remorse. In 1 Macc. viii. 5, the defeat of Philip is coupled with that of Perseus as one of the noblest triumphs of the Romans. B. F. W.

**PHILIP THE APOSTLE** (φίλιππος: *Philippus*). The Gospels contain comparatively scanty notices of this disciple. He is mentioned as being of Bethsaida, the city of Andrew and Peter<sup>a</sup> (John i. 44), and apparently was among the Galilaean peasants of that district who flocked to hear the preaching of the Baptist. The manner in which St. John speaks of him, the repetition by him of the self-same words with which Andrew had brought to Peter the good news that the Christ had at last appeared, all indicate a previous friendship with the sons of Jonah and of Zebedee, and a consequent participation in their Messianic hopes. The close union of the two in John vi.

and xii. suggests that he may have owed to Andrew the first tidings that the hope had been fulfilled. The statement that Jesus found him (John i. 43) implies a previous seeking. To him first in the whole circle of the disciples<sup>b</sup> were spoken the words so full of meaning, "Follow me" (*Ibid.*) As soon as he has learnt to know his Master, he is eager to communicate his discovery to another who had also shared the same expectations. He speaks to Nathanael, probably on his arrival in Cana (comp. John xxi. 2, Ewald, *Gesch.* v. p. 251), as though they had not seldom communed together of the intimations of a better time, of a divine kingdom, which they found in their sacred books. We may well believe that he, like his friend, was an "Israelite indeed in whom there was no guile." In the lists of the twelve Apostles, in the Synoptic Gospels, his name is as uniformly at the head of the second group of four, as the name of Peter is at that of the first (Matt. x. 3; Mark iii. 18; Luke vi. 14); and the facts recorded by St. John give the reason of this priority. In those lists again we find his name uniformly coupled with that of Bartholomew, and this has led to the hypothesis that the latter is identical with the Nathanael of John i. 45, the one being the personal name, the other, like Barjonah of Bartimæus, a patronymic. Donaldson (*Jashar*, p. 9) looks on the two as brothers, but the precise mention of τὸν ἴδιον ἀδελφόν in ver. 41, and its omission here, is, as Alfred remarks (on Matt. x. 3), against this hypothesis.

Philip apparently was among the first company of disciples who were with the Lord at the commencement of his ministry, at the marriage of Cana, on his first appearance as a prophet in Jerusalem (John ii.). When John was cast into prison, and the work of declaring the glad tidings of the kingdom required a new company of preachers, we may believe that he, like his companions and friends, received a new call to a more constant discipleship (Matt. iv. 18-22). When the Twelve were specially set apart for their office, he was numbered among them. The first three Gospels tell us nothing more of him individually. St. John, with his characteristic fullness of personal reminiscences, records a few significant utterances. The earnest, simple-hearted faith which showed itself in his first conversion, required, it would seem, an education; one stage of this may be traced, according to Clement of Alexandria (*Strom.* iii. 25), in the history of Matt. viii. 21. He assumes, as a recognized fact, that Philip was the disciple who urged the plea, "Suffer me first to go and bury my father," and who was reminded of a higher duty, perhaps also of the command previously given, by the command, "Let the dead bury their dead: follow thou me." When the Galilaean crowds had halted on their way to Jerusalem to hear the preaching of Jesus (John vi. 5-9), and were faint with hunger, it was to Philip that the question was put, "Whence shall we buy bread that these may eat?" "And this he said," St. John adds, "to prove him, for He himself knew what He would do." The answer, "Two hundred pennyworth of bread is not sufficient for them that every one may take a little," shows how little he was prepared for the work of

<sup>a</sup> Greswell's suggestion (*Dissert. on Harmony*, xxvii.) that the Apostle was an inhabitant (ἀνὸς) of Bethsaida, but a native (ἐκ) of Capernaum, is to be rejected, but hardly to be received.

<sup>b</sup> It has been assumed, on the authority of patristic tradition (*infra*), that his call to the apostleship involved the abandonment, for a time, of his wife and daughter.

living power that followed.<sup>a</sup> It is noticeable that here, as in John i., he appears in close connection with Andrew.

Another incident is brought before us in John xii. 20-22. Among the pilgrims who had come to keep the passover at Jerusalem were some Gentile proselytes (Hellenes) who had heard of Jesus, and desired to see Him. The Greek name of Philip may have attracted them. The zealous love which he had shown in the case of Nathanael may have made him prompt to offer himself as their guide. But it is characteristic of him that he does not take them at once to the presence of his Master. "Philip cometh and telleth Andrew, and again Andrew and Philip tell Jesus." The friend and fellow-townsmen to whom probably he owed his own introduction to Jesus of Nazareth, is to introduce these strangers also.<sup>b</sup>

There is a connection not difficult to be traced between this fact and that which follows on the last recurrence of Philip's name in the history of the Gospels. The desire to see Jesus gave occasion to the utterance of words in which the Lord spoke more distinctly than ever of the presence of his Father with Him, to the voice from heaven which manifested the Father's will (John xii. 28). The words appear to have sunk into the heart of at least one of the disciples, and he brooded over them. The strong cravings of a passionate but unenlightened faith led him to feel that one thing was yet wanting. They heard their Lord speak of his Father and of their Father. He was going to his Father's house. They were to follow Him there. But why should they not have even now a vision of the Divine glory? It was part of the childlike simplicity of his nature that no reserve should hinder the expression of the craving, "Lord, shew us the Father, and it sufficeth us" (John xiv. 8). And the answer to that desire belonged also specially to him. He had all along been eager to lead others to see Jesus. He had been with Him, looking on Him from the very commencement of his ministry, and yet he had not known Him. He had thought of the glory of the Father as consisting in something else than the Truth, Righteousness, Love that he had witnessed in the Son. "Have I been so long time with you, and yet hast thou not known me, Philip? He that hath seen me hath seen the Father. How sayest thou, Shew us the Father?" No other fact connected with the name of Philip is recorded in the Gospels. The close relation in which we have seen him standing to the sons of Zebedee and Nathanael might lead us to think of him as one of the two unnamed disciples in the list of fishermen on the Sea of Tiberias who meet us in John xxi. He is among the company of disciples at Jerusalem after the Ascension (Acts i. 13), and on the day of Pentecost.

After this all is uncertain and apocryphal. He is mentioned by Clement of Alexandria as having had a wife and children, and as having sanctioned the marriage of his daughters instead of binding them to vows of chastity (*Strom.* iii. 52; Euseb. *H. E.* iii. 30), and is included in the list of those who had borne witness of Christ in their lives, but

had not died what was commonly looked on as a martyr's death (*Strom.* iv. 73). Polyocrates (Euseb. *H. E.* iii. 31), Bishop of Ephesus, speaks of him as having fallen asleep in the Phrygian Hierapolis, as having had two daughters who had grown old unmarried, and a third, with special gifts of inspiration (ἐν Ἁγίῳ Πνεύματι πολιτευσασμένη), who had died at Ephesus. There seems, however, in this mention of the daughters of Philip, to be some confusion between the Apostle and the Evangelist. Eusebius in the same chapter quotes a passage from Caius, in which the four daughters of Philip, prophetesses, are mentioned as living with their father at Hierapolis and as buried there with him, and himself connects this fact with Acts xxi. 8, as though they referred to one and the same person. Polyocrates in like manner refers to him in the Easter Controversy, as an authority for the Quartodeciman practice (Euseb. *H. E.* v. 24). It is noticeable that even Augustine (*Serm.* 266) speaks with some uncertainty as to the distinctness of the two Philips. The apocryphal "Acta Philippi" are utterly wild and fantastic, and if there is any grain of truth in them, it is probably the bare fact that the Apostle or the Evangelist labored in Phrygia, and died at Hierapolis. He arrives in that city with his sister Mariamne and his friend Bartholomew.<sup>c</sup> The wife of the proconsul is converted. The people are drawn away from the worship of a great serpent. The priests and the proconsul seize on the Apostles and put them to the torture. St. John suddenly appears with words of counsel and encouragement. Philip, in spite of the warning of the Apostle of Love reminding him that he should return good for evil, curses the city, and the earth opens and swallows it up. Then his Lord appears and reproves him for his vindictive anger, and those who had descended to the abyss are raised out of it again. The tortures which Philip had suffered end in his death, but, as a punishment for his offense, he is to remain for forty days excluded from Paradise. After his death a vine springs up on the spot where his blood had fallen, and the juice of the grapes is used for the Eucharistic cup (Tischendorf, *Acta Apocrypha*, pp. 75-94). The book which contains this narrative is apparently only the last chapter of a larger history, and it fixes the journey and the death as after the eighth year of Trajan. It is uncertain whether the other apocryphal fragment professing to give an account of his labors in Greece is part of the same work, but it is at least equally legendary. He arrives in Athens clothed like the other Apostles, as Christ had commanded, in an outer cloak and a linen tunic. Three hundred philosophers dispute with him. They find themselves baffled, and send for assistance to Ananias the high-priest at Jerusalem. He puts on his pontifical robes, and goes to Athens at the head of five hundred warriors. They attempt to seize on the Apostle, and are all smitten with blindness. The heavens open; the form of the Son of Man appears, and all the idols of Athens fall to the ground; and so on through a succession of marvels, ending with his remaining two years in the city, establishing a church there,

<sup>a</sup> Bengel draws from this narrative the inference that it was part of Philip's work to provide for the daily sustenance of the company of the Twelve.

<sup>b</sup> The national pride of some Spanish theologians led them to claim these inquirers as their countrymen, and so to explain the reverence which places the

patron saint of so many of their kings on a level with Saint Iago as the patron saint of the people (*Acta Sanctorum*, May 1).

<sup>c</sup> The union of the two names is significant, and points to the Apostle.

and then going to preach the Gospel in Parthia (Tischendorf, *Acta Apocr.* pp. 95-104). Another tradition represents Seythia as the scene of his labors (Abdias, *Hist. Apost.* in Fabricius, *Cod. Apoc. N. T.* i. 739), and throws the guilt of his death upon the Ebionites (*Acta Sanctorum*, May 1).

E. H. P.

**PHILIP THE EVANGELIST.** The first mention of this name occurs in the account of the dispute between the Hebrew and Hellenistic disciples in Acts vi. He is one of the Seven appointed to superintend the daily distribution of food and alms, and so to remove all suspicion of partiality. The fact that all the seven names are Greek, makes it at least very probable that they were chosen as belonging to the Hellenistic section of the Church, representatives of the class which had appeared before the Apostles in the attitude of complaint. The name of Philip stands next to that of Stephen; and this, together with the fact that these are the only two names (unless Nicolas be an exception; comp. NICOLAS) of which we hear again, tends to the conclusion that he was among the most prominent of those so chosen. He was, at any rate, well reported of as "full of the Holy Ghost, and wisdom," and had so won the affections of the great body of believers as to be among the objects of their free election, possibly (assuming the votes of the congregation to have been taken for the different candidates) gaining all but the highest number of suffrages. Whether the office to which he was thus appointed gave him the position and the title of a Deacon of the Church, or was special and extraordinary in its character, must remain uncertain (comp. DEACON).

The after-history of Philip warrants the belief, in any case, that his office was not simply that of the later Diaconate. It is no great presumption to think of him as contributing hardly less than Stephen to the great increase of disciples which followed on this fresh organization, as sharing in that wider, more expansive teaching which shows itself for the first time in the oration of the proto-martyr, and in which he was the forerunner of St. Paul. We should expect the man who had been his companion and fellow-worker to go on with the work which he left unfinished, and to break through the barriers of a simply national Judaism. And so accordingly we find him in the next stage of his history. The persecution of which Saul was the leader must have stopped the "daily ministrations" of the Church. The teachers who had been most prominent were compelled to take to flight, and Philip was among them. The cessation of one form of activity, however, only threw him forward into another. It is noticeable that the city of Samaria is the first scene of his activity (Acts viii.). He is the precursor of St. Paul in his work, as Stephen had been in his teaching. It falls to his lot, rather than to that of an Apostle, to take that first step in the victory over Jewish prejudice and the expansion of the Church, according to its Lord's command. As a preparation for that work there may have been the Messianic hopes which were cherished by the Samaritans no less than by the Jews (John iv. 25), the recollection of the two days which had witnessed

the presence there of Christ and his disciples (John iv. 40), even perhaps the craving for spiritual powers which had been roused by the strange influence of Simon the Sorcerer. The scene which brings the two into contact with each other, in which the magician has to acknowledge a power over nature greater than his own, is interesting, rather as belonging to the life of the heresiarch than to that of the Evangelist. [SIMON MAGUS.] It suggests the inquiry whether we can trace through the distortions and perversions of the "hero of the romance of heresy," the influence of that phase of Christian truth which was likely to be presented by the preaching of the Hellenistic Evangelist.

This step is followed by another. He is directed by an angel of the Lord to take the road that led down from Jerusalem to Gaza on the way to Egypt. (For the topographical questions connected with this history, see CAESAREA.) A chariot passes by in which there is a man of another race, whose complexion or whose dress showed him to be a native of Ethiopia. From the time of Psammetichus [comp. MANASSEH] there had been a large body of Jews settled in that region, and the eunuch or chamberlain at the court of Caudace might easily have come across them and their sacred books, might have embraced their faith, and become by circumcision a proselyte of righteousness. He had been on a pilgrimage to Jerusalem. He may have heard there of the new sect. The history that follows is interesting as one of the few records in the N. T. of the process of individual conversion, and one which we may believe St. Luke obtained, during his residence at Caesarea, from the Evangelist himself. The devout proselyte reciting the prophecy which he does not understand, the Evangelist-preacher running at full speed till he overtakes the chariot, the abrupt question, the simple-hearted answer, the unfolding, from the starting-point of the prophecy, of the glad tidings of Jesus, the craving for the means of admission to the blessing of fellowship with the new society, the simple baptism in the first stream or spring, the instantaneous, abrupt departure of the missionary-preacher, as of one carried away by a Divine impulse, these help us to represent to ourselves much of the life and work of that remote past. On the hypothesis which has just been suggested, we may think of it as being the incident to which the mind of Philip himself recurred with most satisfaction.

A brief sentence tells us that he continued his work as a preacher at Azotus (Ashdod) and among the other cities that had formerly belonged to the Philistines, and, following the coast-line, came to Caesarea. Here for a long period, not less than eighteen or nineteen years, we lose sight of him. He may have been there when the new<sup>b</sup> convert Saul passed through on his way to Tarsus (Acts ix. 30). He may have contributed by his labors to the eager desire to be guided further into the Truth which led to the conversion of Cornelius. We can hardly think of him as giving up all at once the missionary habits of his life. Caesarea, however, appears to have been the centre of his activity. The last glimpse of him in the N. T. is

<sup>a</sup> The verse which inserts the requirement of a confession of faith as the condition of baptism appears to have been the work of a transcriber anxious to bring the narrative into harmony with ecclesiastical usage. (Comp. Alford, Meyer, Tischendorf, *loc.*)

<sup>b</sup> \* Three years at least had passed since the Apostle's conversion (comp. Acts ix. 30, Gal i. 18). H.

in the account of St. Paul's journey to Jerusalem. It is to his house, as to one well known to them, that St. Paul and his companions turn for shelter. He is still known as "one of the Seven." His work has gained for him the yet higher title of Evangelist (comp. EVANGELIST). He has four daughters, who possess the gift of prophetic utterance, and who apparently give themselves to the work of teaching instead of entering on the life of home (Acts xxi. 8, 9). He is visited by the prophets and elders of Jerusalem. At such a place as Cæsarea the work of such a man must have helped to bridge over the ever-widening gap which threatened to separate the Jewish and the Gentile Churches. One who had preached Christ to the hated Samaritan, the swarthy African, the despised Philistine, the men of all nations who passed through the seaport of Palestine, might well welcome the arrival of the Apostle of the Gentiles (comp. J. P. Lange, in Herzog's *Real-Encyclopädi*. s. v. "Philippus").

The traditions in which the Evangelist and the Apostle who bore the same name are more or less confounded have been given under PHILIP THE

APOSTLE. According to another, relating more distinctly to him, he died Bishop of Tralles (*Acta Sanct.* June 6). The house in which he and his daughters had lived was pointed out to travellers in the time of Jerome (*Epit. Paulæ*, § 8). (Comp. Ewald, *Geschichte*, vi. 175, 208-214; Baumgarten, *Apostel Geschichte*, §§ 15, 16.) E. H. P.

PHILIP HEROD I, II. [HEROD; vol ii. pp. 1052, 1853.]

PHILIPPI (Φιλιπποι: *Philippi*). A city of Macedonia, about nine miles from the sea, to the N. W. of the island of Thasos, which is twelve miles distant from its port Neapolis, the modern *Kavalla*. It is situated in a plain between the ranges of Pangæus and Hæmus. St. Paul, when, on his first visit to Macedonia in company with Silas, he embarked at Troas, made a straight run to Samothrace, and from thence to Neapolis, which he reached on the second day (Acts xvi. 11). This was built on a rocky promontory, on the western side of which is a roadstead, furnishing a safe refuge from the Etesian winds. The town is cut off from the interior by a steep line of hills.

Ruins at Philippi.

anciently called Symbolum, connected towards the N. E. with the western extremity of Hæmus, and towards the S. W., less continuously, with the eastern extremity of Pangæus. A steep track, following the course of an ancient paved road, leads over Symbolum to Philippi, the solitary pass being about 1,600 feet above the sea-level. At this point the traveller arrives in little more than half an hour's riding, and almost immediately begins to descend by a yet steeper path into the plain. From a point near the watershed, a simultaneous view is obtained both of Kavalla and of the ruins of Philippi. Between Pangæus and the nearest part of Symbolum the plain is very low, and there are large accumulations of water. Between the foot of Symbolum and the site of Philippi, two Turkish cemeteries are passed, the gravestones of which are all derived from the ruins of the ancient site, and in the immediate neighborhood of the

one first reached is the modern Turkish village *Bereketli*. This is the nearest village to the ancient ruins, which are not at the present time inhabited at all. Near the second cemetery are some ruins on a slight eminence, and also a khan, kept by a Greek family. Here is a large monumental block of marble, 12 feet high and 7 feet square, apparently the pedestal of a statue, as on the top a hole exists, which was obviously intended for its reception. This hole is pointed out by local tradition as the crib out of which Alexander's horse, Bucephalus, was accustomed to eat his oats. On two sides of the block is a mutilated Latin inscription, in which the names of Caius Vibius and Cornelius Quartus may be deciphered. A stream employed in turning a mill bursts out from a sedge pool in the neighborhood, and probably finds its way to the marshy ground mentioned as existing in the S. W. portion of the plain.

After about twenty minutes' ride from the Khan, over ground thickly strewn with fragments of marble columns, and slabs that have been employed in building, a river-bed 66 feet wide is crossed

<sup>a</sup> It appears to be some miles distant, but is distinctly seen from that point.

through which the stream rushes with great force,<sup>a</sup> and immediately on the other side the walls of the ancient Philippi may be traced. Their direction is adjusted to the course of the stream; and at only 350 feet from its margin there appears a gap in their circuit indicating the former existence of a gate. This is, no doubt, the gate<sup>b</sup> out of which the Apostle and his companion passed to the "prayer meeting" on the banks of a river, where they made the acquaintance of Lydia, the Thyatiran seller of purple. The locality, just outside the walls, and with a plentiful supply of water for their animals, is exactly the one which would be appropriated as a market for itinerant traders, "quorum copinius fœnumque supellex," as will appear from the parallel case of the Egerian fountain near Rome, of whose desecration Juvenal complains (*Sat.* iii. 13). Lydia had an establishment in Philippi for the reception of the dyed goods which were imported from Thyatira and the neighboring towns of Asia; and were dispersed by means of pack-animals among the mountain clans of the Hæmus and Pangæus, the agents being doubtless in many instances her own co-religionists. High up in Hæmus lay the tribe of the Satræ, where was the oracle of Dionysus, — not the rustic deity of the Attic vine-dressers, but the prophet-god of the Thracians (ὁ Θρηξὶ μάντις, Eurip. *Hecub.* 1267). The "damsel with the spirit of divination" (παίδισκη ἔχουσα πνεῦμα πύθωνα) may probably be regarded as one of the hierodules of this establishment, hired by Philippian citizens, and frequenting the country-market to practice her art upon the villagers who brought produce for the consumption of the town. The fierce character of the mountaineers would render it imprudent to admit them within the walls of the city; just as in some of the towns of North Africa, the Kabyles are not allowed to enter, but have a market allotted to them outside the walls for the sale of the produce they bring. Over such an assemblage only a summary jurisdiction can be exercised; and hence the proprietors of the slave, when they considered themselves injured, and hurried Paul and Silas into the town, to the *agora*, — the civic market where the magistrates (ἄρχοντες) sat, — were at once turned over to the military authorities (στρατηγοί), and these, naturally assuming that a stranger frequenting the extra-mural market must be a Thracian mountaineer or an itinerant trader, proceeded to inflict upon the ostensible cause of a riot (the merits of which they would not attempt to understand) the usual treatment in such cases. The idea of the Apostle possessing the Roman franchise, and consequently an exemption from corporal outrage, never occurred to the rough soldier who ordered him to be scourged; and the whole transaction seems to have passed so rapidly that he had no time to plead his citizenship, of which the military authorities first heard the next day. But the illegal treatment (ἔβρις) obviously

made a deep impression on the mind of its victim, as is evident, not only from his refusal to take his discharge from prison the next morning (*Acts* xvi. 37), but from a passage in the Epistle to the Church at Thessalonica (1 *Thess.* ii. 2), in which he reminds them of the circumstances under which he first preached the Gospel to them (προπαθήντες καὶ ὑβρισθέντες, καθὼς οἴδατε, ἐν Φιλιπποῖς). And subsequently at Jerusalem, under parallel circumstances of tumult, he warns the officer (to the great surprise of the latter) of his privilege (*Acts* xxii. 25).

The Philippi which St. Paul visited, the site of which has been described above, was a Roman colony<sup>c</sup> founded by Augustus, and the remains which strew the ground are no doubt derived from that city. [*COLONY*, Amer. ed.] The establishment of Philip of Macedonia was probably not exactly on the same site; for it is described by Appian as being on a hill, and it may perhaps be looked for upon the elevation near the second cemetery. Philip is said to have occupied it and fortified the position by way of a defense against the neighboring Thracians, so that the nucleus of his town, at any rate, would have been of the nature of an acropolis. Nothing would be more natural than that the Roman town should have been built in the immediate neighborhood of the existing Greek one, on a site more suitable for architectural display.

Philip, when he acquired possession of the site, found there a town named *Datus* or *Datum*, which was in all probability in its origin a factory of the Phœnicians, who were the first that worked the gold mines in the mountains here, as in the neighboring Thasos. Appian says that those were in a hill (ἄδφος) not far from Philippi, that the hill was sacred to Dionysus, and that the mines went by the name of "the sanctuary" (τὰ ἄσυλα). But he shows himself quite ignorant of the locality, to the extent of believing the plain of Philippi to lie open to the river Strymon, whereas the massive wall of Pangæus is really interposed between them. In all probability the "hill of Dionysus" and the "sanctuary" are "the temple of Dionysus" high up the mountains among the Satræ, who preserved their independence against all invaders down to the time of Herodotus at least. It is more likely that the gold-mines coveted by Philip were the same as those at *Scapte Hyle*, which was certainly in this immediate neighborhood. Before the great expedition of Xerxes, the Thasians had a number of settlements on the main, and this among the number, which produced them 80 talents a year as rent to the state. In the year 463 B. C., they ceded their possessions on the continent to the Athenians; but the colonists, 10,000 in number, who had settled on the Strymon and pushed their encroachments eastward as far as this point, were crushed by a simultaneous effort of the Thracian tribes (*Thucydides*, i. 100, iv. 102; *Herodotus*, ix.

<sup>a</sup> \* The deep water-course is always there; but whether it contains water or not depends on the season of the year. On the 13th of December, 1859, it was a rapid torrent, varying in depth at different points from one and two feet to four and five feet, and covering a bed of about thirty feet in width. It is said to be still known as *Anghista*. Some others who were there a few weeks earlier than this reported that the channel at that time was entirely dry. H.

<sup>b</sup> \* The A. V. has "city" (πόλις) there, but the

best copies read "gate" (πύλη). Thus Luke's narrative accords precisely with the topography, in regard to the implied vicinity of the place of worship to the city-gate.

H.

<sup>c</sup> \* Luke terms it also "the first city (chief city A. V.) of that part of Macedonia" (*Acts* xvi. 12), but in what sense it was *first* (πρώτη) has been controverted. See on this point the addition to *MACEDONIA* Amer. ed.

H.

75; Pausanias, i. 29, 4). From that time until the rise of the Macedonian power, the mines seem to have remained in the hands of native chiefs; but when the affairs of Southern Greece became thoroughly embroiled by the policy of Philip, the Thasians made an attempt to repossess themselves of this valuable territory, and sent a colony to the site — then going by the name of “the Springs” (Κρηνίδες). Philip, however, aware of the importance of the position, expelled them and founded Philippi, the last of all his creations. The mines at that time, as was not wonderful under the circumstances, had become almost insignificant in their produce; but their new owner contrived to extract more than 1,000 talents a year from them, with which he minted the gold coinage called by his name.

The proximity of the gold-mines was of course the origin of so large a city as Philippi, but the plain in which it lies is of extraordinary fertility. The position, too, was on the main road from Rome to Asia, the Via Egnatia, which from Thessalonica to Constantinople followed the same course as the existing post-road. The usual course was to take ship at Brundisium and land at Dyrrachium, from whence a route led across Epirus to Thessalonica. Ignatius was carried to Italy by this route, when sent to Rome to be cast to wild beasts.

The ruins of Philippi are very extensive, but present no striking feature except two gateways, which are considered to belong to the time of Claudius. Traces of an amphitheatre, theatre, or stadium — for it does not clearly appear which — are also visible in the direction of the hills on the N. E. side. Inscriptions both in the Latin and Greek languages, but more generally in the former, are found.

St. Paul visited Philippi twice more, once immediately after the disturbances which arose at Ephesus out of the jealousy of the manufacturers of silver shrines for Artemis. By this time the hostile relation in which the Christian doctrine necessarily stood to all purely ceremonial religions was perfectly manifest; and wherever its teachers appeared, popular tumults were to be expected, and the jealousy of the Roman authorities, who dreaded civil disorder above everything else, to be feared. It seems not unlikely that the second visit of the Apostle to Philippi was made specially with the view of counteracting this particular danger. The Epistle to the Philippians, which was written to them from Rome, indicates that at that time some of the Christians there were in the custody of the military authorities as seditious persons, through some proceedings or other connected with their faith (ὅμιν ἐχαρίσθη τὸ ὑπὲρ Χριστοῦ, οὐ μόνον τὸ εἰς αὐτὸν πιστεύειν ἀλλὰ καὶ τὸ ὑπὲρ αὐτοῦ πάσχειν τὸν αὐτὸν ἀγῶνα ἔχοντες ἰὼν εἶδετε ἐν ἐμοί καὶ νῦν ἀκούετε ἡ ἐμοί; Phil. i. 29). The reports of the provincial magistrates to Rome would of course describe St. Paul's first visit to Philippi as the origin of the troubles there; and if this were believed, it would be put together with the charge against him by the Jews at Jerusalem which induced him to appeal to Cæsar, and with the disturbances at Ephesus and elsewhere; and the general conclusion at which the government would arrive, might not improbably be that he was a dangerous person and should be got rid of. This will explain the strong exhortation in the first eighteen verses of chapter ii., and the peculiar way in which it winds

up. The Philippian Christians, who are at the same time suffering for their profession, are exhorted in the most earnest manner, not to firmness (as one might have expected), but to moderation, to abstinence from all provocation and ostentation of their own sentiments (μηδὲν κατὰ ἐριθείαι μηδὲ κενοδοξίαν, ver. 3), to humility, and consideration for the interests of others. They are to achieve their salvation with fear and trembling, and without quarreling and disputing, in order to escape all blame — from such charges, that is, as the Roman colonists would bring against them. If with all this prudence and temperance in the profession of their faith, their faith is still made a penal offense, the Apostle is well content to take the consequences, — to precede them in martyrdom for it, — to be the libation poured out upon them the victims (εἰ καὶ σπένδομαι ἐπὶ τῇ θυσίᾳ καὶ λειτουργίᾳ τῆς πίστεως ὑμῶν, χαίρω καὶ συγχαίρω πάντων ὑμῶν, ver. 17). Of course the Jewish formalists in Philippi were the parties most likely to misrepresent the conduct of the new converts; and hence (after a digression on the subject of Epaphroditus) the Apostle reverts to cautions against them, such precisely as he had given before, consequently by word of mouth. “Beware of those dogs” — (for they will not be children at the table, but eat the crumbs underneath) — “those doers (and bad doers too) of the Law — these flesh-manglers (for circumcised I won't call them, we being the true circumcision)” etc. (iii. 2, 3). Some of these enemies St. Paul found at Rome, who “told the story of Christ insincerely” (κατήγγειλαν οὐχ ἀγῶνας, i. 17) in the hope to increase the severity of his imprisonment by exciting the jealousy of the court. These he opposes to such as “preached Christ” (ἐκήρυξαν) loyally, and consoles himself with the reflection that, at all events, the story circulated, whatever the motives of those who circulated it.

The Christian community at Philippi distinguished itself in liberality. On the Apostle's first visit he was hospitably entertained by Lydia, and when he afterwards went to Thessalonica, where his reception appears to have been of a very mixed character, the Philippians sent him supplies more than once, and were the only Christian community that did so (Phil. iv. 15). They also contributed readily to the collection made for the relief of the poor at Jerusalem, which St. Paul conveyed to them at his last visit (2 Cor. viii. 1-6). And it would seem as if they sent further supplies to the Apostle after his arrival at Rome. The necessity for these seems to have been urgent, and some delay to have taken place in collecting the requisite funds; so that Epaphroditus, who carried them, risked his life in the endeavor to make up for lost time (μέχρι θανάτου ἤγγισεν παραβουλεύσάμενος τῇ ψυχῇ, ἵνα ἀναπληρώσῃ τὸ ὑμῶν ὑστέρημα τῆς πρὸς μὲ λειτουργίας, Phil. ii. 30). The delay, however, seems to have somewhat stung the Apostle at the time, who fancied his beloved flock had forgotten him (see iv. 10-17). Epaphroditus fell ill with fever from his efforts, and nearly died. On recovering he became homesick, and wandering in mind (ἀδημονῶν) from the weakness which is the sequel of fever; and St. Paul, although intending soon to send Timothy to the Philippian Church, thought it desirable to let Epaphroditus go without delay to them, who had already heard of his sickness, and carry with him the letter which is included in the Canon — one which was written

after the Apostle's imprisonment at Rome had lasted a considerable time. Some domestic troubles connected with religion had already broken out in the community. Euodia (the name of a female, not Euodias, as in A. V.: see EUODIAS) and Syntyche, perhaps deaconesses, are exhorted to agree with one another in the matter of their common faith; and St. Paul entreats some one, whom he calls "true yoke-fellow," to "help" these women,<sup>a</sup> that is, in the work of their reconciliation, since they had done good service to the Apostle in his trials at Philippi. Possibly a claim on the part of these females to superior insight in spiritual matters may have caused some irritation; for the Apostle immediately goes on to remind his readers, that the peace of God is something superior to the highest intelligence (ἡρεπέχουσα πάντα νοῦν).

When St. Paul passed through Philippi a third time he does not appear to have made any considerable stay there (Acts xx. 6). He and his companions are somewhat loosely spoken of as sailing from Philippi; but this is because in the common apprehension of travellers the city and its port were regarded as one. Whoever embarked at the Piræus might in the same way be said to set out on a voyage from Athens. On this occasion the voyage to Troas took the Apostle five days, the vessel being probably obliged to coast in order to avoid the contrary wind, until coming off the headland of Sarpædon, whence she would be able to stand across to Troas with an E. or E. N. E. breeze, which at that time of year (after Easter) might be looked for. (Strab. *Fragment*. lib. vii.; Thucyd. i. 100, iv. 102; Herod. ix. 75; Diod. Sic. xvi. 3 ff.; Appian. *Bell. Civ.* iv. 101 ff.; Pausan. i. 28, § 4; Hackett's *Journey to Philippi in the Bible Union Quarterly for August, 1860* [and *Bibl. Sacra* for 1860, vol. xvii. pp. 866-898. ### PHILIPPIANS, EPISTLE TO THE.

1. The canonical authority, Pauline authorship and integrity of this epistle were unanimously acknowledged up to the end of the 18th century. Marcion (A. D. 140) in the earliest known Canon held common ground with the Church touching the authority of this epistle (Tertullian, *Adv. Marcion.* iv. 5. v. 20): it appears in the Muratorian Fragment (Routh, *Reliquiæ Sacræ*, i. 395); among the "acknowledged" books in Eusebius (*H. E.* iii. 25); in the lists of the Council of Laodicea, A. D. 365, and the Synod of Hippo, 393; and in all subsequent lists, as well as in the Peshito and later versions. Even contemporary evidence may be claimed for it. Philippian Christians who had contributed to the collections for St. Paul's support at Rome, who had been eye and ear witnesses of the return of Epaphroditus and the first reading of St. Paul's epistle, may have been still alive at Philippi when Polycarp wrote (A. D. 107) his letter to them, in which (ec. 2, 3) he refers<sup>b</sup> to St. Paul's epistle

### PHILIPPIANS, EPISTLE TO THE

as a well known distinction belonging to the Philippian Church. It is quoted as St. Paul's by Irenæus, iv. 18, § 4; Clem. Alex. *Pædag.* i. 6 § 52, and elsewhere; Tertullian, *Adv. Mar.* v. 20 *De Res. Carn.* ch. 23. A quotation from it (Phil. ii. 6) is found in the Epistle of the Churches of Lyons and Vienne, A. D. 177 (Eusebius, *H. E.* v. 2). The testimonies of later writers are innumerable. But F. C. Baur (1845), followed by Schwegler (1846), has argued from the phraseology of the epistle and other internal marks, that it is the work not of St. Paul, but of some Gnostic forger in the 2d century. He has been answered by Linnemann (1847), Brückner (1848), and Resch (1850). Even if his inference were a fair consequence from Baur's premises, it would still be neutralized by the strong evidence in favor of Pauline authorship, which Paley, *Horæ Paulinæ*, ch. 7, has drawn from the epistle as it stands. The arguments of the Tübingen school are briefly stated in Reuss, *Gesch. N. T.* §§ 130-133, and at greater length in Wiesinger's *Commentary*. Most persons who read them will be disposed to concur in the opinion of Dean Alford (*N. T.* vol. iii. p. 27, ed. 1856), who regards them as an instance of the insanity of hyper-criticism. The canonical authority and the authorship of the epistle may be considered as unshaken.

There is a break in the sense at the end of the second chapter of the epistle, which every careful reader must have observed. It is indeed quite natural that an epistle written amid exciting circumstances, personal dangers, and various distractions should bear in one place at least a mark of interruption. Le Moine (1685) thought it was anciently divided into two parts. Heinrichs (1810) followed by Paulus (1818) has conjectured from this abrupt recommencement that the two parts are two distinct epistles, of which the first, together with the conclusion of the Ep. (iv. 21-23) was intended for public use in the church, and the second exclusively for the Apostle's special friends in Philippi. It is not easy to see what sufficient foundation exists for this theory, or what illustration of the meaning of the epistle could be derived from it. It has met with a distinct reply from Krause (1811 and 1818) and the integrity of the epistle has not been questioned by recent critics. Ewald (*Sendschreiben des A. Paulus*, p. 431) is of opinion that St. Paul sent several epistles to the Philippians: and he refers to the texts ii. 12 and iii. 18, as partly proving this. But some additional confirmation or explanation of his conjecture is requisite before it can be admitted as either probable or necessary.

2. *Where written.*—The constant tradition that this epistle was written at Rome by St. Paul in his captivity, was impugned first by Oeder (1731), who, disregarding the fact that the Apostle was in prison, i. 7, 13, 14, when he wrote, imagined that he was at Corinth (see Wolf's *Curæ Philologicæ*, iv. 168, 270); and then by Paulus (1799), Schulz (1829), Böttger (1837), and Rilliet (1841), in whose opinion the epistle was written during the Apostle's confinement at Cæsarea (Acts xxiv. 23);

<sup>a</sup> \* The A. V. misleads the reader in iv. 3. In the Greek the first pronoun (αὐταῖς, "them") refers evidently to Euodia and Syntyche, and the second (αὐτῶν = "since they") assigns them to the class of co-laborers with Paul whose toils and conflicts they had shared (συνήθησαν).

<sup>b</sup> Tertullian refers to it in the same way, *De I'rascrip-*

*tionē*, xxxvi., naming Philippi as one of those Apostolic churches "in which at this day [A. D. 200] the very seats of the Apostles preside over their regions in which the authentic epistles themselves of the Apostles are read, speaking with the voice and representing the face of each."

out the references to the "palace" (prætorium, I 13), and to "Cæsar's household," iv. 22, seem to point to Rome rather than to Cæsarea; and there is no reason whatever for supposing that the Apostle felt in Cæsarea that extreme uncertainty of life connected with the approaching decision of his cause, which he must have felt towards the end of his captivity at Rome, and which he expresses in this epistle, i. 19, 20, ii. 17, iii. 10; and further, the dissemination of the Gospel described in Phil. i. 12-18, is not even hinted at in St. Luke's account of the Cæsarean captivity, but is described by him as taking place at Rome: compare Acts xxiv. 23 with xviii. 30, 31. Even Reuss (*Gesch. N. T.* 1860), who assigns to Cæsarea three of St. Paul's epistles, which are generally considered to have been written at Rome, is decided in his conviction that the Epistle to the Philippians was written at Rome.

3. *When written.*—Assuming then that the epistle was written at Rome during the imprisonment mentioned in the last chapter of the Acts, it may be shown from a single fact that it could not have been written long before the end of the two years. The distress of the Philippians on account of Epaphroditus' sickness was known at Rome when the epistle was written; this implies four journeys, separated by some indefinite intervals, to or from Philippi and Rome, between the commencement of St. Paul's captivity and the writing of the epistle. The Philippians were informed of his imprisonment, sent Epaphroditus, were informed of their messenger's sickness, sent their message of condolence. Further, the absence of St. Luke's name from the salutations to a church where he was well known, implies that he was absent from Rome<sup>a</sup> when the epistle was written: so does St. Paul's declaration, ii. 20, that no one who remained with him felt an equal interest with Timothy in the welfare of the Philippians. And by comparing the mention of St. Luke in Col. iv. 14, and Philem. 24 with the abrupt conclusion of his narrative in the Acts, we are led to the inference that he left Rome after those two epistles were written and before the end of the two years' captivity. Lastly, it is obvious from Phil. i. 20, that St. Paul, when he wrote, felt his position to be very critical, and we know that it became more precarious as the two years drew to a close. In A. D. 62 the infamous Tigellinus succeeded Burrus the upright Prætorian præfect in the charge of St. Paul's person; and the marriage of Poppæa brought his imperial judge under an influence, which if exerted, was hostile to St. Paul. Assuming that St. Paul's acquittal and release took place in 63, we may date the Epistle to the Philippians early in that year.

4. *The writer's acquaintance with the Philippians.*—St. Paul's connection with Philippi was of a peculiar character, which gave rise to the writing of this epistle. That city, important as a mart for the produce of the neighboring gold mines, and as a Roman stronghold to check the rude Thracian mountaineers, was distinguished as the scene of the great battle fatal to Brutus and Cassius. B. C. 42 [PHILIPPI]. In A. D. 51 St. Paul entered its walls, accompanied by Silas, who had been with him since he started from Antioch, and by Timothy and Luke, whom he had afterwards attached to himself; the former at Derbe, the latter

quite recently at Troas. It may well be imagined that the patience of the zealous Apostle had been tried by his mysterious repulse, first from Asia, then from Bithynia and Mysia, and that his expectations had been stirred up by the vision which hastened his departure with his new found associate, Luke, from Troas. A swift passage brought him to the European shore at Neapolis, whence he took the road about ten miles<sup>b</sup> long across the mountain ridge called Symbolum to Philippi (Acts xvi. 12). There, at a greater distance from Jerusalem than any Apostle had yet penetrated, the long restrained energy of St. Paul was again employed in laying the foundation of a Christian church. Seeking first the lost sheep of the house of Israel, he went on a Sabbath day with the few Jews who resided in Philippi, to their small proseucha on the bank of the river Gangitis. The missionaries sat down and spoke to the assembled women. One of them, Lydia, not born of the seed of Abraham, but a proselyte, whose name and occupation, as well as her birth, connect her with Asia, gave heed unto St. Paul, and she and her household were baptized, perhaps on the same Sabbath day. Her house became the residence of the missionaries. Many days they resorted to the proseucha, and the result of their short sojourn in Philippi was the conversion of many persons (xvi. 40), including at last their jailer and his household. Philippi was endeared to St. Paul, not only by the hospitality of Lydia, the deep sympathy of the converts, and the remarkable miracle which set a seal on his preaching, but also by the successful exercise of his missionary activity after a long suspense, and by the happy consequences of his undaunted endurance of ignominies, which remained in his memory (Phil. i. 30) after a long interval of eleven years. Leaving Timothy and Luke to watch over the infant church, Paul and Silas went to Thessalonica (1 Thess. ii. 2), whither they were followed by the alms of the Philippians (Phil. iv. 16), and thence southwards. Timothy having probably carried out similar directions to those which were given to Titus (i. 5) in Crete, soon rejoined St. Paul. We know not whether Luke remained at Philippi. The next six years of his life are a blank in our records. At the end of that period he is found again (Acts xx. 6) at Philippi.

After the lapse of five years, spent chiefly at Corinth and Ephesus, St. Paul, escaping from the incensed worshippers of the Ephesian Diana, passed through Macedonia, A. D. 57, on his way to Greece, accompanied by the Ephesians Tychicus and Trophimus, and probably visited Philippi for the second time, and was there joined by Timothy. His beloved Philippians, free, it seems, from the controversies which agitated other Christian churches, became still dearer to St. Paul on account of the solace which they afforded him when, emerging from a season of dejection (2 Cor. vii. 5), oppressed by weak bodily health, and anxious for the steadfastness of the churches which he had planted in Asia and Achaia, he wrote at Philippi his Second Epistle to the Corinthians.

On returning from Greece, unable to take ship there on account of the Jewish plots against his life, he went through Macedonia, seeking a favorable port for embarking. After parting from his

<sup>a</sup> Was St. Luke at Philippi?—the "true yoke-fellow" mentioned in iv. 3? [Yoke-fellow, Amer. ed.]

<sup>b</sup> \* Nearer nine, as stated in note c, vol. III. p. 2078.

companions (Acts xx 4), he again found a refuge among his faithful Philippians, where he spent some days at Easter, A. D. 58, with St. Luke, who accompanied him when he sailed from Neapolis.

Once more, in his Roman captivity (A. D. 62) their care of him revived again. They sent Epaphroditus, bearing their alms for the Apostle's support, and ready also to tender his personal service (Phil. ii. 25). He stayed some time at Rome, and while employed as the organ of communication between the imprisoned Apostle and the Christians, and inquirers in and about Rome, he fell dangerously ill. When he was sufficiently recovered, St. Paul sent him back to the Philippians, to whom he was very dear, and with him our epistle.

5. *Scope and contents of the Epistle.* — St Paul's aim in writing is plainly this: while acknowledging the alms of the Philippians and the personal services of their messenger, to give them some information respecting his own condition, and some advice respecting theirs. Perhaps the intensity of his feelings and the distraction of his prison prevented the following out his plan with undeviating closeness, for the preparations for the departure of Epaphroditus, and the thought that he would soon arrive among the warm-hearted Philippians, filled St. Paul with recollections of them, and revived his old feelings towards those fellow-heirs of his hope of glory who were so deep in his heart (i. 7), and so often in his prayers (i. 4).

After the inscription (i. 1, 2) in which Timothy as the second father of the church is joined with Paul, he sets forth his own condition (i. 3-26), his prayers, care, and wishes for his Philippians, with the troubles and uncertainty of his imprisonment, and his hope of eventually seeing them again. Then (i. 27-ii. 18) he exhorts them to those particular virtues which he would rejoice to see them practicing at the present time — fearless endurance of persecution from the outward heathen: unity among themselves, built on Christ-like humility and love; and an exemplary life in the face of unbelievers. He hopes soon to hear a good report of them (ii. 19-30), either by sending Timothy, or by going himself to them, as he now sends Epaphroditus, whose diligent service is highly commended. Reverting (iii. 1-21) to the tone of joy which runs through the preceding descriptions and exhortations — as in i. 4, 18, 25, ii. 2, 16, 17, 18, 28 — he bids them take heed that their joy be *in the Lord*, and warns them, as he had often previously warned them (probably in his last two visits), against admitting itinerant Judaizing teachers, the tendency of whose doctrine was towards a vain confidence in mere earthly things; in contrast to this, he exhorts them to follow him in placing their trust humbly but entirely in Christ, and in pressing forward in their Christian course, with the Resurrection day<sup>a</sup> constantly before their minds. Again (iv. 1-9), adverting to their position in the midst of unbelievers, he beseeches them, even with personal appeals, to be firm, united, joyful in the Lord; to be full of prayer and peace, and to lead such a life as must approve itself to the moral sense of all men. Lastly (iv. 10-23), he thanks them for the contrivance sent by Epaphroditus for his support, and concludes with salutations and a benediction.

6. *Effect of the Epistle.* — We have no account

of the reception of this epistle by the Philippians. Except doubtful traditions that Erastus was their first bishop, and with Lydia and Parmenas was martyred in their city, nothing is recorded of them for the next forty-four years. But, about A. D. 107, Philippi was visited by Ignatius, who was conducted through Neapolis and Philippi, and across Macedonia in his way to martyrdom at Rome. And his visit was speedily followed by the arrival of a letter from Polycarp of Smyrna, which accompanied, in compliance with a characteristic request of the warm-hearted Philippians, a copy of all the letters of Ignatius which were in the possession of the church of Smyrna. It is interesting to compare the Philippians of A. D. 63, as drawn by St. Paul, with their successors in A. D. 107 as drawn by the disciple of St. John. Steadfastness in the faith, and a joyful sympathy with sufferers for Christ's sake, seem to have distinguished them at both periods (Phil. i. 5, and Polyc. Ep. i.). The character of their religion was the same throughout, practical and emotional rather than speculative: in both epistles there are many practical suggestions, much interchange of feeling, and an absence of doctrinal discussion. The Old Testament is scarcely, if at all, quoted: as if the Philippian Christians had been gathered for the most part directly from the heathen. At each period false teachers were seeking, apparently in vain, an entrance into the Philippian Church, first Judaizing Christians, seemingly putting out of sight the Resurrection and the Judgment which afterwards the Gnosticizing Christians openly denied (Phil. iii., and Polyc. vi., vii.). At both periods the same tendency to petty internal quarrels seems to prevail (Phil. i. 27, ii. 14, iv. 2, and Polyc. ii., iv., v., xii.). The student of ecclesiastical history will observe the faintly-marked organization of bishops, deacons, and female coadjutors to which St. Paul refers (Phil. i. 1, iv. 3), developed afterwards into broadly-distinguished priests, deacons, widows, and virgins (Polyc. iv., v., vi.). Though the Macedonian churches in general were poor, at least as compared with commercial Corinth (2 Cor. viii. 2), yet their gold mines probably exempted the Philippians from the common lot of their neighbors, and at first enabled them to be conspicuously liberal in alms-giving, and afterwards laid them open to strong warnings against the love of money (Phil. iv. 15; 2 Cor. viii. 3; and Polyc. iv., vi., xi.).

Now, though we cannot trace the immediate effect of St. Paul's epistle on the Philippians, yet no one can doubt that it contributed to form the character of their church, as it was in the time of Polycarp. It is evident from Polycarp's epistle that the church, by the grace of God and the guidance of the Apostle, had passed through those trials of which St. Paul warned it, and had not gone back from the high degree of Christian attainments which it reached under St. Paul's oral and written teaching (Polyc. i., iii., ix., xi.). If it had made no great advance in knowledge, still unsound teachers were kept at a distance from its members. Their sympathy with martyrs and confessors glowed with as warm a flame as ever, whether it was claimed by Ignatius or by Paul. And they maintained their ground with meek firmness among the

<sup>a</sup> The denial of an actual Resurrection was one of the earliest errors in the Christian Church. (See 1 For. xv 12; 2 Tim. ii. 18; Polycarp, vii.; Irenæus,

ii. 31; and the other passages quoted by Dean Elliott on 2 Tim. ii. 18.)

ceathen, and still held forth the light of an exemplary, though not a perfect Christian life.<sup>a</sup>

7. *The Church at Rome.* — The state of the church at Rome should be considered before entering on the study of the Epistle to the Philippians. Something is to be learned of its condition about A. D. 58 from the Epistle to the Romans, about A. D. 61 from Acts xxviii. Possibly the Gospel was planted there by some who themselves received the seed on the day of Pentecost (Acts ii. 10). The converts were drawn chiefly from Gentile proselytes to Judaism, partly also from Jews who were such by birth, with possibly a few converts direct from heathenism. In A. D. 58, this church was already eminent for its faith and obedience: it was exposed to the machinations of schismatical teachers; and it included two conflicting parties, the one insisting more or less on observing the Jewish law in addition to faith in Christ as necessary to salvation, the other repudiating outward observances even to the extent of depriving their weak brethren of such as to them might be really edifying. We cannot gather from the Acts whether the whole church of Rome had then accepted the teaching of St. Paul as conveyed in his epistle to them. But it is certain that when he had been two years in Rome, his oral teaching was partly rejected by a party which perhaps may have been connected with the former of those above mentioned. St. Paul's presence in Rome, the freedom of speech allowed to him, and the personal freedom of his fellow-laborers were the means of infusing fresh missionary activity into the church (Phil. i. 12-14). It was in the work of Christ that Ephaphroditus was worn out (ii. 30). Messages and letters passed between the Apostle and distant churches: and doubtless churches near to Rome, and both members of the church and inquirers into the new faith at Rome addressed themselves to the Apostle, and to those who were known to be in constant personal communication with him. And thus in his bondage he was a cause of the advancement of the Gospel. From his prison, as from a centre, light streamed into Cæsar's household and far beyond (iv. 22, i. 12-19).

8. *Characteristic Features of the Epistle.* — Strangely full of joy and thanksgiving amidst adversity, like the Apostle's midnight hymn from the depth of his Philippian dungeon, this epistle went forth from his prison at Rome. In most other epistles he writes with a sustained effort to instruct, or with sorrow, or with indignation; he is striving to supply imperfect, or to correct erroneous teaching, to put down scandalous impurity, or to heal schism in the church which he addresses. But in his epistle, though he knew the Philippians intimately, and was not blind to the faults and tendencies to fault of some of them, yet he mentions no evil so characteristic of the whole church as to call for general censure on his part, or amendment on theirs. Of all his epistles to churches, none has so little of an official character as this. He withholds his title of "Apostle" in the Inscrip-

tion. We lose sight of his high authority, and of the subordinate position of the worshippers by the river side; and we are admitted to see the free action of a heart glowing with inspired Christian love, and to hear the utterance of the highest friendship addressed to equal friends conscious of a connection which is not earthly and temporal, but in Christ, for eternity. Who that bears in mind the condition of St. Paul in his Roman prison, can read unmoved of his continual prayers for his distant friends, his constant sense of their fellowship with him, his joyful remembrance of their past Christian course, his confidence in their future, his tender yearning after them all in Christ, his eagerness to communicate to them his own circumstances and feelings, his carefulness to prepare them to repel any evil from within or from without which might dim the brightness of their spiritual graces? Love, at once tender and watchful, that love which "is of God," is the key-note of this epistle: and in this epistle only we hear no undertone of any different feeling. Just enough, and no more, is shown of his own harassing trials to let us see how deep in his heart was the spring of that feeling, and how he was refreshed by its sweet and soothing flow.

9. *Text, Translation, and Commentaries.* — The Epistle to the Philippians is found in all the principal uncial manuscripts, namely in A, B, C, D, E, F, G, J, K. In C, however, the verses preceding i. 22, and those following iii. 5, are wanting.

Our A. V. of the epistle, published in 1611, was the work of that company of King James' translators who sat at Westminster, consisting of seven persons, of whom Dr. Barlow, afterwards Bishop of Rochester, was one. It is, however, substantially the same as the translation made by some unknown person for Archbishop Parker, published in the Bishops' Bible, 1568. See Bagster's *Hexapla*, preface. A revised edition of the A. V. by Four Clergymen, is published (1861) by Parker and Bourn.

A complete list of works connected with this epistle may be found in the Commentary of Rheinwald. Of Patristic commentaries, those of Chrysostom (translated in the Oxford *Library of the Fathers*, 1843), Theodoret, and Theophylact, are still extant; perhaps also that of Theodore of Mopsuestia in an old Latin translation (see *Journ. of Class. and Sac. Phil.* iv. 302). Among later works may be mentioned those of Calvin, 1539; Estius, 1614; Daillé, 1659 (translated by Sheruan, 1843); Ridley, 1548; Airay's *Sermons*, 1618; I. Ferguson, 1656; the annotated English New Testaments of Hammond, Fell, Whitby, and Macknight; the Commentaries of Peirce, 1733; Storr, 1783 (translated in the *Edinburg Biblical Cabinet*); Am Ende, 1798; Rheinwald, 1827; T. Passavant, 1834; St. Matthies, 1835; Van Hengel, 1838; Hölemann, 1839; Rilliet, 1841; De Wette, 1847; Meyer, 1847 [3d ed. 1865]; Neander, 1849 (translated into English, 1851 [by Mrs. H. C. Conant, published in N. Y.]); Wiesinger, 1850 (translated

<sup>a</sup> It is not easy to suppose that Polycarp was without a copy of St. Paul's epistle. Yet it is singular that though he mentions it twice, it is almost the only epistle of St. Paul which he does not quote. This fact may at least be regarded as additional evidence of the genuineness of Polycarp's epistle. No forger would have been guilty of such an omission. Its authenticity was first questioned by the Magdeburg Centuriators,

and by Daillé, whom Pearson answered (*Vindicia Izmat.* i. 5); also by Semler; and more recently by Zeller, Schliemann, Bunsen, and others: of whose criticism Ewald says that it is the greatest injustice to Polycarp that men in the present age should deny that this epistle proceeded from him (*Gesch. Isr.* vii. 27, ed. 1859). [Bunsen regards the epistle as in the main genuine. — A.]

into English, 1850): Kühler, 1855; Professor Eadie [1859]; Fean Ellicott, 1861, and those included in the recent editions of the Greek N. T. by Dean Alford and Canon Wordsworth. W. T. B.

Bernhard Weiss, *Der Philipper-Brief ausgelegt u. die Gesch. seiner Auslegung*, etc. (Berl. 1859); one of its objects is to illustrate the relations of the epistle to dogmatic theology. D. Schenkel, *Die Briefe an die Epheser, Philipper u. Kolosser* (1862). Karl Braune, *Die Briefe an die Epheser, Kolosser, Philipper* in pt. ix. of Lange's *Bibelwerk des N. T.* (1867), transl. with additions by H. B. Hackett and J. B. G. Fidge for Dr. Schaff's Commentary (N. Y. 1869). Gottfried Menken, *Pre-digten xxii. - xxix.* in his *Schriften*, v. 408-471 (Bremen, 1858). In English: Webster and Wilkinson, *The Greek Testament with Notes*, etc., ii. 506-528 (Lond. 1861). J. Trapp, *Commentary upon the Epistle of St. Paul to the Philippians*, in his Commentary on the N. T. (Webster's ed. Lond. 1865). Robert Hall, *Practical Exposition of the Epistle to the Philippians* (twelve discourses delivered at Cambridge, 1801 and 1802); they are good specimens of pulpit exposition by one of the great masters of sacred eloquence. F. D. Maurice, *Epistle to the Philippians*, pp. 549-558, in his *Unity of the N. T.* (1854). J. B. Lightfoot, *St. Paul's Epistle to the Philippians* (Lond. 1868); it contains a revised text, with Introduction, Notes, and Dissertations. On the important passage ii. 6-9, may be mentioned Tholuck's *Disputatio Christologica* (1847); and the remarks of Prof. Stuart, *Miscellanies*, pp. 112-115 (Andover, 1846). Dr. Howson has drawn out some of the finest illustrations of his theme (*Lectures on the Character of St. Paul*, Lond. 2d ed. 1864) from this epistle. He fully justifies Neander's remark that we look deeper into the Apostle's heart, have his distinctively personal traits more fully disclosed to us here, than in any one of his other writings. II.

PHILISTIA (פְּלִשְׁתִּים, *Peleshéth*) [perh. *wandering, migration*]: ἀλλόφυλοι: *alienigenae*). The word thus translated (in Ps. lx. 8; lxxvii. 4; cviii. 9) is in the original identical with that elsewhere rendered PALESTINE. [See that article, p. 2284.] "Palestine" originally meant nothing but the district inhabited by the "Philistines," who are called by Josephus Παλαστῖνοι, "Palestines." In fact the two words are the same, and the difference in their present form is but the result of gradual corruption. The form Philistia does not occur anywhere in LXX. or Vulgate. The nearest approach to it is Luther's *Philistia*. G.

\* PHILISTIM (פְּלִשְׁתִּים), only in Gen. c. 14, the Hebrew plural instead of Philistines as elsewhere. The A. V. retains this Hebrew form

פְּלִשְׁתִּים

<sup>b</sup> The name is derived from the root פָּלַשׁ and the Æthiopic *falasa*, "to migrate;" a term which is said to be still current in Abyssinia (Knobel, *Völkert.* v. 281). In Egyptian monuments it appears under the form of *Poulost* (Brugsch, *Hist. d'Égypte*, p. 187). The rendering of the name in the LXX., ἀλλόφυλοι, "strangers," is probably in reference to the etymological meaning of the name, though it may otherwise be regarded as having originated with the Israelites,

also of the other names, in the same verse, and incorrectly omits the article which belongs to them all in the original. H.

PHILISTINES (פְּלִשְׁתִּים) [perh. *wandering emigrant*]: Φυλιστιείμ, ἀλλόφυλοι: *Philistiim*) The origin of the Philistines is nowhere expressly stated in the Bible; but as the prophets describe them as "the Philistines from Caphtor" (Am. ix. 7), and "the remnant of the maritime district of Caphtor" (Jer. xlvii. 4), it is *prima facie* probable that they were the "Caphtorims which came out of Caphtor" who expelled the Avim from their territory and occupied it in their place (Deut. ii. 23), and that these again were the Caphtorim mentioned in the Mosaic genealogical table among the descendants of Mizraim (Gen. x. 14). But in establishing this conclusion certain difficulties present themselves. In the first place, it is observable that in Gen. x. 14 the Philistines are connected with the Casluhim rather than the Caphtorim. It has generally been assumed that the text has suffered a transposition, and that the parenthetical clause "out of whom came Philistim" ought to follow the words "and Caphtorim." This explanation is, however, inadmissible: for (1) there is no external evidence whatever of any variation in the text, either here or in the parallel passage in 1 Chr. i. 12; and (2) if the transposition were effected, the desired sense would not be gained; for the words rendered in the A. V. "out of whom" really mean "whence," and denote a local movement rather than a genealogical descent, so that, as applied to the Caphtorim, they would merely indicate a sojourn of the Philistines in their land, and not the identity of the two races. The clause seems to have an appropriate meaning in its present position: it looks like an interpolation into the original document with the view of explaining when and where the name Philistine was first applied to the people whose proper appellation was Caphtorim. It is an etymological as well as an historical memorandum; for it is based on the meaning of the name Philistine,<sup>b</sup> namely, "emigrant," and is designed to account for the application of that name. But a second and more serious difficulty arises out of the language of the Philistines: for while the Caphtorim were Hamitic, the Philistine language is held to have been Semitic.<sup>c</sup> It has hence been inferred that the Philistines were in reality a Semitic race, and that they derived the title of Caphtorim simply from a residence in Caphtor (Ewald, i. 331; Movers, *Phœnix*. iii. 258), and it has been noticed in confirmation of this, that their land is termed Canaan (Zeph. ii. 5). But this is inconsistent with the express assertion of the Bible that they were Caphtorim (Deut. ii. 23), and not simply that they came from Caphtor; and the term Canaan is applied to their country, not ethnologically but etymologically, to describe the trading habits of th

to whom the Philistines were ἀλλόφυλοι, as opposed to ὁμόφυλοι (Stark's *Gaza*, p. 67 ff.). Other derivations of the name Philistine have been proposed, as that it originated in a transposition of the word *shephêlâh* (שֵׁפְהֵלָה), applied to the Philistine plain or, again, that it is connected with Pelasgi, as Hitzig supposes.

<sup>c</sup> Hitzig, in his *Urgeschichte d. Phil.*, however maintains that the language is Indo-European, with a view to prove the Philistines to be Pelasgi. He is we believe, singular in his view.

Philistines. The difficulty arising out of the question of language may be met by assuming either that the Caphtorim adopted the language of the conquered Avim (a not unusual circumstance where the conquered form the bulk of the population), or that they diverged from the Hamitic stock at a period when the distinctive features of Hamitism and Semitism were yet in embryo. A third objection to their Egyptian origin is raised from the application of the term "uncircumcised" to them (1 Sam. xvii. 26; 2 Sam. i. 20), whereas the Egyptians were circumcised (Herod. ii. 36). But this objection is answered by Jer. ix. 25, 26, where the same term is in some sense applied to the Egyptians, however it may be reconciled with the statement of Herodotus.

The next question that arises relates to the early movements of the Philistines. It has been very generally assumed of late years that Caphtor represents Crete, and that the Philistines migrated from that island, either directly or through Egypt, into Palestine. This hypothesis presupposes the Semitic origin of the Philistines; for we believe that there are no traces of Hamitic settlements in Crete, and consequently the Biblical statement that Caphtorim was descended from Mizraim forms an *a priori* objection to the view. Moreover, the name Caphtor can only be identified with the Egyptian Coptos. [CAPHTOR.] But the Cretan origin of the Philistines has been deduced, not so much from the name Caphtor,<sup>a</sup> as from that of the Cherethites. This name in its Hebrew form<sup>b</sup> bears a close resemblance to Crete, and is rendered Cretans in the LXX. A further link between the two terms has been apparently discovered in the term *câri*,<sup>c</sup> which is applied to the royal guard (2 K. xi. 4, 19), and which sounds like Carians. The latter of these arguments assumes that the Cherethites of David's guard were identical with the Cherethites of the Philistine plain, which appears in the highest degree improbable.<sup>d</sup> With regard to the former argument, the mere coincidence of the names cannot pass for much without some corroborative testimony. The Bible furnishes none, for the name occurs but thrice (1 Sam. xxx. 14; Ez. xxv. 16; Zeph. ii. 5), and apparently applies to the occupants of the southern district; the testimony of the LXX. is invalidated by the fact that it is based upon the mere sound of the word (see Zeph. ii. 6,

<sup>a</sup> The only ground furnished by the Bible for this view is the application of the term rendered "island" to Caphtor in Jer. xlvii. 4. But the term also means *maritime district*; and "the maritime district of Caphtor" is but another term for Philistia itself.

<sup>b</sup> פְּרִיִּים.

<sup>c</sup> פְּרִי.

<sup>d</sup> It has been held by Ewald (i. 330) and others, that the Cherethites and Pelethites (2 Sam. xx. 23) were Cherethites and Philistines. The objections to this view are: (1) that it is highly improbable that David would select his officers from the hereditary foes of his country, particularly so immediately after he had enforced their submission; (2) that there seems no reason why an undue prominence should have been given to the Cherethites by placing that name first, and altering Philistines into Pelethites, so as to produce a paronomasia; (3) that the names subsequently applied to the same body (2 K. xi. 19) are appellatives; and (4) that the terms admit of a probable explanation from Hebrew roots.

<sup>e</sup> Among other accounts of the origin of the Jews, he gives this: "Judæos, Creta insula profugos, novissima Libyæ insediisse" and, as part of the same tra-

where: *cerôth* is also rendered Crete); and lastly, we have to account for the introduction of the classical name of the island side by side with the Hebrew term Caphtor. A certain amount of testimony is indeed adduced in favor of a connection between Crete and Philistia; but, with the exception of the vague rumor, recorded but not adopted by Tacitus (*Hist. v. 3*), the evidence is confined to the town of Gaza, and even in this case is not wholly satisfactory. The town, according to Stephanus Byzantinus (*s. v. Γάζα*), was termed Minoa, as having been founded by Minos, and this tradition may be traced back to, and was perhaps founded on an inscription on the coins of that city, containing the letters ΜΕΙΝΩ; but these coins are of no higher date than the first century B. C., and belong to a period when Gaza had attained a decided Greek character (Joseph. *B. J. ii. 6, § 3*). Again, the worship of the god Marna, and its identity with the Cretan Jove, are frequently mentioned by early writers (Movers, *Phœnix. i. 662*); but the name is Phœnician, being the *maron*, "lord" of 1 Cor. xvi. 22, and it seems more probable that Gaza and Crete derived the worship from a common source, Phœnicia. Without therefore asserting that migrations may not have taken place from Crete to Philistia, we hold that the evidence adduced to prove that they did is insufficient.

The last point to be decided in connection with the early history of the Philistines is, the time when they settled in the land of Canaan. If we were to restrict ourselves to the statements of the Bible, we should conclude that this took place before the time of Abraham: for they are noticed in his day as a pastoral tribe in the neighborhood of Gerar (Gen. xxi. 32, 34, xxvi. 1, 8); and this position accords well with the statement in Deut. ii. 23, that the Avim dwelt in Hazerim, *i. e.* in nomad encampments; for Gerar lay in the south country, which was just adapted to such a life. At the time of the Exodus they were still in the same neighborhood, but grown sufficiently powerful to inspire the Israelites with fear (Ex. xiii. 17, xv. 14). When the Israelites arrived, they were in full possession of the *Shefelah* from the "river of Egypt" (*el-Arish*) in the south, to Ekron in the north (Josh. xv. 4, 47), and had formed a confederacy of five powerful cities<sup>g</sup>—Gaza, Ashdod, Ashkelon, Gath, and Ekron (Josh. xiii. 3). The interval that

addition, adds that the name Judæus was derived from Ida—a circumstance which suggests a foundation for the story. The statement seems to have no more real weight than the reported connection between Hierosolyma and the Solymi of Lycia. Yet it is accepted as evidence that the Philistines, whom Tacitus is supposed to describe as Jews, came from Crete.

<sup>f</sup> The resemblance between the names Apera and Caphtor (Keil, *Einleit. ii. 236*), Phalasarna and Philistim (Ewald, i. 330), is too slight to be of any weight. Added to which, those places lie in the part of Crete most remote from Palestine.

<sup>g</sup> At what period these cities were originally founded, we know not; but there are good grounds for believing that they were of Canaanitish origin, and had previously been occupied by the Avim. The name Gath is certainly Canaanitish: so most probably are Gaza, Ashdod, and Ekron. Ashkelon is doubtful; and the terminations both of this and Ekron may be Philistine. Gaza is mentioned as early as in Gen. x. 19 as a city of the Canaanites; and this as well as Ashdod and Ekron were in Joshua's time the asylums of the Canaanitish Anakim (Josh. xi. 22).

elapsed between Abraham and the Exodus seems sufficient to allow for the alteration that took place in the position of the Philistines, and their transformation from a pastoral tribe to a settled and powerful nation. But such a view has not met with acceptance among modern critics, partly because it leaves the migrations of the Philistines wholly unconnected with any known historical event, and partly because it does not serve to explain the great increase of their power in the time of the judges. To meet these two requirements a double migration on the part of the Philistines, or of the two branches of that nation, has been suggested. Knobel, for instance, regards the Philistines proper as a branch of the same stock as that to which the Hyksos belonged, and he discovers the name Philistine in the opprobrious name Philition, or Philitis, bestowed on the shepherd kings (Herod. ii. 128): their first entrance into Canaan from the Caslubim would thus be subsequent to the patriarchal age, and coincident with the expulsion of the Hyksos. The Cherethites he identifies with the Caphtorim who displaced the Avim; and these he regards as Cretans who did not enter Canaan before the period of the judges. The former part of his theory is inconsistent with the notices of the Philistines in the book of Genesis; these, therefore, he regards as additions of a later date<sup>a</sup> (*Völkert.* p. 218 ff.). The view adopted by Movers is, that the Philistines were carried westward from Palestine into Lower Egypt by the stream of the Hyksos movement at a period subsequent to Abraham; from Egypt they passed to Crete, and returned to Palestine in the early period of the judges (*Phœniz.* iii. 258). This is inconsistent with the notices in Joshua.<sup>b</sup> Ewald, in the second edition of his *Geschichte*, propounds the hypothesis of a double immigration from Crete, the first of which took place in the ante-patriarchal period, as a consequence either of the Canaanitish settlement or of the Hyksos movement, the second in the time of the judges (*Gesch.* i. 329-331). We cannot regard the above views in any other light than as speculations, built up on very slight data, and unsatisfactory, inasmuch as they fail to reconcile the statements of Scripture. For they all imply (1) that the notice of the Caphtorim in Gen. x. 14 applies to an entirely distinct tribe from the Philistines, as Ewald (i. 331, note) himself allows; (2) that either the notices in Gen. xx., xxvi., or those in Josh. xv. 45-47, or perchance both, are interpolations; and (3) that the notice in Deut. ii. 23, which certainly bears marks of high antiquity, belongs to a late date, and refers solely to the Cherethites. But, beyond these inconsistencies, there are two points which appear to militate against the theory of the second immigration in the time of the judges; (1) that the national title of the nation always remained Philistine, whereas, according to these theories, it was the Cretan or Cherethite element which led to the

great development of power in the time of the judges; and (2) that it remains to be shown why a seafaring race like the Cretans, coming direct from Caphtor in their ships (as Knobel, p. 224, understands "Caphtorim from Caphtor" to imply) would seek to occupy the quarters of a nomad race living in encampments, in the wilderness region of the south.<sup>c</sup> We hesitate, therefore, to indorse any of the proffered explanations, and, while we allow that the Biblical statements are remarkable for their fragmentary and parenthetical nature, we are not prepared to fill up the gaps. If those statements cannot be received as they stand, it is questionable whether any amount of criticism will supply the connecting links. One point can, we think, be satisfactorily shown, namely, that the hypothesis of a second immigration is not needed in order to account for the growth of the Philistine power. Their geographical position and their relations to neighboring nations will account for it. Between the times of Abraham and Joshua, the Philistines had changed their quarters, and had advanced northwards into the *Shefelah* or plain of Philistia. This plain has been in all ages remarkable for the extreme richness of its soil; its fields of standing corn, its vineyards and oliveyards, are incidentally mentioned in Scripture (Judg. xv. 5); and in time of famine the land of the Philistines was the hope of Palestine (2 K. viii. 2). We should, however, fail to form a just idea of its capacities from the scanty notices in the Bible. The crops which it yielded were alone sufficient to insure national wealth. It was also adapted to the growth of military power; for while the plain itself permitted the use of war chariots, which were the chief arm of offense, the occasional elevations which rise out of it offered secure sites for towns and strongholds. It was, moreover, a commercial country; from its position it must have been at all times the great thoroughfare between Phœnicia and Syria in the north, and Egypt and Arabia in the south. Ashdod and Gaza were the keys of Egypt, and commanded the transit trade, and the stores of frankincense and myrrh which Alexander captured in the latter place prove it to have been a depôt of Arabian produce (*Plut. Alex.* cap. 25). We have evidence in the Bible that the Philistines traded in slaves with Edom and southern Arabia (Am. i. 6; Joel iii. 3, 5), and their commercial character is indicated by the application of the name Canaan to their land (*Zeph.* ii. 5). They probably possessed a navy; for they had ports attached to Gaza and Ashkelon; the LXX. speaks of their ships in its version of Is. xi. 14; and they are represented as attacking the Egyptians out of ships. The Philistines had at an early period attained proficiency in the arts of peace; they were skillful as smiths (1 Sam. xiii. 20), as armorers (1 Sam. xvii. 5, 6), and as builders, if we may judge from the prolonged sieges which several of their towns sustained. Their images ar d

<sup>a</sup> The sole ground for questioning the historical value of these notices is that Abimelech is not termed king of the Philistines in xx. 2, but king of Gerar. The land is, however, termed the Philistines' land. It is gratuitously assumed that the latter is a case of *prolepsis*, and that the subsequent notice of the king of the Philistines in xxvi. 1, is the work of a later writer who was misled by the *prolepsis*.

<sup>b</sup> The grounds for doubting the genuineness of Josh. xv. 45-47 are: (1) the omission of the total number of the towns; and (2) the notice of the "daughters," or dependent towns, and "villages"

The second objection furnishes the answer to the first; for as the "daughters" are not enumerated, the totals could not possibly be given. And the "daughters" are not enumerated, because they were not actually in possession of the Israelites, and indeed were not known by name.

<sup>c</sup> The Avim probably lived in the district between Gerar and Gaza. This both accords best with the notice of their living in *hazerim*, and is also the district in which the remnant of them lingered; for in Josh. xiii. 3, 4, the words "from the south" are best connected with "the Avites," as in the Vulgate.

the golden mice and emerods (1 Sam. vi. 11) imply an acquaintance with the founder's and goldsmith's arts. Their wealth was abundant (Judg. xvi. 5, 18), and they appear in all respects to have been a prosperous people.

Possessed of such elements of power, the Philistines had attained in the time of the judges an important position among eastern nations. Their history is, indeed, almost a blank; yet the few particulars preserved to us are suggestive. About B. C. 1209 we find them engaged in successful war with the Sidonians, the effect of which was so serious to the latter power that it involved the transference of the capital of Phœnicia to a more secure position on the island of Tyre (Justin, xviii. 3). About the same period, but whether before or after is uncertain, they were engaged in a naval war with Rameses III. of Egypt, in conjunction with other Mediterranean nations: in these wars they were unsuccessful (Brugsch, *Hist. d'Égypte*, pp. 185, 187), but the notice of them proves their importance, and we cannot therefore be surprised that they were able to extend their authority over the Israelites, devoid as these were of internal union, and harassed by external foes. With regard to their tactics and the objects that they had in view in their attacks on the Israelites, we may form a fair idea from the scattered notices in the books of Judges and Samuel. The warfare was of a guerilla character, and consisted of a series of *raids* into the enemy's country. Sometimes these extended only just over the border, with the view of plundering the threshing-floors of the agricultural produce (1 Sam. xxiii. 1); but more generally they penetrated into the heart of the country and seized a commanding position on the edge of the Jordan Valley, whence they could secure themselves against a combination of the trans- and cis-Jordanite divisions of the Israelites, or prevent a return of the fugitives who had hurried across the river on the alarm of their approach. Thus at one time we find them crossing the central district of Benjamin and posting themselves at Michmash (1 Sam. xiii. 16); at another time following the coast road to the plain of Esdraelon and reaching the edge of the Jordan Valley by Jezreel (1 Sam. xxix. 11). From such posts as their head-quarters, they sent out detached bands to plunder the surrounding country (1 Sam. xiii. 17), and, having obtained all they could, they erected a column<sup>a</sup> as a token of their supremacy (1 Sam. x. 5, xiii. 3), and retreated to their own country. This system of incursions

kept the Israelites in a state of perpetual inquietude: all commerce was suspended, from the insecurity of the roads (Judg. v. 6); and at the approach of the foe the people either betook themselves to the natural hiding-places of the country, or fled across the Jordan (1 Sam. xiii. 6, 7). By degrees the ascendancy became complete, and a virtual disarmament of the population was effected by the suppression of the smiths (1 Sam. xiii. 19). The profits of the Philistines were not confined to the goods and chattels they carried off with them. They seized the persons of the Israelites and sold them for slaves; the earliest notice of this occurs in 1 Sam. xiv. 21, where, according to the probably correct reading<sup>b</sup> followed by the LXX., we find that there were numerous slaves in the camp at Michmash: at a later period the prophets inveigh against them for their traffic in human flesh (Joel iii. 6; Am. i. 6): at a still later period we hear that "the merchants of the country" followed the army of Gorgias into Judæa for the purpose of buying the children of Israel for slaves (1 Macc. iii. 41), and that these merchants were Philistines is a fair inference from the subsequent notice that Nicanor sold the captive Jews to the "cities upon the sea-coast" (2 Macc. viii. 11). There can be little doubt, too, that tribute was exacted from the Israelites, but the notices of it are confined to passages of questionable authority, such as the rendering of 1 Sam. xiii. 21 in the LXX., which represents the Philistines as making a charge of three shekels a tool for sharpening them; and again the expression "Methegammah" in 2 Sam. viii. 1, which is rendered in the Vulg. *frenum tributū*, and by Symmachus *τῆν ἐξουσίαν τοῦ φόρου*.<sup>c</sup> In each of the passages quoted, the versions presuppose a text which yields a better sense than the existing one.

And now to recur to the Biblical narrative: The territory of the Philistines, having been once occupied by the Canaanites, formed a portion of the promised land, and was assigned to the tribe of Judah (Josh. xv. 2, 12, 45-47). No portion, however, of it was conquered in the life-time of Joshua (Josh. xiii. 2), and even after his death no permanent conquest was effected (Judg. iii. 3), though, on the authority of a somewhat doubtful passage,<sup>d</sup> we are informed that the three cities of Gaza, Ashkelon, and Ekron were taken (Judg. i. 18). The Philistines, at all events, soon recovered these, and commenced an aggressive policy against the Israelites, by which they gained a complete ascendancy over them. We are unable to say at

<sup>a</sup> The Hebrew term *netzib*, which implies this practice, is rendered "garrison" in the A. V., which neither agrees with the context nor gives a true idea of the Philistine tactics. Stark, however, dissents from this view, and explains the term of military officers (*Gaza*, p. 164).

<sup>b</sup> עֲבָרִים, and not עֲבָרִים.

<sup>c</sup> The true text may have been הַמְּזֹדָה, instead of הַמְּזֹדָה.

<sup>d</sup> The apparent discrepancy between Judg. i. 18, *וְיָבִיאוּ*, has led to suspicions as to the text of the former, which are strengthened by the rendering in the LXX., *αὐτὸς ἐκλήρονόμησεν*, presupposing in the Hebrew the reading *וְיָבִיאוּ*, instead of *וְיָבִיאוּ*. The testimony of the LXX. is weakened by the circumstances (1) that it interpolates a notice of Ashdod and its suburbs (*ἄσασσόρα*, a peculiar term in lieu of the

*ἄρα* applied to the three other towns); and (2) that the term *ἐκλήρονόμησεν* is given as the equivalent for *וְיָבִיאוּ*, which occurs in no other instance. Of the two, therefore, the Greek text is more open to suspicion. Stark (*Gaza*, p. 129) regards the passage as an interpolation.

\* The alleged discrepancy (see above) does not exist if *וְיָבִיאוּ* means that they took the cities by storm, but did not retain them or drive out the inhabitants (Judg. iii. 3). See Cassel's *Bücher der Richter u. Ruth*, p. 12. The same verb occurs with regard to the capture of Jerusalem (Judg. i. 8), though we read expressly (2 Sam. v. 6 ff.) that the Hebrews did not entirely drive out the inhabitants till long after that time. [JEBUS, Amer ed.] With the idea of permanent possession, the strict term would have been *וְיָבִיאוּ* (see Bachmann, *Tuch der Richter*, p. 128). H

what intervals their incursions took place, as nothing is recorded of them in the early period of the judges. But they must have been frequent, inasmuch as the national spirit of the Israelites was so entirely broken that they even reprobated any attempt at deliverance (Judg. xv. 12). Individual heroes were raised up from time to time whose achievements might well kindle patriotism, such as Shagar the son of Anath (Judg. iii. 31), and still more Samson (Judg. xiii. - xvi.): but neither of these men succeeded in permanently throwing off the yoke.<sup>a</sup> Of the former only a single daring feat is recorded the effect of which appears, from Judg. v. 6, 7, to have been very short-lived. The true series of deliverances commenced with the latter, of whom it was predicted that "he shall begin to deliver" (Judg. xiii. 5), and were carried on by Samuel, Saul, and David. The history of Samson furnishes us with some idea of the relations which existed between the two nations. As a "borderer" of the tribe of Dan, he was thrown into frequent contact with the Philistines, whose supremacy was so established that no bar appears to have been placed to free intercourse with their country. His early life was spent on the verge of the *Shefelah* between Zorah and Eshtaol, but when his actions had aroused the active hostility of the Philistines he withdrew into the central district and found a secure post on the rock of Etam, to the S. W. of Bethlehem. Thither the Philistines followed him without opposition from the inhabitants. His achievements belong to his personal history: it is clear that they were the isolated acts of an individual, and altogether unconnected with any national movement; for the revenge of the Philistines was throughout directed against Samson personally. Under Eli there was an organized but unsuccessful resistance to the encroachments of the Philistines, who had penetrated into the central district and were met at Aphek (1 Sam. iv. 1). The production of the ark on this occasion demonstrates the greatness of the emergency, and its loss marked the lowest depth of Israel's degradation. The next action took place under Samuel's leadership, and the tide of success turned in Israel's favor: the Philistines had again penetrated into the mountainous country near Jerusalem: at Mizpeh they met the cowed host of the Israelites, who, encouraged by the signs of Divine favor, and availing themselves of the panic produced by a thunderstorm, inflicted on them a total defeat. For the first time, the Israelites erected their pillar or "stele" at Eben-ezer as the token of victory. The results were the recovery of the border towns and their territories "from Ekron even unto Gath," *i. e.* in the northern district. The success of Israel may be partly attributed to their peaceful relations at this time with the Amorites (1 Sam. vii. 9-14). The Israelites now attributed their past weakness to their want of unity, and they desired a king, with the special object

<sup>a</sup> A brief notice occurs in Judg. x. 7 of invasions by the Philistines and Ammonites, followed by particulars which apply exclusively to the latter people. It has been hence supposed that the brief reference to the Philistines is in anticipation of Samson's history. In Herzog's *Real-Encyk.* (s. v. "Philister") it is rather unnecessarily assumed that the text is imperfect, and that the words "that year" refer to the Philistines, and the "eighteen years" to the Ammonites.

\* The difference may be simply that the particulars

of leading them against the foe (1 Sam. viii. 20). It is a significant fact that Saul first felt inspiration in the presence of a pillar (A. V. "garrison") erected by the Philistines in commemoration of a victory (1 Sam. x. 5, 10). As soon as he was prepared to throw off the yoke, he occupied with his army a position at Michmash, commanding the defiles leading to the Jordan Valley, and his heroic general Jonathan gave the signal for a rising by overthrowing the pillar which the Philistines had placed there. The challenge was accepted; the Philistines invaded the central district with an immense force,<sup>b</sup> and, having dislodged Saul from Michmash, occupied it themselves, and sent forth predatory bands into the surrounding country. The Israelites shortly after took up a position on the other side of the ravine at Geba, and, availing themselves of the confusion consequent upon Jonathan's daring feat, inflicted a tremendous slaughter upon the enemy (1 Sam. xiii. xiv.). No attempt was made by the Philistines to regain their supremacy for about twenty-five years, and the scene of the next contest shows the altered strength of the two parties: it was no longer in the central country, but in a ravine leading down to the Philistine plain, the Valley of Elah, the position of which is about 14 miles S. W. of Jerusalem: on this occasion the prowess of young David secured success to Israel, and the foe was pursued to the gates of Gath and Ekron (1 Sam. xvii.). The power of the Philistines was, however, still intact on their own territory, as proved by the flight of David to the court of Achish (1 Sam. xxi. 10-15), and his subsequent abode at Ziklag (1 Sam. xxvii.), where he was secured from the attacks of Saul. The border warfare was continued; captures and reprisals, such as are described as occurring at Keilah (1 Sam. xxiii. 1-5) being probably frequent. The scene of the next conflict was far to the north, in the valley of Esdraelon, whither the Philistines may have made a plundering incursion similar to that of the Midianites in the days of Gideon. The battle on this occasion proved disastrous to the Israelites: Saul himself perished, and the Philistines penetrated across the Jordan, and occupied the forsaken cities (1 Sam. xxxi. 1-7). The disensions which followed the death of Saul were naturally favorable to the Philistines: and no sooner were these brought to a close by the appointment of David to be king over the united tribes, than the Philistines attempted to counterbalance the advantage by an attack on the person of the king: they therefore penetrated into the Valley of Rephaim, S. W. of Jerusalem, and even pushed forward an advanced post as far as Bethlehem (1 Chr. xi. 16). David twice attacked them at the former spot, and on each occasion with signal success, in the first case capturing their images, in the second pursuing them "from Geba until thou come to Gazer"<sup>c</sup> (2 Sam. v. 17-25; 1 Chr. xiv. 8-16).

are mentioned in one case, but omitted in the other. It is unnecessary to call in question the fact of "invasions" by both tribes. II.

<sup>b</sup> The text states the force at 30,000 chariots and 6,000 horsemen (1 Sam. xiii. 5); these numbers are, however, quite out of proportion. The chariots were probably 1,000, the present reading being a mistake of a copyist who repeated the final  $\lambda$  of Israel, and thus converted the number into 30,000.

<sup>c</sup> There is some difficulty in reconciling the  $\pi\omega\sigma$

Henceforth the Israelites appear as the aggressors: about seven years after the defeat at Rephaim, David, who had now consolidated his power, attacked them on their own soil, and took Gath with its dependencies (1 Chr. xvii. 1), and thus (according to one interpretation of the obscure expression "Metheg-ammah" in 2 Sam. viii. 1) "he took the arm-bridle out of the hand of the Philistines" (Bertheau, *Comm.* on 1 Chr. *in loc.*), or (according to another) "he took the bridle of the metropolis out of the hand of the Philistines" (Ges. *Thes.* p. 113)—meaning in either case that their ascendancy was utterly broken. This indeed was the case: for the minor engagements in David's life-time probably all took place within the borders of Philistia: Gub, which is given as the scene of the second and third combats, being probably identical with Gath, where the fourth took place (2 Sam. xxi. 15–22; comp. LXX., some of the copies of which read Γέθ instead of Γόβ). The whole of Philistia was included in Solomon's empire, the extent of which is described as being "from the river unto the land of the Philistines, unto the border of Egypt" (1 K. iv. 21; 2 Chr. ix. 26), and again "from Tiphah even unto Gaza" (1 K. iv. 24; A. V. "Azzah") [though the Hebrew form is the same]. The several towns probably remained under their former governors, as in the case of Gath (1 K. ii. 39), and the sovereignty of Solomon was acknowledged by the payment of tribute (1 K. iv. 21). There are indications, however, that his hold on the Philistine country was by no means established: for we find him securing the passes that led up from the plain to the central district by the fortification of Gezer and Beth-horon (1 K. ix. 17), while no mention is made either of Gaza or Ashdod, which fully commanded the coast-road. Indeed the expedition of Pharaoh against Gezer, which stood at the head of the Philistine plain, and which was quite independent of Solomon until the time of his marriage with Pharaoh's daughter, would lead to the inference that Egyptian influence was paramount in Philistia at this period (1 K. ix. 16). The division of the empire at Solomon's death was favorable to the Philistine cause: Rehoboam secured himself against them by fortifying Gath and other cities bordering on the plain (2 Chr. xi. 8); the Israelite monarchs were either not so prudent or not so powerful, for they allowed the Philistines to get hold of Gibbethon, commanding one of the defiles leading up from the plain of Sharon to Samaria, the recovery of which involved them in a protracted struggle in the reigns of Nadab and Zimri (1 K. xv. 27, xvi. 15). Judah meanwhile had lost the tribute; for it is recorded as an occurrence that marked Jehoshaphat's suc-

cess, that "some of the Philistines brought presents" (2 Chr. xvii. 11). But this subjection was of brief duration: in the reign of his son Jehoram they avenged themselves by invading Judah in conjunction with the Arabians, and sacking the royal palace (2 Chr. xxi. 16, 17). The increasing weakness of the Jewish monarchy under the attacks of Hazael led to the recovery of Gath, which had been captured by that monarch in his advance on Jerusalem from the western plain in the reign of Jehoshaphat (2 K. xii. 17), and was probably occupied by the Philistines after his departure as an advanced post against Judah: at all events it was in their hands in the time of Uzziah, who dismantled (2 Chr. xxvi. 6) and probably destroyed it: for it is adduced by Amos as an example of Divine vengeance (Am. vi. 2), and then disappears from history. Uzziah at the same time dismantled Jabneh (Jammia) in the northern part of the plain, and Ashdod, and further erected forts in different parts of the country to intimidate the inhabitants (2 Chr. xxvi. 6). The prophecies of Joel and Amos prove that these measures were provoked by the aggressions of the Philistines, who appear to have formed leagues both with the Edomites and Phoenicians, and had reduced many of the Jews to slavery (Joel iii. 4–6; Am. i. 6–10). How far the means adopted by Uzziah were effectual we are not informed; but we have reason to suppose that the Philistines were kept in subjection until the time of Ahaz, when, relying upon the difficulties produced by the Syrian attacks, they attacked the border cities in the *Shefelah*, and "the south" of Judah (2 Chr. xxviii. 18). Isaiah's declarations (xiv. 29–32) throw light upon the events subsequent to this: from them we learn that the Assyrians, whom Ahaz summoned to his aid, proved themselves to be the "cockatrice that should come out of the serpent's (Judah's) root," by ravaging the Philistine plain. A few years later the Philistines, in conjunction with the Syrians and Assyrians ("the adversaries of Rezin"), and perhaps as the subject-allies of the latter, carried on a series of attacks on the kingdom of Israel (Is. ix. 11, 12). Hezekiah's reign inaugurated a new policy, in which the Philistines were deeply interested: that monarch formed an alliance with the Egyptians, as a counterpoise to the Assyrians, and the possession of Philistia became henceforth the turning-point of the struggle between the two great empires of the East. Hezekiah, in the early part of his reign, re-established his authority over the whole of it, "even unto Gaza" (2 K. xviii. 8). This movement was evidently connected with his rebellion against the king of Assyria, and was undertaken in conjunction with the Egyptians; for we find the latter

graphical statements in the narrative of this campaign. Instead of the "Geba" of Samuël, we have "Gibeon" in Chronicles. The latter lies N. W. of Jerusalem; and there is a Geba in the same neighborhood, lying more to the E. But the Valley of Rephaim is placed S. W. of Jerusalem, near to neither of these places. Theinins (on 2 Sam. v. 18) transplants the valley to the N. W. of Jerusalem; while Bertheau (on 1 Chr. xiv. 16) identifies Geba with the Gibeon of Josh. xv. 57, and the *Jeba'h* noticed by Robinson (ii. 5, 17) as lying W. of Bethlehem. Neither of these explanations can be accepted. We must assume that the direct retreat from the valley to the plain was cut off, and that the Philistines were compelled to flee northwards, and regained the plain by the pass of Beth-horon, which lay between Gibeon (as well as between Geba) and Gazer.

<sup>a</sup> The Hebrew text, as it at present stands, in 1 K.

iv. 21, will not bear the sense here put upon it; but a comparison with the parallel passage in 2 Chr. shows that the word גִּבְעָה has dropped out before the "land of the P."

<sup>b</sup> The passage in Zech. ix. 5–7 refers, in the opinion of those who assign an earlier date to the concluding chapters of the book, to the successful campaign of Uzziah. Internal evidence is in favor of this view. The alliance with Tyre is described as "the expectation" of Ekron: Gaza was to lose her king, i. e. her independence: Ashkelon should be depopulated: a "bastard," i. e. one who was excluded from the congregation of Israel on the score of impure blood, should dwell in Ashdod, holding it as a dependency of Judah; and Ekron should become "as a Jebusite" subject to Judah.

people shortly after in possession of the five Philistine cities, to which alone are we able to refer the predicator: in Is. xix. 18, when coupled with the fact that both Gaza and Ashkelon are termed Egyptian cities in the annals of Sargon (Bunsen's *Egypt*, iv. 603). The Assyrians under Tartan, the general of Sargon, make an expedition against Egypt, and took Ashdod, as the key of that country (Is. xx. 1, 4, 5). Under Sennacherib Philistia was again the scene of important operations: in his first campaign against Egypt Ashkelon was taken and its dependencies were plundered: Ashdod, Ekron, and Gaza submitted, and received as a reward a portion of Hezekiah's territory (Rawlinson, i. 477): in his second campaign other towns on the verge of the plain, such as Libnah and Lachish, were also taken (2 K. xviii. 14, xix. 8). The Assyrian supremacy, though shaken by the failure of this second expedition, was restored by Esar-haddon, who claims to have conquered Egypt (Rawlinson, i. 481): and it seems probable that the Assyrians retained their hold on Ashdod until its capture, after a long siege, by the Egyptian monarch Psammetichus (Herod. ii. 157), the effect of which was to reduce the population of that important place to a mere "remnant" (Jer. xxv. 20). It was about this time, and probably while Psammetichus was engaged in the siege of Ashdod, that Philistia was traversed by a vast Scythian horde on their way to Egypt: they were, however, diverted from their purpose by the king, and retraced their steps, plundering on their retreat the rich temple of Venus at Ashkelon (Herod. i. 105). The description of Zephaniah (ii. 4-7), who was contemporary with this event, may well apply to this terrible scourge, though more generally referred to a Chaldaean invasion. The Egyptian ascendancy was not as yet reestablished, for we find the next king, Neco, compelled to besiege Gaza (the Cadytis of Herodotus, ii. 159) on his return from the battle of Megiddo. After the death of Neco, the contest was renewed between the Egyptians and the Chaldeans under Nebuchadnezzar, and the result was specially disastrous to the Philistines: Gaza was again taken by the former, and the population of the whole plain was reduced to a mere "remnant" by the invading armies (Jer. xvii.). The "old hatred" that the Philistines bore to the Jews was exhibited in acts of hostility at the time of the Babylonish captivity (Ez. xxv. 15-17): but on the return this was somewhat abated, for some of the Jews married Philistine women, to the great scandal of their rulers (Neh. xiii. 23, 24). From this time the history of Philistia is absorbed in the struggles of the neighboring kingdoms. In B. C. 332, Alexander the Great traversed it on his way to Egypt, and captured Gaza, then held by the Persians under Betis, after a two months' siege. In 312 the armies of Demetrius Poliorcetes and Ptolemy fought in the neighborhood of Gaza. In 198 Antiochus the Great, in his war against Ptolemy Epiphanes, invaded Philistia and took Gaza. In 166 the Philistines joined the Syrian army under Gorgias in its attack on Judæa (1 Macc. iii. 41). In 148 the adherents of the rival kings Demetrius II. and Alexander Balas, under Apollonius and Jonathan respectively, contended in the Philistine plain: Jona-

than took Ashdod, triumphantly entered Ashkelon and received Ekron as his reward (1 Macc. x. 69-89). A few years later Jonathan again descended into the plain in the interests of Antiochus VI., and captured Gaza (1 Macc. xi. 60-62). No further notice of the country occurs until the capture of Gaza in 97 by the Jewish king Alexander Jannæus in his contest with Lathyrus (Joseph. *Ant.* xiii. 13, § 3; *B. J.* i. 4, § 2). In 63 Pompey annexed Philistia to the province of Syria (*Ant.* xiv. 4, § 4), with the exception of Gaza, which was assigned to Herod (xv. 7, § 3), together with Jamnia, Ashdod, and Ashkelon, as appears from xvii. 11, § 5. The three last fell to Salome after Herod's death, but Gaza was reannexed to Syria (xvii. 11, §§ 4, 5). The latest notices of the Philistines as a nation, under their title of ἀλλόφρολοι, occur in 1 Macc. iii.-v. The extension of the name from the district occupied by them to the whole country, under the familiar form of PALESTINE, has already been noticed under that head.

With regard to the institutions of the Philistines our information is very scanty. The five chief cities had, as early as the days of Joshua, constituted themselves into a confederacy, restricted, however, in all probability, to matters of offense and defense. Each was under the government of a prince whose official title was *seven*<sup>a</sup> (Josh. xiii. 3; Judg. iii. 3, &c.), and occasionally *sâr*<sup>b</sup> (1 Sam. xviii. 30, xxix. 6). Gaza may be regarded as having exercised an hegemony over the others, for in the lists of the towns it is mentioned the first (Josh. xiii. 3; Am. i. 7, 8), except where there is an especial ground for giving prominence to another, as in the case of Ashdod (1 Sam. vi. 17). Ekron always stands last, while Ashdod, Ashkelon, and Gath interchange places. Each town possessed its own territory, as instanced in the case of Gath (1 Chr. xviii. 1), Ashdod (1 Sam. v. 6), and others, and each possessed its dependent towns or "daughters" (Josh. xv. 45-47; 1 Chr. xviii. 1; 2 Sam. i. 20; Ez. xvi. 27, 57), and its villages (Josh. l. c.). In later times Gaza had a senate of five hundred (Joseph. *Ant.* xiii. 13, § 3). The Philistines appear to have been deeply imbued with superstition: they carried their idols with them on their campaigns (2 Sam. v. 21), and proclaimed their victories in their presence (1 Sam. xxxi. 9). They also carried about their persons charms of some kind that had been presented before the idols (2 Macc. xii. 40). The gods whom they chiefly worshipped were Dagon, who possessed temples both at Gaza (Judg. xvi. 23) and at Ashdod (1 Sam. v. 3-5; 1 Chr. x. 10; 1 Macc. x. 83); Ashtaroth, whose temple at Ashkelon was far-famed (1 Sam. xxxi. 10; Herod. i. 105); Baal-zebub, whose fane at Ekron was consulted by Ahaziah (2 K. i. 2-6); and Derceto, who was honored at Ashkelon (Diod. Sic. ii. 4), though unnoticed in the Bible. Priests and diviners (1 Sam. vi. 2) were attached to the various seats of worship. (The special authorities for the history of the Philistines are Stark's *Gaza*, Knobel's *Völkerverf.*; Movers' *Phönizier*; and Hitzig's *Urgeschichte*.)

W. L. B.

PHILOLOGUS (φιλόλογος [*fond of talk, talkative, and also learned*]: *Philobogus*). A Christian at Rome to whom St. Paul sends his salutation

<sup>a</sup> פָּרָן. Two derivations have been proposed for this word, namely, פָּרָן by Ewald (i. 332), פָּרָן, *paran*, by Gesenius (*Theo.* p. 972) and Keil in *Josh.*

xiii. 3, the latter being supported by the analogy of an Arabic expression.

<sup>b</sup> פָּרָן.

(Rom. xvi. 15). Origen conjectures that he was the master of a Christian household which included the other persons named with him. Pseudo-Hippolytus (*De LXX. Apostolis*) makes him one of the 70 disciples, and bishop of Sinope. His name is found in the Columbarium "of the freedmen of Livia Augusta" at Rome; which shows that there was a Philologus connected with the imperial household at the time when it included many Julias.

W. T. B.

\* **PHILOMETOR** (Φιλομήτωρ, *mother-loving*: *Philometor*), a surname of PTOLEMEUS or Ptolemy VI., king of Egypt, 2 Macc. iv. 21.

A.

**PHILOSOPHY.** It is the object of the following article to give some account (I.) of that development of thought among the Jews which answered to the philosophy of the West; (II.) of the recognition of the preparatory (propædæutic) office of Greek philosophy in relation to Christianity; (III.) of the systematic progress of Greek philosophy as forming a complete whole; and (IV.) of the contact of Christianity with philosophy. The limits of the article necessarily exclude everything but broad statements. Many points of great interest must be passed over unnoticed; and in a fuller treatment there would be need of continual exceptions and explanations of detail, which would only create confusion in an outline. The history of ancient philosophy in its religious aspect has been strangely neglected. Nothing, as far as we are aware, has been written on the pre-Christian era answering to the clear and elegant essay of Matter on post-Christian philosophy (*Histoire de la Philosophie dans ses rapports avec la Religion depuis l'ère Chrétienne*, Paris, 1854). There are useful hints in Carové's *Vorhalle des Christenthums* (Jena, 1851), and Ackermann's *Das Christliche im Plato* (Hamb. 1835). The treatise of Denis, *Histoire des Théories et des Idées morales dans l'Antiquité* (Paris, 1856), is limited in range and hardly satisfactory. Döllinger's [*Acidentium u. Judenthumi*] *Vorhalle zur Gesch. d. Christenthums* (Regensburg, 1857 [Eng. trans., *The Gentile and the Jew*, etc. Lond. 1862]) is comprehensive, but covers too large a field. The brief survey in De Pressensé's *Hist. des trois premiers Siècles de l'Église Chrétienne* (Paris, 1858) [translated under the title *The Religions before Christ*, Edin. 1862] is much more vigorous, and on the whole just. But no one seems to have apprehended the real character and growth of Greek philosophy so well as Zeller (though with no special attention to its relations to religion) in his history (*Die Philosophie der Griechen*, 2<sup>te</sup> Aufl. [3 Theile in 5 Abth.] Tüb. 1856-68), which for subtlety and completeness is unrivalled. [See also the literature at the end of the article.]

#### I. THE PHILOSOPHIC DISCIPLINE OF THE JEWS.

Philosophy, if we limit the word strictly to describe the free pursuit of knowledge of which truth is the one complete end, is essentially of western growth. In the East the search after wisdom has always been connected with practice; it has remained there, what it was in Greece at first, a part of religion. The history of the Jews offers no exception to this remark: there is no Jewish philosophy properly so called. Yet on the other hand speculation and action meet in truth; and perhaps the most obvious lesson of the Old Testament lies in the gradual construction of a living philosophy

by fact, and not by speculation. The method of Greece was to proceed from life to God; the method of Israel (so to speak) was to proceed from God to life. The axioms of one system are the conclusions of the other. The one led to the successive abandonment of the noblest domains of science which man had claimed originally as his own, till it left bare systems of morality; the other, in the fullness of time, prepared many to welcome the Christ — the Truth.

From what has been said, it follows that the philosophy of the Jews, using the word in a large sense, is to be sought for rather in the progress of the national life than in special books. These, indeed, furnish important illustrations of the growth of speculation, but the history is written more in acts than in thoughts. Step by step the idea of the family was raised into that of the people; and the kingdom furnished the basis of those wider promises which included all nations in one kingdom of heaven. The social, the political, the cosmical relations of man were traced out gradually in relation to God.

The philosophy of the Jews is thus essentially a moral philosophy, resting on a definite connection with God. The doctrines of Creation and Providence, of an Infinite Divine Person and of a responsible human will, which elsewhere form the ultimate limits of speculation, are here assumed at the outset. The difficulties which they involve are but rarely noticed. Even when they are canvassed most deeply, a moral answer drawn from the great duties of life is that in which the questioner finds repose. The earlier chapters of Genesis contain an introduction to the direct training of the people which follows. Premature and partial developments, kingdoms based on godless might, stand in contrast with the slow foundation of the Divine polity. To distinguish rightly the moral principles which were successively called out in this latter work, would be to write a history of Israel; but the philosophical significance of the great crises through which the people passed, lies upon the surface. The call of Abraham set forth at once the central lesson of faith in the Unseen, on which all others were raised. The father of the nation was first isolated from all natural ties before he received the promise: his heir was the son of his extreme age; his inheritance was to him "as a strange land." The history of the patriarchs brought out into yet clearer light the sovereignty of God: the younger was preferred before the elder: suffering prepared the way for safety and triumph. God was seen to make a covenant with man, and his action was written in the records of a chosen family. A new era followed. A nation grew up in the presence of Egyptian culture. Persecution united elements which seem otherwise to have been on the point of being absorbed by foreign powers. God revealed Himself now to the people in the wider relations of Lawgiver and Judge. The solitary discipline of the desert familiarized them with his majesty and his mercy. The wisdom of Egypt was hallowed to new uses. The promised land was gained by the open working of a divine Sovereign. The outlines of national faith were written in defeat and victory; and the work of the theocracy closed. Human passion then claimed a dominant influence. The people required a king. A fixed Temple was substituted for the shifting Tabernacle. Times of disruption and disaster followed; and the voice of the prophets declared the spiritual meaning of the king-

dom. In the midst of sorrow and defeat and desolation, the horizon of hope was extended. The kingdom which man had prematurely founded was seen to be the image of a nobler "kingdom of God." The nation learned its connection with "all the kindred of the earth." The Captivity confirmed the lesson, and after it the Dispersion. The moral effects of these, and the influence which Persian, Greek, and Roman, the inheritors of all the wisdom of the East and West, exercised upon the Jews, have been elsewhere noticed. [CYRUS; DISPERSION.] The divine discipline closed before the special human discipline began. The personal relations of God to the individual, the family, the nation, mankind, were established in ineffaceable history, and then other truths were brought into harmony with these in the long period of silence which separates the two Testaments. But the harmony was not always perfect. Two partial forms of religious philosophy arose. On the one side the predominance of the Persian element gave rise to the Kabbala; on the other the predominance of the Greek element issued in Alexandrine theosophy.

Before these one-sided developments of the truth were made, the fundamental ideas of the Divine government found expression in words as well as in life. The Psalms, which, among the other infinite lessons which they convey, give a deep insight into the need of a personal apprehension of truth, everywhere declare the absolute sovereignty of God over the material and moral worlds. The classical scholar cannot fail to be struck with the frequency of natural imagery, and with the close connection which is assumed to exist between man and nature as parts of one vast order. The control of all the elements by One All-wise Governor, standing out in clear contrast with the deification of isolated objects, is no less essentially characteristic of Hebrew as distinguished from Greek thought. In the world of action Providence stands over against fate, the universal kingdom against the individual state, the true and the right against the beautiful. Pure speculation may find little scope, but speculation guided by these great laws will never cease to affect most deeply the intellectual culture of men. (Compare especially Ps. viii., xix., xxix.; I, lxv., lxxvii., lxxviii., lxxxix.; xev., xvii., civ.; cvi., cxxvi., cxlvii., etc. It will be seen that the same character is found in Psalms of every date.) For a late and very remarkable development of this philosophy of Nature see the article BOOK OF ENOCH [vol. i. p. 738 ff.]; Dillmann, *Das B. Henoch*, xiv. xv.

One man above all is distinguished among the Jews as "the wise man." The description which is given of his writings serves as a commentary on the national view of philosophy. "And Solomon's wisdom excelled the wisdom of all the children of the east country and all the wisdom of Egypt. . . . And he spake three thousand proverbs; and his songs were a thousand and five. And he spake of trees, from the cedar that is in Lebanon even unto the hyssop that springeth out of the wall: he spake also of beasts, and of fowl, and of creeping things, and of fishes" (1 K. iv. 30-33). The lesson of practical duty, the full utterance of "a large heart" (*ibid.* 29), the careful study of God's creatures: this is the sum of wisdom. Yet in fact the very practical aim of this philosophy leads to the revelation of the most sublime truth. Wisdom was practically felt to be a Person, throned by God, and holding converse with men (Prov. viii.). She was

seen to stand in open enmity with "the strange woman," who sought to draw them aside by sensuous attractions; and thus a new step was made towards the central doctrine of Christianity—the Incarnation of the Word.

Two books of the Bible, Job and Ecclesiastes, of which the latter at any rate belongs to the period of the close of the kingdom, approach more nearly than any others to the type of philosophical discussions. But in both the problem is moral and not metaphysical. The one deals with the evils which afflict "the perfect and upright;" the other with the vanity of all the pursuits and pleasures of earth. In the one we are led for an answer to a vision of "the enemy" to whom a partial and temporary power over man is conceded (Job i. 6-12); in the other to that great future when "God shall bring every work to judgment" (Ecc. xii. 14). The method of inquiry is in both cases abrupt and irregular. One clew after another is followed out, and at length abandoned; and the final solution is obtained, not by a consecutive process of reason, but by an authoritative utterance, which faith welcomes as the truth, towards which all partial efforts had tended. (Compare Maurice, *Moral and Metaphysical Philosophy*, first edition.)

The Captivity necessarily exercised a profound influence upon Jewish thought. [Comp. CYRUS, vol. i. p. 527.] The teaching of Persia seems to have been designed to supply important elements in the education of the chosen people. But it did yet more than this. The imagery of Ezekiel (chap. i.) gave an apparent sanction to a new form of mystical speculation. It is uncertain at what date this earliest *Kabbala* (*i. e.* Tradition) received a definite form; but there can be no doubt that the two great divisions of which it is composed, "the chariot" (*Mercabah*, Ez. i.) and "the Creation" (*Beresith*, Gen. i.), found a wide development before the Christian era. The first dealt with the manifestation of God in Himself; the second with his manifestation in Nature; and as the doctrine was handed down orally, it received naturally, both from its extent and form, great additions from foreign sources. On the one side it was open to the Persian doctrine of emanation, on the other to the Christian doctrine of the Incarnation; and the tradition was deeply impressed by both before it was first committed to writing in the seventh or eighth century. At present the original sources for the teaching of the Kabbala are the *Sepher Jetzirah*, or Book of Creation, and the *Sepher ha-Zohar*, or Book of Splendor. The former of these dates in its present form from the eighth, and the latter from the thirteenth century (Zunz, *Gottesd. Fortb. d. Juden*, p. 165; Jellinek, *Moses ben Schenob de Leon*, Leipsic, 1851). Both are based upon a system of Pantheism. In the Book of Creation the Cabalistic ideas are given in their simplest form, and offer some points of comparison with the system of the Pythagoreans. The book begins with an enumeration of the thirty-two ways of wisdom seen in the constitution of the world, and the analysis of this number is supposed to contain the key to the mysteries of nature. The primary division is into 10 + 22. The number 10 represents the ten *Sephiroth* (figures), which answer to the ideal world; 22, on the other hand, the number of the Hebrew alphabet, answers to the world of objects; the object being related to the idea as a word, formed of letters, to a number

Twenty-two again is equal to  $3 + 7 + 12$ ; and each of these numbers, which constantly recur in the O. T. Scriptures, is invested with a peculiar meaning. Generally the fundamental conceptions of the book may be thus represented. The ultimate Being is Divine Wisdom (*Chocmah*, *Σοφία*). The universe is originally a harmonious thought of Wisdom (Number, *Sephirah*); and the thought is afterwards expressed in letters, which form, as words, the germ of things. Man, with his twofold nature, thus represents in some sense the whole universe. He is the Microcosm, in which the body clothes and veils the soul, as the phenomenal world veils the spirit of God. It is impossible to follow out here the details of this system, and its development in Zohar; but it is obvious how great an influence it must have exercised on the interpretation of Scripture. The calculation of the numerical value of words (comp. Rev. xiii. 18; *Gematria*, Buxtorf, *Lez. Rabb.* p. 446); the resolution of words into initial letters of new words (*Notaricon*, Buxtorf, 1339), and the transposition or interchange of letters (*Temurah*), were used to obtain the inner meaning of the text; and these practices have continued to affect modern exegesis (Lutterbeck, *Neutest. Lehrbegriff*, i. 223-254; Reuss, *Kabbala*, in Herzog's *Encyclop.*; Joel, *Die Relig.-Phil. d. Zohar*, 1849; Jellinek, as above; Westcott, *Introd. to Gospels*, pp. 131-134; Franck, *La Kabbale*, 1843; OLD TESTAMENT, B § 1).

The contact of the Jews with Persia thus gave rise to a traditional mysticism. Their contact with Greece was marked by the rise of distinct sects. In the third century B. C. the great doctor Antigonos of Socho bears a Greek name, and popular belief pointed to him as the teacher of Sadoc and Boethus, the supposed founders of Jewish rationalism. At any rate, we may date from this time the twofold division of Jewish speculation which corresponds to the chief tendencies of practical philosophy. The Sadducees appear as the supporters of human freedom in its widest scope; the Pharisees of a religious Stoicism. At a later time the cycle of doctrine was completed, when by a natural reaction the Essenes established a mystic Asceticism. The characteristics of these sects are noticed elsewhere. It is enough now to point out the position which they occupy in the history of Judaism (comp. *Introd. to Gospels*, pp. 60-66). At a later period the FOURTH BOOK OF MACCABEES (q. v.) is a very interesting example of Jewish moral (Stoic) teaching.

The conception of wisdom which appears in the Book of Proverbs was elaborated with greater detail afterwards [WISDOM OF SOLOMON], both in Palestine [ECCLESIASTICUS] and in Egypt; but the doctrine of the *Word* is of greater speculative interest. Both doctrines, indeed, sprang from the same cause, and indicate the desire to find some mediating power between God and the world, and to remove the direct appearance and action of God from a material sphere. The personification of Wisdom represents only a secondary power in relation to God; the Logos, in the double sense of Reason (*λόγος ἐνδιάθετος*) and Word (*λόγος προφορικός*), both in relation to God and in relation to the universe. The first use of the term Word (*Memra*), based upon the common formula of the prophets, is 'in the Targum of Onkelos (first cent. e. c.), in which "the Word of God" is commonly substituted for God in his immediate, personal relations with man (*Introd. to Gospels*, p. 137);

and it is probable that round this traditional rendering a fuller doctrine grew up. But there is a clear difference between the idea of the Word then prevalent in Palestine and that current at Alexandria. In Palestine the Word appears as the outward mediator between God and man, like the Angel of the Covenant; at Alexandria it appears as the spiritual connection which opens the way to revelation. The preface to St. John's Gospel includes the element of truth in both. In the Greek apocryphal books there is no mention of the Word (yet comp. *Wisd.* xviii. 15). For the Alexandrine teaching it is necessary to look alone to Philo (cir. b. c. 20 — A. D. 50); and the ambiguity in the meaning of the Greek term, which has been already noticed, produces the greatest confusion in his treatment of the subject. In Philo language dominates over thought. He has no one clear and consistent view of the Logos. At times he assigns to it divine attributes and personal action; and then again he affirms decidedly the absolute indivisibility of the divine nature. The tendency of his teaching is to lead to the conception of a twofold personality in the Godhead, though he shrinks from the recognition of such a doctrine (*De Monarch.* § 5; *De Somn.* § 37; *Quod det. pot. ins.* § 24; *De Somn.* § 39, &c.). Above all, his idea of the Logos was wholly disconnected from all Messianic hopes, and was rather the philosophic substitute for them. (*Introd. to Gospels*, pp. 138-141; Dähne, *Jüd.-Alex. Relig.-Philos.* 1834; Gfrörer, *Philo*, etc. 1835; Dörner, *Die Lehre v. d. Person Christi*, i. 23 ff., Lücke, *Comm.* i. 207 [272, 3<sup>o</sup> Aufl.], who gives an account of the earlier literature.) [WORD, THE, Amer. ed.]

Mittelwesen*, Leipz. 1846; Niedner, *De Subsistentia τῷ θεῷ λόγῳ apud Philonem Judæum et Jonnem Apost. tributa*, in his *Zeitschr. f. d. hist. Theol.*, 1849, Heft 3; Norton's *Statement of Reasons*, etc., 3d ed. (Bost. 1856), pp. 307-349; Jowett, *St. Paul and Philo*, in his *Epistles of St. Paul*, etc. 2d ed., Lond. 1859, i. 448 ff.; Zeller, *Philos. der Griechen*, Bd. iii. Abth. 2. A.

## II. THE PATRISTIC RECOGNITION OF THE PRO-PHEUTIC OFFICE OF GREEK PHILOSOPHY.

The divine discipline of the Jews was, as has been seen, in nature essentially moral. The lessons which it was designed to teach were embodied in the family and the nation. Yet this was not in itself a complete discipline of our nature. The reason, no less than the will and the affections, had an office to discharge in preparing man for the Incarnation. The process and the issue in the two cases were widely different, but they were in some sense complementary. Even in time this relation holds good. The divine kingdom of the Jews was just overthrown when free speculation arose in the Ionian colonies of Asia. The teaching of the last prophet nearly synchronized with the death of Socrates. All other differences between the discipline of reason and that of revelation are implicitly included in their fundamental difference of method. In the one, man boldly aspired at once to God, in the other, God disclosed Himself gradually to man. Philosophy failed as a religious teacher practically (Rom. i. 21. 22), but it bore noble witness to an inward law (Rom. ii. 14, 15). It laid open instinctive wants which it could not satisfy. It cleared away error, when it could not found truth.

It swayed the foremost minds of a nation, when it left the mass without hope. In its purest and grandest forms it was "a schoolmaster to bring men to Christ" (Clem. Alex. *Strom.* i. § 28).

This function of ancient philosophy is distinctly recognized by many of the greatest of the fathers. The principle which is involved in the doctrine of Justin Martyr on "the Seminal Word" finds a clear and systematic expression in Clement of Alexandria. (Comp. Redepenning, *Origenes*, i. 437-439.) "Every race of men participated in the Word. And they who lived with the Word were Christians, even if they were held to be godless (*ἄθεοι*), as for example, among the Greeks, Socrates and Heraclitus, and those like them" (Just. Mart. *Ap.* i. 46; comp. *Ap.* i. 5, 28; and ii. 10, 13). "Philosophy," says Clement, "before the coming of the Lord, was necessary to Greeks for righteousness; and now it proves useful for godliness, being in some sort a preliminary discipline (*προπαιδεία τῆς οὐσίας*) for those who reap the fruits of the faith through demonstration. . . . Perhaps we may say that it was given to the Greeks with this special object (*προσηγουμένως*), for it brought (*ἐπαυδαργώγει*) the Greek nation to Christ, as the Law brought the Hebrews" (Clem. Alex. *Strom.* i. 5, § 28; comp. 9, § 43, and 16, § 80). In this sense he does not scruple to say that "Philosophy was given as a peculiar testament (*διαθήκην*) to the Greeks, as forming the basis of the Christian philosophy" (*Strom.* vi. 8, § 67; comp. 5, § 41). Origen, himself a pupil of Ammonius Saccas, speaks with less precision as to the educational power of philosophy, but his whole works bear witness to its influence. The truths which philosophers taught, he says, referring to the words of St. Paul, were from God, for "God manifested these to them, and all things that have been nobly said" (c. *Cels.* vi. 3; *Philoc.* p. 15). Augustine, while depreciating the claims of the great Gentile teachers, allows that "some of them made great discoveries, so far as they received help from Heaven, while they erred as far as they were hindered by human frailty" (*Aug. De Civ.* ii. 7; comp. *De Doctr. Chr.* ii. 18). They had, as he elsewhere says, a distant vision of the truth, and learnt from the teaching of nature what prophets learnt from the Spirit (*Serm.* lxxviii. 3, xl. etc.).

But while many thus recognized in philosophy the free witness of the Word speaking among men, the same writers in other places sought to explain the partial harmony of philosophy and revelation by an original connection of the two. This attempt, which in the light of a clearer criticism is seen to be essentially fruitless and even suicidal, was at least more plausible in the first centuries. A multitude of writings were then current bearing the names of the Sibyl or Hystaspes, which were obviously based on the O. T. Scriptures, and as long as they were received as genuine it was impossible to doubt that Jewish doctrines were spread in the West before the rise of philosophy. And on the other hand, when the Fathers ridicule with the bitterest scorn the contradictions and errors of philosophers, it must be remembered that they spoke often fresh from a conflict with degenerate professors of systems which had long lost all real life. Some, indeed, there were, chiefly among the Latins, who consistently inveighed against philosophy. But even Tertullian, who is among its fiercest adversaries, allows that at times the philosophers hit upon truth by a happy chance or

blind good fortune, and yet more by that "general feeling with which God was pleased to endow the soul" (Tert. *De An.* c. 2). The use which was made of heathen speculation by heretical writers was one great cause of its disparagement by their catholic antagonists. Irenaeus endeavors to reduce the Gnostic teachers to a dilemma: either the philosophers with whom they argued knew the truth or they did not; if they did, the Incarnation was superfluous; if they did not, whence comes the agreement of the true and the false? (*Adv. Hæc.* ii. 14, 7). Hippolytus follows out the connection of different sects with earlier teachers in elaborate detail. Tertullian, with characteristic energy, declares that "Philosophy furnishes the arms and the subjects of heresy. What (he asks) has Athens in common with Jerusalem? the Academy with the Church? heretics with Christians? Our training is from the Porch of Solomon. . . . Let those look to it who bring forward a Stoic, a Platonic, a dialectic Christianity. We have no need of curious inquiries after the coming of Christ Jesus, nor of investigation after the Gospel" (Tert. *De Præscr. Hæc.* c. 7).

This variety of judgment in the heat of controversy was inevitable. The full importance of the history of ancient philosophy was then first seen when all rivalry was over, and it became possible to contemplate it as a whole, animated by a great law, often trembling on the verge of Truth, and sometimes by a "bold venture" claiming the heritage of faith. Yet even now the relations of the "two old covenants"—Philosophy and the Hebrew Scriptures—to use the language of Clement—have been traced only imperfectly. What has been done may encourage labor, but it does not supersede it. In the porticoes of eastern churches Pythagoras and Plato are pictured among those who prepared the way for Christianity (Stanley, p. 41); but in the West, Sibyls and not philosophers are the chosen representatives of the divine element in Gentile teaching.

### III. THE DEVELOPMENT OF GREEK PHILOSOPHY.

The complete fitness of Greek philosophy to perform this propædæutic office for Christianity, as an exhaustive effort of reason to solve the great problems of being, must be apparent after a detailed study of its progress and consummation; and even the simplest outline of its history cannot fail to preserve the leading traits of the natural (or even necessary) law by which its development was governed.

The various attempts which have been made to derive western philosophy from eastern sources have signally failed. The external evidence in favor of this opinion is wholly insufficient to establish it (Ritter, *Gesch. d. Phil.* i. 159, &c.; Thirlwall, *Hist. of Gr.* ii. 130; Zeller, *Gesch. d. Phil. d. Griechen*, i. 18-34; Max Müller, *On Language*, 84 note), and on internal grounds it is most improbable. It is true that in some degree the character of Greek speculation may have been influenced, at least in its earliest stages, by religious ideas which were originally introduced from the East; but this indirect influence does not affect the real originality of the great Greek teachers. The spirit of pure philosophy is (as has been already seen) wholly alien from eastern thought; and it was comparatively late when even a Greek ventured to separate

philosophy from religion. But in Greece the separation, when it was once effected, remained essentially complete. The opinions of the ancient philosophers might or might not be outwardly reconcilable with the popular faith; but philosophy and faith were independent. The very value of Greek teaching lies in the fact that it was, as far as is possible, a result of simple reason, or, if faith asserts its prerogative, the distinction is sharply marked. In this we have a record of the power and weakness of the human mind written at once on the grandest scale and in the fairest characters.

Of the various classifications of the Greek schools which have been proposed, the simplest and truest seems to be that which divides the history of philosophy into three great periods, the first reaching to the era of the Sophists, the next to the death of Aristotle, the third to the Christian era. In the first period the world objectively is the great centre of inquiry; in the second, the "ideas" of things, truth, and being; in the third, the chief interest of philosophy falls back upon the practical conduct of life. Successive systems overlap each other, both in time and subjects of speculation, but broadly the sequence which has been indicated will hold good (Zeller, *Die Philosophie der Griechen*, i. 111, &c.). After the Christian era philosophy ceased to have any true vitality in Greece, but it made fresh efforts to meet the changed conditions of life at Alexandria and Rome. At Alexandria Platonism was vivified by the spirit of oriental mysticism, and afterwards of Christianity; at Rome Stoicism was united with the vigorous virtues of active life. Each of these great divisions must be passed in rapid review.

1. *The pre-Socratic Schools.*—The first Greek philosophy was little more than an attempt to follow out in thought the mythic cosmogonies of earlier poets. Gradually the depth and variety of the problems included in the idea of a cosmogony became apparent, and, after each clew had been followed out, the period ended in the negative teaching of the Sophists. The questions of creation, of the immediate relation of mind and matter, were pronounced in fact, if not in word, insoluble, and speculation was turned into a new direction.

What is the one permanent element which underlies the changing forms of things? this was the primary inquiry to which the *Ionic* school endeavored to find an answer. THALES (cir. B. C. 610-625), following, as it seems, the genealogy of Hesiod, pointed to moisture (water) as the one source and supporter of life. ANAXIMENES (cir. B. C. 520-481) substituted air for water, as the more subtle and all-pervading element; but equally with Thales he neglected all consideration of the force which might be supposed to modify the one primal substance. At a much later date (cir. B. C. 450) DIOGENES of Apollonia, to meet this difficulty, represented this elementary "air" as endowed with intelligence (*νόησις*), but even he makes no distinction between the material and the intelligent. The atomic theory of DEMOCRITUS (cir. B. C. 460-357), which stands in close connection with this form of *Ionic* teaching, offered another and more plausible solution. The motion of his atoms included the action of force, but he wholly omitted to account for its source. Meanwhile another mode of speculation had arisen in the same school. In place of one definite element ANAXIMANDER (B. C. 610-517) suggested the unlimited (*τὸ ἄπειρον*) as the adequate origin of all special existences.

And somewhat more than a century later ANAXAGORAS summed up the result of such a line of speculation: "All things were together; then mind (*νοῦς*) came and disposed them in order" (Diog. Laert. ii. 6). Thus we are left face to face with an ultimate dualism.

The *Eleatic* school started from an opposite point of view. Thales saw moisture present in material things, and pronounced this to be their fundamental principle: XENOPHANES (cir. B. C. 530-50) "looked up to the whole heaven and said that the One is God" (Arist. *Met.* i. 5, τὸ ἓν εἶναι φησὶ τὸν θεόν). "Thales saw gods in all things; Xenophanes saw all things in God" (Thirlwall, *Hist. of Gr.* ii. 136). That which is, according to Xenophanes, must be one, eternal, infinite, immovable, unchangeable. PARMENIDES of Elea (B. C. 500) substituted abstract "being" for "God" in the system of Xenophanes, and distinguished with precision the functions of sense and reason. Sense teaches us of "the many," the false (phenomena); Reason of "the one," the true (the absolute). ZENO of Elea (cir. B. C. 450) developed with logical ingenuity the contradictions involved in our perceptions of things (in the idea of motion, for instance), and thus formally prepared the way for skepticism. If the one alone is, the phenomenal world is an illusion. The sublime aspiration of Xenophanes, when followed out legitimately to its consequences, ended in blank negation.

The teaching of HERACLITUS (B. C. 500) offers a complete contrast to that of the Eleatics, and stands far in advance of the earlier *Ionic* school, with which he is historically connected. So far from contrasting the existent and the phenomenal, he boldly identified being with change. "There ever was, and is, and shall be, an ever-living fire, unceasingly kindled and extinguished in due measure" (*ἀπτόμενον μέτρα καὶ ἀποσβεννύμενον μέτρα*, Clem. Alex. *Strom.* v. 14, § 105). Rest and continuance is death. That which is is the instantaneous balance of contending powers (Diog. Laert. ix. 7, διὰ τῆς ἐναντιοτροπῆς ἡρμόσθαι τὰ ὄντα). Creation is the *physis* of the Creator. Everywhere, as far as his opinions can be grasped, Heraclitus makes noble "guesses at truth"; yet he leaves "fate" (*εἰμαρμένον*) as the supreme creator (Stob. *Ecl.* i. p. 59, ap. Ritter & Preller, § 42). The cycles of life and death run on by its law. It may have been by a natural reaction that from these wider speculations he turned his thoughts inwards. "I investigated myself," he says, with conscious pride (Plut. *adv. Col.* 1118, c.); and in this respect he foreshadows the teaching of Socrates, as Zeno did that of the Sophists.

The philosophy of PYTHAGORAS (cir. B. C. 810-510) is subordinate in interest to his social and political theories, though it supplies a link in the course of speculation; others had labored to trace a unity in the world in the presence of one underlying element or in the idea of a whole; he sought to combine the separate harmony of parts with total unity. Numerical unity includes the finite and the infinite; and in the relations of number there is a perfect symmetry, as all spring out of the fundamental unit. Thus numbers seemed to Pythagoras to be not only "patterns" of things (*τῶν ὄντων*), but causes of their being (*τῆς οὐσίας*). How he connected numbers with concrete being it is impossible to determine; but it may not be wholly fanciful to see in the doctrine of transmigration of souls an attempt to trace in the success

five forms of life an outward expression of a harmonious law in the moral as well as in the physical world. (The remains of the pre-Socratic philosophers have been collected in a very convenient form by F. Mullach in Didot's *Biblioth. Gr.*, Paris, 1860.)

The first cycle of philosophy was thus completed. All the great primary problems of thought had been stated, and typical answers rendered. The relation of spirit and matter was still unsolved. Speculation issued in dualism (Anaxagoras), materialism (Democritus), or pantheism (Xenophanes). On one side reason was made the sole criterion of truth (Parmenides); on the other, experience (Heraclitus). As yet there was no rest, and the Sophists prepared the way for a new method.

Whatever may be the moral estimate which is formed of the Sophists, there can be little doubt as to the importance of their teaching as preparatory to that of Socrates. All attempts to arrive at certainty by a study of the world had failed: might it not seem, then, that truth is subjective? "Man is the measure of all things." Sensations are modified by the individual; and may not this hold good universally? The conclusion was applied to morals and politics with fearless skill. The belief in absolute truth and right was well-nigh banished; but meanwhile the Sophists were perfecting the instrument which was to be turned against them. Language, in their hands, acquired a precision unknown before, when words assumed the place of things. Plato might ridicule the pedantry of Protagoras, but Socrates reaped a rich harvest from it.

2. *The Socratic Schools.*—In the second period of Greek philosophy the scene and subject were both changed. Athens became the centre of speculations which had hitherto chiefly found a home among the more mixed populations of the colonies. And at the same time inquiry was turned from the outward world to the inward, from theories of the origin and relation of things to theories of our knowledge of them. A philosophy of ideas, using the term in its widest sense, succeeded a philosophy of nature. In three generations Greek speculation reached its greatest glory in the teaching of Socrates, Plato, and Aristotle. When the sovereignty of Greece ceased, all higher philosophy ceased with it. In the hopeless turmoil of civil disturbances which followed, men's thoughts were chiefly directed to questions of personal duty.

The famous sentence in which Aristotle (*Met. M. 4*) characterizes the teaching of SOCRATES (B. C. 468-399) places his scientific position in the clearest light. There are two things, he says, which we may rightly attribute to Socrates, inductive reasoning, and general definition (*τοῖς ἑπακτικῶν λόγων καὶ τῷ ὀρίσσειναι καθόλου*). By the first he endeavored to discover the permanent element which underlies the changing forms of appearances and the varieties of opinion; by the second he fixed the truth which he had thus gained. But, besides this, Socrates rendered another service to truth. He changed not only the method but also the subject of philosophy (*Cic. Acad. Post. . 4*). Ethics occupied in his investigations the primary place which had hitherto been held by Physics. The great aim of his induction was to establish the sovereignty of Virtue; and before entering on other speculations he determined to obey the Delphian maxim and "know himself" (*Plat. Phædr. 229*). It was a necessary consequence

of a first effort in this direction that Socrates regarded all the results which he derived as like in kind. Knowledge (*ἐπιστήμη*) was equally absolute and authoritative, whether it referred to the laws of intellectual operations or to questions of morality. A conclusion in geometry and a conclusion on conduct were set forth as true in the same sense. Thus vice was only another name for ignorance (*Xen. Mem. iii. 9, 4*; *Arist. Eth. Eud. i. 5*). Every one was supposed to have within him a faculty absolutely leading to right action, just as the mind necessarily decides rightly as to relations of space and number, when each step in the proposition is clearly stated. Socrates practically neglected the determinative power of the will. His great glory was, however, clearly connected with this fundamental error in his system. He affirmed the existence of a universal law of right and wrong. He connected philosophy with action, both in detail and in general. On the one side he upheld the supremacy of Conscience, on the other the working of Providence. Not the least fruitful characteristic of his teaching was what may be called its desultoriness. He formed no complete system. He wrote nothing. He attracted and impressed his readers by his many-sided nature. He helped others to give birth to thoughts, to use his favorite image, but he was barren himself (*Plat. Theat. p. 150*). As a result of this, the most conflicting opinions were maintained by some of his professed followers, who carried out isolated fragments of his teaching to extreme conclusions. Some adopted his method (*Euclides, cir. B. C. 400, the Megarians*); others his subject. Of the latter, one section, following out his proposition of the identity of self-command (*ἐγκράτεια*) with virtue, professed an utter disregard of everything material (*Antisthenes, cir. B. C. 366, the Cynics*), while the other (*Aristippus, cir. B. C. 366, the Cyrenics*), inverting the maxim that virtue is necessarily accompanied by pleasure, took immediate pleasure as the rule of action.

These "minor Socratic schools" were, however, premature and imperfect developments. The truths which they distorted were embodied at a later time in more reasonable forms. PLATO alone (B. C. 430-347), by the breadth and nobleness of his teaching, was the true successor of Socrates; with fuller detail and greater elaborateness of parts, his philosophy was as many-sided as that of his master. Thus it is impossible to construct a consistent Platonic system, though many Platonic doctrines are sufficiently marked. Plato, indeed, possessed two commanding powers, which, though apparently incompatible, are in the highest sense complementary: a matchless destructive dialectic, and a creative imagination. By the first he refuted the great fallacies of the Sophists on the uncertainty of knowledge and right, carrying out in this the attacks of Socrates; by the other he endeavored to bridge over the interval between appearance and reality, and gain an approach to the eternal. His famous doctrines of ideas and recollection (*ἀνάμνησις*) are a solution by imagination of a logical difficulty. Socrates had shown the existence of general notions; Plato felt constrained to attribute to them a substantive existence (*Arist. Met. M. 4*). A glorious vision gave completeness to his view. The unembodied spirits were exhibited in immediate presence of the "ideas" of things (*Phædr. p. 247*); the law of their embodiment was sensibly portrayed; and the more or less vivid remembrance of supramundane realities in this life

was traced to antecedent facts. All men were thus supposed to have been face to face with Truth: the object of teaching was to bring back impressions latent but uneffaced.

The "myths" of Plato, to one of the most famous of which reference has just been made, play a most important part in his system. They answer in the philosopher to faith in the Christian. In dealing with immortality and judgment he leaves the way of reason, and ventures, as he says, on a rude raft to brave the dangers of the ocean (*Phæd.* 85 D; *Gorg.* 523 A). "The peril and the prize are noble and the hope is great" (*Phæd.* 114, C, D). Such tales, he admits, may seem puerile and ridiculous; and if there were other surer and clearer means of gaining the desired end, the judgment would be just (*Gorg.* 527 A). But, as it is, thus only can he connect the seen and the unseen. The myths, then, mark the limit of his dialectics. They are not merely a poetical picture of truth already gained, or a popular illustration of his teaching, but real efforts to penetrate beyond the depths of argument. They show that his method was not commensurate with his instinctive desires; and point out in intelligible outlines the subjects on which man looks for revelation. Such are the relations of the human mind to truth (*Phædr.* pp. 246-249); the pre-existence and immortality of the soul (*Meno*, pp. 81-83; *Phædr.* pp. 110-112; *Tim.* p. 41); the state of future retribution (*Gorg.* pp. 523-525; *Rep.* x. 614-616); the revolutions of the world (*Polit.* p. 239). Compare also *Sympos.* pp. 189-191, 203-205; Zeller, *Philos. d. Griech.* pp. 361-363, who gives the literature of the subject).

The great difference between Plato and ARISTOTLE (B. C. 384-322) lies in the use which Plato thus made of imagination as the exponent of instinct. The dialectic of Plato is not inferior to that of Aristotle, and Aristotle exhibits traces of poetic power not unworthy of Plato; but Aristotle never allows imagination to influence his final decision. He elaborated a perfect method, and he used it with perfect fairness. His writings, if any, contain the highest utterance of pure reason. Looking back on all the earlier efforts of philosophy, he pronounced a calm and final judgment. For him many of the conclusions which others had maintained were valueless, because he showed that they rested on feeling, and not on argument. This stern severity of logic gives an indescribable pathos to those passages in which he touches on the highest hopes of men; and perhaps there is no more truly affecting chapter in ancient literature than that in which he states in a few unimpassioned sentences the issue of his inquiry into the immortality of the soul. Part of it may be immortal, but that part is impersonal (*De An.* iii. 5). This was the sentence of reason, and he gives expression to it without a word of protest, and yet as one who knew the extent of the sacrifice which it involved. The conclusion is, as it were, the epitaph of free speculation. Laws of observation and argument, rules of action, principles of government remain, but there is no hope beyond the grave.

It follows necessarily that the Platonic doctrine of ideas was emphatically rejected by Aristotle, who gave, however, the final development to the original conception of Socrates. With Socrates "Ideas" (general definitions) were mere abstractions; with Plato they had an absolute existence;

with Aristotle they had no existence separate from things in which they were realized, though the form (*μορφή*), which answers to the Platonic idea, was held to be the essence of the thing itself (comp. Zeller, *Philos. d. Griech.* i. 119, 120).

There is one feature common in essence to the systems of Plato and Aristotle which has not yet been noticed. In both, Ethics is a part of Politics. The citizen is prior to the man. In Plato this doctrine finds its most extravagant development in theory, though his life, and, in some places, his teaching, were directly opposed to it (e. g. *Gorg.* p. 527 D). This practical inconsequence was due, it may be supposed, to the condition of Athens at the time, for the idea was in complete harmony with the national feeling; and, in fact, the absolute subordination of the individual to the body included one of the chief lessons of the ancient world. In Aristotle the "political" character of man is defined with greater precision, and brought within narrower limits. The breaking-up of the small Greek states had prepared the way for more comprehensive views of human fellowship, without destroying the fundamental truth of the necessity of social union for perfect life. But in the next generation this was lost. The wars of the Succession obliterated the idea of society, and philosophy was content with aiming at individual happiness.

The coming change was indicated by the rise of a school of skeptics. The skepticism of the Sophists marked the close of the first period, and in like manner the skepticism of the Pyrrhonists marks the close of the second (STILPO, cir. B. C. 290; PYRRHON, cir. B. C. 290). But the Pyrrhonists rendered no positive service to the cause of philosophy, as the Sophists did by the refinement of language. Their immediate influence was limited in its range, and it is only as a symptom that the rise of the school is important. But in this respect it foreshows the character of after-philosophy by denying the foundation of all higher speculations. Thus all interest was turned to questions of practical morality. Hitherto morality had been based as a science upon mental analysis, but by the Pyrrhonists it was made subservient to law and custom. Immediate experience was held to be the rule of life (comp. Ritter and Preller, § 350).

3. *The post-Socratic Schools.*—After Aristotle, philosophy, as has been already noticed, took a new direction. The Socratic schools were, as has been shown, connected by a common pursuit of the permanent element which underlies phenomena. Socrates placed Virtue, truth in action, in a knowledge of the ideas of things. Plato went further, and maintained that these ideas are alone truly existent. Aristotle, though differing in terms, yet only followed in the same direction, when he attributed to Form, not an independent existence, but a fashioning, vivifying power in all individual objects. But from this point speculation took a mainly personal direction. Philosophy, in the strict sense of the word, ceased to exist. This was due both to the circumstances of the time and to the exhaustion consequent on the failure of the Socratic method to solve the deep mysteries of being. Aristotle had, indeed, laid the wide foundations of an inductive system of physics, but few were inclined to continue his work. The physical theories which were brought forward were merely adaptations from earlier philosophers.

In dealing with moral questions two opposite systems are possible, and have found advocates in

all ages. On the one side it may be said that the character of actions is to be judged by their results; on the other, that it is to be sought only in the actions themselves. Pleasure is the test of right in one case; an assumed, or discovered, law of our nature in the other. If the world were perfect and the balance of human faculties undisturbed, it is evident that both systems would give identical results. As it is, there is a tendency to error on each side, which is clearly seen in the rival schools of the Epicureans and Stoics, who practically divided the suffrages of the mass of educated men in the centuries before and after the Christian era.

EPICURUS (B. C. 352-270) defined the object of philosophy to be the attainment of a happy life. The pursuit of truth for its own sake he regarded as superfluous. He rejected dialectics as a useless study, and accepted the senses, in the widest acceptance of the term [EPICUREANS, i. 570], as the criterion of truth. Physics he subordinated entirely to ethics (Cic. *de Fin.* i. 7). But he differed widely from the Cyrenaics in his view of happiness. The happiness at which the wise man aims is to be found, he said, not in momentary gratification, but in lifelong pleasure. It does not consist necessarily in excitement or motion, but often in absolute tranquillity (*ἀταραξία*). "The wise man is happy even on the rack" (Diog. Laert. x. 118), for "virtue alone is inseparable from pleasure" (*id.* 138). To live happily and to live wisely, nobly, and justly, are convertible phrases (*id.* 140). But it followed as a corollary from his view of happiness, that the Gods, who were assumed to be supremely happy and eternal, were absolutely free from the distractions and emotions consequent on any care for the world or man (*id.* 139; comp. Lucr. ii. 645-647). All things were supposed to come into being by chance, and so pass away; and the study of Nature was chiefly useful as dispelling the superstitious fears of the Gods and death by which the multitude are tormented. It is obvious how such teaching would degenerate in practice. The individual was left master of his own life, free from all regard to any higher law than a refined selfishness.

While Epicurus asserted in this manner the claims of one part of man's nature in the conduct of life, ZENO of Citium (cir. B. C. 280), with equal partiality, advocated a purely spiritual (intellectual) morality. The opposition between the two was complete. The infinite, chance-formed worlds of the one stand over against the one harmonious world of the other. On the one side are Gods regardless of material things, on the other a Being permeating and vivifying all creation. This difference necessarily found its chief expression in ethics. For when the Stoics taught that there were only two principles of things, Matter (*τὸ πᾶσχαον*), and God, Fate, Reason — for the names were many by which it was fashioned and quickened (*τὸ ποιῶν*) — it followed that the active principle in man is of Divine origin, and that his duty is to live conformably to nature (*τὸ ὁμολογουμένως [τῆ φύσει] ζῆν*). By "Nature" some understood the nature of man, others the nature of the universe; but both agreed in regarding it as a general law of the whole, and not particular passions or impulses. Good, therefore, was but one. All external things were

indifferent. Reason was the absolute sovereign of man. Thus the doctrine of the Stoics, like that of Epicurus, practically left man to himself. But it was worse in its final results than Epicurism, for it made him his own god.<sup>a</sup>

In one point the Epicureans and Stoics were agreed. They both regarded the happiness and culture of the individual as the highest good. Both systems belonged to a period of corruption and decay. They were the efforts of the man to support himself in the ruin of the state. Put at the same time this assertion of individual independence and breaking down of local connections performed an important work in preparation for Christianity. It was for the Gentile world an influence corresponding to the Dispersion for the Jews. Men, as men, owned their fellowship as they had not done before. Isolating superstitions were shattered by the arguments of the Epicureans. The unity of the human conscience was vigorously affirmed by the Stoics (comp. Antoninus, iv. 4, 33, with Gataker's notes).

Meanwhile in the New Academy Platonism degenerated into skepticism. Epicurus found an authoritative rule in the senses. The Stoics took refuge in what seems to answer to the modern doctrine of "common sense," and maintained that the senses give a direct knowledge of the object. CARNEADES (B. C. 213-129) combated these views, and showed that sensation cannot be proved to declare the real nature, but only some of the effects, of things. Thus the slight philosophical basis of the later schools was undermined. Skepticism remained as the last issue of speculation; and, if we may believe the declaration of Seneca (*Quæst. Nat.* vii. 32), skepticism itself soon ceased to be taught as a system. The great teachers had sought rest, and in the end they found unrest. No science of life could be established. The reason of the few failed to create an esoteric rule of virtue and happiness. For in this they all agreed, that the blessings of philosophy were not for the mass. A "Gospel preached to the poor" was as yet unknown.

But though the Greek philosophers fell short of their highest aim, it needs no words to show the work which they did as pioneers of a universal Church. They revealed the wants and the instincts of men with a clearness and vigor elsewhere unattainable, for their sight was dazzled by no reflections from a purer faith. Step by step great questions were proposed — Fate, Providence — Conscience, Law — the State, the Man — and answers were given, which are the more instructive because they are generally one-sided. The discussions, which were primarily restricted to a few, in time influenced the opinions of the many. The preacher who spoke of "an unknown God" had an audience who could understand him, not at Athens only or Rome, but throughout the civilized world.

The complete course of philosophy was run before the Christian era, but there were yet two mixed systems afterwards which offered some novel features. At Alexandria Platonism was united with various elements of eastern speculation, and for several centuries exercised an important influence on Christian doctrine. At Rome Stoicism was vivified by the spirit of the old republic, and exhibited the extreme western type of philosophy. Of the first

<sup>a</sup> This statement, which is true generally, is open to many exceptions. The famous hymn of Cleanthes is

one of the noblest expressions of belief in Divine Power (Mullach, *Fragm. Philos.* p. 151).

nothing can be said here. It arose only when Christianity was a recognized spiritual power, and was influenced both positively and negatively by the Gospel. The same remark applies to the efforts to quicken afresh the forms of Paganism, which found their climax in the reign of Julian. These have no independent value as an expression of original thought; but the Roman Stoicism calls for brief notice from its supposed connection with Christian morality (SENECA, † A. D. 65; EPICURETUS, † cir. A. D. 115; M. AURELIUS ANTONINUS, 121-180). The belief in this connection found a singular expression in the apocryphal correspondence of St. Paul and Seneca, which was widely received in the early Church (Jerome, *De Vir. ill.* xii.). And lately a distinguished writer (Mill, *On Liberty*, p. 58, quoted by Stanley, *Eastern Ch. Lect.* VI., apparently with approbation) has speculated on the "tragic fact" that Constantine, and not Marcus Aurelius, was the first Christian emperor. The superficial coincidences of Stoicism with the N. T. are certainly numerous. Coincidences of thought, and even of language, might easily be multiplied (Gataker, *Antoninus*, Præf. pp. xi. etc.), and in considering these it is impossible not to remember that Semitic thought and phraseology must have exercised great influence on Stoic teaching (Grant, *Oxford Essays*, 1858, p. 82).<sup>a</sup> But beneath this external resemblance of Stoicism to Christianity, the later Stoics were fundamentally opposed to it. For good and for evil they were the Pharisees of the Gentile world. Their highest aspirations are mixed with the thanksgiving "that they were not as other men are" (comp. *Anton.* i.). Their worship was a sublime egotism.<sup>b</sup> The conduct of life was regarded as an art, guided in individual actions by a conscious reference to reason (*Anton.* iv. 2, 3, v. 32), and not a spontaneous process rising naturally out of one vital principle.<sup>c</sup> The wise man, "wrapt in himself" (vii. 28), was supposed to look with perfect indifference on the changes of time (iv. 49); and yet beneath this show of independence he was a prey to a hopeless sadness. In words he appealed to the great law of fate which rapidly sweeps all things into oblivion as a source of consolation (iv. 2, 14, vi. 15); but there is no confidence in any future retribution. In a certain sense the elements of which we are composed are eternal (v. 13), for they are incorporated in other parts of the universe, but we shall cease to exist (iv. 14, 21, vi. 24, vii. 10). Not only is there no recognition of communion between an immortal man and a personal God, but the idea is excluded. Man is but an atom in a vast universe, and his actions and sufferings are measured solely by their relation to the whole (*Anton.* x. 5, 6, 20, xii. 26, vi. 45, v. 22, vii. 9). God is

out another name for "the mind of the universe" (*ὁ τοῦ ἅλου νοῦς*, v. 30), "the soul of the world" (iv. 40), "the reason that ordereth matter" (vi. 1), "universal nature" (*ἡ τῶν ἅλων φύσις*, vii. 33, ix. 1; comp. x. 1), and is even identified with the world itself (*τοῦ γεννήσαντος κόσμου*, xii. 1; comp. Gataker on iv. 23). Thus the Stoicism of M. Aurelius gives many of the moral precepts of the Gospel (Gataker, *Præf.* p. xviii.), but without their foundation, which can find no place in his system. It is impossible to read his reflections without emotion, but they have no creative energy. They are the last strain of a dying creed, and in themselves have no special affinity to the new faith. Christianity necessarily includes whatever is noblest in them, but they affect to supply the place of Christianity, and do not lead to it. The real elements of greatness in M. Aurelius are many, and truly Roman; but the study of his *Meditations* by the side of the N. T. can leave little doubt that he could not have helped to give a national standing place to a Catholic Church.<sup>d</sup>

#### IV. CHRISTIANITY IN CONTACT WITH ANCIENT PHILOSOPHY.

The only direct trace of the contact of Christianity with western philosophy in the N. T. is in the account of St. Paul's visit to Athens, where "certain philosophers of the Epicureans and of the Stoics" (Acts xvii. 18) — the representatives, that is, of the two great moral schools which divided the West — "encountered him;" and there is nothing in the apostolic writings to show that it exercised any important influence upon the early church (comp. 1 Cor. i. 22-4). But it was otherwise with eastern speculation, which, as it was less scientific in form, penetrated more deeply through the mass of the people. The "philosophy" against which the Colossians were warned (Col. ii. 8) seems undoubtedly to have been of eastern origin, containing elements similar to those which were afterwards embodied in various shapes of Gnosticism, as a selfish asceticism and a superstitious reverence for angels (Col. ii. 16-23); and in the Epistles to Timothy, addressed to Ephesus, in which city St. Paul anticipated the rise of false teaching (Acts xx. 30), two distinct forms of error may be traced in addition to Judaism, due more or less to the same influence. One of these was a vain spiritualism, insisting on ascetic observances and interpreting the resurrection as a moral change (1 Tim. iv. 1-7; 2 Tim. ii. 16-18); the other a materialism allied to sorcery (2 Tim. iii. 13, γόητες). The former is that which is peculiarly "false-styled gnosis" (1 Tim. vi. 20), abounding in "profane and old wives' fables" (1 Tim. iv. 7) and empty discussions (i. 6, vi. 20); the latter has

<sup>a</sup> Citium, the birthplace of Zeno, was a Phœnician colony; Herillus, his pupil, was a Carthaginian; Chrysippus was born at Soli or Tarsus; of his scholars and successors, Zeno and Antipater were natives of Tarsus, and Diogenes of Babylon. In the next generation, Posidonius was a native of Apamea in Syria; and Epictetus, the noblest of Stoics, was born at Hierapolis in Phrygia.

<sup>b</sup> Seneca, *Ep.* 53, 11: "Est aliquid quo sapiens antecedit Deum; ille beneficio nature non timet, suo sapienter." Comp. *Ep.* 41. *Anton.* xii. 26, ὁ ἐκάστου τοῦ θεοῦ καὶ ἐκείνου ἐπερρήκε. Comp. v. 10.

<sup>c</sup> This explains the well-known reference of Marcus Aurelius to the Christians. They were ready to die of mere obstinacy" (κατὰ ψιλὴν παράταξιν, i. e.:

faith), whereas, he says, this readiness ought to come "from personal judgment after due calculation" (ἀπὸ ἰδικῆς κρίσεως . . . ἀλογισμῶν . . . xi. 3). So also Epictetus (*Diss.* ix. 7, k) contrasts the fortitude gained by "habit," by the Galileans, with the true fortitude based on "reason and demonstration."

<sup>d</sup> The writings of Epictetus contain in the main the same system, but with somewhat less arrogance. It may be remarked that the silence of Epictetus and M. Aurelius on the teaching of Christianity can hardly be explained by ignorance. It seems that the philosopher would not notice (in word) the believer. Comp. Lardner, *Works*, vii. 356-57.

a close connection with earlier tendencies at Ephesus (Acts xix. 19), and with the traditional accounts of Simon Magus (comp. Acts viii. 9), whose working on the early church, however obscure, was unquestionably most important. These antagonistic and yet complementary forms of heresy found a wide development in later times; but it is remarkable that no trace of dualism, of the distinction of the Creator and the Redeemer, the Demiurge and the true God, which formed so essential a tenet of the Gnostic schools, occurs in the N. T. (comp. Thiersch, *Versuch zur Herst. d. hist. Standp.* etc., 231-304).

The writings of the sub-apostolic age, with the exception of the famous anecdote of Justin Martyr (*Dial.* 2-4), throw little light upon the relations of Christianity and philosophy. The heretical systems again are too obscure and complicated to illustrate more than the general admixture of foreign (especially eastern) tenets with the apostolic teaching. One book, however, has been preserved in various shapes, which, though still unaccountably neglected in church histories, contains a vivid delineation of the speculative struggle which Christianity had to maintain with Judaism and Heathenism. The *Clementine Homilies* (ed. Dressel, 1853) and *Recognitions* (ed. Gersdorf, 1838) are a kind of Philosophy of Religion, and in subtlety and richness of thought yield to no early Christian writings. The picture which the supposed author draws of his early religious doubts is evidently taken from life (*Clem. Recogn.* i. 1-3; Neander, *Ch. Hist.* i. 43, E. T.); and in the discussions which follow there are clear traces of western as well as eastern philosophy (Uhlhorn, *Die Hom. u. Recogn. d. Clem. Rom.* pp. 404, &c.).

At the close of the second century, when the Church of Alexandria came into marked intellectual preëminence, the mutual influence of Christianity and Neo-Platonism opened a new field of speculation, or rather the two systems were presented in forms designed to meet the acknowledged wants of the time. According to the commonly received report, Origen was the scholar of Ammonius Saccas, who first gave consistency to the later Platonism, and for a long time he was the contemporary of Plotinus (A. D. 205-270), who was its noblest expositor. Neo-Platonism was, in fact, an attempt to seize the spirit of Christianity apart from its historic basis and human elements. The separation between the two was absolute; and yet the splendor of the one-sided spiritualism of the Neo-Platonists attracted in some cases the admiration of the Christian Fathers (Basil, Theodoret), and the wide circulation of the writings of the pseudo-Dionysius the Areopagite served to propagate many of their doctrines under an orthodox name among the schoolmen and mystics of the Middle Ages (Vogt, *Neu-Platonismus u. Christenthum*, 1836; Herzog, *Encyklop.* s. v. *Neu-Platonismus*).

The want which the Alexandrine Fathers endeavored to satisfy is in a great measure the want of our own time. If Christianity be truth, it must have points of special connection with all nations and all periods. The difference of character in the constituent writings of the N. T. are evidently typical, and present the Gospel in a form (if technical language may be used) now ethical, now logical, now mystical. The varieties of aspect thus indicated combine to give the idea of a harmonious whole. Clement rightly maintained that

there is a "gnosis" in Christianity distinct from the errors of Gnosticism. The latter was a premature attempt to connect the Gospel with earlier systems; the former a result of conflict grounded on faith (Möhler, *Patrologie*, 424, &c.). Christian philosophy may be in one sense a contradiction in terms, for Christianity confessedly derives its first principles from revelation, and not from simple reason; but there is no less a true philosophy of Christianity, which aims to show how completely these, by their form, their substance, and their consequences, meet the instincts and aspirations of all ages. The exposition of such a philosophy would be the work of a modern Origen. B. F. W.

PHINEES [3 syl.] (Φινεές; [1 Esdr. viii. 2,

Vat. Φινεες; 1 Macc., Alex. Φινεως:] *Phinees*). 1. The son of Eleazar son of Aaron, the great hero of the Jewish priesthood (1 Esdr. v. 5, viii. 2, 29; a 2 Esdr. i. 26; Ecclus. xlv. 23; 1 Macc. ii. 26).

2. Phinehas the son of Eli, 2 Esdr. i. 2a: but the insertion of the name in the genealogy of Ezra (in this place only) is evidently an error, since Ezra belonged to the line of Eleazar, and Eli to that of Ithamar. It probably arose from a confusion of the name with that of the great Phinehas, who was Ezra's forefather.

3. [Vat. Φινεες.] A priest or Levite of the time of Ezra, father of Eleazar (1 Esdr. viii. 63; 2.

4. [Φινεας: *Simone*.] 1 Esdr. v. 31. [PASEAH, 2.]

PHINEHAS (פִּינְחָסִי, *i. e.* *Pinechas* [*oracle mouth, utterance*, Fürst; *brazen mouth*, Ges.]

a Here the LXX. [Vat.] has Φορος [but Rom. Alex. Φινεές].

[Rom. Alex.] *Φινεές*; but [Vat.] once in Pent. and uniformly elsewhere, *Φεινέες*; Jos. *Φινεένης*: *Phinees*. Son of Eleazar and grandson of Aaron (Ex. vi. 25). His mother is recorded as one of the daughters of Putiel, an unknown person, who is identified by the Rabbis with Jethro the Midianite (*Targ. Pseudojon.* on Ex. vi. 25; Wagenseil's *Sota*, viii. 6). Phinehas is memorable for having while quite a youth, by his zeal and energy at the critical moment of the licentious idolatry of Shittim, appeased the divine wrath and put a stop to the plague which was destroying the nation (Num. xxv. 7). For this he was rewarded by the special approbation of Jehovah, and by a promise that the priesthood should remain in his family forever (10-13). This seems to have raised him at once to a very high position in the nation, and he was appointed to accompany as priest the expedition by which the Midianites were destroyed (xxi. 6). Many years later he also headed the party who were despatched from Shiloh to remonstrate against the Altar which the trans-Jordanic tribes were reported to have built near Jordan (Josh. xxii. 13-32). In the partition of the country he received an allotment of his own—a hill on Mount Ephraim which bore his name—Gibeath-Phinehas. Here his father was buried (Josh. xxiv. 33).

During the life of Phinehas he appears to have been the chief of the great family of the Korahites or Korhites who guarded the entrances to the sacred tent and the whole of the sacred camp (1 Chr. ix. 20). After Eleazar's death he became high-priest—the third of the series. In this capacity he is introduced as giving the oracle to the nation during the struggle with the Benjamites on the matter of Gibeah (Judg. xx. 28). Where the Ark and Tabernacle were stationed at that time is not clear. From ver. 1 we should infer that they were at Mizpeh, while from vv. 18, 26, it seems equally probable that they were at Bethel (which is also the statement of Josephus, *Ant.* v. 2, § 11). Or the Hebrew words in these latter verses may mean, not Bethel the town, but, as they are rendered in the A. V., "house of God," and refer to the Tabernacle at Shiloh. But wherever the Ark may have been, there was the aged priest "standing before it," and the oracle which he delivered was one which must have been fully in accordance with his own vehement temper, "Shall we go out to battle . . . or shall we cease?" And the answer was, "Go up: for to-morrow I will deliver them into your hand."

The memory of this champion of Jehovah was very dear to the Jews. The narrative of the Pentateuch presents him as the type of an ardent and devoted priest. The numerous references to him in the later literature all adopt the same tone. He is commemorated in one of the Psalms (cvi. 30, 31) in the identical phrase which is consecrated forever by its use in reference to the great act of faith of Abraham; a phrase which perhaps more than any other in the Bible binds together the old and new dispensations—"that was counted to him for righteousness unto all generations forevermore" (comp. Gen. xv. 6; Rom. iv. 3). The "covenant" made with him is put into the same rank for dignity and certainty with that by which the throne was assured to King David (Ecclus. xlv. 25). The zeal of Mattathias the Maccabee is sufficiently praised by a comparison with that of "Phineas against Zambri the son of Salom" (1 Macc. ii. 26). The priests who returned from the

Captivity are enrolled in the official lists as the sons of Phinehas (Ezr. viii. 2; 1 Esdr. v. 5). In the *Seder Olam* (ch. xx.) he is identified with "the Prophet" of Judg. vi. 8.

Josephus (*Ant.* iv. 6, § 12), out of the venerable traditions which he uses with such excellent effect, adds to the narrative of the Pentateuch a statement that "so great was his courage and so remarkable his bodily strength, that he would never relinquish any undertaking, however difficult and dangerous, without gaining a complete victory." The later Jews are fond of comparing him to Elijah, if indeed they do not regard them as one and the same individual (see the quotations in Meyer, *Chron. Hebr.* p. 845; Fabricius, *Codex pseudoepig.* p. 894, note). In the Targum Pseudo-jonathan of Num. xxv. the slaughter of Zimri and Cozbi is accompanied by twelve miracles, and the covenant made with Phinehas is expanded into a promise, that he shall be "the angel of the covenant, shall live forever, and shall proclaim redemption at the end of the world." His Midianite origin (already noticed) is brought forward as adding greater lustre to his zeal against Midian, and enhancing his glorious destiny.

The verse which closes the book of Joshua is ascribed to Phinehas, as the description of the death of Moses at the end of Deuteronomy is to Joshua (*Baba Bathra*, in Fabricius, p. 893). He is also reported to be the author of a work on sacred names (*ibid.*), which however is so rare that Fabricius had never seen it.

The succession of the posterity of Phinehas in the high-priesthood was interrupted when Eli, of the race of Ithamar, was priest; but it was resumed in the person of Zadok, and continued in the same line to the destruction of Jerusalem. [HIGH-PRIEST, vol. ii. p. 1070 ff.] One of the members of the family—Manasseh son of Johanan, and brother of Jaddua—went over to the Samaritans, and they still boast that they preserve the succession (see their Letter to Scaliger, in Eichhorn's *Repertorium*, xiii. 262).

The tomb of Phinehas, a place of great resort to both Jews and Samaritans, is shown at *Awertah*, four miles S. E. of *Nablus*. It stands in the centre of the village, inclosed within a little area or compound, which is overshadowed by the thickly-trellised foliage of an ancient vine. A small mosque joins the wall of the compound. Outside the village, on the next hill, is a larger inclosure, containing the tomb of Eleazar, and a cave ascribed to Elijah, overshadowed by two venerable terebinth trees, surrounded by arcades, and forming a retired and truly charming spot. The local tradition asserts that *Awertah* and its neighborhood are the "Hill of Phinehas."

In the Apocryphal Books his name is given as PHINEES.

2. [Vat. *Φεινέες*.] Second son of Eli (1 Sam. i. 3, ii. 34, iv. 4, 11, 17, 19, xiv. 3). He was not of the same line as his illustrious and devoted namesake, but of the family of Ithamar. [ELI.] Phinehas was killed with his brother by the Philistines when the ark was captured. He had two sons, Ahitub, the eldest—whose sons Ahijah and Ahimelech were high-priests at Shiloh and Nob in the time of Saul (xiv. 3)—and Ichabod. He is introduced, apparently by mistake, in the genealogy of Ezra in 2 Esdr. i. 2 a. [PHINEES, 2.]

3. [Vat. *Φεινέες*.] A Levite of Ezra's time (Ezr. viii. 33), unless the meaning be that Eleazar

was of the family of the great Phinehas. In the parallel passage of 1 Esdr. he is called PHINEES.

G.

PHISON (Φεισών; Alex. Φισων; *Phison*). The Greek form of the name PISON (Ecclus. xxiv. 25).

PHLE'GON (Φλέγων [*burning*]; *Phlegon*). A Christian at Rome whom St. Paul salutes (Rom. xvi. 14). Pseudo-Hippolytus (*De LXX. Apostolis*) makes him one of the seventy disciples and bishop of Marathon. He is said to have suffered martyrdom on April 8th (*Martyrologium Romanum*, apud Estium), on which day he is commemorated in the calendar of the Byzantine Church.

W. T. B.

PHÆBE [A. V. PHEBE] (Φοίβη [*shining, bright*]; *Phæbe*), the first, and one of the most important, of the Christian persons the detailed mention of whom fills nearly all the last chapter of the Epistle to the Romans. What is said of her (Rom. xvi. 1, 2) is worthy of especial notice, because of its bearing on the question of the deaconesses of the Apostolic Church. On this point we have to observe, (1) that the term *διάκονος*, here applied to her, though not in itself necessarily an official term, is the term which would be applied to her, if it were meant to be official; (2) that this term is applied in the *Apostolical Constitutions* to women who ministered officially, the deaconess being called ἡ *διάκονος*, as the deacon is called ὁ *διάκονος*; (3) that it is now generally admitted that in 1 Tim. iii. 11, St. Paul applies it so himself; (4) that in the passage before us Phæbe is called the *διάκονος* of a particular church, which seems to imply a specific appointment; (5) that the Church of CENCHREÆ, to which she belonged, could only have been a small church: whence we may draw a fair conclusion as to what was customary, in the matter of such female ministrations, in the larger churches; (6) that, whatever her errand to Rome might be, the independent manner of her going there seems to imply (especially when we consider the secluded habits of Greek women) not only that she was a widow or a woman of mature age, but that she was acting officially; (7) that she had already been of great service to St. Paul and others (*προσπάτις πολλῶν, καὶ ἐμοῦ αὐτοῦ*), either by her wealth or her energy, or both; a statement which closely corresponds with the description of the qualifications of the enrolled widows in 1 Tim. v. 10; (8) that the duty which we here see Phæbe discharging implies a personal character worthy of confidence and respect. [DEACONESS.]

J. S. H.

PHŒNICE, PHŒNICIA (Φοινίκη [see below]: *Phœnice*; rarely in Latin, *Phœnicia*: see Facciolati's *Lexicon*, s. v.), a tract of country, of which Tyre and Sidon were the principal cities, to the north of Palestine, along the coast of the Mediterranean Sea; bounded by that sea on the west, and by the mountain range of Lebanon on the east. The name was not the one by which its native inhabitants called it, but was given to it by the Greeks; probably from the palm-tree, *φοινίξ*, with which it may then have abounded; just as the name Brazil was given by Europeans to a large

territory in South America, from the Brazil-wood which a part of it supplied to Europe. The palm-tree is seen, as an emblem, on some coins of Aradus, Tyre, and Sidon; and there are now several palm-trees within the circuit of modern Tyre, and along the coast at various points; but the tree is not at the present day one of the characteristic features of the country. The native name of Phœnicia was Kenan (Canaan) or Knâ, signifying lowland, so named in contrast to the adjoining Aram, i. e. Highland; the Hebrew name of Syria. The name Kenan is preserved on a coin of Laodicea, of the time of Antiochus Epiphanes, whereon *Laodicea* is styled "a mother city in Canaan," *מִתְּלֵי מְאֵרָה*

*בְּנֵי כְּנַעַן*. And Knâ or Chnâ (*Χνᾶ*) is mentioned distinctly by Herodian<sup>a</sup> the grammarian, as the old name of Phœnicia. (See Περὶ μοιήρου λέξεως, under the word Ἀθηναῖα.) Hence, as Phœnicians or Canaanites were the most powerful of all tribes in Palestine at the time of its invasion by Joshua, the Israelites, in speaking of their own territory as it was before the conquest, called it "the land of Canaan."

The length of coast to which the name Phœnicia was applied varied at different times, and may be regarded under different aspects before and after the loss of its independence. 1. What may be termed Phœnicia Proper was a narrow undulating plain, extending from the pass of *Râs el-Beydâ* or *Abydul*, the "Promontorium Album" of the ancients, about six miles south of Tyre, to the *Nahr el-Auly*; the ancient *Bostrenus*, two miles north of Sidon (Robinson's *Bibl. Res.* ii. 473). The plain is only 28 miles in length, and, considering the great importance of Phœnicia in the world's history, this may well be added to other instances in Greece, Italy, and Palestine, which show how little the intellectual influence of a city or state has depended on the extent of its territory. Its average breadth is about a mile (Porter's *Handbook for Syria*, ii. 396); but near Sidon, the mountains retreat to a distance of two miles, and near Tyre to a distance of five miles (Kenrick's *Phœnicia*, p. 19). The whole of Phœnicia, thus understood, is called by Josephus (*Ant.* v. 3, § 1) the great plain of the city of Sidon, τὸ μέγα πεδῖον Σιδῶνος πόλεως. In it, near its northern extremity, was situated Sidon, in the north latitude of 33° 34' 05"; and scarcely more than 17 geographical miles to the south was Tyre, in the latitude of 33° 17' (Admiral Smyth's *Mediterranean*, p. 469): so that in a straight line those two renowned cities were less than 20 English miles distant from each other. Zarephath, the Sarepta of the New Testament, was situated between them, eight miles south of Sidon, to which it belonged (1 K. xvii. 9; Obad. 20; Luke iv. 26). 2. A still longer district, which afterwards became fairly entitled to the name of Phœnicia, extended up the coast to a point marked by the island of Aradus, and by Antaradus towards the north; the southern boundary remaining the same as in Phœnicia Proper. Phœnicia, thus defined, is estimated by Mr. Grote (*History of Greece*, iii. 354) to have been about 120 miles in length; while its breadth, between Lebanon and the sea,

<sup>a</sup> Through mistake, a sentence of Herodian, τὸ Χνᾶ, ἦν γὰρ πρῶτον ἢ Φοινίκη ἑκαλεῖτο, is printed in the *Fragmenta Historicorum Græcorum*, p. 17 (Paris, 1841), as an extract from Hecateus of Miletus, and is usually

quoted as from Hecateus. It is, however, in fact merely the assertion of the grammarian himself though it is most probable that he had in his mind the usage of Hecateus.

never exceeded 20 miles, and was generally much less. This estimate is most reasonable, allowing for the bends of the coast; as the direct difference in latitude between Tyre and Antaraus (Tortosa) is equivalent to 106 English miles; and six miles to the south of Tyre, as already mentioned, intervene before the beginning of the pass of *Râs el-Abyâd*. The claim of the whole of this district to the name of Phenicia rests on the probable fact, that the whole of it, to the north of the great plain of Sidon, was occupied by Phœnician colonists; not to mention that there seems to have been some kind of political connection, however loose, between all the inhabitants (Diodorus, xvi. 41). Scarcely 16 geographical miles farther north than Sidon was Berytus; with a roadstead so well suited for the purposes of modern navigation that, under the modern name of *Beirut*, it has eclipsed both Sidon and Tyre as an emporium for Syria. Whether this Berytus was identical with the *Berôthah* and *Berôthai* of Ezekiel xlvii. 16, and of 2 Sam. viii. 8, is a disputed point. [ΒΕΡΟΘΗΑΙ.] Still farther north was Byblus, the Gebal of the Bible (Ez. xxvii. 9), inhabited by seamen and calkers. Its inhabitants are supposed to be alluded to in the word *Giblim*, translated "stone-squarers" in the authorized version of 1 K. v. 18 (32). It still retains in Arabic the kindred name of *Jebel*. Then came Tripolis (now *Tirâbulus*), said to have been founded by colonists from Tyre, Sidon, and Aradus, with three distinct towns, each a furlong apart from one another, each with its own walls, and each named from the city which supplied its colonists. General meetings of the Phœnicians seem to have been held at Tripolis (Diod. xvi. 41), as if a certain local jealousy had prevented the selection for this purpose of Tyre, Sidon, or Aradus. And lastly, towards the extreme point north was Aradus itself, the Arvad of Gen. x. 18, and Ez. xxvii. 8; situated, like Tyre, on a small island near the mainland, and founded by exiles from Sidon. The whole of Phœnicia Proper is well watered by various streams from the adjoining hills: of these the two largest are the *Khâsimiyeh*, a few miles north of Tyre — the ancient name of which, strange to say, is not certain, though it is conjectured to have been the *Leontes* — and the *Bostrenus*, already mentioned, north of Sidon. The soil is fertile, although now generally ill-cultivated; but in the neighborhood of Sidon there are rich gardens and orchards; "and here," says Mr. Porter, "are oranges, lemons, figs, almonds, plums, apricots, peaches, pomegranates, pears, and bananas, all growing luxuriantly, and forming a forest of finely-tinted foliage" (*Handbook for Syria*, ii. 398). The havens of Tyre and Sidon afforded water of sufficient depth for all the requirements of ancient navigation, and the neighboring range of the Lebanon, in its extensive forests, furnished what then seemed a nearly inexhaustible supply of timber for ship-building. To the north of *Bostrenus*, between that river and *Beirut*, lies the only bleak and barren part of Phœnicia. It is crossed by the ancient *Tamyras* or *Danuras*, the modern *Nahr el-Dâmâr*. From *Beirut*, the plains are again fertile. The principal streams<sup>a</sup> are the *Lycus*, now the *Nahr el-Kelb*, not far north from *Beirut*; the *Adonis*, now the

*Nahr Ibrahim*, about five miles south of *Gebal*; and the *Eleutherus*, now the *Nahr el-Kebir*, in the bend between *Tripolis* and *Antaradus*.

In reference to the period when the Phœnicians had lost their independence, scarcely any two Greek and Roman writers give precisely the same geographical boundaries to Phœnicia. Herodotus uses an expression which seems to imply that he regarded its northern extremity as corresponding with the *Myriandrian Bay*, or *Bay of Issus* (iv. 38). It is doubtful where exactly he conceived it to terminate at the south (iii. 5). Ptolemy is distinct in making the river *Eleutherus* the boundary, on the north, and the river *Chorseus*, on the south. The *Chorseus* is a small stream or torrent, south of *Mount Carmel* and of the small *Canaanitic city Dor*, the inhabitants of which the tribe of *Manasseh* was confessedly unable to drive out (Judg. i. 27). This southern line of Ptolemy coincides very closely with the southern boundary of *Pliny the Elder*, who includes *Dor* in Phœnicia, though the southern boundary specified by him is a stream called *Crocodilon*, now *Nahr Zurka*, about two miles to the north of *Cæsarea*. *Pliny's* northern boundary, however, is different, as he makes it include *Antaradus*. Again, the geographer *Strabo*, who was contemporary with the beginning of the Christian era, differs from *Herodotus*, *Ptolemy*, and *Pliny*, by representing *Phœnicia* as the district between *Orthosia* and *Pelusium* (xvi. 21), which would make it include not only *Mount Carmel*, but likewise *Cæsarea*, *Joppa*, and the whole coast of the *Philistines*.

In the *Old Testament*, the word *Phœnicia* does not occur, as might be expected from its being a Greek name. In the *Apocrypha*, it is not defined, though spoken of as being, with *Cœle-Syria*, under one military commander (2 Macc. iii. 5, 8, viii. 8, x. 11; 3 Macc. iii. 15). In the *New Testament*, the word occurs only in three passages, *Acts xi. 19*, *xv. 3*, *xxi. 2*; and not one of these affords a clew as to how far the writer deemed *Phœnicia* to extend. On the other hand, *Josephus* possibly agreed with *Strabo*; for he expressly says that *Cæsarea* is situated in *Phœnicia* (*Ant.* xv. 9, § 6); and although he never makes a similar statement respecting *Joppa*, yet he speaks, in one passage, of the coast of *Syria*, *Phœnicia*, and *Egypt*, as if *Syria* and *Phœnicia* exhausted the line of coast on the *Mediterranean Sea* to the north of *Egypt* (*B. J.* iii. 9, § 2).

E. T.

**PHENICIANS.** The name of the race who in earliest recorded history inhabited Phœnicia, and who were the great maritime and commercial people of the ancient world. For many centuries they bore somewhat of the same relation to other nations which the Dutch bore, though less exclusively, to the rest of Europe in the 17th century. They were, moreover, preëminent in colonization as well as in trade; and in their settlement of *Carthage*, producing the greatest general of antiquity, they proved the most formidable of all antagonists to *Rome* in its progress to universal empire. A complete history, therefore, of the Phœnicians would occupy a large extent of ground which would be foreign to the objects of this Dictionary. Still some notice is desirable of such an important people, who were in one quarter the

II

<sup>b</sup> \* Our Lord in the course of his *Persean ministry*

(*Matt.* xv. 21; *Mark* vii. 24) on one occasion, at least entered *Phœnicia* and probably passed through *Sidon* itself *ΜΑΡΚ.* vii. 31, where the approved reading is *δὲ τὸ Σιδῶνος*.

II \*

nearest neighbors of the Israelites, and indirectly influenced their history in various ways. Without dwelling on matters which belong more strictly to the articles TYRE and SIDON, it may be proper to touch on certain points connected with the language, race, trade, and religion of the Phœnicians, which may tend to throw light on Biblical history and literature. The communication of letters by the Phœnicians to the European nations will likewise deserve notice.

1. The Phœnician language belonged to that family of languages which, by a name not altogether free from objection, but now generally adopted, is called "Semitic."<sup>a</sup> Under this name are included three distinct branches: 1st. Arabic, to which belongs Æthiopian as an offshoot of the Southern Arabic or Himyaritic. 2dly. Aramaic, the vernacular language of Palestine at the time of Christ, in which the few original words of Christ which have been preserved in writing appear to have been spoken (Matt. xxvii. 46; Mark v. 41; and mark especially Matt. xvi. 18, which is not fully significant either in Greek or Hebrew). Aramaic, as used in Christian literature, is called Syriac, and as used in the writings of the Jews, has been very generally called Chaldee. 3dly. Hebrew, in which by far the greatest part of the Old Testament was composed. Now one of the most interesting points to the Biblical student, connected with Phœnician, is, that it does not belong to either of the two first branches, but to the third; and that it is in fact so closely allied to Hebrew, that Phœnician and Hebrew, though different dialects, may practically be regarded as the same language. This may be shown in the following way: 1st, in passages which have been frequently quoted (see especially Gesenius's *Monumenta Scripturæ Linguaeque Phœnicicæ*, p. 231), testimony is borne to the kinship of the two languages by Augustine and Jerome, in whose time Phœnician or Carthaginian was still a living language. Jerome, who was a good Hebrew scholar, after mentioning, in his Commentaries on Jeremiah, lib. v. c. 25, that Carthage was a Phœnician colony, proceeds to state — "Unde et Pœni sermone corrupto quasi Phœni appellantur, quorum lingua Hebrææ linguæ magnâ ex parte confinis est." And Augustine, who was a native of Africa, and a bishop there of Hippo, a Tyrian colony, has left on record a similar statement several times. In one passage he says of the two languages, "Istæ linguæ non multum inter se differunt" (*Questiones in Heptateuchum*, vii. 16). In another passage he says, "Cognatæ sunt istæ linguæ et vicinæ, Hebræa, et Punica, et Syra" (*In Joann. Tract. 15*). Again, on Gen. xviii. 9, he says of a certain mode of speaking (Gen. viii. 9), "Locutio est, quam propterea Hebræam putô, quia et Punica linguæ familiarissima est, in quâ multa invenimus Hebræis verbis consonantia" (lib. i. locut. 24). And on another occasion, remarking on the word *Messias*, he says, "quod verbum Pun-

icæ linguæ consonum est, sicut alia Hebræa multa et pœne omnia" (*Contra Iulianum Petiliân, ii. c. 104*). 2dly. These statements are fully confirmed by a passage of Carthaginian preserved in the *Pœnulus* of Plautus, act. v. scene 1, and accompanied by a Latin translation as part of the play. There is no doubt that the Carthaginians and the Phœnicians were the same race; and the Carthaginian extract is undeniably intelligible through Hebrew to Hebrew scholars (see Bochart's *Canaan*; and especially Gesenius's *Monumenta Phœnicicæ*, pp. 357-382, where the passage is translated with notes, and full justice is done to the previous translation of Bochart). 3dly. The close kinship of the two languages is, moreover, strikingly confirmed by very many Phœnician and Carthaginian names of places and persons, which, destitute of meaning in Greek and Latin, through which languages they have become widely known, and having sometimes in those languages occasioned false etymologies, become really significant in Hebrew. Thus through Hebrew it is known that Tyre, as *Tzôr*, signifies "a rock," referring doubtless to the rocky island on which the city was situated; that Sidon, as *Tzidon*, means "Fishing" or "Fishery," which was probably the occupation of its first settlers: that Carthage, or, as it was originally called, "Carthada," means "New Town," or "Newtown;" and that Byrsa, which, as a Greek name, suggested the etymological myths of the Bull's Hide (*Æneid*, i. 366-67), was simply the citadel of Carthage — *Carthaginiis avem*, as Virgil accurately termed it: the Carthaginian name of it, softened by the Greeks into *Býρσα*, being merely the Hebrew word *Botzrah*, "citadel;" identical with the word called *Bozrah* in the English Version of Isaiah lxiii. 1. Again, through Hebrew, the names of celebrated Carthaginians, though sometimes disfigured by Greek and Roman writers, acquire a meaning. Thus Dido is found to belong to the same root as David,<sup>b</sup> "beloved;" meaning "his love," or "delight;" i. e. the love or delight either of Baal or of her husband: Hasdrubal is the man "whose help Baal is;" Hamilear the man whom the god "Milear graciously granted" (comp. Hananeel; *Θεόδωρος*): and, with the substitution of Baal for El or God, the name of the renowned Hannibal is found to be identical in form and meaning with the name of Hannel, who is mentioned in Num. xxxiv. 23 as the prince of the tribe of Manasseh: Hanniel meaning the grace of God, and Hannibal the grace of Baal. 4thly. The same conclusion arises from the examination of Phœnician inscriptions, preserved to the present day: all of which can be interpreted, with more or less certainty, through Hebrew. Such inscriptions are of three kinds: 1st, on gems and seals; 2dly, on coins of the Phœnicians and of their colonies; 3dly, on stone. The first class are few, unimportant, and for the most part of uncertain origin. The oldest known coins with Phœnician words belong to Tar-

<sup>a</sup> So called from the descendants of Shem (Gen. x. 21-29); nearly all of whom, as represented by nations, are known to have spoken cognate languages. There have been hitherto two objections to the name: 1st. That the language of the Elamites and Assyrians (see rer. 22) belonged to a different family. 2dly. That the Phœnicians, as Canaanites, are derived from Ham (Gen. x. 6). If the recent interpretations of Assyrian inscriptions are admitted to prove the identity of Assyrian with Aramaic or Syrian, the objection to the word "Semitic" nearly disappears. Mr Max Müller,

a high authority on such a point, regards it as certain, that the inscriptions of Nineveh, as well as of Babylon, are Semitic. — *Lectures on the Science of Language*, p. 265.

<sup>b</sup> Movers and Fürst, supported by the *Etymologicum Magnum*, adopt "nedidâ," or "nedidâh," as the etymology of Dido, in the sense of "travel-tost," or "wanderer." Although a possible derivation, this seems less probable in itself, and less countenanced by Hebrew analogies.

and other Cilician cities, and were struck in the period of the Persian domination. But coins are likewise in existence of Tyre, Sidon, and other cities of Phœnicia; though all such are of later date, and belong to the period either of the Seleucids, or of the Romans. Moreover, other coins have been found belonging to cities in Sicily, Sardinia, Africa, and Spain. The inscriptions on stone are either of a public or a private character. The former are comparatively few in number, but relate to various subjects: such, for example, as the dedication of a temple, or the commemoration of a Numidian victory over the Romans. The private inscriptions were either in the nature of votive tablets erected as testimonials of gratitude to some deity, or were sepulchral memorials engraved on tombstones. Phœnician inscriptions on stone have been found not only in all the countries last mentioned, except Spain, but likewise in the island of Cyprus near Citium, in Malta, at Athens, at Marseilles, and at Sidon.<sup>a</sup>

II. Concerning the original race to which the Phœnicians belonged, nothing can be known with certainty, because they are found already established along the Mediterranean Sea at the earliest dawn of authentic history, and for centuries afterwards there is no record of their origin. According to Herodotus (vii. 89), they said of themselves in his time that they came in days of old from the shores of the Red Sea — and in this there would be nothing in the slightest degree improbable, as they spoke a language cognate to that of the Arabians, who inhabited the east coast of that sea; and both Hebrew and Arabic, as well as Aramaic, are seemingly derived from some one Semitic language now lost. Still neither the truth nor the falsehood of the tradition can now be proved; for language, although affording strong presumptions of race, is not conclusive on the point, as is shown by the language at present spoken by the descendants of the Normans in France. But there is one point respecting their race which can be proved to be in the highest degree probable, and which has peculiar interest as bearing on the Jews, namely, that the Phœnicians were of the same race as the Canaanites. This remarkable fact, which, taken in connection with the language of the Phœnicians, leads to some interesting results, is rendered probable by the following circumstances: 1st. The native name of Phœnicia, as already pointed out, was Canaan, a name signifying "lowland" [PHŒNICIA]. This was well given to the narrow slip of plain between the Lebanon and the Mediterranean Sea, in contrast to the elevated mountain range adjoining; but it would have been inappropriate to that part of Palestine conquered by the Israelites, which was undoubtedly a hill-country (see Movers, *Das Phönizische Alterthum*, Theil 1, p. 5); so that, when it is known that the Israelites at the time of their invasion found in Palestine a powerful tribe called the Canaanites, and from them called Palestine the land of Canaan, it is obviously suggested that the Canaanites came originally from the neighboring plain, called Canaan, along the sea-coast. 2dly. This is further confirmed through the name in Africa whereby the Carthaginian Phœnicians called themselves, as attested by Augustine, who

states that the peasants in his part of Africa, if asked of what race they were, would answer, *ic Punic* or Phœnician, "Canaanites" "Interrogati rustici nostri quid sint, Punicę respondentes, Canani, corruptę scilicet sicut in talibus unã litterã (accurate enim dicere debelant Chanani) quid aliud respondent quam Chananei" (*Opera Omnia*, iv. 1235; *Exposit. Epist. ad Rom.* § 13). 3dly. The conclusion thus suggested is strongly supported by the tradition that the names of persons and places in the land of Canaan — not only when the Israelites invaded it, but likewise previously, when "there were yet but a few of them," and Abraham is said to have visited it — were Phœnician or Hebrew: such, for example, as Abimelek, "Father of the king" (Gen. xx. 2); Melchizedek, "King of righteousness" (xiv. 18); Kirjath-sepher, "city of the book" (Josh. xv. 15).

As this obviously leads to the conclusion that the Hebrews adopted Phœnician as their own language, or, in other words, that what is called the Hebrew language was in fact "the language of Canaan," as a prophet called it (Is. xix. 18), and this not merely poetically, but literally and in philological truth; and as this is repugnant to some preconceived notions respecting the peculiar people, the question arises whether the Israelites might not have translated Canaanitish names into Hebrew. On this hypothesis the names now existing in the Bible for persons and places in the land of Canaan would not be the original names, but merely the translations of those names. The answer to this question is, 1st. That there is not the slightest direct mention, nor any indirect trace, in the Bible, of any such translation. 2dly. That it is contrary to the analogy of the ordinary Hebrew practice in other cases; as, for example, in reference to the names of the Assyrian monarchs (perhaps of a foreign dynasty) Pul, Tiglath-Pileser, Sennacherib, or of the Persian monarchs Darius, Ahasuerus, Artaxerxes, which remain unintelligible in Hebrew, and can only be understood through other Oriental languages. 3dly. That there is an absolute silence in the Bible as to there having been any difference whatever in language between the Israelites and the Canaanites, although in other cases where a difference existed, that difference is somewhere alluded to, as in the case of the Egyptians (Ps. lxxxi. 5, cxiv. 1), the Assyrians (Is. xxxvi. 11), and the Chaldees (Jer. v. 15). Yet in the case of the Canaanites there was stronger reason for alluding to it; and without some allusion to it, if it had existed, the narration of the conquest of Canaan under the leadership of Joshua would have been singularly imperfect.

It remains to be added on this point, that although the previous language of the Hebrews must be mainly a matter for conjecture only, yet it is most in accordance with the Pentateuch to suppose that they spoke originally Aramaic. They came through Abraham, according to their traditions, from Ur of the Chaldees in Mesopotamia, where Aramaic at a later period is known to have been spoken; they are instructed in Deuteronomy to say that an Aramean (Syrian) ready to perish was their father (xxvi. 5); and the two earliest words of Aramaic contained in the Bible, *Yegar sahadu-*

<sup>a</sup> In 1837 a collection of all Phœnician inscriptions then known, with translations and notes, was published by Gesenius, the great Hebrew lexicographer, who by his vast knowledge and unrivaled clearness

has done more than any one scholar since Buxtorf to facilitate the study of Hebrew. His opinion on the relation of Phœnician to Hebrew is: "Omnia hoc tenendum est, pieraque et pene omnia cum Hebræis

*thâ*, are, in the Book of Genesis, put into the mouth of Laban, the son of Abraham's brother, and first cousin of Isaac (xxi. 47).<sup>a</sup>

III. In regard to Phœnician trade, as connected with the Israelites, the following points are worthy of notice. 1. Up to the time of David, not one of the twelve tribes seems to have possessed a single harbor on the sea-coast: it was impossible therefore that they could become a commercial people. It is true that according to Judg. i. 31, combined with Josh. xix. 26, Accho or Acre, with its excellent harbor, had been assigned to the tribe of Asher; but from the same passage in Judges it seems certain that the tribe of Asher did not really obtain possession of Acre, which continued to be held by the Canaanites. However wistfully, therefore, the Israelites might regard the wealth accruing to their neighbors the Phœnicians from trade, to vie with them in this respect was out of the question. But from the time that David had conquered Edom, an opening for trade was afforded to the Israelites. The command of Ezion-geber near Elath, in the land of Edom, enabled them to engage in the navigation of the Red Sea. As they were novices, however, at sailing, as the navigation of the Red Sea, owing to its currents, winds, and rocks, is dangerous even to modern sailors, and as the Phœnicians, during the period of the independence of Edom, were probably allowed to trade from Ezion-geber, it was politic in Solomon to permit the Phœnicians of Tyre to have docks, and build ships at Ezion-geber on condition that his sailors and vessels might have the benefit of their experience. The results seem to have been strikingly successful. The Jews and Phœnicians made profitable voyages to Ophir in Arabia, whence gold was imported into Judæa in large quantities; and once in three years still longer voyages were made, by vessels which may possibly have touched at Ophir, though their imports were not only gold, but likewise silver, ivory, apes, and peacocks, 1 K. x. 22. [TARSHISH.] There seems at the same time to have been a great direct trade with the Phœnicians for cedar-wood (ver. 27), and generally the wealth of the kingdom reached an unprecedented point. If the union of the tribes had been maintained, the whole sea-coast of Palestine would have afforded additional sources of revenue through trade; and perhaps even ultimately the "great plain of Sidon" itself might have formed part of the united empire. But if any possibilities of this kind existed, they were destroyed by the disastrous secession of the ten tribes; a heavy blow from which the Hebrew race has never yet recovered during a period of nearly 3000 years.<sup>b</sup>

2. After the division into two kingdoms, the curtain falls on any commercial relation between the Israelites and Phœnicians until a relation is brought

to notice, by no means brotherly, as in the fleets which navigated the Red Sea, nor friendly, as between buyers and sellers, but humiliating and exasperating, as between the buyers and the bought. The relation is meant which existed between the two nations when Israelites were sold as slaves by Phœnicians. It was a custom in antiquity, when one nation went to war against another, for merchants to be present in one or other of the hostile camps, in order to purchase prisoners of war as slaves. Thus at the time of the Maccabees, when a large army was sent by Lysias to invade and subdue the land of Judah, it is related that "the merchants of the country, hearing the fame of them, took silver and gold very much with servants, and came into the camp to buy the children of Israel for slaves" (1 Macc. iii. 41), and when it is related that "no fewer sold than slain" (2 Macc. v. 14; Credner's *Joel*, p. 240). Now this practice, which is thus illustrated by details at a much later period, undoubtedly prevailed in earlier times (*Odyssey*, xv. 427; *Herod.* i. 1), and is alluded to in a threatening manner against the Phœnicians by the prophets (*Joel* iii. 4, and *Am.* i. 9, 10), about 800 years before Christ.<sup>c</sup> The circumstances which led to this state of things may be thus explained. After the division of the two kingdoms, there is no trace of any friendly relation between the kingdom of Judah and the Phœnicians: the interest of the latter rather led them to cultivate the friendship of the kingdom of Israel; and the Israelitish king, Ahab, had a Sidonian princess as his wife (1 K. xvi. 31). Now, not improbably in consequence of these relations, when Jehoshaphat king of Judah endeavored to restore the trade of the Jews in the Red Sea, and for this purpose built large ships at Ezion-geber to go to Ophir for gold, he did not admit the Phœnicians to any participation in the venture, and when king Ahaziah, Ahab's son, asked to have a share in it, his request was distinctly refused (1 K. xxii. 48, 49). That attempt to renew the trade of the Jews in the Red Sea failed, and in the reign of Jehoram, Jehoshaphat's son, Edom revolted from Judah and established its independence; so that if the Phœnicians wished to despatch trading-vessels from Ezion-geber, Edom was the power which it was mainly their interest to conciliate, and not Judah. Under these circumstances the Phœnicians seem, not only to have purchased and to have sold again as slaves, and probably in some instances to have kidnapped inhabitants of Judah, but even to have sold them to their enemies the Edomites (*Joel*, *Amos*, as above). This was regarded with reason as a departure from the old brotherly covenant, when Hiram was a great lover

convenire, sine radices spectas sive verborum et formadorum et flectenarum rationem" (*Mon. Phœn.* p. 335).

<sup>a</sup> It seems to be admitted by philologists that neither Hebrew, Aramaic, nor Arabic, is derived the one from the other; just as the same may be said of Italian, Spanish, and Portuguese. (See Lewis, *On the Romance Languages*, p. 42). It is a question, however, which of the three languages, Hebrew, Aramaic, and Arabic, is likely to resemble most the original Semitic language. Fürst, one of the best Aramaic scholars now living, is in favor of Aramaic (*Lehrgebäude der Aramäischen Idiome*, p. 2). But his opinion has been strongly impugned in favor of Hebrew (*Bleek's Einleitung in das A. T.* p. 76).

<sup>b</sup> After the disruption, the period of union was looked back to with endless longing.

<sup>c</sup> In *Joel* iii. 6 (*Heb.* iv. 6), "sons of the Ionians" i. e. of the Greeks, is the most natural translation of *Benei-Yavanim*. But there is a Yawan mentioned in Arabia Felix, and there is still a Yawan in Yemen; and both Credner and Fürst think that, looking to *Am.* i. 9, an Arabian people, and not Grecians, are here alluded to. The threat, however, of selling the Phœnicians in turn to the Sabeans, "a people far off," which seems to imply that the Yawanim were not "far off," tends to make it improbable that the Yawanim were near the Sabeans, as they would have been in Arabia Felix. [See JAVAN, SONS OF, Amer. ed.]

David, and subsequently had the most friendly commercial relations with David's son; and this may be regarded as the original foundation of the hostility of the Hebrew prophets towards Phœnician Tyre. (Is. xxiii.; Ez. xxviii.)

3. The only other notice in the Old Testament of trade between the Phœnicians and the Israelites is in the account given by the prophet Ezekiel of the trade of Tyre (xxvii. 17). While this account supplies valuable information respecting the various commercial dealings of the most illustrious of Phœnician cities [TYRE], it likewise makes direct mention of the exports to it from Palestine. These were wheat, honey (*i. e.* sirup of grapes), oil, and balm. The export of wheat deserves attention (concerning the other exports, see HONEY, OIL, BALM), because it shows how important it must have been to the Phœnicians to maintain friendly relations with their Hebrew neighbors, and especially with the adjoining kingdom of Israel. The wheat is called wheat of Minnith,<sup>a</sup> which was a town of the Ammonites, on the other side of Jordan, only once mentioned elsewhere in the Bible; and it is not certain whether Minnith was a great inland emporium, where large purchases of corn were made, or whether the wheat in its neighborhood was peculiarly good, and gave its name to all wheat of a certain fineness in quality. Still, whatever may be the correct explanation respecting Minnith, the only countries specified for exports of wheat are Judah and Israel, and it was through the territory of Israel that the wheat would be imported into Phœnicia. It is suggested by Heeren in his *Historical Researches*, ii. 117, that the fact of Palestine being thus, as it were, the granary of Phœnicia, explains in the clearest manner the lasting peace that prevailed between the two countries. He observes that with many of the other adjoining nations the Jews lived in a state of almost continual warfare; but that they never once engaged in hostilities with their nearest neighbors the Phœnicians. The fact itself is certainly worthy of special notice; and is the more remarkable as there were not wanting tempting occasions for the interference of the Phœnicians in Palestine if they had desired it. When Elijah at the brook Kishon, at the distance of not more than thirty miles in a straight line from Tyre, put to death 450 prophets of Baal (1 K. xviii. 40), we can well conceive the agitation and anger which such a deed must have produced at Tyre. And at Sidon, more especially, which was only twenty miles farther distant from the scene of slaughter, the first impulse of the inhabitants must have been to march forth at once in battle array to strengthen the hands of Jezebel, their own princess, in behalf of Baal, their Phœnician god. When again afterwards, by means of falsehood and treachery, Jehu was enabled to massacre the worshippers of Baal in the land of Israel, we cannot doubt that the intelligence was received in Tyre, Sidon, and the other cities of Phœnicia, with a similar burst of horror and indignation to that with which the news of the Massacre on St. Bartholomew's day was received in all Protestant countries; and there must have been an intense desire in the Phœnicians, if they had the power, to invade the territories of Israel without delay and inflict signal chastisement on

Jehu (2 K. x. 18-28). The fact that Israel was their granary would undoubtedly have been an element in restraining the Phœnicians, even on occasions such as these; but probably still deeper motives were likewise at work. It seems to have been part of the settled policy of the Phœnician cities to avoid attempts to make conquests on the continent of Asia. For this there were excellent reasons in the position of their small territory, which with the range of Lebanon on one side as a barrier, and the sea on the other, was easily defensible by a wealthy power having command of the sea, against second or third rate powers, but for the same reason was not well situated for offensive war on the land side. It may be added that a pacific policy was their manifest interest as a commercial nation, unless by war they were morally certain to obtain an important accession of territory, or unless a warlike policy was an absolute necessity to prevent the formidable preponderance of any one great neighbor. At last, indeed, they even carried their system of non-intervention in continental wars too far, if it would have been possible for them by any alliances in Syria and Coele-Syria to prevent the establishment on the other side of the Lebanon of one great empire. For from that moment their ultimate doom was certain, and it was merely a question of time as to the arrival of the fatal hour when they would lose their independence. But too little is known of the details of their history to warrant an opinion as to whether they might at any time by any course of policy have raised up a barrier against the empire of the Assyrians or Chaldees.

IV. The religion of the Phœnicians is a subject of vast extent and considerable perplexity in details, but of its general features as bearing upon the religion of the Hebrews there can be no doubt. As opposed to Monotheism, it was a Pantheistical personification of the forces of nature, and in its most philosophical shadowing forth of the Supreme powers, it may be said to have represented the male and female principles of production. In its popular form, it was especially a worship of the sun, moon, and five planets, or, as it might have been expressed according to ancient notions, of the seven planets — the most beautiful, and perhaps the most natural, form of idolatry ever presented to the human imagination. These planets, however, were not regarded as lifeless globes of matter, obedient to physical laws, but as intelligent animated powers; influencing the human will, and controlling human destinies. An account of the different Phœnician gods named in the Bible will be found elsewhere [see BAAL, ASHTAROTH, ASHERAH, etc.]; but it will be proper here to point out certain effects which the circumstance of their being worshipped in Phœnicia produced upon the Hebrews.

1. In the first place, their worship was a constant temptation to Polytheism and idolatry. It is the general tendency of trade, by making merchants acquainted with different countries and various modes of thought, to enlarge the mind, to promote the increase of knowledge, and, in addition, by the wealth which it diffuses, to afford opportunities in various ways for intellectual culture. It can scarcely be doubted that, owing to these circumstances, the Phœnicians, as a great commercial

<sup>a</sup> In ver. 17 the word "Pannag" occurs, which is not found elsewhere. Opinions are divided as to whether it is the name of a place, like Minnith, or the name of an article of food; "sweet cake," for example.

Perhaps no one can really do more than to make a guess on the point. The evidence for each meaning is inconclusive.

people, were more generally intelligent, and, as we should now say, civilized, than the inland agricultural population of Palestine. When the simple-minded Jews, therefore, came in contact with a people more versatile and, apparently, more enlightened than themselves, but who nevertheless, either in a philosophical or in a popular form, admitted a system of Polytheism, an influence would be exerted on Jewish minds, tending to make them regard their exclusive devotion to their own one God, Jehovah, however transcendent his attributes, as unsocial and morose. It is in some such way that we must account for the astonishing fact that Solomon himself, the wisest of the Hebrew race, to whom Jehovah is expressly stated to have appeared twice — once, not long after his marriage with an Egyptian princess, on the night after his sacrificing 1,000 burnt offerings on the high place of Gibeon, and the second time, after the consecration of the Temple — should have been so far beguiled by his wives in his old age as to become a Polytheist, worshipping, among other deities, the Phœnician or Sidonian goddess Ashtaroth (1 K. iii. 1-5, ix. 2. xi. 1-5). This is not for a moment to be so interpreted, as if he ever ceased to worship Jehovah, to whom he had erected the magnificent Temple, which in history is so generally connected with Solomon's name. Probably, according to his own erroneous conceptions, he never ceased to regard himself as a loyal worshipper of Jehovah, but he at the same time deemed this not incompatible with sacrificing at the altars of other gods likewise. Still the fact remains, that Solomon, who by his Temple in its ultimate results did so much for establishing the doctrine of one only God, died himself a practical Polytheist. And if this was the case with him, Polytheism in other sovereigns of inferior excellence can excite no surprise. With such an example before him, it is no wonder that Ahab, an essentially bad man, should after his marriage with a Sidonian princess not only openly tolerate, but encourage, the worship of Baal; though it is to be remembered even in him, that he did not disavow the authority of Jehovah, but, when rebuked by his great antagonist Elijah, he rent his clothes, and put sackcloth on his flesh, and showed other signs of contrition evidently deemed sincere (1 K. xvi. 31, xxi. 27-29). And it is to be observed generally that although, before the reformation of Josiah (2 K. xxiii.), Polytheism prevailed in Judah as well as Israel, yet it seems to have been more intense and universal in Israel, as might have been expected from its greater proximity to Phœnicia: and Israel is sometimes spoken of as if it had set the bad example to Judah (2 K. xvii. 19; Jer. iii. 8): though, considering the example of Solomon, this cannot be accepted as a strict historical statement.

2. The Phœnician religion was likewise in other respects deleterious to the inhabitants of Palestine, being in some points essentially demoralizing. For example, it sanctioned the dreadful superstition of burning children as sacrifices to a Phœnician god. "They have built also," says Jeremiah, in the name of Jehovah (xix. 5), "the high places of Baal, to burn their sons with fire for burnt offerings unto Baal, which I commanded not, nor spake it, neither

came it into my mind" (comp. Jer. xxxii. 35) This horrible custom was probably in its origin founded on the idea of sacrificing to a god what was best and most valuable in the eyes of the suppliant;<sup>a</sup> but it could not exist without having a tendency to stifle natural feelings of affection, and to harden the heart. It could scarcely have been first adopted otherwise than in the infancy of the Phœnician race; but grown-up men and grown-up nations, with their moral feelings in other respects cultivated, are often the slaves in particular points of an early-implanted superstition, and it is worthy of note that, more than 250 years after the death of Jeremiah, the Carthaginians, when their city was besieged by Agathocles, offered as burnt sacrifices to the planet Saturn, at the public expense, 200 boys of the highest aristocracy; and, subsequently, when they had obtained a victory, sacrificed the most beautiful captives in the like manner (Diod. xx. 14, 65). If such things were possible among the Carthaginians at a period so much later, it is easily conceivable how common the practice of sacrificing children may have been at the time of Jeremiah among the Phœnicians generally: and if this were so, it would have been certain to prevail among the Israelites who worshipped the same Phœnician gods; especially as, owing to the intermarriages of their forefathers with Canaanites, there were probably few Israelites who may not have had some Phœnician blood in their veins (Judg. iii. 5). Again, parts of the Phœnician religion, especially the worship of Astarte, tended to encourage dissoluteness in the relations of the sexes, and even to sanctify impurities of the most abominable description. Connected with her temples and images there were male and female prostitutes, whose polluted gains formed part of the sacred fund appropriated to the service of the goddess. And, to complete the deification of immorality, they were even known by the name of the "consecrated." Nothing can show more clearly how deeply this baneful example had eaten into the hearts and habits of the people, notwithstanding positive prohibitions and the repeated denunciations of the Hebrew prophets, than the almost incredible fact that, previous to the reformation of Josiah, this class of persons was allowed to have houses or tents close to the Temple of Jehovah, whose treasury was perhaps even replenished by their gains. (2 K. xxiii. 7; Deut. xxiii. 17, 18; 1 K. xiv. 24, xv. 12, xxii. 46; Hos. iv. 14; Job xxxvi. 14; Lucian, *Lucius*, c. 35; *De Deâ Syrâ*, cc. 27, 51; Gesenius, *Thesaurus*, s. v. שׂוֹרֵי, p. 1196; Movers, *Phœnizier*, i. 678, &c.; Spencer, *De Legibus Hebræorum*, i. 561.)

V. The most important intellectual invention of man, that of letters, was universally asserted by the Greeks and Romans to have been communicated by the Phœnicians to the Greeks. The earliest written statement on the subject is in Herodotus, v. 57, 58, who incidentally, in giving an account of Harmodius and Aristogeiton, says that they were by race Gephyræans; and that he had ascertained by inquiry that the Gephyræans were Phœnicians, amongst those Phœnicians who came over with Cadmus<sup>b</sup> into Bœotia, and instructing the

<sup>a</sup> Whatever else the arrested sacrifice of Isaac symbolizes (Gen. xxii. 13), it likewise symbolizes the substitution in sacrifices of the inferior animals for children. Faith, if commanded, was ready to sacrifice

even children; but the Hebrews were spared this dreadful trial, and were permitted to substitute sheep and goats, and bulls.

<sup>b</sup> In Hebrew there is a root *Kadam*, from which

Greeks in many other arts and sciences, taught them likewise letters. It was an easy step from this to believe, as many of the ancients believed, that the Phœnicians invented letters.

"Phœnices primi, fame si creditur, ausi  
Mansuram rudibus vocem signare figuris."  
LUCAN'S *Puarsal.* iii. 220, 221

This belief, however, was not universal; and Pliny the elder expresses his own opinion that they were of Assyrian origin, while he relates the opinion of Gellius that they were invented by the Egyptians, and of others that they were invented by the Syrians (*Nat. Hist.* vii. 57). Now, as Phœnician has been shown to be nearly the same language as Hebrew, the question arises whether Hebrew throws any light on the time or the mode of the invention of letters, or the question of who invented them, or on the universal belief of antiquity that the knowledge of them was communicated to the Greeks by the Phœnicians. The answer is as follows: Hebrew literature is as silent as Greek literature respecting the precise date of the invention of letters, and the name of the inventor or inventors; but the names of the letters in the Hebrew alphabet are in accordance with the belief that the Phœnicians communicated the knowledge of letters to the Greeks: for many of the names of letters in the Greek alphabet, though without meaning in Greek, have a meaning in the corresponding letters of Hebrew. For example: the four first letters of the Greek alphabet, Alpha, Beta, Gamma, Delta, are not to be explained through the Greek language; but the corresponding four first letters of the Hebrew alphabet, namely, Aleph, Beth, Gimel, Daleth, being essentially the same words, are to be explained in Hebrew. Thus in Hebrew Aleph or Eleph means an ox; Beth or Bayith a house; Gamal a camel; and Deleth a door. And the same is essentially, though not always so clearly, the case with almost all the sixteen earliest Greek letters said to have been brought over from Phœnicia by Cadmus, Α Β Γ Δ Ε Ζ Η Θ Ι Κ Λ Μ Ν Ο Π Ρ Σ Τ; α and called on this account Phœnician or Cadmeian letters (*Herodot.* i. c.; Pliny, *Hist. Nat.* vii. 57; Jelf's *Greek Gram.* i. 2). Moreover, as to writing, the ancient Hebrew letters, substantially the same as Phœnician, agree closely with ancient Greek letters—a fact which, taken by itself, would not prove that the Greeks received them from the Phœnicians, as the Phœnicians might possibly have received them from the Greeks; but which, viewed in connection with Greek traditions on the subject, and with the significance of the letters in Hebrew, seems reasonably conclusive that the letters were transported from Phœnicia into Greece. It is true that modern Hebrew writing and the later Greek writing of antiquity have not much resemblance to each other; but this is owing partly to gradual changes in the writing of Greek letters, and partly to the fact that the character in which Hebrew Bibles are now printed, called the Assyrian or square character, was not the one originally in use among the Jews, but seems to have been learnt in

the Babylonian Captivity, and afterwards gradually adopted by them on their return to Palestine. (Gesenius, *Geschichte der Hebräischen Sprache und Schrift*, p. 156.)

As to the mode in which letters were invented, some clew is afforded by some of the early Hebrew and the Phœnician characters, which evidently aimed, although very rudely, like the drawing of very young children, to represent the object which the name of the letter signified. Thus the earliest Alpha has some vague resemblance to an ox's head, Gimel to a camel's back, Daleth to the door of a tent, Vau to a hook or peg. Again, the written letters, called respectively, Lamed (an ox goad), Ayin (an eye), Qoph (the back of the head), Reish or Roash (the head), and Tav (a cross), are all efforts, more or less successful, to portray the things signified by the names. It is said that this is equally true of Egyptian phonetic hieroglyphics; but, however this may be, there is no difficulty in understanding in this way the formation of an alphabet, when the idea of representing the component sounds or half-sounds of a word by figures was once conceived. But the original idea of thus representing sounds, though peculiarly felicitous, was by no means obvious, and millions of men lived and died without its occurring to any one of them.

In conclusion, it may not be unimportant to observe that, although so many letters of the Greek alphabet have a meaning in Hebrew or Phœnician, yet their Greek names are not in the Hebrew or Phœnician, but in the Aramaic form. There is a peculiar form of the noun in Aramaic, called by grammarians the *status euphaticus*, in which the termination *â* (אָ) is added to a noun, modifying it according to certain laws. Originally this termination was probably identical with the definite article "ha"; which, instead of being prefixed, was subjoined to the noun, as is the case now with the definite article in the Scandinavian languages. This form in *â* is found to exist in the oldest specimen of Aramaic in the Bible, *Yegar sahadûthâ*, in Genesis xxxi. 47, where *sahadûth*, testimony, is used by Laban in the *status euphaticus*. Now it is worthy of note that the names of a considerable proportion of the "Cadmeian letters" in the Greek alphabet are in this Aramaic form, such as Alpha, Beta, Gamma, Delta, Eta, Theta, Iota, Kappa, Lambda; and although this fact by itself is not sufficient to support an elaborate theory on the subject, it seems in favor, as far as it goes, of the conjecture that when the Greeks originally received the knowledge of letters, the names by which the several letters were taught to them were Aramaic. It has been suggested, indeed, by Gesenius, that the Greeks themselves made the addition in all these cases, in order to give the words a Greek termination, as "they did with other Phœnician words as *melet*, μάθητα, *nevel*, νάβλα." If, however, a list is examined of Phœnician words naturalized in Greek, it will not be found that the

*Kedem*, a noun with the double meaning of the "East" and "ancient time." With the former sense, Cadmus might mean "Eastern," or one from the East, like the name "Norman," or "Fleming," or, still more closely, "the Western," or "Southern," in English. With the latter sense for *Kedem*, the name would mean "Olden" or "Antient" and an etymological significance might

be given to a line of Sophocles, in which Cadmus is mentioned;—

Ὁ τέκνα Κάδμου τοῦ πάλαι γένα τροφή.  
CŒlip. Tyr. 1.

α The sixth letter, afterwards disused, and now generally known by the name of Digamma (from Διγῆσις, i. 201), was unquestionably the same as the Hebrew letter Vau (a hook).

ending in *d* has been the favorite mode of accommodating them to the Greek language. For example, the following sixteen words are specified by Bleek (*Einführung in die A. T.*, p. 69), as having been communicated through the Phœnicians to the Greeks: *νάρος* = *nēros*; *κιννάμων* = *kinnamōn*; *σάπφειρος* = *sappir*; *μύρρα, κέρον* = *mor*; *κασία, κασία* = *ketziāh*; *ύσσωπος* = *ēzōn*; *λίβανος, λιβανωτός* = *levanāh*; *βύσσος* = *būtz*; *κύμινον* = *kammīn*; *μάννα* = *mān*; *φύκος* = *pūk*; *συκάμινος* = *shikmāh*; *νάβλα* = *nēvel*; *κινύρα* = *kinnōr*; *κάμηλος* = *gāmāl*; *άρραβών* = *eravōn*. Now it is remarkable that, of these sixteen, only four end in *a* in Greek which have not a similar termination in Hebrew; and, of these four, one is a late Alexandrine translation, and two are names of musical instruments, which, very probably, may first have been communicated to Greeks, through Syrians, in Asia Minor. And, under any circumstances, the proportion of the Phœnician words which end in *a* in Greek is too small to warrant the inference that any common practice of the Greeks in this respect will account for the seeming fact that nine out of the sixteen Cadmeian letters are in the Aramaic *stutus emphaticus*. The inference, therefore, from their endings in *a* remains unshaken. Still this must not be regarded in any way as proving that the alphabet was invented by those who spoke the Aramaic language. This is a wholly distinct question, and far more obscure; though much deference on the point is due to the opinion of Gesenius, who, from the internal *a* evidence of the names of the Semitic letters, has arrived at the conclusion that they were invented by the Phœnicians (*Paläographie*, p. 294).

*Literature.* — In English, see Kenrick's *Phœnicia*, London, 1855; in Latin, the second part of Bochart's *Geographia Sacra*, under the title "Canaan," and Gesenius' work, *Scripturae Linguaeque Phœniciae Monumenta quotquot supersunt*, Lipsiæ, 1837; in German, the exhaustive work of Movers, *Die Phönizier*, and *Die Phönizische Alterthum*, 5 vols., Berlin, 1841-1856; an article on the same subject by Movers, in Ersch and Gruber's *Encyclopædie*, and an article in the same work by Gesenius on *Paläographie*. See likewise, Gesenius' *Geschichte der Hebräischen Sprache und Schrift*, Leipzig, 1815; Bleek's *Einführung in das Alte Testament*, Berlin, 1860. Phœnician inscriptions discovered since the time of Gesenius have been published by Judas, *Étude démonstrative de la langue Phœnicienne et de la langue Libyque*, Paris, 1847, and forty-five other inscriptions have been published by the Abbé Bourgade, Paris, 1852, fol. In 1845 a votive tablet was discovered at Marseilles, respecting which see Movers' *Phœnizische Texte*, 1847. In 1855, an inscription was discovered at Sidon on the sarcophagus of a Sidonian king named Eschnunazar, respecting which see Dietrich's *Zwei Sidonische Inschriften, und eine alte Phönizische Königsinschrift*, Marburg, 1855, and Ewald's *Erklärung der grossen Phönizischen Inschrift von Sidon*, Göttingen, 1856, 4to; from the

*a* The strongest argument of Gesenius against the Aramaic invention of the letters is, that although doubtless many of the names are both Aramaic and Hebrew, some of them are not Aramaic; at least, not in the Hebrew signification: while the Syrians use other words to express the same ideas. Thus אלה

seventh volume of the *Abhandlungen der Königlich-Gesellschaft zu Göttingen*. Information respecting these works, and others on Phœnician inscriptions, is given by Bleek, pp. 64, 65.

E. T.

PHOROS (Φορος: *Phares, Foro*) = PAROSH (1 Esdr. v. 9, ix. 26).

PHRYGIA (Φρυγία: *Phrygia*). Perhaps there is no geographical term in the New Testament which is less capable of an exact definition. Many maps convey the impression that it was co-ordinate with such terms as Bithynia, Cilicia, or Galatia. But in fact there was no Roman province of Phrygia till considerably after the first establishment of Christianity in the peninsula of Asia Minor. The word was rather ethnological than political, and denoted, in a vague manner, the western part of the central region of that peninsula. Accordingly, in two of the three places where it is used, it is mentioned in a manner not intended to be precise (*διελθόντες τὴν Φρυγίαν καὶ τὴν Γαλατικὴν χώραν*, Acts xvi. 6; *διερχόμενος καθεξῆς τὴν Γαλατικὴν χώραν καὶ Φρυγίαν*, Acts xviii. 23), the former having reference to the second missionary journey of St. Paul, the latter to the third. Nor is the remaining passage (Acts ii. 10) inconsistent with this view, the enumeration of those foreign Jews who came to Jerusalem at Pentecost (though it does follow, in some degree, a geographical order) having no reference to political boundaries. By Phrygia we must understand an extensive district, which contributed portions to several Roman provinces, and varying portions at different times. As to its physical characteristics, it was generally a table-land, but with considerable variety of appearance and soil. Several towns mentioned in the New Testament were Phrygian towns; such, for instance, as Iconium and Colossæ: but it is better to class them with the provinces to which they politically belonged. All over this district the Jews were probably numerous. They were first introduced there by Antiochus the Great (Joseph. *Ant.* xii. 3, § 4): and we have abundant proof of their presence there from Acts xiii. 14, xiv. 1, 19, as well as from Acts ii. 10. [See PHILIP, p. 2485 b.] J. S. H.

PHUD (Φουδ) = PHUT (Jud. ii. 23; comp. Ezr. xxvii. 10).

PHU'RAH (פְּרָח [bough, branch]: *Pharā*: *Phara*). Gideon's servant (lit. "lad," or "boy"), probably his armor-bearer (comp. 1 Sam. xv. 1), who accompanied him in his midnight visit to the camp of the Midianites (Judg. vii. 10, 11).

PHUR'IM (τῶν Φουραιμ; [Alex. *Φουραια*; FA.<sup>3</sup> *Φουριμ*]: *Phurim*), Esth. xi. 1. [PURIM.]

PHUT, PUT (פֹּחַד [see below]: *Phōd*, [Alex. in 1 Chr. *Φουρ*; in Jer., Ezek., Nah.] *Alβues*: *Phuth, Phut, Libyes, Libya, Africa* [?]), the third name in the list of the sons of Ham (Gen. x. 6; 1 Chr. i. 8), elsewhere applied to an African country or people. In the list it follows Cush and Mizraim, and precedes Canaan. The settlements of Cush

in Aramaic means only 1000, and not an ox; the word for "door" in Aramaic is not דלת but תרע: while the six following names of Cadmeian letters are not Aramaic: וו, יוד, מנים, פא, פה (Syr. פרה), דה, תו.

extended from Babylonia to Ethiopia above Egypt, those of Mizraim stretched from the Philistine territory through Egypt and along the northern coast of Africa to the west; and the Canaanites were established at first in the land of Canaan, but afterwards were spread abroad. The order seems to be ascending towards the north: the Cushite chain of settlements being the most southern, the Mizraite chain extending above them, though perhaps through a smaller region, at least at the first, and the Canaanites holding the most northern position. We cannot place the tract of Phut out of Africa, and it would thus seem that it was almost parallel to that of the Mizraites, as it could not be further to the north: this position would well agree with Libya. But it must be recollected that the order of the nations or tribes of the stocks of Cush, Mizraim, and Canaan, is not the same as that we have inferred to be that of the principal names, and that it is also possible that Phut may be mentioned in a supplementary manner, perhaps as a nation or country dependent on Egypt.

The few mentions of Phut in the Bible clearly indicate, as already remarked, a country or people of Africa, and, it must be added, probably not far from Egypt. It is noticeable that they occur only in the list of Noah's descendants and in the prophetic Scriptures. Isaiah probably makes mention of Phut as a remote nation or country, where the A. V. has PUL, as in the Masoretic text (Is. lvi. 19). Nabum, warning Nineveh by the fall of No-Amon, speaks of Cush and Mizraim as the strength of the Egyptian city, and Phut and Lubim as its helpers (iii. 9). Jeremiah tells of Phut in Necho's army with Cush and the Ludim (xvi. 9). Ezekiel speaks of Phut with Persia and Lud as supplying mercenaries to Tyre (xxvii. 10), and as sharing with Cush, Lud, and other helpers of Egypt, in her fall (xxx. 5); and again, with Persia, and Cush, perhaps in the sense of mercenaries, as warriors of the army of Gog (xxxviii. 5).<sup>a</sup>

From these passages we cannot infer anything as to the exact position of this country or people; unless indeed in Nahum, Cush and Phut, Mizraim and Lubim are respectively connected, which might indicate a position south of Egypt. The serving in the Egyptian army, and importance of Phut to Egypt, make it reasonable to suppose that its position was very near.

In the ancient Egyptian inscriptions we find two names that may be compared to the Biblical Phut. The tribes or peoples called the Nine Bows, IX PETU or IX NA-PETU, might partly or wholly represent Phut. Their situation is doubtful, and they are never found in a geographical list, but only in the general statements of the power and prowess of the kings. If one people be indicated by them, we may compare the Naphtulim of the Bible. [NAPHTHULIM.] It seems unlikely that the Nine Bows should correspond to Phut, as their name does not occur as a geographical term in use in the directly historical inscriptions, though it may be supposed that several well-known names there take its place as those of individual tribes; but this is an improbable explanation. The second name is that of Nubia, TO-PET, "the region of the Bow," also called TO-MERU-PET, "the region, the island

of the Bow," whence we conjecture the name of Meroë to come. In the geographical lists the latter form occurs in that of a people, ANU-MERU-PET found, unlike all others, in the lists of the southern peoples and countries as well as the northern. The character we read PET is an unstrung bow, which until lately was read KENS, as a strung bow is found following, as if a determinative, the latter word, which is a name of Nubia, perhaps, however, not including so large a territory as the names before mentioned. The reading KENS is extremely doubtful, because the word does not signify bow in Egyptian, as far as we are aware, and still more because the bow is used as the determinative of its name PET, which from the Egyptian usage as to determinatives makes it almost impossible that it should be employed as a determinative of KENS. The name KENS would therefore be followed by the bow to indicate that it was a part of Nubia. This subject may be illustrated by a passage of Herodotus, explained by Mr. Harris of Alexandria, if we premise that the unstrung bow is the common sign, and, like the strung bow, is so used as to be the symbol of Nubia. The historian relates that the king of the Ethiopians unstrung a bow, and gave it to the messengers of Cambyses, telling them to say that when the king of the Persians could pull so strong a bow so easily, he might come against the Ethiopians with an army stronger than their forces (iii. 21, 22, ed. Rawlinson: Sir G. Wilkinson's note). For the hieroglyphic names see Brugsch's *Geogr. Inschr.*

The Coptic Πηφδατ must also be compared with Phut. The first syllable being the article, the word nearly resembles the Hebrew name. It is applied to the western part of Lower Egypt beyond the Delta; and Champollion conjectures it to mean the Libyan part of Egypt, so called by the Greeks, comparing the Coptic name of the similar eastern portion, Ταρβια,

Ταρβια, the older Arabian part of Egypt and Arabian Nome (*L'Égypte sous les Pharaons*, ii. pp. 28-31, 243). Be this as it may, the name seems nearer to NAPHTHULIM than to Phut. To take a broad view of the question, all the names which we have mentioned may be reasonably connected with the Hebrew Phut; and it may be supposed that the Naphtulim were Mizraites in the territory of Phut; perhaps intermixed with peoples of the latter stock. It is, however, reasonable to suppose that the PET of the ancient Egyptians, as a geographical designation, corresponds to the Phut of the Bible, which would therefore denote Nubia or the Nubians, the former, if we are strictly to follow the Egyptian usage. This identification would account for the position of Phut after Mizraim in the list in Genesis, notwithstanding the order of the other names; for Nubia has been from remote times a dependency of Egypt, excepting in the short period of Ethiopian supremacy, and the longer time of Ethiopian independence. The Egyptian name of Cush, KEESH, is applied to a wider region well corresponding to Ethiopia. The governor of Nubia in the time of the Pharaohs was called Prince of KEESH, perhaps because his authority extended beyond Nubia. The identification of Phut with Nubia is not repugnant to the mention in the prophets: on the contrary, the great importance of Nubia in their time, which comprehended that of the Ethiopian supremacy, would account for their

<sup>a</sup> For Phut (in the marg.) the A. V. in the two last passages above has LIBYA (which see), and in Jer. xvi. 9, "Libyans." H.

speaking of Phut as a support of Egypt, and as furnishing it with warriors.

The identification with Libya has given rise to attempts to find the name in African geography, which we shall not here examine, as such mere similarity of sound is a most unsafe guide.

R. S. P.

\* Some Egyptologists identify the *Put* with the *Put* of the Egyptian monuments. Thus Bunsen, (*Egypt's Place*, vol. ii. p. 304) says, "the *Put* of Scripture is analogous with *Punt*, just as *Moph* is with *Menf*, *Sheshak* with *Sheshonk*." Accordingly he regards the *Put* as Mauritians. Ebers (*Ägypten und die Bücher Mose's*, i. 64) says, "the name *Punt* is identical with *Put*, for the Egyptians, to whom a medial T sound was so difficult, always prefixed to this a nasal *n*, when it occurred in a foreign name. For a like reason they wrote *Ndarius* for *Darius*." If this identification with the *Punt* is admitted, then the home of the *Put* could not have been either Nubia or Lydia. The *Punt* were Arabians, and their country lay to the east of Egypt (Brugsch, *Geog. Inschrift.* ii. 15). This is evident from monumental inscriptions which represent a commerce with the land of Phut by means of ships, that brought incense, spices, precious stones, and other well-known products of Arabia. This commerce was probably by way of the Arabian Gulf. The view here suggested is maintained at length by Ebers, but the identification is still doubtful. J. P. T.

PHUVAH (פְּחֻוָּה [perh. *mouth*]: פְּחֻוָּה: *Phua*). One of the sons of Issachar (Gen. xlv. 13), and founder of the family of the PUNITES. In the A. V. of Num. xxvi. 23 he is called PUA, though the Heb. is the same; and in 1 Chr. vii. 1, PUAH is another form of the name.

PHYGELLUS (φύγελλος, or φύγελος [Lachm. Tisch.]: *Phigelus*), 2 Tim. i. 15. A Christian connected with those in Asia of whom St. Paul speaks as turned away from himself. It is open to question whether their repudiation of the Apostle was joined with a declension from the faith (see Buddeus, *Eccl. Apostol.* ii. 310), and whether the open display of the feeling of Asia took place — at least so far as Phygellus and Hermogenes were concerned — at Rome. It was at Rome that Onesiphorus, named in the next verse, showed the kindness for which the Apostle invokes a blessing on his household in Asia: so perhaps it was at Rome that Phygellus displayed that change of feeling toward St. Paul which the Apostle's former followers in Asia avowed. It seems unlikely that St. Paul would write so forebly if Phygellus had merely neglected to visit him in his captivity at Rome. He may have forsaken (see 2 Tim. iv. 16) the Apostle at some critical time when his support was expected; or he may have been a leader of some party of nominal Christians at Rome, such as the Apostle describes at an earlier period (Phil. i. 15, 16) opposing him there.

Dean Elliott, on 2 Tim. i. 15, who is at variance with the ancient Greek commentators as to the exact force of the phrase "they which are in Asia," states various opinions concerning their aversion from St. Paul. The Apostle himself seems to have foreseen it (Acts xx. 30); and there is nothing in the fact inconsistent with the general picture of the state of Asia at a later period which we have in the first three chapters of the Revelation.

PHYLACTERY. [FRONTI ETS.]

\* PHYSICIAN. [MEDICINE.]

PI-BESETH [A. V. ed. 1611, PI-BESETH]

(פִּי-בֶּסֶת. [see below]: Βούβαστος: *Bubastus*) a town of Lower Egypt, mentioned but once in the Bible (Ez. xxx. 17). In hieroglyphics its name is written BAHEST, BAST, and HA-BAHEST, followed by the determinative sign for an Egyptian city, which was probably not pronounced.

The Coptic forms are Βαετ, with the article ΠΥ prefixed, ΠΟΥΒΑΕΤΕ. ΠΟΥΒΑΕΤ, ΦΟΥΒΑΕΘΑ, ΒΟΥΒΑΕΤΙ, ΠΟΥΒΑΕΤ, and the Greek, Βούβαστς, Βούβαστος.

The first and second hieroglyphic names are the same as those of the goddess of the place, and the third signifies the abode of BAHEST, that goddess. It is probable that BAHEST is an archaic mode of writing, and that the word was always pronounced, as it was sometimes written, BAST. It seems as if the civil name was BAHEST, and the sacred, HA-BAHEST. It is difficult to trace the first syllable of the Hebrew and of the Coptic and Greek forms in the hieroglyphic equivalents. There is a similar case in the names

HAHESAR, Βορσιρι, Πορσιρι, Βούσιρις, *Busiris*. Dr. Brugsch and M. Devéria read PE or PA, instead of HA; but this is not proved. It may be conjectured that in pronunciation the masculine definite article PEPA or PEE was prefixed to HA, as could be done in Coptic: in the ancient language the word appears to be common, whereas it is masculine in the later. Or it may be suggested that the first syllable or first letter was a prefix of the vulgar dialect, for it is frequent in Coptic. The name of Philæ may perhaps afford a first explanation, for it is written EELEK-T, EELEK, and P-EELEK (Brugsch, *Geogr. Inschr.* i. 156, Nos. 626, 627); whence it would seem that the sign city (not abode) was common, as in the first form the feminine article, and in the last the masculine one, is used, and this would admit of the reading PA-BAST, "the [city] of Bubastis [the goddess]."

Bubastis was situate on the west bank of the Pelusiac or Bubastite branch of the Nile, in the Bubastite nome, about 40 miles from the central part of Memphis. Herodotus speaks of its site as having been raised by those who dug the canals for Sesostris, and afterwards by the labor of criminals under Salacôs the Ethiopian, or, rather the Ethiopian dominion. He mentions the temple of the goddess Bubastis as well worthy of description, being more beautiful than any other known to him. It lay in the midst of the city, which, having been raised on mounds, overlooked it on every side. An artificial canal encompassed it with the waters of the Nile, and was beautified by trees on its bank. There was only a narrow approach leading to a lofty gateway. The enclosure thus formed was surrounded by a low wall, bearing sculptures: within was the temple, surrounded by a grove of fine trees (ii. 137, 138). Sir Gardner Wilkison observes that the ruins of the city and temple confirm this account. The height of the mounds and the site of the temple are very remarkable, as well as the beauty of the latter, which was "of the finest red granite." It "was surrounded by a sacred enclosure, about 600 feet square . . . beyond

which was a larger circuit, measuring 940 feet by 1200, containing the minor one and the canal." The temple is entirely ruined, but the names of Rameses II. of the XIXth dynasty, Userken I. (Osorehon I.) of the XXII, and Nekht-har-heb (Necta-nebo I.) of the XXXth, have been found here, as well as that of the eponymous goddess BAST. There are also remains of the ancient houses of the town, and, "amidst the houses on the N. W. side are the thick walls of a fort, which protected the temple below" (Notes by Sir G. Wilkinson in Rawlinson's *Herodotus*, vol. ii. pp. 219, plan, and 102). Bubastis thus had a fort, besides being strong from its height.

The goddess BAST, who was here the chief object of worship, was the same as PESHT, the goddess of fire. Both names accompany a lion-headed figure, and the cat was sacred to them. Herodotus considers the goddess Bubastis to be the same as Artemis (ii. 137), and that this was the current opinion in Egypt in the Greek period is evident from the name Speos Artemidos of a rock temple dedicated to PESHT, and probably of a neighboring town or village. The historian speaks of the annual festival of the goddess held at Bubastis as the chief and most largely attended of the Egyptian festivals. It was evidently the most popular, and a scene of great license, like the great Muslim festival of the Seyyid el-Bedawee celebrated at Tauteh in the Delta (ii. 59, 60).

There are scarcely any historical notices of Bubastis in the Egyptian annals. In Manetho's list it is related that in the time of Boethos, or Bochos, first king of the II<sup>d</sup> dynasty (B. C. cir. 2470), a chasm of the earth opened at Bubastis, and many perished (Cory's *Ancient Fragments*, 2d ed. pp. 98, 99). This is remarkable, since, though shocks of earthquakes are frequent in Egypt, the actual earthquake is of very rare occurrence. The next event in the list connected with Bubastis is the accession of the XXII<sup>d</sup> dynasty (B. C. cir. 990), a line of Bubastite kings (*Ibid.* pp. 124, 125). These were either foreigners or partly of foreign extraction, and it is probable that they chose Bubastis as their capital, or as an occasional residence, on account of its nearness to the military settlements. [MIGDOL.] Thus it must have been a city of great importance when Ezekiel thus foretold its doom: "The young men of Aven and of Pi-beseth shall fall by the sword: and these [cities] shall go into captivity" (xxx. 17). Heliopolis and Bubastis are near together, and both in the route of an invader from the east marching against Memphis. R. S. P.

\* In Egyptian mythology, the goddess *Pesht*, the divinity of Bubastis, is described as the best-beloved of Ptah. To her was attributed the creation of the Asiatic race, which immediately succeeded the creation of the Egyptians by Ra, the Sun-god. She appears also as the avenger of crimes, and in this character is depicted with the head of a lioness. Perhaps under these two forms of creating and punishing, she represented the solar ray as both vivifying and destructive. But he was also presented under a gracious aspect

toward men, and then, as at Bubastis, the cat's-head was her symbol. Some good examples of this are to be seen in the Museums of Berlin, Leyden, and the Louvre at Paris.

Diodorus (i. 27) has an inscription concerning *Isis*, which says: "I am queen of the whole country, brought up by Hermes: I am the eldest daughter of the youngest god, Chronos. For me *Bubastis* was built." But *Isis* personated various divinities, and sometimes *Pesht*, appearing with the cat's-head, and the usual symbols of that goddess (Bunsen, i. 420). J. P. T.

**PICTURE.**<sup>a</sup> In two of the three passages in which "picture" is used in A. V. it denotes idolatrous representations, either independent images or more usually stones "portrayed," i. e. sculptural in low relief, or engraved and colored (Ez. xxiii. 14; Layard, *Nin. & Bab.* ii. 306, 308). Movable pictures, in the modern sense, were doubtless unknown to the Jews; but colored sculptures and drawings on walls or on wood, as mummy cases, must have been familiar to them in Egypt (see Wilkinson, *Anc. Egypt.* ii. 277). In later times we read of portraits (*eikōvas*), perhaps busts or intagli sent by Alexandra to Antony (Joseph. *Ant.* xv. 2 § 6). The "pictures of silver" of Prov. xxv. 11, were probably wall-surfaces or cornices with carvings, and the "apples of gold" representations of fruit or foliage, like Solomon's flowers and pomegranates (1 K. vi., vii.). The walls of Babylon were ornamented with pictures on enameled brick. [BRICKS.] H. W. P.

**PIECE OF GOLD.** The A. V., in rendering the elliptical expression "six thousand of gold," in a passage respecting Naaman, relating that he "took with him ten talents of silver, and six thousand of gold, and ten changes of raiment" (2 K. v. 5), supplies "pieces" as the word understood. The similar expression respecting silver, in which the word understood appears to be shekels, probably justifies the insertion of that definite word. [PIECE OF SILVER.] The same expression, if a weight of gold be here meant, is also found in the following passage: "And king Solomon made two hundred targets [of] beaten gold: six hundred of gold went to one target" (1 K. x. 16). Here the A. V. supplies the word "shekels," and there seems no doubt that it is right, considering the number mentioned, and that a common weight must be intended. That a weight of gold is meant in Naaman's case may be inferred, because it is extremely unlikely that coined money was already invented at the time referred to, and indeed that it was known in Palestine before the Persian period. [MONEY; DARIQ.] Rings or ingots of gold may have been in use, but we are scarcely warranted in supposing that any of them bore the name of shekels, since the practice was to weigh money. The rendering "pieces of gold" is therefore very doubtful: and "shekels of gold," as designating the value of the whole quantity, not individual pieces, is preferable. R. S. P.

\* **PIECE OF MONEY.** [STATER.]

**PIECE OF SILVER.** The passages in the O. T. and those in the N. T. in which the

*itum cubicum* A. V. "chamber of imagery:" Luther *schünsten kammer*. [IMAGERY, CHAMBERS OF, Amer. ed.]

<sup>a</sup> 1. מִצְבֵּי־יָדָה, from יָבֵה, "behold" with  
בָּרָז: λίθος σκοπός: *insignis lapis* (Lev. xxvi. 1.), A. V. "image of stone"; Num. xxxiii. 52, σκοπιά: *titulus*.  
In Ez. viii. 12. "th כִּי־רָרָה: κοίτων κρυπτός: *abscond-*

2. מִצְבֵּי־יָדָה, from same root (Is. ii. 16): θεῶν (πλοίων) κάλλους: *quod visu pulchrum est*: Prov. xxv. 11 "Apples of gold in pictures of silver:" LXX. ἐν ὀρμί σκυ σαργίου: *in lectis argenteis*: Luther, *Schaen*.

A. V. uses this term must be separately considered.

I. In the O. T. the word "pieces" is used in the A. V. for a word understood in the Hebrew, if we except one case to be afterwards noticed. The phrase is always "a thousand" or the like "of silver" (Gen. xx. 16, xxxvii. 28, xlv. 22; Judg. ix. 4, xvi. 5; 2 K. vi. 25; Hos. iii. 2; Zech. xi. 12, 13). In similar passages the word "shekels" occurs in the Hebrew, and it must be observed that these are either in the Law, or relate to purchases, some of an important legal character, as that of the cave and field of Machpelah, that of the threshing-floor and oxen of Araunah, or to taxes, and the like (Gen. xxiii. 15, 16; Ex. xxi. 32; Lev. xxvii. 3, 6, 16; Josh. vii. 21; 2 Sam. xxiv. 24; 1 Chr. xxi. 25, where, however, shekels of gold are spoken of; 2 K. xv. 20; Neh. v. 15; Jer. xxxii. 9). There are other passages in which the A. V. supplies the word "shekels" instead of "pieces" (Deut. xxii. 19, 29; Judg. xvii. 2, 3, 4, 10; 2 Sam. xviii. 11, 12), and of these the first two require this to be done. It becomes then a question whether there is any ground for the adoption of the word "pieces," which is vague if actual coins be meant, and inaccurate if weights. The shekel, be it remembered, was the common weight for money, and therefore most likely to be understood in an elliptical phrase. When we find good reason for concluding that in two passages (Deut. xxii. 19, 20) this is the word understood, it seems incredible that any other should be in the other places. The exceptional case in which a word corresponding to "pieces" is found in the Hebrew is in the Psalms, where presents of submission are prophesied to be made of "pieces of silver," כֶּסֶף יְצִירָהּ (lxviii. 30,

Heb. 31). The word כֶּסֶף, which occurs nowhere else, if it preserve its radical meaning, from כָּסַף, must signify a piece broken off, or a fragment; there is no reason to suppose that a coin is meant.

II. In the N. T. two words are rendered by the phrase "piece of silver," drachma, δραχμή, and ἀργύριον. (1.) The first (Luke xv. 8, 9) should be represented by drachma. It was a Greek silver coin, equivalent, at the time of St. Luke, to the Roman denarius, which is probably intended by the Evangelist, as it had then wholly or almost superseded the former. [DRACHMA.] (2.) The second word is very properly thus rendered. It occurs in the account of the betrayal of our Lord for "thirty pieces of silver" (Matt. xxvi. 15, xxvii. 3, 5, 6, 9). It is difficult to ascertain what coins are here intended. If the most common silver pieces be meant, they would be denarii. The parallel passage in Zechariah (xi. 12, 13) must, however, be taken into consideration, where, if our view be correct, shekels must be understood. It may, however, be suggested that the two thirties may correspond, not as of exactly the same coin, but of the chief current coin. Some light may be thrown on our difficulty by the number of pieces. It can scarcely be a coincidence that thirty shekels of silver was the price of blood in the case of a slave accidentally killed (Ex. xxi. 32). It may be objected that there is no reason to suppose that shekels were current in our Lord's time; but it must be replied that the tetradrachms of depreciated Attic weight of the Greek cities of Syria of that time were of the same weight as the shekels which we believe to be of Simon the Maccabee [MONEY], so that Josephus speaks of the

shekel as equal to four Attic drachmæ (Ant. iii. 8 § 2). These tetradrachms were common at the time of our Lord, and the piece of money found by St. Peter in the fish must, from its name, have been of this kind. [STATER.] It is therefore more probable that the thirty pieces of silver were tetradrachms than that they were denarii. There is no difficulty in the use of two terms, a name designating the denomination and "piece of silver," whether the latter mean the tetradrachm or the denarius, as it is a vague appellation that implies a more distinctive name. In the received text of St. Matthew the prophecy as to the thirty pieces of silver is ascribed to Jeremiah, and not to Zechariah, and much controversy has thus been occasioned. The true explanation seems to be suggested by the absence of any prophet's name in the Syriac version, and the likelihood that similarity of style would have caused a copyist inadvertently to insert the name of Jeremiah instead of that of Zechariah. [ACELDAMA, Amer. ed.] R. S. P.

PIETY. This word occurs but once in A. V.: "Let them learn first to show piety at home" (τὸν ἴδιον οἶκον εὐσεβεῖν, better, "towards their own household," 1 Tim. v. 4). The choice of this word here instead of the more usual equivalents of "godliness," "reverence," and the like, was probably determined by the special sense of *pietas*, as "erga parentes" (Cic. *Partit.* 22, *Rep.* vi. 15, *Inu.* ii. 22). It does not appear in the earlier English versions, and we may recognize in its application in this passage a special felicity. A word was wanted for εὐσεβεῖν which, unlike "showing godliness," would admit of a human as well as a divine object, and this *piety* supplied. E. H. P.

PIGEON. [TURTLE-DOVE.]

PI-HAHIROTH (פִּי הַחִירוֹת)

[see below]: ἡ ἔπαυλις, τὸ στόμα Εἰρώθ, Εἰρώθ: Pihahiroth, a place before or at which the Israelites encamped, at the close of the third march from Rameses, when they went out of Egypt. Pihahiroth was before Migdol, and on the other hand were Baal-zephon and the sea (Ex. xiv. 2, 9; Num. xxxiii. 7, 8). The name is probably that of a natural locality, from the unlikelihood that there should have been a town or village in both parts of the country where it is placed in addition to Migdol and Baal-zephon, which seem to have been, if not towns, at least military stations, and its name is susceptible of an Egyptian etymology giving a sense apposite to this idea. The first part of the word is apparently treated by its omission as a separate prefix (Num. xxxiii. 8), and it would therefore appear to be the masculine definite article PE, PA, or PEE. Jahnson proposed the Coptic ΠΙ-Δ-ΧΙ-ΡΩΤ, "the place where sedge grows," and this, or a similar name, the late M. Fulgence Fresnel recognized in the modern *Chueybet-el-boos*, "the bed of reeds." It is remarkable that this name occurs near where we suppose the passage of the Red Sea to have taken place, as well as near Suez, in the neighborhood usually chosen as that of this miracle: but nothing could be inferred as to place from such a name being now found, as the vegetation it describes is fluctuating [EXODUS, THE.] R. S. P.

PILATE, PONTIUS (Πόντιος Πίλατος [Πειλαῶτος, Tisch., 8th ed.]: *Pontius Pilatus*, his prænomen being unknown). The name indicates that he was connected, by descent or adoption, with

the gens of the Pontii, first conspicuous in Roman history in the person of C. Pontius Telesinus, the great Samnite general.<sup>a</sup> He was the sixth Roman procurator of Judæa, and under him our Lord worked, suffered, and died, as we learn, not only from the obvious Scriptural authorities, but from Tacitus (*Ann.* xv. 44, "Christus Tiberio imperitante, per procuratorem Pontium Pilatum supplicio adfectus erat").<sup>b</sup> A procurator (ἐπίτροπος, Philo, *Leg. ad Crim.*, and Joseph. *B. J.* ii. 9, § 2; but less correctly ἡγεμών, Matt. xxvii. 2; and Joseph. *Ant.* xviii. 3, § 1) was generally a Roman knight, appointed to act under the governor of a province as collector of the revenue, and judge in causes connected with it. Strictly speaking, procuratores Cæsariis were only required in the imperial provinces, i. e. those which, according to the constitution of Augustus, were reserved for the special administration of the emperor, without the intervention of the senate and people, and governed by his legate. In the senatorial provinces, governed by proconsuls, the corresponding duties were discharged by quaestors. Yet it appears that sometimes procuratores were appointed in those provinces also, to collect certain dues of the *fiscus* (the emperor's special revenue), as distinguished from those of the *aerarium* (the revenue administered by the senate). Sometimes in a small territory, especially in one contiguous to a larger province, and dependent upon it, the procurator was head of the administration, and had full military and judicial authority, though he was responsible to the governor of the neighboring province. Thus Judæa was attached to Syria upon the deposition of Archelaus (A. D. 6), and a procurator appointed to govern it, with Cæsarea for its capital. Already, during a temporary absence of Archelaus, it had been in charge of the procurator Sabinus; then, after the ethnarch's banishment, came Coponius; the third procurator was M. Ambivius; the fourth, Annius Rufus; the fifth Valerius Gratus; and the sixth Pontius Pilate (Joseph. *Ant.* xvii. 2, § 2), who was appointed A. D. 25-26, in the twelfth year of Tiberius. One of his first acts was to remove the headquarters of the army from Cæsarea to Jerusalem. The soldiers of course took with them their standards, bearing the image of the emperor, into the Holy City. No previous governor had ventured on such an outrage.<sup>c</sup> Pilate had been obliged

to send them in by night, and there were no bounds to the rage of the people on discovering what had thus been done. They poured down in crowds to Cæsarea where the procurator was then residing, and besought him to remove the images. After five days of discussion, he gave the signal to some concealed soldiers to surround the petitioners, and put them to death unless they ceased to trouble him; but this only strengthened their determination, and they declared themselves ready rather to submit to death than forego their resistance to an idolatrous innovation. Pilate then yielded, and the standards were by his orders brought down to Cæsarea (Joseph. *Ant.* xviii. 3, §§ 1, 2, *B. J.* ii. 9, §§ 2-4). On two other occasions he nearly drove the Jews to insurrection; the first when, in spite of this warning about the images, he hung up in his palace at Jerusalem some gilt shields inscribed with the names of deities, which were only removed by an order from Tiberius (Philo, *ad Caium*, § 38, ii. 589); the second when he appropriated the revenue arising from the redemption of vows (Corban; comp. Mark vii. 11) to the construction of an aqueduct. This order led to a riot, which he suppressed by sending among the crowd soldiers with concealed daggers, who massacred a great number, not only of rioters, but of casual spectators<sup>d</sup> (Joseph. *B. J.* ii. 9, § 4). To these specimens of his administration, which rest on the testimony of profane authors, we must add the slaughter of certain Galileans, which was told to our Lord as a piece of news (ἀπαγγέλλουτες, Luke xiii. 1), and on which He founded some remarks on the connection between sin and calamity. It must have occurred at some feast at Jerusalem, in the outer court of the Temple, since the blood of the worshippers was mingled with their sacrifices; but the silence of Josephus about it seems to show that riots and massacres on such occasions were so frequent that it was needless to recount them all.

It was the custom for the procurators to reside at Jerusalem during the great feasts, to preserve order, and accordingly, at the time of our Lord's last passover, Pilate was occupying his official residence in Herod's palace; and to the gates of this palace Jesus, condemned on the charge of blasphemy, was brought early in the morning by the chief priests and officers of the Sanhedrim, who were unable to enter the residence of a Gentile, lest

<sup>a</sup> The cognomen Pilatus has received two explanations. (1.) As armed with the *pilum* or javelin; comp. "pilata agmina," *Virg. Æn.* xii. 121. (2.) As contracted from *pilatus*. The fact that the *pilatus* or cap was the badge of manumitted slaves (comp. Suetonius, *Nero*, c. 57, *Tiber.* c. 4) makes it probable that the epithet marked him out as a *libertus*, or as descended from one. E. H. P.

<sup>b</sup> Of the early history of Pilate we know nothing; but a German legend fills up the gap strangely enough. Pilate is the bastard son of Tyrus, king of Mayence. His father sends him to Rome as a hostage. There he is guilty of a murder; but being sent to Pontus, rises into notice as subduing the barbarous tribes there, receives in consequence the new name of Pontius, and is sent to Judæa. It has been suggested that the twenty-second legion, which was in Palestine at the time of the destruction of Jerusalem, and was afterwards stationed at Mayence, may have been in this case either the bearers of the tradition or the inventors of the fable. (Comp. Vilmar's *Deutsch. Nation. Liter.* i. 217.) E. H. P.

<sup>c</sup> Herod the Great, it is true, had placed the Roman eagle on one of his new buildings; but this had been

followed by a violent outbreak, and the attempt had not been repeated (Ewald, *Geschichte*, iv. 509). The extent to which the scruples of the Jews on this point were respected by the Roman governors, is shown by the fact that no effigy of either god or emperor is found on the money coined by them in Judæa before the war under Nero (*Ibid.* v. 33, referring to De Sauley *Recherches sur la Numismatique Judaïque*, pl. viii., ix.). Assuming this, the denarius with Caesar's image and superscription of Matt. xxiii. must have been a coin from the Roman mint, or that of some other province. The latter was probably current for the common purposes of life. The shekel alone was received as a Temple offering. E. H. P.

<sup>d</sup> Ewald suggests that the Tower of Siloam may have been part of the same works, and that this was the reason why its fall was looked on as a judgment (*Geschichte*, vi. 40; Luke xiii. 4). The Pharisaic reverence for whatever was set apart for the Corban (Mark vii. 11), and their scruples as to admitting into it anything that has an impure origin (Matt. xxvii. 6), may be regarded, perhaps, as outgrowths of the same feeling. E. H. P.

they should be defiled, and unfit to eat the passover (John xviii. 28). Pilate therefore came out to earn their purpose, and demanded the nature of the charge. At first they seem to have expected that he would have carried out their wishes without further inquiry, and therefore merely described our Lord as a *κακοποιός* (disturber of the public peace), but as a Roman procurator had too much respect for justice, or at least understood his business too well to consent to such a condemnation, and as they knew that he would not enter into theological questions, any more than Gallio afterwards did on a somewhat similar occasion (Acts xviii. 14), they were obliged to devise a new charge, and therefore interpreted our Lord's claims in a political sense, accusing him of assuming the royal title, perverting the nation, and forbidding the payment of tribute to Rome (Luke xxiii. 3; an account plainly presupposed in John xviii. 33). It is plain that from this moment Pilate was distracted between two conflicting feelings; a fear of offending the Jews, who had already grounds of accusation against him, which would be greatly strengthened by any show of lukewarmness in punishing an offense against the imperial government, and a conscious conviction that Jesus was innocent, since it was absurd to suppose that a desire to free the nation from Roman authority was criminal in the eyes of the Sanhedrim. Moreover, this last feeling was strengthened by his own hatred of the Jews, whose religious scruples had caused him frequent trouble, and by a growing respect for the calm dignity and meekness of the sufferer. First he examined our Lord privately, and asked Him whether He was a king? The question which He in return put to his judge, "*Sayest thou this of thyself, or did others tell it thee of me?*" seems to imply that there was in Pilate's own mind a suspicion that the prisoner really was what He was charged with being; a suspicion which shows itself again in the later question, "*Whence art thou?*" (John xix. 9), in the increasing desire to release Him (12), and in the refusal to alter the inscription on the cross (22). In any case Pilate accepted as satisfactory Christ's assurance that his *kingdom was not of this world*, that is, not worldly in its nature or objects, and therefore not to be founded by this world's weapons, though he could not understand the assertion that it was to be established by bearing witness to the truth. His famous reply, "*What is truth?*" was the question of a worldly-minded politician, skeptical because he was indifferent; one who thought truth an empty name, or at least could not see "any connection between ἀλήθεια and βασιλεία, truth and policy" (Dr. C. Wordsworth, *Comm.* in loco). With this question he brought the interview to a close, and came out to the Jews and declared the prisoner innocent. To this they replied that his teaching had stirred up all the people from Galilee to Jerusalem. The mention of Galilee suggested to Pilate a new way of escaping from his dilemma, by sending on the case to Herod Antipas, tetrarch of that country, who had come up to Jerusalem to the feast, while at the same time this gave him an opportunity for making overtures of reconciliation to Herod,

<sup>a</sup> Comp. BARABBAS. Ewald suggests that the inscription of which St. Mark speaks must have been that connected with the appropriation of the Corban (*supra*), and that this explains the eagerness with which the people demanded his release. He infers further, from

with whose jurisdiction he had probably in some recent instance interferred. But Herod, though propitiated by this act of courtesy, declined to enter into the matter, and merely sent Jesus back to Pilate dressed in a shining kingly robe (*ἐσθῆτα λαμπράν*, Luke xxiii. 11), to express his ridicule of such pretensions, and contempt for the whole business. So Pilate was compelled to come to a decision, and first, having assembled the chief priests and also the people, whom he probably summoned in the expectation that they would be favorable to Jesus, he announced to them that the accused had done nothing worthy of death, but at the same time, in hopes of pacifying the Sanhedrim, he proposed to scourge Him before he released Him. But as the accusers were resolved to have his blood, they rejected this concession, and therefore Pilate had recourse to a fresh expedient. It was the custom for the Roman governor to grant every year, in honor of the Passover, pardon to one condemned criminal. The origin of the practice is unknown, though we may connect it with the fact mentioned by Livy (v. 13) that at a Lectisterium "*vinctis quoque dempta vincula.*" Pilate therefore offered the people their choice between two, the murderer Barabbas,<sup>a</sup> and the prophet whom a few days before they had hailed as the Messiah. To receive their decision he ascended the *βῆμα*, a portable tribunal which was carried about with a Roman magistrate to be placed wherever he might direct, and which in the present case was erected on a tessellated pavement (*λιθόστρωτον*) in front of the palace, and called in Hebrew *Gubbatha*, probably from being laid down on a slight elevation (*גבוה*, "to be high"). As soon as Pilate had taken his seat, he received a mysterious message from his wife, according to tradition a proselyte of the gate (*θεοσεβής*), named Procla or Claudia Procua (*Evang. Nicod.* ii.), who had "suffered many things in a dream," which impelled her to intreat her husband not to condemn the Just One. But he had no longer any choice in the matter, for the rabble, instigated of course by the priests, chose Barabbas for pardon, and clamored for the death of Jesus; insurrection seemed imminent, and Pilate reluctantly yielded. But, before issuing the fatal order, he washed his hands before the multitude, as a sign that he was innocent of the crime, in imitation probably of the ceremony enjoined in Deut. xxi., where it is ordered that when the perpetrator of a murder is not discovered, the elders of the city in which it occurs shall wash their hands with the declaration, "Our hands have not shed this blood, neither have our eyes seen it." Such a practice might naturally be adopted even by a Roman, as intelligible to the Jewish multitude around him. As in the present case it produced no effect, Pilate ordered his soldiers to inflict the scourging preparatory to execution; but the sight of unjust suffering so patiently borne seems again to have troubled his conscience, and prompted a new effort in favor of the victim. He brought Him out bleeding from the savage punishment, and decked in the scarlet robe and crown of thorns which the soldiers had put on Him in derision.

his name, that he was the son of a Rabbi (Abba was a Rabbinic title of honor) and thus accounts for the part taken in his favor by the members of the Sanhedrim

and said to the people, "Behold the man!" hoping that such a spectacle would rouse them to shame and compassion. But the priests only renewed their clamors for his death, and, fearing that the political charge of treason might be considered insufficient, returned to their first accusation of blasphemy, and quoting the law of Moses (Lev. xxiv. 16), which punished blasphemy with stoning, declared that He must die "because He made himself the Son of God." But this title *υἱὸς θεοῦ* augmented Pilate's superstitious fears, already aroused by his wife's dream (*μᾶλλον ἐφοβήθη*, John xix. 7); he feared that Jesus might be one of the heroes or demigods of his own mythology; he took Him again into the palace, and inquired anxiously into his descent ("Whence art thou?") and his claims, but, as the question was only prompted by fear or curiosity, Jesus made no reply. When Pilate reminded Him of his own absolute power over Him, He closed this last conversation with the irresolute governor by the mournful remark, "Thou couldst have no power at all against me, except it were given thee from above; therefore he that delivered me unto thee hath the greater sin." God had given to Pilate power over Him, and power only, but to those who delivered Him up God had given the means of judging of His claims; and therefore Pilate's sin, in merely exercising this power, was less than theirs who, being God's own priests, with the Scriptures before them, and the word of prophecy still alive among them (John xi. 50, xviii. 14), had deliberately conspired for his death. The result of this interview was one last effort to save Jesus by a fresh appeal to the multitude; but now arose the formidable cry, "If thou let this man go, thou art not Cæsar's friend," and Pilate, to whom political success was as the breath of life, again ascended the tribunal, and finally pronounced the desired condemnation.<sup>a</sup>

So ended Pilate's share in the greatest crime which has been committed since the world began. That he did not immediately lose his feelings of anger against the Jews who had thus compelled his acquiescence, and of compassion and awe for the sufferer whom he had unrighteously sentenced, is plain from his curt and angry refusal to alter the inscription which he had prepared for the cross (*ὁ γέγραφα, γέγραφα*), his ready acquiescence in the request made by Joseph of Arimathea that the Lord's body might be given up to him rather than consigned to the common sepulchre reserved for those who had suffered capital punishment, and his

sullen answer to the demand of the Sanhedrim that the sepulchre should be guarded.<sup>b</sup> And here, as far as Scripture is concerned, our knowledge of Pilate's life ends. But we learn from Josephus (*Ant.* xviii. 4, § 1) that his anxiety to avoid giving offense to Cæsar did not save him from political disaster. The Samaritans were unquiet and rebellious. A leader of their own race had promised to disclose to them the sacred treasures which Moses was reported to have concealed in Mount Gerizim.<sup>c</sup> Pilate led his troops against them, and defeated them easily enough. The Samaritans complained to Vitellius, now president of Syria, and he sent Pilate to Rome to answer their accusations before the emperor (*Ibid.* § 2). When he reached it, he found Tiberius dead and Caius (Caligula) on the throne, A. D. 36. Eusebius adds (*H. E.* ii. 7) that soon afterwards, "wearied with misfortunes," he killed himself. As to the scene of his death there are various traditions. One is, that he was banished to Vienna Allobrogum (Vienna on the Rhone), where a singular monument, a pyramid on a quadrangular base, 52 feet high, is called Pontius Pilate's tomb (*Dictionary of Geography*, art. "Vienna"). Another is, that he sought to hide his sorrows on the mountain by the lake of Lucerne, now called Mount Pilatus; and there, after spending years in its recesses, in remorse and despair rather than penitence, plunged into the dismal lake which occupies its summit. According to the popular belief, "a form is often seen to emerge from the gloomy waters, and go through the action of one washing his hands; and when he does so, dark clouds of mist gather first round the bosom of the Infernal Lake (such it has been styled of old), and then, wrapping the whole upper part of the mountain in darkness, presage a tempest or hurricane, which is sure to follow in a short space." (Scott, *Anne of Geierstein*, ch. i.) (See below.)

We learn from Justin Martyr (*Apol.* i. pp. 76, 84), Tertullian (*Apol.* c. 21), Eusebius (*H. E.* ii. 2), and others, that Pilate made an official report to Tiberius of our Lord's trial and condemnation, and in a homily ascribed to Chrysostom, though marked as spurious by his Benedictine editors (*Hom.* viii. in *Pasch.* vol. viii. p. 963, D), certain *ὑπομνήματα* (*Acta*, or *Commentarii Pilati*) are spoken of as well-known documents in common circulation. That he made such a report is highly probable, and it may have been in existence in Chrysostom's time; but the *Acta Pilati* now extant in Greek, and two Latin epistles from him to

<sup>a</sup> The proceedings of Pilate in our Lord's trial supply many interesting illustrations of the accuracy of the Evangelists, from the accordance of their narrative with the known customs of the time. Thus Pilate, being only a procurator, had no *questor* to conduct the trial, and therefore examined the prisoner himself. Again, in early times Roman magistrates had not been allowed to take their wives with them into the provinces, but this prohibition had fallen into neglect, and latterly a proposal made by Cæcina to enforce it had been rejected (*Tac. Ann.* iii. 33, 34). Grotius points out that the word *ἀνέμεψεν*, used when Pilate sends our Lord to Herod (*Luke* xxiii. 7) is "propria Romani juris vox: nam remittitur reus qui alicubi comprehensus mittitur ad iudicem aut originis aut habitationalis" (see Alford, in *locu*). The tessellated pavement (*λιθόστρωτον*) was so necessary to the forms of justice, as well as the *βῆμα*, that Julius Cæsar carried one about with him on his expeditions (*Suet. Jul.* c. 46). The

power of life and death was taken from the Jews when Judæa became a province (*Joseph. Ant.* xx. 9, § 1). Scourging before execution was a well-known Roman practice.

<sup>b</sup> *Matt.* xxvii. 65, *ἔχετε κοινοὺς διὰν ὑπάγετε, ἀσφαλίσασθε ὡς οἰκᾶτε*. Ellicott would translate this, "Take a guard," on the ground that the watchers were Roman soldiers, who were not under the command of the priests. But some might have been placed at their disposal during the feast, and we should rather expect *λάβετε* if the sentence were imperative.

<sup>c</sup> Ewald (*Geschichte*, v. 43) ventures on the conjecture that this Samaritan leader may have been Simon Magus. The description fits in well enough; but the class of such impostors was so large, that there are but slight grounds for fixing on him in particular.

the emperor (Fabric. *Cod. Apocr. N. T. i.* 237, 298, lii. 456), are certainly spurious. (For further particulars see below.)

The character of Pilate may be sufficiently inferred from the sketch given above of his conduct at our Lord's trial. He was a type of the rich and corrupt Romans of his age; a worldly-minded statesman, conscious of no higher wants than those of this life, yet by no means unmoved by feelings of justice and mercy. His conduct to the Jews, in the instances quoted from Josephus, though severe, was not thoughtlessly cruel or tyrannical, considering the general practice of Roman governors, and the difficulties of dealing with a nation so arrogant and perverse. Certainly there is nothing in the facts recorded by profane authors inconsistent with his desire, obvious from the Gospel narrative, to save our Lord. But all his better feelings were overpowered by a selfish regard for his own security. He would not encounter the least hazard of personal annoyance in behalf of innocence and justice; the unrighteous condemnation of a good man was a trifle in comparison with the fear of the emperor's frown and the loss of place and power. While we do not differ from Chrysostom's opinion that he was *ῥαθυμῶς* (Chrys. i. 802, *adv. Judæos*, vi.), or that recorded in the Apostolical Constitutions (v. 14), that he was *ἀναδρόπος*, we yet see abundant reason for our Lord's merciful judgment, "He that delivered me unto thee hath the greater sin." At the same time his history furnishes a proof that worldliness and want of principle are sources of crimes no less awful than those which spring from deliberate and reckless wickedness. The unhappy notoriety given to his name by its place in the two universal creeds of Christendom is due, not to any desire of singling him out for shame, but to the need of fixing the date of our Lord's death, and so bearing witness to the claims of Christianity to rest on a historical basis (August. *De Fide et Symb.* c. v. vol. vi. p. 156; Pearson, *On the Creed*, pp. 239, 240, ed. Burt, and the authorities quoted in note c). The number of dissertations on Pilate's character and all the circumstances connected with him, his "facinora," his "Christum servandi studium," his wife's dream, his supposed letters to Tiberius, which have been published during the last and present centuries, is quite overwhelming. The student may consult with advantage Dean Alford's *Commentary*; Ellicott, *Historical Lectures on the Life of our Lord*, sect. vii.; Neander's *Life of Christ*, § 285 (Bohn); Winer, *Realwörterbuch*, art. "Pilate"; Ewald, *Geschichte*, v. 30, &c.

G. E. L. C.

ACTA PILATI.—The number of extant Acta Pilati, in various forms, is so large as to show that very early the demand created a supply of documents manifestly spurious, and we have no reason for looking on any one of those that remain as more authentic than the others. The taunt of Celsus that the Christians circulated spurious or distorted narratives under this title (Orig. c. *Cels.*),<sup>a</sup> and the complaint of Eusebius (*H. E.* ix. 5) that the heathens made them the vehicle of blasphemous calumnies, show how largely the machinery of falsification was used on either side. Such of these documents as are extant are found in the collections

of Fabricius, Thilo, and Tischendorf. Some of them are but weak paraphrases of the Gospel history. The most extravagant are perhaps the most interesting, as indicating the existence of modes of thought at variance with the prevalent traditions. Of these anomalies the most striking is that known as the *Paradoxis Pilati* (Tischendorf, *Evang. Apoc.* p. 426). The emperor Tiberius, startled at the universal darkness that had fallen on the Roman Empire on the day of the Crucifixion, summons Pilate to answer for having caused it. He is condemned to death, but before his execution he prays to the Lord Jesus that he may not be destroyed with the wicked Hebrews, and pleads his ignorance as an excuse. The prayer is answered by a voice from heaven, assuring him that all generations shall call him blessed, and that he shall be a witness for Christ at his second coming to judge the twelve tribes of Israel. An angel receives his head, and his wife dies filled with joy, and is buried with him. Startling as this imaginary history may be, it has its counterpart in the traditional customs of the Abyssinian Church, in which Pilate is recognized as a saint and martyr, and takes his place in the calendar on the 25th of June (Stanley, *Eastern Church*, p. 13; Neale, *Eastern Church*, i. 806). The words of Tertullian, describing him as "jam pro sua conscientia Christianus" (*Apol.* c. 21), indicate a like feeling, and we find traces of it also in the Apocryphal Gospel, which speaks of him as "uncircumcised in flesh, but circumcised in heart" (*Evang. Nicod.* i. 12, in Tischendorf, *Evang. Apoc.* p. 236).

According to another legend (*Mors Pilati*, in Tischendorf's *Evang. Apoc.* p. 432), Tiberius, hearing of the wonderful works of healing that had been wrought in Judæa, writes to Pilate, bidding him to send to Rome the man that had this divine power. Pilate has to confess that he has crucified him; but the messenger meets Veronica, who gives him the cloth which had received the impress of the divine features, and by this the emperor is healed. Pilate is summoned to take his trial, and presents himself wearing the holy and seamless tunic. This acts as a spell upon the emperor, and he forgets his wonted severity. After a time Pilate is thrown into prison, and there commits suicide. His body is cast into the Tiber, but as storms and tempests followed, the Romans take it up and send it to Vienne. It is thrown into the Rhone; but the same disasters follow, and it is sent on to Losania (Lucerne or Lausanne?). There it is sunk in a pool, fenced round by mountains, and even there the waters boil or bubble strangely. The interest of this story obviously lies in its presenting an early form (the existing text is of the 14th century) of the local traditions which connect the name of the procurator of Judæa with the Mount Pilatus that overlooks the Lake of Lucerne. The received explanation (Ruskin, *Modern Painters*, v. 128) of the legend, as originating in a distortion of the descriptive name Mons Pileatus (the "cloud-capped"), supplies a curious instance of the genesis of a mythus from a false etymology; but it may be questioned whether it rests on sufficient grounds, and is not rather the product of a pseudo-criticism, finding in a name the starting-point, not the embodiment of a legend. Have we any evidence that

<sup>a</sup> This reference is given in an article by Leyrer in Herzog's *Real-Encykl.*, but the writer has been unable to verify it. The nearest approach seems to be the

assertion that no judgment fell on Pilate for his alleged crime (ii. 28).

the mountain was known as "Pileatus" before the legend? Have we not, in the apocryphal story just cited, the legend independently of the name?<sup>a</sup> (comp. Vilmar, *Deutsch. Nation. Liter.* i. 217).

Pilate's wife is also, as might be expected, prominent in these traditions. Her name is given as Claudia Procula (Niceph. *II. E. i.* 30).<sup>b</sup> She had been a proselyte to Judaism before the Crucifixion (*Evang. Nicod. c.* 2). Nothing certain is known as to her history, but the tradition that she became a Christian is as old as the time of Origen (*Hom. in Matt. xxxv.*). The system of administration under the Republic forbade the governors of provinces to take their wives with them, but the practice had gained ground under the Empire, and Tacitus (*Ann. iii.* 33) records the failure of an attempt to reinforce the old regulation. (See p. 2529, note a.)

E. H. P.

**PIL'DASH** (פִּילְדָּשׁ) [*flume of fire*, Fürst]: φαλδές; Alex. φαλδᾶς; *Pheldas*. One of the eight sons of Nahor, Abraham's brother, by his wife and niece, Milcah (Gen. xxii. 22). The settlement of his descendants has not been identified with any degree of probability. Bunsen (*Bibelwerk*, Gen. xxii. 22) compares *Ripalthus*, a place in the northeast of Mesopotamia; but the resemblance of the two names is probably accidental.

**PIL'HA** (פִּילְהָא) [*incision, slice*]: פאלאף; [Vat. פאָהא, -ei joined with the following; F.A. פאָה, -aei joined with the following; Alex. פאלααι:] *Phulea*. The name of one of the chief of the people, probably a family, who signed the covenant with Nehemiah (Neh. x. 24).

\* **PILGRIMS.** [STRANGERS.]

**PILLAR.**<sup>c</sup> The notion of a pillar is of a shaft or isolated pile, either supporting or not supporting a roof. Pillars form an important feature in oriental architecture, partly perhaps as a reminiscence of the tent with its supporting poles, and partly also from the use of flat roofs, in consequence of which the chambers were either narrower or divided into portions by columns. The tent-principle is exemplified in the open halls of Persian and other eastern buildings, of which the fronts, supported by pillars, are shaded by curtains or awnings fastened to the ground outside by pegs, or to trees in the garden-court (Esth. i. 6; Chardin, *Voy.* vii. 387, ix. 469, 470, and plates 39, 81; Layard, *Nin. & Bab.* pp. 530, 648; Burckhardt, *Notes on Bed.* i. 37). Thus also a figurative mode of describing

heaven is as a tent or canopy supported by pillars (Ps. civ. 2; Is. xl. 22), and the earth as a flat surface resting on pillars (1 Sam. ii. 8; Ps. lxxv. 3). [TENTS, Amer. ed.]

It may be remarked that the word "place," in 1 Sam. xv. 12, is in Hebrew "hand."<sup>d</sup> In the Arab tent two of the posts are called *yed* or "hand" (Burckhardt, *Bed.* i. 37).

The general practice in oriental buildings of supporting flat roofs by pillars, or of covering open spaces by awnings stretched from pillars, led to an extensive use of them in construction. In Indian architecture an enormous number of pillars, sometimes amounting to 1,000, is found. A similar principle appears to have been carried out at Persepolis. At Nineveh the pillars were probably of wood [CEDAR], and it is very likely that the same construction prevailed in the "house of the forest of Lebanon," with its hall and porch of pillars (1 K. vii. 2, 6). The "chapters" of the two pillars Jachin and Boaz resembled the tall capitals of the Persepolitan columns (Layard, *Nin. & Bab.* pp. 252, 650; *Nineveh*, ii. 274; Fergusson, *Handbk.* pp. 8, 174, 178, 188, 190, 196, 198, 231-233; Roberts, *Sketches*, Nos. 182, 184, 190, 193; Euseb. *Vit. Const.* iii. 34, 38; Burckhardt, *Trav. in Arabia*, i. 244, 245).

But perhaps the earliest application of the pillar was the votive or monumental. This in early times consisted of nothing but a single stone or pile of stones. Instances are seen in Jacob's pillars (Gen. xxviii. 18, xxxi. 46, 51, 52, xxxv. 14); in the twelve pillars set up by Moses at Mount Sinai (Ex. xxiv. 4); the twenty-four stones erected by Joshua (Josh. iv. 8, 9; see also Is. xix. 19, and Josh. xxiv. 27). The trace of a similar notion may probably be found in the holy stone of Mecca (Burckhardt, *Trav.* i. 297). Monumental pillars have also been common in many countries and in various styles of architecture. Such were perhaps the obelisks of Egypt (Fergusson, 6, 8, 115, 246, 340; Ibn Batuta, *Trav.* p. 111; Strabo, iii. 171, 172; Herod. ii. 106; Amm. Marc. xvii. 4; Joseph. *Ant.* i. 2, § 3, the pillars of Seth).

The stone Ezel (1 Sam. xx. 19) was probably a terminal stone or a waymark.

The "place" set up by Saul (1 Sam. xv. 12) is explained by St. Jerome to be a trophy, *Vulg. fomicem triumphalem* (Jerome, *Quest. Hebr. in lib. i. Reg.* iii. 1339). The word used is the same as that for Absalom's pillar, *Matstsébah*, called by Josephus *χείρα* (*Ant.* vii. 10, § 3), which was clearly of a monumental or memorial character, but not

<sup>a</sup> The extent to which the terror connected with the belief formerly prevailed is somewhat startling. If a stone were thrown into the lake, a violent storm would follow. No one was allowed to visit it without a special permission from the authorities of Lucerne. The neighboring shepherds were bound by a solemn oath, renewed annually, never to guide a stranger to it (Gessner, *Descript. Mont. Pilat.* p. 40, Zurich, 1555). The spell was broken in 1584 by Johannes Müller, curé of Lucerne, who was bold enough to throw stones and abide the consequences. (Golbery, *Univers. Picturesque de Suisse*, p. 327.) It is striking that traditions of Pilate attach themselves to several localities in the South of France (comp. Murray's *Handbook of France*, Route 125).

<sup>b</sup> If it were possible to attach any value to the Codex of St. Matthew's Gospel, of which portions have been published by Simonides, as belonging to the 1st century, the name of Pempelo might claim precedence.

<sup>c</sup> 1. מִסְעָד (1 K. x. 12): ὑποστηρίγματα: *fulcra*, from עָד "support;" marg. "rails"

2. מַצְבֵּה; the same, or nearly so.

3. מַצְבֵּי־בָּרָה, from מַצְבֵּה, "place:" סְתָהֶלֶן: *titulus*; a pile of stones, or monumental pillar.

4. נְצִיב: סְתָהֶלֶן: *statua* (Gen. xix. 26), of Lot's wife; from same root as 2 and 3.

5. מַצְבֵּר: πέτρα: *munition*; "tower;" only in Hab. ii. 1; elsewhere "strong city," i. e. a place of defense, from צָבַר, "press," "confine."

6. עֲמֹד: στύλος: *columna*: from עָמַד "stand."

<sup>d</sup> יָד: χείρα: *Sornicem triumphalem*

necessarily carrying any representation of a hand in its structure, as has been supposed to be the case. So also Jacob set up a pillar over Rachel's grave (Gen. xxxv. 20, and Robinson, i. 218). The monolithic tombs and obelisks of Petra are instances of similar usage (Burekhardt, *Syria*, p. 422; Roberts, *Sketches*, p. 105; Irby and Mangles, *Travels*, p. 125).

But the word *Mattsébâh*, "pillar," is more often rendered "statue" or "image" (*e. g.* Deut. vii. 5, xii. 3, xvi. 22; Lev. xxvi. 1; Ex. xxiii. 24, xxxiv. 13; 2 Chr. xiv. 3, xxxi. 1; Jer. xliii. 13; Hos. iii. 4, x. 1; Mic. v. 13). This agrees with the usage of heathen nations, and practiced, as we have seen, by the patriarch Jacob, of erecting blocks or piles of wood or stone, which in later times grew into ornamented pillars in honor of the deity (Clem. Alex. *Coh. ad Gen.* c. iv.; *Strom.* i. 24<sup>a</sup>). Instances of this are seen in the Attic Hermae (Paus. iv. 33, 4), seven pillars significant of the planets (iii. 21, 9, also vii. 17, 4, and 22, 2, viii. 37); and Arnobius mentions the practice of pouring libations of oil upon them, which again recalls the case of Jacob (*Adv. Gent.* i. 335, ed. Gauthier).

The termini or boundary marks were originally, perhaps always, rough stones or posts of wood, which received divine honors (Ov. *Fast.* ii. 641, 684). [IDOL, ii. 1120 a.]

Lastly, the figurative use of the term "pillar," in reference to the cloud and fire accompanying the Israelites on their march, or as in Cant. iii. 6 and Rev. x. 1, is plainly derived from the notion of an isolated column not supporting a roof.

H. W. P.

### PILLAR, PLAIN OF THE (גִּלְגָּלִים)

גִּלְגָּלִים: τῆ βαλάνῳ τῆ εὔρετῆ τῆς στάσεως; Alex. omits τῆ εὔρετῆ; *quærens quæ stabat*, or rather "oak c of the pillar" — that being the real signification of the Hebrew word *elôn*. A tree which stood near Shechem, and at which the men of Shechem and the house of Millo assembled, to crown Abimelech son of Gideon (Judg. ix. 6). There is nothing said by which its position can be ascertained. It possibly derived its name of *Mut-tsáb* from a stone or pillar set up under it; and reasons have already been adduced for believing that this tree may have been the same with that under which Jacob buried the idols and idolatrous trinkets of his household, and under which Joshua erected a stone as a testimony of the covenant there reëxecuted between the people and Jehovah. [MEONENIM.] There was both time and opportunity during the period of commotion which followed the death of Joshua for this sanctuary to return into the hands of the Canaanites, and the stone left standing there by Joshua to become appropriated to idolatrous purposes as one of the *Mattsébâhs* in which the religion of the aborigines of the Holy Land delighted. [IDOL, ii. 1119 b.] The terms in which Joshua speaks of this very stone (Josh. xxiv. 27) almost seem to overstep the bounds of mere imagery, and would suggest and warrant its being afterwards regarded as endowed with miraculous qualities, and therefore a fit object for veneration.

<sup>a</sup> Σημαίνει ὁ στύλος τὸ ἀνεικονιστὸν τοῦ θεοῦ.

<sup>b</sup> A double translation of the Hebrew word: *εὔρετῆ* originated in the erroneous idea that the word is connected with נָשָׂא, "to find."

\* This is given in the margin of the A. V.

Especially would this be the case if the singular expression, "it hath heard all the words of Jehovah our God which He spake to us," were intended to indicate that this stone had been brought from Sinai, Jordan, or some other scene of the communications of Jehovah with the people. The Samaritans still show a range of stones on the summit of Gerizim as those brought from the bed of Jordan by the twelve tribes. G.

**PILLED** (Gen. xxx. 37, 38); **PEELED** (Is. xviii. 2; Ez. xxix. 18) [Tob. xi. 13]. The verb "to pill" appears in old Eng. as identical in meaning with "to peel = to strip," and in this sense is used in the above passages from Genesis. Of the next stage in its meaning as = plunder, we have traces in the word "pillage," pilfer. If the difference between the two forms be more than accidental, it would seem as if in the English of the 17th century "peel" was used for the latter signification. The "people scattered and peeled," are those that have been plundered (f all they have.<sup>d</sup> The soldiers of Nebuchadnezzar's army (Ez. xxix. 18), however, have their shoulder *peeled* in the literal sense. The skin is worn off with carrying earth to pile up the mounds during the protracted siege of Tyre. ["Pilled" has the sense of "bald" in Lev. xiii. 40 marg.] E. H. P.

\* **PILLOW** (προσκεφάλαιον), a cushion for the head. Pillows were used on the divans or couches, on which the Orientals recline for rest and sleep. So our Saviour had laid himself down for repose after a day of fatigue, on a pillow in the hinder part of the ship, when the storm arose, as recorded in Mark iv. 38. The article in Greek indicates that the pillow belonged to the furniture of the boat. The pillow (מִזְרָן = at the head) on which the head of the image that was made to represent David in 1 Sam. xix. 13, was placed, was made of goat's hair; or, as some conjecture, a texture of goat's hair was placed at the head of the image, so as by its resemblance to David's hair to make the deception more complete (see Ges. *Hebr. Handb.* p. 17, 6<sup>te</sup> Aufl.). Jacob used stones for his pillow, or, more literally, placed them at his head, when overtaken by night he slept at Luz (Gen. xxviii. 11, 18). In Ez. xiii. 18, 20, cushions ("pillows," A. V.) were used as especial appliances of luxury and effeminacy; whilst generally those sitting upon a couch only had pillows for the elbow to rest upon, these women made (sewed) them (together) even for all the joints of the hand. The word does not occur further in the A. V.

R. D. C. R.

**PILTAL** [2 syl.] (פִּלְטָל [whom Jehovah delivers]: φελερι; [Vat. Alex. F.A. omit; F.A. φεληται:] *Pheli*). The representative of the priestly house of Moadiah, or Maadiah, in the time of Joiakim the son of Jeshua (Neh. xii. 17).

**PINE-TREE**. 1. *Tidhâr*,<sup>e</sup> from a root signifying to *revolve*. What tree is intended is not certain. Gesenius inclines to think the oak, as implying duration. It has been variously explained

<sup>d</sup> Comp. "peeling their prisoners," Milton, *P. R.* iv

"To peel the chiefs, the people to devour."

Dryden, *Homer, Iliad* (Richardson).

<sup>e</sup> מִזְרָן: *πέυκη*: *pinus* (Is. lx. 13); from מִזְרָן "revolve" (Ges. p. 323). In Is. xii. 19, *βραθυδαόιμος*.

to be the Indian plane, the larch and the elm (Celsius, *Herob.* ii. 271). But the rendering "pine" seems least probable of any, as the root implies either curvature or duration, of which the latter is not particularly applicable to the pine, and the former remarkably otherwise. The LXX. rendering in *Js.* xli. 19, *βραθυδαρ*, appears to have arisen from a confused amalgamation of the words *berósh* and *tídhár*, which follow each other in that passage. Of these *berósh* is sometimes rendered "eypress," and might stand for "juniper." That species of juniper which is called savin, is in Greek *βραθύ*. The word *δαρ* is merely an expression in Greek letters for *tídhár*. (Pliny, xxiv. 11, 61; Schleusner, s. v.; Celsius, *Herob.* i. 78.) [FIR.]  
 2. *Shemen*<sup>a</sup> (Neh. viii. 15) is probably the wild olive. The cultivated olive was mentioned just before (Ges. p. 1437). H. W. P.

**PINNACLE** (τὸ πτερύγιον: *pinná, pinnaculum*: only in Matt. iv. 5, and Luke iv. 9). The word is used in O. T. to render, 1. *Cánáph*,<sup>b</sup> a wing or border, e. g. of a garment (Num. xv. 38; 1 Sam. xv. 27, xxiv. 4). 2. *Snappír*, fin of a fish (Lev. xi. 9. So Arist. *Anim.* i. 5, 14). 3. *Kát-sáh*, edge; A. V. end (Ex. xviii. 26). Hesychius explains πτ. as ἀκρωτήριον.

It is plain, 1. that τὸ πτερ. is not a pinnacle, but the pinnacle. 2. That by the word itself we should understand an edge or border, like a feather or a fin. The only part of the Temple which answered to the modern sense of pinnacle was the golden spikes erected on the roof, to prevent birds from settling there (Joseph. *B. J.* v. 5, § 6). To meet the sense, therefore, of "wing," or to use our modern word founded on the same notion, "aisle," Lightfoot suggests the porch or vestibule which projected, like shoulders on each side of the Temple (Joseph. *B. J.* v. 5, § 4; Vitruv. iii. 2).

Another opinion fixes on the royal porch adjoining the Temple, which rose to a total height of 400 cubits above the Valley of Jehoshaphat (Joseph. *Ant.* xv. 11, § 5, xx. 9, § 7).

Eusebius tells us that it was from "the pinnacle" (τὸ πτερ.) that St. James was precipitated, and it is said to have remained until the 4th century (Euseb. *H. E.* ii. 23; Williams, *Holy City*, ii. 338).

Perhaps in any case τὸ πτερ. means the battlement ordered by law to be added to every roof. It is in favor of this that the word *Canaph* is used to indicate the top of the Temple (Dan. ix. 27; Hammond, Grotius, Calmet, Do Wette, Lightfoot, *H. Hebr.* on Matt. iv.). H. W. P.

**PINON** (פִּינּוֹן [darkness, obscurity?]: Φινών; [Alex. in Gen. Φινες; Vat. in 1 Chr. Φεινων:] <sup>h</sup>hinon). One of the "dukes" of Edom; that is, head or founder of a tribe of that nation (Gen. xxxvi. 41; 1 Chr. i. 52). By Eusebius and Jerome (*Onomasticon*, Φινών, and "Fenon") the seat of the tribe is said to have been at PUSON, one of the stations of the Israelites in the Wilderness; which again they identify with Phæno, "between Petra and Zoar," the site of the famous Roman copper mines. No name answering to Pinon appears to have been yet discovered in Arabic literature, or amongst the existing tribes.

\* PINS. [CRISPING PINS, Amer. ed., and TENT.]

**PIPE** (לִּילִי, *chálil*). The Hebrew word so rendered is derived from a root signifying "to bore, perforate," and is represented with sufficient correctness by the English "pipe" or "flute," as in the margin of 1 K. i. 40. It is one of the simplest and therefore, probably, one of the oldest of musical instruments, and in consequence of its simplicity of form there is reason to suppose that the "pipe" of the Hebrews did not differ materially from that of the ancient Egyptians and Greeks. It is associated with the tabret (*tóph*) as an instrument of a peaceful and social character, just as in Shakespeare (*Much Ado*, ii. 3), "I have known when there was no music with him but the drum and fife, and now had he rather hear the *tabor* and the *pipe*" — the constant accompaniment of merriment and festivity (Luke vii. 32), and especially characteristic of "the *piping* time of peace." The pipe and tabret were used at the banquets of the Hebrews (Is. v. 12), and their bridal processions (Mishna, *Baba metsia*, vi. 1), and accompanied the simpler religious services, when the young prophets, returning from the high-place, caught their inspiration from the harmony (1 Sam. x. 5); or the pilgrims, on their way to the great festivals of their ritual, beguiled the weariness of the march with psalms sung to the simple music of the pipe (Is. xxx. 29). When Solomon was proclaimed king the whole people went up after him to Gihon, piping with pipes (1 K. i. 40). The sound of the pipe was apparently a soft wailing note, which made it appropriate to be used in mourning and at funerals (Matt. ix. 23), and in the lament of the prophet over the destruction of Moab (Jer. xlviii. 36). The pipe was the type of perforated wind instruments, as the harp was of stringed instruments (1 Mac. iii. 45), and was even used in the Temple-choir, as appears from Ps. lxxxvii. 7, where "the players on instruments" are properly "pipers." Twelve days in the year, according to the Mishna (*Avach.* ii. 3), the pipes sounded before the altar: at the slaying of the First Passover, the slaying of the Second Passover, the first feast-day of the Passover, the first feast-day of the Feast of Weeks, and the eight days of the Feast of Tabernacles. On the last-mentioned occasion the playing on pipes accompanied the drawing of water from the fountain of Siloah (*Succah*, iv. 1, v. 1) for five and six days. The pipes which were played before the altar were of reed, and not of copper or bronze, because the former gave a softer sound. Of these there were not less than two nor more than twelve. In later times the office of mourning at funerals became a profession, and the funeral and death-bed were never without the professional pipers or flute-players (*אַלְהָטָס*, Matt. ix. 23), a custom which still exists (comp. Ovid, *Fast.* vi. 660, "cantabat mæstis tibia funeribus"). It was incumbent on even the poorest Israelite, at the death of his wife, to provide at least two pipers and one woman to make lamentation. [MUSIC, vol. iii. p. 2039 b.]

In the social and festive life of the Egyptians the pipe played as prominent a part as among the Hebrews. While dinner was preparing, the party

<sup>a</sup> פִּינּוֹן: ἔβλον κυπαρίσσινον: *lignum pulcherrium*.

<sup>b</sup> 1. פִּינּוֹן: πτερύγιον: *angulus*.

2. פִּינּוֹן: πτερ.: *pinnula*.

3. פִּינּוֹן: πτερ.: *summitas*.

was enlivened by the sound of music; and a band, consisting of the harp, lyre, guitar, tambourine, double and single pipe, flute and other instruments, played the favorite airs and songs of the country" (Wilkinson, *Anc. Eg.* ii. 222). In the different combinations of instruments used in Egyptian bands, we generally find either the double pipe or the flute, and sometimes both; the former being played both by men and women, the latter exclusively by women. The Egyptian single pipe, as described by Wilkinson (*Anc. Eg.* ii. 308), was "a straight tube, without any increase at the mouth; and, when played, was held with both hands. It was of moderate length, apparently not exceeding a foot and a half, and many have been found much smaller; but these may have belonged to the peasants, without meriting a place among the instruments of the Egyptian band. . . . Some have three, others four holes. . . . and some were furnished with a small mouthpiece" of reed or thick straw. This instrument must have been something like the *Náy*, or dervish's flute, which is described by Mr. Lane (*Mod. Eg.* ii. chap. v.) as "a simple reed, about 18 inches in length, seven-eighths of an inch in diameter at the upper extremity, and three-quarters of an inch at the lower. It is pierced with six holes in front, and generally with another hole at the back. . . . In the hands of a good performer the *náy* yields fine, mellow tones; but it requires much practice to sound it well." The double pipe, which is found as frequently in Egyptian paintings as the single one, "consisted of two pipes, perhaps occasionally united together by a common mouthpiece, and played each with the corresponding hand. It was common to the Greeks and other people, and, from the mode of holding it, received the name of right and left pipe, the *tibia dextra* and *sinistra* of the Romans: the latter had but few holes, and, emitting a deep sound, served as a bass. The other had more holes, and gave a sharp tone" (Wilkinson, *Anc. Eg.* ii. 309, 310). It was played on chiefly by women, who danced as they played, and is imitated by the modern Egyptians, in their *zummará*, or double reed, a rude instrument, used principally by peasants and camel drivers out of doors (*ibid.* pp. 311, 312). In addition to these is also found in the earliest sculptures a kind of flute, held with both hands, and sometimes so long that the player was obliged to stretch his arms to their full length while playing.

Any of the instruments above described would have been called by the Hebrews by the general term *chálil*, and it is not improbable that they might have derived their knowledge of them from Egypt. The single pipe is said to have been the invention of the Egyptians alone, who attribute it to Osiris (Jul. Poll. *Onomast.* iv. 10), and as the material of which it was made was the lotus-wood (Ovid, *Fas.* iv. 190, "horrendo lotos adunca sono") there may be some foundation for the conjecture. Other materials mentioned by Julius Pollax are reed, brass, boxwood, and horn. Pliny (xvi. 66) adds silver, and the bones of asses. Bartenora, in his note on *Arachim*, ii. 3, above quoted, identifies the *chálil* with the French *chalumeau*, which is the German *schulmeie* and our *shawm* or *shalm*, of which the clarinet is a modern improvement. The *shawm*, says Mr. Chappell (*Pop. Mus.* i. 35, note 5), "was played with a reed like the wayte, or hautboy, but being a bass instrument, with about the compass of an octave, had probably more the

tone of a bassoon." This can scarcely be correct, or Drayton's expression, "the shrillest shawm" (*Polyol.* iv. 366), would be inappropriate.

W. A. W.

\* PIPER, Rev. xviii. 22. [MINSTREL; PIPE.]

PIRA (οἱ ἐκ Πειρᾶς [Vat., οἱ ἐκ Πίρας, Ald., Rom. Alex. omit]), 1 Esdr. v. 19. Apparently a repetition of the name CAPHIRA in the former part of the verse.

PIRAM (פִּרְאָם) [perh. fleet as the wild ass]; פִּדְוֹן; [Vat. Φειδών;] Alex. Φερααμ; [Copt. Φεραμ:] Pharam). The Amorite king of Jarmuth at the time of Joshua's conquest of Canaan (Josh. x. 3). With his four confederates he was defeated in the great battle before Gibeon, and fled for refuge to the cave at Makkedah, the entrance to which was closed by Joshua's command. At the close of the long day's slaughter and pursuit, the five kings were brought from their hiding-place, and hanged upon five trees till sunset, when their bodies were taken down and cast into the cave "wherein they had been hid" (Josh. x. 27).

PIR'ATHON (פִּרְעָתוֹן) [princely, Ges.]: [Vat.] Φαραθου; [Rom. Φαραθών;] Alex. Φαραθων; Pharathon), "in the land of Ephraim in the mount of the Amalekite;" a place named nowhere but in Judg. xii. 15, and there recorded only as the burial-place of Abdon ben-Hillel the Pirathonite, one of the Judges. Its site was not known to Eusebius or Jerome; but it is mentioned by the accurate old traveller hap-Parchi as lying about two hours west of Shechem, and called *Fer'ata* (Asher's *Benjamin of Tud.* ii. 426). Where it stood in the 14th century it stands still, and is called by the same name. It was reserved for Dr. Robinson to rediscover it on an eminence about a mile and a half south of the road from *Jaffa* by *Hableh* to *Nablus*, and just six miles, or two hours, from the last (Robinson, iii. 134).

Of the remarkable expression, "the mount (or mountain district) of the Amalekite," no explanation has yet been discovered beyond the probable fact that it commemorates a very early settlement of that roving people in the highlands of the country.

Another place of the same name probably existed near the south. But beyond the mention of PHARATHONI in 1 Macd. ix. 50, no trace has been found of it.

G.

PIR'ATHONITE (פִּרְעָתוֹנִי and פִּרְעָתוֹנִי) [patr. see above]: Φαραθωνίτης, Φαραθωνεί, ἐκ Φαραθῶν; Pharathonites), the native of, or dweller in, PIRATHON. Two such are named in the Bible. 1. [Φαραθωνίτης (Vat. -νει).] Abdon ben-Hillel (Judg. xii. 13, 15), one of the minor judges of Israel. In the original the definite article is present, and it should be rendered "the Pirathonite."

2. [Φαραθωνί (Vat. -νει), ἐκ Φαραθῶν; Pharathonites, Pharatonites.] From the same place came "Benaiah the Pirathonite of the children of Ephraim," captain of the eleventh monthly course of David's army (1 Chr. xxvii. 14) and one of the king's guard (2 Sam. xxiii. 30; 1 Chr. xi. 31).

G

PIS'GAH (הַפִּסְגָּה), with the def. article [the part, piece]: פֶּאָרְגָא, in Deut. iii. 17, xxxiv

is, and in Joshua; elsewhere τὸ λελαξευμένον<sup>a</sup> or ἡ λαξευή: Phasga). An ancient topographical name which is found, in the Pentateuch and Joshua only, in two connections.

1. The top, or head, of the Pisgah (פִּיֶּשֶׁת), Num. xxi. 20, xxiii. 14; Deut. iii. 27, xxiv. 1.

2. Ashdoh hap-Pisgah, perhaps the springs, or roots, of the Pisgah, Deut. iii. 17, iv. 49; Josh. xii. 3, xiii. 20.

The latter has already been noticed under its own head. [ASIDOTH-PISGAH.] Of the former but little can be said. "The Pisgah" must have been a mountain range or district, the same as, or a part of that called the mountains of Abarim (comp. Deut. xxxii. 49 with xxxiv. 1). It lay on the east of Jordan, contiguous to the field of Moab, and immediately opposite Jericho. The field of Zophim was situated on it, and its highest point or summit — its "head" — was the Mount Nebo. If it was a proper name we can only conjecture that it denoted the whole or part of the range of the highlands on the east of the lower Jordan. In the late Targums of Jerusalem and Pseudojonathan, Pisgah is invariably rendered by *ramath*,<sup>b</sup> a term in common use for a hill. It will be observed that the LXX. also do not treat it as a proper name. On the other hand Eusebius and Jerome (*Onomasticon*, "Abarim," "Fasga") report the name as existing in their day in its ancient locality. Mount Abarim and Mount Nabau were pointed out on the road leading from Livias to Heshbon (*i. e.* the *Wady Heshan*), still bearing their old names, and close to Mount Phogor (Peor), which also retained its name, whence, says Jerome (*à quo*), the contiguous region was even then called Phasgo. This connection between Phogor and Phasgo is puzzling, and suggests a possible error of copyists.

No traces of the name Pisgah have been met with in later times on the east of Jordan, but in the Arabic garb of *Ras el-Feshkah* (almost identical with the Hebrew Rosh hap-Pisgah) it is attached to a well-known headland on the north-western end of the Dead Sea, a mass of mountain bounded on the south by the *Wady en-Nar*, and on the north by the *Wady Sidr*, and on the northern part of which is situated the great Mussulman sanctuary of *Neby Mûsa* (Moses). This association of the names of Moses and Pisgah on the west side of the Dead Sea — where to suppose that Moses ever set foot would be to stultify the whole narrative of his decease — is extremely startling. No explanation of it has yet been offered. Certainly that of M. De Saucy and of his translator,<sup>c</sup> that the *Ras el-Feshkah* is identical with Pisgah, cannot be entertained. Against this the words of Deut. iii. 27, "Thou shalt not go over this Jordan," are decisive.

Had the name of Moses alone existed here, it might with some plausibility be conceived that the reputation for sanctity had been at some time, during the long struggles of the country, transferred from east to west, when the original spot was out of the reach of the pilgrims. But the existence of

the name *Feshkan* — and, what is equally curious, its non-existence on the east of Jordan — seems to preclude this suggestion. [NEBO, MOUNT, Amer. ed.] G.

PISIDIA (Πισιδία: *Pisidia*) was a district of Asia Minor, which cannot be very exactly defined. But it may be described sufficiently by saying that it was to the north of PAMPHYLIA, and stretched along the range of Taurus. Northwards it reached to, and was partly included in, PHRYGIA, which was similarly an indefinite district, though far more extensive. Thus ANTIOCH in PISIDIA was sometimes called a PHRYGIAN town. The occurrences which took place at this town give a great interest to St. Paul's first visit to the district. He passed through Pisidia twice, with Barnabas, on the first missionary journey, *i. e.* both in going from PERGA to ICONIUM (Acts xiii. 13, 14, 51), and in returning (xiv. 21, 24, 25; compare 2 Tim. iii. 11). It is probable also that he traversed the northern part of the district, with Silas and Timotheus, on the second missionary journey (xvi. 6): but the word Pisidia does not occur except in reference to the former journey. The characteristics both of the country and its inhabitants were wild and rugged; and it is very likely that the Apostle encountered here some of those "perils of robbers" and "perils of rivers" which he mentions afterwards. His routes through this region are considered in detail in *Life and Epp. of St. Paul* (2d ed. vol. i. pp. 197-207, 240, 241), where extracts from various travellers are given. J. S. H.

PISON (פִּיֶּשֶׁת) [*streaming, current, Ges.*]: [Rom. *φισών*; Alex. *φεισών*: *Phison*]. One of the four "heads" into which the stream flowing through Eden was divided (Gen. ii. 11). Nothing is known of it; the principal conjectures will be found under EDEN [vol. i. p. 656 f.].

PISPAH (פִּסְפָּה) [*expansion*]: *φασφα*; [Vat. *φασφαι*]: *Phaspha*. An Asherite: one of the sons of Jether, or Ithran (1 Chr. vii. 38).

PIT. In the A. V. this word appears with a figurative as well as a literal meaning. It passes from the facts that belong to the outward aspect of Palestine and its cities to states or regions of the spiritual world. With this power it is used to represent several Hebrew words, and the starting point which the literal meaning presents for the spiritual is, in each case, a subject of some interest.

1. *Shêl* (שֵׁל), in Num. xvi. 30, 33; Job xvii. 16. Here the word is one which is used only of the hollow, shadowy world, the dwelling of the dead, and as such it has been treated of under HELL.

2. *Shachuth* (שַׁחֲוֹת). Here, as the root שַׁחֲוֹת shows, the sinking of the pit is the primary thought (Gesen. *Theas. s. v.*). It is dug into the earth (Ps. ix. 15, cxix. 85). A pit thus made and then covered lightly over, served as a trap by which animals or men might be ensnared (Ps. xxxv. 7). It

<sup>a</sup> The singular manner in which the LXX. translators of the Pentateuch have fluctuated in their renderings of Pisgah between the proper name and the appellative, leads to the inference that their Hebrew text was different in some of the passages to ours. Mr. W. A. Wright has suggested that in the latter case they may have read פִּסְפָּה for פִּיֶּשֶׁת,

from פִּסְפָּה, a word which they actually translate by λαφεύειν in Ex. xxxiv. 1, 4, Deut. x. 1.

<sup>b</sup> Probably the origin of the marginal reading of the A. V. "the hill."

<sup>c</sup> See De Saucy's *Voyage*, etc., and the notes to it 60-66 of the English edition.

thus became a type of sorrow and confusion, from which a man could not extricate himself, of the great doom which comes to all men, of the dreariness of death (Job xxxiii. 18, 24, 28, 30). To "go down to the pit," is to die without hope. It is the penalty of evil-doers, that from which the righteous are delivered by the hand of God.

3. *Bôr* (בֹּרַר). In this word, as in the cognate *Bêér*, the special thought is that of a pit or well dug for water (Gesen. *Theo. s. v.*). The process of desynonymizing which goes on in all languages, seems to have confined the former to the state of the well or cistern, dug into the rock, but no longer filled with water. Thus, where the sense in both cases is figurative, and the same English word is used, we have pit (*beer*) connected with the "deep water," "the waterflood," "the deep" (Ps. lxx. 15), while in pit (= בֹּרַר), there is nothing but the "miry clay" (Ps. xl. 2). Its dreariest feature is that there is "no water" in it (Zech. ix. 11). So far the idea involved has been rather that of misery and despair than of death. But in the phrase "they that go down to the pit" (בֹּרַר), it becomes even more constantly than the synonyms already noticed (*Sheol*, *Shachath*), the representative of the world of the dead (Ez. xxxi. 14, 16, xxxii. 18, 24; Ps. xxviii. 1, cxliii. 7). There may have been two reasons for this transfer. 1. The wide, deep excavation became the place of burial. The "graves were set in the sides of the pit" (*bôr*) (Ez. xxxii. 24). To one looking into it it was visibly the home of the dead, while the vaguer, more mysterious *Sheol* carried the thoughts further to an invisible home. 2. The *pit*, however, in this sense, was never simply equivalent to burial-place. There is always implied in it a thought of scorn and condemnation. This too had its origin apparently in the use made of the excavations, which had either never been wells, or had lost the supply of water. The prisoner in the land of his enemies, was left to perish in the pit (*bôr*) (Zech. ix. 11). The greatest of all deliverances is that the captive exile is released from the slow death of starvation in it (*shachath*, Is. li. 14). The history of Jeremiah, cast into the dungeon, or pit (*bôr*) (Jer. xxxviii. 6, 9), let down into its depths with cords, sinking into the filth at the bottom (here also there is no water), with death by hunger staring him in the face, shows how terrible an instrument of punishment was such a pit. The condition of the Athenian prisoners in the stone quarries of Syracuse (Thuc. ii. 87), the Persian punishment of the σπόδος (Ctesias, *Pers.* 48), the oubliettes of mediæval prisons present instances of cruelty, more or less analogous. It is not strange that with these associations of material horror clustering round, it should have involved more of the idea of a place of punishment for the haughty or unjust, than did the *sheol*, the grave.

In Rev. ix. 1, 2, and elsewhere, the "bottomless pit," is the translation of τὸ φρέαρ τῆς ἀβύσσου. The A. V. has rightly taken φρέαρ here as the

equivalent of *bôr* rather than *beer*. The pit of the abyss is as a dungeon. It is opened with a key (Rev. ix. 1, xx. 1). Satan is cast into it, as a prisoner (xx. 3). E. H. P.

PITCH (פִּיֵּץ, פִּיֵּץ, פִּיֵּץ: πῖσσι: πῖα) The three Hebrew terms above given all represent the same object, namely, mineral pitch or asphalt, in its different aspects: *zepheth* (the *zift* of the modern Arabs, Wilkinson, *Anc. Eg.* ii. 120) in its liquid state, from a root signifying "to flow;" *chémâr*, in its solid state, from its red color, though also explained in reference to the manner in which it boils up (the former, however, being more consistent with the appearance of the two terms in juxtaposition in Ex. ii. 3; A. V. "pitch and slime"); and *copher*, in reference to its use in overlaying wood-work (Gen. vi. 14). Asphalt is an opaque, inflammable substance, which bubbles up from subterranean fountains in a liquid state, and hardens by exposure to the air, but readily melts under the influence of heat. In the latter state it is very tenacious, and was used as a cement in lieu of mortar in Babylonia (Gen. xi. 3; Strab. xvi. p. 743; Herod. i. 179), as well as for coating the outsides of vessels (Gen. vi. 14; Joseph. *B. J.* iv. 8, § 4), and particularly for making the papyrus boats of the Egyptians water-tight (Ex. ii. 3; Wilkinson, ii. 120). The Babylonians obtained their chief supply from springs at Is (the modern *Hit*), which are still in existence (Herod. i. 179). The Jews and Arabians got theirs in large quantities from the Dead Sea, which hence received its classical name of *Lacus Asphaltites*. The latter was particularly prized for its purple hue (Plin. xxviii. 23). In the early ages of the Bible the slime-pits (Gen. xiv. 10), or springs of asphalt, were apparent in the Vale of Siddim, at the southern end of the sea. They are now concealed through the submergence of the plain, and the asphalt probably forms itself into a crust on the bed of the lake, whence it is dislodged by earthquakes or other causes. Early writers describe the masses thus thrown up on the surface of the lake as of very considerable size (Joseph. *B. J.* iv. 8, § 4; Tac. *Hist.* v. 6; Diod. Sic. ii. 48). This is now a rare occurrence (Robinson, *Res.* i. 517), though small pieces may constantly be picked up on the shores. The inflammable nature of pitch is noticed in Is. xxxiv. 9. W. L. B.

PITCHER.<sup>a</sup> The word "pitcher" is used in A. V. to denote the water-jars or pitchers with one or two handles, used chiefly by women for carrying water, as in the story of Rebecca (Gen. xxiv. 15-20; but see Mark xiv. 13; Luke xxii. 10).<sup>b</sup> This practice has been and is still usual both in the East and elsewhere. The vessels used for the purpose are generally carried on the head or the shoulder. The Bedouin women commonly use skin-bottles. Such was the "bottle" carried by Hagar (Gen. xxi. 14; Harmer, *Obs.* iv. 246; Layard, *Nin. & Bab.* p. 578; Roberts, *Sketches*, pl. 164; Arvieux, *Trav.* p. 203; Burckhardt, *Notes on Bed.* i. 351).

only once a "pitcher" (Lam. iv. 2), where it is joined with פִּיֵּץ, an earthen vessel (Ges. 522).

3. In N. T. κεράμιον, twice only: Mark xiv. 13, 14; Luke xxii. 10, amphora.

<sup>b</sup> Hence the owner of the guest-chamber was far more readily known, as pointed out in note a, vol. II p. 1875. E.

a 1. פִּיֵּץ: ὑδρία, lagena; akin to Sanskrit *lut* and *kádor*. Also "barrel" (1 K. xvii. 12, xviii. 23). (Ges. p. 630; Eichhoff, *Vergleich. der Sprachen*, p. 119)

3. פִּיֵּץ and פִּיֵּץ: ἀγγεῖον: vas; A. V. "bottle,"

The same word *cad* is used of the pitchers employed by Gideon's 300 men (Judg. vii. 16), where the use made of them marks the material. Also the vessel (A. V. "barrel") in which the meal of the Sareptan widow was contained (1 K. xvii. 12), and the "barrels" of water used by Elijah at Mount Carmel (xviii. 33). [BARREL, Amer. ed.] It is also used figuratively of the life of man (Eccl. xii. 6). [FOUNTAIN; MEDICINE.] It is thus probable that earthen vessels were used by the Jews as they were by the Egyptians for containing both liquids and dry provisions (Birch, *Anc. Pottery*, i. 43). In the view of the Fountain of Nazareth [vol. i. p. 838], may be seen men and women with pitchers which scarcely differ from those in use in Egypt and Nubia (Roberts, *Sketches*, plates 29, 164). The water-pot of the woman of Samaria was probably one of this kind, to be distinguished from the much larger amphoræ of the marriage-feast at Cana. [FOUNTAIN; CRUSE; BOTTLE; FLAGON; POT.] H. W. P.

**PITHOM** (פִּיתוֹם) [see below]: Πιθῶ; [Alex. Πιθωμ:] *Phithom*, one of the store-cities built by the Israelites for the first oppressor, the Pharaoh "which knew not Joseph" (Ex. i. 11). In the Heb. these cities are two, Pithom and Raameses: the LXX. adds On, as a third. It is probable that Pithom lay in the most eastern part of Lower Egypt, like Raameses, if, as is reasonable, we suppose the latter to be the Raameses mentioned elsewhere, and that the Israelites were occupied in public works within or near to the land of Goshen. Herodotus mentions a town called Patumus, Πάτουμος, which seems to be the same as the Thoum or Thou of the *Itinerary* of Antoninus, probably the military station Thohu of the *Notitia*. Whether or not Patumus be the Pithom of Scripture, there can be little doubt that the name is identical. The first part is the same as in Bubastis and Bu-siris, either the definite article masculine, or a possessive pronoun, unless indeed, with Brugsch, we read the Egyptian word "abode" PA, and suppose that it commences these names. [PI-BESETH.] The second part appears to be the name of ATUM or TUM, a divinity worshipped at On, or Heliopolis, as well as Ra, both being forms of the sun [ON], and it is noticeable that Thoum or Thou was very near the Heliopolite nome, and perhaps more anciently within it, and that a monument at *Abou-Kesheyl* shows that the worship of Heliopolis extended along the valley of the Canal of the Red Sea. As we find Thoum and Patamus and Raameses in or near to the land of Goshen, there can be no reasonable doubt that we have here a correspondence to Pithom and Raameses, and the probable connection in both cases with Heliopolis confirms the conclusion. It is remarkable that the Coptic version of Gen. xvi. 23 mentions Pithom for, or instead of, the Heroöpolis of the LXX. The Hebrew reads, "And he sent Judah before him unto Joseph, to direct his face unto Goshen; and they came into the land of Goshen." Here the LXX. has, καθ' Ἡρώων πόλιν, εἰς γῆν Ραμεσσή, but the Coptic, Ⲅⲁⲓⲱⲱⲓ ⲦⲄⲀⲔⲒ ⲉⲛ ⲛⲕⲁⲉⲓⲓ ⲓⲣⲁⲱⲱⲚⲤⲤⲤ. Whether Patumus and Thoum be the same, and the position of one or both, have yet to be determined, before we can speak positively as to the Pithom of Exodus. Herodotus places Patumus

in the Arabian nome upon the Canal of the Red Sea (ii. 48). The *Itinerary* of Antoninus puts Thou 50 Roman miles from Heliopolis, and 48 from Pelusium; but this seems too far north for Patumus, and also for Pithom, if that place were near Heliopolis, as its name and connection with Raameses seem to indicate. Under Raameses is a discussion of the character of these cities, and of their importance in Egyptian history. [RAMESES.]

R. S. P.

\* Chabas (*Voyage d'un Égyptien*, p. 286) suggests the probable identity of *Pithom* and the *Etham* of Ex. xiii. 20: the initial *p* being simply the masculine singular of the article in Egyptian. But this seems to call for two cities or towers of the same name, in the same general locality, since there is good reason for placing the Pithom of Ex. i. 11, to the west of Raameses. The children of Israel would naturally assemble for the exodus at the point nearest the eastern desert; and their place of rendezvous was Raameses; nor would they be likely to encamp near a fortified city such as Pithom was. In his *Mélanges Égypt.* ii. 154, M. Chabas gives at length the arguments for the identification of Pithom with the Patumus of Herodotus, and with the ruins of *Abou-Kesheyl*. A thorough archaeological exploration of the Delta alone could determine these localities with certainty. This we may hope for when M. Mariette shall have finished his most rewarding work in the Nile valley. The Patumus of Herodotus lay upon the canal that joined the Nile to the Bitter Lakes, and the sweet-water canal of Lesseps, by restoring fertility to the ancient Goshen, and inviting thither a permanent population, may give occasion for discoveries that shall illustrate and confirm the history of Israel in Egypt. J. P. T.

**PITHON** (פִּיתוֹן) [*harmless*, Fürst]: פִּיתוֹן; [in ix. 41, Vat. Sin. פִּיתוֹן:] *Phithon*. One of the four sons of Micah, the son of Meribbaal, or Mephibosheth (1 Chr. viii. 35, ix. 41).

**PLAGUE, THE.** The disease now called the Plague, which has ravaged Egypt and neighboring countries in modern times, is supposed to have prevailed there in former ages. Manetho, the Egyptian historian, speaks of "a very great plague" in the reign of Semempses, the seventh king of the first dynasty, B. C. cir. 2500. The difficulty of determining the character of the pestilences of ancient and mediæval times, even when carefully described, warns us not to conclude that every such mention refers to the Plague, especially as the cholera has, since its modern appearance, been almost as severe a scourge to Egypt as the more famous disease, which, indeed, as an epidemic seems there to have been succeeded by it. Moreover, if we admit, as we must, that there have been anciently pestilences very nearly resembling the modern Plague, we must still hesitate to pronounce any recorded pestilence to be of this class unless it be described with some distinguishing particulars.

The Plague in recent times has not extended far beyond the Turkish Empire and the kingdom of Persia. It has been asserted that Egypt is its cradle, but this does not seem to be corroborated by the later history of the disease. It is there both sporadic and epidemic; in the first form it has appeared almost annually, in the second at rarer intervals. As an epidemic it takes the character of a pestilence, sometimes of the greatest severity. Our subsequent remarks apply to it in this form.

It is a much-vexed question whether it is ever endemic: that such is the case is favored by its rareness since sanitary measures have been enforced.

The Plague when most severe usually appears first on the northern coast of Egypt, having previously broken out in Turkey or North Africa west of Egypt. It ascends the river to Cairo, rarely going much further. Thus Mr. Lane has observed that the great plague of 1835 "was certainly introduced from Turkey" (*Modern Egyptians*, 5th ed. p. 3, note 1). It was first noticed at Alexandria, ascended to Cairo, and further to the southern part of Egypt, a few cases having occurred at Thebes; and it "extended throughout the whole of Egypt, though its ravages were not great in the southern parts" (*Ibid.*). The mortality is often enormous, and Mr. Lane remarks of the plague just mentioned: "It destroyed not less than eighty thousand persons in Cairo, that is, one-third of the population; and far more, I believe, than two hundred thousand in all Egypt" (*Ibid.*).<sup>a</sup> The writer was in Cairo on the last occasion when this pestilence visited Egypt, in the summer of 1843, when the deaths were not numerous, although, owing to the Government's posting a sentry at each house in which any one had died of the disease, to enforce quarantine, there was much concealment, and the number was not accurately known (Mrs. Poole, *Englishwoman in Egypt*, ii. 32-35). Although since then Egypt has been free from this scourge, Bēghāzēe (Hesperides), in the pashalic of Tripoli, was almost depopulated by it during part of the years 1860 and 1861. It generally appears in Egypt in midwinter, and lasts at most for about six months.

The Plague is considered to be a severe kind of typhus, accompanied by buboes. Like the cholera it is most violent at the first outbreak, causing almost instant death; later it may last three days, and even longer, but usually it is fatal in a few hours. It has never been successfully treated except in isolated cases or when the epidemic has seemed to have worn itself out. Depletion and stimulants have been tried, as with cholera, and stimulants with far better results. Great difference of opinion has obtained as to whether it is contagious or not. Instances have, however, occurred in which no known cause except contagion could have conveyed the disease.

In noticing the places in the Bible which might be supposed to refer to the Plague we must bear in mind that, unless some of its distinctive characteristics are mentioned, it is not safe to infer that this disease is intended.

In the narrative of the Ten Plagues there is, as we point out below [p. 2542, a], none corresponding to the modern Plague. The plague of boils has indeed some resemblance, and it might be urged that, as in other cases known scourges were sent (their miraculous nature being shown by their opportune occurrence and their intense character), so in this case a disease of the country, if indeed the Plague anciently prevailed in Egypt, might have been employed. Yet the ordinary Plague would rather exceed in severity this infliction than the contrary, which seems fatal to this supposition. [PLAGUES, THE FEN.]

<sup>a</sup> A curious story connected with this plague is given in the notes [of Mr. Lane] to the *Thousand and One Nights*, ch. iii.

Several Hebrew words are translated "pestilence" or "plague." (1.)  $\text{מַדְבָּר}$ , properly "destruction," hence "a plague;" in LXX. commonly *θάνατος*. It is used with a wide signification for different pestilences, being employed even for murrain in the account of the plague of murrain (Ex. ix. 3). (2.)  $\text{מָוֶת}$ , properly "death," hence "a deadly disease, pestilence." Gesenius compares the *Schwarzer Tod*, or Black Death, of the middle ages. (3.)  $\text{הַמָּוֶת}$  and  $\text{מַדְבָּר}$ , properly anything with which people are smitten, especially by God, therefore a plague or pestilence sent by Him. (4.)  $\text{מַדְבָּר}$ , "pestilence" (Deut. xxxii. 24, A. V. "destruction"; Ps. xci. 6, "the pestilence [that] walketh in darkness"), and perhaps also  $\text{מָוֶת}$ , if we follow Gesenius, instead of reading with the A. V. "destruction," in Hos. xiii. 14. (5.)  $\text{הַמָּוֶת}$ , properly "a flame," hence "a burning fever," "a plague" (Deut. xxxii. 24; Hab. iii. 5, where it occurs with  $\text{מָוֶת}$ ). It is evident that not one of these words can be considered as designating by its signification the Plague. Whether the disease be mentioned must be judged from the sense of passages, not from the sense of words.

Those pestilences which were sent as special judgments, and were either supernaturally rapid in their effects, or in addition directed against particular culprits, are beyond the reach of human inquiry. But we also read of pestilences which, although sent as judgments, have the characteristics of modern epidemics, not being rapid beyond nature, nor directed against individuals. Thus in the remarkable threatenings in Leviticus and Deuteronomy, pestilence is spoken of as one of the enduring judgments that were gradually to destroy the disobedient. This passage in Leviticus evidently refers to pestilence in besieged cities: "And I will bring a sword upon you, that shall avenge the quarrel of [my] covenant: and when ye are gathered together within your cities, I will send the pestilence among you; and ye shall be delivered into the hand of the enemy" (xxvi. 25). Famine in a besieged city would occasion pestilence. A special disease may be indicated in the parallel portion of Deuteronomy (xxviii. 21): "The Lord shall make the pestilence cleave unto thee, until he [for "it"] have consumed thee from off the land whither thou goest to possess it." The word rendered "pestilence" may, however, have a general signification, and comprise calamities mentioned afterwards, for there follows an enumeration of several other diseases and similar scourges (xxviii. 21, 22). The first disease here mentioned, has been supposed to be the Plague (Bunsen, *Bibelwerk*). It is to be remembered that "the botch of Egypt" is afterwards spoken of (27), by which it is probable that ordinary boils are intended, which are especially severe in Egypt in the present day, and that later still "all the diseases of Egypt" are mentioned (60). It therefore seems unlikely that so grave a disease as the Plague, if then known, should not be spoken of in either of these two passages. In neither place does it seem certain that the Plague is specified, though, in the one, if it were to be in the land it would fasten upon the population of besieged cities, and in the other, if then known, it would probably be alluded to as a terrible judgment in an enumeration of dis-

nares. The notices in the prophets present the same difficulty; for they do not seem to afford sufficiently positive evidence that the Plague was known in those times. With the prophets, as in the Pentateuch, we must suppose that the diseases threatened or prophesied as judgments must have been known, or at least called by the names used for those that were known. Two passages might seem to be explicit. In Amos we read, "I have sent among you the pestilence after the manner of Egypt: your young men have I slain with the sword, and have taken away your horses; and I have made the stink of your camps to come up unto your nostrils" (Am. iv. 10). Here the reference is perhaps to the death of the firstborn, for the same phrase, "after the manner of Egypt," is used by Isaiah (x. 24, 26), with a reference to the Exodus, and perhaps to the oppression preceding it; and an allusion to past history seems probable, as a comparison with the overthrow of the cities of the plain immediately follows (Am. iv. 11). The prophet Zechariah also speaks of a plague with which the Egyptians, if refusing to serve God, should be smitten (xiv. 18), but the name, and the description which appears to apply to this scourge, seem to show that it cannot be the Plague (12).

Hezekiah's disease has been thought to have been the plague, and its fatal nature, as well as the mention of a boil, makes this not improbable. On the other hand, there is no mention of a pestilence among his people at the time.

There does not seem, therefore, to be any distinct notice of the Plague in the Bible, and it is most probable that this can be accounted for by supposing either that no pestilence of antiquity in the East was as marked in character as the modern Plague, or that the latter disease then frequently broke out there as an epidemic in crowded cities, instead of following a regular course.

(See Russell's *Natural History of Aleppo*; Clot-Bey, *De la Peste*, and *Aperçu Général sur l'Égypte*, ii. 348-350.) R. S. P.

**PLAGUES, THE TEN.** In considering the history of the Ten Plagues we have to notice the place where they occurred, and the occasion on which they were sent, and to examine the narrative of each judgment, with a view to ascertain what it was, and in what manner Pharaoh and the Egyptians were punished by it, as well as to see if we can trace any general connection between the several judgments.

I. *The Plague.* — Although it is distinctly stated that the plagues prevailed throughout Egypt, save, in the case of some, the Israelite territory, the land of Goshen, yet the descriptions seem principally to apply to that part of Egypt which lay nearest to Goshen, and more especially to "the field of Zoan," or the tract about that city, since it seems almost certain that Pharaoh dwelt in Zoan, and that territory is especially indicated in Ps. lxxviii. 43. That the capital at this time was not more distant from Rameses than Zoan is evident from the time in which a message could be sent from Pharaoh to Moses on the occasion of the Exodus. The descriptions of the first and second plagues seem especially to refer to a land abounding in streams and lakes, and so rather to the lower than to the upper country. We must therefore look especially to Lower Egypt for our illustrations, while bearing in mind the evident prevalence of the plagues throughout the land.

II. *The Occasion.* — When that Pharaoh who seems to have been the first oppressor was dead, God sent Moses to deliver Israel, commanding him to gather the elders of his people together, and to tell them his commission. It is added, "And they shall hearken to thy voice: and thou shalt come, thou and the elders of Israel, unto the king of Egypt, and ye shall say unto him, The LORD God of the Hebrews hath met with us: and now let us go, we beseech thee, three days' journey into the wilderness, that we may sacrifice to the LORD our God. And I am sure that the king of Egypt will not let you go, no, not by a mighty hand. And I will stretch out my hand, and smite Egypt with all my wonders which I will do in the midst thereof: and after that he will let you go" (Ex. iii. 18-20). From what follows, that the Israelites should borrow jewels and raiment, and "spoil Egypt" (21, 22), it seems evident that they were to leave as if only for the purpose of sacrificing; but it will be seen that if they did so, Pharaoh, by his armed pursuit and overtaking them when they had encamped at the close of the third day's journey, released Moses from his engagement.

When Moses went to Pharaoh, Aaron went with him, because Moses, not judging himself to be eloquent, was diffident of speaking to Pharaoh. "And Moses said before the LORD, Behold, I [am] of uncircumcised lips, and how shall Pharaoh hearken unto me? And the LORD said unto Moses, See, I have made thee a god to Pharaoh: and Aaron thy brother shall be thy prophet" (Ex. vi. 30, vii. 1; comp. iv. 10-16). We are therefore to understand that even when Moses speaks it is rather by Aaron than himself. It is perhaps worthy of note that in the tradition of the Exodus which Manetho gives, the calamities preceding the event are said to have been caused by the king's consulting an Egyptian prophet; for this suggests a course which Pharaoh is likely to have adopted, rendering it probable that the magicians were sent for as the priests of the gods of the country, so that Moses was exalted by contrast with these vain objects of worship. We may now examine the narrative of each plague.

III. *The Plagues.* — 1. *The Plague of Blood.* When Moses and Aaron came before Pharaoh, a miracle was required of them. Then Aaron's rod became "a serpent" (A. V.), or rather "a crocodile" (כִּנֹּחַ). Its being changed into an animal revered by all the Egyptians, or by some of them, would have been an especial warning to Pharaoh. The Egyptian magicians called by the king produced what seemed to be the same wonder, yet Aaron's rod swallowed up the others (vii. 3-12). This passage, taken alone, would appear to indicate that the magicians succeeded in working wonders; but, if it is compared with those others relating their opposition on the occasions of the first three plagues, a contrary inference seems more reasonable. In this case the expression, "they also did in like manner with their enchantments" (11) is used, and it is repeated in the cases of their seeming success on the occasions of the first plague (22), and the second (viii. 7), as well as when they failed on the occasion of the third plague (18). A comparison with other passages strengthens us in the inference that the magicians succeeded merely by juggling. [MAGIC.] Yet, even if they were able to produce any real effects by magic, a broad distinction should be drawn between the

general and powerful nature of the wonders wrought by the hand of Moses and Aaron and their partial and weak imitations. When Pharaoh had refused to let the Israelites go, Moses was sent again, and, on the second refusal, was commanded to smite upon the waters of the river and to turn them and all the waters of Egypt into blood. The miracle was to be wrought when Pharaoh went forth in the morning to the river. Its general character is very remarkable, for not only was the water of the Nile smitten, but all the water, even that in vessels, throughout the country. The fish died, and the river stank. The Egyptians could not drink of it, and digged around it for water. This plague appears to have lasted seven days, for the account of it ends, "And seven days were fulfilled, after that the LORD had smitten the river" (vii. 13-25), and the narrative of the second plague immediately follows, as though the other had then ceased. Some difficulty has been occasioned by the mention that the Egyptians digged for water, but it is not stated that they so gained what they sought, although it may be conjectured that only the water that was seen was smitten, in order that the nation should not perish. This plague was doubtfully humiliating to the religion of the country, as the Nile was held sacred, as well as some kinds of its fish, not to speak of the crocodiles, which probably were destroyed. It may have been a marked reproof for the cruel edict that the Israelite children should be drowned, and could scarcely have failed to strike guilty consciences as such, though Pharaoh does not seem to have been alarmed by it. He saw what was probably an imitation wrought by the magicians, who accompanied him, as if he were engaged in some sacred rites, perhaps connected with the worship of the Nile. Events having some resemblance to this are mentioned by ancient writers: the most remarkable is related by Manetho, according to whom it was said that, in the reign of Nephhercheres, seventh king of the 11d dynasty, the Nile flowed mixed with honey for eleven days. Some of the historical notices of the earliest dynasties seem to be of very doubtful authenticity, and Manetho seems to treat this one as a fable, or, perhaps as a tradition. Nephhercheres, it must be remarked, reigned several hundred years before the Exodus. Those who have endeavored to explain this plague by natural causes, have referred to the changes of color to which the Nile is subject, the appearance of the Red Sea, and the so-called rain and dew of blood of the Middle Ages; the last two occasioned by small fungi of very rapid growth. But such theories do not explain why the wonder happened at a time of year when the Nile is most clear, nor why it killed the fish and made the water unfit to be drunk. These are the really weighty points, rather than the change into blood, which seems to mean a change into the semblance of blood. The employment of natural means in effecting a miracle is equally seen in the passage of the Red Sea: but the Divine power is proved by the intensifying or extending that means, and the opportune occurrence of the result, and its fitness for a great moral purpose.

2. *The Plague of Frogs.*—When seven days had passed after the smiting of the river, Pharaoh was threatened with another judgment, and, on his refusing to let the Israelites go, the second plague was sent. The river and all the open waters of Egypt brought forth countless frogs, which not

only covered the land, but filled the houses, even in their driest parts and vessels, for the ovens and kneading-troughs are specified. The magicians again had a seeming success in their opposition; yet Pharaoh, whose very palaces were filled by the reptiles, entreated Moses to pray that they might be removed, promising to let the Israelites go; but, on the removal of the plague, again hardened his heart (vii. 25, viii. 1-15). This must have been an especially trying judgment to the Egyptians, as frogs were included among the sacred animals, probably not among those which were revered throughout Egypt, like the cat, but in the second class of local objects of worship, like the crocodile. The frog was sacred to the goddess HEKT, who is represented with the head of this reptile. In hieroglyphics the frog signifies "very many," "millions," doubtless from its abundance. In the present day frogs abound in Egypt, and in the summer and autumn their loud and incessant croaking in all the waters of the country gives some idea of this plague. They are not, however, heard in the spring, nor is there any record, excepting the Biblical one, of their having been injurious to the inhabitants. It must be added that the supposed cases of the same kind elsewhere, quoted from ancient authors, are of very doubtful authenticity.

3. *The Plague of Lice.*—The account of the third plague is not preceded by the mention of any warning to Pharaoh. We read that Aaron was commanded to stretch out his rod and smite the dust, which became, as the A. V. reads the word, "lice" in man and beast. The magicians again attempted opposition; but, failing, confessed that the wonder was of God (viii. 16-19). There is much difficulty as to the animals meant by the term לָצָע. The Masoretic punctuation is לָצָעִים, which would probably make it a collective noun with לָצָע formative; but the plural form לָצָעִים also occurs (ver. 16 [Heb. 12]; Ps. cv. 31), of which we once find the singular לָצָע in Isaiah (li. 6). It is therefore reasonable to conjecture that the first form should be punctuated לָצָעִים, as the defective writing of לָצָעִים; and it should also be

observed that the Samaritan has לָצָעִים. The LXX. has σκνίφες, and the Vulg. sciniphes, mosquitoes, mentioned by Herodotus (ii. 95), and Philo (*De Vita Mosis*, i. 20, p. 97, ed. Mang.), as troublesome in Egypt. Josephus, however, makes the לָצָע lice (*Ant.* ii. 14, § 3), with which Bochart agrees (*Hieroz.* ii. 572 ff.). The etymology is doubtful, and perhaps the word is Egyptian. The narrative does not enable us to decide which is the more probable of the two renderings, excepting, indeed, that if it be meant that exactly the same kind of animal attacked man and beast, mosquitoes would be the more likely translation. In this case the plague does not seem to be especially directed against the superstitions of the Egyptians: if, however, it were of lice, it would have been most distressing to their priests, who were very cleanly apparently, like the Muslims, as a religious duty. In the present day both mosquitoes and lice are abundant in Egypt: the latter may be avoided but there is no escape from the former, which are so distressing an annoyance that an increase of

them would render life almost insupportable to beasts as well as men.

4. *The Plague of Flies.* — In the case of the fourth plague, as in that of the first, Moses was commanded to meet Pharaoh in the morning as he came forth to the water, and to threaten him with a judgment if he still refused to give the Israelites leave to go and worship. He was to be punished by **צִרְיָה**, which the A. V. renders "swarms [of flies]," "a swarm [of flies]," or, in the margin, "a mixture [of noisome beasts]." These creatures were to cover the people, and fill both the houses and the ground. Here, for the first time, we read that the land of Goshen, where the Israelites dwelt, was to be exempt from the plague. So terrible was it that Pharaoh granted permission for the Israelites to sacrifice in the land, which Moses refused to do, as the Egyptians would stone his people for sacrificing their "abomination." Then Pharaoh gave them leave to sacrifice in the wilderness, provided they did not go far; but, on the plague being removed, broke his agreement (viii. 20-32). The

proper meaning of the word **צִרְיָה**, is a question of extreme difficulty. The explanation of Josephus (*Ant.* ii. 14, § 3), and almost all the Hebrew commentators, is that it means "a mixture," and here designates a mixture of wild animals, in accordance

with the derivation from the root **צִרַץ**, "he mixed." Similarly, Jerome renders it *omne genus muscarum*, and Aquila *πάρμυια*. The LXX., however, and Philo (*De Vita Moysis*, i. 23, ii. 101, ed. Mang.) suppose it to be a dog-fly, *κυνόμυια*. The second of these explanations seems to be a compromise between the first and the third. It is almost certain, from two passages (Ex. viii. 29, 31; Hebrew, 25, 27), that a single creature is intended. If so, what reason is there in favor of the LXX. rendering? Oedmann (*Vern. Sammlungen*, ii. 150, ap. Ges. *Thes.* s. v.) proposes the *blatta orientalis*, a kind of beetle, instead of a dog-fly; but Gesenius objects that this creature devours things rather than stings men, whereas it is evident that the animal of this plague attacked or at least annoyed men, besides apparently injuring the land. From Ps. lxxviii. 45, where we read, "He sent the

**צִרְיָה**, which devoured them," it must have been a creature of devouring habits, as is observed by Kalisch (*Comment. on Exod.* p. 138), who supports the theory that a beetle is intended. The Egyptian language might be hoped to give us a clue to the rendering of the LXX. and Philo. In hieroglyphics a fly is Af, and a bee SHEB, or KHEB, SH and KH being interchangeable, in different dialects; and in Coptic these two words are confounded in **ⲁⲃⲈ**, **ⲁⲃⲈ**, **ⲁⲃⲈ**, **ⲉⲃⲈ**, *musca, apis, scarabæus*. We can therefore only judge from the description of the plague; and here Gesenius seems to have too hastily decided against the rendering "beetle," since the beetle sometimes attacks men. Yet our experience does not bear out the idea that any kind of beetle is injurious to man in Egypt; but there is a kind of gad-fly found in that country which sometimes stings men, though usually attacking beasts. The difficulty, however, in the way of the supposition that a winged fly is meant is that all such flies are, like this one, plagues to beasts rather than men; and if we conjecture that a fly is intended, perhaps it is more reasonable to infer that it was the common

fly, which in the present day is probably the most troublesome insect in Egypt. That this was a more severe plague than those preceding it, appears from its effect on Pharaoh, rather than from the mention of the exemption of the Israelites, for it can scarcely be supposed that the earlier plagues affected them. As we do not know what creature is here intended, we cannot say if there were any reference in this case to the Egyptian religion. Those who suppose it to have been a beetle might draw attention to the great reverence in which that insect was held among the sacred animals, and the consequent distress that the Egyptians would have felt at destroying it, even if they did so unintentionally. As already noticed, no insect is now so troublesome in Egypt as the common fly, and this is not the case with any kind of beetle, which fact, from our general conclusions, will be seen to favor the evidence for the former. In the hot season the flies not only cover the food and drink, but they torment the people by settling on their faces, and especially round their eyes, thus promoting ophthalmia.

5. *The Plague of the Murrain of Beasts.* — Pharaoh was next warned that, if he did not let the people go, there should be on the day following "a very grievous murrain," upon the horses, asses, camels, oxen, and sheep of Egypt, whereas those of the children of Israel should not die. This came to pass, and we read that "all the cattle of Egypt died; but of the cattle of the children of Israel died not one." Yet Pharaoh still continued obstinate (Ex. ix. 1-7). It is to be observed that the expression "all the cattle" cannot be understood to be universal, but only general, for the narrative of the plague of hail shows that there were still at a later time some cattle left, and that the want of universal terms in Hebrew explains this seeming difficulty. The mention of camels is important, since it appears to favor our opinion that the Pharaoh of the Exodus was a foreigner, camels apparently not having been kept by the Egyptians of the time of the Pharaohs. This plague would have been a heavy punishment to the Egyptians as falling upon their sacred animals of two of the kinds specified, the oxen and the sheep; but it would have been most felt in the destruction of the greatest part of their useful beasts. In modern times murrain is not an unfrequent visitation in Egypt, and is supposed to precede the plague. The writer witnessed a very severe murrain in that country in 1842, which lasted nine months, during the latter half of that year and the spring of the following one, and was succeeded by the plague, as had been anticipated (Mrs. Poole, *Englishwoman in Egypt*, ii. 32, i. 59, 114). "A very grievous murrain," forcibly reminding us of that which visited this same country in the days of Moses, has prevailed during the last three months" — the letter is dated October 18th, 1842 —, "and the already distressed peasants feel the calamity severely, or rather (I should say) the few who possess cattle. Among the rich men of the country, the loss has been enormous. During our voyage up the Nile" in the July preceding, "we observed several dead cows and buffaloes lying in the river, as I mentioned in a former letter; and some friends who followed us, two months after, saw many on the banks; indeed, up to this time, great numbers of cattle are dying in every part of the country" (*Id.* i. 114, 115). The similarity of the calamity in character is remarkably in contrast with its difference in dura-

tion: the miraculous murrain seems to have been as sudden and nearly as brief as the destruction of the first-born (though far less terrible), and to have therefore produced, on ceasing, less effect than other plagues upon Pharaoh, nothing remaining to be removed.

6. *The Plague of Boils.* — The next judgment appears to have preceded by no warning, excepting indeed that, when Moses publicly sent it abroad in Egypt, Pharaoh might no doubt have repented at the last moment. We read that Moses and Aaron were to take ashes of the furnace, and Moses was to "sprinkle it toward the heaven in the sight of Pharaoh." It was to become "small dust" throughout Egypt, and "be a boil breaking forth [with] blains upon man, and upon beast." This accordingly came to pass. The magicians now once more seem to have attempted opposition, for it is related that they "could not stand before Moses because of the boil: for the boil was upon the magicians, and upon all the Egyptians." Notwithstanding, Pharaoh still refused to let the Israelites go (ix. 8-12). This plague may be supposed to have been either an infliction of boils, or a pestilence like the plague of modern times, which is an extremely severe kind of typhus fever, accompanied by swellings. [PLAGUE.] The former is, however, the more likely explanation, since, if the plague had been of the latter nature, it probably would have been less severe than the ordinary pestilence of Egypt has been in this nineteenth century, whereas with other plagues which can be illustrated from the present phenomena of Egypt, the reverse is the case. That this plague followed that of the murrain seems, however, an argument on the other side, and it may be asked whether it is not likely that the great pestilence of the country, probably known in antiquity, would have been one of the ten plagues; but to this it may be replied that it is more probable, and in accordance with the whole narrative, that extraordinary and unexpected wonders should be effected than what could be paralleled in the history of Egypt. The tenth plague, moreover, is so much like the great Egyptian disease in its suddenness, that it might rather be compared to it if it were not so wholly miraculous in every respect as to be beyond the reach of human inquiry. The position of the magicians must be noticed as indicative of the gradation of the plagues: at first they succeeded, as we suppose, by deception, in imitating what was wrought by Moses, then they failed, and acknowledged the finger of God in the wonders of the Hebrew prophet, and at last they could not even stand before him, being themselves smitten by the plague he was commissioned to send.

7. *The Plague of Hail.* — The account of the seventh plague is preceded by a warning, which Moses was commanded to deliver to Pharaoh, respecting the terrible nature of the plagues that were to ensue if he remained obstinate. And first of all of the hail it is said, "Behold, to-morrow about this time, I will cause it to rain a very grievous hail, such as hath not been in Egypt since the foundation thereof even until now." He was then told to collect his cattle and men into shelter, for that everything hailed upon should die. Accordingly, such of Pharaoh's servants as "feared the LORD," brought in their servants and cattle from the field. We read that "Moses stretched forth his rod toward heaven: and the LORD sent thunder and hail, and the fire ran along upon the

ground." Thus man and beast were smitten, and the herbs and every tree broken, save in the land of Goshen. Upon this Pharaoh acknowledged his wickedness and that of his people, and the righteousness of God, and promised if the plague were withdrawn to let the Israelites go. Then Moses went forth from the city, and spread out his hands, and the plague ceased, when Pharaoh, supported by his servants, again broke his promise (ix. 13-35). The character of this and the following plagues must be carefully examined, as the warning seems to indicate an important turning-point. The ruin caused by the hail was evidently far greater than that effected by any of the earlier plagues; it destroyed men, which those others seem not to have done, and not only men but beasts and the produce of the earth. In this case Moses, while addressing Pharaoh, openly warns his servants how to save something from the calamity. Pharaoh for the first time acknowledges his wickedness. We also learn that his people joined with him in the oppression, and that at this time he dwelt in a city. Hail is now extremely rare, but not unknown, in Egypt, and it is interesting that the narrative seems to imply that it sometimes falls there. Thunder-storms occur, but, though very loud and accompanied by rain and wind, they rarely do serious injury. We do not remember to have heard while in Egypt of a person struck by lightning, nor of any ruin excepting that of decayed buildings washed down by rain.

8. *The Plague of Locusts.* — Pharaoh was now threatened with a plague of locusts, to begin the next day, by which everything the hail had left was to be devoured. This was to exceed any like visitations that had happened in the time of the king's ancestors. At last Pharaoh's own servants, who had before supported him, remonstrated, for we read: "And Pharaoh's servants said unto him, How long shall this man be a snare unto us? Let the men go, that they may serve the LORD their God: knowest thou not yet that Egypt is destroyed?" Then Pharaoh sent for Moses and Aaron, and offered to let the people go, but refused when they required that all should go, even with their flocks and herds: "And Moses stretched forth his rod over the land of Egypt, and the LORD brought an east wind upon the land all that day, and all [that] night; [and] when it was morning, the east wind brought the locusts. And the locusts went up over all the land of Egypt, and rested in all the coasts of Egypt: very grievous [were they]; before them there were no such locusts as they, neither after them shall be such. For they covered the face of the whole earth, so that the land was darkened; and they did eat every herb of the land, and all the fruit of the trees which the hail had left: and there remained not any green thing in the trees, or in the herbs of the field, through all the land of Egypt." Then Pharaoh hastily sent for Moses and Aaron and confessed his sin against God and the Israelites, and begged them to forgive him. "Now therefore forgive, I pray thee, my sin only this once, and intreat the LORD your God, that He may take away from me this death only." Moses accordingly prayed. "And the LORD turned a mighty strong west wind, which took away the locusts, and cast them into the Red Sea; there remained not one locust in all the coasts of Egypt." The plague being removed Pharaoh again would not let the people go (x. 1-

10). This plague has not the unusual nature of the one that preceded it, but it even exceeds it in severity, and so occupies its place in the gradation of the more terrible judgments that form the later part of the series. Its severity can be well understood by those who, like the writer, have been in Egypt in a part of the country where a flight of locusts has alighted. In this case the plague was greater than an ordinary visitation, since it extended over a far wider space, rather than because it was more intense; for it is impossible to imagine any more complete destruction than that always caused by a swarm of locusts. So well did the people of Egypt know what these creatures effected, that, when their coming was threatened, Pharaoh's servants at once remonstrated. In the present day locusts suddenly appear in the cultivated land, coming from the desert in a column of great length. They fly rapidly across the country, darkening the air with their compact ranks, which are undisturbed by the constant attacks of kites, crows, and vultures, and making a strange whizzing sound like that of fire, or many distant wheels. Where they alight they devour every green thing, even stripping the trees of their leaves. Rewards are offered for their destruction, but no labor can seriously reduce their numbers. Soon they continue their course, and disappear gradually in a short time, leaving the place where they have been a desert. We speak from recollection, but we are permitted to extract a careful description of the effects of a flight of locusts from Mr. Lane's manuscript notes. He writes of Nubia: "Locusts not unfrequently commit dreadful havoc in this country. In my second voyage up the Nile, when before the village of Boostán, a little above Ibreem, many locusts pitched upon the boat. They were beautifully variegated, yellow and blue. In the following night a southerly wind brought other locusts, in immense swarms. Next morning the air was darkened by them, as by a heavy fall of snow; and the surface of the river was thickly scattered over by those which had fallen and were unable to rise again. Great numbers came upon and within the boat, and alighted upon our persons. They were different from those of the preceding day; being of a bright yellow color, with brown marks. The desolation they made was dreadful. In four hours a field of young durah [millet] was cropped to the ground. In another field of durah more advanced only the stalks were left. Nowhere was there space on the ground to set the foot without treading on many. A field of cotton-plants was quite stripped. Even the acacias along the banks were made bare, and palm-trees were stripped of the fruit and leaves. Last night we heard the creaking of the sákiyehs [water-wheels], and the singing of women driving the cows which turned them: to-day not one sákiyeh was in motion, and the women were going about howling, and vainly attempting to frighten away the locusts. On the preceding day I had preserved two of the more beautiful kind of these creatures with a solution of arsenic: on the next day some of the other locusts ate them almost entirely, poisoned as they were, unseen by me till they had nearly finished their meal. On the third day they were less numerous, and gradually disappeared. Locusts are eaten by most of the Bedawees of Arabia, and by some of the Nubians. We ate a few, dressed in the most approved manner, being stripped of the legs, wings, and head, and fried in

butter. They had a flavor somewhat like that of the woodcock, owing to their food. The Arabs preserve them as a common article of provision by parboiling them in salt and water, and then drying them in the sun."

The parallel passages in the prophecy of Joel form a remarkable commentary on the description of the plague in Exodus, and a few must be here quoted, for they describe with wonderful exactness and vigor the devastations of a swarm of locusts. "Blow ye the trumpet in Zion, and sound an alarm in my holy mountain: let all the inhabitants of the land tremble: for the day of the LORD cometh, for [it is] nigh at hand; a day of darkness and of gloominess, a day of clouds and of thick darkness, as the morning spread upon the mountains: a great people and a strong; there hath not been ever the like, neither shall be any more after it, [even] to the years of many generations. A fire devoureth before them; and behind them a flame burneth: the land [is] as the garden of Eden before them, and behind, a desolate wilderness; yea, and nothing shall escape them. The appearance of them [is] as the appearance of horses; and as horsemen, so shall they run. Like the noise of chariots on the tops of the mountains shall they leap, like the noise of a flame of fire that devoureth the stubble, as a strong people set in battle array. . . . They shall run like mighty men; they shall climb the wall like men of war, and they shall march every one on his ways, and they shall not break their ranks. . . . The earth shall quake before them; the heavens shall tremble: the sun and the moon shall be dark, and the stars shall withdraw their shining" (ii. 1-5, 7, 10; see also 6, 8, 9, 11-25; Rev. ix. 1-12). Here, and probably also in the parallel passage of Rev., locusts are taken as a type of a destroying army or horde, since they are more terrible in the devastation they cause than any other creatures.

9. *The Plague of Darkness.*—After the plague of locusts we read at once of a fresh judgment. "And the LORD said unto Moses. Stretch out thine hand toward heaven, that there be darkness over the land of Egypt, that [one] may feel darkness. And Moses stretched forth his hand toward heaven; and there was a thick darkness in all the land of Egypt three days: they saw not one another, neither rose any from his place for three days: but all the children of Israel had light in their dwellings." Pharaoh then gave the Israelites leave to go if only they left their cattle, but when Moses required that they should take these also, he again refused (x. 21-29). The expression we have rendered, "that [one] may feel darkness," according to the A. V. in the margin, where in the text the freer translation "darkness [which] may be felt" is given, has occasioned much difficulty. The LXX. and Vulg. give this rendering, and the moderns generally follow them. It has been proposed to read "and they shall grope in darkness," by a slight change of rendering and the supposition that the particle  $\aleph$  is understood (Kalisch, *Comm. on Ex.* p. 171). It is unreasonable to argue that the forcible words of the A. V. are too strong for Semitic phraseology. The difficulty is, however, rather to be solved by a consideration of the nature of the plague. It has been illustrated by reference to the Samoom and the hot wind of the Khamáseen. The former is a sand-storm which occurs in the desert, seldom lasting

according to Mr. Lane, more than a quarter of an hour or twenty minutes (*Mod. Eg.* 5th ed. p. 2); but for the time often causing the darkness of twilight, and affecting man and beast. Mrs. Poole, on Mr. Lane's authority, has described the Samoom as follows: "The 'Samoom,' which is a very violent, hot, and almost suffocating wind, is of more rare occurrence than the Khamaseen winds, and of shorter duration: its continuance being more brief in proportion to the intensity of its parching heat, and the impetuosity of its course. Its direction is generally from the southeast, or south-southeast. It is commonly preceded by a fearful calm. As it approaches, the atmosphere assumes a yellowish hue, tinged with red; the sun appears of a deep blood color, and gradually becomes quite concealed before the hot blast is felt in its full violence. The sand and dust raised by the wind add to the gloom, and increase the painful effects of the heat and rarity of the air. Respiration becomes uneasy, perspiration seems to be entirely stopped; and the tongue is dry, the skin parched, and a prickling sensation is experienced, as if caused by electric sparks. It is sometimes impossible for a person to remain erect, on account of the force of the wind; and the sand and dust oblige all who are exposed to it to keep their eyes closed. It is, however, most distressing when it overtakes travellers in the desert. My brother encountered at Koos, in Upper Egypt, a samoom which was said to be one of the most violent ever witnessed. It lasted less than half an hour, and a very violent samoom seldom continues longer. My brother is of opinion that, although it is extremely distressing, it can never prove fatal, unless to persons already brought almost to the point of death by disease, fatigue, thirst, or some other cause. The poor camel seems to suffer from it equally with his master: and will often lie down with his back to the wind, close his eyes, stretch out his long neck upon the ground, and so remain until the storm has passed over" (*Englishman in Egypt*, i. 96, 97). The hot wind of the Khamaseen usually blows for three days and nights, and carries so much sand with it, that it produces the appearance of a yellow fog. It thus resembles the Samoom, though far less powerful and far less distressing in its effects. It is not known to cause actual darkness; at least the writer's residence in Egypt afforded no example either on experience or hearsay evidence. By a confusion of the Samoom and the Khamaseen wind it has even been supposed that a Samoom in its utmost violence usually lasts three days (*Kalisch, Com. Ex.* p. 170), but this is an error. The plague may, however, have been an extremely severe sandstorm, miraculous in its violence and its duration, for the length of three days does not make it natural, since the severe storms are always very brief. Perhaps the three days was the limit, as about the longest period that the people could exist without leaving their houses. It has been supposed that this plague rather caused a supernatural terror than actual suffering and loss, but this is by no means certain. The impossibility of moving about, and the natural fear of darkness which affects beasts and birds as well as men, as in a total eclipse, would have caused suffering, and if the plague were a sandstorm of unequalled severity, it would have produced the conditions of fever by its parching heat, besides causing much distress of other kinds. An evidence in favor of the wholly supernatural character of this plague is its preceding the last judgment of all, the death of the first-

born, as though it were a terrible foreshadowing of that great calamity.

10. *The Death of the Firstborn.* — Before the tenth plague Moses went to warn Pharaoh. "And Moses said, Thus saith the LORD, About midnight will I go out into the midst of Egypt: and all the firstborn in the land of Egypt shall die, from the firstborn of Pharaoh that sitteth upon his throne, even unto the firstborn of the maidservant that [is] behind the mill; and all the firstborn of beasts. And there shall be a great cry throughout all the land of Egypt, such as there was none like it, nor shall be like it any more." He then foretells that Pharaoh's servants would pray him to go forth. Positive as is this declaration, it seems to have been a conditional warning, for we read, "And he went out from Pharaoh in heat of anger," and it is added, that God said that Pharaoh would not hearken to Moses, and that the king of Egypt still refused to let Israel go (xi. 4-10). The Passover was then instituted, and the houses of the Israelites sprinkled with the blood of the victims. The firstborn of the Egyptians were smitten at midnight, as Moses had forewarned Pharaoh. "And Pharaoh rose up in the night, he, and all his servants, and all the Egyptians; and there was a great cry in Egypt; for [there was] not a house where [there was] not one dead" (xii. 30). The clearly miraculous nature of this plague, in its severity, its falling upon man and beast, and the singling out of the firstborn, puts it wholly beyond comparison with any natural pestilence, even the severest recorded in history, whether of the peculiar Egyptian Plague, or other like epidemics. The Bible affords a parallel in the smiting of Sennacherib's army, and still more closely in some of the punishments of murmurers in the wilderness. The prevailing customs of Egypt furnished a curious illustration of the narrative of this plague to the writer. "It is well known that many ancient Egyptian customs are yet observed. Among these one of the most prominent is the wailing for the dead by the women of the household, as well as those hired to mourn. In the great cholera of 1848 I was at Cairo. This pestilence, as we all know, frequently follows the course of rivers. Thus, on that occasion, it ascended the Nile and showed itself in great strength at Boolak, the port of Cairo, distant from the city a mile and a half to the westward. For some days it did not traverse this space. Every evening at sunset, it was our custom to go up to the terrace on the roof of our house. There, in that calm, still time, I heard each night the wail of the women of Boolak for their dead borne along in a great wave of sound a distance of two miles, the lamentation of a city stricken with pestilence. So, when the firstborn were smitten, 'there was a great cry in Egypt.'"

The history of the ten plagues strictly ends with the death of the firstborn. The pursuit and the passage of the Red Sea are discussed elsewhere. [EXODUS, THE; RED SEA, PASSAGE OF.] Here it is only necessary to notice that with the event last mentioned the recital of the wonders wrought in Egypt concludes, and the history of Israel as a separate people begins.

Having examined the narrative of the ten plagues, we can now speak of their general character.

In the first place, we have constantly kept in view the arguments of those who hold that the plagues were not miraculous, and, while fully admitting all the illustration that the physical history of Egypt has afforded us, both in our own observa-

tion and the observation of others, we have found no reason for the naturalistic view in a single instance, while in many instances the illustrations from known phenomena have been so different as to bring out the miraculous element in the narrative with the greatest force, and in every case that element has been necessary, unless the narrative be deprived of its rights as historical evidence. Yet more, we have found that the advocates of a naturalistic explanation have been forced by their bias into a distortion and exaggeration of natural phenomena in their endeavor to find in them an explanation of the wonders recorded in the Bible.

In the examination we have made it will have been seen that the Biblical narrative has been illustrated by reference to the phenomena of Egypt and the manners of the inhabitants, and that, throughout, its accuracy in minute particulars has been remarkably shown, to a degree that is sufficient of itself to prove its historical truth. This in a narrative of wonders is of no small importance.

Respecting the character of the plagues, they were evidently nearly all miraculous in time of occurrence and degree rather than essentially, in accordance with the theory that God generally employs natural means in producing miraculous effects. They seem to have been sent as a series of warnings, each being somewhat more severe than its predecessor, to which we see an analogy in the warnings which the providential government of the world often puts before the sinner. The first plague corrupted the sweet water of the Nile and slew the fish. The second filled the land with frogs, which corrupted the whole country. The third covered man and beast with vermin or other annoying insects. The fourth was of the same kind and probably a yet severer judgment. With the fifth plague, the murrain of beasts, a loss of property began. The sixth, the plague of boils, was worse than the earlier plagues that had affected man and beast. The seventh plague, that of hail, exceeded those that went before it, since it destroyed everything in the field, man and beast and herb. The eighth plague was evidently still more grievous, since the devastation by locusts must have been far more thorough than that by the hail, and since at that time no greater calamity of the kind could have happened than the destruction of all remaining vegetable food. The ninth plague we do not sufficiently understand to be sure that it exceeded this in actual injury, but it is clear from the narrative that it must have caused great terror. The last plague is the only one that was general in the destruction of human life, for the effects of the hail cannot have been comparable to those it produced, and it completes the climax, unless indeed it be held that the passage of the Red Sea was the crowning point of the whole series of wonders, rather than a separate miracle. In this case its magnitude, as publicly destroying the king and his whole army, might even surpass that of the tenth plague.

The gradual increase in severity of the plagues is perhaps the best key to their meaning. They seem to have been sent as warnings to the oppressor, to afford him a means of seeing God's will and an opportunity of repenting before Egypt was ruined. It is true that the hardening of Pharaoh's heart is a mystery which St. Paul leaves unexplained, answering the objector, "Nay but, O man, who art thou that repliest against God?" (Rom.

ix. 20). Yet the Apostle is arguing that we have no right to question God's righteousness for not having mercy on all, and speaks of his long-suffering towards the wicked. The lesson that Pharaoh's career teaches us seems to be, that there are men whom the most signal judgments do not affect so as to cause any lasting repentance. In this respect the after-history of the Jewish people is a commentary upon that of their oppressor. R. S. P.

\* In studying the ten plagues of Egypt two points must be kept distinctly in view: (1) their reality, and (2) their judicial character. Were these plagues actual occurrences? Were they divine judgments? Ewald, who admits a general foundation of fact for the story as given in Exodus, nevertheless regards it as the growth of successive traditions, finally redacted many centuries after the event. "Everything in this story is on a coherent and sublime plan, is grand and instructive, excites and satisfies the mind. It is like a divine drama, exhibited on earth in the midst of real history; to be regarded in this light, and to be treasured accordingly. Not that we hereby assert, that this story does not on the whole exhibit the essence of the event as it actually happened. For the sequel of the narrative shows that Pharaoh did not voluntarily allow the people to go; and we cannot form too exalted an idea of Moses. But we do insist that the story as it now is cannot have been drawn up before the era of the great Prophets" (*History of Israel*, Martineau's trans., i. 483). In answer to this theory of a late composition of the story, Mr. Poole (*supra*) has aptly remarked that the minute accuracy of the Biblical narrative in its references to the physical features of Egypt, its soil, climate, productions, natural history, and meteorology, which the author of this narrative exhibits, is such as could have been gained only by a personal residence in Egypt, and argues a personal observation of the events described. Moreover this narrative occurs in a book which exhibits throughout the personal familiarity of its author with the customs of Egypt, religious, social, and domestic, with its cities and forts, its laws and institutions, its superstitions and modes of worship, its arts and manufactures; and this knowledge, revealing itself in a merely incidental way, is so much the stronger evidence of the genuineness and authenticity of the account given by Moses.

But Ewald's theory finds also a positive refutation in the institution of the Passover. He himself traces this observance back to the time of Joshua. "About this time, many customs certainly first received proper legal sanction, which, though closely connected with the existing religion, possessed more popular importance for the fully established community; as the Feast of the Passover, in commemoration of the deliverance out of Egypt; and circumcision, as marking every male member of the community. Not without reason does the earliest narrator make Gilgal the scene of the first general circumcision, and likewise of the first Passover. At Gilgal near the Jordan, doubtless, many in still later days loved to keep the Passover; being more forcibly reminded by the sight of the Jordan of the triumphant entry into Canaan, of the previous adventures in the desert, and of the deliverance out of Egypt" (Ewald,

*Hist. of Israel*, ii. 34). Thus Ewald distinctly admits that, as far back as the time of Joshua, the Passover was observed, to commemorate the deliverance out of Egypt. The Passover is a perpetual witness for the Exodus. But the Passover contains features so unnatural, so remote in themselves from mere imagination or invention, that one cannot conceive of their origin except in some fact of actual occurrence. This is true especially of the time and manner of killing the lamb, and the sprinkling of the blood on the side posts and the upper door-post of the houses. As the observance itself witnesses for the departure out of Egypt, so do these unique features of it witness for the facts which are recorded as having attended its own institution. But the tenth decisive plague was only the culmination of a series, and the whole narrative must stand or fall together. The plagues were actual occurrences.

Were they also divine judgments? Upon this point Ewald again says (vol. i. p. 484), "Among the ten plagues by which Pharaoh is ultimately coerced into compliance, eight are nothing more than extraordinary calamities of such a kind as may occur in any country, but most frequently and easily in the swampy northern portion of Egypt (only that, in connection with this history, they are to be viewed in that terrible light in which the locusts are regarded by Joel), and are arranged in an appropriate advance in severity: frogs out of the water, mosquitoes as if swarming from the dust, dogflies, murrain among the cattle, a kind of blains, hail, locusts, darkness . . . . The whole constitutes a very Egyptian picture, indeed more so than the separate details; in no nation was the observation and the fear of extraordinary atmospheric and other natural phenomena so early and carefully developed as in Egypt. The Egyptians are beaten by the true God in and through their own faith — that is the fundamental thought of the whole." Now it is this fundamental thought, sustained by certain special features of phenomena in other respects natural, that gives to these calamities the character of divine judgments. They came in rapid succession, apparently at unusual seasons, and all point toward one end. They come and go at the word or prayer of Moses, and are even announced by him beforehand in terms of warning. At first they are feebly imitated or simulated by the magicians, but their resources soon come to an end. In several instances the Israelites are exempted from the plague that smites everything around them. These peculiarities cannot be accounted for by the operation of natural causes: and, "where natural power is pushed beyond natural limits, the event is just as miraculous as where the power is wholly unknown to nature." The manifestation of supernatural power within the sphere of phenomena peculiar to Egypt was the more impressive as a proof that the God of the Hebrews had supreme dominion over all natural and spiritual powers in Egypt also. This Pharaoh himself at last acknowledged.

<sup>a</sup> An entirely different word in Hebrew (though identical in English) from the name of the son of Adam, which is *Habel*.

<sup>b</sup> For instance, from the mountain between *Zeb-dany* and *Baalbec*, half an hour past the Roman bridge.

<sup>c</sup> For the situation of "the plain of Ono" see Robinson's *Phys. Geogr. of Palestine*, pp. 113, 126. It is no doubt near *Lod* or *Lydda*. H.

The hardening of his heart was due to his own willfulness. He is said again and again to have hardened it; and the divine agency in that result was simply that of multiplying appeals and wonders fitted to convert him, though it was foreseen that he would resist them all. The Hebrew Scriptures, overlooking secondary agencies, ascribe to Jehovah whatever He in any wise causes or suffers to come to pass. J. P. T.

**PLAINS.** This one term does duty in the Authorized Version for no less than seven distinct Hebrew words, each of which had its own independent and individual meaning, and could not be — at least is not — interchanged with any other; some of them are proper names exclusively attached to one spot, and one has not the meaning of plain at all.

1. *Abel'a* (אֲבֵלָא). This word perhaps answers more nearly to our word "meadow" than any other, its root having, according to Gesenius, the force of moisture like that of grass. It occurs in the names of ABEL-MAIM, ABEL-MEIOLOAH, ABEL-SHITTIM, and is rendered "plain" in Judg. xi. 33, "plain of vineyards."

2. *Bik'ah* (בִּיקְאָה). From a root signifying "to cleave or rend" (Gesen. *Thes.* p. 232; Fürst, *Heulwb.* i. 212). Fortunately we are able to identify the most remarkable of the *Bikahs* of the Bible, and thus to ascertain the force of the term. The great Plain or Valley of Cœle-Syria, the "hollow land" of the Greeks, which separates the two ranges of Lebanon and Antilebanon, is the most remarkable of them all. It is called in the Bible the *Bika'ath Aven* (Am. i. 5), and also probably the *Bika'ath Lebanon* (Josh. xi. 17, xii. 7) and *Bika'ath-Mizpeh* (xi. 8), and is still known throughout Syria by its old name, as *el-Beka'ra*, or *Ard el-Bek'ra*. "A long valley, though broad," says Dr. Pusey (*Comment.* on Am. i. 5), "if seen from a height looks like a cleft;" and this is eminently the case with the "Valley of Lebanon" when approached by the ordinary roads from north or south.<sup>b</sup> It is of great extent, more than 60 miles long by about 5 in average breadth, and the two great ranges shut it in on either hand, Lebanon especially, with a very wall-like appearance. [LEBANON.] Not unlike it in this effect is the Jordan Valley at Jericho, which appears to be once mentioned under the same title in Deut. xxxiv. 3 (A. V. "the Valley of Jericho"). This, however, is part of the Arabah, the proper name of the Jordan Valley. Besides these the "plain of Megiddo" (2 Chr. xxxv. 22; Zech. xii. 11, A. V. "valley of M.") and "the plain of Ono" (Neh. vi. 2) have not been identified.<sup>c</sup>

Out of Palestine we find denoted by the word *Bik'ah* "the plain in the land of Shinar" (Gen. xi. 2), the "plain of Mesopotamia" (Ez. iii. 23, viii. 4, xxxvii. 1, 2), and the "plain in the province of Dura" (Dan. iii. 1).

*Bik'ah* perhaps appears, with other Arabic<sup>d</sup>

<sup>d</sup> For instance, the farm-houses which "sparkle amid the eternal verdure of the Vega of Granada" are called *carmenes*, a term derived through the Arabic from the Hebrew *cerem*, a vineyard, a rich spot — a Carmel. Another Semitic word naturalized in Spain is *Seville* (see further down, No. 6). But indeed they are most numerous. For other examples see *Glossary des mots espagnols dérivés de l'Arabe*, par Engelmann, Leyden, 1861.

*moros*, in Spanish as *Vega*, a term applied to well-watered valleys, between hills (Ford, *Handbk.* sect. ii.), and especially to the Valley of Granada, the most extensive and most fruitful of them all, of which the Moors were accustomed to boast that it was larger and richer than the *Glättah*, the Oasis of Damascus.

3. *Hac-Ciccâr* (הַכִּצָּר). This, though applied to a plain, has not (if the lexicographers are right) the force of flatness or extent, but rather seems to be derived from a root signifying roundness. In its topographical sense (for it has other meanings, such as a coin, a cake, or flat loaf) it is confined to the Jordan Valley. This sense it bears in Gen. xiii. 10, 11, 12, xix. 17, 25-29; Deut. xxiv. 3; 2 Sam. xviii. 23; 1 K. vii. 46; 2 Chr. v. 17; Neh. iii. 22, xii. 28. The LXX. translate it by *περίχωπος* and *πεποικος*, the former of which is often found in the N. T., where the English reader is familiar with it as "the region round about." It must be confessed that it is not easy to trace any connection between a "circular form" and the nature or aspect of the Jordan Valley, and it is difficult not to suspect that *Ciccâr* is an archaic term which existed before the advent of the Hebrews, and was afterwards adopted into their language. [REGION-ROUND-ABOUT.]

4. *Ham-Mishôr* (הַמִּישׁוֹר). This is by the lexicographers explained as meaning "straightforward," "plain," as if from the root *yâshar*, to be just or upright; but this seems far-fetched, and it is more probable that in this case also we have an archaic term existing from a pre-historic date. It occurs in the Bible in the following passages: Deut. iii. 10, iv. 43; Josh. xiii. 9, 16, 17, 21, xx. 8; 1 K. xx. 23, 25; 2 Chr. xxvi. 10; Jer. xviii. 8, 21. In each of these, with one exception, it is used for the district in the neighborhood of Heshbon and Dibon — the *Belka* of the modern Arabs, their most noted pasture-ground; a district which, from the scanty descriptions we possess of it, seems to resemble the "Downs" of our own country in the regularity of its undulations, the excellence of its turf, and its fitness for the growth of flocks. There is no difficulty in recognizing the same district in the statement of 2 Chr. xxvi. 10. It is evident from several circumstances that Uzziah had been a great conqueror on the east of Jordan, as well as on the shore of the Mediterranean (see Ewald's remarks, *Geschichte*, iii. 588, note), and he kept his cattle on the rich pastures of Philistines on the one hand, and Ammonites on the other. Thus in all the passages quoted above the word *Mishôr* seems to be restricted to one special district, and to belong to it as exclusively as *Shefelah* did to the lowland of Philistia, or *Arabah* to the sunken district of the Jordan Valley. And therefore it is puzzling to find it used in one passage (1 K. xx. 23, 25) apparently with the mere general sense of low land, or rather flat land, in which chariots could be manoeuvred — as opposed to uneven mountainous ground. There is some reason to believe that the scene of the battle in question was on the east side of the Sea of Gennesaret in the plain of *Jaulan*; but this is no explanation of the difficulty, because we are not

warranted in extending the *Mishôr* further than the mountains which bounded it on the north, and where the districts began which bore, like it, their own distinctive names of Gilead, Bashan, Argob, Golan, Hauran, etc. Perhaps the most feasible explanation is that the word was used by the Syrians of Damascus without any knowledge of its strict signification, in the same manner indeed that it was employed in the later Syro-Chaldee dialect, in which *meshera* is the favorite term to express several natural features which in the older and stricter language were denominated each by its own special name.

5. *Ha-Arabâh* (הַאֲרָבָה). This again had an absolutely definite meaning — being restricted to the valley of the Jordan, and to its continuation south of the Dead Sea. [See ARABAH, vol. i. pp. 133, 134; and for a description of the aspect of the region, PALESTINE, vol. iii. pp. 2298, 2299.] No doubt the *Arabâh* was the most remarkable plain of the Holy Land — but to render it by so general and common a term (as our translators have done in the majority of cases) is materially to diminish its force and significance in the narrative. This is equally the case with

6. *Ha-Shefelâh* (הַשְּׁפֵלָה), the invariable designation of the depressed, flat, or gently undulating region which intervened between the highlands of Judah and the Mediterranean, and was commonly in possession of the Philistines. [PALESTINE, p. 2296; SEMIELA.] To the Hebrews this, and this only, was 'The Shefelah; and to have spoken of it by any more general term would have been as impossible as for natives of the Carse of Stirling or the Weald of Kent to designate them differently. *Shefelah* has some claims of its own to notice. It was one of the most tenacious of these old Hebrew terms. It appears in the Greek text and in the Authorized Version of the Book of Maccabees (1 Macc. xii. 33), and is preserved on each of its other occurrences, even in such corrupt dialects as the Samaritan Version of the Pentateuch, and the Targums of Pseudo-jonathan, and of Rabbi Joseph. And although it would appear to be no longer known in its original seat, it has transferred itself to other countries, and appears in Spain as *Seville*, and on the east coast of Africa as *Sofala*.

7. *Êlôn* (אֵלֹן). Our translators have uniformly rendered this word "plain," doubtless following the Vulgate,<sup>a</sup> which in about half the passages has *convallis*. But this is not the veröict of the majority or the most trustworthy of the ancient versions. They regard the word as meaning an "oak" or "grove of oaks," a rendering supported by all, or nearly all, the commentators and lexicographers of the present day. It has the advantage also of being much more picturesque, and throws a new light (to the English reader) over many an incident in the lives of the Patriarchs and early heroes of the Bible. The passages in which the word occurs erroneously translated "plain," are as follows: Plain of Moreh (Gen. xii. 6; Deut. xi. 30), Plain of Mamre (Gen. xiii. 18, xiv. 13, xviii. 1), Plain of Zaanaïm (Judg. iv. 11), Plain of the

<sup>a</sup> Jerome, again, probably followed the Targum or other Jewish authorities, and they usually employ the wading above mentioned. Fürst alone endeavors

to find a reason for it — not a satisfactory one: "be cause trees frequent plains or meadows" (*Handbk.* i. 90 b).

Pillar (Judg. ix. 6), Plain of Meonenim (ix. 37), Plain of Tabor (1 Sam. x. 3)

8. The Plain of Esdraelon which to the modern traveller in the Holy Land forms the third of its three most remarkable depressions, is designated in the original by neither of the above terms, but by *emek*, an appellative noun frequently employed in the Bible for the smaller valleys of the country — "the valley of Jezreel." Perhaps Esdraelon may anciently have been considered as consisting of two portions, the Valley of Jezreel the eastern and smaller, the Plain of Megiddo the western and more extensive of the two. G.

\* PLAINS OF JERICHO. [JERICHO.]

\* PLANE-TREE, Eccclus. xxiv. 14. [CHEST-NUT-TREE.]

PLASTER.<sup>a</sup> The mode of making plaster-cement has been described above. [MORTAR.] Plaster is mentioned thrice in Scripture: 1. (Lev. xiv. 42, 48), where when a house was infected with "leprosy," the priest was ordered to take away the portion of infected wall and re-plaster it (Michaelis, *Laws of Moses*, § 211, iii. 297-305, ed. Smith). [HOUSE; LEPROSY.]

2. The words of the Law were ordered to be engraved on Mount Elbal on stones which had been previously coated with plaster (Deut. xxvii. 2, 4; Josh. viii. 32). The process here mentioned was probably of a similar kind to that adopted in Egypt for receiving bas-reliefs. The wall was first made smooth, and its interstices, if necessary, filled up with plaster. When the figures had been drawn, and the stone adjacent cut away so as to leave them in relief, a coat of lime whitewash was laid on, and followed by one of varnish after the painting of the figures was complete. In the case of the natural rock the process was nearly the same. The ground was covered with a thick layer of fine plaster, consisting of lime and gypsum carefully smoothed and polished. Upon this a coat of lime whitewash was laid, and on it the colors were painted, and set by means of glue or wax. The whitewash appears in most instances to have been made of shell-limestone not much burnt, which of itself is tenacious enough without glue or other binding material (Long, quoting from Belzoni, *Eg. Ant.* ii. 49-50).

At Belhistan in Persia, the surface of the inscribed rock-tablet was covered with a varnish to preserve it from weather; but it seems likely that in the case of the Elbal tablets the inscription was cut while the plaster was still moist (Layard, *Nineveh*, ii. 188; Vaux, *Nin. & Persep.* p. 172).

3. It was probably a similar coating of cement, on which the fatal letters were traced by the mystic hand "on the plaster of the wall" of Belshazzar's palace at Babylon (Dan. v. 5). We here obtain an incidental confirmation of the Biblical narrative. For while at Nineveh the walls are paneled with alabaster slabs, at Babylon, where no such material is found, the builders were content to cover their tiles or bricks with enamel or stucco, fitly termed plaster, fit for receiving ornamental designs (Layard, *Nin. and Bab.* p. 529; Diod. ii. 8). [BRICKS.] H. W. P.

2. קִיָּד: *kovia: calx.*

PLEIADES. The Hebrew word (פְּלִיאָדִים, *cimdh*) so rendered occurs in Job ix. 9, xixviii. 31, and Am. v. 8. In the last passage our A. V. has "the seven stars," although the Geneva version translates the word "Pleiades" as in the other cases. In Job the LXX. has Πλειάδες, the order of the Hebrew words having been altered [see ORION], while in Amos there is no trace of the original, and it is difficult to imagine what the translators had before them. The Vulgate in each passage has a different rendering: *Hyades* in Job ix. 9, *Pleides* in Job xxxviii. 31, and *Arcturus* in Am. v. 8. Of the other versions the Peshito-Syriac and Chaldee merely adopt the Hebrew word; Aquila in Job xxxviii., Symmachus in Job xxxviii. and Amos, and Theodotion in Amos give "Pleiades," while with remarkable inconsistency Aquila in Amos has "Arcturus." The Jewish commentators are no less at variance. R. David Kimchi in his Lexicon says: "R. Jonah wrote that it was a collection of stars called in Arabic *Al Thurayya*. And the wise Rabbi Abraham Aben Ezra, of blessed memory, wrote that the ancients said *Cimdh* is seven stars, and they are at the end of the constellation Aries, and those which are seen are six. And he wrote that what was right in his eyes was that it was a single star, and that a great one, which is called the left eye of Taurus; and *Cesil* is a great star, the heart of the constellation Scorpio." On Job xxxviii. 31, Kimchi continues: "Our Rabbis of blessed memory have said (*Beraoth*, 58, 2), *Cimdh* hath great cold and bindeth up the fruits, and *Cesil* hath great heat and ripeneth the fruits: therefore He said, 'or loosen the bands of *Cesil*,' for it openeth the fruits and bringeth them forth." In addition to the evidence of R. Jonah, who identifies the Hebrew *cimdh* with the Arabic *Al Thurayya*, we have the testimony of R. Isaac Israel, quoted by Hyde in his notes on the Tables of Ulugh Beigh (pp. 31-33, ed. 1665) to the same effect. That *Al Thurayya* and the Pleiades are the same is proved by the words of Aben Ragel (quoted by Hyde, p. 33): "Al Thurayya is the mansion of the moon, in the sign Taurus, and it is called the celestial hen with her chickens." With this Hyde compares the Fr. *pulsinière*, and Eng. *Hen and chickens*, which are old names for the same stars: and Niebuhr (*Descr. de l'Arabie*, p. 101) gives as the result of his inquiry of the Jew at Sanà, "Kimeh, Pleiades, qu'on appelle aussi en Allemagne la poule qui glousse." The "Ancients," whom Aben Ezra quotes (on Job xxxviii. 31), evidently understood by the seven small stars at the end of the constellation Aries the Pleiades, which are indeed in the left shoulder of the Bull, but so near the Ram's tail, that their position might properly be defined with reference to it. With the statement that "those which are seen are six" may be compared the words of Didymus on Homer, τῶν δὲ Πλειάδων οὐσῶν ἑπτά πᾶν ἀμαυρὸς δ' ἔβδμομος ἀστὴρ, and of Ovid (*Fast.* iv. 170) —

"Quæ septem dici, sex tamen esse solent."

The opinion of Aben Ezra himself has been frequently misrepresented. He held that *Cimdh* was a single large star, *Altebaran* the brightest of the Hyades, while *Cesil* [A. V. "Orion"] was *Antares* the heart of Scorpio. "When these rise in the east," he continues, "the effects which are recorded appear." He describes them as *opposite* each other and the difference in Right Ascension between *Al-*

**Lebaran** and **Antares** is as nearly as possible **twelve hours**. The belief of **Aben Ezra** had probably the same origin as the rendering of the **Vulgate**, *Hyades*.

One other point is deserving of notice. The **Rabbis**, as quoted by **Kimchi**, attribute to *Cimáh* great cold and the property of checking vegetation, while *Cesil* works the contrary effects. But the words of **R. Isaac Israel** on **Job xxxviii. 31** (quoted by **Hyde**, p. 72), are just the reverse. He says, "The stars have operations in the ripening of the fruits, and such is the operation of *Cimáh*. And some of them retard and delay the fruits from ripening, and this is the operation of *Cesil*. The interpretation is, 'Wilt thou bind the fruits which the constellation *Cimáh* ripeneth and openeth; or wilt thou open the fruits which the constellation *Cesil* contracteth and bindeth up?'"

On the whole, then, though it is impossible to arrive at any certain conclusion, it appears that our translators were perfectly justified in rendering *Cimáh* by "Pleiades." The "seven stars" in **Amos** clearly denoted the same cluster in the language of the 17th century, for **Cotgrave** in his **French Dictionary** gives "Pleiade, i., one of the seven stars."

**Hyde** maintained that the **Pleiades** were again mentioned in **Scripture** by the name **Succoth Benoth**. The discussion of this question must be reserved to the **Article** on that name.

The etymology of *cimáh* is referred to the Arab.

**كُومَة**, "a heap," as being a heap or cluster of stars. The full Arabic name given by **Gesenius** is

**عَقْدُ الثَّرِيَا**, "the knot of the Pleiades;" and,

in accordance with this, most modern commentators render **Job xxxviii. 31**, "Is it thou that bindest the knots of the Pleiades, or loosenest the bands of Orion?" **Simonis** (*Lex. Hebr.*) quotes the **Greenland** name for this cluster of stars, "*Kil-lukterset*, i. e. *stellas colligatas*," as an instance of the existence of the same idea in a widely different language. The rendering "sweet influences" of the **A. V.** is a relic of the lingering belief in the power which the stars exerted over human destiny. The marginal note on the word "Pleiades" in the **Geneva Version** is, "which starres arise when the sunne is in Taurus, which is the spring tyme, and bring flowers," thus agreeing with the explanation of **R. Isaac Israel** quoted above.

For authorities, in addition to those already referred to, see **Michaelis** (*Suppl. ad Lex. Hebr.* No. 1136), **Simonis** (*Lex. Hebr.*), and **Gesenius** (*Thesaurus*). W. A. W.

\* **PLEDGE**. The words so translated in the **A. V.** are **עֲרָבָה**, **עֲרָבוֹן**, **עֲבוֹשׁ**, **חֲבֻלָה**, **חֲבֹל**. All these, except the last, designate something given as security for the payment of a debt or the fulfillment of a promise. The passage **1 Sam. xvii. 18**, where alone **עֲרָבָה** is rendered *pledge* by our translators (it occurs but once elsewhere, **Prov. xvii. 18**: **עֲרָבָה** **עֲיָב**, rendered *becometh surety*), is of doubtful import. See **Thenius in loc.**

The practice of taking pledges for the payment of debt, common from time immemorial throughout the East (**Job xxii. 6**, **xxiv. 3, 9**; for the present usage see *Lund and Book*, i. 499) was regulated in

the **Mosaic Law** as follows: (1.) The creditor was not allowed to enter the house of his debtor, in order to take a pledge, but it must be brought out to him, **Deut. xxiv. 10, 11**. (2.) A handmill was not allowed to be taken in pledge (**Deut. xxiv. 6**), nor the raiment (**כִּיְרָד**) of a widow (**Deut. xxiv. 17**).

(3.) An outer garment (**שְׁלֵמָה** i. q. **שְׁלֵמָה**, used also as a night-covering) taken in pledge must be delivered to the owner at sunset (**Ex. xxii. 26**; **Deut. xxiv. 13**). For allusions to the disregard of these enactments, see **Ezek. xviii. 7, 12, 16, xxxiii. 15**; **Am. ii. 8**.

One of the Hebrew words given above, **עֲרָבוֹן**, occurs in the **N. T.** in the form of **ἀρραβών** (**A. V.** "earnest"), **2 Cor. i. 22, v. 5**; **Eph. i. 14**; most probably, however, in the sense not simply of a pledge of something to be bestowed in future, but of such a pledge as, being, like earnest-money, of the same or a kindred nature with the ultimate gift or payment, should be also thus a partial anticipation of it. [See **EARNEST**.] Another cognate form is found in the expression **פְּנֵי הַתְּעֲרֹבוֹת** (**A. V.** "hostages"), **2 K. xv. 14**; **2 Chr. xxv. 24**, employed to designate persons given to be held in pledge for the performance of treaty obligations.

**PLOUGH**. [**AGRICULTURE**.]

\* **PLUMB-LINE**. [**LINE**, **Amer. ed.**]

\* **PLUMMET**, **2 K. xxviii. 13**; **Is. xxi. 13**. [**HANDICRAFT**; **LINE**.]

**POCHERETH** (**פִּכְרֶת**) [*snaring, catching*]. **Φαχεράθ** [**Vat. Φασραθ**]; **Alex. Φακεραθ**, in **Ezr.**; **Φακαράθ**, **Alex. Φαχαράθ** [**FA. Φαχαρατ**], in **Neh.**: (*Phochereth*). The children of **Pochereth** of **Zebaim** were among the children of **Solomon's** servants who returned with **Zerubbabel** (**Ezr. ii. 57**; **Neh. vii. 59**). He is called in **1 Esdr. v. 34**, **PHACARETH**. [**ZEBAIM**.]

**POETRY, HEBREW**. The subject of Hebrew Poetry has been treated at great length by many writers of the last three centuries, but the results of their speculations have been, in most instances, in an inverse ratio to their length. That such would be the case might have been foretold as a natural consequence of their method of investigation. In the 16th and 17th centuries the influence of classical studies upon the minds of the learned was so great as to imbue them with the belief that the writers of Greece and Rome were the models of all excellence, and consequently, when their learning and critical acumen were directed to the records of another literature, they were unable to divest themselves of the prejudices of early education and habits, and sought for the same excellences which they admired in their favorite models. That this has been the case with regard to most of the speculations on the poetry of the Hebrews, and that the failure of those speculations is mainly due to this cause, will be abundantly manifest to any one who is acquainted with the literature of the subject. But, however barren of results, the history of the various theories which have been framed with regard to the external form of Hebrew poetry is a necessary part of the present article, and will serve in some measure as a warning, to any who may hereafter attempt the solution of the problem, what to avoid. The attributes which are common to all poetry, and which the poetry of the Hebrews pos-

seases in a higher degree perhaps than the literature of any other people, it is unnecessary here to describe. But the points of contrast are so numerous, and the peculiarities which distinguish Hebrew poetry so remarkable, that these alone require a full and careful consideration. It is a phenomenon which is universally observed in the literatures of all nations, that the earliest form in which the thoughts and feelings of a people find utterance is the poetic. Prose is an aftergrowth, the vehicle of less spontaneous, because more formal, expression. And so it is in the literature of the Hebrews. We find in the sober narrative which tells us of the fortunes of Cain and his descendants the earliest known specimen of poetry on record, the song of Lamech to his wives, "the sword song," as Herder terms it, supposing it to commemorate the discovery of weapons of war by his son Tubal-Cain. But whether it be a song of triumph for the impunity which the wild old chief might now enjoy for his son's discovery, or a lament for some deed of violence of his own, this chant of Lamech has of itself an especial interest as connected with the oldest genealogical document, and as possessing the characteristics of Hebrew poetry at the earliest period with which we are acquainted. Its origin is admitted by Ewald to be pre-Mosaic, and its antiquity the most remote. Its lyrical character is consistent with its early date, for lyrical poetry is of all forms the earliest, being, as Ewald (*Dicht. des A. B. 1 Th. i. § 2, p. 11*) admirably describes it, "the daughter of the moment, of swift-rising powerful feelings, of deep stirrings and fiery emotions of the soul." This first fragment which has come down to us possesses thus the eminently lyrical character which distinguishes the poetry of the Hebrew nation from its earliest existence to its decay and fall. It has besides the further characteristic of parallelism, to which reference will be hereafter made.

Of the three kinds of poetry which are illustrated by the Hebrew literature, the *lyric* occupies the foremost place. The Shemitic nations have nothing approaching to an *epic* poem, and in proportion to this defect the lyric element prevailed more greatly, commencing, as we have seen, in the pre-Mosaic times, flourishing in rude vigor during the earlier periods of the Judges, the heroic age of the Hebrews, growing with the nation's growth and strengthening with its strength, till it reached its highest excellence in David, the warrior-poet, and from thenceforth began slowly to decline. *Gnomic* poetry is the product of a more advanced age. It arises from the desire felt by the poet to express the results of the accumulated experiences of life in a form of beauty and permanence. Its thoughtful character requires for its development a time of peacefulness and leisure; for it gives expression, not like the lyric to the sudden and impassioned feelings of the moment, but to calm and philosophic reflection. Being less spontaneous in its origin, its form is of necessity more artificial. The gnomic poetry of the Hebrews has not its measured flow disturbed by the shock of arms or the tumult of camps; it rises silently, like the Temple of old, without the sound of a weapon, and its groundwork is the home life of the nation. The period during which it flourished corresponds to its domestic and settled character. From the time of David onwards through the reigns of the earlier kings, when the nation was quiet and at peace, or, if not at peace, at least so firmly fixed in its acquired terri-

tory that its wars were no struggle for existence gnomic poetry blossomed and bare fruit. We meet with it at intervals up to the time of the Captivity and, as it is chiefly characteristic of the age of the monarchy, Ewald has appropriately designated this era the "artificial period" of Hebrew poetry. From the end of the 8th century B. C. the decline of the nation was rapid, and with its glory departed the chief glories of its literature. The poems of this period are distinguished by a smoothness of diction and an external polish which betray tokens of labor and art; the style is less flowing and easy, and, except in rare instances, there is no dash of the ancient vigor. After the Captivity we have nothing but the poems which formed part of the liturgical services of the Temple. Whether *dramatic* poetry, properly so called, ever existed among the Hebrews, is, to say the least, extremely doubtful. In the opinion of some writers the Song of Songs, in its external form, is a rude drama, designed for a simple stage. But the evidence for this view is extremely slight, and no good and sufficient reasons have been adduced which would lead us to conclude that the amount of dramatic action exhibited in that poem is more than would be involved in an animated poetic dialogue in which more than two persons take part. Philosophy and the drama appear alike to have been peculiar to the Indo-Germanic nations, and to have manifested themselves among the Shemitic tribes only in their crudest and most simple form.

1. *Lyrical Poetry*. — The literature of the Hebrews abounds with illustrations of all forms of lyrical poetry, in its most manifold and wide-embracing compass, from such short ejaculations as the songs of the two Lamechs, and Pss. xv., cxvii., and others, to the longer chants of victory and thanksgiving, like the songs of Deborah and David (Judg. v., Ps. xviii.). The thoroughly national character of all lyrical poetry has been already alluded to. It is the utterance of the people's life in all its varied phases, and expresses all its most earnest strivings and impulses. In proportion as this expression is vigorous and animated, the idea embodied in lyric song is in most cases narrowed or rather concentrated. One truth, and even one side of a truth, is for the time invested with the greatest prominence. All these characteristics will be found in perfection in the lyric poetry of the Hebrews. One other feature which distinguishes it is its form and its capability for being set to a musical accompaniment. The names by which the Hebrews will supply some illustration of this.

1. שִׁיר, *shîr*, a song in general, adapted for the voice alone.

2. מִזְמוֹר, *mizmôr*, which Ewald considers a lyric song, properly so called, but which rather seems to correspond with the Greek ψαλμός, a psalm, or song to be sung with any instrumental accompaniment.

3. נְגִינָה, *nēgînâh*, which Ewald is of opinion is equivalent to the Greek ψαλμός, is more probably a melody expressly adapted for stringed instruments.

4. מַשְׁכִּיל, *maschîl*, of which it may be said that, if Ewald's suggestion be not correct, that it denotes a lyrical song requiring nice musical skill, it is difficult to give any more probable explanation [MASCHEL.]

5. מִיְחִיָּתָם, *mīchīṭām*, a term of extremely doubtful meaning. [MICHITAM.]

6. שִׁגְגָיוֹן, *shiggayōn* (Ps. vii. 1), a wild, irregular, dithyrambic song, as the word appears to denote; or, according to some, a song to be sung with variations. The former is the more probable meaning. [SHIGGAION.] The plural occurs in Hab. iii. 1.

But, besides these, there are other divisions of lyrical poetry of great importance, which have regard rather to the subject of the poems than to their form or adaptation for musical accompaniments. Of these we notice:—

1. תְּהִלָּה, *tēhillāh*, a hymn of praise. The plural *tēhillīm* is the title of the Book of Psalms in Hebrew. The 145th Psalm is entitled "David's (Psalm) of praise;" and the subject of the psalm is in accordance with its title, which is apparently suggested by the concluding verse, "the praise of Jehovah my mouth shall speak, and let all flesh bless his holy name for ever and ever." To this class belong the songs which relate to extraordinary deliverances, such as the songs of Moses (Ex. xv.) and of Deborah (Judg. v.), and the Psalms xviii. and lxxviii., which have all the air of chants to be sung in triumphal processions. Such were the hymns sung in the Temple services, and by a bold figure the Almighty is apostrophized as "Thou that inhabitest the praises of Israel," which rose in the holy place with the fragrant clouds of incense (Ps. xxii. 3). To the same class also Ewald refers the shorter poems of the like kind with those already quoted, such as Pss. xxx., xxxii., cxxxviii., and Is. xxxviii., which relate to less general occasions, and commemorate more special deliverances. The songs of victory sung by the congregation in the Temple, as Pss. xvi., xlviii., xxiv. 7-10, which is a short triumphal ode, and Ps. xxix., which praises Jehovah on the occasion of a great natural phenomenon, are likewise all to be classed in this division of lyric poetry. Next to the hymn of praise may be noticed,—

2. קִינָה, *kināh*, the lament, or dirge, of which there are many examples, whether uttered over an individual or as an outburst of grief for the calamities of the land. The most touchingly pathetic of all is perhaps the lament of David for the death of Saul and Jonathan (2 Sam. i. 19-27), in which passionate emotion is blended with touches of tenderness of which only a strong nature is capable. Compare with this the lament for Abner (2 Sam. iii. 33, 34) and for Absalom (2 Sam. xviii. 33). Of the same character also, doubtless, were the songs which the singing men and singing women upake over Josiah at his death (2 Chr. xxxv. 25), and the songs of mourning for the disasters which befell the hapless land of Judah, of which Psalms xlix., lx., lxxiii., cxxxvii., are examples (comp. Jer. vii. 29, ix. 10 [9]), and the Lamentations of Jeremiah the most memorable instances.

3. שִׁיר יְדִידוֹת, *shir yedidōth*, a love-song (Ps. xlv. 1), in its external form at least. Other kinds of poetry there are which occupy the middle ground between the lyric and gnomic, being lyric

in form and spirit, but gnomic in subject. These may be classed as—

4. מָשָׁל, *māshāl*, properly a similitude, and then a parable, or sententious saying couched in poetic language.<sup>a</sup> Such are the songs of Balaam (Num. xxiii. 7, 18; xxiv. 3, 15, 20, 21, 23), which are eminently lyrical in character; the mocking ballad in Num. xxi. 27-30, which has been conjectured to be a fragment of an old Amorite war-song [NUMBERS, p. 2197 b]; and the apologue of Jotham (Judg. ix. 7-20), both which last are strongly satirical in tone. But the finest of all is the magnificent prophetic song of triumph over the fall of

Babylon (Is. xiv. 4-27). חִידָה, *chidah*, an enigma (like the riddle of Samson, Judg. xiv. 14), or "dark saying," as the A. V. has it in Ps. xlix. 4, lxxviii. 2. The former passage illustrates the musical, and therefore lyric character of these "dark sayings: "I will incline mine ear to a parable, I will open my dark saying upon the harp." *Māshāl* and *chidah* are used as convertible terms in Ez. xvii. 2. Lastly, to this class belong מְלִיטָה, *mēlitsāh*, a mocking, ironical poem (Hab. ii. 6).

5. תְּפִלָּה, *tēphillāh*, prayer, is the title of Pss. xvii., lxxxvi., xc., cii., cxlii., and Hab. iii. All these are strictly lyrical compositions, and the title may have been assigned to them either as denoting the object with which they were written, or the use to which they were applied. As Ewald justly observes, all lyric poetry of an elevated kind, in so far as it reveals the soul of the poet in a pure, swift outpouring of itself, is of the nature of a prayer; and hence the term "prayer" was applied to a collection of David's songs, of which Ps. lxxii. formed the conclusion.

II. *Gnomic Poetry.*—The second grand division of Hebrew poetry is occupied by a class of poems which are peculiarly Shemitic, and which represent the nearest approaches made by the people of that race to anything like philosophic thought. Reasoning there is none: we have only results, and those rather the product of observation and reflection than of induction or argumentation. As lyric poetry is the expression of the poet's own feelings and impulses, so gnomic poetry is the form in which the desire of communicating knowledge to others finds vent. There might possibly be an intermediate stage in which the poets gave out their experiences for their own pleasure merely, and afterwards applied them to the instruction of others, but this could scarcely have been of long continuance. The impulse to teach makes the teacher, and the teacher must have an audience. It has been already remarked that gnomic poetry, as a whole, requires for its development a period of national tranquillity. Its germ is the floating proverbs which pass current in the mouths of the people, and embody the experiences of many with the wit of one. From this small beginning it arises, at a time when the experience of the nation has become matured, and the mass of truths which are the result of such experience have passed into circulation. The fame of Solomon's wisdom was so great that no less than three thousand proverbs are attributed to him, this being the form in which the Hebrew mind found its most

<sup>a</sup> Lowth (Is. xiv. 4) understands *māshāl* to be "the general name for poetic style among the Hebrews, including every sort of it, as ranging under one, or other,

of all the characters, of sententious, figurative, and sublime."

congenial utterance. The sayer of sententious sayings was to the Hebrews the wise man, the philosopher. Of the earlier isolated proverbs but few examples remain. One of the earliest occurs in the mouth of David, and in his time it was the proverb of the ancients: "from the wicked cometh wickedness" (1 Sam. xxiv. 13 [14]). Later on, when the fortunes of the nation were obscured, their experience was embodied in terms of sadness and despondency: "The days are prolonged, and every vision faileth," became a saying and a by-word (Ez. xiii. 22); and the feeling that the people were suffering for the sins of their fathers took the form of a sentence, "The fathers have eaten sour grapes, and the children's teeth are set on edge" (Ez. xviii. 2). Such were the models which the gnomic poet had before him for imitation. These detached sentences may be fairly assumed to be the earliest form, of which the fuller apophthegm is the expansion, swelling into sustained exhortations, and even dramatic dialogue.

III. *Dramatic Poetry.* — It is impossible to assert that no form of the drama existed among the Hebrew people; the most that can be done is to examine such portions of their literature as have come down to us, for the purpose of ascertaining how far any traces of the drama proper are discernible, and what inferences may be made from them. It is unquestionably true, as Ewald observes, that the Arab reciters of romances will many times in their own persons act out a complete drama in recitation, changing their voice and gestures with the change of person and subject. Something of this kind may possibly have existed among the Hebrews; but there is no evidence that it did exist, nor any grounds for making even a probable conjecture with regard to it. A rude kind of farce is described by Mr. Lane (*Mod. Eg.* ii. chap. vi.), the players of which "are called *Mohhabbaeze'n*. These frequently perform at the festivals prior to weddings and circumcisions, at the houses of the great; and sometimes attract rings of auditors and spectators in the public places in Cairo. Their performances are scarcely worthy of description: it is chiefly by vulgar gestures and indecent actions that they amuse and obtain applause. The actors are only men and boys: the part of a woman being always performed by a man or boy in female attire." Then follows a description of one of these plays, the plot of which was extremely simple. But the mere fact of the existence of these rude exhibitions among the Arabs and Egyptians of the present day is of no weight when the question to be decided is, whether the Song of Songs was designed to be so represented, as a simple pastoral drama. Of course, in considering such a question, reference is made only to the external form of the poem, and, in order to prove it, it must be shown that the dramatic is the only form of representation which it could assume, and not that, by the help of two actors and a chorus, it is capable of being exhibited in a dramatic form. All that has been done, in our opinion, is the latter. It is but fair, however, to give the views of those who hold the opposite. Ewald maintains that the Song of Songs is designed for a simple stage, because it develops a complete action and admits of definite pauses in the action, which are only suited to the drama. He distinguishes it in this respect from the Book of Job, which is dramatic in form only, though, as it is occupied with a sublime subject, he compares it with *tragedy*, while the Song of Songs, being taken from the common life of the nation, may be

compared to *comedy*. The one comparison is probably as appropriate as the other. In Ewald's division the poem falls into 13 cantos of tolerably equal length, which have a certain beginning and ending, with a pause after each. The whole forms four acts for which three actors are sufficient: a hero, a maiden, and a chorus of women, these being all who would be on the stage at once. The following are the divisions of the acts:—

First Act, i. 2 - ii. 7 . . .	1st canto, i. 2 - 8.
	2d " i. 9 - ii. 7.
Second Act, ii. 8 - iii. 5	3d " ii. 8 - 17.
	4th " iii. 1 - 5.
	5th " iii. 6 - 11.
	6th " iv. 1 - 7.
	7th " iv. 8 - v. 1.
Third Act, iii. 6 - viii. 4	8th " v. 2 - 8.
	9th " v. 9 - vi. 3.
	10th " vi. 4 - vii. 1.
	11th " vii. 2 - 10.
	12th " vii. 10 - viii. 4.
Fourth Act, viii. 5-14. . .	13th canto.

The latest work on the subject is that of M. Renan (*Le Cantique des Cantiques*), who has given a spirited translation of the poem, and arranged it in acts and scenes, according to his own theory of the manner in which it was intended to be represented. He divides the whole into 16 cantos, which form five acts and an epilogue. The acts and scenes are thus arranged:—

First Act, i. 2 - ii. 7 . . .	Scene 1. i. 2-6.
	" 2. i. 7-11.
	" 3. i. 12 - ii. 7.
Second Act, ii. 8 - iii. 5 . . .	Scene 1. ii. 8-17.
	" 2. iii. 1-5.
Third Act, iii. 6 - v. 1 . . .	Scene 1. iii. 6-11.
	" 2. iv. 1-6.
	" 3. iv. 7-v. 1
Fourth Act, v. 2 - vi. 3 . . .	of a single scene.
Fifth Act, vi. 4 - viii. 7 . . .	Scene 1. vi. 4-9.
	" 2. vi. 10 - vii. 11
	" 3. vii. 12 - viii. 4.
	" 4. viii. 5-7.
Epilogue, viii. 8-14.	

But M. Renan, who is compelled, in accordance with his own theory of the mission of the Semitic races, to admit that no trace of anything approaching to the regular drama is found among them, does not regard the Song of Songs as a drama in the same sense as the products of the Greek and Roman theatres, but as dramatic poetry in the widest application of the term, to designate any composition conducted in dialogue and corresponding to an action. The absence of the regular drama he attributes to the want of a complicated mythology, analogous to that possessed by the Indo-European peoples. Monotheism, the characteristic religious belief of the Semitic races, stifled the growth of a mythology and checked the development of the drama. Be this as it may, dramatic representation appears to have been alien to the feelings of the Hebrews. At no period of their history before the age of Herod is there the least trace of a theatre at Jerusalem, whatever other foreign innovations may have been adopted, and the burst of indignation which the high-priest Jason incurred for attempting to establish a gymnasium and to introduce the Greek games is a significant symptom of the repugnance which the people felt for such spectacles. The same antipathy remains to the present day among the Arabs, and the attempts to introduce theatres at Reyrout and in Algeria have signally failed. But, says M

Renan), the Song of Songs is a dramatic poem. There were no public performances in Palestine, therefore it must have been represented in private; and he is compelled to frame the following hypothesis concerning it: that it is a *libretto* intended to be completed by the play of the actors and by music, and represented in private families, probably at marriage-feasts, the representation being extended over the several days of the feast. The last supposition removes a difficulty which has been felt to be almost fatal to the idea that the poem is a continuously developed drama. Each act is complete in itself; there is no suspended interest, and the structure of the poem is obvious and natural if we regard each act as a separate drama intended for one of the days of the feast. We must look for a parallel to it in the Middle Ages, when, besides the mystery plays, there were scenic representations sufficiently developed. The Song of Songs occupies the middle place between the regular drama and the eclogue or pastoral dialogue, and finds a perfect analogue, both as regards subject and scenic arrangement, in the most celebrated of the plays of Arras, *Le Jeu de Robin et Marion*. Such is M. Renan's explanation of the outward form of the Song of Songs, regarded as a portion of Hebrew literature. It has been due to his great learning and reputation to give his opinion somewhat at length; but his arguments in support of it are so little convincing that it must be regarded at best but as an ingenious hypothesis, the groundwork of which is taken away by M. Renan's own admission that dramatic representations are alien to the spirit of the Semitic races. The simple corollary to this proposition must be that the Song of Songs is not a drama, but in its external form partakes more of the nature of an eclogue or pastoral dialogue.

It is scarcely necessary after this to discuss the question whether the Book of Job is a dramatic poem or not. Inasmuch as it represents an action and a progress, it is a drama as truly and really as any poem can be which develops the working of passion, and the alternations of faith, hope, distrust, triumphant confidence, and black despair, in the struggle which it depicts the human mind as engaged in, while attempting to solve one of the most intricate problems it can be called upon to regard. It is a drama as life is a drama, the most powerful of all tragedies; but that it is a dramatic poem, intended to be represented upon a stage, or capable of being so represented, may be confidently denied.

One characteristic of Hebrew poetry, not indeed peculiar to it, but shared by it in common with the literature of other nations, is its intensely national and local coloring. The writers were Hebrews of the Hebrews, drawing their inspiration from the mountains and rivers of Palestine, which they have immortalized in their poetic figures, and even while uttering the sublimest and most universal truths never forgetting their own nationality in its narrow and intensest form. Their images and metaphors, says Munk (*Palestine*, p. 444 a), "are taken chiefly from nature and the phenomena of Palestine and the surrounding countries, from the pastoral life, from agriculture and the national history. The stars of heaven, the sand of the seashore, are the image of a great multitude. Would they speak of a mighty host of enemies invading the country, they are the swift torrents or the roaring waves of the sea, or the clouds that bring on tempest; the war-chariots advance swiftly like

lightning or the whirlwinds. Happiness rises as the dawn and shines like the daylight; the blessing of God descends like the dew or the bountiful rain. The anger of Heaven is a devouring fire that annihilates the wicked as the flame which devours the stubble. Unhappiness is likened to days of clouds and darkness; at times of great catastrophes the sun sets in broad day, the heavens are shaken, the earth trembles, the stars disappear, the sun is changed into darkness and the moon into blood, and so on. The cedars of Lebanon, the oaks of Bashan, are the image of the mighty man, the palm and the reed of the great and the humble, briars and thorns of the wicked; the pious man is an olive ever green, or a tree planted by the water-side. The animal kingdom furnished equally a large number of images: the lion, the image of power, is also, like the wolf, bear, etc., that of tyrants and violent and rapacious men; and the pious who suffers is a feeble sheep led to the slaughter. The strong and powerful man is compared to the he-goat or the bull of Bashan; the kine of Bashan figure, in the discourses of Amos, as the image of rich and voluptuous women; the people who rebel against the Divine will are a refractory heifer. Other images are borrowed from the country life and from the life domestic and social: the chastisement of God weighs upon Israel like a wagon laden with sheaves; the dead cover the earth as the dung which covers the surface of the fields. The impious man sows crime and reaps misery, or he sows the wind and reaps the tempest. The people yielding to the blows of their enemies are like the corn crushed beneath the threshing instrument. God tramples the wine in the wine-press when He chastises the impious and sheds their blood. The wrath of Jehovah is often represented as an intoxicating cup, which He causes those to empty who have merited his chastisement: terrors and anguish are often compared to the pangs of childbirth. Peoples, towns, and states are represented by the Hebrew poets under the image of daughters or wives; in their impiety they are courtesans or adulteresses. The historical allusions of most frequent occurrence are taken from the catastrophe of Sodom and Gomorrah, the miracles of the departure from Egypt, and the appearance of Jehovah on Sinai." Examples might easily be multiplied in illustration of this remarkable characteristic of the Hebrew poets: they stand thick upon every page of their writings, and in striking contrast to the vague generalizations of the Indian philosophic poetry.

In Hebrew, as in other languages, there is a peculiarity about the diction used in poetry—a kind of poetical dialect, characterized by archaic and irregular forms of words, abrupt constructions, and unusual inflexions, which distinguish it from the contemporary prose or historical style. It is universally observed that archaic forms and usages of words linger in the poetry of a language after they have fallen out of ordinary use. A few of these forms and usages are here given from Gesenius's *Lehrgebäude*. The Piel and Hiphil voices are used intransitively (Jer. li. 56; Ez. x. 7; Job xxix. 24): the apocopated future is used as a present (Job xv. 33; Ps. xi. 6; Is. xlii. 6). The termination  $\text{לָ}$  is found for the ordinary feminine  $\text{לַ}$  (Ex. xv. 2, Gen. xlix. 23; Ps. cxxxii. 4); and for the plural  $\text{לָ}$  we have  $\text{לָ}$  (Job xv. 13; Ez.

xxvi. 18) and  $\text{וְ} \text{לֹ} \text{לְ} \text{וְ} \text{לֹ}$  (Jer. xxii. 14; Am. vii. 1). The verbal suffixes,  $\text{מוֹ}$ ,  $\text{מָו}$ , and  $\text{מֹו}$  (Ex. xv. 9), and the pronominal suffixes to nouns  $\text{מֹו}$  for  $\text{מֹ}$ , and  $\text{וְ} \text{וְ} \text{וְ}$  for  $\text{וְ}$  (Hab. iii. 10), are peculiar to the poetical books; as are  $\text{וְ} \text{וְ}$  (Ps. cxvi. 12),  $\text{וְ} \text{וְ}$  (Deut. xxxii. 37; Ps. xi. 7), and the more unusual forms,  $\text{וְ} \text{וְ}$  (Ez. xl. 16),  $\text{וְ} \text{וְ}$  (Ez. i. 11),  $\text{וְ} \text{וְ}$  (Ez. xiii. 20). In poetical language also we find  $\text{וְ} \text{וְ}$  or  $\text{וְ} \text{וְ}$  for  $\text{וְ}$ ,  $\text{וְ} \text{וְ}$  for  $\text{וְ}$ ; the plural forms of the prepositions,  $\text{וְ} \text{וְ}$  for  $\text{וְ}$ ,  $\text{וְ} \text{וְ}$  for  $\text{וְ}$ ,  $\text{וְ} \text{וְ}$ ; and the peculiar forms of the nouns,  $\text{וְ} \text{וְ}$  for  $\text{וְ}$ ,  $\text{וְ} \text{וְ}$  for  $\text{וְ}$ , and so on.

But the form of Hebrew poetry is its distinguishing characteristic, and what this form is, has been a vexed question for many ages. The Therapeutæ, as described by Philo (*de Vita Contempl.* § 3, vol. ii. p. 475, ed. Mang.), sang hymns and psalms of thanksgiving to God, in divers measures and strains; and these were either new or ancient ones composed by the old poets, who had left behind them measures and melodies of trimeter verses, of processional songs, of hymns, of songs sung at the offering of libations, or before the altar, and continuous choral songs, beautifully measured out in strophes of intricate character (§ 10, p. 484). The value of Philo's testimony on this point may be estimated by another passage in his works, in which he claims for Moses a knowledge of numbers and geometry, the theory of rhythm, harmony, and metre, and the whole science of music, practical and theoretical (*de Vita Mosis*, i. 5, vol. ii. p. 84). The evidence of Josephus is as little to be relied upon. Both these writers labored to magnify the greatness of their own nation, and to show that in literature and philosophy the Greeks had been anticipated by the Hebrew barbarians. This idea pervades all their writings, and it must always be borne in mind as the key-note of their testimony on this as on other points. According to Josephus (*Ant.* ii. 16, § 4), the Song of Moses at the Red Sea (Ex. xv.) was composed in the hexameter measure (*ἐν ἑξαμέτρῳ ᾠδῆς*); and again (*Ant.* iv. 8, § 44), the song in Deut. xxxii. is described as a hexameter poem. The Psalms of David were in various metres, some trimeters and some pentameters (*Ant.* vii. 12, § 3). Eusebius (*de Præp. Evang.* xi. 3, 514, ed. Col. 1688) characterizes the great Song of Moses and the 118th (119th) Psalm as metrical compositions in what the Greeks call the heroic metre. They are said to be hexameters of sixteen syllables. The other verse compositions of the Hebrews are said to be in trimeters. This saying of Eusebius is attacked by Julian (*Cyrril. contr. Jul.* vii. 2), who on his part endeavored to prove the Hebrews devoid of all culture. Jerome (*Præf. in Iliad*) appeals to Philo, Josephus, Origen, and Eusebius, for proof that the Psalter, the Lamentations of Jeremiah, and almost all the songs of Scripture, are composed in metre, like the odes of Horace, Pindar, Alcæus, and Sappho. Again, he says that the Book of Job, from

iii. 3 to xlii. 6, is in hexameters, with dactyls and spondees, and frequently, on account of the peculiarity of the Hebrew language, other feet which have not the same syllables but the same time. In *Epist. ad Paulam* (*Opp.* ii. 709, ed. Martianay) occurs a passage which shows in some measure how far we are to understand literally the terms which Jerome has borrowed from the verse literature of Greece and Rome, and applied to the poetry of the Hebrews. The conclusion seems inevitable that these terms are employed simply to denote a general external resemblance, and by no means to indicate the existence, among the poets of the Old Testament, of a knowledge of the laws of metre, as we are accustomed to understand the term. There are, says Jerome, four alphabetical Psalms, the 110th (111th), 111th (112th), 118th (119th), and the 144th (145th). In the first two, one letter corresponds to each clause or versicle, which is written in trimeter iambs. The others are in tetrameter iambs, like the song in Deuteronomy. In Ps. 118 (119), eight verses follow each letter: in Ps. 144 (145), a letter corresponds to a verse. In Lamentations we have four alphabetical acrostics, the first two of which are written in a kind of Sapphic metre; for three clauses which are connected together and begin with one letter (*i. e.* in the first clause) close with a period in heroic measure (*Heroici comma*). The third is written in trimeter, and the verses in threes each begin with the same letter. The fourth is like the first and second. The Proverbs end with an alphabetical poem in tetrameter iambs, beginning, "A virtuous woman who can find?" In the *Præf. in Chron. Euseb.* Jerome compares the metres of the Psalms to those of Horace and Pindar, now running in iambs, now ringing with Alcaics, now swelling with Sapphics, now beginning with a half foot. What, he asks, is more beautiful than the song of Deuteronomy and Isaiah? What more weighty than Solomon? What more perfect than Job? All which, as Josephus and Origen testify, are composed in hexameters and pentameters. There can be little doubt that these terms are mere generalities, and express no more than a certain rough resemblance, so that the songs of Moses and Isaiah may be designated hexameters and pentameters, with as much propriety as the first and second chapters of Lamentations may be compared to Sapphic odes. The resemblance of the Hebrew verse composition to the classic metres, is expressly denied by Gregory of Nyssa (1 *Tract. in Psalm.* cap. iv.). Augustine (*Ep.* 131 ad Numerium) confesses his ignorance of Hebrew, but adds that those skilled in the language believed the Psalms of David to be written in metre. Isidore of Seville (*Orig.* i. 18) claims for the heroic metre the highest antiquity, inasmuch as the Song of Moses was composed in it, and the Book of Job, who was contemporary with Moses, long before the times of Pherecydes and Homer, is written in dactyls and spondees. Joseph Scaliger (*Animadv. ad Eus. Chron.* p. 6 b, etc.) was one of the first to point out the fallacy of Jerome's statement with regard to the metres of the Psalter and the Lamentations, and to assert that these books contained no verse bound by metrical laws, but that their language was merely prose, animated by a poetic spirit. He admitted the Song of Moses in Deuteronomy, the Proverbs, and Job, to be the only books in which there was necessarily any trace of rhythm, and this rhythm he compares to that of two dimeter iam-

bles, sometimes of more, sometimes of fewer syllables as the sense required. Gerhard Vossius (*de Nat. et Const. Artis Poët.* lib. 1, c. 13, § 2) says, that in Job and the Proverbs there is rhythm but no metre; that is, regard is had to the number of syllables but not to their quantity. In the Psalms and Lamentations not even rhythm is observed.

But, in spite of the opinions pronounced by these high authorities, there were still many who believed in the existence of a Hebrew metre, and in the possibility of recovering it. The theories proposed for this purpose were various. Gomarus, professor at Groningen (*Davidis Lyra*, Lugd. Bat. 1637), advocated both rhymes and metre; for the latter he laid down the following rules. The vowel alone, as it is long or short, determines the length of a syllable. *Shēva* forms no syllable. The periods or versicles of the Hebrew poems never contain less than a distich, or two verses, but in proportion as the periods are longer they contain more verses. The last syllable of a verse is indifferently long or short. This system, if system it may be called (for it is equally adapted for prose), was supported by many men of note; among others by the younger Buxtorf, Heinsius, L. de Dieu, Constantin l'Empereur, and Hottinger. On the other hand it was vigorously attacked by L. Cappellus, Calovius, Danhauer, Pfeiffer, and Solomon Van Til. Towards the close of the 17th century Marcus Meibomius announced to the world, with an amount of pompous assurance which is charming, that he had discovered the lost metrical system of the Hebrews. By the help of this mysterious secret, which he attributed to divine revelation, he proposed to restore not only the Psalms but the whole Hebrew Scriptures, to their pristine condition, and thus confer upon the world a knowledge of Hebrew greater than any which had existed since the ages which preceded the Alexandrine translators. But Meibomius did not allow his enthusiasm to get the better of his prudence, and the condition on which this portentous secret was to be made public was, that six thousand curious men should contribute 5*l.* sterling a-piece for a copy of his book, which was to be printed in two volumes folio. It is almost needless to add that his scheme fell to the ground. He published some specimens of his restoration of ten psalms, and six entire chapters of the Old Testament in 1690. The glimpses which he gives of his grand secret are not such as would make us regret that the knowledge of it perished with him. The whole Book of Psalms, he says, is written in distichs, except the first psalm, which is in a different metre, and serves as an introduction to the rest. They were therefore intended to be sung, not by one priest, or by one chorus, but by two. Meibomius "was severely chastised by J. H. Maius, B. H. Gebhardus, and J. G. Zentgravius" (Jebb, *Sacr. Lit.* p. 11). In the last century the learned Francis Hare, bishop of Chichester, published an edition of the Hebrew Psalms, metrically divided, to which he prefixed a dissertation on the ancient poetry of the Hebrews (*Psaln. lib. in versiculos metricè divisis*, etc., Lond. 1736). Bishop Hare maintained that in Hebrew poetry no regard was had to the quantity of syllables. He regarded *Shēvas* as long vowels, and *ong* vowels as short at his pleasure. The rules which he laid down are the following. In Hebrew poetry all the feet are dissyllables, and no regard is had to the quantity of a syllable. Clauses consist of an

equal or unequal number of syllables. If the number of syllables be equal, the verses are trochaic; if unequal, iambic. Periods for the most part consist of two verses, often three or four, sometimes more. Clauses of the same periods are of the same kind, that is, either iambic or trochaic, with very few exceptions. Trochaic clauses generally agree in the number of the feet, which are sometimes three, as in Pss. xciv. 1, cvi. 1, and this is the most frequent; sometimes five, as in P's. ix. 5. In iambic clauses the number of feet is sometimes the same, but they generally differ. Both kinds of verse are mixed in the same poem. In order to carry out these rules they are supplemented by one which gives to the versifier the widest license. Words and verses are contracted or lengthened at will, by syncope, elision, etc. In addition to this, the bishop was under the necessity of maintaining that all grammarians had hitherto erred in laying down the rules of ordinary punctuation. His system, if it may be so called, carries its own refutation with it, but was considered by Lowth to be worthy a reply under the title of *Metricæ Harivmæ Brevis Confutatio*, printed at the end of his *De Sacra Poes. Heb. Prælectiones*, etc.

Anton (*Conject. de Metro Heb. Ant.* Lips. 1770), admitting the metre to be regulated by the accents, endeavored to prove that in the Hebrew poems was a highly artistic and regular system, like that of the Greeks and Romans, consisting of strophes, antistrophes, epodes, and the like; but his method is as arbitrary as Hare's. The theory of Lautwein (*Versuch einer richtigen Theorie von der bibl. Verskunst*, Tüb. 1775) is an improvement upon those of his predecessors, inasmuch as he rejects the measurement of verse by long and short syllables, and marks the scansion by the tone accent. He assumes little more than a free rhythm: the verses are distinguished by a certain relation in their contents, and connected by a poetic euphony. Sir W. Jones (*Comment. Poes. Asiat.* 1774) attempted to apply the rules of Arabic metre to Hebrew. He regarded as a long syllable one which terminated in a consonant or quiescent letter (ס, ך, ם); but he did not develop any system. The present Arabic prosody, however, is of comparatively modern invention; and it is not consistent with probability that there could be any system of versification among the Hebrews like that imagined by Sir W. Jones, when in the example he quotes of Cant. i. 5, he refers the first clause of the verse to the second, and the last to the fifteenth kind of Arabic metre. Greve (*Ultima Capita Jobi*, etc. 1791) believed that in Hebrew, as in Arabic and Syriac, there was a metre, but that it was obscured by the false orthography of the Masorets. He therefore assumed for the Hebrew an Arabic vocalization, and with this modification he found iambic trimeters, dimeters, and tetrameters, to be the most common forms of verse, and lays down the laws of versification accordingly. Bellermann (*Versuch über die Metrik der Hebräer*, 1813) was the last who attempted to set forth the old Hebrew metres. He adopted the Masoretic orthography and vocalization, and determined the quantity of syllables by the accentuation, and what he termed the "Morensystem," denoting by *moren* the compass of a single syllable. Each syllable which has not the tone accent must have three *moren*; every syllable which has the tone accent may have either four or two, but generally three. The *moren* are

reckoned as follows: a long vowel has two; a short vowel, one; every consonant, whether single or double, has one *more*. *Sheva* simple or composite is not reckoned. The quiescent letters have no *more*. *Dagesh forte* compensative has one; so has *metheg*. The majority of dissyllable and trisyllable words, having the accent on the last syllable, will thus form iambs and anapaests. But as many have the accent on the penultimate, these will form trochees. The most common kinds of feet are iambs and anapaests, interchanging with trochees and tribrachs. Of verses composed of these feet, though not uniform as regards the numbers of the feet, consist, according to Bellermann, the poems of the Hebrew Scriptures.

Among those who believed in the existence of a Hebrew metre, but in the impossibility of recovering it, were Carpov, Lowth, Pfeiffer, Herder to a certain extent, Jahn, Bauer, and Buxtorf. The opinions of Lowth, with regard to Hebrew metre, are summed up by Jebb (*Sacr. Lit.* p. 16) as follows: "He begins by asserting, that certain of the Hebrew writings are not only animated with the true poetic spirit, but, in some degree, couched in poetic numbers; yet, he allows, that the quantity, the rhythm, or modulation of Hebrew poetry, not only is unknown, but admits of no investigation by human art or industry; he states, after Abarbanel, that the Jews themselves disclaim the very memory of metrical composition; he acknowledges, that the artificial conformation of the sentences, is the sole indication of metre in these poems; he barely maintains the *credibility* of attention having been paid to numbers or feet in their compositions; and, at the same time, he confesses the utter impossibility of determining, whether Hebrew poetry was modulated by the ear alone, or according to any definite and settled rules of prosody." The opinions of Scaliger and Vossius have been already referred to. Vitringa allows to Isaiah a kind of oratorical measure, but adds that it could not on this account be rightly termed poetry. Michaelis (*Not. 4 in Præl.* iii.) in his notes on Lowth, held that there never was metre in Hebrew, but only a free rhythm, as in recitative, though even less trammelled. He declared himself against the Masoretic distinction of long and short vowels, and made the rhythm to depend upon the tone syllable; adding, with regard to fixed and regular metre, that what has evaded such diligent search he thought had no existence. On the subject of the rhythmical character of Hebrew poetry, as opposed to metrical, the remarks of Jebb are remarkably appropriate. "Hebrew poetry," he says (*Sacr. Lit.* p. 20), "is universal poetry: the poetry of all languages, and of all peoples: the collocation of words (whatever may have been the sound, for of this we are quite ignorant) is primarily directed to secure the best possible announcement and discrimination of the sense: let, then, a translator only be literal, and, so far as the genius of his language will permit, let him preserve the original order of the words, and he will infallibly put the reader in possession of all, or nearly all, that the Hebrew text can give to the best Hebrew scholar of the present day. Now, had there been originally metre, the case, it is presumed, could hardly have been such; somewhat must have been sacrificed to the importunities of metrical necessity; the sense could not have invariably predominated over the sound; and the poetry could not have been, as it unquestionably and emphatically is, a poetry, not of sounds or of words, but of things. Let

not this last assertion, however, be misinterpreted I would be understood merely to assert that sound and words in subordination to sound, do not in Hebrew, as in classical poetry, enter into the essence of the thing; but it is happily undeniable, that the words of the poetical Scriptures are exquisitely fitted to convey the sense; and it is highly probable, that, in the lifetime of the language, the sounds were sufficiently harmonious: when I say sufficiently harmonious, I mean so harmonious as to render the poetry grateful to the ear in recitation, and suitable to musical accompaniment; for which purpose, the cadence of well-modulated prose would fully answer; a fact which will not be controverted by any person with a moderately good ear, that has ever heard a chapter of Isaiah skillfully read from our authorized translation, that has ever listened to one of Kent's Anthems well performed, or to a song from the Messiah of Handel."

Abarbanel (on Is. v.) makes three divisions of Hebrew poetry, including in the first the modern poems which, in imitation of the Arabic, are constructed according to modern principles of versification. Among the second class he arranges such as have no metre, but are adapted to melodies. In these occur the poetical forms of words, lengthened and abbreviated, and the like. To this class belong the songs of Moses in Ex. xv., Deut. xxxii., the song of Deborah, and the song of David. The third class includes those compositions which are distinguished not by their form but by the figurative character of their descriptions, as the Song of Songs, and the Song of Isaiah.

Among those who maintain the absence of any regularity perceptible to the ear in the composition of Hebrew poetry, may be mentioned Richard Simon (*Hist. Crit. du V. T.* i. c. 8, p. 57), Wasmuth (*Inst. Acc. Hebr.* p. 14), Alstedius (*Enc. Bibl.* c. 27, p. 257), the author of the book Cozri, and R. Azariah de' Kossi, in his book entitled *Meor Enayim*. The author of the book Cozri held that the Hebrews had no metre bound by the laws of diction, because their poetry being intended to be sung was therefore independent of metrical laws. R. Azariah expresses his approbation of the opinions of Cozri and Abarbanel, who deny the existence of songs in Scripture composed after the manner of modern Hebrew poems, but he adds nevertheless, that beyond doubt there are other measures which depend upon the sense. Mendelssohn (on Ex. xv.) also rejects the system of יתדות ותנועות (literally, pegs and vowels).<sup>a</sup> Rabbi Azariah appears to have anticipated Bishop Lowth in his theory of parallelism: at any rate his treatise contains the germ which Lowth developed, and may be considered, as Jebb calls it, the technical basis of his system. But it also contains other elements, which will be alluded to hereafter. His conclusion, in Lowth's words (*Isaiah*, pre-diss.), was as follows: "That the sacred songs have undoubtedly certain measures and proportions which, however, do not consist in the number of syllables, perfect or imperfect, according to the form of the modern verse which the Jews make use of, and which is borrowed from the Arabians (though the Arabic prosody, he observes, is too

<sup>a</sup> יתד is a syllable, simple or compound, beginning with a consonant bearing moving *Sitra* (Moses and Bernard's *Heb. Gr.* ii. 203).

complicated to be applied to the Hebrew language); but in the number of things, and of the parts of things, — that is, the subject, and the predicate, and their adjuncts, in every sentence and proposition. Thus a phrase, containing two parts of a proposition, consists of two measures; add another containing two more, and they become four measures; another again, containing three parts of a proposition, consists of three measures; add to it another of the like, and you have six measures."

The following example will serve for an illustration:—

Thy-right-hand, O-Jehovah, is-glorious in-power,  
Thy-right-hand, O-Jehovah, hath-crushed the-enemy.

The words connected by a hyphen form a term, and the two lines, forming four measures each, may be called tetrameters. "Upon the whole, the author concludes, that the poetical parts of the Hebrew Scriptures are not composed according to the rules and measures of certain feet, dissyllables, trisyllables, or the like, as the poems of the modern Jews are; but nevertheless have undoubtedly other measures which depend on things, as above explained. For which reason they are more excellent than those which consist of certain feet, according to the number and quantity of syllables. Of this, says he, you may judge yourself in the Songs of the Prophets. For do you not see, if you translate some of them into another language, that they still keep and retain their measure, if not wholly, at least in part? which cannot be the case in those verses, the measures of which arise from a certain quantity and number of syllables."

Lowth expresses his general agreement with R. Azariah's exposition of the rhythmus of things; but instead of regarding terms, or phrases, or senses, in single lines, as measures, he considered "only that relation and proportion of one verse to another, which arises from the correspondence of terms, and from the form of construction; from whence results a rhythmus of propositions, and a harmony of sentences." But Lowth's system of parallelism was more completely anticipated by Schoettgen in a treatise, of the existence of which the bishop does not appear to have been aware. It is found in his *Horæ Hebraicæ*, vol. i. pp. 1249-1263, diss. vi., "de Exergasia Sacra." This *exergasia* he defines to be, the conjunction of entire sentences signifying the same thing; so that *exergasia* bears the same relation to sentences that synonymy does to words. It is only found in those Hebrew writings which rise above the level of historical narrative and the ordinary kind of speech. Ten canons are then laid down, each illustrated by three examples, from which it will be seen how far Schoettgen's system corresponded with Lowth's.

(1.) Perfect *exergasia* is when the members of the two clauses correspond, each to each; as in Ps. xxxiii. 7; Num. xxiv. 17; Luke i. 47. (2.) Sometimes in the second clause the subject is omitted, as in Is. i. 18; Prov. vii. 19; Ps. cxxix. 3. (3.) Sometimes part of the subject is omitted, as in Ps. xxxvii. 30, cii. 28; Is. liii. 5. (4.) The predicate is sometimes omitted in the second clause, as in Num. xxiv. 5; Ps. xxxiii. 12. (5.) Sometimes part only of the predicate is omitted, as in Ps. lvii. 9, ciii. 1, cxxix. 7. (6.) Words are added in one member which are omitted in the other, as in Num. cxxii. 18; Ps. cii. 28; Dan. xii. 3. (7.) Sometimes two propositions will occur, treating of different things, but referring to one general proposition, as

in Ps. xciv. 9, cxxviii. 3; Wisd. iii. 16. (8.) Cases occur, in which the second proposition is the contrary of the first, as in Prov. xv. 8, xiv. 1, 11. (9.) Entire propositions answer each to each, although the subject and predicate are not the same, as in Ps. li. 7, cxix. 168; Jer. viii. 22. (10.) *Exergasia* is found with three members, as in Ps. i. 1, cxxx. 5, lii. 9. These canons Schoettgen applied to the interpretation of Scripture, of which he gives examples in the remainder of this and the following dissertation.

But whatever may have been achieved by his predecessors, there can be no question that the delivery of Lowth's lectures on Hebrew Poetry, and the subsequent publication of his translation of Isaiah, formed an era in the literature of the subject, more marked than any that had preceded it. Of his system it will be necessary to give a somewhat detailed account; for whatever may have been done since his time, and whatever modifications of his arrangement may have been introduced, all subsequent writers have confessed their obligations to the two works above mentioned, and have drawn their inspiration from them. Starting with the alphabetical poems as the basis of his investigation, because that in them the verses or stanzas were more distinctly marked, Lowth came to the conclusion that they consist of verses properly so called, "of verses regulated by some observation of harmony or cadence; of measure, numbers, or rhythms," and that this harmony does not arise from rhyme, but from what he denominates parallelism. Parallelism he defines to be the correspondence of one verse or line with another, and divides it into three classes, synonymous, antithetic, and synthetic.

1. Parallel lines *synonymous* correspond to each other by expressing the same sense in different but equivalent terms, as in the following examples, which are only two of the many given by Lowth:

"O-Jehovah. in-thy-strength the-king shall-rejoice;  
And-in-thy-salvation how-greatly shall-he-exult!  
The-desire of-his-heart thou-hast-granted unto-him;  
And-the-request of-his-lips thou-hast-not denied."

Ps. xxi. 1, 2

"For the-moth shall-consume-them like-a-garment;  
And-the-worm shall-eat-them like wool:  
But-my-righteousness shall-endure for-ever;  
And-my-salvation to-the-age-of-ages." — Is. li. 8.

It will be observed from the examples which Lowth gives that the parallel lines sometimes consist of three or more synonymous terms, sometimes of two, sometimes only of one. Sometimes the lines consist each of a double member, or two propositions, as Ps. cxliv. 5, 6; Is. lxxv. 21, 22. Parallels are formed also by a repetition of part of the first sentence (Ps. lxxvii. 1, 11, 16; Is. xxvi. 5, 6; Hos. vi. 4); and sometimes a part has to be supplied from the former to complete the sentence (2 Sam. xxii. 41; Job xxvi. 5; Is. xli. 28). Parallel triplets occur in Job iii. 4, 6, 9; Ps. cxii. 10; Is. ix. 20; Joel iii. 13. Examples of parallels of four lines, in which two distichs form one stanza, are Ps. xxxvii. 1, 2; Is. i. 3, xlix. 4; Am. i. 2. In periods of five lines the odd line sometimes comes in between two distichs, as in Job viii. 5, 6; Is. xlvi. 7; Hos. xiv. 9; Joe. iii. 16; or after two distichs closes the stanza, as in Is. xlv. 26. Alternate parallelism in stanzas of four lines is found in Ps. ciii. 11, 12; Is. xxx. 16 but the most striking examples of the alternate quatrain are Deut. xxxii. 25, 42, the first line forming a continuous sense with the third, and the second with the fourth (comp. Is. xxxv. 6; Gen.

xliv. 6). In Is. l. 10 we find an alternate quatrain followed by a fifth line. To this first division of Lowth's Jebb objects that the name *synonymous* is inappropriate, for the second clause, with few exceptions, "*diversifies* the preceding clause, and generally so as to rise above it, forming a sort of climax in the sense." This peculiarity was recognized by Lowth himself in his 4th Prælection, where he says, "*idem iterant, variant, augent,*" thus marking a cumulative force in this kind of parallelism. The same was observed by Abp. Newcome in his Preface to Ezekiel, where examples are given in which "the following clauses so diversify the preceding ones as to rise above them" (Is. xlii. 7, xliii. 16; Ps. xcv. 2, civ. 1). Jebb, in support of his own opinion, appeals to the passages quoted by Lowth (Ps. xxi. 12, cvii. 38; Is. lv. 6, 7), and suggests as a more appropriate name for parallelism of this kind, *cognate parallelism* (*Sacr. Lit.* p. 38).

2. Lowth's second division is *antithetic parallelism*; when two lines correspond with each other by an opposition of terms and sentiments; when the second is contrasted with the first, sometimes in expressions, sometimes in sense only, so that the degrees of antithesis are various. As for example—

"A wise son rejoiceth his father;  
But a foolish son is the grief of his mother."  
Prov. x. 1.

"The memory of the just is a blessing;  
But the name of the wicked shall rot."  
Prov. x. 7.

The gnomic poetry of the Hebrews abounds with illustrations of antithetic parallelism. Other examples are Ps. xx. 7, 8:—

"These in chariots, and those in horses,  
But we in the name of Jehovah our God will be strong.  
They are bowed down, and fallen;  
But we are risen, and maintain ourselves firm."

Compare also Ps. xxx. 5, xxxvii. 10, 11; Is. liv. 10, ix. 10. On these two kinds of parallelism Jebb appropriately remarks: "The *Antithetic Parallelism* serves to mark the broad distinctions between truth and falsehood, and good and evil: the *Cognate Parallelism* discharges the more difficult and more critical function of discriminating between different degrees of truth and good on the one hand, of falsehood and evil on the other" (*Sacr. Lit.* p. 39).

3. *Synthetic or constructive parallelism*, where the parallel "consists only in the similar form of construction; in which word does not answer to word, and sentence to sentence, as equivalent or opposite; but there is a correspondence and equality between different propositions, in respect of the shape and turn of the whole sentence, and of the constructive parts—such as noun answering to noun, verb to verb, member to member, negative to negative, interrogative to interrogative." One of the examples of constructive parallels given by Lowth is, Is. l. 5, 6:—

"The Lord Jehovah hath opened mine ear,  
And I was not rebellious;  
Neither did I withdraw myself backward—  
I gave my back to the smiters,  
And my cheeks to them that plucked off the hair;  
My face I hid not from shame and spitting."

Jebb gives as an illustration Ps. xix. 7-10:—

"The law of Jehovah is perfect, converting the soul,  
The testimony of Jehovah is sure, making wise the simple," etc.

It is instructive, as showing how difficult, if not impossible, it is to make any strict classification of Hebrew poetry, to observe that this very passage is given by Gesenius as an example of *synonymous parallelism*, while De Wette calls it *synthetic*. The illustration of *synthetic parallelism* quoted by Gesenius is Ps. xxvii. 4:—

"One thing I ask from Jehovah.  
It will I seek after—  
My dwelling in the house of Jehovah all the days  
of my life,  
To behold the beauty of Jehovah,  
And to inquire in his temple."

In this kind of parallelism, as Nordheimer (*Gram. Anal.* p. 87) observes, "an idea is neither repeated nor followed by its opposite, but is kept in view by the writer, while he proceeds to develop and enforce his meaning by accessory ideas and modifications."

4. To the three kinds of parallelism above described Jebb adds a fourth, which seems rather to be an unnecessary refinement upon than distinct from the others. He denominates it *introverted parallelism*, in which he says, "there are stanzas so constructed that, whatever be the number of lines, the first line shall be parallel with the last; the second with the penultimate; and so throughout in a order that looks inward, or, to borrow a military phrase, from flanks to centre" (*Sacr. Lit.* p. 53). Thus—

"My son, if thine heart be wise,  
My heart also shall rejoice;  
Yea, my reins shall rejoice  
When thy lips speak right things."  
Prov. xxiii. 15, 16.

"Unto Thee do I lift up mine eyes, O Thou that dwellest in the heavens;  
Behold as the eyes of servants to the hand of their masters;  
As the eyes of a maiden to the hands of her mistress:  
Even so look our eyes to Jehovah our God, until he have mercy upon us."—Ps. cxliii. 1, 2.

Upon examining these and the other examples quoted by Bishop Jebb in support of his new division, to which he attaches great importance, it will be seen that the peculiarity consists in the structure of the stanza, and not in the nature of the parallelism; and any one who reads Ewald's elaborate treatise on this part of the subject will rise from the reading with the conviction that to attempt to classify Hebrew poetry according to the character of the stanzas employed will be labor lost and in vain, resulting only in a system which is no system, and in rules to which the exceptions are more numerous than the examples.

A few words may now be added with respect to the classification proposed by De Wette, in which more regard was had to the rhythm. The four kinds of parallelism are—1. That which consists in an equal number of words in each member, as in Gen. iv. 23. This he calls the original and perfect kind of parallelism of members, which corresponds with metre and rhyme, without being identical with them (*Die Psalmen, Einl.* § 7). Under this head are many minor divisions.—2. Unequal parallelism in which the number of words in the members is not the same. This again is divided into—*a.* The simple, as Ps. lxxviii. 33. *b.* The composite, consisting of the synonymous (Job x. 1; Ps. xxxvi. 6), the antithetic (Ps. xv. 4), and the synthetic (Ps. xv. 5). *c.* That in which the simple member is dispropor

tionately small (Ps. xl. 10). *d.* Where the composite member grows up into three and more sentences (Ps. i. 3, lxx. 10). *e.* Instead of the close parallelism there sometimes occurs a short additional clause, as in Ps. xxiii. 3. — 3. Out of the parallelism which is unequal in consequence of the composite character of one member, another is developed, so that both members are composite (Ps. xxxi. 11). This kind of parallelism again admits of three subdivisions. — 4. Rhythmical parallelism, which lies merely in the external form of the diction. Thus in Ps. xix. 11 there is nearly an equal number of words: —

"Moreover by them was thy servant warned,  
In keeping of them there is great reward."

In Ps. xxx. 3 the inequality is remarkable. In Ps. xiv. 7 is found a double and a single member, and in Ps. xxxi. 23 two double members. De Wette also held that there were in Hebrew poetry the beginnings of a composite rhythmical structure like our strophes. Thus in Ps. xliii., xliiii., a refrain marks the conclusion of a larger rhythmical period. Something similar is observable in Ps. cvii. This artificial structure appears to belong to a late period of Hebrew literature, and to the same period may probably be assigned the remarkable gradational rhythm which appears in the Songs of Degrees, *e. g.* Ps. cxxi. It must be observed that this gradational rhythm is very different from the cumulative parallelism of the Song of Deborah, which is of a much earlier date, and bears traces of less effort in the composition. Strophes of a certain kind are found in the alphabetical pieces in which several Masoretic clauses belong to one letter (Ps. ix., x., xxxvii., cxix.; Lam. iii.), but the nearest approach to anything like a strophical character is found in poems which are divided into smaller portions by a refrain, and have the initial or final verse the same or similar (Ps. xxxix., xlii., xliiii.). In the opinion of some the occurrence of the word *Selah* is supposed to mark the divisions of the strophes.

It is impossible here to do more than refer to the essay of Koester (*Theol. Stud. und Krit.* 1831, pp. 40–114) on the strophes, or the parallelism of verses in Hebrew poetry; in which he endeavors to show that the verses are subject to the same laws of symmetry as the verse members; and that consequently Hebrew poetry is essentially strophical in character. Ewald's treatise requires more careful consideration; but it must be read itself, and a slight sketch only can here be given. Briefly thus: — Verses are divided into verse-members in which the number of syllables is less restricted, as there is no syllabic metre. A verse-member generally contains from seven to eight syllables. Two members, the rise and fall, are the fundamental constituents: thus (Judg. v. 3): —

"Hear, ye kings! give ear, ye princes!  
I to Jahve, I will sing."

So this all other modifications must be capable of being reduced. The variations which may take place may be either amplifications or continuations of the rhythm, or compositions in which a complete rhythm is made the half of a new compound, or we may have a diminution or enfeeblement of the original. To the two members correspond two thoughts which constitute the life of the verse, and each of these again may distribute itself. Gradations of symmetry are formed — 1. By the echo of the whole sentence, where the same sense which is given in the first member rises again in the second,

in order to exhaust itself more thoroughly (Gen. iv. 23; Prov. i. 8). An important word of the first member often reserves its force for the second, as in Ps. xx. 8; and sometimes in the second member a principal part of the sense of the first is further developed, as Ps. xlix. 5 [6]. — 2. When the thought trails through two members of a verse, as in Ps. cx. 5, it gives rise to a less animated rhythm (comp. also Ps. cxli. 10). — 3. Two sentences may be brought together as protasis and apodosis, or simply to form one complex thought; the external harmony may be dispensed with, but the harmony of thought remains. This may be called the intermediate rhythm. The forms of structure assumed by the verse are many. First, there is the single member, which occurs at the commencement of a series in Ps. xviii. 2, xxiii. 1; at the end of a series in Ex. xv. 18, Ps. xcii. 8; and in the middle, after a short pause, in Ps. xxxix. 7. The bimembral verse is most frequently found, consisting of two members of nearly equal weight. Verses of more than two members are formed either by increasing the number of members from two to three, so that the complete fall may be reserved for the third, all three possessing the same power; or by combining four members two and two, as in Ps. xviii. 7, xxviii. 1.

The varieties of this structure of verse are too numerous to be recounted, and the laws of rhythm in Hebrew poetry are so free, that of necessity the varieties of verse structure must be manifold. The gnomic or sententious rhythm, Ewald remarks, is the one which is perfectly symmetrical. Two members of seven or eight syllables, corresponding to each other as rise and fall, contain a thesis and antithesis, a subject and its image. This is the constant form of genuine gnomic sentences of the best period. Those of a later date have many members or trail themselves through many verses. The animation of the lyrical rhythm makes it break through all such restraints, and leads to an amplification or reduplication of the normal form; or the passionate rapidity of the thoughts may disturb the simple concord of the members, so that the unequal structure of verse intrudes with all its varieties. To show how impossible it is to attempt a classification of verse uttered under such circumstances, it will be only necessary to quote Ewald's own words. "All these varieties of rhythm, however, exert a perfectly free influence upon every lyrical song, just according as it suits the mood of the moment to vary the simple rhythm. The most beautiful songs of the flourishing period of poetry allow, in fact, the verse of many members to predominate whenever the diction rises with any sublimity; nevertheless, the standard rhythm still returns in each when the diction flags, and the different kinds of the more complex rhythm are employed with equal freedom and ease of variation, just as they severally accord with the fluctuating hues of the mood of emotion, and of the sense of the diction. The late alphabetical songs are the first in which the fixed choice of a particular versification, a choice, too, made with designed art, establishes itself firmly, and maintains itself symmetrically throughout all the verses" (*Dichter des A. B.* i. 83, trans. in Kitto's *Journal*, i. 318). It may, however, be generally observed, that the older rhythms are the most animated, as if accompanied by the hands and feet of the singer (Num. xxi.; Ex. xv.; Judg. v.), and that in the time of David the rhythm had attained its most perfect development. By the end of the 8th century B. C.

the decay of versification begins, and to this period belong the artificial forms of verse.

It remains now only to notice the rules of Hebrew poetry as laid down by the Jewish grammarians, to which reference was made in remarking upon the system of R. Azariah. They have the merit of being extremely simple, and are to be found at length, illustrated by many examples, in Mason and Bernard's *Heb. Gram.* vol. ii. let. 57, and accompanied by an interesting account of modern Hebrew versification. The rules are briefly these: 1. That a sentence may be divided into members, some of which contain two, three, or even four words, and are accordingly termed *Binary*, *Ternary*, and *Quaternary* members respectively. 2. The sentences are composed either of *Binary*, *Ternary*, or *Quaternary* members entirely, or of these different members intermixed. 3. That in two consecutive members it is an elegance to express the same idea in different words. 4. That a word expressed in either of these parallel members is often not expressed in the alternate member. 5. That a word without an accent, being joined to another word by *Makkiph*, is generally (though not always) reckoned with that second word as one. It will be seen that these rules are essentially the same with those of Lowth, De Wette, and other writers on parallelism, and from their simplicity are less open to objection than any that have been given.

In conclusion, after reviewing the various theories which have been framed with regard to the structure of Hebrew poetry, it must be confessed that beyond the discovery of very broad general laws, little has been done towards elaborating a satisfactory system. Probably this want of success is due to the fact that there is no system to discover, and that Hebrew poetry, while possessed, in the highest degree, of all sweetness and variety of rhythm and melody, is not fettered by laws of versification as we understand the term.

For the literature of the subject, in addition to the works already quoted, reference may be made to the following: Carpozov, *Intr. ad Libr. Can. Bibl.* pt. 2, c. 1; Lowth, *De Sacra Poesi Hebræorum Prælectiones*, with notes by J. D. Michaelis and Rosenmüller (Oxon. 1828) [translated, with notes, by Calvin E. Stowe, Andover, 1829]; the Preliminary Dissertation in his translation of Isaiah; Herder, *Geist der Hebr. Poesie* [transl. by President James Marsh, 2 vols., Burlington, 1833]; Jebb, *Sacred Literature*; Saalschütz, *Von der Form der Hebr. Poesie*, Königsberg, 1825, which contains the most complete account of all the various theories; De Wette, *Ueber die Psalmen* [transl. by Prof. J. Torrey, *Bibl. Repos.* iii. 445-518]; Meier, *Gesch. der Poet. National-Literatur der Hebräer*; Delitzsch, *Commentar über den Psalter*; and Hupfeld, *Die Psalmen*. W. A. W.

\* Other and in part later writers: F. Gomarus, *Davidis Lyra* (1637); J. C. Schramm, *De Poesi Hebræorum* (1723). (The two essays just named, with others on the same subject by Ebert, the Abbé Fleury, Dannhawer, Pfeiffer, Leyser, Le Clerc, Hare, and Lowth, are reprinted in vol. xxxi. of Ugolini's *Thesaurus*.) Herder, *Briefe das Studium d. Theol. betreffend*, the first twelve of which letters he devotes to the poetry of the Hebrews, pointing out its characteristics and illustrating them by translations from the Pentateuch (Jacob's blessings, the farewell of Moses), from Judges (the Song of Deborah and Barak), and from the Psalms and the Prophets. A. von Humboldt, *Cosmos* (Eng.

transl. ii. 57 f.), according to whom "nature to the Hebrew poet is not a self-dependent object—but a work of creation and order, the living expression of the omnipresence of the Divinity in the visible world." A single Psalm (the 104th) almost "represents the image of the whole Cosmos." A. G. Hoffmann, art. *Hebräische Literatur* (Ersch and Gruber's *Allgem. Encykl.*, 2<sup>e</sup> Sect. iii. 337 ff. (1828)). Prof. S. H. Turner, D. D., *Claims of the Hebrew Language and Literature* (Five Lectures), especially as founded on the character of its Poetry, *Bibl. Repository*, i. 508 ff. (1831). M. Nicolas, *Forme de la poésie hébraïque* (1833). Franz Delitsch, *Zur Geschichte der jüdischen Poesie*, extending from the close of the O. T. collection to modern times (Leipz. 1836). Prof. B. B. Edwards, *Reasons for the Study of the Hebr. Language*, an Inaugural Address, in which he urges this study among other arguments on account of its opening to us the treasures of so rich a poetic literature (*Amer. Bibl. Repository* for July, 1838, pp. 113-132). The thoughts are suggestive and beautifully expressed. J. G. Sommer, *Von Reime in der hebr. Volkspoesie*, in his *Bibl. Abhandlungen*, pp. 85-92 (Bonn, 1846). Ed. Reuss, *Hebräische Poesie*, in Herzog's *Real-Encykl.* v. 598-608 (1856). Isaac Taylor, *The Spirit of Hebrew Poetry* (Amer. reprint, 1862). The author's point of view is "that not less in relation to the most highly cultivated minds than to the most rude—not less to minds disciplined in abstract thought, than to such as are unused to generalization of any kind—the Hebrew Scriptures, in their metaphoric style and their poetic diction, are the fullest medium for conveying what it is their purpose to convey, concerning the Divine Nature, and concerning the spiritual life, and concerning the correspondence of man—the finite, with God—the Infinite." In its sphere as an able exposition of this train of thought, there is no better treatise than this. Heinrich Ewald, *Allgemeines u. die hebräische Dichtung*, etc. (re-wrought, Götting. 1866; half of vol. i. of his *Dichter des A. Bundes*). Leyser, art. *Dichtkunst* in Zeller's *Bibl. Wörterb.* i. 232-242 (1866). Prof. Hupfeld, *Rhythm and Accentuation in Hebrew Poetry* (we adopt the briefer title), translated by Professor Charles M. Mead, *Bibl. Sacra*, xxiv. 1-40 (1867). Dr. Diestel, art. *Dichtkunst* in Schenkel's *Bibel-Lexikon*, i. 607-615 (1868), valuable.

For information on this subject see also the Introductions to the Old Testament (Eichhorn, Hävernick, De Wette, Keil, Bleek), as well as the Commentaries on the O. T. poetic books (mentioned in the *Dictionary* under these books).

As regards the examples of poetry in the N. T. Schenkel's art. *Dichtkunst, urchristliche im N. T.*, (in his *Bibel-Lexikon*, i. 615-618) deserves attention. The songs (as they may be termed) of Elizabeth (Luke i. 42-45), of Mary (46-55) and of Zacharias (78-69), breathe the spirit of the Hebrew poets, and are largely expressed in language derived from them. See also Acts iv. 24 ff., xvi. 25; Rev. iv. 11, xv. 3, 4. In Col. iii. 16 and Eph. v. 19, Paul recognizes the use of "psalms, hymns, and spiritual songs" as forming a part of the social worship of the first Christians. With this intimation agrees Pliny's statement (*Epist.* x. 97) that those in Bithynia who professed this faith assembled at early dawn and sung praises to Christ (*carmen Christo quasi deo dicere secum invicem*). It is generally allowed that we have a fragment of such a hymn in 1 Tim. iii. 16. Not a few of Paul's sentences which

we are accustomed to read as prose, bring back to the ear the cadence of Hebrew verse. The following is an example of this (2 Tim. ii. 11):—

"For if we died with him,

We shall also live with him;

If we endure, we shall also reign with him;

If we shall deny him,

He also will deny us;

If we are faithless, he remains faithful;

For he cannot deny himself."

It may be well to remark that although "hymn" and "hymning" do not occur in our English translation of the O. T., the correspondent Greek terms often occur in the Septuagint. The verb "to hymn" (*ὕμνω*) has sometimes the general sense of "to praise," but when applied to any particular composition refers to the use of the Psalms for that purpose. In the titles of the Psalms, the Greek phrase for "hymns of David" is generally found, in the place of "psalms of David" in the A. V. See Biel's *Lexicon in LXX. Interpretes*, s. vv. *ὕμνω* and *ὕμνος*. The usage of the LXX. no doubt influenced the N. T. phraseology in this respect. Comp. Matt. xxvi. 30; Mark xiv. 26; Acts xvi. 25; Heb. ii. 12.

On the hymnology of the early Church the reader may see Daniel's *Thesaurus Hymnologicus* (1841), and the art. *Hymnologie*, by Christ. Palmer in Herzog's *Real-Encycl.* vi. 305 ff., where a list of other writers will be found, as also under HYMN in this *Dictionary*. II.

**POISON.** Two Hebrew words are thus rendered in the A. V. but they are so general as to throw little light upon the knowledge and practice of poisons among the Hebrews. 1. The first of these.

**חֶמֶה**, *chémâh*, from a root signifying "to be hot," is used of the heat produced by wine (Hos. vii. 5), and the hot passion of anger (Deut. xxix. 27, &c.), as well as of the burning venom of poisonous serpents (Deut. xxxii. 24, 33; Ps. lviii. 4, xli. 3). It in all cases denotes animal poison, and not vegetable or mineral. The only allusion to its application is in Job vi. 4, where reference seems to be made to the custom of anointing arrows with the venom of a snake, a practice the origin of which is of very remote antiquity (comp. Hom. *Od.* i. 261, 262; Ovid, *Trist.* iii. 10, 64, *Fast.* v. 397, &c.; Plin. xviii. 1). The Soanes, a Caucasian race mentioned by Strabo (xi. 499), were especially skilled in the art. Pliny (vi. 34) mentions a tribe of Arab pirates who infested the Red Sea, and were armed with poisoned arrows like the Malays of the coast of Borneo. For this purpose the berries of the yew-tree (Plin. xvi. 20) were employed. The Gauls (Plin. xvii. 76) used a poisonous herb, *limeum*, supposed by some to be the "leopard's bane," and the Scythians dipped their arrow-points in viper's venom mixed with human blood. These were so deadly that a slight scratch inflicted by them was fatal (Plin. xi. 115). The practice was so common that the name *ροξικόν*, originally a poison in which arrows were dipped, was applied to poison generally.

2. **רֶשֶׁת** (once **רֶשֶׁת**, Deut. xxxii. 32<sup>a</sup>), *rôsh*, a poison at all, denotes a vegetable poison primarily, and is only twice (Deut. xxix. 33; Job xx. 16)

used of the venom of a serpent. In other passages where it occurs, it is translated "gall" in the A. V., except in Hos. x. 4, where it is rendered "hemlock." In the margin of Deut. xxix. 18, our translators, feeling the uncertainty of the word, give as an alternative "*rôsh*, or, a *poisonful herb*." Beyond the fact that, whether poisonous or not, it was a plant of bitter taste, nothing can be inferred. That bitterness was its prevailing characteristic is evident from its being associated with wormwood (Deut. xxix. 18 [17]; Lam. iii. 19; Am. vi. 12), and from the allusions to "water of *rôsh*" in Jer. viii. 14, ix. 15, xxiii. 15. It was not a juice or liquid (Ps. lxxix. 21 [22]; comp. Mark xv. 23), but probably a bitter berry, in which case the expression in Deut. xxxii. 32, "grapes of *rôsh*," may be taken literally. Gesenius, on the ground that the word in Hebrew also signifies "head," rejects the hemlock, colocynth, and darnel of other writers, and proposes the "poppy" instead; from the "heads" in which its seeds are contained. "Water of *rôsh*" is then "opium," but it must be admitted that there appears in none of the above passages to be any allusion to the characteristic effects of opium. The effects of the *rôsh* are simply nausea and loathing. It was probably a general term for any bitter or nauseous plant, whether poisonous or not, and became afterwards applied to the venom of snakes, as the corresponding word in Chaldee is frequently so used. [GALL.]

There is a clear case of suicide by poison related in 2 Macc. x. 13, where Ptolemæus Macron is said to have destroyed himself by this means. But we do not find a trace of it among the Jews, and certainly poisoning in any form was not in favor with them. Nor is there any reference to it in the N. T., though the practice was fatally common at that time in Rome (Suet. *Nero*, cc. 33, 34, 35; *Tib.* c. 73; *Clau.* c. 1). It has been suggested, indeed, that the *φαρμακεία* of Gal. v. 20 (A. V. "witchcraft"), signifies poisoning, but this is by no means consistent with the usage of the word in the LXX. (comp. Ex. vii. 11, viii. 7, 13, &c.), and with its occurrence in Rev. ix. 21, where it denotes a crime clearly distinguished from murder (see Rev. xxi. 8, xxii. 15). It more probably refers to the concoction of magical potions and love philtres.

On the question of the wine mingled with *myrrh*, see GALL. W. A. W.

**POL/LUX.** [CASTOR AND POLLUX.]

**POLYGAMY.** [MARRIAGE.]

**POMEGRANATE** (**רִמּוֹן**, *rimmôn*: *ῥοα*, *ῥοιά*, *ῥοῦρκος*, *κόδων*: *malum punicum*, *malum granatum*, *malogranatum*) by universal consent is acknowledged to denote the Heb. *rimmôn*, a word which occurs frequently in the O. T., and is used to designate either the pomegranate tree or its fruit. The pomegranate was doubtless early cultivated in Egypt: hence the complaint of the Israelites in the wilderness of Zin (Num. xx. 5), this "is no place of figs, or of vines, or of pomegranates." The tree, with its characteristic calyx-crowned fruit, is easily recognized on the Egyptian sculptures (*Anc. Egypt.* i. 36, ed. 1854). The spies brought to Joshua "of the pomegranates" of the land of Canaan (Num. xiii. 23; comp. also Deut. viii. 8). The villages or towns of Rimmon (Josh. xv. 32), Gath-rimmon (xxi. 25), En-rimmon (Neh. xi. 29), possibly derived their names from pomegranate-trees which grew in their vicinity. These trees

\* In some MSS. this reading occurs in other passages, of which a list is given by Michaelis (*Suppl.* p. 223).

suffered occasionally from the devastations of locusts (Joel i. 12; see also Hag. ii. 19). Mention is made of "an orchard of pomegranates" in Cant. iv. 13; and in iv. 3, the cheeks (A. V. "temples") of the Beloved are compared to a section of "pomegranate within the locks," in allusion to the beautiful rosy color of the fruit. Carved figures of the pomegranate adorned the tops of the pillars in Solomon's Temple (1 K. vii. 18, 20, &c.); and worked representations of this fruit, in blue, purple, and scarlet, ornamented the hem of the robe of the ephod (Ex. xxviii. 33, 34). Mention is made of "spiced wine of the juice of the pomegranate" in Cant. viii. 2; with this may be compared the pomegranate-wine (ροῖτης οἶνος) of which Dioscorides (v. 34) speaks, and which is still used in the East. Chardin says that great quantities of it were made in Persia, both for home consumption

*Punica granatum.*

and for exportation, in his time (*Script. Herb. p. 399*; Harmer's *Obs.* i. 377). Russell (*Nat. Hist. of Aleppo*, i. 85, 2d ed.) states "that the pomegranate" (*rummān* in Arabic, the same word as the Heb.) "is common in all the gardens." He speaks of three varieties, "one sweet, another very acid, and a third that partakes of both qualities equally blended. The juice of the sour sort is used instead of vinegar: the others are cut open when served up to table; or the grains taken out, and, besprinkled with sugar and rose-water, are brought to table in saucers." He adds that the trees are apt to suffer much in severe winters from extraordinary cold.

The pomegranate-tree (*Punica granatum*) derives its name from the Latin *pomum granatum*, "grained apple." The Romans gave it the name of *Punica*, as the tree was introduced from Carthage; it belongs to the natural order *Myrtaceae*, being, however, rather a bush than a tree. The foliage is dark green, the flowers are crimson; the fruit is red when ripe, which in Palestine is about

<sup>a</sup> פְּרָחִים: ἔλος: *palus*: plur. in Jer. li. 32; A. V. reads, "i. e. reedy places; συστήματα: *pluades*: also 'pool.'"

<sup>b</sup> 2. פְּרָחִים: *κοιλάς*: *vallis*.

the middle of October, and contains a quantity of juice. The rind is used in the manufacture of morocco leather, and, together with the bark, is sometimes used medicinally to expel the tape-worm. Pomegranates without seeds are said to grow near the river Cabul. Dr. Royle (*Kitto's Cyc. art. "Kimmom"*) states that this tree is a native of Asia, and is to be traced from Syria through Persia even to the mountains of Northern India.

W. H.

**POMMELS**, only in 2 Chr. iv. 12, 13. In 1 K. vii. 41, "bowls." The word signifies convex projections belonging to the capitals of pillars [BOWL; CHAPTER.]

H. W. P.

**POND.** *Agāmā* The ponds of Egypt (Ex vii. 19, viii. 5) were doubtless water left by the inundation of the Nile. In Is. xix. 10, where Vulg. has *qui faciēbant lacunas ad capiēndos pisces*, LXX. has οἱ τῶν ζῆθων ποιῶντες, *they who make the beer.* This rendering, so characteristic of Egypt (Her. ii. 77; Diod. i. 34; Strabo, p. 799), arises from regarding *agām* as denoting a result indicated by its root, i. e. a fermented liquor. St. Jerome, who alludes to beer called by the name of Sabaius, explains *agām* to mean water fermenting from stagnation (*Hieron. Com. on Is. lib. vii. vol. iv. p. 292*; Calmet; Stanley, *S. & P. App.* § 57).

H. W. P.

**PONTIUS PILATE.** [PILATE.]

**PONTUS** (Πόντος), a large district in the north of Asia Minor, extending along the coast of the Pontus Euxinus, from which circumstance the name was derived. It is three times mentioned in the N. T. It is spoken of along with Asia, Cappadocia, Phrygia, and Pamphylia (Acts ii. 9, 10), as one of the regions whence worshippers came to Jerusalem at Pentecost: it is specified (Acts xviii. 2) as the native country of Aquila; and its "scattered strangers" are addressed by St. Peter (1 Pet. i. 1), along with those of Galatia, Cappadocia, Asia, and Bithynia. All these passages agree in showing that there were many Jewish residents in the district. As to the annals of Pontus, the one brilliant passage of its history is the life of the great Mithridates; but this is also the period of its coming under the sway of Rome. Mithridates was defeated by Pompey, and the western part of his dominions was incorporated with the province of Bithynia, while the rest was divided, for a considerable time, among various chieftains. Under Nero the whole region was made a Roman province, bearing the name of Pontus. The last of the petty monarchs of the district was Polemo II., who married Berenice, the great-grand-daughter of Herod the Great. She was probably with Polemo when St. Paul was travelling in this neighborhood about the year 52. He saw her afterwards at Cæsarea, about the year 60, with her brother, Agrippa II.

J. S. H.

**POOL.** (1.) *Agām*, see POND. (2.) *Bericāh* in pl. once only, *pools* (Ps. lxxiv. 6). (3.) The usual word is *Bericāh*, closely connected with the Arabic *Birkeh*, and the derived Spanish with the Arabic article, *Al-berca*. A reservoir for water. These pools, like the tanks of India, are in many

3. פְּרָחִים: *κρήνη*: *piscina*, *aqueductus* (Cant. vii. 4); *κολυμβήθρα*, *lāmyn*; from פְּרָחִים, "fall on the knees" (see Judg. vii. 5, 6). In N. T. *κολυμβήθρα* only in John v. 2, ix. 7.

parts of Palestine and Syria the only resource for water during the dry season, and the failure of them involves drought and calamity (Is. xlii. 15). Some are supplied by springs, and some are merely receptacles for rain-water (Burekhardt, *Syria*, p. 314). Of the various pools mentioned in Scripture, as of Hebron, Samaria, etc. (for which see the articles on those places), perhaps the most celebrated are the pools of Solomon near Bethlehem, called by the Arabs *el-Burak*, from which an aqueduct was carried which still supplies Jerusalem with water (Eccl. ii. 6; Ecclus. xxiv. 30, 31).

They are three in number, partly hewn out of the rock, and partly built with masonry, but all lined with cement, and formed on successive levels with conduits leading from the upper to the lower, and flights of steps from the top to the bottom of each (Sandys, *Trav.* p. 150). They are all formed in the sides of the valley of Etbam, with a dam across its opening, which forms the E. side of the lowest pool. Their dimensions are thus given by Dr. Robinson: (1.) Upper pool, length 380 feet; breadth at E. 236, at W. 229; depth at E. 25 feet; distance above middle pool, 125 feet. (2.)

Pools of Solomon, and Hill Country of Judah, from S. W

Middle pool, length 423 feet; breadth at E. 250, at W. 160; depth 39; distance above lower pool 248 feet. (3.) Lower pool, length 582 feet; breadth at E. 207, at W. 148; depth 50 feet. They appear to be supplied mainly from a spring in the ground above (Fountain; Cistern; Jerusalem, vol. ii. pp. 1287 a, 1323; Conduit; Robinson, *Res.* i. 348, 474). H. W. P.

\* POOL OF BETHESDA. [BETHESDA.]

POOR.<sup>a</sup> The general kindly spirit of the law towards the poor is sufficiently shown by such passages as Deut. xv. 7 for the reason that (ver.

11), "the poor shall never cease out of the land," and a remarkable agreement with some of its directions is expressed in Job xx. 19, xxiv. 3, foll., where among acts of oppression are particularly mentioned "taking (away) a pledge," and withholding the sheaf from the poor, vv. 9, 10 [LOAN], xxix. 12, 16, xxxi. 17, "eating with" the poor (comp. Deut. xxvi. 12, &c.). See also such passages as Ez. xviii. 12, 16, 17, xxii. 29; Jer. xxii. 13, 16, v. 28; Is. x. 2; Am. ii. 7; Zech. vii. 11, and Ecclus. iv. 1, 4, vii. 32; Tob. xii. 8, 9. [ALMS.]

Among the special enactments in their favor the following must be mentioned. 1. The right of

<sup>a</sup> אֶבְיוֹן : πτωχός : pauper

2 עָנִי : πένης : pauper.

3 חֲלָקָה : πτωχός : pauper.

4 מִסְכֵּן : πένης : pauper; a word of later

usage, connected with <sup>s</sup>مسكين, probably the original of *meschino*, *mesquin*, etc. (Ges. p. 954).

5 עֲנָה, Chald. (Dan. iv. 27) : πένης : pauper; from same root as,

6 עָנִי, the word most usually "poor" in A. V. : πτωχός, πένης, indigens, pauper. Also Zech. ix. 9, and Is. xxvi. 6, πρῶτος : pauper.

7 רֵשׁ, part. of רָשָׁה : ταπεινός : pauper. In 2 Sam. xii. 1, קָהָל : πένης, πτωχός.

8 Poverty : מִחְסוֹר : ἐνδεία : egestas. In N.

T., πτωχός, pauper, and πένης, egenus, once only, 2 Cor. ix. 9. "Poor" is also used in the sense of "afflicted," "humble," etc.; e. g. Matt. v. 3

gleaning. The "corners" of the field were not to be reaped, nor all the grapes of the vineyard to be gathered, the olive-trees not to be beaten a second time, but the stranger, fatherless, and widow to be allowed to gather what was left. So too if a sheaf forgotten was left in the field, the owner was not to return for it, but leave it for them (Lev. xix. 9, 10; Deut. xxiv. 19, 21). Of the practice in such cases in the times of the Judges, the story of Ruth is a striking illustration (Ruth ii. 2, &c.). [CORNER; GLEANING; RUTH, BOOK OF (Amer. ed.)]

2. From the produce of the land in sabbatical years, the poor and the stranger were to have their portion (Ex. xxiii. 11; Lev. xxv. 6).

3. Reentry upon land in the jubilee year, with the limitation as to town homes (Lev. xxv. 25-30). [JUBILEE.]

4. Prohibition of usury, and of retention of pledges, i. e. loans without interest enjoined (Lev. xxv. 35, 37; Ex. xxii. 25-27; Deut. xv. 7, 8, xxiv. 10-13). [LOAN.]

5. Permanent bondage forbidden, and manumission of Hebrew bondsmen or bondswomen enjoined in the sabbatical and jubilee years, even when bound to a foreigner, and redemption of such previous to those years (Deut. xv. 12-15; Lev. xxv. 39-42, 47-54).

6. Portions from the tithes to be shared by the poor after the Levites (Deut. xiv. 28, xxvi. 12, 13). [TITHES.]

7. The poor to partake in entertainments at the feasts of Weeks and Tabernacles (Deut. xvi. 11, 14; see Neh. viii. 10).

8. Daily payment of wages (Lev. xix. 13).

On the other hand, while equal justice was commanded to be done to the poor man, he was not allowed to take advantage of his position to obstruct the administration of justice (Ex. xxiii. 3; Lev. xix. 15).

On the law of gleaning the Rabbinical writers founded a variety of definitions and refinements, which notwithstanding their minute and frivolous character, were on the whole strongly in favor of the poor. They are collected in the treatise of Maimonides *Mithnoth Ainim*, de jure pauperis, translated by Prideaux (Ugolini, viii. 721), and specimens of their character will appear in the following titles.

There are, he says, 13 precepts, 7 affirmative and 6 negative, gathered from Lev. xix., xxiii.; Deut. xiv., xv., xxiv. On these the following questions are raised and answered, What is a "corner," a "handful?" What is to "forget" a sheaf? What is a "stranger?" What is to be done when a field or a single tree belongs to two persons; and further, when one of them is a Gentile, or when it is divided by a road, or by water; — when insects or enemies destroy the crop? How much grain must a man give by way of alms? Among prohibitions is one forbidding any proprietor to frighten away the poor by a savage beast. An Israelite is forbidden to take alms openly from a Gentile. Unwilling almsgiving is condemned, on the principle expressed in Job xxx. 25. Those who gave less than their due proportion, to be punished. Mendicants are divided into two classes, settled poor and vagrants. The former were to be relieved

by the authorized collectors, but all are enjoined to maintain themselves if possible. [ALMS.] Lastly, the claim of the poor to the portions prescribed is laid down as a positive right.

Principles similar to those laid down by Moses are inculcated in N. T., as Luke iii. 11, xiv. 13; Acts vi. 1; Gal. ii. 10; Jas. ii. 15. In later times, mendicancy, which does not appear to have been contemplated by Moses, became frequent. Instances actual or hypothetical may be seen in the following passages: Luke xvi. 20, 21, xviii. 35; Mark x. 46; John ix. 8; Acts iii. 2. On the whole subject, besides the treatise above named, see Mishna, *Peah*, i. 2, 3, 4, 5; ii. 7; *Pesach*. iv. 8; Selden, *de Jure Natur.* vi. 6, p. 735, &c.; Saalschütz, *Arch. Heb.* ii. p. 256; Michaelis, § 142, vcl. ii. p. 248; Otho, *Lex. Rabb.* p. 308. H. W. P.

POPLAR (לְבָנָה), *libneh*: *στυράκιον*, in Gen. xxx. 37; *λεβκη*, in Hos. iv. 13; *populus*, the rendering of the above named Hebrew word, which occurs only in the two places cited. Peeled rods of the *libneh* were put by Jacob before Laban's ring-streaked sheep. This tree is mentioned with the oak and the terebinth, by Hosea, as one under which idolatrous Israel used to sacrifice.

Several authorities, Celsius amongst the number (*Hierob.* i. 292), are in favor of the rendering of the A. V., and think the "white poplar" (*Populus alba*) is the tree denoted; others understand the "storax tree" (*Styrax officinale*, Linn.). This opinion is confirmed by the LXX. translator of Genesis, and by the Arabic version of Saadiah

which has the term *libna* (لَبْنَى) i. e. the "Styrax tree."<sup>a</sup>

Both poplars<sup>b</sup> and styrax or storax trees are common in Palestine, and either would suit the passages where the Heb. term occurs. Dioscorides (i. 79) and Pliny (*N. H.* xii. 17 and 25) both speak of the *Styrax officinale*, and mention several kinds of exudation. Pliny says, "that part of Syria which adjoins Judæa above Phœnicia produces storax, which is found in the neighborhood of Gabala (*Jebeil*) and Marathus, as also of Casius, a mountain of Seleucia. . . . That which comes from the mountain of Amanus in Syria is highly esteemed for medicinal purposes, and even more so by the perfumers."

Storax (στόραξ) is mentioned in Ecclus. xxiv. 15, together with other aromatic substances. The modern Greek name of the tree, as we learn from Sibthorpe (*Flor. Græc.* i. 275) is *στυρακι*, and is a common wild shrub in Greece and in most parts of the Levant. The resin exudes either spontaneously or after incision. This property, however, it would seem, is only for the most part possessed by trees which grow in a warm country; for English specimens, though they flower profusely, do not produce the drug. Mr. Dan. Hanbury, who has discussed the whole subject of the storax plants with much care (see the *Pharmaceutical Journal and Transactions* for Feb. 1857), tells us that a friend of his quite failed to obtain any exudation from *Styrax officinale*, by incisions made in the hottest part of the summer of 1856, on specimens growing in the botanic garden at Montpellier.

<sup>a</sup> Arbor lac emittens mellis instar, quo et suffitus fit: videtur esse *Styracis* arbor. Kám Dj. See Freytag, *Lex Arab.* s. v.

<sup>b</sup> "*Populus alba* and *P. Euphratica* I saw. *P. dilatata* and *nigra* are also said to grow in Syria" (J. D. Hooker).

"The experiment was quite unsuccessful; neither aqueous sap nor resinous juice flowed from the incisions." Still Mr. Hanbury quotes two authorities to show that under certain favorable circumstances the tree may exude a fragrant resin even in France and Italy.

*Styrax officinale.*

The *Styrax officinale* is a shrub from nine to twelve feet high, with ovate leaves, which are white underneath; the flowers are in racemes, and are white or cream-colored. This white appearance agrees with the etymology of the Heb. *lîneh*. The liquid storax of commerce is the product of the *Liquidambar Orientale*, Mill. (see a fig. in Mr. Hanbury's communication), an entirely different plant, whose resin was probably unknown to the ancients.

W. H.

**PORATHA** (פֹּרְאֲתָה) [Pers. = perh. favored by fate]: פֹּרְאֲתָה; Alex. Βαρδαθα; [FA. Φαραθα:] *Phoratha*). One of the ten sons of Haman slain by the Jews in Shushan the palace (Esth. ix. 8). Perhaps "Poradatha" was the full form of the name, which the LXX. appear to have had before them (compare Aridatha, Parshandatha).

**PORCH.** 1. *Ūlam*,<sup>a</sup> or *ūlam*. 2. *Mislerôn ūlām*, strictly a vestibule (Ges. p. 43), was probably a sort of verandah chamber in the works of Solomon, open in front and at the sides, but capable of being inclosed with awnings or curtains, like that of the royal palace at Spahan described by Chardin (vii. 386, and pl. 39). The word is used in the Talmud (*Midloth*, iii. 7).

*Mislerôn* was probably a corridor or colonnade connecting the principal rooms of the house (Wilkinson, *A. E.* i. 11). The porch<sup>b</sup> (Matt. xxvi.

71) was probably the passage from the street into the first court of the house, in which, in eastern houses, is the *mastâbah* or stone-bench for the porter or persons waiting, and where also the master of the house often receives visitors and transacts business (Lane, *Mod. Eg.* i. 32; Shaw, *Trav.* p. 207). [HOUSE.] The word in the parallel passage (Mark xiv. 68) is *προαύλιον*, the outer court. The scene therefore of the [second?] denial of our Lord took place, either in that court, or in the passage from it to the house-door. The term *στώδ* is used for the colonnade or portico of Bethesda, and also for that of the Temple called Solomon's porch (John v. 2, x. 23; Acts iii. 11, v. 12).

Josephus describes the porticoes or cloisters which surrounded the Temple of Solomon, and also the royal portico. These porticoes are described by Tacitus as forming an important line of defense during the siege (Joseph. *Ant.* viii. 3, § 9 xv. 11, §§ 3, 5; *B. J.* v. 5, § 2; Tac. *Hist.* v. 12). [TEMPLE; SOLOMON'S PORCH.] H. W. P.

\* The "porch" between which and the altar the priests were directed to pray and weep (Joel ii. 17), was on the east side of the Temple, leading from the court of the priests into the sanctuary or outer apartment of the fane of the Temple. The priests standing here had the altar behind them with their faces towards the sanctuary, which was the proper position when they offered prayer. It is mentioned (Ezek. viii. 16) as an insult to Jehovah, a heathenish act, that the priests stood with their back towards the sanctuary and their faces towards the east. H.

**PORCIUS FESTUS.** [FESTUS.]

\* **PORT**, Neh. ii. 13, is used in the Latin sense of "gate," from *porta*, whence "porter," a gate-keeper. Port = seaport, is from *portus*, a harbor. On the "Dung Port" or Dung Gate, see JERUSALEM, vol. ii. p. 1322. H.

**PORTER.** This word when used in the A. V. does not bear its modern signification of a carrier of burdens,<sup>c</sup> but denotes in every case a gate-keeper, from the Latin *portarius*, the man who attended to the *porta*. In the original the word is שׁוֹרֵר, *shô'er*, from שָׁרַר, *shar'ar*, a gate: *θυρωρός*, and *πυλωρός*: *portarius* and *janitor*. This meaning is evidently implied in 1 Chr. ix. 21; 2 Chr. xxiii. 19, xxxv. 15; John x. 3. It is generally employed in reference to the Levites who had charge of the entrances to the sanctuary, but is used also in other connections in 2 Sam. xviii. 26; 2 K. vii. 10, 11; Mark xiii. 34; John x. 3, xviii. 16, 17. In two passages (1 Chr. xv. 23, 24) the Hebrew word is rendered "doorkeepers," and in John xviii. 16, 17, ἡ *θυρωρός* is "she that kept the door." G.

\* Rhoda was portress in the house of the mother of John Mark, at Jerusalem (Acts xii. 13). Luke employs in that passage the classical term (*σπακοῦσα*) signifying to answer a call or knock at the door (Kypke, *Observ. Sacre*, ii. 60). Women often performed that office among the Greeks and Romans as well as the Jews. The "porter" (John

<sup>a</sup> 1. אֱלָם, or אֱלָם: *aiálâm*: *porticus* (1 Chr. xxviii. 11); *ναός*: *porticus*.

2. מִסְלֵרֹן: *parastás*: *porticus*; only once used Judg. iii. 23.  
<sup>b</sup> πυλών.

<sup>c</sup> The two words are in fact quite distinct, being derived from different roots. "Porter" in the modern sense is from the French *porteur*. The similarity between the two is alluded to in a passage quoted from Watts by Dr. Johnson.

r. 3) was the gate-keeper of one of the larger sheep-folds jointly occupied by several shepherds: they had a right to be admitted at the door, but thieves sought to enter by another way. See Wahl, *Clavis N. T.* s. v. *θυραῖος*. [GATE.] H.

\* PORTION, DOUBLE, *i. e.* "the portion" (more literally *mouthful*) "of two" (יְרֵבֵי). So in Deut. xxi. 17, of the treatment of the first-born son, who is to be distinguished from those later born, by receiving a larger portion of the father's estate. In 2 Kings ii. 9, Elisha asks Elijah as he is about to ascend to heaven that a double portion, *i. e.* an abundant supply, of his spirit may fall upon himself. R. D. C. R.

POSIDONIUS (Ποσιδώνιος: *Posidonius*), an envoy sent by Nicanor to Judas (2 Macc. xiv. 19).

#### POSSESSION. [DEMONIACS.]

POST. I. 1. *Ajil*,<sup>a</sup> a word indefinitely rendered by LXX. and Vulg. Probably, as Gesenius argues, the door-case of a door, including the lintel and side-posts (Ges. *Thes.* p. 43). Akin to this is *ailām*,<sup>b</sup> only used in plur. (Ez. xl. 16, &c.), probably a portico, and so rendered by Symm. and Syr. Vers. (Ges. p. 48).

2. *Ammah*,<sup>c</sup> usually "cubit," once only "post" (Is. vi. 4).

3. *Mezuzah*,<sup>d</sup> from a root signifying to shine, *i. e.* implying motion (on a centre).

4. *Saph*,<sup>e</sup> usually "threshold."

The ceremony of boring the ear of a voluntary bondsman was performed by placing the ear against the door-post of the house (Ex. xxi. 6; see Juv. *Sat.* i. 103, and Plant. *Pæn.* v. 2, 21). [SLAVE; PILLAR.]

The posts of the doors of the Temple were of olive-wood (1 K. vi. 33).

II. *Râts*,<sup>f</sup> A. V. "post" (Esth. iii. 13), elsewhere "runner," and also "guard." A courier or carrier of messages, used among other places in Job ix. 25. [ANGAREUO.] H. W. P.

\* Our English "post" (in French *poste* and Italian *posta*) is from *positum*, a fixed place, as a military *post*, then a station for travellers and relays of horses, and thence transferred to the traveller himself, especially on expeditious journeys. (See Eastwood and Wright's *Bible Word-Book*, p. 378.) H.

POT. The term "pot" <sup>σ</sup> is applicable to so many sorts of vessels, that it can scarcely be restricted to any one in particular. [BOWL; CALDRON; BASIN; CUP, etc.]

- a יָיִל: τὸ αἶθριον: *frons*.  
 b יָיִל: τὰ αἰλάμ: *vestibulum*.  
 c יָיִל: ὑπέρθυρον: *superliminare*.  
 d יָיִל: σταθμός, φλιά: *postis*, from יָיִל, *nico*.  
 e יָיִל: φλιά: *limen*; in plur. τὰ πρότυλα: *superliminaria* (Am. ix. 1).  
 f יָיִל, part. of יָיִל, "run;" βιβλιαφόρος: *cursor*.  
 g 1. יָיִל: ἀγγεῖον (2 K. iv. 2), applied to oil.  
 2. יָיִל: κεράμιον: *scyphus* (Jer. xxxv. 5; Ges. p. 200); usually "bowl" or "cup."

But from the places where the word is used we may collect the uses, and also in part the materials of the utensils implied.

1. *Asûc*, an earthen jar, deep and narrow without handles, probably, like the Roman and Egyptian amphora, inserted in a stand of wood or stone (Wilkinson, *Anc. Eg.* i. 47; Sandys, *Trav.* p. 150).

2. *Cheres*, an earthen vessel for stewing or seething. Such a vessel was used for baking (Ez. iv. 9). It is contrasted in the same passage (Lev. vi. 28) with a metal vessel for the same purpose. [VESSEL.]

3. *Dûd*, a vessel for culinary purposes, mentioned (1 Sam. ii. 14) in conjunction with "caldron" and "kettle," and so perhaps of smaller size.

4. *Sîr* is combined with other words to denote special uses, as *basher*, "flesh" (Ex. xvi. 3); *ra-chatz*, "washing" (Ps. lx. 8; LXX. has λέβητος τῆς ἐλπίδος); *matzéph*, "fining-pot" (Prov. xxvii. 21).

The blackness which such vessels would contract is alluded to in Joel ii. 6.

The "pots," *gebîyim*, set before the Rechabites (Jer. xxxv. 5), were probably bulging jars or bowls.

The water-pots of Cana appear to have been large amphora, such as are in use at the present day in Syria (Fisher, *Views*, p. 56; Jolliffe, i. 33). These were of stone or hard earthenware; but gold, silver, brass, or copper, were also used for vessels both for domestic and also, with marked preference, for ritual use (1 K. vii. 45, x. 21; 2 Chr. iv. 16, ix. 20; Mark vii. 4; Heb. ix. 4; John ii. 6; Michaelis, *Laws of Moses*, §217, iii. 335, ed. Smith).

Crucibles for refining metal are mentioned (Prov. xxvi. 23, xxvii. 21).

The water-pot of the Samaritan woman may have been a leathern bucket, such as Bedouin women use (Burekhardt, *Notes*, i. 45).

The shapes of these vessels we can only conjecture, as very few remains have yet been discovered, but it is certain that pottery formed a branch of native Jewish manufacture. [POTTERY.] H. W. P.

POTIPHAR (פֹּתִיפָר [see below]: Πετεφρῆς; [Alex. in xxxvii. 36, Πετρεφης:] *Putiphar*), an Egyptian pr. n., also written פֹּתִיפָרַי, ΡΟΥΠΗΡΑΗ. That these are but two forms of one name is shown by the ancient Egyptian equivalent, PET-P-RA, which may have been pronounced, at least in Lower Egypt, PET-PH-RA. It signifies "Belonging to the Sun." Rosellini

8. דָּרָד: κόφινος: *corpinus*; also "basket."  
 9. פֶּלִי: σκευός: *vas*; usually "vessel," once only "pot" (Lev. vi. 28).  
 5. יָיִל: λέβητος: *olla*; used with יָיִל (Jer. i. 18), "a seething-pot."  
 6. יָיִל: χαλκεῖον: *cacabus*.  
 7. יָיִל: στάμνος: *vos* (Ex. xvi. 33; Heb. ix. 4).  
 8. יָיִל: κλήροι: *cleri*; "allotments of land."  
 9. יָיִל: σκευός ὀστράκινον: *vas fictile* (Lev. vi. 21 [22]).

remarks that it is of very frequent occurrence on the Egyptian monuments (*Monumenti Storici*, i. 117, 118). The fuller form is clearly nearer to the Egyptian.

Potiphar is described as "an officer of Pharaoh, chief of the executioners (שָׂרֵי פְּרִיעָה שָׂר) מִצְרַיִם (Gen. xxxix. 1; comp. xxxvii. 36). The word we render "officer," as in the A. V.,<sup>a</sup> is literally "eunuch," and the LXX. and Vulg. so translate it here (σπαδων, *eunuchus*); but it is also used for an officer of the court, and this is almost certainly the meaning here, as Potiphar was married, which is seldom the case with eunuchs, though some, as those which have the custody of the Ka'abeh at Mekkeh are exceptions, and his office was one which would not usually be held by persons of a class ordinarily wanting in courage, although here again we must except the occasional usage of Muslim sovereigns, whose executioners were sometimes eunuchs, as Haroon er-Rasheed's Mesroor, in order that they might be able to carry out the royal commands even in the harems of the subjects. Potiphar's office was "chief of the executioners," not, as the LXX. makes it, "of the cooks" (ἀρχιμάγειρος), for the prison was in his house, or, at least, in that of the chief of the executioners, probably a successor of Potiphar, who committed the disgraced servants of Pharaoh to Joseph's charge (xl. 2-4). He is called an Egyptian, though his master was probably a Shepherd-king of the XVth dynasty; and it is to be noticed that his name contains that of an Egyptian divinity, which does not seem to be the case with the names of the kings of that line, though there is probably an instance in that of a prince. [CHRONOLOGY, vol. i. p. 443.] He appears to have been a wealthy man, having property in the field as well as in the house, over which Joseph was put, evidently in an important post (xxxix. 4-6). In this position Joseph was tempted by his master's wife. The view we have of Potiphar's household is exactly in accordance with the representations on the monuments, in which we see how carefully the produce of the land was registered and stored up in the house by overseers, as well as the liberty that the women of all ranks enjoyed. When Joseph was accused, his master contented himself with casting him into prison (19, 20), probably being a merciful man, although he may have been restrained by God from acting more severely. After this we hear no more of Potiphar, unless, which is unlikely, the chief of the executioners afterwards mentioned be he. [See JOSEPH.]

R. S. P.

POTIPHERAH (פֹּטִיפָרַיִר) [see below]: Περεφής; [Alex. Περεφης:] *Putiphare*), an Egyptian pr. n., also written פֹּטִיפָרַיִר, POTTIPHAR, corresponding to the PET-P-RA, "Belonging to the Sun," of the hieroglyphics.

Potipherah was priest or prince of On (פְּהִיזֵן), and his daughter Asenath was given Joseph to wife by Pharaoh (xli. 45, 50, xlv. 20). His name, implying devotion to the sun, is very appropriate to

a Heliopolite, especially to a priest of Heliopolis, and therefore the rendering "priest" is preferable in his case, though the other can scarcely be asserted to be untenable. [ON; ASENATH; JOSEPH.] R. S. P.

POTSHERD (פֹּטְשֵׁרֵד) ὄστρακον: *testa*, *vas fictile*: also in A. V. "sherd" (i. e. anything divided or separated, from *share*, Richardson's *Dict.*), a piece of earthenware, broken either by the heat of the furnace in the manufacture, by fire when used as a crucible (Prov. xxvi. 23), or otherwise. [POTTERY.] [For illustrations, see Thomson's *Land and Book*, ii. 284.] H. W. P.

\* POTTAGE. [LENTILES.]

POTTER'S FIELD, THE (δ ἀγρός τοῦ κεραμέως: *ager figuli*). A piece of ground which, according to the statement of St. Matthew (xxvii. 7), was purchased by the priests with the thirty pieces of silver rejected by Judas, and converted into a burial-place for Jews not belonging to the city (see Alford, *ad loc.*). In the narrative of the Acts the purchase is made by Judas himself, and neither the potter's field, its connection with the priests, nor its ultimate application are mentioned. [ACELDAMA.]

That St. Matthew was well assured of the accuracy of his version of the occurrence is evident from his adducing it (ver. 9) as a fulfillment of an ancient prediction. What that prediction was, and who made it, is not, however, at all clear. St. Matthew names Jeremiah: but there is no passage in the Book of Jeremiah, as we possess it (either in the Hebrew or LXX.), resembling that which he gives; and that in Zechariah, which is usually supposed to be alluded to, has only a very imperfect likeness to it. This will be readily seen:—

St. Matt. xxvii. 9, 10.

Zech. xi. 12, 13.

Then was fulfilled that which was spoken by Jeremy the prophet, saying, "And they took the thirty pieces of silver, the price of him that was valued, whom they of the children of Israel did value, and gave them for the potter's field, as the Lord appointed me."

And I said unto them, "If ye think good, give my price; and if not, forbear." So they weighed for my price thirty pieces of silver. And Jehovah said unto me, "Cast it unto the potter, a goodly price that I was prized at by them!" And I took the thirty pieces of silver, and cast them to the potter in the house of Jehovah.

And even this is doubtful; for the word above translated "potter" is in the LXX. rendered "furnace," and by modern scholars (Gesenius, Fürst, Ewald, De Wette, Herxheimer — following the Targum, Peshito-Syriac, and Kimchi) "treasury" <sup>b</sup> or "treasurer." Supposing, however, this passage to be that which St. Matthew refers to, three explanations suggest themselves:—

1. That the Evangelist unintentionally substituted the name of Jeremiah for that of Zechariah, at the same time altering the passage to suit his immediate object, in the same way that St. Paul has done in Rom. x. 6-9 (compared with Deut. viii. 17, xxx. 11-14), 1 Cor. xv. 45 (comp. with Gen. ii. 7). See Jowett's *St. Paul's Epistles (Essay on Quotations, etc.)*

<sup>a</sup> \* In Gen. xxxix. 1 the A. V. has "captain of the guard." H.

<sup>b</sup> תְּרִיזָר. If this be the right translation, the

passage, instead of being in agreement, is directly at variance with the statement of Matt. xxvii. 6 that the silver was not put into the treasury.

2. That this portion of the Book of Zechariah—a book the different portions of which there is reason to believe are in different styles and by different authors—was in the time of St. Matthew attributed to Jeremiah.

3. That the reference is to some passage of Jeremiah which has been lost from its place in his book, and exists only in the Evangelist. Some slight support is afforded to this view by the fact that potters and the localities occupied by them are twice alluded to by Jeremiah. Its partial correspondence with Zech. xi. 12, 13, is no argument against its having at one time formed a part of the prophecy of Jeremiah: for it is well known to every student of the Bible that similar correspondences are continually found in the prophets. See, for instance, Jer. xlviii. 45, comp. with Num. xxi. 27, 28, xxiv. 17; Jer. xlix. 27, comp. with Am. i.

4. For other examples, see Dr. Pusey's *Commentary* on Amos and Micah. [On this question see vol. i. p. 20 a, and vol. ii. p. 1503 a, Amer. ed.] The position of ACELDAMA has been treated of under that head. But there is not now any pottery in Jerusalem, nor within several miles of the city.<sup>a</sup>

\* POTTER'S VESSEL. [POTTERY.]

POTTERY. The art of pottery is one of the most common and most ancient of all manufactures. The modern Arab culinary vessels are chiefly of wood or copper (Niebuhr, *Voy.* i. 188), but it is abundantly evident, both that the Hebrews used earthenware vessels in the wilderness, where there would be little facility for making them, and that the potters' trade was afterwards carried on in Palestine. They had themselves

Egyptian Pottery. (Wilkinson.)

been concerned in the potters' trade in Egypt (Ps. lxxxi. 6), and the wall-paintings minutely illustrate the Egyptian process, which agrees with such notices of the Jewish practice as are found in the Prophets, and also in many respects with the process as pursued in the present day. The clay, when dug, was trodden by men's feet so as to form a paste (Is. xli. 25; Wisd. xv. 7) [BRICKS]; then placed by the potter<sup>b</sup> on the wheel beside which he sat, and shaped by him with his hands. How early the wheel came into use in Palestine we know not, but it seems likely that it was adopted from Egypt. It consisted of a wooden disk<sup>c</sup> placed on

another larger one, and turned by the hand by an attendant, or worked by a treadle (Is. xlv. 9; Jer. xviii. 3; Ecclus. xxxviii. 29, 30; see Tennent *Ceylon*, i. 452). The vessel was then smoothed and coated with a glaze,<sup>d</sup> and finally burnt in a furnace (Wilkinson, *Anc. Eg.* ii. 108). We find allusions to the potsherds, i. e. broken pieces<sup>e</sup> of vessels used as crucibles, or burst by the furnace, and to the necessity of keeping the latter clean (Is. xxx. 14, xlv. 9; Job ii. 8; Ps. xxii. 15; Prov. xxvi. 23; Ecclus. u. s.).

Earthen vessels were used, both by Egyptians and Jews, for various purposes besides culinary.

<sup>a</sup> \* The writer visited a pottery at Jerusalem, in company with Dr. Barclay, author of *The City of the Great King*. It was "in the nave of the ruins of a church of the Crusaders, near St. Stephen's gate, on Bezetha" (*MS. notes*, April 17, 1852). This pottery is also mentioned in the *Ordnance Survey of Jerusalem*, p. 59, where it is said that the clay used there is brought from *El-Jib*, Gibeon. Dr. Tobler speaks of three potteries on Bezetha, and describes the process of making various kinds of earthenware (*Denkwürdigkeiten aus Jerusalem*, p. 257). Mr. Williams mentions an illustration of Jer. xviii. 1-10, which he saw in one of these potteries (*Holy City*, vol. 1., *Mem.* p. 24).

Both of these writers speak of potters' clay as found near Jerusalem. H.

<sup>b</sup> 1. יִצְרָר, part. of יָצַר, "press:" *κεραμαίς figulus*.

2. פָּתָר, only in Dan. ii. 41: *figulus*.

<sup>c</sup> שְׁתֵּי אֲבָנִים, lit. "two stones:" *λίθοι: rota* (see Ges. p. 16).

<sup>d</sup> *Χαίρουα* (Ecclus. l. c.).

<sup>e</sup> יְרֵשָׁתִי: *σπράκων: testa*. See Pot, 9 (note).

Deeds were kept in them (Jer. xxxii. 14). Tiles with patterns and writing were common both in Egypt and Assyria, and were also in use in Palestine (Ez. iv. 1). There was at Jerusalem a royal establishment of potters (1 Chr. iv. 23), from whose employment, and from the fragments cast away in the process, the Potter's Field perhaps received its name (Is. xxx. 14). Whether the term "potter" (Zech. xi. 13) is to be so interpreted may be doubted, as it may be taken for "artificer" in general, and also "treasurer," as if the coin mentioned were to be weighed, and perhaps melted down to be recoined (Ges. p. 619; Grotius, Calmet, St. Jerome, Hitzig, Birch, *Hist. of Pottery*, i. 152; Saalschütz, *Hebr. Arch.* i. 14, 11).

H. W. P.

**POUND.** I. A weight. See WEIGHTS AND MEASURES.

2. (Μνᾶ.) A money of account, mentioned in the parable of the Ten Pounds (Luke xix. 12-27), as the talent is in the parable of the Talents (Matt. xxv. 14-30), the comparison of the Saviour to a master who intrusted money to his servants wherewith to trade in his absence being probably a frequent lesson in our Lord's teaching (comp. Mark xiii. 32-37). The reference appears to be to a Greek pound, a weight used as a money of account, of which sixty went to the talent, the weight depending upon the weight of the talent. At this time the Attic talent, reduced to the weight of the earlier Phœnician, which was the same as the Hebrew, prevailed in Palestine, though other systems must have been occasionally used. The Greek name doubtless came either from the Hebrew *maneh* or from a common origin; but it must be remembered that the Hebrew talent contained but fifty manehs, and that we have no authority for supposing that the maneh was called in Palestine by the Greek name, so that it is most reasonable to consider the Greek weight to be meant. [TALENT; WEIGHTS AND MEASURES.]

R. S. P.

\* **POWER** is used in 2 Chr. xxxii. 9 (A. V.) to denote a military force, an army. The abstract is similarly used for the concrete in Eph. ii. 2, where "the prince of the power of the air" (τὸν ἄρχοντα τῆς ἐξουσίας τοῦ ἀέρος) denotes the ruler of the powers (evil spirits) that dwell in the air. [AIR, Amer. ed.; PRINCIPALITY, do.] A.

**PRÆTORIUM** (πραιτώριον). The headquarters of the Roman military governor, wherever he happened to be. In time of peace some one of the best buildings of the city which was the residence of the proconsul or prætor was selected for this purpose. Thus Verres appropriated the palace of king Hiero at Syracuse; at Cæsarea that of Herod the Great was occupied by Felix (Acts xiii. 35); and at Jerusalem the new palace erected by the same prince was the residence of Pilate. This last was situated on the western, or more elevated hill of Jerusalem, and was connected with a system of fortifications, the aggregate of which constituted the παρεμβολή, or fortified barrack. It was the dominant position on the western hill, and — at any rate on one side, probably the eastern — was mounted by a flight of steps (the same from which St. Paul made his speech in Hebrew to the angry crowd of Jews, Acts xxii. 1 ff.). From the level below the barrack, a terrace led eastward to a gate opening into the western side of the cloister surrounding the Temple, the road being carried across the Valley of Tyropœon (separating the West-

ern from the Temple hill) on a causeway built up of enormous stone blocks. At the angle of the Temple cloister just above this entrance, *i. e.* the N. W. corner [see JERUSALEM, vol. ii. pp. 1300, 1318] stood the old citadel of the Temple hill, the βάρης, or *Byrsa*, which Herod rebuilt and called by the name *Antonîa*, after his friend and patron the triumvir. After the Roman power was established in Judæa, a Roman guard was always maintained in the Antonia, the commander of which for the time being seems to be the official termed στρατηγὸς τοῦ ἱεροῦ in the Gospels and Acts. The guard in the Antonia was probably relieved regularly from the cohort quartered in the παρεμβολή, and hence the plural form στρατηγοί is sometimes used, the officers, like the privates, being changed every watch; although it is very conceivable that a certain number of them should have been selected for the service from possessing a superior knowledge of the Jewish customs, or skill in the Hebrew language. Besides the cohort of regular legionaries there was probably an equal number of local troops, who when on service acted as the "supports" (δεξιτάδοι, *coverers of the right flank*, Acts xxiii. 23) of the former, and there were also a few squadrons of cavalry; although it seems likely that both these and the local troops had separate barracks at Jerusalem, and that the παρεμβολή, or prætorian camp, was appropriated to the Roman cohort. The ordinary police of the Temple and the city seems to have been in the hands of the Jewish officials, whose attendants (δηρέται) were provided with dirks and clubs, but without the regular armor and the discipline of the legionaries. When the latter were required to assist this *gendarmérie*, either from the apprehension of serious tumult, or because the service was one of great importance, the Jews would apply to the officer in command at the Antonia, who would act so far under their orders as the commander of a detachment in a manufacturing town does under the orders of the civil magistrate at the time of a riot (Acts iv. 1, v. 24). But the power of life and death, or of regular scourging, rested only with the prætor, or the person representing him and commissioned by him. This power, and that which would always go with it, — the right to press whatever men or things were required by the public exigencies, — appears to be denoted by the term ἐξουσία, a term perhaps the translation of the Latin *imperium*, and certainly its equivalent. It was inherent in the prætor or his representatives — hence themselves popularly called ἐξουσίαί, or ἐξουσίαί ὑπέρτεραι (Rom. xiii. 1, 3) — and would be communicated to all military officers in command of detached posts, such as the centurion at Capernaum, who describes himself as possessing summary powers of this kind because he was ὑπ' ἐξουσία, covered by the privilege of the *imperium* (Matt. viii. 9). The forced purveyances (Matt. v. 40), the requisitions for baggage animals (Matt. v. 41), the summary punishments following transgression of orders (Matt. v. 39) incident to a military occupation of the country, of course must have been a perpetual source of irritation to the peasantry along the lines of the military roads, even when the despotic authority of the Roman officers might be exercised with moderation. But such a state of things also afforded constant opportunities to an unprincipled soldier to extort money under the pretense of a loan, as the price of exemption from personal services which he was competent to insist

upon, or as a bribe to buy off the prosecution of some vexatious charge before a military tribunal (Matt. v. 42; Luke iii. 14).

The relations of the military to the civil authorities in Jerusalem come out very clearly from the history of the Crucifixion. When Judas first makes his proposition to betray Jesus to the chief priests, a conference is held between them and the στρατηγός as to the mode of effecting the object (Luke xxii. 4). The plan involved the assemblage of a large number of the Jews by night, and Roman jealousy forbade such a thing, except under the surveillance of a military officer. An arrangement was accordingly made for a military force, which would naturally be drawn from the Antonia. At the appointed hour Judas comes and takes with him "the troops"<sup>a</sup> together with a number of police (δυναστείας) under the orders of the high-priests and Pharisees (John xviii. 3). When the apprehension of Jesus takes place, however, there is scarcely any reference to the presence of the military. Matthew and Mark altogether ignore their taking any part in the proceeding. From St. Luke's account one is led to suppose that the military commander posted his men outside the garden, and entered himself with the Jewish authorities (xxii. 52). This is exactly what might be expected under the circumstances. It was the business of the Jewish authorities to apprehend a Jewish offender, and of the Roman officer to take care that the proceeding led to no breach of the public peace. But when apprehended, the Roman officer became responsible for the custody of the offender, and accordingly he would at once chain him by the wrists to two soldiers (Acts xxi. 33) and carry him off. Here St. John accordingly gives another glimpse of the presence of the military: "the troops then, and the chiliarch and the officers of the Jews apprehended Jesus, and put him in bonds and led him away, first of all to Annas" (xviii. 12). The insults which St. Luke mentions (xxii. 63), are apparently the barbarous sport of the ruffianly soldiers and police while waiting with their prisoner for the assembling of the Sanhedrim in the hall of Caiaphas; but the blows inflicted are those with the vine-stick, which the centurions carried, and with which they struck the soldiers on the head and face (Juvenal, Sat. viii. 247), not a flagellation by the hands of lictors.

When Jesus was condemned by the Sanhedrim and accordingly sent to Pilate, the Jewish officials certainly expected that no inquiry would be made into the merits of the case, but that Jesus would be simply received as a convict on the authority of his own countrymen's tribunal, thrown into a dungeon, and on the first convenient opportunity executed. They are obviously surprised at the question, "What accusation bring ye against this man?" and at the apparition of the governor himself outside the precinct of the prætorium. The cheapness in which he had held the life of the native population on a former occasion (Luke xiii. 1), must have led them to expect a totally different course from him. His scrupulosity, most extraordinary in any Roman, stands in striking contrast with the recklessness of the commander who proceeded at once to put St. Paul to torture, simply to ascertain why it was that so violent an attack

was made on him by the crowd (Acts xxii. 24). Yet this latter is undoubtedly a typical specimen of the feeling which prevailed among the conquerors of Judæa in reference to the conquered. The ordering the execution of a native criminal would, in ninety-nine instances out of a hundred, have been regarded by a Roman magnate as a simply ministerial act, — one which indeed only he was competent to perform, but of which the performance was unworthy of a second thought. It is probable that the hesitation of Pilate was due rather to a superstitious fear of his wife's dream, than to a sense of justice or a feeling of humanity towards an individual of a despised race; at any rate such an explanation is more in accordance with what we know of the feeling prevalent among his class in that age.

When at last Pilate's effort to save Jesus was defeated by the determination of the Jews to claim Barabbas, and he had testified, by washing his hands in the presence of the people, that he did not consent to the judgment passed on the prisoner by the Sanhedrim, but must be regarded as performing a merely ministerial act, — he proceeds at once to the formal infliction of the appropriate penalty. His lictors take Jesus and inflict the punishment of scourging upon Him in the presence of all (Matt. xxvii. 26). This, in the Roman idea, was the necessary preliminary to capital punishment, and had Jesus not been an alien, his head would have been struck off by the lictors immediately afterwards. But crucifixion being the customary punishment in that case, a different course becomes necessary. The execution must take place by the hands of the military, and Jesus is handed over from the lictors to these. They take Him into the prætorium, and muster the whole cohort — not merely that portion which is on duty at the time (Matt. xxvii. 27; Mark xv. 16). While a centurion's guard is being told off for the purpose of executing Jesus and the two criminals, the rest of the soldiers divert themselves in mocking the reputed King of the Jews (Matt. xxvii. 28-30; Mark xv. 17-19; John xix. 2-3), Pilate, who in the mean time has gone in, being probably a witness of the pitiable spectacle. His wife's dream still haunts him, and although he has already delivered Jesus over to execution, and what is taking place is merely the ordinary course,<sup>b</sup> he comes out again to the people to protest that he is passive in the matter, and that they must take the prisoner, there before their eyes in the garb of mockery, and crucify Him (John xix. 4-6). On their reply that Jesus had asserted Himself to be the Son of God, Pilate's fears are still more roused, and at last he is only induced to go on with the military execution, for which he is himself responsible, by the threat of a charge of treason against Cæsar in the event of his not doing so (John xix. 7-13). Sitting then solemnly on the *beta*, and producing Jesus, who in the mean time has had his own clothes put upon Him, he formally delivers Him up to be crucified in such a manner as to make it appear that he is acting solely in the discharge of his duty to the emperor (John xix. 13-16).

The centurion's guard now proceed with the prisoners to Golgotha, Jesus himself carrying the cross-piece of wood to which his hands were to be nailed

<sup>a</sup> Called τὴν σπειραν, although of course only a detachment: from the cohort.

<sup>b</sup> Herod's guard had pursued precisely the same brutal conduct just before.

Weak from loss of blood, the result of the scourging, He is unable to proceed; but just as they are leaving the gate they meet Simon the Cyrenian, and at once use the military right of pressing (*ἀγγαρεύειν*) him for the public service. Arrived at the spot, four soldiers are told off for the business of the executioner, the remainder keeping the ground. Two would be required to hold the hands, and a third the feet, while the fourth drove in the nails. Hence the distribution of the garments into four parts. The centurion in command, the principal Jewish officials and their acquaintance (hence probably St. John xviii. 15), and the nearest relations of Jesus (John xix. 26, 27), might naturally be admitted within the cordon—a square of perhaps 100 yards. The people would be kept outside of this, but the distance would not be too great to read the title, “Jesus the Nazarene, the King of the Jews,” or at any rate to gather its general meaning.<sup>a</sup> The whole acquaintance of Jesus, and the women who had followed Him from Galilee—too much afflicted to mix with the crowd in the immediate vicinity, and too numerous to obtain admission inside the cordon—looked on from a distance (*ἀπὸ μακρόθεν*), doubtless from the hill on the other side of the Valley of Kedron<sup>b</sup>—a distance of not more than 600 or 700 yards, according to Mr. Fergusson’s view of the site of Golgotha.<sup>c</sup> The vessel containing vinegar (John xix. 29) was set within the cordon for the benefit of the soldiers, whose duty it was to remain under arms (Matt. xxvii. 36) until the death of the prisoners, the centurion in command being responsible for their not being taken down alive. Had the Jews not been anxious for the removal of the bodies, in order not to shock the eyes of the people coming in from the country on the following day, the troops would have been relieved at the end of their watch, and their place supplied by others until their death took place. The jealousy with which any interference with the regular course of a military execution was regarded appears from the application of the Jews to Pilate—not to the centurion—to have the prisoners dispatched by breaking their legs. For the performance of this duty other soldiers were dispatched (xix. 32), not merely permission given to the Jews to have the operation performed. Even for the watching of the sepulchre recourse is had to Pilate, who bids the applicants “take a guard” (Matt. xxvii. 65), which they do, and put a seal on the stone in the presence of the soldiers, in a way exactly analogous to that practiced in the custody of the sacred robes of the high-priest in the Antonia (Joseph. *Ant.* xv. 11, § 4).

The Prætorian camp at Rome, to which St. Paul refers (Phil. i. 13), was erected by the emperor Tiberius, acting under the advice of Sejanus. Before that time the guards were billeted in different parts of the city. It stood outside the walls, at some distance short of the fourth milestone, and so near either to the Salarian or the Nomentane road, that Nero, in his flight by one or the other of them

to the house of his freedman Phaor, which was situated between the two, heard the cheers of the soldiers within for Galba. In the time of Vespasian the houses seem to have extended so far as to reach it (Tacitus, *Annal.* iv. 2; Suetonius, *Tib.* 37, *Neron.* 48; Plin. *II. N.* iii. 5). From the first, buildings must have sprung up near it for sutlers and others. St. Paul appears to have been permitted for the space of two years to lodge, so to speak, “within the rules” of the Prætorium (Acts xviii. 30), although still under the custody of a soldier.

J. W. B.

PRAYER. The words generally used in the O. T. are *יָרַח* (from root *יָרַח*, “to incline,” “to be gracious;” whence in Hithp. “to entreat grace or mercy”); LXX. (generally), *δέησις*: Vulg. *deprecatio*: and *יָדַעַתְּ* (from root *יָדַעַתְּ*, “to judge;” whence in Hithp. “to seek judgment”): LXX. *προσευχή*: Vulg. *oratio*. The latter is used to express intercessory prayer. The two words point to the two chief objects sought in prayer, namely, the prevalence of right and truth, and the gift of mercy.

The object of this article will be to touch briefly on (1.) the doctrine of Scripture as to the nature and efficacy of prayer; (2.) its directions as to time, place, and manner of prayer; (3.) its types and examples of prayer.

(1.) Scripture does not give any theoretical explanation of the mystery which attaches to prayer. The difficulty of understanding its real efficacy arises chiefly from two sources: from the belief that man lives under general laws, which in all cases must be fulfilled unalterably; and the opposing belief that he is master of his own destiny, and need pray for no external blessing. The first difficulty is even increased when we substitute the belief in a Personal God for the sense of an Impersonal Destiny; since not only does the predestination of God seem to render prayer useless, but his wisdom and love, giving freely to man all that is good for him, appear to make it needless.

The difficulty is familiar to all philosophy, the former element being far the more important: the logical inference from it is the belief in the absolute uselessness of prayer.<sup>d</sup> But the universal instinct of prayer, being too strong for such reasoning, generally exacted as a compromise the use of prayer for good in the abstract (the “mens sana in corpore sano”); a compromise theoretically liable to the same difficulties, but wholesome in its practical effect. A far more dangerous compromise was that adopted by some philosophers, rather than by mankind at large, which separated internal spiritual growth from the external circumstances which give scope thereto, and claimed the former as belonging entirely to man, while allowing the latter to be gifts of the gods, and therefore to be fit objects of prayer.<sup>e</sup>

Conveniat nobis, rebusque sit utile nostris.  
Carior est illis homo quam sibi.”

Juv. *Sat.* x. 346-349.

And the older quotation, referred to by Plato (*Alc.* ii. 154):—

Ζεὺ βασιλεῦ, τὰ μὲν ἐσθλά καὶ εὐχομένους καὶ ἀνεύκτους

Ἄμμι δίδων· τὰ δὲ δεῖνά καὶ εὐχομένους ἀπάλεξε.

e “Sed satis est orare Jovem, quæ donat et aufert  
Det vitam, det opes; æquum mi animum ipse parabo.”

Hæc. *Ep.* i. xviii. 111; comp.

Cic. *De Nat. Deor.* ii. 36

<sup>a</sup> The latter supposition is perhaps the more correct, as the four Evangelists give four different forms.

<sup>b</sup> \* It is impossible to be so precise in our ignorance of the place of the crucifixion. H.

<sup>c</sup> The two first Evangelists name Mary Magdalene among these women (Matt. xxvii. 56; Mark xv. 40). St. John names her, together with the Lord’s mother, and Mary Clopas, as at the side of the cross.

<sup>d</sup> See the well-known lines:—

“Permittere ipsis experire Numinibus, quid

The most obvious escape from these difficulties is to fall back on the mere subjective effect of prayer, and to suppose that its only object is to produce on the mind that consciousness of dependence which leads to faith, and that sense of God's protection and mercy which fosters love. These being the conditions of receiving, or at least of rightly entering into, God's blessings, it is thought that in its encouragement of them all the use and efficacy of prayer consist.

Now Scripture, while, by the doctrine of spiritual influence, it entirely disposes of the latter difficulty, does not so entirely solve that part of the mystery which depends on the nature of God. It places it clearly before us, and emphasizes most strongly those doctrines on which the difficulty turns. The reference of all events and actions to the will or permission of God, and of all blessings to his free grace, is indeed the leading idea of all its parts, historical, prophetic, and doctrinal; and this general idea is expressly dwelt upon in its application to the subject of prayer. The principle that our "Heavenly Father knoweth what things we have need of before we ask Him," is not only enunciated in plain terms by our Lord, but is at all times implied in the very form and nature of all Scriptural prayers; and moreover, the ignorance of man, who "knows not what to pray for as he ought," and his consequent need of the Divine guidance in prayer, are dwelt upon with equal earnestness. Yet, while this is so, on the other hand the instinct of prayer is solemnly sanctioned and enforced in every page. Not only is its subjective effect asserted, but its real objective efficacy, as a means appointed by God for obtaining blessing, is both implied and expressed in the plainest terms. As we are bidden to pray for general spiritual blessings, in which instance it might seem as if prayer were simply a means of preparing the heart, and so making it capable of receiving them; so also are we encouraged to ask special blessings, both spiritual and temporal, in hope that thus (and thus only) we may obtain them, and to use intercession for others, equally special and confident, in trust that an effect, which in this case cannot possibly be subjective to ourselves, will be granted to our prayers. The command is enforced by direct promises, such as that in the Sermon on the Mount (Matt. vii. 7, 8), of the clearest and most comprehensive character; by the example of all saints and of our Lord Himself; and by historical records of such effect as granted to prayer again and again.

Thus, as usual in the case of such mysteries, the two apparently opposite truths are emphasized, because they are needful to man's conception of his relation to God; their reconciliation is not, perhaps cannot be, fully revealed. For, in fact, it is involved in that inscrutable mystery which attends on the conception of any free action of man as necessary for the working out of the general laws of God's unchangeable will.

At the same time it is clearly implied that such a reconciliation exists, and that all the apparently isolated and independent exertions of man's spirit in prayer are in some way perfectly subordinated to the One supreme will of God, so as to form a part of his scheme of Providence. This follows from the condition, expressed or understood in every prayer, "Not my will, but Thine, be done." It is seen in the distinction between the granting of our petitions (which is not absolutely promised), and the

certain answer of blessing to all faithful prayer; a distinction exemplified in the case of St. Paul's prayer against the "thorn in the flesh," and of our Lord's own agony in Gethsemane. It is distinctly enunciated by St. John (1 John v. 14, 15): "If we ask any thing according to his will, He heareth us: and if we know that He hear us, whatsoever we ask, we know that we have the petitions that we desired of Him."

It is also implied that the key to the mystery lies in the fact of man's spiritual unity with God in Christ, and of the consequent gift of the Holy Spirit. All true and prevailing prayer is to be offered "in the name of Christ" (John xiv. 13, xv. 16, xvi. 23-27), that is, not only for the sake of his Atonement, but also in dependence on his intercession; which is therefore as a central influence, acting on all prayers offered, to throw off whatever in them is evil, and give efficacy to all that is in accordance with the Divine will. So also is it said of the spiritual influence of the Holy Ghost on each individual mind, that while "we know not what to pray for," the indwelling "Spirit makes intercession for the saints, according to the will of God" (Rom. viii. 26, 27). Here, as probably in all other cases, the action of the Holy Spirit on the soul is to free agents, what the laws of nature are to things inanimate, and is the power which harmonizes free individual action with the universal will of God. The mystery of prayer, therefore, like all others, is seen to be resolved into that great central mystery of the Gospel, the communion of man with God in the Incarnation of Christ. Beyond this we cannot go.

(2.) There are no directions as to prayer given in the Mosaic Law; the duty is rather taken for granted, as an adjunct to sacrifice, than enforced or elaborated. The Temple is emphatically designated as "the House of Prayer" (Is. lvi. 7); it could not be otherwise, if "He who hears prayer" (Ps. lxxv. 2) there manifested his special presence; and the prayer of Solomon offered at its consecration (1 K. viii. 30, 35, 38) implies that in it were offered, both the private prayers of each single man, and the public prayers of all Israel.

It is hardly conceivable that, even from the beginning, public prayer did not follow every public sacrifice, whether propitiatory or eucharistic, as regularly as the incense, which was the symbol of prayer (see Ps. cxli. 2; Rev. vii. 3, 4). Such a practice is alluded to as common, in Luke i. 10; and in one instance, at the offering of the first-fruits, it was ordained in a striking form (Deut. xxvi. 12-15). In later times it certainly grew into a regular service, both in the Temple and in the Synagogue.

But, besides this public prayer, it was the custom of all at Jerusalem to go up to the Temple, at regular hours if possible, for private prayer (see Luke xviii. 10; Acts iii. 1); and those who were absent were wont to "open their windows towards Jerusalem," and pray "towards" the place of God's Presence (1 K. viii. 46-49; Dan. vi. 10; Ps. v. 7, xxviii. 2; cxxxviii. 2). The desire to do this was possibly one reason, independently of other and more obvious ones, why the house-top or the mountain-top were chosen places of private prayer.

The regular hours of prayer seem to have been three (see Ps. lv. 17; Dan. vi. 10), "the evening," that is, the ninth hour (Acts iii. 1, x. 3) the hour of the evening sacrifice (Dan. ix. 21); the "morn-

mg," that is, the third hour (Acts ii. 15), that of the morning sacrifice; and the sixth hour, or "noonday." To these would naturally be added some prayer at rising and lying down to sleep; and thence might easily be developed (by the love of the mystic number seven), the "seven times a day" of Ps. cxix. 164, if this is to be literally understood, and the seven hours of prayer of the ancient church. Some at least of these hours seem to have been generally observed by religious men in private prayer at home, or in the midst of their occupation and in the streets (Matt. vi. 5). Grace before meat would seem to have been an equally common practice (see Matt. xv. 36; Acts xxvii. 35).

The posture of prayer among the Jews seems to have been most often standing (1 Sam. i. 26; Matt. vi. 5; Mark xi. 25; Luke xviii. 11); unless the prayer were offered with especial solemnity, and humiliation, which was naturally expressed by kneeling (1 K. viii. 54; comp. 2 Chr. vi. 13; Ezr. ix. 5; Ps. xcv. 6; Dan. vi. 10); or prostration (Josh. vii. 6; 1 K. xviii. 42; Neh. viii. 6). The hands were "lifted up," or "spread out" before the Lord (Ps. xxviii. 2, cxxxiv. 2; Ex. ix. 33, &c., &c.). In the Christian Church no posture is mentioned in the N. T. excepting that of kneeling; see Acts vii. 60 (St. Stephen); ix. 40 (St. Peter); xx. 36, xxi. 5 (St. Paul); perhaps from imitation of the example of our Lord in Gethsemane (on which occasion alone his posture in prayer is recorded). In after-times, as is well known, this posture was varied by the custom of standing in prayer on the Lord's-day, and during the period from Easter to Whit-Sunday, in order to commemorate his resurrection, and our spiritual resurrection in Him.

(3.) The only form of prayer given for perpetual use in the O. T. is the one in Deut. xxvi. 5-15, connected with the offering of tithes and first-fruits, and containing in simple form the important elements of prayer, acknowledgment of God's mercy, self-dedication, and prayer for future blessing. To this may perhaps be added the three-fold blessing of Num. vi. 24-26, couched as it is in a precatory form; and the short prayers of Moses (Num. x. 35, 36) at the moving and resting of the cloud, the former of which was the germ of the 68th Psalm.

Indeed the forms given, evidently with a view to preservation and constant use, are rather hymns or songs than prayers properly so called, although they often contain supplication. Scattered through the historical books, we have the Song of Moses, *taught* to the children of Israel (Deut. xxxii. 1-43); his less important songs after the passage of the Red Sea (Ex. xv. 1-19) and at the springing out of the water (Num. xxi. 17, 18); the Song of Deborah and Barak (Judg. v.); the Song of Hannah in 1 Sam. ii. 1-10 (the effect of which is seen by reference to the Magnificat); and the Song of David (Ps. xviii.) singled out in 2 Sam. xxii. But after David's time, the existence and use of the Psalms, and the poetical form of the Prophetic books, and of the prayers which they contain, must have tended to fix this Psalmic character on all Jewish prayer. The effect is seen plainly in the form of Hezekiah's prayers in 2 K. xix. 15-19; Is. xxxviii. 9-20.

But of the prayers recorded in the O. T., the two most remarkable are those of Solomon at the dedication of the Temple (1 K. viii. 23-53), and

of Joshua the high-priest, and his colleagues, after the Captivity (Neh. ix. 5-38).<sup>a</sup> The former is a prayer for God's presence with his people in time of national defeat (vv. 33, 34), famine or pestilence (35-37), war (44, 45), and captivity (46-50), and with each individual Jew and stranger (41-43) who may worship in the Temple. The latter contains a recital of all God's blessings to the children of Israel from Abraham to the Captivity, a confession of their continual sins, and a fresh dedication of themselves to the Covenant. It is clear that both are likely to have exercised a strong liturgical influence, and accordingly we find that the public prayer in the Temple, already referred to, had in our Lord's time grown into a kind of liturgy. Before and during the sacrifice there was a prayer that God would put it into their hearts to love and fear Him; then a repeating of the Ten Commandments, and of the passages written on their phylacteries [FRONTLETS]; next three or four prayers, and ascriptions of glory to God; and the blessing from Num. vi. 24-26, "The Lord bless thee," etc., closed this service. Afterwards, at the offering of the meat-offering, there followed the singing of psalms, regularly fixed for each day of the week, or specially appointed for the great festivals (see Bingham, b. xiii. ch. v. sect. 4). A somewhat similar liturgy formed a regular part of the Synagogue worship, in which there was a regular minister, as the leader of prayer (גִּבּוֹר הַקְּבוּצָה, "legatus ecclesie"); and public prayer, as well as private, was the special object of the Proseuchæ. It appears also, from the question of the disciples in Luke xi. 1, and from Jewish tradition, that the chief teachers of the day gave special forms of prayer to their disciples, as the badge of their discipleship and the best fruits of their learning.

All Christian prayer is, of course, based on the Lord's Prayer; but its spirit is also guided by that of his prayer in Gethsemane, and of the prayer recorded by St. John (ch. xvii.), the beginning of his great work of intercession. The first is the comprehensive type of the simplest and most universal prayer; the second justifies prayers for special blessings of this life, while it limits them by perfect resignation to God's will; the last, dwelling as it does on the knowledge and glorification of God, and the communion of man with Him, as the one object of prayer and life, is the type of the highest and most spiritual devotion. The Lord's Prayer has given the form and tone of all ordinary Christian prayer; it has fixed, as its leading principles, simplicity and confidence in Our Father, community of sympathy with all men, and practical reference to our own life; it has shown, as its true objects, first the glory of God, and next the needs of man. To the intercessory prayer, we may trace up its transcendental element, its desire of that communion through love with the nature of God, which is the secret of all individual holiness, and of all community with men.

The influence of these prayers is more distinctly traced in the prayers contained in the Epistles (see Eph. iii. 14-21; Rom. xvi. 25-27; Phil. i. 3-11; Col. i. 9-15; Heb. xiii. 20, 21; 1 Pet. v. 10, 11, &c.), than in those recorded in the Acts. The public prayer, which from the beginning became the principle of life and unity in the Church (see

<sup>a</sup> To these may be added Dan. ix. 4-19.

Acts ii. 42; and comp. i. 24, 25, iv. 24-30, vi. 6, xii. 5, xiii. 2, 3, xvi. 25, xx. 36, xxi. 5), although doubtless always including the Lord's Prayer, probably in the first instance took much of its form and style from the prayers of the synagogues. The only form given (besides the very short one of Acts i. 24, 25), dwelling as it does (Acts iv. 24-30) on the Scriptures of the O. T. in their application to our Lord, seems to mark this connection. It was probably by degrees that they assumed the distinctively Christian character.

In the record of prayers accepted and granted by God, we observe, as always, a special adaptation to the period of his dispensation to which they belong. In the patriarchal period, they have the simple and childlike tone of domestic supplication for the simple and apparently trivial incidents of domestic life. Such are the prayers of Abraham for children (Gen. xv. 2, 3); for Ishmael (xvii. 18); of Isaac for Rebekah (xxv. 21); of Abraham's servant in Mesopotamia (xxiv. 12-14); although sometimes they take a wider range in intercession, as with Abraham for Sodom (Gen. xviii. 23-32), and for Abimelech (xx. 7, 17). In the Mosaic period they assume a more solemn tone and a national bearing; chiefly that of direct intercession for the chosen people; as by Moses (Num. xi. 2, xii. 13, xxi. 7); by Samuel (1 Sam. vii. 5, xii. 19, 23); by David (2 Sam. xxiv. 17, 18); by Hezekiah (2 K. xix. 15-19); by Isaiah (2 K. xix. 4; 2 Chr. xxxii. 20); by Daniel (Dan. ix. 20, 21): or of prayer for national victory, as by Asa (2 Chr. xiv. 11); Jehoshaphat (2 Chr. xx. 6-12). More rarely are they for individuals, as in the prayer of Hannah (1 Sam. i. 12); in that of Hezekiah in his sickness (2 K. xx. 2); and the intercession of Samuel for Saul (1 Sam. xv. 11, 35), &c. A special class are those which precede and refer to the exercise of miraculous power; as by Moses (Ex. viii. 12, 30, xv. 25); by Elijah at Zarephath (1 K. xvii. 20) and Carmel (1 K. xviii. 36, 37); by Elisha at Shunem (2 K. iv. 33) and Dothan (vi. 17, 18); by Isaiah (2 K. xx. 11); by St. Peter for Tabitha (Acts ix. 40); by the elders of the Church (James v. 14, 15, 16). In the New Testament they have a more directly spiritual bearing; such as the prayer of the Church for protection and grace (Acts iv. 24-30); of the Apostles for their Samaritan converts (viii. 15); of Cornelius for guidance (x. 4, 31); of the Church for St. Peter (xii. 5); of St. Paul at Philippi (xvi. 25); of St. Paul against the thorn in the flesh, answered, although not granted (2 Cor. xii. 7-9), &c. It would seem the intention of Holy Scripture to encourage all prayer, more especially intercession, in all relations, and for all righteous objects.

A. B.

\* **PREACHING.** The word "preach" is derived through the French *prêcher* from the Latin *prædicare*. As such it means primarily to publish or proclaim by public authority, as a herald or crier (*præco*), and answers to the Greek *κηρύσσω*, properly, *to proclaim as a herald* (*κηρυξ*), and then in general simply *to proclaim, publish*, as one acting by authority. This latter, the common classical meaning of *κηρύσσω*, is its frequent meaning in the New Testament. In the Gospels it rarely, if at all, appears in any other than its simple classical signification, and such, therefore, in the Gospels at least, is the uniform meaning of its corresponding "preach." Thus (Matt. iii. 1), "John the Baptist, preaching," *i. e.* making proclama-

tion, in the wilderness of Judæa (iv. 23); "preaching the Gospel," *i. e.*, proclaiming the glad news "of the kingdom" (x. 27) "that preach ye," *i. e.* proclaim, "on the house-tops." Gradually, however, the word *κηρύσσω*, from its frequent special use, came to take, like many other New Testament words (as *εὐαγγέλιον, ἀπόστολος, ἐπίσκοπος, δίδάκωνος*), a specific and half technical religious sense. Hence in the Epistles it appears partly in its proper sense, as (Rom. x. 14), "How shall they hear without one to make proclamation (*τοῦ κηρύσσοντος*)?" and partly as a half technical term denoting the proclaiming of salvation without the added substantive. Thus the "foolishness of preaching" is the foolishness (in the judgment of human wisdom) of proclaiming salvation through the cross, and (1 Pet. iii. 19) the preaching to the spirits in prison, whatever the form and locality of the preaching, is undoubtedly the proclaiming of salvation and not of judgment. In this sense the word approximates in the New Testament to the idea of the English "preach," though it is by no means so strictly a religious word, and never perhaps carries with it the idea of a set formal discourse, which is so commonly implied in the English word.

"Preach," however, is employed in the New Testament to translate other words besides *κηρύσσω*. It is sometimes used as a rendering of *λαλέω*, *to speak*; once of *διαγγέλλω*, *to announce abroad, to spread news* (Luke ix. 60); twice of *διαλέγομαι*, *to discourse* (Acts xx. 7, 9); three or four times of *καταγγέλλω*, *to announce thoroughly* (as Acts iv. 2); and frequently of *εὐαγγελίζομαι*, *to bring good news, or glad tidings*, but translated, in this case, *to preach the Gospel*. Of this word, "preach the Gospel" is often a sufficiently accurate translation, though in many cases it is not. Thus (Matt. xi. 5), "the poor have the Gospel preached to them," would be more properly rendered "the poor have glad tidings brought to them." Still more unfortunate is the rendering "preach the Gospel" in the following passages: Rom. x. 15, "How beautiful are the feet of them that preach the Gospel of peace," where all the force of the imagery is lost (the feet of them that bring us as from afar the glad tidings of peace); Gal. iii. 8, "The Scripture . . . preached before the Gospel unto Abraham," *i. e.* brought before, or formerly, the joyful message to Abraham; Heb. iv. 2, "For unto us was the Gospel preached as well as unto them," *i. e.* for we have had the glad announcement (of a rest) just as did they.

As a rendering of *εὐαγγελίζομαι*, "preach the Gospel" refers simply to the announcement of the Gospel under the character of glad tidings; as a rendering of *κηρύσσω*, it refers to it simply as a public and authorized proclamation. In both cases it refers rather to the first announcement of the Gospel to the ignorant and estranged, rather than to the instructions given to the historic body by pastors and teachers. These would naturally be designated by some other word. Of that extension of the word "preach," by which it comes to denote the ordinary religious discourses of a pastor to his people, the New Testament knows nothing; although this is undoubtedly a very natural extension of the term. The words originally employed to denote the announcement of the Gospel to the heathen, might very easily slide over into an application to all public and established utterances of religious truth.

It is obvious that the oral preaching of the Gospel is divinely enjoined in the New Testament, and is that which the departing Saviour instituted as the grand means of evangelizing the world. Something might, indeed, be due to the great imperfection then attendant on any other means of propagating the Gospel, and the almost complete dependence of the mass of men upon oral communication, for instruction on any subject. Still the Saviour consulted not only the necessity of the times, but the constitution of human nature. Nothing reaches the human mind and heart so quickly as the fresh and living utterances from kindred hearts and lips, and we may well believe, therefore, that the office of preaching and the divine credentials of the preacher have their source equally in the authority and the wisdom of God. "Preaching," the oral proclamation of the Gospel, is divinely enjoined. The New Testament heralds of the cross do not make their proclamation except as they are sent forth (Rom. x. 15). The Christian preacher is the "legate of the skies, his office sacred, his credentials clear;" and his function is to endure in undiminished sacredness and importance, until the Gospel has achieved its last triumph, and the Church is ready for the coming of her Lord. A. C. K.

\* **PRECIPITATION.** [PUNISHMENTS, (5).]

\* **PREPARATION OF THE PASS-OVER** (John xix. 14). [PASSOVER, p. 2350 f.]

\* **PRESENTLY** = immediately (1 Sam. ii. 16; Matt. xxvi. 53). The difference between "now" and "soon" is important to the sense in those passages. H.

**PRESENTS.** [GIFTS.]

**PRESIDENT.** *Sârâc*, or *Sârêcâ*, only used Dan. vi., the Chaldee equivalent for Hebrew *Shôlêr*, probably from *Sara*, *Zend*, a "head" (see Strabo, xi. 331). *Σαραπάρης* = *κεφαλοτόμος* is connected with the Sanskrit *sîras* or *çîras*, and is traced in *Sargon* and other words (Eichhoff, *Vergl. Spr.* pp. 129, 145; see Her. iii. 89, where he calls *Satrap* a Persian word). H. W. P.

\* **PREVENT** (from *prævenio*, "to come before,") is never used in the A. V. in its present sense of *to hinder*, but occurs in other senses, now obsolete, which are likely to perplex the common reader. In the O. T. it is the rendering of the Piel and Hiphil forms of the Heb. *קָדַם*, *kâdam*, signifying, primarily, "to go or come before;" in the Apocrypha and the N. T., of *φθάνα*, and once, *προφθάνα*, "to anticipate." It is used, accordingly, (1) in the literal sense of "to come before," e. g. Ps. lxxxviii. 13, "in the morning shall my prayer prevent thee;" so Ps. xc. 2, marg.; (2) "to anticipate," Ps. cxix. 147, "I prevented the lawning of the morning" (more strictly, "I rise early in the dawn"); so ver. 148; Wisd. vi. 13, xvi. 28; Matt. xvii. 25; 1 Thess. iv. 15, "shall not prevent them which are asleep;" (3) "to meet" as a friend, Ps. xxi. 3, "Thou preventest him with the blessings of goodness;" so Ps. lix. 10, lxxix. 6; Is. xxi. 14; Job iii. 12 (receive); (4) "to meet" as an enemy, "come upon," "fall upon," e. g. Job cxx. 27, "the days of affliction prevented me;" similarly 2 Sam. xxii. 6 (seized upon), 19; Ps.

xviii. 5, 18; Am. ix. 10; Ps. xvii. 13 marg. Job xli. 11, "Who hath prevented me, that I should repay him?" (A. V.) is well rendered by Dr. Noyes, "Who hath done me a favor," etc. A.

\* **PRICE** is used in the A. V. (ed. 1611) in 1 Cor. ix. 24; Phil. iii. 14, for *prize*, which is substituted in modern editions. A.

\* **PRICKS.** [GOAD.]

**PRIEST** (כֹּהֵן, *côhên*: *iepêus*: *sacerdos*).

*Name.* — It is unfortunate that there is nothing like a *consensus* of interpreters as to the etymology of this word. Its root-meaning, uncertain as far as Hebrew itself is concerned, is referred by Gesenius (*Thesaurus*, s. v.) to the idea of prophecy. The *Côhên* delivers a divine message, stands as a mediator between God and man, represents each to the other. This meaning, however, belongs to the Arabic, not to the Hebrew form, and Ewald connects the latter with the verb *הָכִין* (*hécîn*), to array, put in order (so in Is. lxi. 10), seeing in it a reference to the primary office of the priests as arranging the sacrifice on the altar (*Alterthüm.* p. 272). According to Saalschütz (*Archäol. der Hebr.* c. 78), the primary meaning of the word = minister, and he thus accounts for the wider application of the name (*infra*). Bähr (*Symbolik*, ii.

15) connects it with an Arabic root = *كرب*, to draw near. Of these etymologies, the last has the merit of answering most closely to the received usage of the word. In the precise terminology of the Law, it is used of one who may "draw near" to the Divine Presence (Ex. xix. 22. xxx. 20) while others remain afar off, and is applied accordingly, for the most part, to the sons of Aaron, as those who were alone authorized to offer sacrifices. In some remarkable passages it takes a wider range. It is applied to the priests of other nations or religions, to Melchizedek (Gen. xiv. 18), Potipherah (Gen. xli. 45), Jethro (Ex. ii. 16), to those who discharged priestly functions in Israel before the appointment of Aaron and his sons (Ex. xix. 22). A case of greater difficulty presents itself in 2 Sam. viii. 18, where the sons of David are described as priests (*Côhânim*), and this immediately after the name had been applied in its usual sense to the sons of Aaron. The writer of 1 Chr. xviii. 17, as if reluctant to adopt this use of the title, or anxious to guard against mistake, gives a paraphrase, "the sons of David were first at the king's hand" (A. V. "chief about the king"). The LXX. and A. V. suppress the difficulty, by translating *Côhânim* into *αὐτάρχει*, and "chief officers." The Vulgate more honestly gives "sacerdotes." Luther and Coverdale follow the Hebrew strictly, and give "priests." The received explanation is, that the word is used here in what is assumed to be its earlier and wider meaning, as equivalent to rulers, or, giving it a more restricted sense, that the sons of David were *Vicarii Regis* as the sons of Aaron were *Vicarii Dei* (comp. Patrick, Michaelis, Rosenmüller, *in loc.*, Keil on 1 Chr. xviii. 17). It can hardly be said, however, that this accounts satisfactorily for the use of the same title in two successive verses in two entirely different senses. Ewald accordingly (*Alterthüm.* p. 276) sees in it an actual suspension of the usual law in favor of members of the royal house, and finds a parallel instance in the acts of David (2 Sam. vi. 14) and Solomon (1 K. iii. 15). De Wette and Gesenius,

α ἤρως, or ἠρως: τακτικός: princeps.

In like manner, look on it as a revival of the old household priesthods. These theories are in their turn unsatisfactory, as contradicting the whole spirit and policy of David's reign, which was throughout that of reverence for the Law of Jehovah, and the priestly order which it established. A conjecture midway between these two extremes is perhaps permissible. David and his sons may have been admitted, not to distinctively priestly acts, such as burning incense (Num. xvi. 40; 2 Chr. xxvi. 18), but to an honorary, titular priesthood. To wear the ephod in processions (2 Sam. vi. 14), at the time when this was the special badge of the order (1 Sam. xxii. 18), to join the priests and Levites in their songs and dances, might have been conceded, with no deviation from the Law, to the members of the royal house.<sup>a</sup> There are some indications that these functions (possibly this liturgical retirement from public life) were the lot of the members of the royal house who did not come into the line of succession, and who belonged, by descent or incorporation, to the house of Nathan as distinct from that of David (Zech. xii. 12). The very name Nathan, connected, as it is, with Nethinim, suggests the idea of dedication. [NETHINIM.] The title *Cohen* is given to Zabud, the son of Nathan (1 K. iv. 5). The genealogy of the line of Nathan in Luke iii. includes many names — Levi, Eliezer, Malchi, Jochanan, Mattathias, Heli — which appear elsewhere as belonging to the priesthood. The mention in 1 Esdr. v. 5 of Joiakim as the son of Zerubbabel, while in Neh. xii. 10 he appears as the son of Jeshua, the son of Josedek, indicates, either a strange confusion or a connection, as yet imperfectly understood, between the two families.<sup>b</sup> The same explanation applies to the parallel cases of Ira the Jairite (2 Sam. xx. 26), where the LXX. gives *ιερεὺς*. It is noticeable that this use of the title is confined to the reigns of David and Solomon, and that the synonym "at the king's hand" of 1 Chr. xviii. 17 is used in 1 Chr. xxv. 2 of the sons of Asaph as "prophesying" under their head or father, and of the relation of Asaph himself to David in the choral service of the Temple.

<sup>a</sup> The apocryphal literature of the N. T., worthless as a witness to a fact, may perhaps be received as an indication of the feeling which saw in the house and lineage of David a kind of quasi-sacerdotal character. Joseph, though of the tribe of Judah, is a priest living in the Temple (*Hist. Joseph.* c. 2, in Tischendorf, *Evang. Apoc.*). The kindred of Jesus are recognized as taking tithes of the people (*Evang. Nicod.* i. 16, *ibid*). In what approaches more nearly to history, James the Just, the brother of the Lord, is admitted (partly, it is true, as a Nazarite) into the Holy Place, and wears the linen dress of the priests (Hegesipp. ap. Euseb. *H. E.* ii. 23). The extraordinary story found in *Suidas*, s. v. *Ἱεροῦς*, represents the priests of Jerusalem as electing the "Son of Joseph" to a vacant office in the priesthood, on the ground that the two families had been so closely connected, that there was no great deviation from usage in admitting one of the lineage of David to the privileges of the sons of Aaron. Augustine was inclined to see in this intermingling of the royal and priestly lines a possible explanation of the apocryphal traditions that the Mother of the Lord was of the tribe of Levi (c. *Faust.* xxiii. 9). The marriage of Aaron himself with the sister of the prince of Judah (Ex. vi. 23), that of Jehoiada with Jehoshaphat (2 Chr. xxii. 11), and of Joseph with one who was "cousin" to a daughter of Aaron (Luke i. 36), are historical instances of this connection. The state-

*Origin.* — The idea of a priesthood connects itself, in all its forms, pure or corrupted, with the consciousness, more or less distinct, of sin. Men feel that they have broken a law. The power above them is holier than they are, and they dare not approach it. They crave for the intervention of some one of whom they can think as likely to be more acceptable than themselves. He must offer up their prayers, thanksgivings, sacrifices. He becomes their representative in "things pertaining unto God." He may become also (though this does not always follow) the representative of God to man. The functions of the priest and prophet may exist in the same person. The reverence which men pay to one who bears this consecrated character may lead them to acknowledge the priest as being also their king. The claim to fill the office may rest on characteristics belonging only to the individual man, or confined to a single family or tribe. The conditions of the priesthood, the office and influence of the priests, as they are among the most conspicuous facts of all religions of the ancient world, so do they occupy a like position in the history of the religion of Israel.

No trace of an hereditary or caste-priesthood meets us in the worship of the patriarchal age. Abraham, Isaac, and Jacob perform priestly acts, offer sacrifices, "draw near" to the Lord (Gen. xii. 8, xviii. 23, xxvi. 25, xxxiii. 20). To the eldest son, or to the favored son exalted to the place of the eldest, belongs the "goodly raiment" (Gen. xxvii. 15), the "coat of many colors" (Gen. xxxvii. 3), in which we find perhaps the earliest trace of a sacerdotal vestment<sup>d</sup> (comp. Blunt, *Scriptural Coincid.* i. 1; Ugolini, xiii. 138). Once, and once only does the word *Cohen* meet us as belonging to a ritual earlier than the time of Abraham. Melchizedek is "the priest of the most high God" (Gen. xiv. 18). The argument of the Epistle to the Hebrews has an historical foundation in the fact that there are no indications in the narrative of Gen. xiv. of any one preceding or following him in that office. The special Divine names which are connected with him as the priest of "the most

ment of Euty chius (= Sayd itn Batrik), patriarch of Alexandria (Selden, *De Success. Pont.* i. 13), that Aristobulus was a priest of the house of David, suggests a like explanation.

<sup>b</sup> Comp. the remarkable passage in Augustine, *De divers. Quæst.* lxi. : "A David enim in duas familias, regiam et sacerdotalem, origo illa distributa est, quarum duarum familiarum, sicut dictum est, regiam descendens Mattheus, sacerdotalem ascendens Lucas secutus est, ut Dominus noster Jesus Christus, rex et sacerdos noster, et cognationem duceret de stirpe sacerdotali, et non esset tamen de tribu sacerdotali." The *cognatio* he supposes to have been the marriage of Nathan with one of the daughters of Aaron.

<sup>c</sup> The true idea of the priesthood, as distinct from all other ministerial functions like those of the Levites, is nowhere given more distinctly than in Num. xvi. 5. The priest is Jehovah's, is "holy," is "chosen," "draws near" to the Lord. In all these points he represents the ideal life of the people (Ex. xix. 3-6). His highest act, that which is exclusively sacerdotal (Num. xvi. 40; 2 Chr. xxvi. 18), is to offer the incense which is the symbol of the prayers of the worshippers (Ps. cxli. 2; Rev. viii. 3).

<sup>d</sup> In this sacerdotal, dedicated character of Joseph's youth, we find the simplest explanation of the words which speak of him as "the separated one" "the Nazarite" (*Nazir*), among his brethren (Gen. xlix. 26; Deut. xxxiii. 16).

nigh God, the possessor of heaven and earth," render it probable that he rose, in the strength of those great thoughts of God, above the level of the other inhabitants of Canaan. In him Abraham recognized a faith like his own, a life more entirely consecrated, the priestly character in its perfection [comp. MELCHIZEDEK]. In the worship of the patriarchs themselves, the chief of the family, as such, acted as the priest. The office descended with the birthright, and might apparently be transferred with it. As the family expanded, the head of each section probably stood in the same relation to it. The thought of the special consecration of the first-born was recognized at the time of the Exodus (*infra*). A priesthood of a like kind continued to exist in other Semitic tribes. The Book of Job, whatever may be its date, ignores altogether the institutions of Israel, and represents the man of Uz as himself "sanctifying" his sons, and offering burnt-offerings (Job i. 5). Jethro is a "priest of Midian" (Ex. ii. 16, iii. 1), Balak himself offers a bullock and a ram upon the seven altars on Pisgah (Num. xxiii. 2, &c.).

In Egypt the Israelites came into contact with a priesthood of another kind, and that contact must have been for a time a very close one. The marriage of Joseph with the daughter of the priest of On — a priest, as we may infer from her name, of the goddess Neith — (Gen. xli. 45) [ΑΞΕΝΑΤΗ], the special favor which he showed to the priestly caste in the years of famine (Gen. xlvii. 26), the training of Moses in the palace of the Pharaohs, probably in the colleges and temples of the priests (Acts vii. 22), — all this must have impressed the constitution, the dress, the outward form of life upon the minds of the lawgiver and his contemporaries. Little as we know directly of the life of Egypt at this remote period, the stereotyped fixedness of the customs of that country warrants us in referring to a tolerably distant past the facts which belong historically to a later period, and in doing so, we find coincidences with the ritual of the Israelites too numerous to be looked on as accidental, or as the result of forces which were at work, independent of each other, but taking parallel directions. As circumcision was common to the two nations (Herod. ii. 37), so the shaving of the whole body (*ibid.*) was with both part of the symbolic purity of the priesthood, once for all with the Levites of Israel (Num. viii. 7), every third day with those of Egypt. Both are restricted to garments of linen (Herod. ii. 37, 81; Plutarch, *De Isid.* c. 4; Juven. vi. 533; Ex. xxviii. 39; Ez. xlv. 18). The sandals of hyblus worn by the Egyptian priests were but little removed from the bare feet with which the sons of Aaron went into the sanctuary (Herod. ii. 37). For both there were multiplied ablutions. Both had a public maintenance assigned, and had besides a large share in the flesh of the victims offered (Herod. l. c.). Over both there was one high-priest. In both the law of succession was hereditary (*ibid.*; comp. also Spencer, *De Leg. Hebr.* c. iii. 1, 5, 11; Wilkinson, *Ancient Egyptians*, iii. p. 116).

Facts such as these leave scarcely any room for

doubt that there was a connection of some kind between the Egyptian priesthood and that of Israel. The latter was not, indeed, an outgrowth or imitation of the former. The faith of Israel in Jehovah, the one Lord, the living God, of whom there was no form or similitude, presented the strongest possible contrast to the multitudinous idols of the polytheism of Egypt. The symbolism of the one was cosmic, "of the earth, earthy," that of the other, chiefly, if not altogether, ethical and spiritual. But looking, as we must look, at the law and ritual of the Israelites as designed for the education of a people who were in danger of sinking into such a polytheism, we may readily admit that the education must have started from some point which the subjects of it had already reached, must have employed the language of symbolic acts and rites with which they were already familiar. The same alphabet had to be used, the same root-forms employed as the elements of speech, though the thoughts which they were to be the instruments of uttering were widely different. The details of the religion of Egypt might well be used to make the protest against the religion itself at once less startling and more attractive.<sup>a</sup>

At the time of the Exodus there was as yet no priestly caste. The continuance of solemn sacrifices (Ex. v. 1, 3) implied, of course, a priesthood of some kind, and priests appear as a recognized body before the promulgation of the Law on Sinai (Ex. xix. 22). It has been supposed that these were identical with the "young men of the children of Israel" who offered burnt-offerings and peace-offerings (Ex. xxiv. 5) either as the first-born,<sup>b</sup> or as representing in the freshness of their youth the purity of acceptable worship (comp. the analogous case of "the young man the Levite" in Judg. xvii. and Ewald, *Alterthüm.* p. 273). On the principle, however, that difference of title implies in most cases difference of functions, it appears more probable that the "young men" were not those who had before performed priestly acts, but were chosen by the lawgiver to be his ministers in the solemn work of the covenant, representing, in their youth, the stage in the nation's life on which the people were then entering (Keil, *in loc.*). There are signs that the priests of the older ritual were already dealt with as belonging to an obsolescent system. Though they were known as those that "come near" to the Lord (Ex. xix. 22), yet they are not permitted to approach the Divine Presence on Sinai. They cannot "sanctify" themselves enough to endure that trial. Aaron alone, the future high-priest, but as yet not known as such, enters with Moses into the thick darkness. It is noticeable also that at this transition-stage, when the old order was passing away, and the new was not yet established, there is the proclamation of the truth, wider and higher than both, that the whole people was to be "a kingdom of priests" (Ex. xix. 6). The idea of the life of the nation was, that it was to be as a priest and a prophet to the rest of mankind. They were called to a universal priesthood (comp. Keil, *in loc.*). As a people, however,

<sup>a</sup> For a temperate discussion of the connection between the *cultus* of Israel and that of Egypt, on views opposed to Spencer, see Bähr's *Symbolik* (Einleit. § 4, II. c. 1, § 3); and Fairbairn's *Typology of Scripture* (b. iii. c. 3, § 3).

<sup>b</sup> The Targums both of Babylon and Jerusalem give "first-born" as an equivalent (Saubert, *De Sacerd.*

*Hebr.* in Ugolini, *Thes.* xii. 2; comp. also xiii. 135). Jewish interpreters (Saadiah, Rashi, Aben-Ezra) take the same view; and the Talmud (*Sevach.* xiv. 4) expressly asserts the priesthood of the first-born in the pre-Mosaic times. It has, however, been denied by Vitringa and others. (Comp. Bähr's *Symbolik*, II. 4; Selden, *De Synedr.* i. 16, *De Success. Pont.* c. 1.)

they needed a long discipline before they could make the idea a reality. They drew back from their high vocation (Ex. xx. 18-21). As for other reasons so also for this, that the central truth required a rigid, unbending form for its outward expression, a distinctive priesthood was to be to the nation what the nation was to mankind. The position given to the ordinances of the priesthood indicated with sufficient clearness, that it was subordinate, not primary, a means and not an end. Not in the first proclamation of the great laws of duty in the Decalogue (Ex. xx. 1-17), nor in the applications of those laws to the chief contingencies of the people's life in the wilderness, does it find a place. It appears together with the Ark and the Tabernacle, as taking its position in the education by which the people were to be led toward the mark of their high calling. As such we have to consider it.

**Consecration.** — The functions of the HIGH-PRIEST, the position and history of the LEVITES as the consecrated tribe, have been discussed fully under those heads. It remains to notice the characteristic facts connected with "the priests, the sons of Aaron," as standing between the two. Solemn as was the subsequent dedication of the LEVITES, that of the priests involved a yet higher consecration. A special word (כַּלֵּשׁ, *kálash*) was appropriated to it. Their old garments were laid aside. Their bodies were washed with clean water (Ex. xxix. 4; Lev. viii. 6) and anointed with the perfumed oil, prepared after a prescribed formula, and to be used for no lower purpose<sup>a</sup> (Ex. xxix. 7, xxx. 22-33). The new garments belonging to their office were then put on them (*infra*). The truth that those who intercede for others must themselves have been reconciled, was indicated by the sacrifice of a bullock as a sin-offering, on which they solemnly laid their hands, as transferring to it the guilt which had attached to them (Ex. xxix. 10; Lev. viii. 18). The total surrender of their lives was represented by the ram slain as a burnt-offering, a "sweet savour" to Jehovah (Ex. xxix. 18; Lev. viii. 21). The blood of these two was sprinkled on the altar, offered to the Lord. The blood of a third victim, the ram of consecration, was used for another purpose. With it Moses sprinkled the right ear that was to be open to the Divine voice, the right hand and the right foot that were to be active in divine ministrations (Ex. xxix. 20; Lev. viii. 23, 4). Lastly, as they were to be the exponents, not only of the nation's sense of guilt, but of its praise and thanksgiving, Moses was to "fill their hands"<sup>b</sup> with cakes of unleavened bread and portions of the sacrifices, which they were to present before the Lord as a wave-offering. The whole of this mysterious ritual was to be repeated for seven days, during which they remained within the Tabernacle, separated from the people, and not till then was the consecration perfect (comp. on the meaning of all these acts Bähr, *Symbolik*, ii. c. v. § 2).

<sup>a</sup> The sons of Aaron, it may be noticed, were simply sprinkled with the precious oil (Lev. viii. 30). Over Aaron himself it was poured till it went down to the skirts of his clothing (*Ibid.* 12; Ps. cxxxiii. 2).

<sup>b</sup> This appears to have been regarded as the essential part of the consecration; and the Hebrew, "to fill the hand," is accordingly used as a synonym for "to consecrate" (Ex. xxix. 9; 2 Chr. xiii. 9).

<sup>c</sup> Ewald (*Alterthüm.* p. 289-291) writes as if the ceremonies of consecration were repeated on the ad-

Moses himself, as the representative of the Unseen King, is the consecrator, the sacrificer throughout these ceremonies; as the channel through which the others receive their office, he has for the time a higher priesthood than that of Aaron (Selden, *De Synedr.* i. 16; Ugolini, xii. 3). In accordance with the principle which runs through the history of Israel, he, the ruler, solemnly divests himself of the priestly office and transfers it to another. The fact that he had been a priest, was merged in his work as a lawgiver. Only once in the language of a later period was the word *Côhên* applied to him (Ps. xcix. 6).

The consecrated character thus imparted did not need renewing. It was a perpetual inheritance transmitted from father to son through all the centuries that followed. We do not read of its being renewed in the case of any individual priest of the sons of Aaron.<sup>c</sup> Only when the line of succession was broken, and the impiety of Jeroboam intruded the lowest of the people into the sacred office, do we find the reappearance of a like form (2 Chr. xiii. 9) of the same technical word. The previous history of Jeroboam and the character of the worship which he introduced make it probable that, in that case also, the ceremonial was, to some extent, Egyptian in its origin.

High-priest.

**Dress.** — The "sons of Aaron" thus dedicated were to wear during their ministrations a special apparel — at other times apparently they wore the common dress of the people. The material was linen, but that word included probably, as in the case of the Egyptian priests, the byssus, and the cotton stuffs of that country (Ex. xxviii. 42; comp. *COTTON*).<sup>d</sup>

mission of every priest to the performance of his functions; but this is on the assumption, apparently, that Ex. xxix. and Lev. viii. are not historical, but embody the customs of a later period. Bähr (*Symbolik*, l. c.) leaves it as an open question, and treats it as of no moment.

<sup>d</sup> The reason for fixing on this material is given in Ex. xlii. 18; but the feeling that there was something unclean in clothes made from the skin or wool of an animal was common to other nations. Egypt has been

Linen drawers ["breeches," A. V.] from the loins to the thighs were "to cover their nakedness." The *verecundia* of the Hebrew ritual in this and in other places (Ex. xx. 26, xxviii. 42) was probably a protest against some of the fouler forms of nature-

worship, as e. g. in the worship of Peor (Maimonides, *More Nevochin*, iii. 45, in Ugolini, xiii. p. 385), and possibly also, in some Egyptian rites (Herod. ii. 60). Over the drawers was worn the *cetoneth*, or close-fitting cassock, also of fine linen,

Dress of Egyptian Priests. (Wilkinson.)

white, but with a diamond or chess-board pattern on it (Bähr, *Symb.* ii. c. iii. § 2). This came nearly to the feet (*ποδήρης χιτῶν*, Joseph. *Ant.* iii. 7, § 1), and was to be woven in its garment-shape (not cut out and then sewed together), like the *χιτῶν ἄβραφος* of John xix. 23, in which some interpreters have even seen a token of the priesthood of him who wore it (Ewald, *Gesch.* v. 177; Ugolini, xiii. p. 218).<sup>a</sup> The white cassock was gathered round the body with a girdle of needle-work, into which, as in the more gorgeous belt of the high-priest, blue, purple, and scarlet were intermingled with white, and worked in the form of flowers (Ex. xxviii. 39, 40, xxxix. 2; Ez. xliv. 17-19). Upon their heads they were to wear caps or bonnets (in the English of the A. V. the two words are synonymous) in the form of a cup-shaped flower, also of fine linen. These garments they might wear at any time in the Temple, whether on duty or not, but they were not to sleep in them (Joseph. *B. J.* v. 5, § 7). When they became soiled, they were not washed or used again, but torn up to make wicks for the lamps in the Tabernacle (Selden, *De Synedr.* xiii. 11). They had besides them other "clothes of service," which were probably simpler, but are not described (Ex. xxxi. 10; Ez. xlii. 14). In all their acts of ministration they were to be barefooted.<sup>b</sup> Then, as now, this was the strongest recognition of the sanctity of a holy place which

the Oriental mind could think of (Ex. iii. 5; Josh. v. 15), and throughout the whole existence of the Temple service, even though it drew upon them the scorn of the heathen (Juven. *Sat.* vi. 159), and

Dress of Egyptian High-priests.

seriously affected the health of the priests (Ugolini, vii. p. 976, xiii. p. 405), it was scrupulously adhered to.<sup>c</sup> In the earlier liturgical costume, the

already mentioned. The Arab priests in the time of Mohammed wore linen only (Ewald, *Alterth.* p. 289).

<sup>a</sup> Here also modern Eastern customs present an analogy in the woven, seamless *inram* worn by the Mecca pilgrims (Ewald, *Alterth.* p. 289).

<sup>b</sup> This is inferred (1) from the absence of any direc-

tion as to a covering for the feet; (2) from the later custom; (3) from the universal feeling of the East. Shoes were worn as a protection against defilement. In a sanctuary there was nothing that could defile.

<sup>c</sup> Bähr (*Symbolik*, ii. c. iii. § 1, 2) finds a mystic meaning in the number, material, color, shape, of the

phod is mentioned as belonging to the high-priest only (Ex. xxviii. 6-12, xxxix. 2-5). At a later period it is used apparently by all the priests (1 Sam. xxii. 18), and even by others, not of the tribe of Levi, engaged in religious ceremonial (2 Sam. vi. 14). [ΕΠΙΘΟΔ.]

*Regulations.*—The idea of a consecrated life, which was thus asserted at the outset, was carried through a multitude of details. Each probably had a symbolic meaning of its own. Collectively they formed an education by which the power of distinguishing between things holy and profane, between the clean and the unclean, and so ultimately between moral good and evil, was awakened and developed (Ez. xlv. 23). Before they entered the Tabernacle they were to wash their hands and their feet (Ex. xxx. 17-21, xl. 30-32). During the time of their ministrations they were to drink no wine or strong drink (Lev. x. 9; Ez. xlv. 21). Their function was to be more to them than the ties of friendship or of blood, and, except in the case of the nearest relationships (six degrees are specified, Lev. xxi. 1-5; Ez. xlv. 25), they were to make no mourning for the dead. The high-priest, as carrying the consecrated life to its highest point, was to be above the disturbing power of human sorrow even in these instances. Customs which appear to have been common in other priesthoods were (probably for that reason) forbidden them. They were not to shave their heads. They were to go through their ministrations with the serenity of a reverential awe, not with the orgiastic wildness which led the priests of Baal in their despair to make cuttings in their flesh (Lev. xix. 28; 1 K. xviii. 28), and carried those of whom Atys was a type to a more terrible mutilation (Deut. xxiii. 1). The same thought found expression in two other forms affecting the priests of Israel. The priest was to be one who, as the representative of other men, was to be physically as well as liturgically perfect.<sup>a</sup> As the victim was to be without blemish so also was the sacrificer (comp. Bähr, *Symbol.* ii. c. ii. § 3). The law specified in broad outlines the excluding defects (Lev. xxi. 17-21), and these were such as impaired the purity, or at least the dignity, of the ministrant. The morbid casuistry of the later rabbis drew up a list of not less than 142 faults or infirmities which involved permanent, of 22 which involved temporary deprivation from the priestly office (Carpzov. *App. Critic.* pp. 92, 93; Ugolini, xii. 54, xiii. 903); and the original symbolism of the principle (Philo, *De Vict.* and *De Monarch.* ii. 5) was lost in the prurient minuteness which, here as elsewhere, often makes the study of rabbinic literature a somewhat repulsive task. If the Christian Church has sometimes seemed to approximate, in the conditions it laid down for the priestly character, to the rules of Judaism, it was yet careful to reject the Jewish principles, and to rest its regulations simply on the grounds of expediency (*Const. Apost.* 77, 78). The marriages of the sons of Aaron were, in like manner, hedged round with special rules. There is, indeed, no evidence for what has sometimes been asserted, that either the high-priest (Philo, *De Monarch.* ii. 11, ii. 229, ed. Mang.; Ewald, *Altorth.* p. 302) or the other sons of Aaron (Ugolini, xii. 52)

priestly vestments, discusses each point elaborately, and dwells in § 3 on the differences between them and those of the Egyptian priesthood.

<sup>a</sup> The idea of the perfect body, as symbolizing the

were limited in their choice to the women of their own tribe, and we have some distinct instances to the contrary. It is probable, however, that the priestly families frequently intermarried, and it is certain that they were forbidden to marry an unchaste woman, or one who had been divorced, or the widow of any but a priest (Lev. xxi. 7, 14; Ez. xlv. 22). The prohibition of marriage with one of an alien race was assumed, though not enacted in the law; and hence the reforming zeal of a later time compelled all who had contracted such marriages to put away their strange wives (Ez. x. 18) and counted the offspring of a priest and a woman taken captive in war as illegitimate (Joseph. *Ant.* iii. 10, xi. 4; c. *Apion.* i. 7), even though the priest himself did not thereby lose his function (Ugolini, xii. 924). The high-priest was to carry the same idea to a yet higher point, and was to marry none but a virgin in the first freshness of her youth (Lev. xxi. 13). Later casuistry fixed the age within the narrow limits of twelve and twelve and a half (Carpzov. *App. Crit.* p. 88). It followed as a matter of necessity from these regulations, that the legitimacy of every priest depended on his genealogy. A single missing or faulty link would vitiate the whole succession. To those genealogies, accordingly, extending back unbroken for 2000 years, the priests could point, up to the time of the destruction of the Temple (Joseph. c. *Apion.* i. 7). In later times, wherever the priest might live — Egypt, Babylon, Greece — he was to send the register of all marriages in his family to Jerusalem (*ibid.*). They could be referred to in any doubtful or disputed case (Ez. ii. 62; Neh. vii. 64). In them was registered the name of every mother as well as of every father (*ibid.*; comp. also the story already referred to in Suidas, s. v. Ἰησοῦς). It was the distinguishing mark of a priest, not of the Aaronic line, that he was ἀπάτωρ, ἀμήτωρ, ἀγενεαλόγητος (Heb. vii. 3), with no father or mother named as the ground of his title.

The age at which the sons of Aaron might enter upon their duties was not defined by the Law, as that of the Levites was. Their office did not call for the same degree of physical strength; and if twenty-five in the ritual of the Tabernacle (Num. viii. 24) and twenty in that of the Temple (1 Chr. xxiii. 27) was the appointed age for the latter, the former were not likely to be kept waiting till a later period. In one remarkable instance, indeed, we have an example of a yet earlier age. The boy Aristobulus at the age of seventeen ministered in the Temple in his pontifical robes, the admired of all observers, and thus stirred the treacherous jealousy of Herod to remove so dangerous a rival (Joseph. *Ant.* xv. 3, § 3). This may have been exceptional, but the language of the rabbis indicates that the special consecration of the priest's life began with the opening years of manhood. As soon as the down appeared on his cheek the young candidate presented himself before the Council of the Sanhedrim, and his genealogy was carefully inspected. If it failed to satisfy his judges, he left the Temple clad in black, and had to seek another calling; if all was right so far, another ordeal awaited him. A careful inspection was to determine whether he was subject to any one of the 144

holy soul, was, as might be expected, wide-spread among the religions of heathenism. "Sacerdos non integri corporis quasi mali omnium res vitanda est (Seneca, *Controv.* iv. 2).

fects which would invalidate his priestly acts. If he was found free from all blemish, he was clad in the white linen tunic of the priests, and entered on his ministrations. If the result of the examination was not satisfactory, he was relegated to the half-menial office of separating the sound wood for the altar from that which was decayed and worm-eaten, but was not deprived of the emoluments of his office (Lightfoot, *Temple Service*, c. 6).

*Functions.* — The work of the priesthood of Israel was, from its very nature, more stereotyped by the Mosaic institutions than any other element of the national life. The functions of the Levites — less defined, and therefore more capable of expansion — altered, as has been shown [LEVITES], from age to age; but those of the priests continued throughout substantially the same, whatever changes might be brought about in their social position and organization. The duties described in Exodus and Leviticus are the same as those recognized in the Books of Chronicles, as those which the prophet-priest Ezekiel sees in his vision of the Temple of the future. They, assisting the high-priest, were to watch over the fire on the altar of burnt-offerings and to keep it burning evermore both by day and night (Lev. vi. 12; 2 Chr. xiii. 11), to feed the golden lamp outside the veil with oil (Ex. xxvii. 20, 21; Lev. xxiv. 2), to offer the morning and evening sacrifices, each accompanied with a meat-offering and a drink-offering, at the door of the Tabernacle (Ex. xxix. 38-44). These were the fixed, invariable duties; but their chief function was that of being always at hand to do the priest's office for any guilty, or penitent, or rejoicing Israelite. The worshipper might come at any time. If he were rich and brought a bullock, it was the priest's duty to slay the victim, to place the wood upon the altar, to light the fire, to sprinkle the altar with the blood (Lev. i. 5). If he were poor and brought a pigeon, the priest was to wring its neck (Lev. i. 15). In either case he was to burn the meat-offering and the peace-offering which accompanied the sacrifice (Lev. ii. 2, 9, iii. 11). After the birth of every child, the mother was to come with her sacrifice of turtle-doves or pigeons (Lev. xii. 6; Luke ii. 22-24), and was thus to be purified from her uncleanness. A husband who suspected his wife of unfaithfulness might bring her to the priest, and it belonged to him to give her the water of jealousy as an ordeal, and to pronounce the formula of execration (Num. v. 11-31). Lepers were to come, day by day, to submit themselves to the priest's inspection, that he might judge whether they were clean or unclean, and when they were healed perform for them the ritual of purification (Lev. xiii., xiv., and comp. Mark i. 44). All the numerous accidents which the Law looked on as defilements or sins of ignorance had to be expiated by a sacrifice, which the priest, of course, had to offer (Lev. xv. 1-33). As they thus acted as mediators for those who were laboring under the sense of guilt, so they were to help others who were striving to attain, if only for a season, the higher standard of a consecrated life. The Nazarite was to come

to them with his sacrifice and his wave-offering (Num. vi. 1-21).

Other duties of a higher and more ethical character were hinted at, but were not, and probably could not be, the subject of a special regulation. They were to teach the children of Israel the statutes of the Lord (Lev. x. 11; Deut. xxxiii. 10; Chr. xv. 3; Ezek. xlii. 23, 24). The "priest's lips" (in the language of the last prophet looking back upon the ideal of the order) were to "keep knowledge" (Mal. ii. 7). Through the whole history, with the exception of the periods of national apostasy, these acts, and others like them, formed the daily life of the priests who were on duty. The three great festivals of the year were, however, their seasons of busiest employment. The pilgrims who came up by tens of thousands to keep the feast, came each with his sacrifices and oblations. The work at such times was, on some occasions at least, beyond the strength of the priests in attendance, and the Levites had to be called in to help them (2 Chr. xxix. 34, xxxv. 14). Other acts of the priests of Israel, significant as they were, were less distinctively sacerdotal. They were to bless the people at every solemn meeting; and that this part of their office might never fall into disuse, a special formula of benediction was provided (Num. vi. 22-27). During the journeys in the wilderness it belonged to them to cover the ark and all the vessels of the sanctuary with a purple or scarlet cloth before the Levites might approach them (Num. iv. 5-15). As the people started on each day's march they were to blow "an alarm" with long silver trumpets (Num. x. 1-8), — with two if the whole multitude were to be assembled, with one if there was to be a special council of the elders and princes of Israel. With the same instruments they were to proclaim the commencement of all the solemn days, and days of gladness (Num. x. 10); and throughout all the changes in the religious history of Israel this adhered to them as a characteristic mark. Other instruments of music might be used by the more highly trained Levites and the schools of the Prophets, but the trumpets belonged only to the priests. They blew them in the solemn march round Jericho<sup>a</sup> (Josh. vi. 4), in the religious war which Judah waged against Jeroboam (2 Chr. xiii. 12), when they summoned the people to a solemn penitential fast (Joel ii. 1, 15). In the service of the second temple there were never to be less than 21 or more than 84 blowers of trumpets present in the Temple daily (Ugolini, xiii. 1011). The presence of the priests on the field of battle for this purpose, often in large numbers, armed for war, and sharing in the actual contest (1 Chr. xii. 23, 27; 2 Chr. xx. 21, 22), led, in the later periods of Jewish history, to the special appointment at such times of a war-priest, deputed by the Sanhedrim to be the representative of the high-priest, and standing next but one to him in the order of precedence (comp. Ugolini, xii. 1031, *De Sacerdote Castrensis*, and xiii. 871).<sup>b</sup>

Other functions were hinted at in Deuteronomy which might have given them greater influence as the educators and civilizers of the people. They

<sup>a</sup> In this case, however, the trumpets were of rams' horns, not of silver.

<sup>b</sup> Jost (*Judenth.* i. 153) regards the war-priest as belonging to the ideal system of the later Rabbin, not to the historical constitution of Israel. Deut. xx. 9

however, supplies the germ out of which such an office might naturally grow. Judas Maccabeus, in his wars, does what the war-priest was said to do (1 Macc. iii. 56).

were to act (whether individually or collectively does not distinctly appear) as a court of appeal in the more difficult controversies in criminal or civil cases (Deut. xvii. 8-13). A special reference was to be made to them in cases of undetected murder, and they were thus to check the vindictive blood-feuds which it would otherwise have been likely to occasion (Deut. xxi. 5). It must remain doubtful, however, how far this order kept its ground during the storms and changes that followed. The judicial and the teaching functions of the priesthood remained probably for the most part in abeyance through the ignorance and vices of the priests. Zealous reformers kept this before them as an ideal (2 Chr. xvii. 7-9, xix. 8-10; Ez. xlv. 24), but the special stress laid on the attempts to realize it shows that they were exceptional.<sup>a</sup>

*Maintenance.*—Functions such as these were clearly incompatible with the common activities of men. At first the small number of the priests must have made the work almost unintermittent, and even when the system of rotation had been adopted, the periodical absences from home could not fail to be disturbing and injurious, had they been dependent on their own labors. The serenity of the priestly character would have been disturbed had they had to look for support to the lower industries. It may have been intended (*supra*) that their time, when not liturgically employed, should be given to the study of the Law, or to instructing others in it. On these grounds therefore a distinct provision was made for them. This consisted<sup>b</sup>—(1) of one tenth of the tithes which the people paid to the Levites, one per cent. *i. e.* on the whole produce of the country (Num. xviii. 26-28). (2) Of a special tithe every third year (Deut. xiv. 28, xxvi. 12). (3) Of the redemption-money, paid at the fixed rate of five shekels a head, for the first-born of man or beast (Num. xviii. 14-19).<sup>c</sup> (4) Of the redemption-money paid in like manner for men or things specially dedicated to the Lord (Lev. xxvii.). (5) Of spoil, captives, cattle, and the like, taken in war (Num. xxxi. 25-47). (6) Of what may be described as the perquisites of their sacrificial functions, the shew-bread, the flesh of the burnt-offerings, peace-offerings, trespass-offerings (Num. xviii. 8-14; Lev. vi. 26, 29, vii. 6-10), and, in particular, the heave-shoulder and the wave-breast (Lev. x. 12-15). (7) Of an undefined amount of the first-fruits of corn, wine, and oil (Ex. xxiii. 19; Lev. ii. 14; Deut. xxvi. 1-10). Of some of these, as "most holy," none but the priests were to partake (Lev. vi. 29). It was lawful for their sons and daughters (Lev. x. 14), and even in some cases for their one-born slaves, to eat of others (Lev. xxii. 11). The stranger and the hired servant were in all cases excluded (Lev. xxii. 10). (8) On their settlement in Canaan the priestly families had thirteen cities assigned them, with "suburbs" or pasture-grounds for their flocks (Josh. xxi. 13-19). While the Levites were scattered over all the conquered country, the cities of the priests were within the tribes of Judah, Simeon, and Benjamin, and this concentra-

<sup>a</sup> The teaching functions of the priest have probably been unduly magnified by writers like Michaelis, who aim at bringing the institutions of Israel to the standard of modern expediency (*Comm. on Laws of Moses*, i. 35-52), as they have been unduly depreciated by Saalschütz and Jahn

<sup>b</sup> The later Rabbis enumerate no less than twenty-

tion was not without its influence on their subsequent history. [Comp. LEVITES.] These provisions were obviously intended to secure the religion of Israel against the dangers of a caste of pauper priests, needy and dependent, and unable to bear their witness to the true faith. They were, on the other hand, as far as possible removed from the condition of a wealthy order. Even in the ideal state contemplated by the Book of Deuteronomy, the Levite (here probably used generically, so as to include the priests) is repeatedly marked out as an object of charity, along with the stranger and the widow (Deut. xii. 12, 19, xiv. 27-29). During the long periods of national apostasy, tithes were probably paid with even less regularity than they were in the more orthodox period that followed the return from the Captivity (Neh. xiii. 10; Mal. iii. 8-10). The standard of a priest's income, even in the earliest days after the settlement in Canaan, was miserably low (Judg. xvii. 10). Large portions of the priesthood fell, under the kingdom, into a state of abject poverty (comp. 1 Sam. ii. 36). The clinging evil throughout their history was not that they were too powerful and rich, but that they sank into the state from which the Law was intended to preserve them, and so came to "teach for hire" (Mic. iii. 11; comp. Saalschütz, *Archäologie der Hebräer*, ii. 344-355).

*Classification and Statistics.*—The earliest historical trace of any division of the priesthood, and corresponding cycle of services, belongs to the time of David. Jewish tradition indeed recognizes an earlier division, even during the life of Aaron, into eight houses (Gem. Hieros. *Taanith*, in Ugolini, xiii. 873), augmented during the period of the Shiloh-worship to sixteen, the two families of Eleazar and Ithamar standing in both cases on an equality. It is hardly conceivable, however, that there could have been any rotation of service while the number of priests was so small as it must have been during the forty years of sojourn in the wilderness, if we believe Aaron and his lineal descendants to have been the only priests officiating. The difficulty of realizing in what way the single family of Aaron were able to sustain all the burden of the worship of the Tabernacle and the sacrifices of individual Israelites, may, it is true, suggest the thought that possibly in this, as in other instances, the Hebrew idea of sonship by adoption may have extended the title of the "Sons of Aaron" beyond the limits of lineal descent, and, in this case, there may be some foundation for the Jewish tradition. Nowhere in the later history do we find any disproportion like that of three priests to 22,000 Levites. The office of supervision over those that "kept the charge of the sanctuary," entrusted to Eleazar (Num. iii. 32), implies that some others were subject to it besides Ithamar and his children, while these very keepers of the sanctuary are identified in ver. 38 with the sons of Aaron who are encamped with Moses and Aaron on the east side of the Tabernacle. The allotment of not less than thirteen cities to those

four sources of emolument. Of these the chief only are given here (Ugolini, xiii. 1124).

<sup>c</sup> It is to be noticed that the Law, by recognizing the substitution of the Levites for the first-born, and ordering payment only for the small number of the latter in excess of the former, deprived Aaron and his sons of a large sum which would otherwise have accrued to them (Num. lii. 44-51).

who bore the name, within little more than forty years from the Exodus, tends to the same conclusion, and at any rate indicates that the priesthood were not intended to be always in attendance at the Tabernacle, but were to have homes of their own, and therefore, as a necessary consequence, fixed periods only of service. Some notion may be formed of the number on the accession of David from the facts (1) that not less than 3700 tendered their allegiance to him while he was as yet reigning at Hebron over Judah only (1 Chr. xii. 27), and (2) that one-twenty fourth part were sufficient for all the services of the statelier and more frequented worship which he established. To this reign belonged accordingly the division of the priesthood into the four-and-twenty "courses" or orders (פְּחֻלֵי קֹהֵן, διαίρεσεις, ἐφημερίαι, 1 Chr. xxiv. 1-19; 2 Chr. xxiii. 8; Luke i. 5), each of which was to serve in rotation for one week, while the further assignment of special services during the week was determined by lot (Luke i. 9). Each course appears to have commenced its work on the Sabbath, the outgoing priests taking the morning sacrifice, and leaving that of the evening to their successors (2 Chr. xxiii. 8; Ugolini, xiii. 319). In this division, however, the two great priestly houses did not stand on an equality. The descendants of Ithamar were found to have fewer representatives than those of Eleazar,<sup>a</sup> and sixteen courses accordingly were assigned to the latter, eight only to the former (1 Chr. xxiv. 4; comp. Carpzov. *App. Crit.* p. 98). The division thus instituted was confirmed by Solomon, and continued to be recognized as the typical number of the priesthood. It is to be noted, however, that this arrangement was to some extent elastic. Any priest might be present at any time, and even perform priestly acts, so long as he did not interfere with the functions of those who were officiating in their course (Ugolini, xiii. 881), and at the great solemnities of the year, as well as on special occasions like the opening of the Temple, they were present in great numbers. On the return from the Captivity there were found but four courses out of the twenty-four, each containing, in round numbers, about a thousand<sup>b</sup> (Ezr. ii. 36-39). Out of these, however, to revive, at least, the idea of the old organization, the four-and-twenty courses were reconstituted, bearing the same names as before, and so continued till the destruction of Jerusalem. If we may accept the numbers given by Jewish writers as at all trustworthy, the proportion of the priesthood to the population of Palestine during the last century of their existence as an order must have been far greater than that of the clergy has ever been in any Christian nation. Over and above those that were scattered in the country and took their turn, there were not fewer than 24,000 stationed permanently at Jerusalem, and 12,000 at Jericho (Genar. Hieros. *Tavmih*, fol. 67, in Carpzov. *App. Crit.* p. 100). It was a Jewish tradition that it had never fallen to the lot of any priest to offer incense twice (Ugolini, xii. 18). Oriental statistics are, however, always open to some suspicion, those of the Talmud not least so; and there is, probably, more

truth in the computation of Josephus, who estimates the total number of the four houses of the priesthood, referring apparently to Ezr. ii. 36, at about 20,000 (c. *Apion*. ii. 7). Another indication of number is found in the fact that a "great multitude" could attach themselves to the "sect of the Nazarenes" (Acts vi. 7), and so have cut themselves off, sooner or later, from the Temple services, without any perceptible effect upon its ritual. It was almost inevitable that the great mass of the order, under such circumstances, should sink in character and reputation. Poor and ignorant, despised and oppressed by the more powerful members of their own body, often robbed of their scanty maintenance by the rapacity of the high-priests, they must have been to Palestine what the clergy of a later period have been to Southern Italy, a dead weight on its industry and strength, not compensating for their unproductive lives by any services rendered to the higher interests of the people. The Rabbinic classification of the priesthood, though belonging to a somewhat later date, reflects the contempt into which the order had fallen. There were — (1) the heads of the twenty-four courses, known sometimes as ἀρχιερείς; (2) the large number of reputable officiating but inferior priests; (3) the plebeii, or (to use the extreme formula of Rabbinic scorn) the "priests of the people of the earth," ignorant and unlettered; (4) those that, through physical disqualifications or other causes, were non-efficient members of the order, though entitled to receive their stipend (Ugolini, xii. 18; Jost, *Jud.-antiquum*, i. 156).

*History.* — The new priesthood did not establish itself without a struggle. The rebellion of Korah, at the head of a portion of the Levites as representatives of the first-born, with Dathan and Abiram as leaders of the tribe of the first-born son of Jacob (Num. xvi. 1), showed that some looked back to the old patriarchal order rather than forward to the new, and it needed the witness of "Aaron's rod that budded" to teach the people that the latter had in it a vitality and strength which had departed from the former. It may be that the exclusion of all but the sons of Aaron from the service of the Tabernacle drove those who would not resign their claim to priestly functions of some kind to the worship (possibly with a rival tabernacle) of Moloch and Chian (Am. v. 25, 26; Ez. xx. 16). Prominent as was the part taken by the priests in the daily march of the host of Israel (Num. x. 8), in the passage of the Jordan (Josh. iii. 14, 15), in the destruction of Jericho (Josh. vi. 12-16), the history of Micah shows that within that century there was a strong tendency to relapse into the system of a household instead of an hereditary priesthood (Judg. xvii.). The frequent invasions and conquests during the period of the Judges must have interfered (as stated above) with the payment of tithes, with the maintenance of worship, with the observance of all festivals, and with this the influence of the priesthood must have been kept in the background. If the descendants of Aaron, at some unrecorded crisis in the history of Israel, rose, under Eli, into the position of national defenders, it was only to sink in his

<sup>a</sup> This diminution may have been caused partly by the slaughter of the priests who accompanied Hophni and Phinehas (Ps. lxxviii. 34), partly by the massacre at Nob

<sup>b</sup> The causes of this great reduction are not stated, but large numbers must have perished in the siege and storm of Jerusalem (Lam. iv. 18), and many may have preferred remaining in Babylon.

sons into the lowest depth of sacerdotal corruption. For a time the prerogative of the line of Aaron was in abeyance. The capture of the Ark, the removal of the Tabernacle from Shiloh, threw everything into confusion, and Samuel, a Levite, but not within the priestly family [SAMUEL], sacrifices, and "comes near" to the Lord: his training under Eli, his Nazarite life,<sup>a</sup> his prophetic office, being regarded apparently as a special consecration (comp. August. c. *Faust.* xii. 33; *De Civ. Dei.* xvii. 4). For the priesthood, as for the people generally, the time of Samuel must have been one of a great moral reformation, while the expansion, if not the foundation, of the Schools of the Prophets, at once gave to it the support of an independent order, and acted as a check on its corruptions and excesses, a perpetual safeguard against the development from it of any Egyptian or Brahminic caste-system (Ewald, *Gesch. Isr.* ii. 185), standing to it in much the same relation as the monastic and mendicant orders stood, each in its turn, to the secular clergy of the Christian Church. Though Shiloh had become a deserted sanctuary, Nob (1 Sam. xxi. 1) was made for a time the centre of national worship, and the symbolic ritual of Israel was thus kept from being forgotten. The reverence which the people feel for them, and which compels Saul to have recourse to one of alien blood (Doeg the *Edomite*) to carry his murderous counsel into act, shows that there must have been a great step upwards since the time when the sons of Eli "made men to abhor the offerings of the Lord" (1 Sam. xxii. 17, 18). The reign of Saul was, however, a time of suffering for them. He had manifested a disposition to usurp the priest's office (1 Sam. xiii. 9). The massacre of the priests at Nob showed how insecure their lives were against any unguarded or savage impulse.<sup>b</sup> They could but wait in silence for the coming of a deliverer in David. One at least among them shared his exile, and, so far as it was possible, lived in his priestly character, performing priestly acts, among the wild company of Adullam (1 Sam. xxiii. 6, 9). Others probably were sheltered by their remoteness, or found shelter in Hebron as the largest and strongest of the priestly cities. When the death of Saul set them free they came in large numbers to the camp of David, prepared apparently not only to testify their allegiance, but also to support him, armed for battle, against all rivals (1 Chr. xii. 27). They were summoned from their cities to the great restoration of the worship of Israel, when the Ark was brought up to the new capital of the kingdom (1 Chr. xv. 4). For a time, however (another proof

<sup>a</sup> Another remarkable instance of the connection between the Nazarite vow, when extended over the whole life, and a liturgical, quasi-priestly character, is found in the history of the Rechabites. They, or others like them, are named by Amos (ii. 11) as having a vocation like that of the prophets. They are received by Jeremiah into the house of the Lord, into the chamber of a prophet-priest (Jer. xxxv. 4). The solemn blessing which the prophet pronounces (xxxv. 19) goes beyond the mere perpetuation of the name.

The term he uses, "to stand before me" (עָמַד לְפָנַי), is one of special significance. It is used emphatically of ministerial functions, like those of the prophet (1 K. xvii. 1, xviii. 15; Jer. xv. 19), or the priest (Deut. x. 8, xviii. 5-7; Judg. xx. 28). The

of the strange confusion into which the religious life of the people had fallen), the Ark was not the chief centre of worship; and while the newer ritual of psalms and minstrelsy gathered round it under the ministrations of the Levites, headed by Benaiah and Jahaziel as priests (1 Chr. vi. 5, 6), the older order of sacrifices was carried on by the priests in the Tabernacle on the high place at Gibeon (1 Chr. xvi. 37-39, xxi. 29; 2 Chr. i. 3). We cannot wonder that first David and then Solomon should have sought to guard against the evils incidental to this separation of the two orders, and to unite in one great Temple priests and Levites, the symbolic worship of sacrifice and the spiritual offering of praise.

The reigns of these two kings were naturally the culminating period of the glory of the Jewish priesthood. They had a king whose heart was with them, and who joined in their services dressed as they were (1 Chr. xv. 27), while he yet scrupulously abstained from all interference with their functions. The name which they bore was accepted (whatever explanation may be given of the fact) as the highest title of honor that could be borne by the king's sons (2 Sam. viii. 18, *supra*). They occupied high places in the king's council (1 K. iv. 2, 4), and might even take their places, as in the case of Benaiah, at the head of his armies (1 Chr. xii. 27, xxvii. 5), or be recognized, as Zabud the son of Nathan was, as the "king's friends," the keepers of the king's conscience (1 K. iv. 5; Ewald, *Gesch.* iii. 334).

The position of the priests under the monarchy of Judah deserves a closer examination than it has yet received. The system which has been described above gave them for every week of service in the Temple twenty-three weeks in which they had no appointed work. Was it intended that they should be idle during this period? Were they actually idle? They had no territorial possessions to cultivate. The cities assigned to them and to the Levites gave but scanty pasturage to their flocks. To what employment could they turn? (1.) The more devout and thoughtful found, probably, in the schools of the prophets that which satisfied them. The history of the Jews presents numerous instances of the union of the two offices. [Comp. LEVITES.] They became teaching-priests (2 Chr. xv. 3), students, and interpreters of the Divine Law. From such as these, men might be chosen by the more zealous kings to instruct the people (2 Chr. xvii. 8), or to administer justice (2 Chr. xix. 8). (2.) Some, perhaps, as stated above, served in the king's army. We have no ground for transferring our modern conceptions of the peacefulness of the

Targum of Jonathan accordingly gives this meaning to it here. Strangely enough, we have in the history of the death of James the Just (Hegesipp. in Eus. *H. E.* ii. 23) an indication of the fulfillment of the blessing in this sense. Among the priests who are present, there is one "belonging to the Rechabim of whom Jeremiah had spoken." The mention of the house of Rechab among the "families of the scribes," in 1 Chr. ii. 65, points to something of the same nature. The title prefixed in the LXX. and Vulg. to Ps. lxxi. connects it with the "sons of Jonadab, the first that went into captivity." Augustine takes this as the starting-point for his interpretation (*Enarr. in Psalm lxxi.*).

<sup>b</sup> It is to be noticed that while the Heb. text gives 85 as the number of priests slain, the LXX. increases it to 305, Josephus (*Ant.* vi. 12, 6) to 885.

priestly life to the remote past of the Jewish people. Priests, as we have seen, were with David at Hebron as men of war. They were the trumpeters of Abijah's army (2 Chr. xiii. 12). The Temple itself was a great armory (2 Chr. xxiii. 9). The heroic struggles of the Maccabees were sustained chiefly by their kindred of the same family (2 Macc. viii. 1). (3.) A few chosen ones might enter more deeply into the divine life, and so receive, like Zechariah, Jeremiah, Ezekiel, a special call to the office of a prophet. (4.) We can hardly escape the conclusion that many did their work in the Temple of Jehovah with a divided allegiance, and acted at other times as priests of the high-places (Ewald, *Gesch.* iii. 704). Not only do we read of no protests against the sins of the idolatrous kings, except from prophets who stood forth, alone and unsupported, to bear their witness, but the priests themselves were sharers in the worship of Baal (Jer. ii. 8), of the sun and moon, and of the host of heaven (Jer. viii. 1, 2). In the very Temple itself they "ministered before their idols" (Ez. xliv. 12), and allowed others, "uncircumcised in heart, and uncircumcised in flesh," to join them (*ibid.* 7). They ate of unclean things and polluted the Sabbaths. There could be no other result of this departure from the true idea of the priesthood than a general degradation. Those who ceased to be true shepherds of the people found nothing in their ritual to sustain or elevate them. They became as sensual, covetous, tyrannical, as ever the clergy of the Christian Church became in its darkest periods; conspicuous as drunkards and adulterers (Is. xxviii. 7, 8, lvi. 10-12). The prophetic order, instead of acting as a check, became sharers in their corruption (Jer. v. 31; Lam. iv. 13; Zeph. iii. 4). For the most part the few efforts after better things are not the result of a spontaneous reformation, but of conformity to the wishes of a reforming king. In the one instance in which they do act spontaneously — their resistance to the usurpation of the priest's functions by Uzziah — their protest, however right in itself, was yet only too compatible with a wrong use of the office which they claimed as belonging exclusively to themselves (2 Chr. xxvi. 17). The discipline of the Captivity, however, was not without its fruits. A large proportion of the priests had either perished or were content to remain in the land of their exile; but those who did return were active in the work of restoration. Under Ezra they submitted to the stern duty of repudiating their heathen wives (Ez. x. 18, 19). They took part — though here the Levites were the more prominent — in the instruction of the people (Ez. iii. 2; Neh. viii. 9-13). The root-evils, however, soon reappeared. The work of the priesthood was made the instrument of covetousness. The priests of the time of Malachi required payment for every ministerial act, and would not even "shut the doors" or "kindle fire" for nought (Mal. i. 10). They "corrupted the covenant of Levi" (Mal. ii. 8). The idea of the priest as the angel, the messenger, of the Lord of Hosts, was forgotten (Mal. ii. 7; comp. Eccl. v. 6). The inevitable result was that they again lost their influence. They became "base and contemptible before all the people" (Mal. ii. 9). The office of the scribe rose in repute as that of the priest de-

clined (Jost, *Judenth.* i. 37, 148). The sects that multiplied during the last three centuries of the national life of Judaism were proofs that the established order had failed to do its work in maintaining the religious life of the people. No great changes affected the outward position of the priests under the Persian government. When that monarchy fell before the power of Alexander, they were ready enough to transfer their allegiance.<sup>a</sup> Both the Persian government and Alexander had, however, respected the religion of their subjects; and the former had conferred on the priests immunities from taxation (Ez. vi. 8, 9. vii. 24; Joseph. *Ant.* xi. 8). The degree to which this recognition was carried by the immediate successors of Alexander is shown by the work of restoration accomplished by Simon the son of Onias (Ecclus. i. 12-20); and the position which they thus occupied in the eyes of the people, not less than the devotion with which his zeal inspired them, prepared them doubtless for the great struggle which was coming, and in which, under the priestly Maccabees, they were the chief defenders of their country's freedom. Some, indeed, at that crisis, were found among the apostates. Under the guidance of Jason (the heathenized form of Joshua) they forsook the customs of their fathers; and they who, as priests, were to be patterns of a self-respecting purity, left their work in the Temple to run naked in the circus which the Syrian king had opened in Jerusalem (2 Macc. iv. 13, 14). Some, at an earlier period, had joined the schismatic Onias in establishing a rival worship (Joseph. *Ant.* xii. 3, § 4). The majority, however, were true-hearted; and the Maccabean struggle which left the government of the country in the hands of their own order, and, until the Roman conquest, with a certain measure of independence, must have given to the higher members of the order a position of security and influence. The martyr-spirit showed itself again in the calmness with which they carried on the ministrations in the Temple, when Jerusalem was besieged by Pompey, till they were slain even in the act of sacrificing (Jos. *Ant.* xiv. 4, § 3; *B. J.* i. 7, § 5). The reign of Herod, on the other hand, in which the high-priesthood was kept in abeyance, or transferred from one to another at the will of one who was an alien by birth and half a heathen in character, must have tended to depress them.

It will be interesting to bring together the few facts that indicate their position in the N. T. period of their history. The division into four-and-twenty courses is still maintained (Luke i. 5; Joseph. *Vit.* 1), and the heads of these courses, together with those who have held the high-priesthood (the office no longer lasting for life), are "chief priests" (ἀρχιερείς) by courtesy (Carpzov. *App. Crit.* p. 102), and take their place in the Sanhedrim. The number scattered throughout Palestine was, as has been stated, very large. Of these the greater number were poor and ignorant, despised by the more powerful members of their own order, not gaining the respect or affection of the people. The picture of cowardly selfishness in the priest of the parable of Luke x. 31, can hardly be thought of as other than a representative one, indicating the estimate commonly and truly formed

<sup>a</sup> A real submission is hardly concealed by the narrative of the Jewish historian. The account of the effect produced on the mind of the Macedonian king by the solemn procession of priests in their linen

ephods (Joseph. *Ant.* xi. 8) stands probably on the same footing as Livy's account of the retreat of Porsenna from the walls of unconquered Rome.

of the character of the class. The priestly order, like the nation, was divided between contending sects. The influence of Hyrcanus, himself in the latter part of his life a Sadducee (Joseph. *Ant.* xiii. 10, § 6), had probably made the tenets of that party popular among the wealthier and more powerful members, and the chief priests of the Gospels and the Acts, the whole ἀρχιερατικὸν γένος (Acts iv. 1, 6, v. 17), were apparently consistent Sadducees, sometimes combining with the Pharisees in the Sanhedrim, sometimes thwarted by them, persecuting the followers of Jesus because they preached the resurrection of the dead. The great multitude (ὄχλος), on the other hand, who received that testimony<sup>a</sup> (Acts vi. 7) must have been free from, or must have overcome Sadducean prejudices. It was not strange that those who did not welcome the truth which would have raised them to a higher life, should sink lower and lower into an ignorant and ferocious fanaticism. Few stranger contrasts meet us in the history of religion than that presented in the life of the priesthood in the last half-century of the Temple, now going through the solemn sacrificial rites, and joining in the noblest hymns, now raising a fierce clamor at anything which seemed to them a profanation of the sanctuary, and rushing to dash out the brains of the bold or incautious intruder,<sup>b</sup> or of one of their own order who might enter while under some ceremonial defilement, or with a half-humorous cruelty setting fire to the clothes of the Levites who were found sleeping when they ought to have been watching at their posts (Lightfoot, *Temple Service*, c. 1). The rivalry which led the Levites to claim privileges which had hitherto belonged to the priests has been already noticed. [LEVITES.] In the scenes of the last tragedy of Jewish history the order passes away, without honor, "dying as a fool dieth." The high-priesthood is given to the lowest and vilest of the adherents of the frenzied Zealots (Joseph. *B. J.* iv. 3, § 6). Other priests appear as deserting to the enemy (*Ibid.* vi. 6, § 1). It is from a priest that Titus receives the lamps, and gems, and costly raiment of the sanctuary (*Ibid.* vi. 8, § 3). Priests report to their conquerors the terrible utterance "Let us depart," on the last Pentecost ever celebrated in the Temple (*Ibid.* vi. 5, § 3). It is a priest who fills up the degradation of his order by dwelling on the fall of his country with a cold-blooded satisfaction, and finding in Titus the fulfillment of the Messianic prophecies of the O. T. (*Ibid.* vi. 5, § 4). The destruction of Jerusalem deprived the order at one blow of all but an honorary distinction. Their occupation was gone. Many families must have altogether lost their genealogies. Those who still prided themselves on their descent, were no longer safe against the claims of pretenders. The jealousies of the lettered class, which had been kept under some restraint as long as the Temple stood, now had full play, and the influence of the Rabbis increased with

<sup>a</sup> It deserves notice that from these priests may have come the statements as to what passed within the Temple at the time of the Crucifixion (Matt. xxvii. 1), and that these facts may have had some influence in determining their belief. They, at any rate, would be brought into frequent contact with the teachers who continued daily in the Temple and taught in Solomon's porch (Acts v. 12).

<sup>b</sup> It belonged to the priests to act as sentinels over the Holy Place, as to the Levites to guard the wider

the fall of the priesthood. Their position in medieval and modern Judaism has never risen above that of complimentary recognition. Those who claim to take their place among the sons of Aaron are entitled to receive the redemption money of the first-born, to take the Law from its chest, to pronounce the benediction in the synagogues (Ugolini, xii. 48).

The language of the N. T. writers in relation to the priesthood ought not to be passed over. They recognize in Christ, the first-born, the king, the Anointed, the representative of the true primeval priesthood after the order of Melchizedek (Heb. vii., viii.), from which that of Aaron, however necessary for the time, is now seen to have been a deflection. But there is no trace of an order in the new Christian society, bearing the name, and exercising functions like those of the priests of the older Covenant. The Synagogue and not the Temple furnishes the pattern for the organization of the Church. The idea which pervades the teaching of the Epistles is that of an universal priesthood. All true believers are made kings and priests (Rev. i. 6; 1 Pet. ii. 9), offer spiritual sacrifices (Rom. xii. 1), may draw near, may enter into the holiest (Heb. x. 19-22) as having received a true priestly consecration. They too have been washed and sprinkled as the sons of Aaron were (Heb. x. 22). It was the thought of a succeeding age that the old classification of the high-priest, priests, and Levites was reproduced in the bishops, priests, and deacons of the Christian Church.<sup>c</sup> The idea which was thus expressed rested, it is true, on the broad analogy of a threefold gradation, and the terms, "priest," "altar," "sacrifice," might be used without involving more than a legitimate symbolism, but they brought with them the inevitable danger of reproducing and perpetuating in the history of the Christian Church many of the feelings which belonged to Judaism, and ought to have been left behind with it. If the evil has not proved so fatal to the life of Christendom as it might have done, it is because no bishop or pope, however much he might exaggerate the harmony of the two systems, has ever dreamt of making the Christian priesthood hereditary. We have perhaps reason to be thankful that two errors tend to neutralize each other, and that the age which witnessed the most extravagant sacerdotalism was one in which the celibacy of the clergy was first exalted, then urged, and at last enforced.

The account here given has been based on the belief that the books of the O. T. give a trustworthy account of the origin and history of the priesthood of Israel. Those who question their authority have done so, for the most part, on the strength of some preconceived theory. Such a hierarchy as the Pentateuch prescribes, is thought impossible in the earlier stages of national life, and therefore the reigns of David and Solomon are looked on, not as the restoration, but as the starting-point of the

area of the precincts of the Temple (Ugolini, xiii. 1052).

<sup>c</sup> The history of language presents few stranger facts than those connected with these words. Priest, our only equivalent for ἱερεῖς, comes to us from the word which was chosen because it excluded the idea of a sacerdotal character. Bishop has narrowly escaped a like perversion, occurring, as it does constantly in Wykliffe's version as the translation of ἀρχιερεῖς (e. g. John xviii. 15 Heb. viii. 1).

**rd**er (Von Bohlen, *Die Genesis*, Ein. § 16). It is alleged that there could have been no tribe like that of Levi, for the consecration of a whole tribe is without a parallel in history (Vatke, *Bibl. Theol.* i. p. 222). Deuteronomy, assumed for once to be older than the three books which precede it, represents the titles of the priest and Levite as standing on the same footing, and the distinction between them is therefore the work of a later period (George, *Die älteren Jüd. Feste*, pp. 45, 51; comp. Bähr, *Symbolik*, b. ii. c. i. § 1, whence these references are taken). It is hardly necessary here to do more than state these theories. E. H. P.

\* In addition to the writers named in the preceding article (Saubert, Krumboltz, etc. in Ugolini's *Thesaur.* vols. xii and xiii., Michaelis, Spencer, Köhr, Ewald, Saalschütz, Jost), a few others should be mentioned. Lightfoot, *The Temple Service as it stood in the Days of our Saviour*, Lond. 1649, or *Works*, Pitman's ed., vol. ix. J. Braun, *De Vestitu sacerdotum Hebræorum* (1630). J. Buxtorf, *Dissert. de pontifice maximo Hebr.* (1685). A. Tholuck, *Ueber den Opfer- und Priester-Begriff im A. und N. Test.* (5th ed.), appended to his *Das Alte Test. im Neuen Test.* Winer, *Priester*, in his *Bibl. Realw.* ii. 269-275 (an elaborate summary both of sources and results). Oehler, *Priesterthum im Aeltem Testament*, in Herzog's *Real-Encyk.* xii. 174-187; and *ibid.* art. *Leviten*, viii. 347 ff. Merz, *Priester*, in Zeller's *Bibl. Wörterb.* ii. 279-283. C. R. Küper, *Das Priesterthum des A. Bundes* (Berl. 1865), mainly archæological, together with a history of the Hebrew priesthood. K. F. Keil, *Bibl. Archæologie*, i. 154-187 (1858). J. P. Smith, *Discourses on the Sacrifice and Priesthood of Christ* (Lond. 1842). Stanley, *The Jewish Priesthood*, in his *Lectures on Jewish History*, ii. 448-477 (Amer. ed.). On the priesthood of Melchizedek see the literature under that name. For the number and situation of the Levitical cities, see Clark's *Bible Atlas of Maps and Plans*, p. 27 f. (Lond. 1863). The related articles in the *Dictionary* on LEVITES, SACRIFICES, TABERNACLE, TEMPLE, and VOWS may be consulted.

H.

**PRINCE, a PRINCESS.** The only special uses of the word "prince" are — 1. "Princes of provinces" <sup>b</sup> (1 K. xx. 14), who were probably local governors or magistrates, who took refuge in Samaria during the invasion of Benhadad, and

their "young men" were their attendants, *παῖδαρια*, *pedisequi* (Themius, Ewald, *Gesch.* iii. 495). Josephus says, *ὑποὶ τῶν ἡγεμόνων* (*Ant.* viii. 14, § 2). 2. The "princes" mentioned in Dan. vi. 1 (see Esth. i. 1) were the predecessors, either in fact or in place, of the satraps of Darius Hystaspis (Her. iii. 89). H. W. P.

\* The "prince of Persia," "prince of Grecia," and "Michael your prince" (Dan. x. 13, 20, 21, xii. 1), are apparently the patron or guardian angels of the nations referred to. [ANGELS, vol. i. p. 97.] See Roseum. and Hitzig on Dan. x. 13 the LXX., Deut. xxxii. 8; Ecclus. xvii. 17; and Eisenmenger's *Entdecktes Judenthum*, i. 803 ff. A.

\* **PRINCE OF DEMONS.** [DEMON, iii.]

\* **PRINCE OF THE POWER OF THE AIR,** Eph. ii. 2. [AIR, Amer. ed.]

\* **PRINCIPALITY.** The word translated "principalities" in Jer. xiii. 18 (A. V.), — "For your principalities shall come down, even the crown of your glory," — is understood by Gesenius, Ewald, Hitzig, De Wette, and others, to mean "heads," and they render, "from your heads shall come down the crown of your glory." Some, as Roseumüller and Fürst, with the margin of the A. V. ("head-tires"), take the word to denote an ornament worn on the head = crown. In 2 Macc. iv. 27, "principalty" is used in reference to the office of high-priest. In several passages of the N. T. the terms ἀρχαὶ καὶ ἐξουσίαι, "principalities and powers," appear to denote different orders of angels, good or bad. See Eph. vi. 12, "For we wrestle not against flesh and blood, but against principalities, against powers," etc. (Comp. the art. AIR, i. 57 a.) In Col. ii. 14, 15, God (not Christ, see ver. 13) is spoken of as "blotting out the handwriting in ordinances that was against us," and taking it out of the way, "nailing it to the cross" (τῷ σταυρῷ, not his cross, A. V.); "and having despoiled (or, perhaps, "having disarmed") principalities and powers, he made a show of them openly, triumphing over them in it" (or perhaps, "in him," i. e. Christ). Here, in boldly figurative language, the image being that of a conqueror leading in triumph his captives in war, is described the victory over the powers of evil won by the death and resurrection of Christ. Compare John xii. 31, 32; Heb. ii. 14, 15; 1 Cor. xv. 24-26. In other passages, as

a 1. פְּרוֹץ, only in a few places; commonly 'priest.'

2. נָגִיד: ἄρχων, ὁ ἡγούμενος: *dux*: applied to messiah (Dan. ix. 25).

3. נָדִיב, properly "willing," chiefly in poet. (Ges. p. 853): ἄρχων: *princeps*.

4. נָסִיחָה, from נָסַח, "prince," an anointed One: ἄρχων: *princeps*: also in A. V. "duke" (Josh. xlii. 21).

5. רָשָׁיָא, verb adj. from רָשָׁה, "raise:" ἄρχων, ἡγούμενος, ἡγεμόν, βασιλεύς: *princeps*, *dux*: also in A. V. "ruler," "chief," "captain." This word appears on the coins of Simon Maccabæus (Ges. 917).

6. קָהָן: ἀρχηγός, ἄρχων: *princeps*: also "captain," and "ruler."

7. רַב, an adj. "great," also as a subst. "captain," and used in composition, as Rab-saris: ἄρχων, ἡγεμών: *optimus*.

8. רִזָּן, part. of רִזַּן, "bear," a poet. word: σατράπης, δυνάστης: *princeps*, *legum conditor*.

9. שָׂר: ἄρχων: *princeps*: also in A. V. "captain," "ruler," prefixed to words of office, as "chief-baker," etc. שָׂרָה: ἄρχουσα: *regina*.

10. שָׂרִיט, "ruler," "captain;" שָׂרִישׁ, "captain," "prince:" ἡγεμόν: *dux*.

11. In plur. only: פְּרִתְרִים: akin to Sanskr *prathama*, *primus*: ἐνδοξοί: *inlyti* (Esth. i. 8).

12. קְהָנִים: ἄρχοντες: *magistratus*: usually "rulers."

13. קְהָלֵמְנִים: πρέσβεις: *legati*: only in Ps lxxvii. 31.

14. אֶחָדָשׁוֹרְפָנִים וְאַחַדְשֶׁנְרַפְנִים: ὕπατος διοικηταί: *satrapæ*: a Persian word.

b מְדִינָה: χῶραι: *provincia*

Eph. iii. 10, Col. i. 16, the terms "principalities" and "powers" are applied to good angels, and so probably in Eph. i. 21, Col. ii. 10, at least inclusively; comp. 1 Pet. iii. 21. The reference in Rom. viii. 38 is more doubtful. That the terms *θρόνοι, κυριότητες, ἀρχαί, ἐξουσία* in Col. i. 16 (comp. Milton's "Thrones, Dominations, Princedoms, Virtues, Powers") denote different orders of angels is probable, but there is little ground for speculation about their relative dignity. "Thrones" may naturally be taken as denoting the highest, and Fritzsche (on Rom. viii. 38) observes that in the various enumerations "principalities" (*ἀρχαί*) always precedes "powers" (*ἐξουσία*), from which he infers the superior rank of the former. In the account of the seven heavens given in the *Testaments of the Twelve Patriarchs*, a work of the second century (*Levi*, c. 3), the angels designated as *δυνάμεις τῶν παρεμβολῶν*, literally "powers of the armies," are placed in the third heaven, and the *θρόνοι καὶ ἐξουσία*, "thrones and authorities," in the fourth or fifth (not the seventh, as Meyer represents). In the *Ascension of Isaiah* (c. vii.), translated by Laurence from the Ethiopic (Oxon. 1819), an angel surpassing others in splendor is represented as enthroned in each of the first six heavens, and these angels are themselves called "thrones." This part of the work however only represents the notions of some Gnostic Christian in the second half of the third century (Dillmann, in Herzog's *Real-Encykl.* xii. 313). The passages in respect to different orders of angels cited from the Rabbinical writings by Bartolocci (*Bibl. magna Rabbin.* i. 267 ff.), J. H. Maius (*Synopsis Theol. Jud.* p. 76 f.), Eisenmenger (*Entdecktes Judenth.* ii. 374, and Gfrörer (*Jahrhundert des Heils*, i. 358 ff.), throw no light on the phraseology of Paul. The notions of the Christian Fathers on this subject are set forth with great fullness by Petavius, *Theol. Dogm.* vol. iii. p. 55 ff. (Antwerp edition, 1700). [ANGELS; POWER.] A.

\* PRINTED, A. V. Job xix. 23, should be "inscribed" or "marked down" (Noyes). A.

PRIS'CA (Πρίσκα [ancient]: *Prisca*), 2 Tim. v. 19. [PRISCILLA.]

PRISCIL'LA (Πρισκίλλα [dimin. of *Prisca*: *Priscilla*]). To what has been said elsewhere under the head of AQUILA the following may be added. The name is *Prisca* (Πρίσκα) in 2 Tim. iv. 19, and (according to the true reading) in Rom. xvi. 3, and also (according to some of the best MSS.) in 1 Cor. xvi. 19. Such variation in a Roman name is by no means unusual. We find that the

name of the wife is placed before that of the husband in Rom. xvi. 3, 2 Tim. iv. 19, and (according to some of the best MSS.) in Acts xviii. 26. It is only in Acts xviii. 2 and 1 Cor. xvi. 19 that Aquila has unequivocally the first place. Hence we should be disposed to conclude that Priscilla was the more energetic character of the two; and it is particularly to be noticed that she took part, not only in her husband's exercise of hospitality, but likewise in the theological instruction of APOLLOS. Yet we observe that the husband and the wife are always mentioned together. In fact we may say that Priscilla is the example of what the married woman may do, for the general service of the Church, in conjunction with home duties, as PRIBBE is the type of the unmarried servant of the Church, or deaconess. Such female ministrations were of essential importance in the state of society in the midst of which the early Christian communities were formed. [DEACONESS, Amer. ed.] The remarks of Archdeacon Evans on the position of Timothy at Ephesus are very just: "In his dealings with the female part of his flock, which, in that time and country, required peculiar delicacy and discretion, the counsel of the experienced Priscilla would be invaluable. Where, for instance, could he obtain more prudent and faithful advice than hers, in the selection of widows to be placed upon the eleemosynary list of the Church, and of deaconesses for the ministry?" (*Script. Biog.* ii. 298). It seems more to our purpose to lay stress on this than on the theological learning of Priscilla. Yet Winer mentions a monograph *de Priscilla, Aquila uxore, tanquam feminarum e gente Judaica eruditatum specimen*, by G. G. Zeltner (Altorf, 1709). J. S. H.

PRISON.<sup>a</sup> For imprisonment as a punishment, see PUNISHMENTS. The present article will only treat of prisons as places of confinement.

In Egypt it is plain both that special places were used as prisons, and that they were under the custody of a military officer (Gen. xl. 3, xlii. 17).

During the wandering in the desert we read on two occasions of confinement "in ward" (*Lev.* xxiv. 12; Num. xv. 34); but as imprisonment was not directed by the Law, so we hear of none till the time of the kings, when the prison appears as an appendage to the palace, or a special part of it (1 K. xxii. 27). Later still it is distinctly described as being in the king's house (*Jer.* xxxii. 2, xxxvii. 21; *Neh.* iii. 25). This was the case also at Babylon (2 K. xxv. 27). But prison's

a 1. כְּסָרָה, Aramaic for כְּסָרָה, "a chain," is loaned with כְּסָרָה, and rendered a prison: οἶκος δεσμῶν: *carcer*.

2. כְּסָרָה, כְּסָרָה, and כְּסָרָה, with כְּסָרָה: οἶκος φυλακῆς (*Jer.* xxxvii. 15).

3. כְּסָרָה, from כָּסַר, "turn," or "twist," the stocks (*Jer.* xx. 2).

4. כְּסָרָה and כְּסָרָה: φυλακή: *carcer* (*Ges.* p. 873).

5. כְּסָרָה: δεσμοτήριον: *carcer*.

6. כְּסָרָה: φυλακή: *custodia*; also plur.

כְּסָרָה: א. V "hard."

7. עֲצָרָה: ἀγστία: ταπεινώσις (*Ges.* 1059).

8. כְּסָרָה (Is. lxi. 1), more properly written in one word: ἀνάβλεψις: *upertio* (*Ges.* 1121).

9. כְּסָרָה: ὀχύρωμα: *carcer*; properly a tower.

10. כְּסָרָה: οἰκία μίλωνος: *domus carceris*. כְּסָרָה is also sometimes "prison" in A. V., as *Gen.* xxxix. 20.

11. כְּסָרָה: καταβάτης: *carcer*; probably "the stocks" (as A. V.) or some such instrument of confinement; perhaps understood by LXX. as a sewer or underground passage.

houses were sometimes used as places of confinement (Jer. xxxvii. 15), probably much as Chardin describes Persian prisons in his day, namely, houses kept by private speculators for prisoners to be maintained there at their own cost (*Voy.* vi. 100). Public prisons other than these, though in use by the Canaanitish nations (Judg. xvi. 21, 25), were unknown in Judæa previous to the Captivity. Under the Herods we hear again of royal prisons attached to the palace, or in royal fortresses (Luke iii. 20; Acts xii. 4, 10; Joseph. *Ant.* xviii. 5, § 2; Machærus). By the Romans Antonia was used as a prison at Jerusalem (Acts xxiii. 10), and at Cæsarea the prætorium of Herod (*ib.* 35). The sacerdotal authorities also had a prison under the superintendence of special officers, *δεσμοφύλακες* (Acts v. 18-23, viii. 3, xxvi. 10). The royal prisons in those days were doubtless managed after the Roman fashion, and chains, fetters, and stocks used as means of confinement (see Acts xvi. 24, and Job xiii. 27).

One of the readiest places for confinement was a dry or partially dry well or pit (see Gen. xxxvii. 24 and Jer. xxxviii. 6-11); but the usual place appears, in the time of Jeremiah, and in general, to have been accessible to visitors (Jer. xxxvi. 5; Matt. xi. 2, xxv. 36, 39; Acts xxiv. 23). H. W. P.

\* PRISON-GATE. [JERUSALEM, vol. ii. p. 1322.]

\* PRIZE. [GAMES; PRICE.]

PROCHORUS (*Πρόχορος* [*leader of a dance or chorus: Prochorus*]). One of the seven deacons, being the third on the list, and named next after Stephen and Philip (Acts vi. 5). No further mention of him is made in the N. T. There is a tradition that he was consecrated by St. Peter bishop of Nicomedia (Baron. i. 292). In the *Magna Bibliotheca Patrum*, Colon. Agripp. 1618, i. 49-69, will be found a fabulous "Historia Prochori, Christi Discipuli, de vita B. Joannis apostoli." E. H.—s.

PROCONSUL. The Greek *ἀνθύπατος*, for which this is the true equivalent, is rendered uniformly "deputy" in the A. V. of Acts xiii. 7, 8, 12, xix. 38, and the derived verb *ἀνθυπατεύω*, in Acts xviii. 12, is translated "to be deputy." At the division of the Roman provinces by Augustus in the year B. C. 27, into Senatorial and Imperial, the emperor assigned to the senate such portions of territory as were peaceable and could be held without force of arms (Suet. *Oct.* 47; Strabo, xvii. p. 840; Dio Cass. liii. 12), an arrangement which remained with frequent alterations till the 3d century. Over these senatorial provinces the senate appointed yearly an officer, who was called "proconsul" (Dio Cass. liii. 13), who exercised purely civil functions, had no power over life and death, and was attended by one or more legates (Dio Cass. liii. 14). He was neither girt with the sword nor wore the military dress (Dio Cass. liii. 13). The provinces were in consequence called "proconsular." With the exception of Africa and Asia, which were assigned to men who had passed the office of consul, the senatorial provinces were given to those who had been prætors, and were divided by lot each year among those who had held this office five years previously. Their term of office was one year.

Among the senatorial provinces in the first arrangement by Augustus, were Cyprus, Achaia, and Asia within the Halys and Taurus (Strabo, xvii. p. 840). The first and last of these are alluded to in Acts xiii. 7, 8, 12, xix. 38, as under the government of proconsuls. Achaia became an imperial province in the second year of Tiberius, A. D. 16, and was governed by a procurator (Tac. *Ann.* i. 76), but was restored to the senate by Claudius (Suet. *Claud.* 25), and therefore Gallio, before whom St. Paul was brought, is rightly termed "proconsul" in Acts xviii. 12. Cyprus also, after the battle of Actium, was first made an imperial province (Dio Cass. liii. 12), but five years afterwards (B. C. 22) it was given to the senate, and is reckoned by Strabo (xvii. p. 840) ninth among the provinces of the people governed by *στρατηγῶις*, as Achaia is the seventh. These *στρατηγῶις*, or prætors, had the title of proconsul. Cyprus and Narbonese Gaul were given to the senate in exchange for Dalmatia, and thus, says Dio Cassius (liv. 4), proconsuls (*ἀνθύπατοι*) began to be sent to those nations. In Boeckh's *Corpus Inscriptionum*, No. 2631, is the following relating to Cyprus: *ἡ πόλις Κόδιτον Ἰούδιον Κόρδον ἀνθύπατον ἀργείας*. This Quintus Julius Cordus appears to have been proconsul of Cyprus before the 12th year of Claudius. He is mentioned in the next inscription (No. 2632) as the predecessor of another proconsul, Lucius Annus Bassus. The date of this last inscription is the 12th year of Claudius, A. D. 52. The name of another proconsul of Cyprus in the time of Claudius occurs on a copper coin, of which an engraving is given in vol. i. p. 524. A coin of Ephesus [see vol. i. p. 749] illustrates the usage of the word *ἀνθύπατος* in Acts xix. 38.

W. A. W.

PROCURATOR. The Greek *ἡγεμών*,<sup>a</sup> rendered "governor" in the A. V., is applied in the N. T. to the officer who presided over the imperial province of Judæa. It is used of Pontius Pilate (Matt. xxvii.), of Felix (Acts xxiii, xxiv.), and of Festus (Acts xxvi. 30). In all these cases the Vulgate equivalent is *preses*. The office of procurator (*ἡγεμονία*) is mentioned in Luke iii. 1, and in this passage the rendering of the Vulgate is more close (*procurante Pontio Pilato Judeæum*). It is explained, under the head of PROCONSUL, that after the battle of Actium, B. C. 27, the provinces of the Roman empire were divided by Augustus into two portions, giving some to the senate, and reserving to himself the rest. The imperial provinces were administered by legates, called *legati Augusti pro prætore*, sometimes with the addition of *consulari potestate*, and sometimes *legati consulares*, or *legati* or *consulares* alone. They were selected from among men who had been consuls or prætors, and sometimes from the inferior senators (Dio Cass. liii. 12, 15). Their term of office was indefinite, and subject only to the will of the emperor (Dio Cass. liii. 13). These officers were also called *presides*, a term which in later times was applied indifferently to the governors both of the senatorial and of the imperial provinces (Suet. *Claud.* 17). They were attended by six lictors, used the military dress, and wore the sword (Dio Cass. liii. 13). No quaestor came into the emperor's provinces, but the property and revenues of

<sup>a</sup> *ἡγεμών* is the general term, which is applied also to the governor (*preses*) of the imperial province of Syria (Luke ii. 2); the Greek equivalent of procurator

is strictly *ἐπίτροπος* (Jos. *Ant.* xx. 6, § 2, 8, § 5; comp. xx. 5, § 1), and his office is called *ἐπιτροπή* (Jos. *Ant.* xx. 5, § 1).

the imperial treasury were administered by the *Rationales, Procuratores, and Actores* of the emperor, who were chosen from among his freedmen, or from among the knights (Tac. *Hist.* v. 9; Dio Cass. liii. 15). These procurators were sent both to the imperial and to the senatorial provinces (Dio Cass. liii. 15<sup>a</sup>). Sometimes a province was governed by a procurator with the functions of a praeses. This was especially the case with the smaller provinces and the outlying districts of a larger province; and such is the relation in which Judaea stood to Syria. After the deposition of Archelaus, Judaea was annexed to Syria, and the first procurator was Coponius, who was sent out with Quirinus to take a census of the property of the Jews and to confiscate that of Archelaus (Jos. *Ant.* xviii. 1, § 1). His successor was Marcus Ambivius, then Annus Rufus, in whose time the emperor Augustus died. Tiberius sent Valerius Gratus, who was procurator for eleven years, and was succeeded by Pontius Pilate (Jos. *Ant.* xviii. 2, § 2), who is called by Josephus (*Ant.* xviii. 3, § 1) ἡγεμῶν, as he is in the N. T. He was subject to the governor (*praeses*) of Syria, for the council of the Samaritans denounced Pilate to Vitellius, who sent him to Rome and put one of his own friends, Marcellus, in his place (Jos. *Ant.* xviii. 4, § 2). The head-quarters of the procurator were at Caesarea (Jos. *B. J.* ii. 9, § 2; Acts xxiii. 23), where he had a judgment-seat (Acts xxv. 6) in the audience chamber (Acts xxv. 23<sup>b</sup>), and was assisted by a council (Acts xxv. 12) whom he consulted in cases of difficulty, the *assessores* (Suet. *Galb.* 14), or ἡγεμόνες, who are mentioned by Josephus (*B. J.* ii. 16, § 1) as having been consulted by Cestius, the governor of Syria, when certain charges were made against Florus, the procurator of Judaea. More important cases were laid before the emperor (Acts xxv. 12; comp. Jos. *Ant.* xx. 6, § 2). The procurator, as the representative of the emperor, had the power of life and death over his subjects (Dio Cass. liii. 14; Matt. xxvii. 26), which was denied to the proconsul. In the N. T. we see the procurator only in his judicial capacity. Thus Christ is brought before Pontius Pilate as a political offender (Matt. xxvii. 2, 11), and the accusation is heard by the procurator, who is seated on the judgment-seat (Matt. xxvii. 19). Felix heard St. Paul's accusation and defense from the judgment-seat at Caesarea (Acts xxiv.), which was in the open air in the great stadium (Jos. *B. J.* i. 9, § 2), and St. Paul calls him "judge" (Acts xxiv. 10), as if this term described his chief functions. The procurator (ἡγεμῶν) is again alluded to in his judicial capacity in 1 Pet. ii. 14. He was attended by a cohort as body-guard (Matt. xxvii. 27), and apparently went up to Jerusalem at the time of the high festivals, and there resided in the palace of Herod (Jos. *B. J.* ii. 14, § 3; Philo, *De Leg. ad Caicum*, § 37, ii. 589, ed Mang.), in which was the *praetorium*, or "judgment-hall," as it is rendered in the A. V. (Matt. xxvii. 27; Mark xv. 16; comp. Acts xxiii. 35). Sometimes it appears Jerusalem was made his winter quarters (Jos. *Ant.* xvii. 3, § 1). The High-Priest was appointed and removed at the will of the procurator (Jos. *Ant.*

<sup>a</sup> A curious illustration of this is given by Tacitus *Ann.* xlii. 1), where he describes the poisoning of Junius Silanus, proconsul of Asia, by P. Celer, a Roman knight, and Helius, a freedman, who had the

xviii. 2, § 2). Of the oppression and extortion, practiced by one of these officers, Gessius Florus, which resulted in open rebellion, we have an account in Josephus (*Ant.* xx. 11, § 1; *B. J.* ii. 14, § 2). The same laws held both for the governors of the imperial and senatorial provinces, that they could not raise a levy or exact more than an appointed sum of money from their subjects, and that when their successors came they were to return to Rome within three months (Dio Cass. liii. 15). For further information see Walter, *Gesch. des Röm. Rechts*.

W. A. W

\* **PROPER** is used in the A. V. in Heb. גַּד 23 ("because they saw he was a *proper* child" in the sense of "handsome," "fair" (Gr. ἀστεῖος)). So often in Shakespeare. A.

**PROPHET** (נָבִי: προφήτης: propheta).

I. THE NAME.—The ordinary Hebrew word for prophet is *nābi* (נָבִי), derived from the verb

נָבַן, connected by Gesenius with נָבַן, "to bubble forth," like a fountain. If this etymology is correct, the substantive would signify either a person who, as it were, involuntarily bursts forth with spiritual utterances under the divine influence (cf. Ps. xlv. 1, "My heart is *bubbling up* of a good matter"), or simply one who pours forth words.

The analogy of the word נָבַן (*nāṭaph*), which has the force of "dropping" as honey, and is used by Micah (ii. 6, 11), Ezekiel (xxi. 2), and Amos (vii. 16), in the sense of prophesying, points to the last signification. The verb נָבַן is found only in the *niphāl* and *hithpael*, a peculiarity which it shares with many other words expressive of speech (cf. loqui, fari, vociferari, concionari, φέγγομαι, as well as μαντεύομαι and vaticinari). Lamsen (*Gott in d. Geschichte*, p. 141) and Davidson (*Intr. Old Test.* ii. 430) suppose *nābi* to signify the man to whom announcements are made by God, i. e. inspired. But it is more in accordance with the etymology and usage of the word to regard it as signifying (actively) one who announces or pours forth the declarations of God. The latter signification is preferred by Ewald, Hävernick, Oehler, Heugstenberg, Bleek, Lee, Pusey, McCaul, and the great majority of Biblical critics.

Two other Hebrew words are used to designate a prophet, רֹאֵה, *roēh*, and חֹזֶה, *chozeh*, both signifying one who sees. They are rendered in the A. V. by "seer;" in the LXX. usually by βλεπων or ὀρω, sometimes by προφήτης (1 Chr. xxvi. 28; 2 Chr. xvi. 7, 10). The three words seem to be contrasted with each other in 1 Chr. xxix. 29. "The acts of David the king, first and last, behold they are written in the book of Samuel the seer (*roēh*), and in the book of Nathan the prophet (*nābi*), and in the book of Gad the seer (*chozeh*)."  
*Roēh* is a title almost appropriated to Samuel. It is only used ten times, and in seven of these it is applied to Samuel (1 Sam. ix. 9, 11, 18, 19; 1 Chr. ix. 22; xxvi. 28; xxix. 29). On two other occasions it is applied to Hanani (2 Chr. xvi. 7, 10). Once it is used by Isaiah (Is. xxx. 10) with no reference

care of the imperial revenues in Asia (*rex familiaris principis in Asia impositi*).

<sup>b</sup> Unless the ἀκουστήριον (A. V. "place of hearing" was the great stadium mentioned by Josephus (*B. J.* ii. 9, § 2).

so any particular person. It was superseded in general use by the word *nābi*, which Samuel (himself entitled *nābi* as well as *roēh*, 1 Sam. iii. 20; 2 Chr. xxxv. 18) appears to have revived after a period of desuetude (1 Sam. ix. 9), and to have applied to the prophets organized by him.<sup>a</sup> The verb

נָבִיא, from which it is derived, is the common prose word signifying "to see": נָבִיא — whence the substantive נָבִיא, *chozeh*, is derived — is more poetical. *Chozeh* is rarely found except in the books of the Chronicles, but נָבִיא is the word constantly used for the prophetic vision. It is found in the Pentateuch, in Samuel, in the Chronicles, in Job, and in most of the prophets.

Whether there is any difference in the usage of these three words, and, if any, what that difference is, has been much debated (see Witsius, *Miscell. Sacra*, i. 1, § 19; Carpzovius, *Introd. ad Libros Canon. V. T.* iii. 1, § 2; Winer, *Real-Wörterbuch*, art. "Propheten"). Hävernäck (*Einleitung*, Th. i.; *Abth. v. s.* 56) considers *nābi* to express the title of those who officially belonged to the prophetic order, while *roēh* and *chozeh* denote those who received a prophetic revelation. Dr. Lee (*Inspiration of Holy Scripture*, p. 543), agrees with Hävernäck in his explanation of *nābi*, but he identifies *roēh* in meaning rather with *nābi* than with *chozeh*. He further throws out a suggestion that *chozeh* is the special designation of the prophet attached to the royal household. In 2 Sam. xxiv. 11, Gad is described as "the prophet (*nābi*) Gad, David's seer (*chozeh*);" and elsewhere he is called "David's seer (*chozeh*)" (1 Chr. xxi. 9), "the king's seer (*chozeh*)" (2 Chr. xxix. 25). "The case of Gad," Dr. Lee thinks, "affords the clew to the difficulty, as it clearly indicates that attached to the royal establishment there was usually an individual styled 'the king's seer,' who might at the same time be a *nābi*." The suggestion is ingenious (see, in addition to places quoted above, 1 Chr. xxv. 5, xxix. 29; 2 Chr. xxix. 30, xxxv. 15), but it was only David (possibly also Manasseh, 2 Chr. xxxiii. 18) who, so far as we read, had this seer attached to his person: and in any case there is nothing in the word *chozeh* to denote the relation of the prophet to the king, but only in the connection in which it stands with the word king. On the whole it would seem that the same persons are designated by the three words *nābi*, *roēh*, and *chozeh*: the last two titles being derived from the prophets' power of seeing the visions presented to them by

God, the first from their function of revealing and proclaiming God's truth to men. When Gregory Naz. (*Or.* 28) calls Ezekiel *ὁ τῶν μεγάλων ἐπόπτης καὶ ἐξηγητὴς μυστηρίων*, he gives a sufficiently exact translation of the two titles *chozeh* or *roēh*, and *nābi*.

The word *Nābi* is uniformly translated in the LXX. by *προφήτης*, and in the A. V. by "prophet." In classical Greek *προφήτης* signifies one who speaks for another, specially one who speaks for a god and so interprets his will to man (Liddell & Scott, s. v.). Hence its essential meaning is "an interpreter." Thus Apollo is a *προφήτης* as being the interpreter of Zeus (*Æsch. Eum.* 19). Poets are the Prophets of the Muses, as being their interpreters (*Plat. Phædr.* 262 D). The *προφήται* attached to heathen temples are so named from their interpreting the oracles delivered by the inspired and unconscious *μάντις* (*Plat. Tim.* 72 B; Herod. vii. 111, *note*, ed. Bahr). We have Plato's authority for deriving *μάντις* from *μαίνομαι* (l. c.). The use of the word *προφήτης* in its modern sense is post-classical, and is derived from the LXX.

From the mediæval use of the word *προφητεία*, *prophecy* passed into the English language in the sense of *prediction*, and this sense it has retained as its popular meaning (see Richardson, s. v.). The larger sense of *interpretation* has not, however, been lost. Thus we find in Bacon, "An exercise commonly called *prophesying*, which was this: that the ministers within a precinct did meet upon a week day in some principal town, where there was some ancient grave minister that was president, and an auditory admitted of gentlemen or other persons of leisure. Then every minister successively, beginning with the youngest, did handle one and the same part of Scripture, spending severally some quarter of an hour or better, and in the whole some two hours. And so the exercise being begun and concluded with prayer, and the president giving a text for the next meeting, the assembly was dissolved" (*Pacification of the Church*). This meaning of the word is made further familiar to us by the title of Jeremy Taylor's treatise "On Liberty of Prophesying." Nor was there any risk of the title of a book published in our own days, "On the Prophetic Office of the Church" (*Oxf.* 1838), being misunderstood. In fact the English word prophet, like the word inspiration, has always been used in a larger and in a closer sense. In the larger sense our Lord Jesus Christ is a "prophet," Moses is a "prophet," Mahomet is a "prophet." The expression means that they proclaimed and

<sup>a</sup> In 1 Sam. ix. 9 we read, "He that is now called a prophet (*nābi*) was beforetime called a seer (*roēh*);" from whence Dr. Stanley (*Lect. on Jewish Church*) has concluded that *roēh* was "the oldest designation of the prophetic office," "superseded by *nābi* shortly after Samuel's time, when *nābi* first came into use" (*Lect.* xviii., xix.). This seems opposed to the fact that *nābi* is the word commonly used in the Pentateuch, whereas *roēh* does not appear until the days of Samuel. The passage in the book of Samuel is clearly a parenthetical insertion, perhaps made by the *nābi* Nathan (or whoever was the original author of the book), perhaps added at a later date, with the view of explaining how it was that Samuel bore the title of *roēh*. Instead of the now usual appellation of *nābi*. To the writer the days of Samuel were "beforetime," and he explains that in those ancient days, that is the days of Samuel, the word used for prophet was *roēh*, not *nābi*. But that does not imply that *roēh* was

the primitive word, and that *nābi* first came into use subsequently to Samuel (see Hengstenberg, *Beiträge zur Einleitung ins A. T.* iii. 335). Dr. Stanley represents *chozeh* as "another antique title." But on no sufficient grounds. *Chozeh* is first found in 2 Sam. xxiv. 11; so that it does not seem to have come into use until *roēh* had almost disappeared. It is also found in the books of Kings (2 K. xvii. 13) and Chronicles (frequently), in Amos (vii. 12), Isaiah (xxix. 10), Micah (iii. 7), and the derivatives of the verb *chāzāh* are used by the prophets to designate their visions down to the Captivity (cf. Is. i. 1; Dau. vii. 1; Zech. xiii. 4). The derivatives of *rā'āh* are rarer, and, as being prose words, are chiefly used by Daniel (cf. Ea. i. 1; Dan. x. 7). On examination we find that *nābi* existed before and after and alongside of both *roēh* and *chozeh*, but that *chozeh* was somewhat more modern than *roēh*.

published a new religious dispensation. I. a similar though not identical sense, the Church is said to have a "prophetic," i. e. an expository and interpretative office. But in its closer sense the word, according to usage though not according to etymology, involves the idea of foresight. And this is and always has been its more usual acceptation.<sup>a</sup> The different meanings, or shades of meaning, in which the abstract noun is employed in Scripture, have been drawn out by Locke as follows: "Prophecy comprehends three things: prediction; singing by the dictate of the Spirit; and understanding and explaining the mysterious, hidden sense of Scripture, by an immediate illumination and motion of the Spirit" (*Paraphrase of 1 Cor. xii.* note, p. 121, Lond. 1742). It is in virtue of this last signification of the word, that the prophets of the N. T. are so called (1 Cor. xii.): by virtue of the second, that the sons of Asaph, etc. are said to have "prophesied with a harp" (1 Chr. xxv. 3), and Miriam and Deborah are termed "prophetesses." That the idea of potential if not actual prediction enters into the conception expressed by the word prophecy, when that word is used to designate the function of the Hebrew prophets, seems to be proved by the following passages of Scripture, Deut. xviii. 22; Jer. xxviii. 9; Acts ii. 30, iii. 18, 21; 1 Pet. i. 10; 2 Pet. i. 19, 20, iii. 2. Etymologically, however, it is certain that neither prescience nor prediction are implied by the term used in the Hebrew, Greek, or English language.

II. PROPHETICAL ORDER. — The sacerdotal order was originally the instrument by which the members of the Jewish Theocracy were taught and governed in things spiritual. Feast and fast, sacrifice and offering, rite and ceremony, constituted a varied and ever-recurring system of training and teaching by type and symbol. To the priests, too, was intrusted the work of "teaching the children of Israel all the statutes which the Lord hath spoken unto them by the hand of Moses" (Lev. x. 11). Teaching by act and teaching by word were alike their task. This task they adequately fulfilled for some hundred or more years after the giving of the Law at Mount Sinai. But during the time of the Judges, the priesthood sank into a state of degeneracy, and the people were no longer affected by the acted lessons of the ceremonial service. They required less enigmatical warnings and exhortations. Under these circumstances a new moral power was evoked — the Prophetic Order. Samuel, himself a Levite, of the family of Kohath (1 Chr. vi. 28), and

<sup>a</sup> It seems to be incorrect to say that the English word was "originally" used in the wider sense of "preaching," and that it became "limited" to the meaning of "predicting," in the seventeenth century, in consequence of "an etymological mistake" (Stanley, *Lect. xix., xx.*). The word entered into the English language in its sense of predicting. It could not have been otherwise, for at the time of the formation of the English language, the word *προφητεία* had, by usage, assumed popularly the meaning of prediction. And we find it ordinarily employed, by early as well as by late writers, in this sense (see Polydore Virgil, *History of England*, iv. 161, Camden ed. 1846; *Coventry Mysteries*, p. 65, Shakespeare Soc. ed., 1841, and Richardson, s. c.). It is probable that the meaning was "limited" to "prediction" as much and as little before the seventeenth century as it has been since.

<sup>b</sup> Dr. Stanley (*Lect. xviii.*) declares it to be "doubtful if he was of Levitical descent, and certain that he

almost certainly a priest,<sup>b</sup> was the instrument used at once for effecting a reform in the sacerdotal order (1 Chr. ix. 22), and for giving to the prophets a position of importance which they had never before held. So important was the work wrought by him, that he is classed in Holy Scripture with Moses (Jer. xv. 1; Ps. xcix. 6; Acts iii. 24), Samuel being the great religious reformer and organizer of the prophetic order, as Moses was the great legislator and founder of the priestly rule. Nevertheless, it is not to be supposed that Samuel created the prophetic order as a new thing before unknown. The germs both of the prophetic and of the regal order are found in the Law as given to the Israelites by Moses (Deut. xiii. 1, xviii. 20, xvii. 18), but they were not yet developed, because there was not yet the demand for them. Samuel, who evolved the one, himself saw the evolution of the other. The title of prophet is found before the legislation of Mount Sinai. When Abraham is called a prophet (Gen. xx. 7), it is probably in the sense of a friend of God, to whom He makes known His will; and in the same sense the name seems to be applied to the patriarchs in general (Ps. cv. 15).<sup>c</sup> Moses is more specifically a prophet, as being a proclaimer of a new dispensation, a revealer of God's will, and in virtue of his divinely inspired songs (Ex. xv.; Deut. xxxii., xxxiii.; Ps. xc.), but his main work was not prophetic, and he is therefore formally distinguished from prophets (Num. xii. 6) as well as classed with them (Deut. xviii. 15, xxxiv. 10). Aaron is the prophet of Moses (Ex. vii. 1); Miriam (Ex. xv. 20) is a prophetess; and we find the prophetic gift in the elders who "prophesied" when "the Spirit of the Lord rested upon them," and in Eldad and Medad, who "prophesied in the camp" (Num. xi. 27). At the time of the sedition of Miriam, the possible existence of prophets is recognized (Num. xii. 6). In the days of the Judges we find that Deborah (Judg. iv. 4) is a prophetess; a prophet (Judg. vi. 8) rebukes and exhorts the Israelites when oppressed by the Midianites; and, in Samuel's childhood, "a man of God" predicts to Eli the death of his two sons, and the curse that was to fall on his descendants (1 Sam. ii. 27).

Samuel took measures to make his work of restoration permanent as well as effective for the moment. For this purpose he instituted Companies, or Colleges of Prophets. One we find in his lifetime at Ramah (1 Sam. xix. 20); others afterwards at Bethel (2 K. ii. 3), Jericho (2 K. ii. 5), Gilgal (2 K. iv. 38), and elsewhere (2 K. vi. 1).

was not a priest." If the record of 1 Chr. vi. 28 is correct, it is certain that he was a Levite by descent though an Ephraimite by habitation (1 Sam. i. 1). There is every probability that he was a priest (cf. 1 Sam. i. 22, ii. 11, 18, vii. 5, 17, x. 1, xiii. 11) and no presumption to the contrary. The fact on which Dr Stanley relies, that Samuel lived "not at Gibeon or at Nob but at Ramah," and that "the prophetic schools were at Ramah, and at Bethel, and at Gilgal, not at Hebron and Anathoth," does not suffice to raise a presumption. As judge, Samuel would have lived where it was most suitable for the judge to dwell. Of the three colleges, that at Ramah was alone founded by Samuel, of course where he lived himself, and even where Ramah was we do not know: one of the latest hypotheses places it two miles from Hebron.

<sup>c</sup> According to Hengstenberg's view of prophecy Abraham was a prophet because he received revelations by the means of dream and vision (Gen. xv. 12)

Their constitution and object were similar to those of Theological Colleges. Into them were gathered promising students, and here they were trained for the office which they were afterwards destined to fulfill. So successful were these institutions, that from the time of Samuel to the closing of the Canon of the Old Testament, there seems never to have been wanting a due supply of men to keep up the line of official prophets.<sup>a</sup> The apocryphal books of the Maccabees (t. iv. 46, ix. 27, xiv. 41) and of Ecclesiastics (xxxvi. 15) represent them as extinct. The colleges appear to have consisted of students differing in number. Sometimes they were very numerous (1 K. xviii. 4, xxii. 6; 2 K. ii. 16). One elderly, or leading prophet, presided over them (1 Sam. xix. 20), called their Father (1 Sam. x. 12), or Master (2 K. ii. 3), who was apparently admitted to his office by the ceremony of anointing (1 K. xix. 16; Is. lxi. 1; Ps. cv. 15). They were called his sons. Their chief subject of study was, no doubt, the Law and its interpretation; oral, as distinct from symbolical, teaching being henceforward tacitly transferred from the priestly to the prophetic order.<sup>b</sup> Subsidiary subjects of instruction were music and sacred poetry, both of which had been connected with prophecy from the time of Moses (Ex. xv. 20) and the Judges (Judg. iv. 4, v. 1). The prophets that meet Saul "came down from the high place with a psaltery and a tabret, and a pipe and a harp before them" (1 Sam. x. 5). Elisha calls a minstrel to evoke the prophetic gift in himself (2 K. iii. 15). David "compares to the service of the sons of Asaph and of Heman and of Jeduthun, who should prophesy with harps and with psalteries and with cymbals. . . . All these were under the hands of their father for song in the house of the Lord with cymbals, psalteries, and harps for the service of the house of God" (1 Chr. xxv. 6). Hymns, or sacred songs, are found in the books of Jonah (ii. 2), Isaiah (xii. 1, xxvi. 1), Habakkuk (iii. 2). And it was probably the duty of the prophetic students to compose verses to be sung in the Temple. (See Lowth, *Sacred Poetry of the Hebrews*, Lect. xviii.) Having been themselves trained and taught, the prophets, whether still residing within their college, or having left its precincts, had the task of teaching others. From the question addressed to the Shunammite by her husband, "Wherefore wilt thou go to him to-day? It is neither new moon nor Sabbath" (2 K. iv. 23), it appears that weekly and monthly religious meetings were held as an ordinary practice by the prophets (see Patrick, *Comm. in loc.*). Thus we find that "Elisha sat in his house," engaged in his official occupation (cf. Ez. viii. 1, xiv. 1, xx. 1), "and the elders sat with him" (2 K. vi. 32), when the King of Israel sent to slay him. It was at these meetings, probably, that many of the warnings and exhortations on morality and spiritual

religion were addressed by the prophets to their countrymen. The general appearance and life of the prophet were very similar to those of the Eastern dervish at the present day. His dress was a hairy garment, girt with a leathern girdle (Is. xx. 2; Zech. xiii. 4; Matt. iii. 4). He was married or unmarried as he chose; but his manner of life and diet were stern and austere (2 K. iv. 10, 38; 1 K. xix. 6; Matt. iii. 4).

III. THE PROPHETIC GIFT. — We have been speaking of the *Prophetic Order*. To belong to the prophetic order and to possess the prophetic gift are not convertible terms. There might be members of the prophetic order to whom the gift of prophecy was not vouchsafed. There might be inspired prophets, who did not belong to the prophetic order. Generally, the inspired prophet came from the College of the Prophets, and belonged to the prophetic order; but this was not always the case. In the instance of the Prophet Amos, the rule and the exception are both manifested. When Amaziah, the idolatrous Israelitish priest, threatens the prophet, and desires him to "flee away into the land of Judah, and there eat bread and prophesy there, but not to prophesy again any more at Bethel," Amos in reply says, "I was no prophet, neither was I a prophet's son; but I was an herdsman, and a gatherer of sycamore fruit; and the Lord took me as I followed the flock, and the Lord said unto me, Go prophesy unto my people Israel" (vii. 14). That is, though called to the prophetic office, he did not belong to the prophetic order, and had not been trained in the prophetic colleges; and this, he indicates, was an unusual occurrence. (See J. Smith on *Prophecy*, c. ix.)

The sixteen prophets whose books are in the Canon have therefore that place of honor, because they were endowed with the *prophetic gift* as well as ordinarily (so far as we know) belonging to the *prophetic order*. There were hundreds of prophets contemporary with each of these sixteen prophets; and no doubt numberless compositions in sacred poetry and numberless moral exhortations were issued from the several schools, but only sixteen books find their place in the Canon. Why is this? Because these sixteen had what their brother-colleagues had not, the Divine call to the office of prophet, and the Divine illumination to enlighten them. It was not sufficient to have been taught and trained in preparation for a future call. Teaching and training served as a preparation only. When the schoolmaster's work was done, then, if the instrument was worthy, God's work began. Moses had an external call at the burning bush (Ex. iii. 2). The Lord called Samuel, so that Eli perceived, and Samuel learned, that it was the Lord who called him (1 Sam. iii. 10). Isaiah (vi. 8), Jeremiah (i. 5), Ezekiel (ii. 4), Amos (vii. 15),

<sup>a</sup> There seems no sufficient ground for the common statement that, after the schism, the colleges existed only in the Israelitish kingdom, or for Knobel's supposition that they ceased with Elisha (*Prophetism*, ii. 39), nor again for Bishop Lowth's statement that "they existed from the earliest times of the Hebrew republic" (*Sacred Poetry*, Lect. xviii.), or for M. Nicolas' assertion that their previous establishment can be inferred from 1 Sam. viii., ix., x. (*Etudes critiques sur la Bible*, p. 365). We have, however, no actual proof of their existence except in the days of Samuel and of Elijah and Elisha.

<sup>b</sup> It is a vulgar error respecting Jewish history to suppose that there was an antagonism between the prophets and the priests. There is not a trace of such antagonism. Isaiah may denounce a wicked hierarchy (i. 10), but it is because it is wicked, not because it is a hierarchy. Malachi "sharply reproves" the priests (ii. 1), but it is in order to support the priesthood (cf. i. 14). Mr. F. W. Newman even designates Ezekiel's writings as "hard sacerdotalism," "tedious and unedifying as Leviticus itself" (*Hebr. Monarch*, p. 560). The Prophetic Order was, in truth, supplemental, not antagonistic to the Sacerdotal.

declare their special mission. Nor was it sufficient for this call to have been made once for all. Each prophetic utterance is the result of a communication of the Divine to the human spirit, received either by "vision" (Is. vi. 1) or by "the word of the Lord" (Jer. ii. 1). (See *Aids to Faith*, Essay iii., "On Prophecy.") What then are the characteristics of the sixteen prophets, thus called and commissioned, and entrusted with the messages of God to his people?

(1.) They were the national poets of Judæa. We have already shown that music and poetry, chants and hymns, were a main part of the studies of the class from which, generally speaking, they were derived. As is natural, we find not only the songs previously specified, but the rest of their compositions, poetical or breathing the spirit of poetry.<sup>a</sup>

(2.) They were annalists and historians. A great portion of Isaiah, of Jeremiah, of Daniel, of Jonah, of Haggai, is direct or indirect history.

(3.) They were preachers of patriotism; their patriotism being founded on the religious motive. To the subject of the Theocracy, the enemy of his nation was the enemy of God, the traitor to the public weal was a traitor to his God; a denunciation of an enemy was a denunciation of a representative of evil, an exhortation in behalf of Jerusalem was an exhortation in behalf of God's Kingdom on earth, "the city of our God, the mountain of holiness, beautiful for situation, the joy of the whole earth, the city of the great King" (Ps. lxxiii. 1, 2).

(4.) They were preachers of morals and of spiritual religion. The symbolical teaching of the Law had lost much of its effect. Instead of learning the necessity of purity by the legal washings, the majority came to rest in the outward act as in itself sufficient. It was the work, then, of the prophets to hold up before the eyes of their countrymen a high and pure morality, not veiled in symbols and acts, but such as none could profess to misunderstand. Thus, in his first chapter, Isaiah contrasts ceremonial observances with spiritual morality: "Your new moons and your appointed feasts my soul hateth: they are a trouble to me; I am weary to bear them. . . . Wash you, make you clean; put away the evil of your doings from before mine eyes; cease to do evil; learn to do well; seek judgment; relieve the oppressed, judge the fatherless, plead for the widow" (i. 14-17). He proceeds to denounce God's judgments on the oppression and covetous-

ness of the rulers, the pride of the women (s. iii.) on grasping, profligacy, iniquity, injustice (s. v.) and so on throughout. The system of morals put forward by the prophets, if not higher, or sterner, or purer than that of the Law, is more plainly declared, and with greater, because now more needed, vehemence of diction.<sup>b</sup>

(5.) They were extraordinary, but yet authorized, exponents of the Law. As an instance of this, we may take Isaiah's description of a true fast (lviii. 3-7); Ezekiel's explanation of the sins of the father being visited on the children (c. xviii.); Micah's preference of "doing justly, loving mercy, and walking humbly with God," to "thousands of rams and ten thousands of rivers of oil" (vi. 6-8). In these as in other similar cases (cf. Hos. vi. 6; Amos v. 21), it was the task of the prophets to restore the balance which had been overthrown by the Jews and their teachers dwelling on one side or on the other covering of a truth or of a duty, and leaving the other side or the inner meaning out of sight.

(6.) They held, as we have shown above, a pastoral or quasi-pastoral office.

(7.) They were a political power in the state. Strong in the safeguard of their religious character, they were able to serve as a counterpoise to the royal authority when wielded even by an Ahab.

(8.) But the prophets were something more than national poets and annalists, preachers of patriotism, moral teachers, exponents of the Law, pastors, and politicians. We have not yet touched upon their most essential characteristic, which is, that they were instruments of revealing God's will to man, as in other ways, so, specially, by predicting future events, and, in particular, by foretelling the incarnation of the Lord Jesus Christ, and the redemption effected by Him.<sup>c</sup> There are two chief ways of exhibiting this fact: one is suitable when discoursing with Christians, the other when arguing with unbelievers. To the Christian it is enough to show that the truth of the New Testament and the truthfulness of its authors, and of the Lord Himself, are bound up with the truth of the existence of this predictive element in the prophets. To the unbeliever it is necessary to show that facts have verified their predictions.

(a.) In St. Matthew's Gospel, the first chapter, we find a quotation from the prophet Isaiah, "Behold a virgin shall be with child, and shall bring forth a son, and they shall call his name Em-

<sup>a</sup> Bishop Lowth "esteems the whole book of Isaiah poetical, a few passages exempted, which, if brought together, would not at most exceed the bulk of five or six chapters," "half of the book of Jeremiah," "the greater part of Ezekiel." The rest of the prophets are mainly poetical, but Haggai is "prosaic," and Jonah and Daniel are plain prose (*Sacred Poetry*, Lect. xxi.).

<sup>b</sup> "Magna fides et grandis audacia Prophetarum," says St. Jerome (*in Ezek.*). This was their general characteristic, but that gifts and graces might be discovered, is proved by the cases of Balaam, Jonah, Caiaphas, and the disobedient prophet of Judah.

<sup>c</sup> Dr. Davidson pronounces it as "now commonly admitted that the essential part of Biblical prophecy does not lie in predicting contingent events, but in living the essentially religious in the course of history. . . . In no prophecy can it be shown that the literal predicting of distant historical events is maintained. . . . In conformity with the analogy

of prophecy generally, special predictions concerning Christ do not appear in the Old Testament." Dr. Davidson must mean that this is "now commonly admitted" by writers like himself, who, following Eichhorn, resolve "the prophet's delineations of the future" into "in essence nothing but forebodings — efforts of the spiritual eye to bring up before itself the distinct form of the future. The prevision of the prophet is intensified presentment." Of course, if the powers of the prophets were simply "forebodings" and "presentments" of the human spirit in "its preconscious region," they could not do more than make indefinite guesses about the future. But this is not the Jewish nor the Christian theory of prophecy. See S. Basil (*in Esai.* iii.), S. Chrys. (*Hom.* xxii. t. v. 137, ed. 1612), Clem. Alex. (*Strom.* i. ii.), Euseb. (*Dem. Evang.* v. 132, ed. 1644), and Justin Martyr (*Dial. cum Tryph.* p. 224, ed. 1636). (See Suicer, s. v. προφήτης.)

manuel;" and, at the same time, we find a statement that the birth of Christ took place as it did "that it might be fulfilled which was spoken of the Lord by the prophet," in those words (i. 22, 23). This means that the prophecy was the declaration of God's purpose, and that the circumstances of the birth of Christ were the fulfillment of that purpose. Then, either the predictive element exists in the book of the Prophet Isaiah, or the authority of the Evangelist St. Matthew must be given up. The same evangelist testifies to the same prophet having "spoken of" John the Baptist (iii. 3) in words which he quotes from Is. xl. 3. He says (iv. 13-15) that Jesus came and dwelt in Capernaum, "that" other words "spoken by" the same prophet (ix. 1) "might be fulfilled." He says (viii. 17) that Jesus did certain acts, "that it might be fulfilled which was spoken by Esaias the prophet" (Is. liii. 4). He says (xii. 17) that Jesus acted in a particular manner, "that it might be fulfilled which was spoken by Esaias the prophet" in words quoted from chap. xlii. 1. Then, if we believe St. Matthew, we must believe that in the pages of the Prophet Isaiah there was predicted that which Jesus some seven hundred years afterwards fulfilled.<sup>a</sup> But, further, we have not only the evidence of the Evangelist; we have the evidence of the Lord Himself. He declares (Matt. xiii. 14) that in the Jews of his age "is fulfilled the prophecy of Esaias, which saith—" (Is. vi. 9). He says (Matt. xv. 7) "Esaias well prophesied of them" (Is. xxix. 13). Then, if we believe our Lord's sayings and the record of them, we must believe in prediction as existing in the Prophet Isaiah. This prophet, who is cited between fifty and sixty times, may be taken as a sample; but the same argument might be brought forward with respect to Jeremiah (Matt. ii. 18; Heb. viii. 8), Daniel (Matt. xxiv. 15), Hosea (Matt. ii. 15; Rom. ix. 25), Joel (Acts ii. 17), Amos (Acts vii. 42; xv. 16), Jonah (Matt. xii. 40), Micah (Matt. xii. 7), Habakkuk (Acts xiii. 41), Haggai (Heb. xii. 26), Zechariah (Matt. xxi. 5; Mark xiv. 27; John xix. 37), Malachi (Matt. xi. 10; Mark i. 2; Luke vii. 27). With this evidence for so many of the prophets, it would be idle to cavil with respect to Ezekiel, Obadiah, Nahum, Zephaniah; the more, as "the prophets" are frequently spoken of together (Matt. ii. 23; Acts xiii. 40, xv. 15) as authoritative. The Psalms are quoted no less than seventy times, and very frequently as being predictive.

(B.) The argument with the unbeliever does not admit of being brought to an issue so concisely. Here it is necessary (1) to point out the existence of certain declarations as to future events, the probability of which was not discernible by human sagacity at the time that the declarations were made; (2) to show that certain events did afterwards take place corresponding with these declarations; (3) to show that a chance coincidence is not an adequate hypothesis on which to account for that correspondence.

<sup>a</sup> This conclusion cannot be escaped by pressing the words *ἵνα πληρωθῆ*, for if they do not mean that certain things were done in order that the Divine predestination might be accomplished, which predestination was already declared by the prophet, they must mean that Jesus Christ knowingly moulded his acts so as to be in accordance with what was said in an ancient book which in reality had no reference to him, a thing which is entirely at variance with the character

Davison, in his valuable *Discourses on Prophecy* fixes a "Criterion of Prophecy," and in accordance with it he describes "the conditions which would confer eogeny of evidence on single examples of prophecy;" in the following manner first, "the known promulgation of the prophecy prior to the event; secondly, the clear and palpable fulfillment of it; lastly, the nature of the event itself, if, when the prediction of it was given, it lay remote from human view, and was such as could not be foreseen by any supposable effort of reason, or be deduced upon principles of calculation derived from probability and experience" (*Disc. viii. 378*). Applying his test, the learned writer finds that the establishment of the Christian Religion and the person of its Founder were predicted when neither reason nor experience could have anticipated them; and that the predictions respecting them have been clearly fulfilled in history. Here, then, is an adequate proof of an inspired prescience in the prophets who predicted these things. He applies his test to the prophecies recorded of the Jewish people, and their actual state, to the prediction of the great apostasy and to the actual state of corrupted Christianity, and finally to the prophecies relating to Nineveh, Babylon, Tyre, Egypt, the Ishmaelites, and the Four Empires, and to the events which have befallen them; and in each of these cases he finds proof of the existence of the predictive element in the prophets.

In the book of Kings we find Micaiah the son of Imlah uttering a challenge, by which his predictive powers were to be judged. He had pronounced, by the word of the Lord, that Ahab should fall at Ramoth-Gilead. Ahab, in return, commanded him to be shut up in prison until he came back in peace. "And Micaiah said, If thou return at all in peace" (that is, if the event does not verify my words), "the Lord hath not spoken by me" (that is, I am no prophet capable of predicting the future) (1 K. xxii. 28). The test is sound as a negative test, and so it is laid down in the Law (Deut. xviii. 22); but as a positive test it would not be sufficient. Ahab's death at Ramoth-Gilead did not prove Micaiah's predictive powers, though his escape would have disproved them. But here we must notice a very important difference between single prophecies and a series of prophecy. The fulfillment of a single prophecy does not prove the prophetic power of the prophet, but the fulfillment of a long series of prophecies by a series or number of events does in itself constitute a proof that the prophecies were intended to predict the events, and, consequently, that predictive power resided in the prophet or prophets. We may see this in the so far parallel cases of satirical writings. We know for certain that Aristophanes refers to Cleon, Pericles, Nicias (and we should be equally sure of it were his satire more concealed than it is) simply from the fact of a number of satirical hits converging together on

drawn of him by St. Matthew, and which would make him a conscious impostor, inasmuch as he himself appeals to the prophecies. Further, it would imply (as in Matt. i. 22) that God Himself contrived certain events (as those connected with the birth of Christ), not in order that they might be in accordance with his will, but in order that they might be agreeable to the declarations of a certain book—than which nothing could well be more absurd

the object of his satire. One, two, or three strokes might be intended for more persons than one, but the addition of each stroke makes the aim more apparent, and when we have a sufficient number before us we can no longer possibly doubt his design. The same may be said of fables, and still more of allegories. The fact of a *complicated* lock being opened by a key shows that the lock and key were meant for each other. Now the Messianic picture drawn by the prophets as a body contains at least as many traits as these:—That salvation should come through the family of Abraham, Isaac, Jacob, Judah, David: that at the time of the final absorption of the Jewish power, Shiloh (the tranquillizer) should gather the nations under his rule: that there should be a great Prophet, typified by Moses; a King descended from David; a Priest forever, typified by Melchisedek: that there should be born into the world a child to be called Mighty God, Eternal Father, Prince of Peace: that there should be a Righteous Servant of God on whom the Lord would lay the iniquity of all: that Messiah the Prince should be cut off, but not for himself: that an everlasting kingdom should be given by the Ancient of Days to one like the Son of Man. It seems impossible to harmonize so many apparent contradictions. Nevertheless it is an undoubted fact that, at the time seemingly pointed out by one or more of these predictions, there was born into the world a child of the house of David, and therefore of the family of Abraham, Isaac, Jacob, and Judah, who claimed to be the object of these and other predictions; who is acknowledged as Prophet, Priest, and King, as Mighty God, and yet as God's Righteous Servant who bears the iniquity of all; who was cut off, and whose death is acknowledged not to have been for his own, but for others' good; who has instituted a spiritual kingdom on earth, which kingdom is of a nature to continue forever, if there is any continuance beyond this world and this life; and in whose doings and sufferings on earth a number of specific predictions were minutely fulfilled. Then we may say that we have here a series of prophecies which are so applicable to the person and earthly life of Jesus Christ as to be thereby shown to have been designed to apply to Him. And if they were designed to apply to Him, prophetic prediction is proved.

Objections have been urged:—1. *Vagueness*.—It has been said that the prophecies are too darkly and vaguely worded to be proved predictive by the events which they are alleged to foretell. This objection is stated with clearness and force by Ammon. He says, "Such simple sentences as the following: Israel has not to expect a king, but a teacher: this teacher will be born at Bethlehem during the reign of Herod; he will lay down his life under Tiberius, in attestation of the truth of his religion; through the destruction of Jerusalem, and the complete extinction of the Jewish state, he will spread his doctrine in every quarter of the world—a few sentences like these, expressed in plain historical prose, would not only bear the character of true predictions, but, when once their genuineness was proved, they would be of incomparably greater worth to us than all the oracles of the Old Testament taken together" (*Christology*, p. 12). But to this it might be answered, and has been in effect answered by Hengstenberg—1. That God never forces men to believe, but that there is such an union of definiteness and vague-

ness in the prophecies as to enable those who are willing to discover the truth, while the willfully blind are not forcibly constrained to see it. 2. That, had the prophecies been couched in the form of direct declarations, their fulfillment would have thereby been rendered impossible, or, at least, capable of frustration. 3. That the effect of prophecy (e. g. with reference to the time of the Messiah's coming) would have been far less beneficial to believers, as being less adapted to keep them in a state of constant expectation. 4. That the Messiah of Revelation could not be so clearly portrayed in his varied character as God and Man, as Prophet, Priest, and King, if he had been the mere "teacher" which is all that Ammon acknowledges him to be. 5. That the state of the Prophets, at the time of receiving the Divine revelation, was (as we shall presently show) such as necessarily to make their predictions fragmentary, figurative, and abstracted from the relations of time. 6. That some portions of the prophecies were intended to be of double application, and some portions to be understood only on their fulfillment (cf. John xiv. 29; Ez. xxxvi. 33).

2. *Obscurity of a part or parts of a prophecy otherwise clear*.—The objection drawn from "the unintelligibility of one part of a prophecy, as invalidating the proof of foresight arising from the evident completion of those parts which are understood" is akin to that drawn from the *vagueness* of the whole of it. And it may be answered with the same arguments, to which we may add the consideration urged by Butler that it is, for the argument in hand, the same as if the parts not understood were written in cipher or not written at all: "Suppose a writing, partly in cipher and partly in plain words at length; and that in the part one understood there appeared mention of several known facts—it would never come into any man's thought to imagine that if he understood the whole, perhaps he might find that these facts were not in reality known by the writer" (*Analogy*, pt. ii. c. vii.). Furthermore, if it be true that prophecies relating to the first coming of the Messiah refer also to his second coming, some part of those prophecies must necessarily be as yet not fully understood.

It would appear from these considerations that Davison's second "condition," above quoted, "the clear and palpable fulfillment of the prophecy," should be so far modified as to take into account the necessary difficulty, more or less great, in recognizing the fulfillment of a prophecy which results from the necessary vagueness and obscurity of the prophecy itself.

3. *Application of the several prophecies to a more immediate subject*.—It has been the task of many Biblical critics to examine the different passages which are alleged to be predictions of Christ, and to show that they were delivered in reference to some person or thing contemporary with, or shortly subsequent to, the time of the writer. The conclusion is then drawn, sometimes scornfully, sometimes as an inference not to be resisted, that the passages in question have nothing to do with the Messiah. We have here to distinguish carefully between the conclusion proved, and the corollary drawn from it. Let it be granted that it may be proved of all the predictions of the Messiah—it certainly may be proved of many—that they primarily apply to some historical and present fact: in that case a certain law, under which God

vouchsafes his prophetic revelations, is discovered; but there is no semblance of disproof of the further Messianic interpretation of the passages under consideration. That some such law does exist has been argued at length by Mr. Davison. He believes, however, that "it obtains only in some of the more distinguished monuments of prophecy," such as the prophecies founded on, and having primary reference to, the kingdom of David, the restoration of the Jews, the destruction of Jerusalem (*On Prophecy*, Disc. v.). Dr. Lee thinks that Davison "exhibits too great reserve in the application of this important principle" (*On Inspiration*, Lect. iv.). He considers it to be of universal application; and upon it he founds the doctrine of the "double sense of prophecy," according to which a prediction is fulfilled in two or even more distinct but analogous subjects: first in type, then in antitype; and after that perhaps awaits a still further and more complete fulfillment. This view of the fulfillment of prophecy seems necessary for the explanation of our Lord's prediction on the mount, relating at once to the fall of Jerusalem and to the end of the Christian dispensation. It is on this principle that Pearson writes: "Many are the prophecies which concern Him, many the promises which are made of Him; but yet some of them very obscure. . . . Whosoever He is spoken of as the Anointed, it may well be first understood of some other person; except one place in Daniel, where Messiah is foretold 'to be cut off'" (*On the Creed*, Art. II.).

Whether it can be proved by an investigation of Holy Scripture, that this relation between Divine announcements for the future and certain present events does so exist as to constitute a law, and whether, if the law is proved to exist, it is of universal, or only of partial application, we do not pause to determine. But it is manifest that the existence of a primary sense cannot exclude the possibility of a secondary sense. The question, therefore, really is, whether the prophecies are applicable to Christ: if they are so applicable, the previous application of each of them to some historical event would not invalidate the proof that they were designed as a whole to find their full completion in Him. Nay, even if it could be shown that the prophets had in their thoughts nothing beyond the primary completion of their words (a thing which we at present leave undetermined), no inference could thence be drawn against their secondary application; for such an inference would assume, what no believer in inspiration will grant, viz., that the prophets are the sole authors of their prophecies. The rule, *Nihil in scripto quod non prius in scriptore*, is sound; but, the question is, who is to be regarded as the true author of the prophecies — the human instrument or the Divine Author? (See Hengstenberg, *Christology*, Appendix VI., p. 433.)

4. *Miraculous character.* — It is probable that his lies at the root of the many and various efforts made to disprove the predictive power of the prophets. There is no question that if miracles are, either physically or morally, impossible, then

prediction is impossible; and those passages which have ever been accounted predictive, must be explained away as being vague, as being obscure, as applying only to something in the writer's lifetime, or on some other hypothesis. This is only saying that belief in prediction is not compatible with the theory of Atheism, or with the philosophy which rejects the overruling Providence of a personal God. And this is not to be denied.

IV. THE PROPHECIC STATE. — We learn from Holy Scripture that it was by the agency of the Spirit of God that the prophets received the Divine communication. Thus, on the appointment of the seventy elders, "The Lord said, I will take of the Spirit which is upon thee, and will put it upon them. . . . And the Lord . . . took of the Spirit that was upon him, and gave it unto the seventy elders; and it came to pass that when the Spirit rested upon them, they prophesied and did not cease. . . . And Moses said, Would God that all the Lord's people were prophets, and that the Lord would put his Spirit upon them" (Num. xi. 17, 25, 23). Here we see that what made the seventy prophesy, was their being endued with the Lord's Spirit by the Lord Himself. So it is the Spirit of the Lord which made Saul (1 Sam. x. 6) and his messengers (1 Sam. xix. 20) prophesy. And thus St. Peter assures us that "prophecy came not in old time by the will of man, but holy men of God spake, moved (*φερόμενοι*) by the Holy Ghost" (2 Pet. i. 21), while false prophets are described as those "who speak a vision of their own heart, and not out of the mouth of the Lord" (Jer. xxiii. 16), "who prophesy out of their own hearts, . . . who follow their own spirit, and have seen nothing" (Ez. xiii. 2, 3).<sup>a</sup> The prophet held an intermediate position in communication between God and man. God communicated with him by his Spirit, and he, having received this communication, was "the spokesman" of God to man (cf. Ex. vii. 1 and iv. 16). But the means by which the Divine Spirit communicated with the human spirit, and the conditions of the human spirit under which the Divine communications were received, have not been clearly declared to us. They are, however, indicated. On the occasion of the sedition of Miriam and Aaron, we read, "And the Lord said, Hear now my words: If there be a prophet among you, I the Lord will make myself known unto him in a vision, and will speak unto him in a dream. My servant Moses is not so, who is faithful in all mine house: with him will I speak mouth to mouth, even apparently, and not in dark speeches, and the similitude of the Lord shall he behold" (Num. xii. 6-8). Here we have an exhaustive division of the different ways in which the revelations of God are made to man. 1. Direct declaration and manifestation, "I will speak mouth to mouth, apparently, and the similitude of the Lord shall he behold." 2. Vision. 3. Dream. It is indicated that, at least at this time, the vision and the dream were the special means of conveying a revelation to a prophet, while the higher form of direct declaration and manifestation was reserved for the more highly favored Moses.<sup>b</sup> Joel's prophecy ap-

<sup>a</sup> Hence the emphatic declarations of the Great Prophet of the Church that he did not speak of Himself (John vii. 17, &c.).

<sup>b</sup> Maimonides has drawn out the points in which Moses is considered superior to all other prophets as

follows: "1. All the other prophets saw the prophecy in a dream or in a vision, but our Rabbi Moses saw it whilst awake. 2. To all the other prophets it was revealed through the medium of an angel, and therefore they saw that which they saw in an alle

pears to make the same division, "Your old men shall dream dreams, and your young men shall see visions," these being the two methods in which the promise, "your sons and your daughters shall prophesy," are to be carried out (ii. 28). And of Daniel we are told that "he had understanding in all visions and dreams" (Dan. i. 17). Can these phases of the prophetic state be distinguished from each other? and in what did they consist?

According to the theory of Philo and the Alexandrian school, the prophet was in a state of entire unconsciousness at the time that he was under the influence of Divine inspiration, "for the human understanding," says Philo, "takes its departure on the arrival of the Divine Spirit, and, on the removal of the latter, again returns to its home, for the mortal must not dwell with the immortal" (*Quis Rer. Div. Her.* t. i. p. 511). Balaam is described by him as an unconscious instrument through whom God spoke (*De Vita Moysis*, lib. I. t. ii. p. 124). Josephus makes Balaam excuse himself to Balaak on the same principle: "When the Spirit of God seizes us, It utters whatsoever sounds and words It pleases, without any knowledge on our part, . . . for when It has come into us, there is nothing in us which remains our own" (*Antiq.* iv. 8, § 5, t. i. p. 216). This theory identifies Jewish prophecy in all essential points with the heathen *ιαντική*, or divination, as distinct from *προφητεία*, or interpretation. Montanism adopted the same view: "Defendimus, in causa novæ prophetiæ, gratiæ extasin, id est amentiam, convenire. In spiritu enim homo constitutus, præsertim cum gloriam Dei conspiciat, vel cum per ipsum Deus loquitur, necesse est excidat sensu, obumbratus scilicet virtute divina, de quo inter nos et Psychicos (catholicos) quæstio est" (Tertullian, *Adv. Marcion.* iv. 22). According to the belief, then, of the heathen, of the Alexandrian Jews, and of the Montanists, the vision of the prophet was seen while he was in a state of ecstatic unconsciousness, and the enunciation of the vision was made by him in the same state. The Fathers of the Church opposed the Montanist theory with great unanimity. In Eusebius's History (v. 17) we read that Miltiades wrote a book *περὶ τοῦ μὴ δεῖν προφήτην ἐν ἐκστάσει λαλεῖν*. St. Jerome writes: "Non loquitur propheta *ἐν ἐκστάσει*, ut Montanus et Prisca Maximillaque delirant, sed quod prophetat liber est visionis intelligentis universa quæ loquitur" (*Prolog. in Nahum*). And again: "Neque vero ut Montanus cum insanis fœminis somniat, propheta in ecstasi locuti sunt ut nescierint quid loquerentur, et cum alios erudirent ipsi ignorarent quid dicerent" (*Prolog. in Esai.*). Origen (*Contr. Celsum*, vii. 4), and St. Basil (*Commentary on Isaiah*, Proem. c. 5), contrast the prophet with the soothsayer, on the ground of the latter being deprived of his senses. St. Chrysostom draws out the contrast: *τοῦτο γὰρ μάντιος ἴδιον, τὸ ἐξεστηκέναι, τὸ ἰνάγχην ὑπομένειν, τὸ ἀθεῖσθαι, τὸ ἐλκεσθαι, τὸ σίρσθαι ὡς περ μαινόμενον. Ὁ δὲ προφήτης ἰὺχ αἴτως, ἀλλὰ μετὰ διανοίας νηφούσης καὶ σωφρονούσης καταστάσεως, καὶ εἰδὼς ἃ φέγγ-*

*γεται, φησὶν ἅπαντα ὥστε καὶ πρὸ τῆς ἐκβάσεως κἀντεῦθεν γγώριζε τὸν μάντιν καὶ τὸν προφήτην* (*Hom. xxix. in Epist. ad Corinth.*). At the same time, while drawing the distinction sharply between heathen soothsaying and Montanist prophesying on the one side, and Hebrew prophecy on the other, the Fathers use expressions so strong as almost to represent the Prophets to be passive instruments acted on by the Spirit of God. Thus it is that they describe them as musical instruments, — the pipe (*Athenagoras, Leg. pro Christianis*, c. ix.; *Clem. Alex. Cohort. ad Gent.* c. i.), the lyre (*Justin Martyr, Cohort. ad Grec.* c. viii.; *Ephraem Syr. Rhythm.* xxix.; *Chrysostom, Ad Pop. Antioch. Hom.* i. t. ii.); or as pens (*St. Greg. Magn. Pref. in Mor. in Job*). Expressions such as these (many of which are quoted by Dr. Lee, Appendix G.) must be set against the passages which were directed against the Montanists. Nevertheless, there is a very appreciable difference between their view and that of Tertullian and Philo. Which is most in accordance with the indications of Holy Scripture?

It does not seem possible to draw any very precise distinction between the prophetic "dream" and the prophetic "vision." In the case of Abraham (*Gen.* xv. 1) and of Daniel (*Dan.* vii. 1), they seem to melt into each other. In both, the external senses are at rest, reflection is quiescent, and intuition energizes. The action of the ordinary faculties is suspended in the one case by natural, in the other supernatural or extraordinary causes. (See *Lee, Inspiration*, p. 173.) The state into which the prophet was, occasionally, at least, thrown by the ecstasy, or vision, or trance, is described poetically in the Book of Job (*iv.* 13-16, xxxiii. 15), and more plainly in the Book of Daniel. In the case of Daniel, we find first a deep sleep (*viii.* 18, x. 9) accompanied by terror (*viii.* 17, x. 8). Then he is raised upright (*viii.* 18) on his hands and knees, and then on his feet (*x.* 10, 11). He then receives the Divine revelation (*viii.* 19, x. 12). After which he falls to the ground in a swoon (*x.* 15, 17); he is faint, sick, and astonished (*viii.* 27). Here, then, is an instance of the ecstatic state; nor is it confined to the Old Testament, though we do not find it in the New Testament accompanied by such violent effects upon the body. At the Transfiguration, the disciples fell on their face, being overpowered by the Divine glory, and were restored, like Daniel, by the touch of Jesus's hand. St. Peter fell into a trance (*ἐκστασις*) before he received his vision, instructing him as to the admission of the Gentiles (*Acts.* x. 10, xi. 5). St. Paul was in a trance (*ἐν ἐκστάσει*) when he was commanded to devote himself to the conversion of the Gentiles (*Acts.* xxii. 17), and when he was caught up into the third heaven (*2 Cor.* xii. 1). St. John was probably in the same state (*ἐν πνεύματι*) when he received the message to the seven churches (*Rev.* i. 10). The prophetic trance, then, must be acknowledged as a Scriptural account of the state in which the prophets and other inspired persons, sometimes, at least, received Divine revela-

gory or enigma, but to Moses it is said: With him will I speak mouth to mouth (*Num.* xii. 8) and face to face (*Ex.* xxxiii. 11). 3 All the other prophets were terrified, but with Moses it was not so; and this is what the Scripture says: As a man speaketh unto his friend (*Ex.* xxxiii. 11). 4. All the other prophets could not prophesy at any time that they wished, but

with Moses it was not so, but at any time that he wished for it, the Holy Spirit came upon him; so that it was not necessary for him to prepare his mind, for he was always ready for it, like the ministering angels" (*Yad Hachazakah*, c. vii., *Bernard's transl.* p. 116, quoted by *Lee*, p. 457).

sions. It would seem to have been of the following nature.

(1.) The bodily senses were closed to external objects as in deep sleep. (2.) The reflective and discursive faculty was still and inactive. (3.) The spiritual faculty (*πνεύμα*) was awakened to the highest state of energy. Hence it is that revelations in trances are described by the prophets as "seen" or "heard" by them, for the spiritual faculty energizes by immediate perception on the part of the inward sense, not by inference and thought. Thus Isaiah "saw the Lord sitting" (Is. vi. 1). Zechariah "lifted up his eyes and saw" (Zech. ii. 1); "the word of the Lord which Micah saw" (Mic. i. 1); "the wonder which Habakkuk did see" (Hab. i. 1). "Peter saw heaven opened . . . and there came a voice to him" (Acts x. 11). Paul was "in a trance, and saw Him saying" (Acts xxii. 18). John "heard a great voice . . . and saw seven golden candlesticks" (Rev. i. 12). Hence it is, too, that the prophets' visions are unconnected and fragmentary, inasmuch as they are not the subject of the reflective but of the perceptive faculty. They described what they saw and heard, not what they had themselves thought out and systematized. Hence, too, succession in time is disregarded or unnoticed. The subjects of the vision being, to the prophets' sight, in juxtaposition or enfolding each other, some in the foreground, some in the background, are necessarily abstracted from the relations of time. Hence, too, the imagery with which the prophetic writings are colored, and the dramatic cast in which they are moulded; these peculiarities resulting, as we have already said, in a necessary obscurity and difficulty of interpretation.

But though it must be allowed that Scripture language seems to point out the state of dream and of trance, or ecstasy, as a condition in which the human instrument received the Divine communications, it does not follow that all the prophetic revelations were thus made. We must acknowledge the state of trance in such passages as Is. vi. (called ordinarily the vision of Isaiah), as Ez. i. (called the vision of Ezekiel), as Dan. vii., viii., x., xi., xii. (called the visions of Daniel), as Zech. i., iv., v., vi. (called the visions of Zechariah), as Acts x. (called the vision of St. Peter), as 2 Cor. xii. (called the vision of St. Paul), and similar instances, which are indicated by the language used. But it does not seem true to say, with Hengstenberg, that "the difference between these prophecies and the rest is a vanishing one, and if we but possess the power and the ability to look more deeply into them, the marks of the vision may be discerned" (*Christology*, vol. iv. p. 417).<sup>a</sup> St. Paul distinguishes "revelations" from "visions" (2 Cor. xii. 1). In the books of Moses "speaking mouth to mouth" is contrasted with "visions and dreams" (Num. xii. 8). It is true that in his last-quoted passage, "visions and dreams" alone appear to be attributed to the prophet, while "speaking mouth to mouth" is reserved for Moses. But when Moses was dead, the cause of this difference would cease. During the era of prophecy there were none nearer to God, none with whom He would, we may suppose, communicate more openly than the prophets. We should expect, then, that they would be the recipients, not only of visions

in the state of dream or ecstasy, but also of the direct revelations which are called speaking mouth to mouth. The greater part of the Divine communications we may suppose to have been thus made to the prophets in their waking and ordinary state, while the visions were exhibited to them either in the state of sleep, or in the state of ecstasy. "The more ordinary mode through which the word of the Lord, as far as we can trace, came, was through a divine impulse given to the prophet's own thoughts" (Stanley, p. 426). Hence it follows that, while the Fathers in their opposition to Montanism and *μανία* were pushed somewhat too far in their denial of the ecstatic state, they were yet perfectly exact in their descriptions of the condition under which the greater part of the prophetic revelations were received and promulgated. No truer description has been given of them than that of Hippolytus, and that of St. Basil: *Οὐ γὰρ ἐξ ἰδίας δυνάμεως ἐφθέγγοντο, οὐδὲ ἄπερ αὐτοὶ ἐβούλοντο ταῦτα ἐκέρητον, ἀλλὰ πρῶτον μὲν διὰ τοῦ Λόγου ἐσοφίζοντο ὀρθῶς, ἔπειτα δι' ὁραμάτων προεδιδάσκοντο τὰ μέλλοντα καλῶς· εἶθ' οὕτω πεπεισμένοι ἔλεγον ταῦτα ἄπερ αὐτοῖς ἦν μόνοις ἀπὸ τοῦ Θεοῦ ἀποκεκρυμμένα* (Hippol. *De Anichristo*, c. ii.). *Πῶς προεφθέτεον αἱ καθαραὶ καὶ διαναγεῖς ψυχαί; οἶονεὶ κάτοπτρα γινόμενα τῆς θείας ἐνεργείας, τὴν ἔμφασιν βάνην καὶ ἀσύγχυτον καὶ οὐδὲν ἐπιθολοιμένην ἐκ τῶν παθῶν τῆς σαρκὸς ἐπεδείκνυντο· πᾶσι μὲν γὰρ πάρεστι τὸ ἄγιον Πνεῦμα* (St. Basil, *Comm. in Esai. Proem.*).

Had the prophets a full knowledge of that which they predicted? It follows from what we have already said that they had not, and could not have. They were the "spokesmen" of God (Ex. vii. 1), the "mouth" by which his words were uttered, or they were enabled to view, and empowered to describe, pictures presented to their spiritual intuition; but there are no grounds for believing that, contemporaneously with this miracle, there was wrought another miracle enlarging the understanding of the prophet so as to grasp the whole of the Divine counsels which he was gazing into, or which he was the instrument of enunciating. We should not expect it beforehand; and we have the testimony of the prophets themselves (Dan. xii. 8; Zech. iv. 5), and of St. Peter (1 Pet. i. 10), to the fact that they frequently did not comprehend them. The passage in St. Peter's Epistle is very instructive: "Of which salvation the prophets have inquired and searched diligently, who prophesied of the grace that should come unto you: searching what, or what manner of time the Spirit of Christ which was in them did signify, when it testified beforehand the sufferings of Christ, and the glory that should follow. Unto whom it was revealed, that not unto themselves, but unto us they did minister the things, which are now reported unto you by them that have preached the gospel unto you with the Holy Ghost sent down from heaven." It is here declared (1) that the Holy Ghost through the prophet, or the prophet by the Holy Ghost, testified of Christ's sufferings and ascension, and of the institution of Christianity; (2) that after having uttered predictions on those subjects, the minds of the prophets occupied themselves in searching into the full meaning of the words that they had uttered; (3) that they were then divinely in-

<sup>a</sup> This view is advocated also by Veithusen (*De operibus verum futurarum descriptione*), Jahn (*Einleit. in*

*die göttlichen Bücher des A. B.*), Tholuck (*Die Propheten und ihre Weissagungen*).

formed that their predictions were not to find their completion until the last days, and that they themselves were instruments for declaring good things that should come not to their own but to a future generation. This is exactly what the prophetic state above described would lead us to expect. While the Divine communication is being received, the human instrument is simply passive. He sees or hears by his spiritual intuition or perception, and declares what he has seen or heard. Then the reflective faculty which had been quiescent but never so overpowered as to be destroyed, awakens to the consideration of the message or vision received, and it strives earnestly to understand it, and more especially to look at the revelation as *in* instead of *out of* time. The result is failure; but this failure is softened by the Divine intimation that the time is not yet.<sup>a</sup> The two questions, What did the prophet understand by this prophecy? and, What was the meaning of this prophecy? are totally different in the estimation of every one who believes that "the Holy Ghost spake by the Prophets," or who considers it possible that he did so speak.<sup>b</sup>

V. INTERPRETATION OF PREDICTIVE PROPHECY.—We have only space for a few rules, deduced from the account which we have given of the nature of prophecy. They are, (1.) Interpose distances of time according as history may show them to be necessary with respect to the past, or inference may show them to be likely in respect to the future, because, as we have seen, the prophetic visions are abstracted from relations in time. (2.) Distinguish the *form* from the *idea*. Thus Isaiah (xi. 15) represents the *idea* of the removal of all obstacles from before God's people in the *form* of the Lord's destroying the tongue of the Egyptian sea, and smiting the river into seven streams. (3.) Distinguish in like manner figure from what is represented by it, *e. g.*, in the verse previous to that quoted, do not understand literally, "They shall *fly upon the shoulders* of the Philistines" (Is. xi. 14). (4.) Make allowance for the imagery of the prophetic visions, and for the poetical diction in which they are expressed. (5.) In respect to things past, interpret by the apparent meaning, checked by reference to events; in respect to things future, interpret by the apparent meaning, checked by reference to the analogy of the faith. (6.) Interpret according to the principle which may be deduced from the examples of visions explained in the Old Testament. (7.) Interpret according to the principle which may be deduced from the examples of prophecies interpreted in the New Testament.

VI. USE OF PROPHECY.—Predictive prophecy is at once a part and an evidence of revelation: at

the time that it is delivered, and until its fulfillment, a part; after it has been fulfilled, an evidence. St. Peter (Ep. 2, i. 19) describes it as "a light shining in a dark place," or "a taper glimmering where there is nothing to reflect its rays," that is, throwing some light, but only a feeble light as compared with what is shed from the Gospel history. To this light, feeble as it is, "you do well," says the Apostle, "to take heed." And he warns them not to be offended at the feebleness of the light, because it is of the nature of prophecy until its fulfillment—(in the case of Messianic predictions, of which he is speaking, described as "until the day dawn, and the day-star arise in your hearts")—to shed only a feeble light. Nay, he continues, even the prophets could not themselves interpret its meaning,<sup>c</sup> "for the prophecy came not in old time by the will of man," *i. e.* the prophets were not the authors of their predictions, "but holy men of old spake by the impulse (*φερόμενοι*) of the Holy Ghost." This, then, was the use of prophecy before its fulfillment,—to act as a feeble light in the midst of darkness, which it did not dispel, but through which it threw its rays in such a way as to enable a true-hearted believer to direct his steps and guide his anticipations (cf. Acts xiii. 27). But after fulfillment, St. Peter says, "the word of prophecy" becomes "more sure" than it was before, that is, it is no longer merely a feeble light to guide, but it is a firm ground of confidence, and, combined with the apostolic testimony, serves as a trustworthy evidence of the faith; so trustworthy, that even after he and his brother Apostles are dead, those whom he addressed will feel secure that they "had not followed cunningly devised fables," but the truth.

As an evidence, fulfilled prophecy is as satisfactory as anything can be, for who can know the future except the Ruler who disposes future events; and from whom can come prediction except from Him who knows the future? After all that has been said and unsaid, prophecy and miracles, each resting on their own evidence, must always be the chief and direct evidences of the truth of the Divine character of a religion. Where they exist, a Divine power is proved. Nevertheless, they should never be rested on alone, but in combination with the general character of the whole scheme to which they belong. Its miracles, its prophecies, its morals, its propagation, and its adaptation to human needs, are the chief evidences of Christianity. None of these must be taken separately. The fact of their conspiring together is the strongest evidence of all. That one object with which predictions are delivered is to serve in an after age as an evidence on which faith may reasonably rest, is stated by our Lord

<sup>a</sup> See Keble, *Christian Year*, 13th S. aft. Trin., and Lee, *Inspiration*, p. 210.

<sup>b</sup> It is on this principle rather than as it is explained by Dr. McCaul (*Aids to Faith*) that the prophecy of Hosea xi. 1 is to be interpreted. Hosea, we may well believe, understood in his own words no more than a reference to the historical fact that the children of Israel came out of Egypt. But Hosea was not the author of the prophecy—he was the instrument by which it was promulgated. The Holy Spirit intended something further—and what this something was He informs us by the Evangelist St. Matthew (Matt. ii 15). The two facts of the Israelites being led out of Egypt and of Christ's return from Egypt appear to Professor Jowett so distinct that the refer-

ence by St. Matthew to the Prophet is to him inexplicable except on the hypothesis of a mistake on the part of the Evangelist (see Jowett's *Essay on the Interpretation of Scripture*). A deeper insight into Scripture shows that "the Jewish people themselves, their history, their ritual, their government, all present one grand prophecy of the future Redeemer" (Lee, p. 107). Consequently "Israel" is one of the *forms* naturally taken in the prophetic vision by the *idea* "Messiah."<sup>c</sup> This is a more probable meaning of the words *Ἰσραὴλ ἐπιλύσεως οὐ γίνεται* than that given by Pearson (*On the Creed*, art. i. p. 17, ed. Burton), "that no prophecy did so proceed from the prophet that he of himself or by his own instinct did open his mouth to prophecy."

Himself: "And now I have told you before it come to pass, *that when it is come to pass ye might believe*" (John xiv. 29).

VII. DEVELOPMENT OF MESSIANIC PROPHECY.—Prediction, in the shape of promise and threatening, begins with the Book of Genesis. Immediately upon the Fall, hopes of recovery and salvation are held out, but the manner in which this salvation is to be effected is left altogether indefinite. All that is at first declared is that it shall come through a child of woman (Gen. iii. 15). By degrees the area is limited: it is to come through the family of Shem (Gen. ix. 26), through the family of Abraham (Gen. xii. 3), of Isaac (Gen. xxii. 18), of Jacob (Gen. xxviii. 14), of Judah (Gen. xlix. 10). Balaam seems to say that it will be wrought by a warlike Israelitish King (Num. xxiv. 17); Jacob, by a peaceful Ruler of the earth (Gen. xlix. 10); Moses, by a Prophet like himself, *i. e.* a revealer of a new religious dispensation (Deut. xviii. 15). Nathan's announcement (2 Sam. vii. 16) determines further that the salvation is to come through the house of David, and through a descendant of David who shall be himself a king. This promise is developed by David himself in the Messianic Psalms. Pss. xviii. and lxi. are founded on the promise communicated by Nathan, and do not go beyond the announcement made by Nathan. The same may be said of Ps. lxxxix., which was composed by a later writer. Pss. ii. and cx. rest upon the same promise as their foundation, but add new features to it. The Son of David is to be the Son of God (ii. 7), the anointed of the Lord (ii. 2), not only the King of Zion (ii. 6, cx. 1), but the inheritor and lord of the whole earth (ii. 8, cx. 6), and, besides this, a Priest forever after the order of Melchisedek (cx. 4). At the same time he is, as typified by his progenitor, to be full of suffering and affliction (Pss. xxii., lxxi., cii., cix.): brought down to the grave, yet raised to life without seeing corruption (Ps. xvi.). In Pss. xlv., lxxii., the sons of Korah and Solomon describe his peaceful reign. Between Solomon and Hezekiah intervened some 200 years, during which the voice of prophecy was silent. The Messianic conception entertained at this time by the Jews might have been that of a King of the royal house of David who would arise, and gather under his peaceful sceptre his own people and strangers. Sufficient allusion to his prophetic and priestly offices had been made to create thoughtful consideration, but as yet there was no clear delineation of him in these characters. It was reserved for the Prophets to bring out these features more distinctly. The sixteen Prophets may be divided into four groups: the Prophets of the Northern Kingdom, — Hosea, Amos, Joel,

Jonah; the Prophets of the Southern Kingdom, — Isaiah, Jeremiah, Obadiah, Micah, Nahum, Habakkuk, Zephaniah; the Prophets of the Captivity, — Ezekiel and Daniel; the Prophets of the Return, — Haggai, Zechariah, Malachi. In this great period of prophetism there is no longer any chronological development of Messianic Prophecy, as in the earlier period previous to Solomon. Each prophet adds a feature, one more, another less clearly; combine the features, and we have the portrait; but it does not grow gradually and perceptibly under the hands of the several artists. Here, therefore, the task of tracing the chronological *progress* of the revelation of the Messiah comes to an end: its *culminating* point is found in the prophecy contained in Is. lii. 13–15, and liii. We here read that there should be a Servant of God, lowly and despised, full of grief and suffering, oppressed, condemned as a malefactor, and put to death. But his sufferings, it is said, are not for his own sake, for he had never been guilty of fraud or violence; they are spontaneously taken, patiently borne, vicarious in their character; and, by God's appointment, they have an atoning, reconciling, and justifying efficacy. The result of his sacrificial offering is to be his exaltation and triumph. By the path of humiliation and expiatory suffering he is to reach that state of glory foreshown by David and Solomon. The prophetic character of the Messiah is drawn out by Isaiah in other parts of his book as the atoning work here. By the time of Hezekiah therefore (for Hengstenberg, *Christology*, vol. ii., has satisfactorily disproved the theory of a Deutero-Isaiah of the days of the Captivity) the portrait of the Θεσθρωπος — at once King, Priest, Prophet, and Redeemer — was drawn in all its essential features.<sup>a</sup> The contemporary and later Prophets (cf. Mic. v. 2; Dan. vii. 9; Zech. vi. 13; Mal. iv. 2) added some particulars and details, and so the conception was left to await its realization after an interval of some 400 years from the date of the last Hebrew Prophet.

It is the opinion of Hengstenberg (*Christology*, i. 235) and of Pusey (*Minor Prophets*, Part i. Introd.) that the writings of the Minor Prophets are chronologically placed. Accordingly, the former arranges the list of the Prophets as follows: Hosea, Joel, Amos, Obadiah, Jonah, Micah, Isaiah ("the principal prophetic figure in the first or Assyrian period of canonical prophetism"), Nahum, Habakkuk, Zephaniah, Jeremiah ("the principal prophetic figure in the second or Babylonian period of canonical prophetism"), Ezekiel, Daniel, Haggai, Zechariah, Malachi. Calmet (*Dict. Bibl.* s. v. "Prophet") as follows: Hosea, Amos, Isaiah, Jonah, Micah, Nahum, Jeremiah, Zephaniah, Joel, Daniel, Ezekiel, Habakkuk, Obadiah,<sup>b</sup> Haggai,

<sup>a</sup> The modern Jews, in opposition to their ancient exposition, have been driven to a non-Messianic interpretation of Is. liii. Among Christians the non-Messianic interpretation commenced with Grotius. He applies the chapter to Jeremiah. According to Doederlein, Schuster, Stephani, Eichhorn, Rosenmüller, Hitig, Hendewerk, Köster (after the Jewish expositors, Varchi, Aben-Ezra, Kimchi, Abarbanel, Lipmann), the subject of the prophecy is the Israelitish people. According to Eckermann, Ewald, Bleek, it is the ideal Israelitish people. According to Paulus, Ammon, Maurer, Thenius, Knobel, it is the godly portion of the Israelitish people. According to De Wette, Gesenius, Schenkel, Umbreit, Hofmann, it is the prophetic body. Augusti refers it to King Uziah; Konyneburg and Bahrdt to Hezekiah; Stäudlin to Isaiah himself; Volter to the house of David. Ewald thinks that no

historical person was intended, but that the author of the chapter has misled his readers by inserting a passage from an older book, in which a martyr was spoken of. "This," he says, "quite spontaneously suggested itself, and has impressed itself on his mind more and more;" and he thinks that "controversy on chap. liii. will never cease until this truth is acknowledged" (*Propheeten*, ii. S. 407). Hengstenberg gives the following list of German commentators who have maintained the Messianic explanation: Dathe, Henster, Koehler, Koppe, Michaelis, Schmieider, Storr, Hansi, Krüger, Jahn, Steudel, Sack, Reinke, Tholuck, Hävernick, Stier. Hengstenberg's own exposition, and criticism of the expositions of others, is well worth consultation (*Christology*, vol. ii.).

<sup>b</sup> Obadiah is generally considered to have lived at a later date than is compatible with a chronological ar

Zechariah, Malachi. Dr. Stanley (*Lect. xix.*) in the following order: Joel, Jonah, Hosea, Amos, Isaiah, Micah, Nahum, Zechariah, Zephaniah, Habakkuk, Obadiah, Jeremiah, Ezekiel, Isaiah, Daniel, Haggai, Zechariah, Malachi. Whence it appears that Dr. Stanley recognizes two Isaiahs and two Zechariahs, unless "the author of Is. xl-lxvi. is regarded as the older Isaiah transported into a style and position later than his own time" (p. 423).

VIII. PROPHETS OF THE NEW TESTAMENT. — So far as their predictive powers are concerned, the Old Testament prophets find their New Testament counterpart in the writer of the Apocalypse [REVELATION OF ST. JOHN; ANTICHRIST]; but in their general character, as specially illumined revealers of God's will, their counterpart will rather be found, first in the Great Prophet of the Church, and his forerunner John the Baptist, and next in all those persons who were endowed with the extraordinary gifts of the Spirit in the Apostolic age, the speakers with tongues and the interpreters of tongues, the prophets and the discerners of spirits, the teachers and workers of miracles (1 Cor. xii. 10, 28). The connecting link between the O. T. prophet and the speaker with tongues is the state of ecstasy in which the former at times received his visions and in which the latter uttered his words. The O. T. prophet, however, was his own interpreter: he did not speak in the state of ecstasy: he saw his visions in the ecstatic and declared them in the ordinary state. The N. T. discerners of spirits has his prototype in such as Micaiah the son of Imlah (1 K. xxii. 22), the worker of miracles in Elijah and Elisha, the teacher in each and all of the prophets. The prophets of the N. T. represented their namesakes of the O. T. as being expounders of Divine truth and interpreters of the Divine will to their auditors.

That predictive powers did occasionally exist in the N. T. prophets is proved by the case of Agabus (Acts xi. 28), but this was not their characteristic. They were not an order, like apostles, bishops or presbyters, and deacons, but they were men or women (Acts xxi. 9) who had the *χάρισμα προφητείας* vouchsafed them. If men, they might at the same time be apostles (1 Cor. xiv.); and there was nothing to hinder the different *χαρίσματα* of wisdom, knowledge, faith, teaching, miracles, prophecy, discernment, tongues, and interpretation (1 Cor. xii.) being all accumulated on one person, and this person might or might not be a presbyter. St. Paul describes prophecy as being effective for the conversion, apparently the sudden and immediate conversion, of unbelievers (1 Cor. xiv. 24), and for the instruction and consolation of believers (*Ibid.* 31). This shows its nature. It was a spiritual gift which enabled men to understand and to teach the truths of Christianity, especially as veiled in the Old Testament, and to exhort and warn with authority and effect greater than human (see Locke, *Paraphrase*, note on 1 Cor. xii., and Conybeare and Howson, i. 461). The prophets of the N. T. were supernaturally-illumined expounders and preachers.

\* PROPHETS, SCHOOLS OF THE. [PROPHETS, p. 2592 f.]

PROSELYTES (Προσέλυτοι; προσήλυτοι, 1 Chr. xxii. 2, &c.; γειώραι, Ex. xii. 19: *Proselyti*). The Hebrew word thus translated is in the A. V. commonly rendered "stranger" (Gen. xv. 13, Ex. ii. 22, Is. v. 17, &c.). The LXX., as above, commonly gives the equivalent in meaning (προσήλυ-

rament of the canon. in consequence of his reference to the capture of Jerusalem. But such an inference is not necessary, for the prophet might have shown himself in imagination forward to the date of

his prophecy (Hengstenberg), or the words which, as translated by the A. V., are a remonstrance as to the past, may be really but an imperative as to the future (Pusey).

αι ἀπὸ τοῦ προσεληλυθέναι καινή και φιλόθεος πολιτεία, Philo and Suidas, *s. v.*), but sometimes substitutes a Hellenized form (*γραιώρας*) of the Aramaic form מִיָּוֵן. In the N. T. the A. V. has taken the word in a more restricted meaning, and translated it accordingly (Matt. xxiii. 15, Acts ii. 10, vi. 5).

The existence, through all stages of the history of the Israelites, of a body of men, not of the same race, but holding the same faith and adopting the same ritual, is a fact which, from its very nature, requires to be dealt with historically. To start with the technical distinctions and regulations of the later Rabbis is to invert the natural order, and leads to inevitable confusion. It is proposed accordingly to consider the condition of the proselytes of Israel in the five great periods into which the history of the people divides itself, namely, (I.) the age of the patriarchs; (II.) from the Exodus to the commencement of the monarchy; (III.) the period of the monarchy; (IV.) from the Babylonian captivity to the destruction of Jerusalem; (V.) from the destruction of Jerusalem downwards.

I. The position of the family of Israel as a distinct nation, with a special religious character, appears at a very early period to have exercised a power of attraction over neighboring races. The slaves and soldiers of the tribe of which Abraham was the head (Gen. xvii. 27), who were included with him in the covenant of circumcision, can hardly perhaps be classed as proselytes in the later sense. The case of the Shechemites, however (Gen. xxxiv.), presents a more distinct instance. The converts are swayed partly by passion, partly by interest. The sons of Jacob then, as afterwards, require circumcision as an indispensable condition (Gen. xxxiv. 14). This, and apparently this only, was required of proselytes in the pre-Mosaic period.

II. The life of Israel under the Law, from the very first, presupposes and provides for the incorporation of men of other races. The "mixed multitude" of Ex. xii. 38 implies the presence of proselytes more or less complete. It is recognized in the earliest rules for the celebration of the Passover (Ex. xii. 19). The "stranger" of this and other laws in the A. V. answers to the word which distinctly means "proselyte," and is so translated in the LXX., and the prominence of the class may be estimated by the frequency with which the word recurs: 9 times in Exodus, 2) in Leviticus, 11 in Numbers, 19 in Deuteronomy. The laws clearly point to the position of a convert. The "stranger" is bound by the law of the Sabbath (Ex. xx. 10, xxiii. 12; Deut. v. 14). Circumcision is the condition of any fellowship with him (Ex. xii. 48. Num. ix. 14). He is to be present at the Passover (Ex. xii. 19), the Feast of Weeks (Deut. xvi. 11), the Feast of Tabernacles (Deut. xvi. 14), the Day of Atonement (Lev. xvi. 23). The laws of prohibited marriages (Lev. xviii. 23) and abstinence from blood (Lev. xvii. 10) are binding upon him. He is liable to the same punishment for Molech-worship (Lev. ix. 2), and for blasphemy (Lev. xxiv. 16) may claim the same right of asylum as the Israelites in the cities of refuge (Num. xxxv. 15; Josh. ix. 9). On the other side he is subjected to some drawbacks. He cannot hold land (Lev. xix. 10). He has no *jus connubii* with the descendants of Aaron (Lev. xxi. 14). His condition is assumed to be, for the most part, one of poverty (Lev. xxiii. 22), often of servitude (Deut. xxix. 11). For this reason he is

placed under the special protection of the Law (Deut. x. 18). He is to share in the right of gleaning (Lev. xix. 10), is placed in the same category as the fatherless and the widow (Deut. xxiv. 17, 19, xxvi. 12, xxvii. 19), is joined with the Levite as entitled to the title of every third year's produce (Deut. xiv. 29, xxvi. 12). Among the proselytes of this period the KENITES, who under HOBAB accompanied the Israelites in their wanderings, and ultimately settled in Canaan, were probably the most conspicuous (Judg. i. 16). The presence of the class was recognized in the solemn declaration of blessings and curses from Ebal and Gerizim (Josh. viii. 33).

The period after the conquest of Canaan was not favorable to the admission of proselytes. The people had no strong faith, no commanding position. The Gibeonites (Josh. ix.) furnish the only instance of a conversion, and their condition is rather that of slaves compelled to conform than of free proselytes. [NETHINIM.]

III. With the monarchy, and the consequent fame and influence of the people, there was more to attract stragglers from the neighboring nations, and we meet accordingly with many names which suggest the presence of men of another race conforming to the faith of Israel. Doeg the Edomite (1 Sam. xxi. 7), Uriah the Hittite (2 Sam. xi. 3), Araamah the Jebusite (2 Sam. xxiv. 23), Zelek the Ammonite (2 Sam. xxiii. 37), Ithmah the Moabite (1 Chr. xi. 46) — these two, in spite of an express law to the contrary (Deut. xxiii. 3) — and at a later period Shelma the scribe (probably, comp. Alexander on Is. xxii. 15), and Ebed-Melech the Ethiopian (Jer. xxxviii. 7), are examples that such proselytes might rise even to high offices about the person of the king. The CHERETHITES and PELETHITES consisted probably of foreigners who had been attracted to the service of David, and were content for it to adopt the religion of their master (Ewald, *Gesch.* i. 330, iii. 183). The vision in Ps. lxxxvii. of a time in which men of Tyre, Egypt, Ethiopia, Philistia, should all be registered among the citizens of Zion, can hardly fail to have had its starting-point in some admission of proselytes within the memory of the writer (Ewald and De Wette, *in loc.*). A convert of another kind, the type, as it has been thought, of the later proselytes of the gate (see below), is found in Naaman the Syrian (2 K. v. 15, 18) recognizing Jehovah as his God, yet not binding himself to any rigorous observance of the Law.

The position of the proselytes during this period appears to have undergone considerable changes. On the one hand men rose, as we have seen, to power and fortune. The case for which the Law provided (Lev. xxv. 47) might actually occur, and they might be the creditors of Israelite debtors, the masters of Israelite slaves. It might well be a sign of the times in the later days of the monarchy that they became "very high," the "head" and not the "tail" of the people (Deut. xxviii. 43, 44). The picture had, however, another side. They were treated by David and Solomon as a subject-class, brought (like Pericei, almost like Helots) under a system of compulsory labor from which others were exempted (1 Chr. xii. 2; 2 Chr. ii. 17, 18). The statistics of this period, taken probably for that purpose, give their number (probably, *i. e.* the number of adult working males) at 153,600 (*ibid.*). They were subject at other times to wanton insolence and outrage (Ps. xciv. 6). As some

compensation for their sufferings they became the special objects of the care and sympathy of the prophets. One after another of the "goodly fellowship" pleads the cause of the proselytes as warmly as that of the widow and the fatherless (Jer. vii. 6, xxii. 3; Ez. xxii. 7, 29; Zech. vii. 10; Mal. iii. 5). A large accession of converts enters into all their hopes of the Divine Kingdom (Is. ii. 2, xi. 10, lvi. 3-6; Mic. iv. 1). The sympathy of one of them goes still further. He sees, in the far future, the vision of a time when the last remnant of inferiority shall be removed, and the proselytes, completely emancipated, shall be able to hold and inherit land even as the Israelites (Ez. xlvii. 22).<sup>a</sup>

IV. The proselytism of the period after the Captivity assumed a different character. It was for the most part the conformity, not of a subject race, but of willing adherents. Even as early as the return from Babylon we have traces of those who were drawn to a faith which they recognized as holier than their own, and had "separated themselves" unto the law of Jehovah (Neh. x. 28). The presence of many foreign names among the NETHINIM (Neh. vii. 46-59) leads us to believe that many of the new converts dedicated themselves specially to the service of the new Temple. With the conquests of Alexander, the wars between Egypt and Syria, the struggle under the Maccabees, the expansion of the Roman empire, the Jews became more widely known and their power to proselytize increased. They had suffered for their religion in the persecution of Antiochus, and the spirit of martyrdom was followed naturally by propagandism. Their monotheism was rigid and unbending. Scattered through the east and west, a marvel and a portent, wondered at and scorned, attracting and repelling, they presented, in an age of shattered creeds, and corroding doubts, the spectacle of a faith, or at least a dogma, which remained unshaken. The influence was sometimes obtained well, and exercised for good. In most of the great cities of the empire, there were men who had been rescued from idolatry and its attendant debasements, and brought under the power of a higher moral law. It is possible that in some cases the purity of Jewish life may have contributed to this result, and attracted men or women who shrank from the unutterable contamination, in the midst of which they lived.<sup>b</sup> The converts who were thus attracted, joined, with varying strictness (*infra*) in the worship of the Jews. They were present in their synagogues (Acts xiii. 42, 43, 50, xvii. 4, xviii. 7). They came up as pilgrims to the great feasts at Jerusalem (Acts ii. 10). In Palestine itself the influence was often stronger and better. Even Roman centurions learnt to love the conquered nation, built synagogues for them (Luke vii. 5), fasted and prayed, and gave alms, after the pattern of the strictest Jews (Acts x. 2, 30), and became preachers of the new faith to the soldiers under them (*ibid.* v. 7). Such men, drawn by what was best in Judaism, were naturally among

<sup>a</sup> The significance of this passage in its historical connection with Ps. lxxxvii., already referred to, and its spiritual fulfillment in the language of St. Paul (Eph. ii. 19), deserve a fuller notice than they have yet received.

<sup>b</sup> This influence is not perhaps to be altogether excluded, but it has sometimes been enormously exaggerated. Comp. Dr. Temple's "Essay on the Education of the World" (*Essays and Reviews*, p. 12).

the readiest receivers of the new truth which rose out of it, and became, in many cases, the nucleus of a Gentile Church.

Proselytism had, however, its darker side. The Jews of Palestine were eager to spread their faith by the same weapons as those with which they had defended it. Had not the power of the Empire stood in the way, the religion of Moses, stripped of its higher elements, might have been propagated far and wide, by force, as was afterwards the religion of Mohammed. As it was, the Idumeans had the alternative offered them by John Hyrcanus of death, exile, or circumcision (Joseph. *Ant.* xiii. 9, § 3). The Ituraeans were converted in the same way by Aristobulus (*ibid.* xiii. 11, § 3). In the more frenzied fanaticism of a later period, the Jews under Josephus could hardly be restrained from seizing and circumcising two chiefs of Trachonitis who had come as envoys (Joseph. *Vit.* p. 23). They compelled a Roman centurion, whom they had taken prisoner, to purchase his life by accepting the sign of the covenant (Joseph. *B. J.* ii. 11, § 10). Where force was not in their power (the "veluti Judæi, cogemus" of Hor. *Sat.* i. 4, 142, implies that they sometimes ventured on it even at Rome), they obtained their ends by the most unscrupulous fraud. They appeared as soothsayers, diviners, exorcists, and addressed themselves especially to the fears and superstitions of women. Their influence over these became the subject of indignant satire (Juv. *Sat.* vi. 543-547). They persuaded noble matrons to send money and purple to the Temple (Joseph. *Ant.* xviii. 3, § 5). At Damascus the wives of nearly half the population were supposed to be tainted with Judaism (Joseph. *B. J.* ii. 10, § 2). At Rome they numbered in their ranks, in the person of Poppæa, even an imperial concubine (Joseph. *Ant.* x. 7, § 11). The converts thus made, cast off all ties of kindred and affection (Tac. *Hist.* v. 9). Those who were most active in proselytizing were precisely those from whose teaching all that was most true and living had departed. The vices of the Jew were engrained on the vices of the heathen. A repulsive casuistry released the convert from obligations which he had before recognized, while in other things he was bound, hand and foot, to an unhealthy superstition. It was no wonder that he became "twofold more the child of Gehenna" (Matt. xxiii. 15) than the Pharisees themselves.

The position of such proselytes was indeed every way pitiable. At Rome, and in other large cities, they became the butts of popular scurrility. The words "curtus," "verpes," met them at every corner (Hor. *Sat.* i. 4, 142; Mart. vii. 29, 34, 81, xi. 95, xii. 37). They had to share the fortunes of the people with whom they had cast in their lot, might be banished from Italy (Acts xviii. 2; Suet. *Claud.* p. 25), or sent to die of malaria in the most unhealthy stations of the empire (Tac. *Ann.* ii. 85). At a later time, they were bound to make a public profession of their conversion, and to pay a special tax (Suet. *Domit.* xii.). If they failed to do this and were suspected, they might

<sup>c</sup> The Law of the Corban may serve as one instance (Matt. xv. 4-6). Another is found in the Rabbinic teaching as to marriage. Circumcision, like a new birth, canceled all previous relationships, and unions within the nearest degrees of blood were therefore no longer incestuous (Maimon. *ex Jebam.* p. 982; Selden *de Jure Nat. et Gent.* ii. 4; *Uxor Hebr.* ii. 18).

be subject to the most degrading examination to ascertain the fact of their being proselytes (*ibid.*). Among the Jews themselves their case was not much better. For the most part the convert gained but little honor even from those who gloried in having brought him over to their sect and party. The popular Jewish feeling about them was like the popular Christian feeling about a converted Jew. They were regarded (by a strange Rabbinic perversion of Is. xiv. 1) as the leprosy of Israel, "cleaving" to the house of Jacob (*Jebam.* 47, 4; *Kiddush.* 70, 6). An opprobrious proverb coupled them with the vilest profligates ("proselyti et pæderastæ") as hindering the coming of the Messiah (Lightfoot, *Hor. Heb.* in Matt. xxiii. 5). It became a recognized maxim that no wise man would trust a proselyte even to the twenty-fourth generation (*Jalkuth Ruth*, f. 163 a).

The better Rabbis did their best to guard against these evils. Anxious to exclude all unworthy converts, they grouped them, according to their motives, with a somewhat quaint classification,

- (1.) Love-proselytes, where they were drawn by the hope of gaining the beloved one. (The story of Syllæus and Salome, *Joseph. Ant.* xvi. 7, § 6, is an example of a half-finished conversion of this kind.)
- (2.) Man-for-Woman, or Woman-for-Man proselytes, where the husband followed the religion of the wife, or conversely.
- (3.) Esther-proselytes, where conformity was assumed to escape danger, as in the original Purim (*Esth.* viii. 17).
- (4.) King's-table-proselytes, who were led by the hope of court favor and promotion, like the converts under David and Solomon.
- (5.) Lion-proselytes, where the conversion originated in a superstitious dread of a divine judgment, as with the Samaritans of 2 K. xvii. 26.

(*Gem. Hieros. Kiddush.* 65, 6; *Jost, Judenth.* i. p. 448.) None of these were regarded as fit for admission within the covenant. When they met with one with whose motives they were satisfied, he was put to a yet further ordeal. He was warned that in becoming a Jew he was attaching himself to a persecuted people, that in this life he was to expect only suffering, and to look for his reward in the next. Sometimes these cautions were in their turn carried to an extreme, and amounted to a policy of exclusion. A protest against them on the part of a disciple of the Great Hillel is recorded, which throws across the dreary rubbish of Rabbinism the momentary gleam of a noble thought. "Our wise men teach," said Simon ben Gamaliel, "that when a heathen comes to enter into the covenant, our part is to stretch out our hand to him and to bring him under the wings of God" (*Jost, Judenth.* i. 447).

Another mode of meeting the difficulties of the case was characteristic of the period. Whether we may transfer to it the full formal distinction between Proselytes of the Gate and Proselytes of Righteousness (*infra*) may be doubtful enough, but we find two distinct modes of thought, two distinct policies in dealing with converts. The history of Helena, queen of Adiabene, and her son Zates, presents the two in collision with each other. They had been converted by a Jewish merchant, Ananias, but the queen feared lest the circumcision of her son should disquiet and alarm her subjects.

Ananias assured her that it was not necessary. Her son might worship God, study the Law, keep the commandments, without it. Soon, however, a stricter teacher came, Eleazar of Galilee. Finding Zates reading the Law, he told him sternly that it was of little use to study that which he disobeyed, and so worked upon his fears, that the young devotee was eager to secure the safety of which his uncircumcision had deprived him (*Joseph. Ant.* xx. 2, § 5; *Jost, Judenth.* i. 341). On the part of some, therefore, there was a disposition to dispense with what others looked on as indispensable. The centurions of Luke vii. (pr. babbly) and Acts x., possibly the Hellenes of John xi. 20 and Acts xiii. 42, are instances of men admitted on the former footing. The phrases *οἱ σεβόμενοι προσήλυτοι* (Acts xiii. 43), *οἱ σεβόμενοι* (xvii. 4, 17; *Joseph. Ant.* xiv. 7, § 2), *ἄνδρες εὐλαβεῖς* (Acts ii. 5, vii. 2) are often, but inaccurately, supposed to describe the same class—the Proselytes of the Gate. The probability is, either that the terms were used generally of all converts, or, if with a specific meaning, were applied to the full Proselytes of Righteousness (comp. a full examination of the passages in question by N. Lardner, *On the Decree of Acts xv.*; *Works* xi. 305). The two tendencies were, at all events, at work, and the battle between them was renewed afterwards on holier ground and on a wider scale. Ananias and Eleazar were represented in the two parties of the Council of Jerusalem. The germ of truth had been quickened into a new life, and was emancipating itself from the old thralldom. The decrees of the Council were the solemn assertion of the principle that believers in Christ were to stand on the footing of Proselytes of the Gate, not of Proselytes of Righteousness. The teaching of St. Paul as to righteousness and its conditions, its dependence on faith, its independence of circumcision, stands out in sharp clear contrast with the teachers who taught that that rite was necessary to salvation, and confined the term "righteousness" to the circumcised convert.

V. The teachers who carried on the Rabbinical succession consoled themselves, as they saw the new order waxing and their own glory waning, by developing the decaying system with an almost microscopic minuteness. They would at least transmit to future generations the full measure of the religion of their fathers. In proportion as they ceased to have any power to proselytize, they dwelt with exhaustive fullness on the question how proselytes were to be made. To this period accordingly belong the rules and decisions which are often carried back to an earlier age, and which may now be conveniently discussed. The precepts of the Talmud may indicate the practices and opinions of the Jews from the 2d to the 6th century. They are very untrustworthy as to any earlier time. The points of interest which present themselves for inquiry are, (1.) The classification of Proselytes. (2.) The ceremonies of their admission.

The division which has been in part anticipated, was recognized by the Talmudic Rabbis, but received its full expansion at the hands of Maimonides (*Hilc. Mel.* i. 6). They claimed for it a remote antiquity, a divine authority. The term Proselytes of the Gate (*גֵּרֵי הַשַּׁעַר*), was derived from the frequently occurring description in the Law, "the stranger (*גֵּר*) that is within thy gates" (*Ex.* xx. 10, &c.). They were known also as the

sojourners (גֵּרֵי רִשְׁוֹן), with a reference to Lev. xxv. 47. &c. To them were referred the greater part of the precepts of the Law as to the "stranger." The Targums of Onkelos and Jonathan give this as the equivalent in Dent. xxiv. 21. Converts of this class were not bound by circumcision and the other special laws of the Mosaic code. It was enough for them to observe the seven precepts of Noah (Otho, *Lex. Rab.* "Noachida;" Selden, *De Jur. Nat. et Gent.* i. 10), i. e. the six supposed to have been given to Adam, (1) against idolatry, (2) against blaspheming, (3) against bloodshed, (4) against uncleanness, (5) against theft, (6) of obedience, with (7) the prohibition of "flesh with the blood thereof" given to Noah. The proselyte was not to claim the privileges of an Israelite, might not redeem his first-born, or pay the half-shekel (Leyrer, *ut inf.*). He was forbidden to study the Law under pain of death (Otho, *l. c.*). The later Rabbis, when Jerusalem had passed into other hands, held that it was unlawful for him to reside within the holy city (Maimon. *Beth-haccher.* vii. 14). In return they allowed him to offer whole burnt-offerings for the priest to sacrifice, and to contribute money to the Corban of the Temple. They held out to him the hope of a place in the paradise of the world to come (Leyrer). They insisted that the profession of his faith should be made solemnly in the presence of three witnesses (Maimon. *Hilc. Mel.* viii. 10). The Jubilee was the proper season for his admission (Müller, *De Pros.* in Ugolini xxii. 841).

All this seems so full and precise, that we cannot wonder that it has led many writers to look on it as representing a reality, and most commentators accordingly have seen these Proselytes of the Gate in the *σεβόμενοι, εὐλαβεῖς, φοβούμενοι τὸν Θεόν* of the Acts. It remains doubtful, however, whether it was ever more than a paper scheme of what ought to be, disguising itself as having actually been. The writers who are most full, who claim for the distinction the highest antiquity, confess that there had been no Proselytes of the Gate since the Two Tribes and a half had been carried away into captivity (Maimon. *Hilc. Melc.* i. 6). They could only be admitted at the jubilee, and there had since then been no jubilee celebrated (Müller, *l. c.*). All that can be said, therefore, is, that in the time of the N. T. we have independent evidence (*ut supra*) of the existence of converts of two degrees, and that the Talmudic division is the formal systematizing of an earlier fact. The words "proselytes," and *οἱ σεβόμενοι τὸν Θεόν*, were, however, in all probability limited to the circumcised.

In contrast with these were the Proselytes of Righteousness (גֵּרֵי הַיְיָדֵת), known also as Proselytes of the Covenant, perfect Israelites. By some writers the Talmudic phrase *proselyti tracti* (גֵּרֵי יִשְׂרָאֵל) is applied to them as *ἄσων* to the covenant by spontaneous conviction (Buxtorf, *Lexic.* s. v.), while others (Kimchi) refer it to those who were constrained to conformity, like the Gibeonites. Here also we must receive what we find with the same limitation as before. All seems at

first clear and definite enough. The proselyte was first catechized as to his motives (Maimon. *ut supra*). If these were satisfactory, he was first instructed as to the Divine protection of the Jewish people, and then circumcised. In the case of a convert already circumcised (a Midianite, e. g. or an Egyptian), it was still necessary to draw a few drops of "the blood of the covenant" (Gem. Bab. *Shabb.* f. 135 a). A special prayer was appointed to accompany the act of circumcision. Often the proselyte took a new name, opening the Hebrew Bible and accepting the first that came (Leyrer, *ut inf.*).

All this, however, was not enough. The convert was still "a stranger." His children would be counted as bastards, i. e. aliens. Baptism was required to complete his admission. When the wound was healed, he was stripped of all his clothes, in the presence of the three witnesses who had acted as his teachers, and who now acted as his sponsors, the "fathers" of the proselyte (*Ke-tubh.* xi., *Eruhb.* xv. 1), and led into the tank or pool. As he stood there, up to his neck in water, they repeated the great commandments of the Law. These he promised and vowed to keep, and then, with an accompanying benediction, he plunged under the water. To leave one hand-breadth of his body unsubmerged would have vitiated the whole rite (Otho, *Lex. Rab.* "Baptismus;" Reisk. *De Bapt. Pros.* in Ugolini xxii.). Strange as it seems, this part of the ceremony occupied, in the eyes of the later Rabbis, a coordinate place with circumcision. The latter was incomplete without it, for baptism also was of the fathers (Gem. Bab. *Jebram.* f. 461, 2). One Rabbi appears to have been bold enough to declare baptism to have been sufficient by itself (*ibid.*); but for the most part, both were reckoned as alike indispensable. They carried back the origin of the baptism to a remote antiquity, finding it in the command of Jacob (Gen. xxxv. 2) and of Moses (Ex. xix. 10). The Targum of the Pseudo-Jonathan inserts the word "Thou shalt circumcise and baptize" in Ex. xii. 44. Even in the Ethiopic version of Matt. xxiii. 15, we find "compass sea and land to baptize one proselyte" (Winer, *Rob.* s. v.). Language foreshadowing, or caricaturing, a higher truth was used of this baptism. It was a new birth<sup>a</sup> (*Jebram.* f. 62, 1; 92, 1; Maimon. *Issur. Bich.* c. 14; Lightfoot, *Harm. of Gospels*, iii. 14; *Exerc. on John* iii.). The proselyte became a little child. He received the Holy Spirit (*Jebram.* f. 22 a, 48 b.). All natural relationships, as we have seen, were canceled.

The baptism was followed, as long as the Temple stood, by the offering or Corban. It consisted, like the offerings after a birth (the analogy, apparently being carried on), of two turtle-doves or pigeons (Lev. xii. 8). When the destruction of Jerusalem made the sacrifice impossible, a vow to offer it as soon as the Temple should be rebuilt was substituted. For women-proselytes, there were only baptism<sup>b</sup> and the Corban, or, in later times, baptism by itself.

It is obvious that this account suggests many questions of grave interest. Was this ritual observed as early as the commencement of the first century? If so, was the baptism of John, or that

<sup>a</sup> This thought probably had its starting-point in the language of Ps. lxxxvii. There also the proselytes of Babylon and Egypt are registered as "born" in Gen.

<sup>b</sup> The Gallean female proselytes were said to have objected to this, as causing barrenness (Winer, *Realob.*).

of the Christian Church in any way derived from, or connected with the baptism of proselytes? If not, was the latter in any way borrowed from the former?

It would be impossible here to enter at all into the literature of this controversy. The list of works named by Leyrer occupies nearly a page of Herzog's *Real-Encyclopädie*. It will be enough to sum up the conclusions which seem fairly to be drawn from them.

(1.) There is no direct evidence of the practice being in use before the destruction of Jerusalem. The statements of the Talmud as to its having come from the fathers, and their exegesis of the O. T. in connection with it, are alike destitute of authority.

(2.) The negative argument drawn from the silence of the O. T., of the Apocrypha, of Philo, and of Josephus, is almost decisive against the belief that there was in their time a baptism of proselytes, with as much importance attached to it as we find in the Talmudists.

(3.) It remains probable, however, that there was a baptism in use at a period considerably earlier than that for which we have direct evidence. The symbol was in itself natural and fit. It fell in with the disposition of the Pharisees and others to multiply and discuss "washings" (*βαπτισμοί*, Mark vii. 4) of all kinds. The tendency of the later Rabbis was rather to heap together the customs and traditions of the past than to invent new ones. If there had not been a baptism, there would have been no initiatory rite at all for female proselytes.

(4.) The history of the N. T. itself suggests the existence of such a custom. A sign is seldom chosen unless it already has a meaning for those to whom it is addressed. The fitness of the sign in this case would be in proportion to the associations already connected with it. It would bear witness, on the assumption of the previous existence of the proselyte-baptism, that the change from the then condition of Judaism to the kingdom of God was as great as that from idolatry to Judaism. The question of the Priests and Levites, "Why baptizest thou then?" (John i. 25), implies that they wondered, not at the thing itself, but at its being done for Israelites by one who disclaimed the names which, in their eyes, would have justified the introduction of a new order. In like manner the words of our Lord to Nicodemus (John iii. 10) imply the existence of a teaching as to baptism like that above referred to. He, "the teacher of Israel," had been familiar with "these things"—the new birth, the gift of the Spirit—as words and phrases applied to heathen proselytes. He failed to grasp the deeper truth which lay beneath them, and to see that they had a wider, an universal application.

(5.) It is, however, not improbable that there may have been a reflex action in this matter, from the Christian upon the Jewish Church. The Rabbis saw the new society, in proportion as the Gentile element in it became predominant, throwing off circumcision, relying on baptism only. They could not ignore the reverence which men had for the outward sign, their belief that it was all but identical with the thing signified. There was everything to lead them to give a fresh prominence to what had been before subordinate. If the Nazarenes attracted men by their baptism, they would show that they had baptism as well as circum-

cision. The necessary absence of the Corban after the destruction of the Temple would also tend to give more importance to the remaining rite.

Two facts of some interest remain to be noticed. (1.) It formed part of the Rabbinic hopes of the kingdom of the Messiah that then there should be no more proselytes. The distinctive name, with its brand of inferiority, should be laid aside, and all, even the Nethinim and the Mamzerim (children of mixed marriages) should be counted pure (Schoettgen, *Hor. Heb.* ii. p. 614). (2.) Partly, perhaps, as connected with this feeling, partly in consequence of the ill repute into which the word had fallen, there is, throughout the N. T., a sedulous avoidance of it. The Christian convert from heathenism is not a proselyte, but a *μεθυστος* (1 Tim. iii. 6).

*Literature.*—Information more or less accurate is to be found in the Archaeologies of Jahn, Carpzov, Saalschütz, Lewis, Leusden. The treatises cited above in Ugolini's *Thesaurus*, xxii.; *Seivogt. de Proselytis*; Müller, *de Proselytis*; Reisk. *de BAPT. JUDÆORUM*; Danz. *BAPT. PROSELYT.*, are all of them copious and interesting. The article by Leyrer in Herzog's *Real-Encyclop.* s. v. "Proselyten," contains the fullest and most satisfying discussion of the whole matter at present accessible. The writer is indebted to it for much of the materials of the present article, and for most of the Talmudic references. E. H. P.

\* For "religious" applied to "proselytes," (A. V.) Acts xiii. 43, the Greek has *σεβόμενοι*, "worshipping," sc. God and not idols as formerly. The English reader might suppose that some of the proselytes were meant to be distinguished as more religious than others. The same Greek term (ver. 50) describes "the women" at Antioch (called "devout" in the A. V.) as Jewish converts, and thus explains why the Jews could so easily instigate them (being at the same time wives of "the chief men") to persecute Paul and Barnabas, and drive them from the city. The same Greek term in Acts xvii. 4 and 17 ("devout," A. V.) states simply that the Greeks spoken of at Thessalonica and at Athens had been Jewish proselytes before their conversion to Christianity. On this use of *σεβέσθαι* as thus definite without an object, see Cremer's *Wörterb. der Neuest. Gräcität.*, ii. 476 (1868). The Jewish proselytes who embraced the gospel formed the principal medium through which Christianity passed to the Gentile races. See the addition to SYNAGOGUES H.

PROVERBS, BOOK OF. 1. *Title.*—The title of this book in Hebrew is, as usual, taken from the first word, מִשְׁלֵי, *mishlê*, or, more fully, מִשְׁלֵי שְׁלֹמֹה, *mishlê Shêlômôh*, and is in this case appropriate to the contents. By this name it is commonly known in the Talmud; but among the later Jews, and even among the Talmudists themselves, the title סֵפֶר חֹכְמָה, *sépher choemâh*, "book of wisdom," is said to have been given to it. It does not appear, however, from the passages of the *Tosephoth* to the *Baba Bathra* (fol. 14 b), that this is necessarily the case. All that is there said is that the books of Proverbs and Ecclesiastes are both "books of wisdom," with a reference rather to their contents than to the titles by which they were known. In the early Christian Church the title *παροιμία Σολουῶντος* was adopted from the translation of the LXX.; and the book is also

quoted as σοφία, "wisdom," or ἡ πανάρετος σοφία, "wisdom that is the sum of all virtues." This last title is given to it by Clement in the *Ep. ad Cor.* i. 57, where Prov. i. 23-31 is quoted with the introduction οὕτως γὰρ λέγει ἡ πανάρετος σοφία; and Eusebius (*H. E.* iv. 22) says that not only Hegesippus, but Irenæus and the whole band of ancient writers, following the Jewish unwritten tradition, called the Proverbs of Solomon πανάρετον σοφίαν. According to Melito of Sardes (*Euseb. H. E.* iv. 26), the Proverbs were also called σοφία, "wisdom," simply; and Gregory of Nazianzus refers to them (*Orat.* xi.) as παιδαγωγικὴ σοφία. The title in the Vulgate is *Liber Proverbiorum, quem Hebræi Miste appellant.*

The significance of the Hebrew title may here be appropriately discussed. מִשְׁלֵי, *māshāl*, rendered in the A. V. "by-word," "parable," "proverb," expresses all and even more than is conveyed by these its English representatives. It is derived from a root, מִשַּׁל, *māshal*, "to be like,"<sup>a</sup> and the primary idea involved in it is that of likeness, comparison. This form of comparison would very naturally be taken by the short pithy sentences which passed into use as popular sayings and proverbs, especially when employed in mockery and sarcasm, as in Mic. ii. 4, Hab. ii. 6, and even in the more developed taunting song of triumph for the fall of Babylon in Is. xiv. 4. Probably all proverbial sayings were at first of the nature of similes, but the term *māshāl* soon acquired a more extended significance. It was applied to denote such short, pointed sayings, as do not involve a comparison directly, but still convey their meaning by the help of a figure, as in 1 Sam. x. 12, Ez. xii. 22, 23, xvii. 2, 3 (comp. παραβολή, Luke iv. 23). From this stage of its application it passed to that of sententious maxims generally, as in Prov. i. 1, x. 1, xxv. 1, xxvi. 7, 9, Eccl. xii. 9, Job xiii. 12, many of which, however, still involve a comparison (Prov. xxv. 3, 11, 12, 13, 14, &c., xxvi. 1, 2, 3, &c.). Such comparisons are either expressed, or the things compared are placed side by side, and the comparison left for the hearer or reader to supply. Next we find it used of those longer pieces in which a single idea is no longer exhausted in a sentence, but forms the germ of the whole, and is worked out into a didactic poem. Many instances of this kind occur in the first section of the Book of Proverbs: others are found in Job xxvii., xxix., in both which chapters Job takes up his *māshāl*, or "parables," as it is rendered in the A. V. The "parable" of Balaam, in Num. xxiii. 7-10, xxiv. 3-9, 15-19, 20, 21-22, 23-24, are prophecies conveyed in figures; but *māshāl* also denotes the "parable" proper, as in Ez. xvii. 2, xx. 49 (xxi. 5), xxiv. 3. Lowth, in his notes on Is. xiv. 4, speaking of *māshāl*, says: "I take this to be the general name for poetic style among the Hebrews, including every sort of it, as ranging under one, or other, or all of the characters, of sententious, figurative, and sublime; which are all contained in the original notion, or in the use and application of the word

*māshal*. Parables or proverbs, such as those of Solomon, are always expressed in short, pointed sentences; frequently figurative, being formed on some comparison, both in the matter and the form. And such in general is the style of the Hebrew poetry. The verb *māshal* signifies to rule, to exercise authority; to make equal, to compare one thing with another; to utter parables, or acute, weighty, and powerful speeches, in the form and manner of parables, though not properly such. Thus Balaam's first prophecy, Num. xxiii. 7-10, is called his *māshal*; though it has hardly anything figurative in it: but it is beautifully sententious, and, from the very form and manner of it, has great spirit, force, and energy. Thus Job's last speeches, in answer to the three friends, chaps. xxvii.-xxxi., are called *māshāl*, from no one particular character which discriminates them from the rest of the poem, but from the sublime, the figurative, the sententious manner, which equally prevails through the whole poem, and makes it one of the first and most eminent examples extant of the truly great and beautiful in poetic style." But the Book of Proverbs, according to the introductory verses which describe its character, contains, besides several varieties, of the *māshāl*, sententious sayings of other kinds, mentioned in i. 6. The first of these is the חִידָה, *chidāh*, rendered in the A. V. "dark saying," "dark speech," "hard question," "riddle," and once (Hab. ii. 6) "proverb." It is applied to Samson's riddle in Judg. xiv., to the hard questions with which the queen of Sheba plied Solomon (1 K. x. 1; 2 Chr. ix. 1), and is used almost synonymously with *māshāl* in Ez. xvii. 2, and in Ps. xlix. 4 (5), lxxviii. 2, in which last passages the poetical character of both is indicated. The word appears to denote a knotty, intricate saying, the solution of which demanded experience and skill: that it was obscure is evident from Num.

xii. 8. In addition to the *chidāh* was the מְלִיצָה, *mēlitsāh* (Prov. i. 6, A. V. "the interpretation," marg. "an eloquent speech"), which occurs in Hab. ii. 6 in connection both with *chidāh* and *māshāl*. It has been variously explained as a mocking, taunting speech (Ewald); or a speech dark and involved, such as needed a *mēlits*, or interpreter (cf. Gen. xlii. 23; 2 Chr. xxxii. 31; Job xxxiii. 23; Is. xliiii. 27); or again, as by Delitzsch (*Der prophet Habakuk*, p. 59), a brilliant or splendid saying ("Glanz- oder Wohlbede, oratio splendida, elegans, luminibus ornata"). This last interpretation is based upon the usage of the word in modern Hebrew, but it certainly does not appear appropriate to the Proverbs; and the first explanation, which Ewald adopts, is as little to the point. It is better to understand it as a dark enigmatical saying, which, like the *māshāl*, might assume the character of sarcasm and irony, though not essential to it.

2. *Canonicity of the book and its place in the Canon.*—The canonicity of the Book of Proverbs has never been disputed except by the Jews themselves. It appears to have been one of the points urged by the school of Shammai, that the contradictions in the Book of Proverbs rendered it apocryphal. In the Talmud (*Shabbath*, fol. 30 b) it is said: "And even the Book of Proverbs they sought to make apocryphal, because its words were contradictory the one to the other. And wherefore did they not make it apocryphal? The words of the book Koheleth [are] not [apocryphal] we have

<sup>a</sup> Compare Arab. مَثَل, *mathala*, "to be like;" מִשַּׁל, *mishal*, "likeness;" and the adj. מִשְׁלֵי, *mishal*, "like." The cognate Æthiopic and Syriac roots have the same meaning.

looked and found the sense: here also we must look." That is, the book Koheleth, in spite of the apparent contradictions which it contains, is allowed to be canonical, and therefore the existence of similar contradictions in the Book of Proverbs forms no ground for refusing to acknowledge its canonicity. It occurs in all the Jewish lists of canonical books, and is reckoned among what are called the "writings" (*Cethubim*) or Hagiographa, which form the third great division of the Hebrew Scriptures. Their order in the Talmud (*Baba Bathra*, fol. 14 b) is thus given: Ruth, Psalms, Job, Proverbs, Ecclesiastes, Song of Songs, Lamentations, Daniel, Esther, Ezra (including Nehemiah), and Chronicles. It is in the *Tosephoth* on this passage that Proverbs and Ecclesiastes are styled "books of wisdom." In the German MSS. of the Hebrew O. T. the Proverbs are placed between the Psalms and Job, while in the Spanish MSS., which follow the Masorah, the order is, Psalms, Job, Proverbs. This latter is the order observed in the Alexandrian MS. of the LXX. Melito, following another Greek MS., arranges the Hagiographa thus: Psalms, Proverbs, Ecclesiastes, Song of Songs, Job, as in the list made out by the Council of Laodicea; and the same order is given by Origen, except that the Book of Job is separated from the others by the prophets Isaiah, Jeremialh, Daniel, and Ezekiel. But our present arrangement existed in the time of Jerome (see *Præf. in libr. Regum* iii.; "Tertius ordo ἀγιογγραφα possidet. Et primus liber incipit ab Job. Secundus a David. . . . Tertius est Salomon, tres libros habens: Proverbia, quæ illi parabolæ, id est Masaloth appellat: Ecclesiastes, id est, Coeleth: Canticum Canticorum, quem titulo Sir Asirim prænotant"). In the Peshito Syriac, Job is placed before Joshua, while Proverbs and Ecclesiastes follow the Psalms, and are separated from the Song of Songs by the Book of Ruth. Gregory of Nazianzus, apparently from the exigencies of his verse, arranges the writings of Solomon in this order, Ecclesiastes, Song of Songs, Proverbs. Pseudo-Epiphanius places Proverbs, Ecclesiastes, and Song of Songs between the 1st and 2d Books of Kings and the minor prophets. The Proverbs are frequently quoted or alluded to in the New Testament, and the canonicity of the book thereby confirmed. The following is a list of the principal passages:—

Prov. i. 16	compare	Rom. iii. 10, 15.
iii. 7	"	Rom. xii. 16.
iii. 11, 12	"	Heb. xii. 5, 6; see also Rev. iii. 19.
iii. 34	"	Jam. iv. 6.
x. 12	"	1 Pet. iv. 8.

xxv. 21, 22	"	Rom. xii. 20.
xxvi. 11	"	2 Pet. ii. 22.
xxvii. 1	"	Jam. iv. 13, 14.

3. *Authorship and date.*—The superscriptions which are affixed to several portions of the Book of Proverbs, in i. 1, x. 1, xxv. 1, attribute the authorship of those portions to Solomon, the son of David, king of Israel. With the exception of the last two chapters, which are distinctly assigned to other authors, it is probable that the statement of the superscriptions is in the main correct, and

that the majority of the proverbs contained in the book were uttered or collected by Solomon. It was natural, and quite in accordance with the practice of other nations, that the Hebrews should connect Solomon's name with a collection of maxims and precepts which form a part of their literature to which he is known to have contributed most largely (1 K. iv. 32). In the same way the Greeks attributed most of their maxims to Pythagoras; the Arabs to Lokman, Abu Obeid, Al Mofaddel, Meidani, and Zamakshari; the Persians to Ferid Attar; and the northern people to Odin. But there can be no question that the Hebrews were much more justified in assigning the Proverbs to Solomon, than the nations which have just been enumerated were in attributing the collections of national maxims to the traditional authors above mentioned. The parallel may serve as an illustration, but must not be carried too far. According to Bartolucci (*Bibl. Robb.* iv. 373 b), quoted by Carpov (*Introd.* pt. ii. c. 4, § 4), the Jews ascribe the composition of the Song of Songs to Solomon's youth, the Proverbs to his mature manhood, and the Ecclesiastes to his old age. But in the *Seær Olam Rabba* (ch. xv. p. 41, ed. Meyer) they are all assigned to the end of his life. There is nothing unreasonable in the supposition that many, or most of the proverbs in the first twenty-nine chapters may have originated with Solomon. Whether they were left by him in their present form is a distinct question, and may now be considered. Before doing so, however, it will be necessary to examine the different parts into which the book is naturally divided. Speaking roughly, it consists of three main divisions, with two appendices. 1. Chaps. i.—ix. form a connected *mashâl*, in which Wisdom is praised and the youth exhorted to devote themselves to her. This portion is preceded by an introduction and title describing the character and general aim of the book. 2. Chaps. x. 1—xxiv., with the title, "the Proverbs of Solomon," consist of three parts: x. 1—xxii. 16, a collection of single proverbs, and detached sentences out of the region of moral teaching and worldly prudence; xxii. 17—xxiv. 21, a more connected *mashâl*, with an introduction, xxii. 17—22, which contains precepts of righteousness and prudence: xxiv. 23—34, with the inscription, "these also belong to the wise," a collection of unconnected maxims, which serve as an appendix to the preceding. Then follows the third division, xxv.—xxix., which, according to the superscription, professes to be a collection of Solomon's proverbs, consisting of single sentences, which the men of the court of Hezekiah copied out. The first appendix, ch. xxx., "the words of Agur," is a collection of partly proverbial and partly enigmatical sayings; the second, ch. xxxi., is divided into two parts, "the words of king Lemuel" (1—6), and an alphabetical acrostic in praise of a virtuous woman, which occupies the rest of the chapter. Rejecting, therefore, for the present, the two last chapters, which do not even profess to be by Solomon, or to contain any of his teaching, we may examine the other divisions for the purpose of ascertaining whether any conclusion as to their origin and authorship can be arrived at. At first sight it is evident that there is a marked difference between the collections of single maxims and the longer didactic pieces, which both come under the general head *mashâl*. The collection of Solomon's proverbs made by the men of Hezekiah (xxv.—xxix.) belongs to the former class of detached

sentences. and in this respect corresponds with those in the second main division (x. 1-xxii. 16). The expression in xxv. 1, "these also are the proverbs of Solomon," implies that the collection was made as an appendix to another already in existence, which we may not unreasonably presume to have been that which stands immediately before it in the present arrangement of the book. Upon one point most modern critics are agreed, that the germ of the book in its present shape is the portion x. 1-xxii. 16, to which is prefixed the title, "the Proverbs of Solomon." At what time it was put into the form in which we have it, cannot be exactly determined. Ewald suggests as a probable date about two centuries after Solomon. The collector gathered many of that king's genuine sayings, but must have mixed with them many by other authors and from other times, earlier and later. It seems clear that he must have lived before the time of Hezekiah, from the expression in xxv. 1, to which reference has already been made. In this portion many proverbs are repeated in the same, or a similar form, a fact which of itself militates against the supposition that all the proverbs contained in it proceeded from one author. Compare xiv. 12 with xvi. 25 and xxi. 2<sup>a</sup>; xxi. 9 with xxi. 19; x. 1<sup>a</sup> with xv. 20<sup>a</sup>; x. 2<sup>b</sup> with xi. 4<sup>b</sup>; x. 15<sup>a</sup> with xviii. 11<sup>a</sup>; xv. 33<sup>b</sup> with xviii. 12<sup>b</sup>; xi. 21<sup>a</sup> with xvi. 5<sup>b</sup>; xiv. 31<sup>a</sup> with xvii. 5<sup>a</sup>; xix. 12<sup>a</sup> with xx. 2<sup>a</sup>. Such repetitions, as Bertheau remarks, we do not expect to find in a work which proceeds immediately from the hands of its author. But if we suppose the contents of this portion of the book to have been collected by one man out of divers sources, oral as well as written, the repetitions become intelligible. Bertholdt argues that many of the proverbs could not have proceeded from Solomon, because they presuppose an author in different circumstances of life. His arguments are extremely weak, and will scarcely bear examination. For example, he asserts that the author of x. 5, xii. 10, 11, xiv. 4, xx. 4, must have been a landowner or husbandman; that x. 15 points to a man living in want; xi. 14, xiv. 20, to a private man living under a well-regulated government; xi. 26, to a tradesman without wealth; xii. 4, to a man not living in polygamy; xii. 9, to one living in the country; xiii. 7, 8, xvi. 8, to a man in a middle station of life; xiv. 1. xv. 25, xvi. 11, xvii. 2, xix. 13, 14, xx. 10, 14, 23, to a man of the rank of a citizen; xiv. 21, xvi. 19, xviii. 23, to a man of low station; xvi. 10, 12-15, xix. 12, xx. 2, 26, 28, to a man who was not a king; xxi. 5, to one who was acquainted with the course of circumstances in the common citizen life; xxi. 17, to one who was an enemy to luxury and festivities. It must be confessed, however, that an examination of these passages is by no means convincing to one who reads them without having a theory to maintain. That all the proverbs in this collection are not Solomon's is extremely probable; that the majority of them are his there seems no reason to doubt, and this fact would account for the general title in which they are all attributed to him. It is obvious that between the proverbs in this collection and those that precede and follow it, there is a marked difference, which is sufficiently apparent even in the English Version. The poetical style, says Ewald, is the simplest and most antique imaginable. Most of the proverbs are examples of antithetic parallelism, the second clause containing the contrast to the first. Each verse consists of two members, with generally three or four, but

seldom five words in each. The only exception to the first law is xix. 7, which Ewald accounts for by supposing a clause omitted. This supposition may be necessary to his theory, but cannot be admitted on any true principle of criticism. Furthermore, the proverbs in this collection have the peculiarity of being contained in a single verse. Each verse is complete in itself, and embodies a perfectly intelligible sentiment; but a thought in all its breadth and definiteness is not necessarily exhausted in a single verse, though each verse must be a perfect sentence, a proverb, a lesson. There is one point of great importance to which Ewald draws attention in connection with this portion of the book; that it is not to be regarded, like the collections of proverbs which exist among other nations, as an accumulation of the popular maxims of lower life which passed current among the people and were gathered thence by a learned man; but rather as the efforts of poets, artistically and scientifically arranged, to comprehend in short sharp sayings the truths of religion as applied to the infinite cases and possibilities of life. While admitting, however, this artistic and scientific arrangement, it is difficult to assent to Ewald's further theory, that the collection in its original shape had running through it a continuous thread, binding together what was manifold and scattered, and that in this respect it differed entirely from the form in which it appears at present. Here and there, it is true, we meet with verses grouped together apparently with a common object, but these are the exceptions, and a rule so general cannot be derived from them. No doubt the original collection of Solomon's proverbs, if such there were, from which the present was made, underwent many changes, by abbreviation, transposition, and interpolation, in the two centuries which, according to Ewald's theory, must have elapsed before the compiler of the present collection put them in the shape in which they have come down to us; but evidence is altogether wanting to show what that original collection may have been, or how many of the three thousand proverbs which Solomon is said to have spoken, have been preserved. There is less difficulty in another proposition of Ewald's, to which a ready assent will be yielded: that Solomon was the founder of this species of poetry; and that in fact many of the proverbs here collected may be traced back to him, while all are inspired with his spirit. The peace and internal tranquillity of his reign were favorable to the growth of a contemplative spirit, and it is just at such a time that we should expect to find gnomic poetry developing itself and forming an epoch in literature.

In addition to the distinctive form assumed by the proverbs of this earliest collection, may be noticed the occurrence of favorite and peculiar words and phrases. "Fountain of life" occurs in Prov. x. 11, xiii. 14, xiv. 27, xvi. 22 (comp. Ps. xxxvi. 9 [10]); "tree of life," Prov. xi. 30, xiii. 12, xv. 4 (comp. iii. 18); "snares of death," Prov. xiii. 14, xiv. 27 (comp. Ps. xviii. 5 [6]); רפא, *marpé*, "healing, health," Prov. xii. 18, xiii. 17, xvi. 24 (comp. xiv. 30, xv. 4), but this expression also occurs in iv. 22, vi. 15 (con p. iii. 8), and is hardly to be regarded as peculiar to the older portion of the book; nor is it fair to say that the passages in the early chapters in which it occurs are imitations; החיתא, *mêchittâh*, "destruction," Prov. x. 14, 15, 29, xiii. 3, xiv. 28, xviii. 7, xxi. 15

and nowhere else in the book; יָפְחִיחַ, *yáphách*, which Ewald calls a participle, but which may be regarded as a future with the relative omitted, Prov. xii. 17, xiv. 5, 25, xix. 5, 9 (comp. vi. 19);

הִלְפֵה, *seleph*, "perverseness," Prov. xi. 3, xv. 4;

הִלְפֵה, *silléph*, the verb from the preceding, Prov.

xiii. 6, xix. 3, xxii. 12; לָא יִנְאָהֶה, *lá yinnákeh*,

"shall not be acquitted," Prov. xi. 21, xvi. 5, xvii.

5, xix. 5, 9 (comp. vi. 29, xxviii. 20); רִדְּדֵה, *rid-*

*déph*, "pursued," Prov. xi. 19, xii. 11, xiii. 21,

xv. 9, xix. 7 (comp. xxviii. 19). The antique ex-

pressions אַד אַרְגֵּי אֵה, *'ad argy'áh*, A. V., "but

for a moment," Prov. xii. 19; יָד לְיָד, *yád l'yád*,

lit. "hand to hand," Prov. xi. 21, xvi. 5; רִתְּגַלְתָּ,

*hithgalka*, "meddled with," Prov. xvii. 14, xviii.

1, xx. 3; נִרְגָן, *nirgán*, "whisperer, talebearer,"

Prov. xvi. 28, xviii. 8 (comp. xxvi. 20, 22), are

almost confined to this portion of the Proverbs.

There is also the peculiar usage of יֵשׁ, *yish*,

"there is," in Prov. xi. 24, xii. 18, xiii. 7, 23, xiv.

12, xvi. 25, xviii. 24, xx. 15. It will be observed

that the use of these words and phrases by no

means assists in determining the authorship of this

section, but gives it a distinctive character.

With regard to the other collections, opinions

differ widely both as to their date and authorship.

Ewald places next in order chaps xxv.-xxix., the

superscription to which fixes their date about the

end of the 8th century B. C. "These also are the

proverbs of Solomon, which the men of Hezekiah

copied out," or compiled. The memory of these

learned men of Hezekiah's court is perpetuated in

Jewish tradition. In the Talmud (*Baba Bathra*,

fol. 15 a) they are called the סֵפֶרֶה, *se'írah*, "so-

ciety" or "academy" of Hezekiah, and it is there

said, "Hezekiah and his academy wrote Isaiah,

Proverbs, Song of Songs, Ecclesiastes." R. Gedaliah

(*Shalsheleth Hakkabbalah*, fol. 66 b), quoted by

Warpzov (*Introd.* part. ii. c. 4, § 4), says, "Isaiah

carpe his own book and the Proverbs, and the Song

of Songs, and Ecclesiastes." Many of the proverbs

in this collection are mere repetitions, with slight

variations, of some which occur in the previous

by Solomon or any king, but by a man who had lived for a long time at a court. In xxvii. 11, it is no monarch who speaks, but an instructor of youth; xxviii. 16 censures the very errors which stained the reign of Solomon, and the effect of which deprived his son and successor of the ten tribes, xxvii. 23-27 must have been written by a sage who led a nomad life. There is more force in these objections of Bertholdt than in those which he advanced against the previous section. Hensler (quoted by Bertholdt) finds two or three sections in this division of the book, which he regards as extracts from as many different writings of Solomon. But Bertholdt confesses that his arguments are not convincing.

The peculiarities of this section distinguish it from the older proverbs in x.-xxii. 16. Some of these may be briefly noted. The use of the interrogation "seest thou?" in xxvi. 12, xxix. 20 (comp. xxii. 29), the manner of comparing two things by simply placing them side by side and connecting them with the simple copula "and," as in xxv. 3, 20, xxvi. 3, 7, 9, 21, xxvii. 15, 20. We miss the pointed antithesis by which the first collection was distinguished. The verses are no longer of two equal members; one member is frequently shorter than the other, and sometimes even the verse is extended to three members in order fully to exhaust the thought. Sometimes, again, the same sense is extended over two or more verses, as in xxv. 4, 5, 6, 7, 8-10; and in a few cases a series of connected verses contains longer exhortations to morality and rectitude, as in xxvi. 23-28, xxvii. 23-27. The character of the proverbs is clearly distinct. Their construction is looser and weaker, and there is no longer that sententious brevity which gives weight and point to the proverbs in the preceding section. Ewald thinks that in the contents of this portion of the book there are traceable the marks of a later date; pointing to a state of society which had become more dangerous and hostile, in which the quiet domestic life had reached greater perfection, but the state and public security and confidence had sunk deeper. There is, he says, a cautious and mournful tone in the language when the rulers are spoken of; the breath of that untroubled joy for the king and the high reverence paid to him, which marked the former collection, does not animate these proverbs. The state of society at the end of the 8th century B. C., with which we are thoroughly acquainted from the writings of the prophets, corresponds with the condition of things hinted at in the proverbs of this section, and this may therefore, in accordance with the superscription, be accepted as the date at which the collection was made. Such is Ewald's conclusion. It is true we know much of the later times of the monarchy, and that the condition of those times was such as to call forth many of the proverbs of this section as the result of the observation and experience of their authors, but it by no means follows that the whole section partakes of this later tone; or that many or most of the proverbs may not reach back as far as the time of Solomon, and so justify the general title which is given to the section, "These also are the proverbs of Solomon." But of the state of society in the age of Solomon himself we know so little, everything belonging to that period is encircled with such a halo of dazzling splendor, in which the people almost disappear, that it is impossible to assert that the circumstances of the times might not have given birth to many of the maxims which

apparently carry with them the marks of a later period. At best such reasoning from internal evidence is uncertain and hypothetical, and the inferences drawn vary with each commentator who examines it. Ewald discovers traces of a later age in chapters xxviii., xxix., though he retains them in this section, while Hitzig regards xxviii. 17-xxix. 27 as a continuation of xxii. 16, to which they were added probably after the year 750 B. C.<sup>a</sup> This apparent precision in the assignment of the dates of the several sections, it must be confessed, has very little foundation, and the dates are at best but conjectural. All that we know about the section xxv.-xxix., is that in the time of Hezekiah, that is, in the last quarter of the 8th century B. C. it was supposed to contain what tradition had handed down as the proverbs of Solomon, and that the majority of the proverbs were believed to be his there seems no good reason to doubt. Beyond this we know nothing. Ewald, we have seen, assigns the whole of this section to the close of the 8th century B. C., long before which time, he says, most of the proverbs were certainly not written. But he is then compelled to account for the fact that in the superscription they are called "the proverbs of Solomon." He does so in this way. Some of the proverbs actually reach back into the age of Solomon, and those which are not immediately traceable to Solomon or his time, are composed with similar artistic flow and impulse. If the earlier collection rightly bears the name of "the proverbs of Solomon" after the mass which are his, this may claim to bear such a title of honor after some important elements. The argument is certainly not sound, that, because a collection of proverbs, the majority of which are Solomon's, is distinguished by the general title "the proverbs of Solomon," therefore a collection, in which at most but a few belong to Solomon or his time, is appropriately distinguished by the same superscription. It will be seen afterwards that Ewald attributes the superscription in xxv. 1 to the compiler of xxii. 17-xxv. 1.

The date of the sections i.-ix., xxii. 17-xxv. 1, has been variously assigned. That they were added about the same period Ewald infers from the occurrence of favorite words and constructions, and that that period was a late one he concludes from the traces which are manifest of a degeneracy from the purity of the Hebrew. It will be interesting to examine the evidence upon this point, for it is a remarkable fact, and one which is deeply instructive as showing the extreme difficulty of arguing from internal evidence, that the same details lead Ewald and Hitzig to precisely opposite conclusions; the former placing the date of i.-ix. in the first half of the 7th century, while the latter regards it as the oldest portion of the book, and assigns it to the 9th century. To be sure those points on which Ewald relies as indicating a late date for the section, Hitzig summarily disposes of as interpolations. Among the favorite words which occur in these chapters are חֲכָמֹת, *chocmôth*, "wisdoms," for "wisdom" in the abstract, which is found only in i. 20, ix. 1,

<sup>a</sup> Hitzig's theory about the Book of Proverbs in its present shape is this: that the oldest portion consists of chaps. i.-ix., to which was added, probably after the year 750 B. C., the second part, x.-xxii. 16, xxviii. 17-xxix.: that in the last quarter of the same century the anthology, xxv.-xxviii., was formed, and coming into the hands of a man who already possessed the

xxiv. 7; זָרָה, *zârâh*, "the strange woman," and

נֹכְרִיָּה, *noçryâh*, "the foreigner," the adulteress who seduces youth, the antithesis of the virtuous wife or true wisdom, only occur in the first collection in xxii. 14, but are frequently found in this, ii. 16, v. 3, 20, vi. 24, vii. 5, xxiii. 27. Traces of the decay of Hebrew are seen in such passages as

v. 2, where שְׂפָתַי, a dual fem., is constructed with a verb masc. pl., though in v. 3 it has properly the feminine. The unusual plural אִישִׁים (viii. 4), says Ewald, would hardly be found in writings before the 7th century. These difficulties are avoided by Hitzig, who regards the passages in which they occur as interpolations. When we come to the internal historical evidence these two authorities are no less at issue with regard to their conclusions from it. There are many passages which point to a condition of things in the highest degree confused, in which robbers and lawless men roamed at large through the land and endeavored to draw aside their younger contemporaries to the like dissolute life (i. 11-19, ii. 12-15, iv. 14-17, xxiv. 15). In this Ewald sees traces of a late date. But Hitzig avoids this conclusion by asserting that at all times there are individuals who are reckless and at war with society and who attach themselves to bands of robbers and freebooters (comp. Judg. ix. 4, xi. 3; 1 Sam. xxii. 2; Jer. vii. 11), and to such allusion is made in Prov. i. 10; but there is nowhere in these chapters (i.-ix.) a complaint of the general depravity of society. So far he is unquestionably correct, and no inference with regard to the date of the section can be drawn from these references. Further evidence of a late date Ewald finds in the warnings against lightly rising to oppose the public order of things (xxiv. 21), and in the beautiful exhortation (xxiv. 11) to rescue with the sacrifice of one's self the innocent who is being dragged to death, which points to a confusion of right pervading the whole state, of which we nowhere see traces in the older proverbs. With these conclusions Hitzig would not disagree, for he himself assigns a late date to the section xxii. 17-xxiv. 34. We now come to evidence of another kind, and the conclusions drawn from it depend mainly upon the date assigned to the Book of Job. In this collection, says Ewald, there is a new danger of the heart warned against, which is not once thought of in the older collections, envy at the evident prosperity of the wicked (iii. 31, xxiii. 17, xxiv. 1, 19), a subject which for the first time is brought into the region of reflection and poetry in the Book of Job. Other parallels with this book are found in the teaching that man, even in the chastisement of God, should see his love, which is the subject of Prov. iii., and is the highest argument in the Book of Job; the general apprehension of Wisdom as the Creator and Disposer of the world (Prov. iii., viii.) appears as a further conclusion from Job xxviii.; and though the author of the first nine chapters of the Proverbs does not adopt the language of the Book of Job, but only in some measure its spirit and teaching, yet some images and words appear to be reëch-

other two parts, inspired him with the composition of xxii. 17-xxiv. 34, which he placed before the anthology, and inserted the two before the last sheet of the second part. Then, finding that xxviii. 17 was left without a beginning, being separated from xxii. 1-16, he wrote xxviii. 1-16 on his last blank leaf. This was after the exile.

sed here from that book (comp. Prov. viii. 25 with Job xxxviii. 6; Prov. ii. 4, iii. 14, viii. 11, 19, with Job xxviii. 12-19; Prov. vii. 23 with Job xvi. 13, xx. 25; Prov. iii. 23, &c., with Job v. 22, &c.). Consequently the writer of this section must have been acquainted with the Book of Job, and wrote at a later date, about the middle of the 7th century B. C. Similar resemblances between passages in the early chapters of the Proverbs and the Book of Job are observed by Hitzig (comp. Prov. iii. 25 with Job v. 21; Prov. ii. 4, 14 with Job iii. 21, 22; Prov. iv. 12 with Job xviii. 7; Prov. iii. 11, 13 with Job v. 17; Prov. viii. 25 with Job xv. 7), but the conclusion which he derives is that the writer of Job had already read the Book of Proverbs, and that the latter is the more ancient. Reasoning from evidence of the like kind he places this section (i.-ix.) later than the Song of Songs, but earlier than the second collection (x. 1-xxii. 16, xxviii. 17-xxix.), which existed before the time of Hezekiah, and therefore assigns it to the 9th century B. C. Other arguments in support of this early date are the fact that idolatry is nowhere mentioned, that the offerings had not ceased (vii. 14), nor the congregations (v. 14). The two last would agree as well with a late as with an early date, and no argument from the silence with respect to idolatry can be allowed any weight, for it would equally apply to the 9th century as to the 7th. To all appearances, Hitzig continues, there was peace in the land, and commerce was kept up with Egypt (vii. 16). The author may have lived in Jerusalem (i. 20, 21, vii. 12, viii. 3); vii. 16, 17 points to the luxury of a large city, and the educated language belongs to a citizen of the capital. After a careful consideration of all the arguments which have been adduced, by Ewald for the late, and by Hitzig for the early date of this section, it must be confessed that they are by no means conclusive, and that we must ask for further evidence before pronouncing so positively as they have done upon a point so doubtful and obscure. In one respect they are agreed, namely, with regard to the unity of the section, which Ewald considers as an original whole, perfectly connected and flowing as it were from one outpouring. It would be a well-ordered whole, says Hitzig, if the interpolations, especially vi. 1-19, iii. 22-26, viii. 4-12, 14-16, ix. 7-10, &c., are rejected. It never appears to strike him that such a proceeding is arbitrary and uncritical in the highest degree, though he clearly plumes himself on his critical sagacity. Ewald finds in these chapters a certain development which shows that they must be regarded as a whole and the work of one author. The poet intended them as a general introduction to the Proverbs of Solomon, to recommend wisdom in general. The blessings of wisdom the reward of him who boldly strives after her are repeatedly set forth in the most charming manner, as on the other hand folly is represented with its disappointment and enduring misery. There are three main divisions after the title, i. 1-7. (a.) i. 8-iii. 35; a general exhortation to the youth to follow wisdom, in which, all, even the higher arguments, are touched upon, but nothing fully completed. (b.) iv. 1-vi. 19 exhausts whatever is individual and particular; while in (c.) the language rises gradually with ever-increasing power to the most universal and loftiest themes, to conclude in the sublimest and almost lyrical strain (vi. 20-ix. 18). But, as Bertheau remarks, there appears nowhere throughout this section to be any reference to what follows, which must have been the case had it been intended

for an introduction. The development and progress which Ewald observes in it are by no means so striking as he would have us believe. The unity of plan is no more than would be found in a collection of admonitions by different authors referring to the same subject, and is not such as to necessitate the conclusion that the whole is the work of one. There is observable throughout the section, when compared with what is called the earlier collection, a complete change in the form of the proverb. The single proverb is seldom met with, and is rather the exception, while the characteristics of this collection are connected descriptions, continuous elucidations of a truth, and longer speeches and exhortations. The style is more highly poetical, the parallelism is synonymous and not antithetic or synthetic, as in x. 1-xxii. 16; and another distinction is the usage of Elohim in ii. 5, 17, iii. 4, which does not occur in x. 1-xxii. 16. Amidst this general likeness, however, there is considerable diversity. It is not necessary to lay so much stress as Bertheau appears to do upon the fact that certain paragraphs are distinguished from those with which they are placed, not merely by their contents, but by their external form; nor to argue from this that they are therefore the work of different authors. Some paragraphs, it is true, are completed in ten verses, as i. 10-19, iii. 1-10, 11-20, iv. 10-19, viii. 12-21, 22-31; but it is too much to assert that an author because he sometimes wrote paragraphs of ten verses, should always do so, or to say with Bertheau, if the whole were the work of one author it would be very remarkable if he only now and then bound himself by the strict law of numbers. The argument assumes the strictness of the law, and then attempts to bind the writer to observe it. There is more force in the appeal to the difference in the formation of sentences and the whole manner of the language as indicating diversity of authorship. Compare ch. ii with vii. 4-27, where the same subject is treated of. In the former, one sentence is wearily dragged through 22 verses, while in the latter the language is easy, flowing, and appropriate. Again the connection is interrupted by the insertion of vi. 1-19. In the previous chapter the exhortation to listen to the doctrine of the speaker is followed by the warning against intercourse with the adulteress. In vi. 1-19 the subject is abruptly changed, and a series of proverbs applicable to different relations of life is introduced. From all this Bertheau concludes against Ewald that these introductory chapters could not have been the product of a single author, forming a gradually developed and consistent whole, but that they are a collection of admonitions by different poets, which all aim at rendering the youth capable of receiving good instruction, and inspiring him to strive after the possession of wisdom. This supposition is somewhat favored by the frequent repetitions of favorite figures or impersonations: the strange woman and wisdom occur many times over in this section, which would hardly have been the case if it had been the work of one author. But the occurrence of these repetitions, if it is against the unity of authorship, indicates that the different portions of the section must have been contemporaneous, and were written at a time when such vivid impersonations of wisdom and its opposite were current and familiar. The tone of thought is the same, and the question therefore to be considered is whether it is more probable that a writer would repeat himself, or that fragments of a number of writers should be found, distinguished by the same way of thinking,

and by the use of the same striking figures and personifications. If the proverbs spoken by one man were circulated orally for a time, and after his death collected and arranged, there would almost of necessity be a recurrence of the same expressions and illustrations, and from this point of view the argument from repetitions loses much of its force. With regard to the date as well as the authorship of this section it is impossible to pronounce with certainty. In its present form it did not exist till probably some long time after the proverbs which it contains were composed. There is positively no evidence which would lead us to a conclusion upon this point, and consequently the most opposite results have been arrived at: Ewald, as we have seen, placing it in the 7th century, while Hitzig refers it to the 9th. At whatever time it may have reached its present shape, there appears no sufficient reason to conclude that Solomon may not have uttered many or most of the proverbs which are here collected, although Ewald positively asserts that we here find no proverb of the Solomonian period. He assumes, and it is a mere assumption, that the form of the true Solomonian proverb is that which distinguishes the section x. 1-xxii. 16, and has already been remarked. Bleek regards cc. i.-ix. as a connected *māshāl*, the work of the last editor, written by him as an introduction to the Proverbs of Solomon which follow, while i. 1-6 was intended by him as a superscription to indicate the aim of the book, less with reference to his own *māshāl* than to the whole book, and especially to the proverbs of Solomon contained in it. Bertholdt argues against Solomon being the author of these early chapters, that it was impossible for him, with his large harem, to have given so forcibly the precept about the blessings of a single wife (v. 18. &c.): nor, with the knowledge that his mother became the wife of David through an act of adultery, to warn so strongly against intercourse with the wife of another (vi. 24, &c., vii. 5-23). These arguments do not appear to us so strong as Bertholdt regarded them. Eichhorn, on the contrary, maintains that Solomon wrote the introduction in the first nine chapters. From this diversity of opinion, which he it remarked is entirely the result of an examination of internal evidence, it seems to follow naturally that the evidence which leads to such varying conclusions is of itself insufficient to decide the question at issue.

We now pass on to another section, xxii. 17-xxiv., which contains a collection of proverbs marked by certain peculiarities. These are, 1. The structure of the verses, which is not so regular as in the preceding section, x. 1-xxii. 16. We find verses of eight, seven, or six words, mixed with others of eleven (xxii. 2), xxiii. 31, 35), fourteen (xxiii. 29) and eighteen words (xxiv. 12). The equality of the verse members is very much disturbed, and there is frequently no trace of parallelism. 2. A sentence is seldom completed in one verse, but most frequently in two; three verses are often closely connected (xxiii. 1-3, 6-8, 19-21); and sometimes as many as five (xxiv. 30-34). 3. The form of address "my son," which is so frequent in the first nine chapters, occurs also here in xxiii. 19, 26, xxiv. 13; and the appeal to the hearer is often made in the second person. Ewald regards this section as a kind of appendix to the earliest collection of the proverbs of Solomon, added not long after the introduction in the first nine chapters, though not by the same author. He thinks it probable that the compiler of this section added

also the collection of proverbs which was made by the learned men of the court of Hezekiah, to which he wrote the superscription in xxv. 1. This theory of course only affects the date of the section in its present form. When the proverbs were written there is nothing to determine. Bertheau maintains that they in great part proceeded from one poet, in consequence of a peculiar construction which he employs to give emphasis to his presentation of a subject or object by repeating the pronoun (xxii. 19; xxiii. 14, 15, 19, 20, 28; xxiv. 6, 27, 32). The compiler himself appears to have added xxii. 17-21 as a kind of introduction. Another addition (xxiv. 23-34) is introduced with "these also belonged to the wise," and contains apparently some of "the words of the wise" to which reference is made in i. 6. Jahn regards it as a collection of proverbs not by Solomon. Hensler says it is an appendix to a collection of doctrines which is entirely lost and unknown; and with regard to the previous part of the section xxii. 17-xxiv. 22, he leaves it uncertain whether or not the author was a teacher to whom the son of a distinguished man was sent for instruction. Hitzig's theory has already been given.

After what has been said, the reader must be left to judge for himself whether Keil is justified in asserting so positively as he does the single authorship of cc. i.-xxix., and in maintaining that "the contents in all parts of the collection show one and the same historical background, corresponding only to the relations, ideas, and circumstances, as well as to the progress of the culture and experiences of life, acquired by the political development of the people in the time of Solomon."

The concluding chapters (xxx., xxxi.) are in every way distinct from the rest and from each other. The former, according to the superscription, contains "the words of Agur the son of Jakeh." Who was Agur, and who was Jakeh, are questions which have been often asked, and never satisfactorily answered. The Rabbins, according to Rashi, and Jerome after them, interpreted the name symbolically of Solomon, who "collected understanding" (from  $\text{אָגַר}$ , *agur*, "to collect," "gather,"), and is elsewhere called "Kohleth." All that can be said of him is that he is an unknown Hebrew sage, the son of an equally unknown Jakeh, and that he lived after the time of Hezekiah. Ewald attributes to him the authorship of xxx. 1-xxxi. 9, and places him not earlier than the end of the 7th or beginning of the 6th cent. B. C. Hitzig, as usual, has a strange theory: that Agur and Lemuel were brothers, both sons of the queen of Massa, a district in Arabia, and that the father was the reigning king. [See JAKEH.] Bunsen (*Bibelwerk*, i. p. clxxviii.), following Hitzig, contends that Agur was an inhabitant of Massa, and a descendant of one of the five hundred Simeonites who in the reign of Hezekiah drove out the Amalekites from Mount Seir. All this is mere conjecture. Agur, whoever he was, appears to have had for his pupils Ithiel and Ucal, whom he addresses in xxx. 1-6, which is followed by single proverbs of Agur's. Ch. xxxi. 1-9 contains "the words of king Lemuel, the prophecy that his mother taught him." Lemuel, like Agur, is unknown. It is even uncertain whether he is to be regarded as a real personage, or whether the name is merely symbolical, as Eichhorn and Ewald maintain. If the present text be retained it is difficult to see what other conclu-

son can be arrived at. If Lemuel were a real personage he must have been a foreign neighbor-king or the chief of a nomad tribe, and in this case the proverbs attributed to him must have come to the Hebrews from a foreign source, which is highly improbable and contrary to all we know of the people. Dr. Davidson indeed is in favor of altering the punctuation of xxx. 1, with Hitzig and Bertheau, by which means Agur and Lemuel became brothers, and both sons of a queen of Massa. Reasons against this alteration of the text are given under the article JAKEH. Eichhorn maintains that Lemuel is a figurative name appropriate to the subject. [LEMUEL.]

The last section of all, xxxi. 10-31, is an alphabetical acrostic in praise of a virtuous woman. Its artificial form stamps it as the production of a late period of Hebrew literature, perhaps about the 7th century B. C. The coloring and language point to a different author from the previous section, xxx. 1-xxxi. 9.

To conclude, it appears, from a consideration of the whole question of the manner in which the Book of Proverbs arrived at its present shape, that the nucleus of the whole was the collection of Solomon's proverbs in x. 1-xxii. 16; that to this was added the further collection made by the learned men of the court of Hezekiah, xxv.-xxix.; that these two were put together and united with xxii. 17-xxiv., and that to this as a whole the introduction 1-ix. was affixed, but that whether it was compiled by the same writer who added xxii. 16-xxiv. cannot be determined. Nor is it possible to assert that this same compiler may not have added the concluding chapters of the book to his previous collection. With regard to the date at which the several portions of the book were collected and put in their present shape, the conclusions of various critics are uncertain and contradictory. The chief of these have already been given.

The nature of the contents of the Book of Proverbs precludes the possibility of giving an outline of its plan and object. Such would be more appropriate to the pages of a commentary. The chief authorities which have been consulted in the preceding pages are the introductions of Carpzov, Eichhorn, Bertholdt, Jahn, De Wette, Keil, Davidson, and Bleeck; Rosenmüller, Scholia; Ewald, *Die Dicht. des A. B.* 4 Th.; Bertheau, *Die Sprüche Salomo's*; Hitzig, *Die Sprüche Salomo's*; Elster, *Die Salomonischen Sprüche*. To these may be added, as useful aids in reading the Proverbs, the commentaries of Albert Schultens, of Eichel in Mendelssohn's Bible (perhaps the best of all), of Loewenstein, Umbreit, and Moses Stuart. There is also a new translation by Dr. Noyes, of Harvard University, of the three books of Proverbs, Ecclesiastes, and Canticles, which may be consulted, as well as the older works of Hodgson and Holden.

W. A. W.

\* The preceding discussion leaves room for a more particular analysis of the contents of this remarkable book. After a brief introduction (ch. i.

1-6), setting forth its design and uses, the ground-thought of the whole is expressed in ver. 7; namely, that all true knowledge has its beginning in the fear of God, the seminal principle of which the whole moral life is the growth, and the central law of our moral relations; that only fools despise this heavenly wisdom, and the means of acquiring it. This is the key to the instructions of the book. The following are very distinctly marked divisions.

1. Chapters i.-ix. First division, consisting of short continuous discourses, on various topics of religion and morality. Vv. 10-19. Against enticements to crime and criminal gains, and the fatal influences of a covetous spirit. Vv. 20-23. Wisdom's expostulations with those who refuse her warnings. Chap. ii. Rewards of those who seek wisdom.<sup>a</sup> Chap. iii. A discourse in several parts, commending kindness and truth, as foundation principles in all social relations (vv. 1-4); trust in Jehovah, and conscious reference to Him in all things (vv. 5-8); recognition of Him in the use of his gifts (vv. 9, 10), and filial submission to his chastisements (vv. 11, 12); blessedness of attaining the true wisdom (vv. 13-25); practical precepts for direction in the relations of social life (vv. 27-35). Chap. iv. Admonition to seek wisdom (vv. 1-9); to heed instruction and avoid the way of the wicked (vv. 10-19); to keep the heart, from which the outward life proceeds (Matt. xv. 19), and shun every deviation from the right (vv. 20-27). Chap. v. Admonition to shun the fatal snare of the strange woman (vv. 1-14); to regard the divinely instituted law of the marriage relation, and be satisfied with its pure and chaste enjoyments (vv. 15-23). Chap. vi. Against being surety for another (vv. 1-5); against slothfulness (vv. 6-11); against the false and insidious mischief-maker (vv. 12-15); seven abominations of Jehovah (vv. 16-19); value of parental instruction and of its restraints in the conduct of life (vv. 20-35). Chap. vii. Warning against the allurements of the strange woman. Chap. viii. WISDOM'S DISCOURSE. Her appeal to the sons of men (vv. 1-11); her claim to be their true and proper guide in the affairs of life (vv. 12-21); her relation to Jehovah as his companion and delight before the worlds were, and his associate in founding the heavens and the earth (vv. 22-31); blessedness of those who hearken to her voice (vv. 32-36).<sup>b</sup> Chap. ix. Wisdom's invitation to her feast (vv. 1-6); the scoffer scorns reproof, which the wise gratefully accepts (vv. 7-2); contrast of the foolish woman, and of the fate of her victim (vv. 13-18).

2. Chapters x.-xxii. 16. Second division, consisting of single unconnected sayings, or maxims, expressing in few words the accumulated treasures of practical wisdom.

3. Chapters xxii. 17-xxiv. 22. Third division, consisting of brief moral lessons, in very short, continuous discourses, less extended than those of the first division. An introductory paragraph admonishes to a diligent and heedful consideration of the words of the wise (vv. 17-21); against robbery and oppression of the weak and poor (vv. 22, 23); against companionship with the passionate man,

<sup>a</sup> \* In this beautifully constructed discourse, the statement of the conditions (vv. 1-4) is followed by a twofold expression of the reward of compliance; namely, one in ver. 5, and another in ver. 9, each confirmed and illustrated by the verses following it Vv. 12, 16, 20, all stand in the same relation; each expressing an end or object to be attained, of which the principal, and the sum of all, is given in ver. 20. T. J. C.

<sup>b</sup> \* WISDOM here personates a divine principle, established as the law of the universe, to which all created things are subjected. The delight of Jehovah, and the guide of his creative work she here claims to be the guide and friend of his creature man.

and the influence of his evil example (vv. 24, 25); against being surety for another's indebtedness (vv. 26, 27); against the perfidious removal of landmarks (v. 28); caution against indulgence of appetite at the table of a ruler (ch. xxiii. 1-3); folly of a craving for riches (vv. 4-5); accept no favors from the grudging and envious (vv. 6-8); leave the fool to his folly (v. 9); removal of landmarks, and violation of the orphan's domain, will surely be avenged (vv. 10, 11); correction needful and salutary for the child (vv. 13, 14); a parent's joy in a wise and discreet son (vv. 15-18); against companionship with the dissolute (vv. 19-21); regard due to parents (vv. 22-25); a parent's plea for the love and obedience of a son, especially as a security from the most fatal snare of the young (vv. 26-28); description of the victim of the intoxicating cup, and warning against its seductions (vv. 29-35).<sup>a</sup> Chap. xxix. consists, for the most part, of brief practical directions for the conduct of life, closing with the spirited description of the neglected fields of the sluggard.

4. Chapters xxv.-xxix. Fourth division, being another collection of the Proverbs of Solomon.

5. Chapters xxx.-xxxi. An appendix, containing the words of Agur, and the words of king Lemuel, and closing with the beautiful portraiture of a capable woman<sup>b</sup> (xxxi. 10-31).

From this brief and necessarily partial analysis of the book, something may be inferred of the extent and variety of its topics. Of the richness of its teachings, the trains of thought suggested by single pregnant expressions, an analysis can give no conception. The gnomic poetry of the most enlightened of other ancient nations will not bear comparison with it, in the depth and certainty of its foundation principles, or in the comprehensive-ness and the moral grandeur of its conceptions of human duty and responsibility. There is no relation in life which has not its appropriate instruction, no good or evil tendency without its proper incentive or correction. The human consciousness is everywhere brought into immediate relation with the Divine, with the All-seeing Eye, from which no act of the outward life or thought of the heart can be concealed, and man walks as in the presence of his Maker and Judge. But he is taught to know Him also as the loving Father and Guide, seeking to succor the tempted, to win the wayward, to restrain the lawless, to restore the penitent.

The knowledge of human nature, in its various developments, is also worthy of note. Every type of humanity is found in this ancient book; and though sketched three thousand years ago, is still as true to nature as if now drawn from its living representative.

In the beautiful description of the elaste relations of husband and wife (ch. v. 15-23), the writer's meaning is lost in the A. V., and his statements made contradictory, by rendering ver. 16 affirmatively. It should be rendered as an interrogative expostulation, thus:—

Shall thy fountains spread abroad,  
Streams of water in the streets?

The book is not wanting in strokes of wit and

<sup>a</sup> \* The grave humor of the inebriate's helpless unconsciousness, in vv. 34, 35, is but partially expressed in the A. V., through the defective rendering of the latter verse. It should be translated thus:—

They smite me, I feel no pain;  
They beat me, I know it not.

humor, by which the gravest moral lesson is often most effectively pointed. One example has been given above, from ch. xxiii. 35. In ch. xv. 33, it is said, with sarcastic humor:—

Wisdom dwells in the heart of the discerning;  
But in fools it shall be taught.

The "heart of the discerning" is Wisdom's home, her proper dwelling place, and there she abides. Fools are sometimes "taught" a lesson in wisdom; but it is after the manner described in Judges viii. 16, "he took thorns of the wilderness, and briers, and with them he taught the men of Succoth." In ch. xix. 7, it is said—

All the poor man's brethren hate him;  
Much more do his friends keep far from him;  
He follows after words—them he has!

A polished irony points the concluding member. The favors he is encouraged to hope for he finds to be empty talk, and that in seeking them he has "followed after words"—which he gets!

The older commentaries are given by Rosenmüller. The later critical works are: Holden, *Improved trans. of Prov. with notes crit. and expl.*, 1819. Dereser (*Die h. Schrift, von Brentano*), 1825. \* PROVOKE (from *provocare*, "to call forth") is used in a few passages of the A. V. in the sense of to "excite," "incite," "stimulate," as in Heb. x. 24, "to provoke to love and good works." So 1 Chr. xxi. 1; Rom. x. 19, xi. 11, 14; 2 Cor. ix. 2. H.

PROVINCE (פְּרוֹבִינְצָא: ἐπαρχία, N.T. χώρα, LXX.: *provincia*). It is not intended here to do

When shall I awake?  
I will seek it yet again.

All his senses are locked up. If there is any dreamy consciousness, it is of a longing to awake and take another draught; he will seek it yet again. T. J. C.

δ \* Not a "virtuous woman" (as in the A. V. "a virtuous woman who can find"), but one competent to the duties of her station. T. J. C.

more than indicate the points of contact which this word presents with Biblical history and literature.

(1.) In the O. T. it appears in connection with the wars between Ahab and Benhadad (1 K. xx. 14, 15, 19). The victory of the former is gained chiefly "by the young men of the princes of the provinces," *i. e.* probably, of the chiefs of tribes in the Gilead country, recognizing the supremacy of Ahab, and having a common interest with the Israelites in resisting the attacks of Syria. They are specially distinguished in ver. 15 from "the children of Israel." Not the hosts of Ahab, but the youngest warriors ("armor-bearers," Keil, *in loc.*) of the land of Jephthah and Elijah, fighting with a fearless faith, are to carry off the glory of the battle (comp. Ewald, *Gesch.* iii. 492).

(2.) More commonly the word is used of the divisions of the Chaldaean (Dan. ii. 49, iii. 1, 30) and the Persian kingdoms (Ezr. ii. 1; Neh. vii. 6; Esth. i. 1, 22, ii. 3, etc.). The occurrence of the word in Eccl. ii. 8, v. 8, may possibly be noted as an indication of the later date now commonly ascribed to that book.

The facts as to the administration of the Persian provinces which come within our view in these passages are chiefly these: Each province has its own governor, who communicates more or less regularly with the central authority for instructions (Ezr. iv. and v.). Thus Tatuai, governor of the provinces on the right bank of the Euphrates, applies to Darius to know how he is to act as to the conflicting claims of the Apharsachites and the Jews (Ezr. v.). Each province has its own system of finance, subject to the king's direction (Herod. iii. 89). The "treasurer" is ordered to spend a given amount upon the Israelites (Ezr. vii. 22), and to exempt them from all taxes (vii. 24). [TAXES.] The total number of the provinces is given at 127 (Esth. i. 1, viii. 9). Through the whole extent of the kingdom there is carried something like a postal system. The king's couriers (βιβασιόφοροι, the ἄγγαροι of Herod. viii. 98) convey his letters or decrees (Esth. i. 22, iii. 13). From all provinces concubines are collected for his harem (ii. 3). Horses, mules or dromedaries, are employed on this service (viii. 10). (Comp. Herod. viii. 98; Xen. *Cyrop.* viii. 6; Heeren's *Persians*, p. ii.)

The word is used, it must be remembered, of the smaller sections of a satrapy rather than of the satrapy itself. While the provinces are 127, the satrapies are only 20 (Herod. iii. 89). The Jews who returned from Babylon are described as "children of the province" (Ezr. ii. 1; Neh. vii. 6), and have a separate governor [TRISHATHA] of their own race (Ezr. ii. 63; Neh. v. 14, viii. 9); while they are subject to the satrap (שַׂרְצָר) of the whole province west of the Euphrates (Ezr. v. 6, vi. 6).

(3.) In the N. T. we are brought into contact with the administration of the provinces of the Roman empire. The classification given by Strabo (xvii. p. 840) of provinces (ἐπαρχίαι) supposed to need military control, and therefore placed under the immediate government of the Cæsar, and those still belonging theoretically to the republic, and administered by the senate; and of the latter

again into proconsular (δπαρχαὶ) and pretorian (στρατηγικαὶ), is recognized, more or less distinctly, in the Gospels and the Acts. Cyrenius (Quirinius) is the ἡγεμῶν of Syria (Luke ii. 2), the word being in this case used for præses or proconsul. Pilate was the ἡγεμῶν of the sub-province of Judea (Luke iii. 1, Matt. xxvii. 2, etc.), as procurator with the power of a legatus; and the same title is given to his successors, Felix and Festus (Acts xxiii. 24, xxv. 1, xxvi. 30). The governors of the senatorial provinces of Cyprus, Achaia, and Asia, on the other hand, are rightly described as ἀνθύπατοι, proconsuls (Acts xiii. 7, xviii. 12, xix. 38).<sup>a</sup> In the two former cases the province had been originally an imperial one, but had been transferred, Cyprus by Augustus (Dio Cass. liv. 4), Achaia by Claudius (Sueton. *Claud.* 25), to the senate. The στρατηγοὶ of Acts xvi. 22 ("magistrates," A. V.), on the other hand, were the *duumviri*, or prætors of a Roman colony. The duty of the legati and other provincial governors to report special cases to the emperor is recognized in Acts xv. 26, and furnished the groundwork for the spurious *Acta Pilati*. [PILATE.] The right of any Roman citizen to appeal from a provincial governor to the emperor meets us as asserted by St. Paul (Acts xxv. 11). In the council (συμβούλιον) of Acts xxv. 12 we recognize the assessors who were appointed to take part in the judicial functions of the governor. The authority of the legatus, proconsul, or procurator, extended, it need hardly be said, to capital punishment (subject in the case of Roman citizens, to the right of appeal), and in most cases the power of inflicting it belonged to him exclusively. It was necessary for the Sanhedrim to gain Pilate's consent to the execution of our Lord (John xviii. 31). The strict letter of the law forbade governors of provinces to take their wives with them, but the cases of Pilate's wife (Matt. xxvii. 19) and Drusilla (Acts xxiv. 24) show that it had fallen into disuse. Tacitus (*Ann.* iii. 33, 34) records an unsuccessful attempt to revive the old practice.

The financial administration of the Roman provinces is discussed under PUBLICANS and TAXES. E. H. P.

\* PRUNING-HOOK. [KNIFE, 5.]

PSALMS, BOOK OF. 1. *The Collection as a Whole.*—It does not appear how the Psalms were, as a whole, anciently designated. Their present Hebrew appellation is הַהֲלִים, "Praises." But in the actual superscriptions of the psalms the word הַהֲלִים is applied only to one, Ps. cxlv. which is indeed emphatically a praise-hymn. The LXX. entitled them ψαλμοί, or "Psalms," using the word ψαλμός at the same time as the translation of מְזֻמָּר, which signifies strictly a rhythmic composition (Lowth, *Prælect.* III.), and which was probably applied in practice to any poem specially intended, by reason of its rhythm, for musical performance with instrumental accompaniment. But the Hebrew word is, in the O. T., never used in the plural; and in the superscriptions of even the Davidic psalms it is applied only to some, not to all; probably to those which had been composed most expressly for the harp. The notice

<sup>a</sup> The A. V. rendering "deputy" had, it should be remembered, a more definite value in the days of

Elizabeth and James than for us. The governor of Ireland was officially "the Lord Deputy."

at the end of Ps. lxxii. has suggested that the Psalms may in the earliest times have been known as תפילות, "Prayers;" and in fact "Prayer" is the title prefixed to the most ancient of all the psalms, that of Moses, Ps. xc. But the same designation is in the superscriptions applied to only three besides, Pss. xvii., lxxxvi., cii.; nor have all the psalms the character of prayers. The other special designations applied to particular psalms are the following: שיר, "Song," the outpouring of the soul in thanksgiving, used in the first instance of a hymn of private gratitude, Ps. xxx., afterwards of hymns of great national thanksgiving, Pss. xlvii., xlviii., lxxv., etc.; משכיל, *maschil*, "Instruction" or "Homily," Pss. xxxii., xlii., xlv., etc. (comp. the אשכילך, "I will instruct thee," in Ps. xxxii.

8); זכרון, *nichtam*, "Private Memorial," from the root זכר (perhaps also with an anagrammatical allusion to the root רמך, "to support," "maintain," comp. Ps. xvi. 5), Pss. xvi., lvi.—lix.; עדות, *eduth*, "Testimony," Pss. lx., lxxx.; and שגיון, *shiggaiion*, "Irregular or Dithyrambic Ode," Ps. vii. The strict meaning of these terms is in general to be gathered from the earlier superscriptions. Once made familiar to the psalmists, they were afterwards employed by them more loosely.

The Christian Church obviously received the Psalter from the Jews not only as a constituent portion of the sacred volume of Holy Scripture, but also as the liturgical hymn-book which the Jewish Church had regularly used in the Temple. The number of separate psalms contained in it is, by the concordant testimony of all ancient authorities, one hundred and fifty; the avowedly "super-numerary" psalm which appears at the end of the Greek and Syriac Psalters being manifestly apocryphal. This total number commends itself by its internal probability as having proceeded from the last sacred collector and editor of the Psalter. In the details, however, of the numbering, both the Greek and Syriac Psalters differ from the Hebrew. The Greek translators joined together Pss. ix., x., and Pss. cxiv., cxv., and then divided Ps. cxvi. and Ps. cxlvii.; this was perpetuated in the versions derived from the Greek, and amongst others in the Latin Vulgate. The Syriac so far followed the Greek as to join together Pss. cxiv., cxv., and to divide Ps. cxlvii. Of the three divergent systems of numbering, the Hebrew (as followed in our A. V.) is, even on internal grounds, to be preferred. It is decisive against the Greek numbering that Ps. cxvi., being symmetrical in its construction, will not bear to be divided; and against the Syriac, that it destroys the outward correspondence in numerical place between the three great triumphal psalms, Pss. xviii., lxxviii., cxviii., as also between the two psalms containing the praise of the Law, Pss. xix., cxix. There are also some discrepancies in the versal numberings. That of our A. V. frequently differs from that of the Hebrew in consequence of the Jewish practice of reckoning the superscription as the first verse.

## 2. Component Parts of the Collection. — An-

cient tradition and internal evidence concur in parting the Psalter into five great divisions or books. The ancient Jewish tradition is preserved to us by the abundant testimonies of the Christian Fathers. And of the indications which the sacred text itself contains of this division the most obvious are the doxologies which we find at the ends of Pss. xli., lxxii., lxxxix., cvi., and which, having for the most part no special connection with the psalms to which they are attached, mark the several ends of the first four of the five Books. It suggests itself at once that these books must have been originally formed at different periods. This is by various further considerations rendered all but certain, while the few difficulties which stand in the way of admitting it vanish when closely examined.

Thus, there is a remarkable difference between the several books in their use of the divine names Jehovah and Elohim, to designate Almighty God. In Book I. the former name prevails: it is found 272 times, while Elohim occurs but 15 times. (We here take no account of the superscriptions or doxology, nor yet of the occurrences of Elohim when inflected with a possessive suffix.) On the other hand, in Book II. Elohim is found more than five times as often as Jehovah. In Book III. the preponderance of Elohim in the earlier is balanced by that of Jehovah in the later psalms of the book. In Book IV. the name Jehovah is exclusively employed; and so also, virtually, in Book V., Elohim being there found only in two passages incorporated from earlier psalms. Those who maintain, therefore, that the psalms were all collected and arranged at once, contend that the collector distributed the psalms according to the divine names which they severally exhibited. But to this theory the existence of Book III. in which the preferential use of the Elohim gradually yields to that of the Jehovah, is fatal. The large appearance, in fact, of the name Elohim in Books II. and III. depends in great measure on the period to which many of the psalms of those Books belong; the period from the reign of Solomon to that of Hezekiah, when through certain causes the name Jehovah was exceptionally disused. The preference for the name Elohim in most of the Davidic psalms which are included in Book II., is closely allied with that character of those psalms which induced David himself to exclude them from his own collection, Book I.; while, lastly, the sparing use of the Jehovah in Ps. lxxviii., and the three introductory psalms which precede it, is designed to cause the name, when it occurs, and above all JAH, which is emphatic for Jehovah, to shine out with greater force and splendor.

This, however, brings us to the observance of the superscriptions which mark the authorship of the several psalms; and here again we find the several groups of psalms which form the respective five books distinguished, in great measure, by their superscriptions from each other. Book I. is exclusively Davidic. Of the forty-one psalms of which it consists, thirty-seven have David's name prefixed; and of the remaining four, Pss. i., ii. are probably outwardly anonymous only by reason of their prefatory character, Pss. x., xxxiii., by reason of their close connection with those which they immediately succeed.<sup>a</sup> Book II. (in which the apparent anonymousness of Pss. xliii., lxxvi., lxxvii.

compositions of the authors named in the superscriptions last preceding.

<sup>a</sup> An old Jewish canon, which may be deemed to hold good for the earlier but not for the later Books, asserts that all anonymous psalms be accounted the

lxxi., may be similarly explained falls, by the superscriptions of its psalms, into two distinct subdivisions, a Levitic and a Davidic. The former consists of Pss. xlii. - xlix., ascribed to the Sons of Korah, and Ps. l., "A Psalm of Asaph:" the latter comprises Pss. li. - lxxi., bearing the name of David, and supplemented by Ps. lxxii., the psalm of Solomon. In Book III. (Pss. lxxiii. - lxxxix.), where the Asaphic psalms precede those of the Sons of Korah, the psalms are all ascribed, explicitly or virtually, to the various Levite singers, except only Ps. lxxxvi., which bears the name of David: this, however, is not set by itself, but stands in the midst of the rest. In Books IV., V., we have, in all, seventeen psalms marked with David's name. They are to a certain extent, as in Book III., mixed with the rest, sometimes singly, sometimes in groups. But these books differ from Book III. in that the non-Davidic psalms, instead of being assigned by superscriptions to the Levite singers, are left anonymous. Special attention, in respect to authorship, is drawn by the superscriptions only to Ps. xc., "A Prayer of Moses," etc.; Ps. cii., "A Prayer of the Afflicted," etc.; and Ps. cxxvii., marked with the name of Solomon.

In reasoning from the phenomena of the superscriptions, which indicate in many instances not only the authors, but also the occasions of the several psalms, as well as the mode of their musical performance, we have to meet the preliminary inquiry which has been raised, Are the superscriptions authentic? For the affirmative it is contended that they form an integral, and till modern times almost undisputed, portion of the Hebrew text of Scripture; <sup>a</sup> that they are in analogy with other Biblical super- or subscriptions, Davidic or otherwise (comp. 2 Sam. i. 18, probably based on an old superscription; *ib.* xxiii. 1; Is. xxxviii. 9; Hab. iii. 1, 19); and that their diversified, unsystematic, and often obscure and enigmatical character is inconsistent with the theory of their having originated at a later period. On the other hand is urged their analogy with the untrustworthy subscriptions of the N. T. epistles: as also the fact that many arbitrary superscriptions are added in the Greek version of the Psalter. The above represents, however, but the outside of the controversy. The real pith of it lies in this: Do they, when individually sifted, approve themselves as so generally correct, and as so free from any single fatal objection to their credit, as to claim our universal confidence? This can evidently not be discussed here. We must simply avow our conviction, founded on thorough examination, that they are, when rightly interpreted, fully trustworthy, and that every separate objection that has been made to the correctness of any one of them can be fairly met. Moreover, some of the arguments of their assailants obviously recoil upon themselves. Thus when it is alleged that the contents of Ps. xxxiv. have no connection with the occasion indicated in the superscription, we reply that the fact of the connection not being readily apparent renders it improbable that the superscription should have been prefixed by any but David himself.

Let us now then trace the bearing of the superscriptions upon the date and method of compilation of the several books. Book I. is, by the

superscriptions, entirely Davidic; nor do we find in it a trace of any but David's authorship. No such trace exists in the mention of the "Temple" (v. 7), for that word is even in 1 Sam. i. 9, iii. 3 applied to the Tabernacle; nor yet in the phrase "bringeth back the captivity" (xiv. 7), which is elsewhere used, idiomatically, with great latitude of meaning (Job xlii. 10; Hos. vi. 11; Ez. xvi. 53), nor yet in the acrosticism of Pss. xxv., etc., for that all acrostic psalms are of late date is a purely gratuitous assumption, and some even of the most skeptical critics admit the Davidic authorship of the partially acrostic Pss. ix., x. All the psalms of Book I. being thus Davidic, we may well believe that the compilation of the book was also David's work. In favor of this is the circumstance that it does not comprise all David's psalms, nor his latest, which yet would have been all included in it by any subsequent collector; also the circumstance that its two prefatory psalms, although not superscribed, are yet shown by internal evidence to have proceeded from David himself; and furthermore, that of the two recensions of the same hymn, Pss. xiv., liii., it prefers that which seems to have been more specially adapted by its royal author to the temple-service. Book II. appears by the date of its latest psalm, Ps. xlvii., to have been compiled in the reign of King Hezekiah. It would naturally comprise, 1st, several or most of the Levitical psalms anterior to that date; and 2dly, the remainder of the psalms of David, previously uncompiled. To these latter the collector, after properly appending the single psalm of Solomon, has affixed the notice that "the prayers of David the son of Jesse are ended" (Ps. lxxii. 20); evidently implying, at least on the *prima facie* view, that no more compositions of the royal psalmist remained. How then do we find, in the later Books III., IV., V., further psalms yet marked with David's name? Another question shall help us to reply. How do we find, in Book III. rather than Book II., eleven psalms, Pss. lxxii. - lxxiii., bearing the name of David's contemporary musician Asaph? Clearly because they proceeded not from Asaph himself. No critic whatever contends that all these eleven belong to the age of David; and, in real truth, internal evidence is in every single instance in favor of a later origin. They were composed then by the "sons of Asaph" (2 Chr. xxix. 13, xxxv. 15, &c.), the members, by hereditary descent, of the choir which Asaph founded. It was to be expected that these psalmists would, in superscribing their psalms, prefer honoring and perpetuating the memory of their ancestor, to obtruding their own personal names on the Church: a consideration which both explains the present superscriptions, and also renders it improbable that the person intended in them could, according to a frequent but now waning hypothesis, be any second Asaph, of younger generation and of inferior fame. The superscriptions of Pss. lxxxviii., lxxxix., "Masehil of Heman," "Masehil of Ethan," have doubtless a like purport; the one psalm having been written, as in fact the rest of its superscription states, by the Sons of Korah, the choir of which Heman was the founder; and the other correspondingly proceeding from the third Levitical choir, which owed its origin to Ethan or Jeduthun. If now in the times posterior to those of David the

<sup>a</sup> Well says Bossuet, *Dissert.* § 28: "Qui titulos non uno modo intelligant, video esse quam plurimos: qui in titulorum auctoritate dubitari, ex antiquis om-

nino neminem." Theodore of Mopsuestia forms an exception.

Levite choirs prefixed to the psalms which they composed the names of Asaph, Heman, and Ethan, out of a feeling of veneration for their memories; how much more might the name of David be prefixed to the utterances of those who were not merely his descendants, but also the representatives of the time being, and so in some sort the pledges, of the perpetual royalty of his lineage! The name David is used to denote, in other parts of Scripture, after the original David's death, the then head of the Davidic family; and so, in prophecy, the Messiah of the seed of David, who was to sit on David's throne (1 K. xii. 16; Hos. iii. 5; Is. lv. 3; Jer. xxx. 9; Ez. xxxiv. 23, 24). And thus then we may explain the meaning of the later Davidic superscriptions in the Psalter. The psalms to which they belong were written by Hezekiah, by Josiah, by Zerubbabel, or others of David's posterity. And this view is confirmed by various considerations. It is confirmed by the circumstance that in the later books, and even in Book V. taken alone, the psalms marked with David's name are not grouped all together. It is confirmed in some instances by the internal evidence of occasion: thus Psalm ci. can ill be reconciled with the historical circumstances of any period of David's life, but suits exactly with those of the opening of the reign of Josiah. It is confirmed by the extent to which some of these psalms — Pss. lxxxv., cviii., cxliv. — are compacted of passages from previous psalms of David. And it is confirmed lastly by the fact that the Hebrew text of many (see, above all Ps. cxxxix.), is marked by grammatical Chaldaisms, which are entirely unparalleled in Pss. i. — lxxii., and which thus afford sure evidence of a comparatively recent date. They cannot therefore be David's own: yet that the superscriptions are not on that account to be rejected, as false, but must rather be properly interpreted, is shown by the improbability that any would, carelessly or presumptuously, have prefixed David's name to various psalms scattered through a collection, while yet leaving the rest — at least in Books IV., V. — altogether unsuperscribed.

The above explanation removes all serious difficulty respecting the history of the later books of the Psalter. Book III., the interest of which centres in the times of Hezekiah, stretches out, by its last two psalms, to the reign of Manasseh; it was probably compiled in the reign of Josiah. Book IV. contains the remainder of the psalms up to the date of the Captivity; Book V. the psalms of the Return. There is nothing to distinguish these two books from each other in respect of outward decoration or arrangement, and they may have been compiled together in "the days of Nehemiah.

The superscriptions, and the places which the psalms themselves severally occupy in the Psalter, are thus the two guiding clues by which, in conjunction with the internal evidence, their various authors, dates, and occasions, are to be determined. In the critical results obtained on these points by those scholars who have recognized and used these helps there is, not indeed uniformity, but at least a visible tendency towards it. The same cannot be said for the results of the judgments of those, of whatever school, who have neglected or rejected them; nor indeed is it easily to be imagined that internal evidence alone should suffice to assign one hundred and fifty devotional hymns, even approximately, to their several epochs.

It would manifestly be impossible, in the compass of an article like the present, to exhibit in de-

tail the divergent views which have been taken of the dates of particular psalms. There is, however, one matter which must not be altogether passed over in silence: the assignment of various psalms, by a large number of critics, to the age of the Maccabees. Two preliminary difficulties fatally beset such procedure: the hypothesis of a Maccabean authorship of any portion of the Psalter can ill be reconciled either with the history of the O. T. canon, or with that of the translation of the LXX. But the difficulties do not end here. How — for we shall not here discuss the theories of Hitzig and his followers Lengerke and Justus Olshausen, who would represent the greater part of the Psalter as Maccabean, — how is it that the psalms which one would most naturally assign to the Maccabean period meet us not in the close but in the middle, i. e. in the Second and Third Books of the Psalter? The three named by De Wette (*Eink. in das A. T.* § 270) as bearing, apparently, a Maccabean impress, are Pss. xlv., lx., lxxiv.; and in fact these, together with Ps. lxxix., are perhaps all that would, when taken alone, seriously suggest the hypothesis of a Maccabean date. Whence then arise the early places in the Psalter which these occupy? But even in the case of these, the internal evidence, when more narrowly examined, proves to be in favor of an earlier date. In the first place the superscription of Ps. lx. cannot possibly have been invented from the historical books, inasmuch as it disagrees with them in its details. Then the mention by name in that psalm of the Israelitish tribes, and of Moab, and Philistia, is unsuited to the Maccabean epoch. In Ps. xlv. the complaint is made that the tree of the nation of Israel was no longer spreading over the territory that God had assigned it. Is it conceivable that a Maccabean psalmist should have held this language without making the slightest allusion to the Babylonish Captivity; as though the tree's growth were now first being seriously impeded by the wild stocks around, notwithstanding that it had once been entirely transplanted, and that, though restored to its place, it had been weakly ever since? In Ps. lxxix. it is complained that "there is no more any prophet." Would that be a natural complaint at a time when Jewish prophecy had ceased for more than two centuries? Lastly, in Ps. lxxix. the mention of "kingdoms" in ver. 6 ill suits the Maccabean time; while the way in which the psalm is cited by the author of the First Book of Maccabees (vii. 16, 17), who omits those words which are foreign to his purpose, is such as would have hardly been adopted in reference to a contemporary composition.

3. *Connection of the Psalms with the Israelitish history.* — In tracing this we shall, of course, assume the truth of the conclusions at which in the previous section we have arrived.

The psalm grew, essentially and gradually, out of the personal and national career of David and of Israel. That of Moses, Psalm xc., which, though it contributed little to the production of the rest, is yet, in point of actual date, the earliest, faithfully reflects the long, weary wanderings, the multiplied provocations, and the consequent punishments of the wilderness; and it is well that the Psalter should contain at least one memorial of those forty years of toil. It is, however, with David that Israelitish psalmody may be said virtually to commence. Previous mastery over his harp had probably already prepared the way for his future strains, when the anointing oil of Samuel descended upon him, and he began to drink in special measure from that

lay forward, of the Spirit of the Lord. It was then that, victorious at home over the mysterious melancholy of Saul and in the field over the vaunting champion of the Philistine hosts, he sang how from even babes and sucklings God had ordained strength because of his enemies (Ps. viii.). His next psalms are of a different character: his persecutions at the hands of Saul had commenced. Ps. lviii. was probably written after Jonathan's disclosures of the murderous designs of the court: Ps. lix. when his house was being watched by Saul's emissaries. The inhospitality of the court of Achish at Gath, gave rise to Ps. lvi.: Ps. xxxiv. was David's thanksgiving for deliverance from that court, not unmingled with shame for the unworthy stratagem to which he had there temporarily had recourse. The associations connected with the cave of Adullam are embodied in Ps. lvii.; the feelings excited by the tidings of Doeg's servility in Ps. lii. The escape from Keilah, in consequence of a divine warning, suggested Ps. xxxi. Ps. liv. was written when the Ziphites officiously informed Saul of David's movements. Pss. xxxv., xxxvi., recall the colloquy at Engedi. Nabal of Carmel was probably the original of the fool of Ps. liii.; though in this case the closing verse of that psalm must have been added when it was further altered, by David himself, into Ps. xiv. The most thoroughly idealized picture suggested by a retrospect of all the dangers of his outlaw-life is that presented to us by David in Ps. xxii. But in Ps. xxiii., which forms a side-piece to it, and the imagery of which is drawn from his earlier shepherd-days, David acknowledges that his past career had had its brighter as well as its darker side; nor had the goodness and mercy which were to follow him all the days of his life been ever really absent from him. Two more psalms, at least, must be referred to the period before David ascended the throne, namely, xxxviii. and xxxix., which naturally associate themselves with the distressing scene at Ziklag after the inroad of the Amalekites. Ps. xl. may perhaps be the thanksgiving for the retrieval of the disaster that had there befallen.

When David's reign has commenced, it is still with the most exciting incidents of his history, private or public, that his psalms are mainly associated. There are none to which the period of his reign at Hebron can lay exclusive claim. But after the conquest of Jerusalem his psalmody opened afresh with the solemn removal of the ark to Mount Zion; and in Pss. xxiv.-xxix., which belong together, we have the earliest definite instance of David's systematic composition or arrangement of psalms for public use. Ps. xxx. is of the same date: it was composed for the dedication of David's new palace, which took place on the same day with the establishment of the ark in its new tabernacle. Other psalms (and in these first do we trace any allusions to the promise of perpetual royalty now conveyed through Nathan) show the feelings of David in the midst of his foreign wars. The imagery of Ps. ii. is perhaps drawn from the events of this period; Pss. lx., lxi. belong to the campaign against Edom; Ps. xx. to the second campaign, conducted by David in person, of the war against the allied Ammonites and Syrians; and Ps. xxi. to the termination of that war by the capture of Rabbah. Intermediate in date to the last-mentioned two psalms is Ps. li.; connected with the dark episode which made David tremble not only for himself, but also for the city whereon he had labored, and which he had partly

named by his own name, lest God should in displeasure not permit the future Temple to be reared on Mount Zion, nor the yet imperfect walls of Jerusalem to be completed. But rich above all, in the psalms to which it gave rise, is the period of David's flight from Absalom. To this we may refer Pss. iii.-vii. (the "Cush" of Ps. vii. being Shimei); also Ps. lv., which reflects the treachery of Ahithophel, Ps. lxii., which possibly alludes to the falsehood of both Ziba and Mephibosheth, and Ps. lxiii., written in the wilderness between Jerusalem and the Jordan.

Even of those psalms which cannot be referred to any definite occasion, several reflect the general historical circumstances of the times. Thus Ps. ix. is a thanksgiving for the deliverance of the land of Israel from its former heathen oppressors. Ps. x. is a prayer for the deliverance of the Church from the high-handed oppression exercised from within. The succeeding psalms dwell on the same theme, the virtual internal heathenism by which the Church of God was weighed down. So that there remain very few, *e. g.* Pss. xv.-xvii., xix., xxxii. (with its choral appendage xxxiii.), xxxvii., of which some historical account may not be given; and even of these some are manifestly connected with psalms of historical origin, *e. g.* Ps. xv. with Ps. xxiv.; and of others the historical reference may be more reasonably doubted than denied.

A season of repose, near the close of his reign induced David to compose his grand personal thanksgiving for the deliverances of his whole life, Ps. xviii.; the date of which is approximately determined by the place at which it is inserted in the history (2 Sam. xxii.). It was probably at this period that he finally arranged for the sanctuary-service that collection of his psalms which now constitutes the First Book of the Psalter. From this he designedly excluded all (Pss. li-lxiv.) that, from manifest private reference, or other cause, were unfit for immediate public use; except only where he so fitted them by slightly generalizing the language, and by mostly substituting for the divine name Elohim the more theocratic name Jehovah; as we see by the instance of Ps. xiv. = liii., where both the altered and original copies of the hymn happen to be preserved. To the collection thus formed he prefixed by way of preface Ps. i., a simple moral contrast between the ways of the godly and the ungodly, and Ps. ii., a prophetic picture of the reign of that promised Ruler of whom he knew himself to be but the type. The concluding psalm of the collection, Ps. xli., seems to be a sort of ideal summary of the whole.

The course of David's reign was not, however, as yet complete. The solemn assembly convened by him for the dedication of the materials of the future Temple (1 Chr. xxviii., xxix.) would naturally call forth a renewal of his best efforts to glorify the God of Israel in psalms; and to this occasion we doubtless owe the great festal hymns Pss. lxxv.-lxxviii., lxxviii., containing a large review of the past history, present position, and prospective glories of God's chosen people. The supplications of Ps. lxxix. suit best with the renewed distress occasioned by the sedition of Adonijah. Ps. lxxxi., to which Ps. lxxx., a fragment of a former psalm, is introductory, forms David's parting strain. Yet that the psalmody of Israel may not seem finally to terminate with him, the glories of the future are forthwith anticipated by his son in Ps. lxxii. And so closes the first great blaze of the lyrical devotions of Israel. Da-

vid is not merely the soul of it; he stands in it absolutely alone. It is from the events of his own career that the greater part of the psalms have sprung; he is their author, and on his harp are they first sung; to him too is due the design of the establishment of regular choirs for their future sacred performance; his are all the arrangements by which that design is carried out; and even the improvement of the musical instruments needed for the performance is traced up to him (Amos vi. 5).

For a time the single psalm of Solomon remained the only addition to those of David. Solomon's own gifts lay mainly in a different direction; and no sufficiently quickening religious impulses mingled with the generally depressing events of the reigns of Rehoboam and Abijah to raise up to David any lyrical successor. If, however, religious psalmody were to revive, somewhat might be not unreasonably anticipated from the great assembly of King Asa (2 Chr. xv.); and Ps. l. suits so exactly with the circumstances of that occasion, that it may well be assigned to it. Internal evidence renders it more likely that this "Psalm of Asaph" proceeded from a descendant of Asaph than from Asaph himself; and possibly its author may be the Azariah the son of Oded, who had been moved by the Spirit of God to kindle Asa's zeal. Another revival of psalmody more certainly occurred under Jehoshaphat at the time of the Moabite and Ammonite invasion (2 Chr. xx.). Of this, Pss. xlvii., xlviii. were the fruits; and we may suspect that the Levite singer Jahaziel, who foretold the Jewish deliverance, was their author. The great prophetic ode (Ps. xlv.) connects itself most readily with the splendors of Jehoshaphat's reign. And after that psalmody had thus definitely revived, there would be no reason why it should not thenceforward manifest itself in seasons of anxiety, as well as of festivity and thanksgiving. Hence Ps. xlix. Yet the psalms of this period flow but sparingly. Pss. xlii. - xlv., lxxiv., are best assigned to the reign of Ahaz; they delineate that monarch's desecration of the sanctuary, the sighings of the faithful who had exiled themselves in consequence from Jerusalem, and the political humiliation to which the kingdom of Judah was, through the proceedings of Ahaz, reduced. The reign of Hezekiah is naturally rich in psalmody. Pss. xlv., lxxiii., lxxv., lxxvi., connect themselves with the resistance to the supremacy of the Assyrians and the divine destruction of their host. The first of these psalms indeed would by its place in the Psalter more naturally belong to the deliverance in the days of Jehoshaphat, to which some, as Delitzsch, actually refer it; but if internal evidence be deemed to establish sufficiently its later date, it may have been exceptionally permitted to appear in Book II. on account of its similarity in style to Pss. xlvii., xlviii. We are now brought to a series of psalms of peculiar interest, springing out of the political and religious history of the separated ten tribes. In date of actual composition they commence before the times of Hezekiah. The earliest is probably Ps. lxxx., a supplication for the Israelitish people at the time of the Syrian oppression. Ps. lxxxi. is an earnest appeal to them, indicative of what God would yet do for them if they would hearken to his voice: Ps. lxxxii. a stern reproof of the internal oppression prevalent, by the testimony of Amos, in the realm of Israel. In Ps. lxxxiii. we have a prayer for deliverance from that extensive confederacy of ene-

mies from all quarters, of which the traces meet us in Joel iii., Amos i., and which probably was eventually crushed by the contemporaneous victories of Jeroboam II. of Israel and Uzziah of Judah. All these psalms are referred by their superscriptions to the Levite singers, and thus bear witness to the efforts of the Levites to reconcile the two branches of the chosen nation. In Ps. lxxxviii., belonging, probably, to the opening of Hezekiah's reign, the psalmist assumes a bolder tone, and, reproving the disobedience of the Israelites by the parable of the nation's earlier rebellions, sets forth to them the Temple at Jerusalem as the appointed centre of religious worship, and the heir of the house of David as the sovereign of the Lord's choice. This remonstrance may have contributed to the partial success of Hezekiah's messages of invitation to the ten tribes of Israel. Ps. lxxxiv. represents the thanks and prayers of the northern pilgrims, coming up, for the first time in two hundred and fifty years, to celebrate the passover in Jerusalem: Ps. lxxxv. may well be the thanksgiving for the happy restoration of religion, of which the advent of those pilgrims formed part. Ps. lxxvii., on the other hand, is the lamentation of the Jewish Church for the terrible political calamity which speedily followed, whereby the inhabitants of the northern kingdom were carried into captivity, and Joseph lost, the second time, to Jacob. The prosperity of Hezekiah's own reign outweighed the sense of this heavy blow, and nursed the holy faith whereby the king himself in Ps. lxxxvi., and the Levites in Ps. lxxxvii., anticipated the future welcome of all the Gentiles into the Church of God. Ps. lxxxix. (an Asaphic psalm, and therefore placed with the others of like authorship) may best be viewed as a picture of the evil days that followed through the transgressions of Manasseh. And in Ps. lxxxviii., lxxxix. we have the pleadings of the nation with God under the severest trial that it had yet experienced, the captivity of its anointed sovereign, and the apparent failure of the promises made to David and his house.

The captivity of Manasseh himself proved to be but temporary; but the sentence which his sins had provoked upon Judah and Jerusalem still remained to be executed, and precluded the hope that God's salvation could be revealed till after such an outpouring of his judgments as the nation never yet had known. Labor and sorrow must be the lot of the present generation; through these mercy might occasionally gleam, but the glory which was eventually to be manifested must be for posterity alone. The psalms of Book IV. bear generally the impress of this feeling. The Mosaic Psalm xc., from whatever cause here placed, harmonizes with it. Pss. xci., xcii. are of a peaceful, simple, liturgical character; but in the series of psalms Pss. xciii. - c., which foretell the future advent of God's kingdom, the days of adversity of the Chaldean oppression loom in the foreground. Pss. ci., ciii., "of David," readily refer themselves to Josiah as their author; the former embodies his early resolutions of piety; the latter belongs to the period of the solemn renewal of the covenant after the discovery of the book of the Law, and after the assurance to Josiah that for his tenderness of heart he should be graciously spared from beholding the approaching evil. Intermediate to these in place, and perhaps in date, is Ps. cii., "A Prayer of the afflicted," written by one who is almost entirely wrapped up in the prospect of the

impending desolation, though he recognizes withal the divine favor which should remotely but eventually be manifested. Ps. civ., a meditation on the providence of God, is itself a preparation for that "hiding of God's face" which should ensue ere the Church were, like the face of the earth, renewed; and in the historical Pss. cv., cvl., the one the story of God's faithfulness, the other of the people's transgressions, we have the immediate prelude to the Captivity, together with a prayer for eventual deliverance from it.

We pass to Book V. Ps. cvii. is the opening psalm of the return, sung probably at the first Feast of Tabernacles (Ezr. iii.). The ensuing Davidic psalms may well be ascribed to Zerubbabel; Ps. cviii. (drawn from Pss. lvii., lx.) being in anticipation of the returning prosperity of the Church; Ps. cix., a prayer against the efforts of the Samaritans to hinder the rebuilding of the Temple; Ps. cx., a picture of the triumphs of the Church in the days of the future Messiah, whose union of royalty and priesthood had been at this time set forth in the type and prophecy of Zech. vi. 11-13.<sup>a</sup> Ps. cxviii., with which Ps. cxiv.-cxvii. certainly, and in the estimation of some Ps. cxiii., and even Ps. cxi., cxii., stand connected, is the festal hymn sung at the laying of the foundations of the second Temple. We here pass over the questions connected with Ps. cxix.; but a directly historical character belongs to Pss. cxx.-cxxxiv., styled in our A. V. "Songs of Degrees." [DEGREES, SONGS OF, where the different interpretations of the Hebrew title are given.] Internal evidence refers these to the period when the Jews under Nehemiah were, in the very face of the enemy, repairing the walls of Jerusalem; and the title may well signify "Songs of goings up (as the Hebrew phrase is) upon the walls," the psalms being, from their brevity, well adapted to be sung by the workmen and guards while engaged in their respective duties. As David cannot well be the author of Pss. cxxii., cxxiv., cxxxi., cxxxiii., marked with his name, so neither, by analogy, can Solomon well be the actual author of Ps. cxxvii. Theodoret thinks that by "Solomon" Zerubbabel is intended, both as deriving his descent from Solomon, and as renewing Solomon's work: with yet greater probability we might ascribe the psalm to Nehemiah. Pss. cxxxv., cxxxvi., by their parallelism with the confession of sins in Neh. ix., connect themselves with the national fast of which that chapter speaks. Of somewhat earlier date, it may be, are Ps. cxxxvii. and the ensuing Davidic psalms. Of these, Ps. cxxxix. is a psalm of the new birth of Israel, from the womb of the Babylonish Captivity, to a life of righteousness: Pss. cxl.-cxliii. may be a picture of the trials to which the unreturned exiles were still exposed in the realms of the Gentiles. Henceforward, as we approach the close of the Psalter, its strains rise in cheerfulness; and it fittingly terminates with Ps. cxlvii.-cl., which were probably sung on the occasion of the thanksgiving procession of Neh. xii., after the rebuilding of the walls of Jerusalem had been completed.

4. *Moral Characteristics of the Psalms.*—Foremost among these meets us, undoubtedly, the universal recourse to communion with God. "My

voice is unto God, and I will cry" (Ps. lxxvii. 1), might well stand as a motto to the whole of the Psalter; for, whether immersed in the depths, or whether blessed with greatness and comfort on every side, it is to God that the psalmist's voice seems ever to soar spontaneously aloft. Alike in the welcome of present deliverance or in the contemplation of past mercies, he addresses himself straight to God as the object of his praise. Alike in the persecutions of his enemies and the desertions of his friends, in wretchedness of body and in the agonies of inward repentance, in the hour of impending danger and in the hour of apparent despair, it is direct to God that he utters forth his supplications. Despair, we say; for such, as far as the description goes, is the psalmist's state in Ps. lxxxviii. But meanwhile he is praying; the apparent impossibility of deliverance cannot restrain his God-ward voice; and so the very force of communion with God carries him, almost unawares to himself, through the trial.

Connected with this is the faith by which he everywhere lives in God rather than in himself. God's mercies, God's greatness form the sphere in which his thoughts are ever moving: even when through excess of affliction reason is rendered powerless, the naked contemplation of God's wonders of old forms his effectual support (Ps. lxxvii.).

It is of the essence of such faith that the psalmist's view of the perfections of God should be true and vivid. The Psalter describes God as He is: it glows with testimonies to his power and providence, his love and faithfulness, his holiness and righteousness. Correspondingly it testifies against every form of idol which men would substitute in the living God's place: whether it be the outward image, the work of men's hands (Ps. cxv.), or whether it be the inward vanity of earthly comfort or prosperity, to be purchased at the cost of the honor which cometh from God alone (Ps. iv.).

The solemn "See that there is no idol-way (יד עֵבֶב) in me" of Ps. cxxxix., the striving of the heart after the very truth and nought beside, is the exact anticipation of the "Little children, keep yourselves from idols," of the loved Apostle in the N. T.

The Psalms not only set forth the perfections of God: they proclaim also the duty of worshipping Him by the acknowledgment and adoration of his perfections. They encourage all outward rites and means of worship: new songs, use of musical instruments of all kinds, appearance in God's courts, lifting up of hands, prostration at his footstool, holy apparel (A. V. "beauty of holiness") Among these they recognize the ordinance of sacrifice (Pss. iv., v., xxvii., li.) as an expression of the worshipper's consecration of himself to God's service. But not the less do they repudiate the outward rite when separated from that which it was designed to express (Pss. xl, lxix.): a broken and contrite heart is, from erring man, the genuine sacrifice which God requires (Ps. li.).

Similar depth is observable in the view taken by the psalmist of human sin. It is to be traced not only in its outward manifestations, but also in

<sup>a</sup> A very strong feeling exists that Mark xii. 36, &c., show Ps. cx to have been composed by David himself. To the writer of this article it appears, that as our Saviour's argument remains the same from

whichever of his ancestors the psalm proceeded, so his words do not necessarily imply more than is intended in the superscription of the psalm.

the inward workings of the heart (Ps. xxxvi.), and is to be primarily ascribed to man's innate corruption (Ps. li., lviii.). It shows itself alike in deeds, in words (Ps. xvii., cxli.), and in thoughts (Ps. cxxxix.); nor is even the believer able to discern all its various ramifications (Ps. xix.). Connected with this view of sin is, on the one hand, the picture of the utter corruption of the ungodly world (Ps. xiv.); on the other, the encouragement to genuine repentance, the assurance of divine forgiveness (Ps. xxxii.), and the trust in God as the source of complete redemption (Ps. cxxx.).

In regard of the Law, the psalmist, while warmly acknowledging its excellence, feels yet that it cannot so effectually guide his own unassisted exertions as to preserve him from error (Ps. xix.). He needs an additional grace from above, the grace of God's Holy Spirit (Ps. li.). But God's Spirit is also a free spirit (*ib.*): led by this he will discern the Law, with all its precepts, to be no arbitrary rule of bondage, but rather a charter and instrument of liberty (Ps. cxix.).

The Psalms bear repeated testimony to the duty of instructing others in the ways of holiness (Ps. xxxii., xxxiv., li.). They also indirectly enforce the duty of love, even to our enemies (Ps. vii. 4, xxxv. 13, cix. 4). On the other hand they imprecate, in the strongest terms, the judgments of God on transgressors. Such imprecations are levelled at transgressors as a body, and are uniformly uttered on the hypothesis of their willful persistence in evil, in which case the overthrow of the sinner becomes a necessary part of the uprooting of sin. They are in no wise inconsistent with any efforts to lead sinners individually to repentance.

[PSALMS IMPRECATORY, Amer. ed.]

This brings us to notice, lastly, the faith of the psalmists in a righteous recompense to all men according to their deeds (Ps. xxxvii., &c.). They generally expected that men would receive such recompense in great measure during their own lifetime. Yet they felt withal that it was not then complete: it perpetuated itself to their children (Ps. xxxvii. 25, cix. 12, &c.); and thus we find set forth in the Psalms, with sufficient distinctness, though in an unmeasured and consequently imperfect form, the doctrine of a retribution after death.

5. *Prophetic Character of the Psalms.*—The moral struggle between godliness and ungodliness, so vividly depicted in the Psalms, culminates, in Holy Scripture, in the life of the Incarnate Son of God upon earth. It only remains to show that the Psalms themselves definitely anticipated this culmination. Now there are in the Psalter at least three psalms of which the interest evidently centres in a person distinct from the speaker, and which, since they cannot without violence to the language be interpreted of any but the Messiah, may be termed directly and exclusively Messianic. We refer to Ps. ii., xlv., cx.; to which may perhaps be added Ps. lxxii.

It would be strange if these few psalms stood, in their prophetic significance, absolutely alone among the rest: the more so, inasmuch as Ps. ii. forms part of the preface to the First Book of the Psalter, and would, as such, be entirely out of place, did not its general theme—virtually extend itself over those which follow, in which the interest generally centres in the figure of the suppliant or worshipper himself. And hence the impossibility of viewing the psalms generally, notwithstanding the historical drapery in which they are

outwardly clothed, as simply the past devotions of the historical David or the historical Israel. Other arguments to the same effect are furnished by the idealized representations which many of them present; by the outward points of contact between their language and the actual earthly career of our Saviour; by the frequent references made to them both by our Saviour Himself and by the Evangelists; and by the view taken of them by the Jews, as evidenced in several passages of the Targum. There is yet another circumstance well worthy of note in its bearing upon this subject. Alike in the earlier and in the later portions of the Psalter, all those psalms which are of a personal rather than of a national character are marked in the superscriptions with the name of David, as proceeding either from David himself or from one of his descendants. It results from this, that while the Davidic psalms are partly personal, partly national, the Levitic psalms are uniformly national. Exceptions to this rule exist only in appearance: thus Ps. lxxiii., although couched in the first person singular, is really a prayer of the Jewish faithful against the Assyrian invaders; and in Ps. xlii., xliii., it is the feelings of an exiled company rather than of a single individual to which utterance is given. It thus follows that it was only those psalmists who were types of Christ by external office and lineage as well as by inward piety, that were charged by the Holy Spirit to set forth beforehand, in Christ's own name and person, the sufferings that awaited him and the glory that should follow. The national hymns of Israel are indeed also prospective; but in general they anticipate rather the struggles and the triumphs of the Christian Church than those of Christ Himself.

We annex a list of the chief passages in the Psalms which are in anywise quoted or embodied in the N. T.: Ps. ii. 1, 2, 7, 8, 9, iv. 4, v. 9, vi. 3, 8, viii. 2, 4-6, x. 7, xiv. 1-3, xvi. 8-11, xviii. 4, 49, xix. 4, xxii. 1, 8, 18, 22, xxiii. 6, xxiv. 1, xxxi. 5, xxxii. 1, 2, xxxiv. 8, 12-16, 20, xxxv. 9, xxxvi. 1, xxxvii. 11, xl. 6-8, xli. 9, xlii. 22, xlv. 6, 7, lxviii. 2, li. 4, lv. 22, lxxviii. 18, lxix. 4, 9, 22, 23, 25, lxxv. 8, lxxviii. 2, 24, lxxxii. 6, lxxxvi. 9, lxxxix. 20. xc. 4, xci. 11, 12, xcii. 7, xciv. 11, xciv. 7-11, cii. 25-27, civ. 4, cix. 8, cx. 1, 4, cxii. 9, cxvi. 10, cxvii. 1, cxviii. 6, 22, 23, 25, 26, cxv. 5, cxl. 3.

6. *Literature.*—The list of Jewish commentators on the Psalter includes the names of Saadiah (who wrote in Arabic), Jarchi, Aben Ezra, and Kimchi. Among later performances that of Sforza († 1550) is highly spoken of (reprinted in a Furth Psalter of 1804); and special mention is also due to the modern German translation of Mendelssohn († 1786), to which again is appended a comment by Joel Bril. In the Christian Church devotional familiarity with the Psalter has rendered the number of commentators on it immense; and in modern times even the number of private translations of it has been so large as to preclude enumeration here. Among the Greek Fathers, Theodoret is the best commentator, Chrysostom the best homilist, on the Psalms: for the rest, a catena of the Greek comments was formed by the Jesuit Corderius. In the West the pithy expositions of Hilary and the sermons of Augustine are the main patristic helps. A list of the chief mediæval comments, which are of a devotional and mystical rather than of a critical character, will be found in Neale's *Commentary* (vol. i. 1860), which is mainly derived from them and favorably introduces them to modern English

readers. Later Roman Catholic laborers on the Psalms are Genebrard (1587), Agellius (1606), Bellarmine (1617), Lorinus (1619), and De Muis (1650): the valuable critical commentary of the last named has been reprinted, accompanied by the able preface and terse annotations of Bossuet. Among the Reformers, of whom Luther, Zwingle, Bucer, and Calvin all applied themselves to the Psalms, Calvin naturally stands, as a commentator, preëminent. Of subsequent works those of Geier (1668) and Venema (1762, &c.) are still held in some repute; while Rosenmüller's *Scholi* give, of course, the substance of others. The modern German laborers on the Psalms, commencing with De Wette, are very numerous. Maurer shines as an elegant grammatical critic: Ewald (*Dichter des A. B. I.* and ii.) as a translator. Hengstenberg's Commentary holds a high place. The two latest Commentaries are that of Hupfeld (in progress), a work of high philological merit, but written in strong opposition to Hengstenberg, and from an unsatisfactory point of theological view; and that of Delitzsch (1859-60), the diligent work of a sober-minded theologian, whose previous *Synbologie ad Pss. illustr. isagogicæ* had been a valuable contribution to the external criticism of the Psalms. Of English works we may mention the Paraphrase of Hammond; the devotional Commentary of Bishop Horne, and along with this the unpretending but useful *Plain Commentary* recently published; Merriek's *Annotations*; Bishop Horsley's Translation and Notes (1815, posthumous); Dr. Mason Good's *Historical Outline*, and also his Translation with Notes (both posthumous; distinguished by taste and originality rather than by sound judgment or accurate scholarship); Phillips's Text, with Commentary, for Hebrew students; J. Jebb's *Literal Translation and Dissertations* (1846); and lastly Thrupp's *Introduction to the Psalms* (1860), to which the reader is referred for a fuller discussion of the various matters treated of in this article. In the press, a new translation, etc., by Perowne, of which specimens have appeared. A catalogue of commentaries, treatises, and sermons on the Psalms is given in Darling's *Cyclop. Bibliographica* (subjects), p. 374-514.

7. *Psalter of Solomon*.—Under this title is extant, in a Greek translation, a collection of eighteen hymns, evidently modeled on the canonical psalms, breathing Messianic hopes, and forming a favorable specimen of the later popular Jewish literature. They have been variously assigned by critics to the times of the persecution of Antiochus Epiphanes (Ewald, Dillmann), or to those of the rule of Herod (Movers, Delitzsch). They may be found in the *Codex Pseudepigraphus V. T.* of Fabricius. J. F. T.

\* On the *Psalter of Solomon* see art. *MACCABEES*, vol. ii. p. 1713 f., and note a, p. 1714. It is best edited in Hilgenfeld's *Messias Judæorum*, Lips. 1869.

A. *Additional Literature*.—The following are the latest critical works on the Psalms: De Wette, *Commentar über die Psalmen*, 1811; 5<sup>te</sup> Aufl. von G. Baur, 1856. Rosenmüller, *Scholin in Psalms*, 1831. Claus, *Beiträge zur Krit. und Exeg. der Psalmen*, 1831. Noyes, *A new Translation of the Book of Psalms, with an Introduction*, 1831; 3d ed. 1867. Keil, *Siebzig ausgew. Psalmen ausgelegt*, 1834-5. Hitzig, *Die Psalmen, hist. krit. Commentar*, 1835-6; *Die Psalmen, uebersetzt u. ausgelegt*, 1863-5 (a new work). Maurer, *Psalmi* (comment.

crit. vol. iii.), 1838. Ewald, *Die Psalmen erklärt*, 1839; 3<sup>te</sup> Ausg. 1866. Dursch, *Ein allgem. Comment. über die Psalmen des A. T.*, 1842. Hengstenberg, *Commentar über die Psalmen*, 1842-7; 2<sup>te</sup> Aufl. 1849-52; Eng. trans., 3 vols. Edinb. 1857. Tholuck, *Uebersetzung und Auslegung der Psalmen*, 1843; Eng. trans., Phila. 1858. *Vühinger, Die Psalmen metr. übersetzt und erklärt*, 1845. Delitzsch, *Synbologie ad Psalms illustrandos isagogicæ*, 1846. Phillips, *The Psalms in Hebrew, with crit. exeget. and phil. commentary*, 1846. Lengerke, *Die fünf Bücher der Psalmen*, 1847. Alexander, *The Psalms translated and explained*, 1850. Olshausen, *Die Psalmen erklärt (Exeg. Handb. 14<sup>ter</sup> Th.)*, 1853. Hupfeld, *Die Psalmen übersetzt und ausgelegt*, 1855-62; 2<sup>te</sup> Aufl. von Riehm, 1867-9. Reinke (Cath.), *Die messian. Psalmen, Einl., Grundtext u. Uebers., nebst einem phil.-krit. u. hist. Comm.*, 1857-9. Delitzsch, *Commentar über den Psalter*, 1859-60; *Die Psalmen, neue Ausarbeitung* (Bibl. Com. 4<sup>ter</sup> Th.), 1867. Thrupp, *Emendations on the Psalms* (Journal of Class. and Sac. Phil.), 1860. Van Ortenberg, *Zur Textkritik der Psalmen*, 1861. Böhl, *Zwölf Messianische Psalmen*, 1862. Kamphausen, *Die Psalmen* (Bunsen's Bibelwerk), 1863. Perowne, *The Book of Psalms, a new Translation, with Introductions and Notes expl. and crit.*, 1864-8; 2d ed. (in press, 1869). Wordsworth, *The Book of Psalms*, 1867. *The Psalms chronologically arranged; an amended version, with hist. introductions and explan. notes, by Four Friends*, Lond. 1867. Ehrh, *Abfassungszeit und Abschluss des Psalters*, 1869. Moll, *Die Psalter*, 1<sup>te</sup> Hülfe (Lange's Bibelwerk, 11<sup>ter</sup> Th.), 1869. Barnes, *Notes crit. expl. and pract. on the Book of Psalms*, 3 vols. 1869. Didham, *A new Translation of the Psalms*; Part I., Pss. i.-xxv., 1869. Conant, *The Psalms, revised version, with an Introduction and occasional notes* (in press, 1869).

T. J. C.

\* **PSALMS, IMPRECATORY.** The psalms designated under this title are those in which the author is supposed to invoke curses upon his enemies, and for the gratification of a vindictive spirit to delight in their sufferings. Entire psalms usually classed as imprecatory in this sense are xxxv., lviii., lix., lxi., and cix., all of which bear strong marks of the authorship of David. Parts of other psalms have also been classed as imprecatory: Ps. iii. 3, 7, ix. 2-4, xviii. 37-43, xvi. 7-11, xxxvii. 12-15, lii. 5-7, lv. 9, 15, and 23, lxiii. 9-11, lxiv. 7-9, cxxxv. 8-12, cxxxvii. 7-9. Among the strongest passages in which this maledictory spirit is said to appear are the following:—

"Set thou a wicked man over him,  
And let Satan stand at his right hand.  
When he shall be judged, let him be condemned,  
And let his prayer become sin" (cix. 6, 7)

"Let his children be fatherless, and his wife a widow  
Let his children be continually vagabonds and beg  
Let the extortioner catch all that he hath,  
And let strangers spoil his labor" (cix. 9-11).

(Of a later date) —

"O daughter of Babylon, who art to be destroyed,  
Happy shall he be that rewardeth thee  
As thou hast served us.  
Happy shall he be that taketh  
And dasheth thy little ones against the stones"

(cxxxvii. 8, 9)

It is undeniable that these and such expressions in the Psalms have been a source of grief and perplexity to the Christian, while they have furnished occasion for cavil and scoffing to the skeptical. Various theories have been proposed for explaining the language so as to remove this ground of complaint against the Scriptures. It has been suggested that the so called imprecations are simply predictions of the evil which is likely to befall the wicked. But the study of the Hebrew original does not warrant such a view: the imprecation is expressed by the forms of the verb (imperative as well as future) employed in Hebrew for uttering a wish or prayer. This, moreover, is a timid way of dealing with the difficulty. It is better at once to admit the apparent inconsistency between this spirit of the Psalms and that of the teachings and example of Christ, and then inquire what explanation can be given of it. Within the limits to which we are restricted, we can only glance at some of the leading considerations.

(i.) In the first place it has been said that the duty of forgiving and loving our enemies is not distinctly taught in the O. T., and that David therefore is not to be expected to rise above the standard of duty and character of the dispensation to which he belonged. But we must reply to this that David was not ignorant of this requisition; for the Jewish Scriptures condemned a spirit of revenge, and enjoined the requiting of evil with good. In Ex. xxiii. 4, 5, we read (as correctly translated): "If thou seest thine enemy's ox or his ass going astray, thou shalt surely bring it back to him. When thou seest the ass of him that hateth thee lying under its burden, thou shalt forbear to leave him: thou shalt surely help him loose it." So in Lev. xix. 18: "Thou shalt not avenge nor bear any grudge against the children of thy people; but thou shalt love thy neighbor as thyself;" Prov. xxiv. 17, 18: "Rejoice not when thine enemy falleth; and let not thine heart be glad when he stumbleth; lest the Lord see it, and it displease Him" (see also ver. 29); and xxv. 21, 22: "If thine enemy be hungry, give him bread to eat; and if he be thirsty, give him water to drink: for thou shalt heap coals of fire upon his head, and the Lord shall reward thee." Not only so, but David himself recognized this obligation, and, as all admit, was certainly in his general conduct a remarkable example of patience under multiplied wrongs and of magnanimity to his foes when he had them in his power (see *infra*).

(ii.) Some would regard the psalms here under consideration as historical in their character, and not strictly preceptive or didactic. That is, they are the records of facts, and hence express the actual feelings of the writers, just as the biography of good men in the Bible and elsewhere relates other acts of such men, of the character of which the reader is left to judge according to his own standard of piety and morality. If inspired men may do things which are wrong, they may utter words which are selfish, or passionate, or resentful, and yet not forfeit their character for general uprightness or their claim in other respects to confidence as religious teachers. It is precisely this fidelity with which the Scriptures record the acts and feelings of men who usually were eminent servants of God, suppressing nothing, palliating nothing, that, more than any ingenious defense of apologists, has given to the Bible its hold on the confidence of the world. This perfect truthfulness makes an irresistible appeal. With wonderful wisdom the Bible

does not present to us for a model, the piety of the saint or angel, but piety in its human development struggling with sins, temptations, difficulties; not the highest form of religion, but the highest form which man can understand. The failings of David, Moses, and Peter have benefited the Church as well as the unblemished correctness of Joseph and Daniel. The experience of any one takes hold of us, when his real feelings, good and bad, are honestly told. They are so much like our own that we sympathize with him. They interest intensely each successive generation of mankind, for "one touch of nature makes us all akin." The wonder and beauty of these compositions is that they are a glass through which we see nature exactly; they give a Shakespearian picture of all the moral workings of the heart. The Psalmist does not select his best feelings for exhibition and hold his bad ones in the shade, but all ideas and emotions are given just as they are. Rev. Albert Barnes admits an element of truth in this explanation, and Dr. Tholuck distinctly holds that a personal feeling has occasionally mixed itself with David's denunciations of the wicked. Hengstenberg objects to such a view that it invalidates the character of the Psalms as a normal expression of only such acts and feelings as God must approve.

(iii.) In the third place, it is undeniable that some critics have greatly exaggerated this charge of vindictiveness on the part of David. In reality very few of the Psalms have with any appearance of truth incurred this censure. Of the one hundred and fifty psalms, Stanley (*Lectures on the Jewish Church*, ii. 170) singles out only four as marked illustrations of this spirit. With reference to these, or others which may be classed with these, we are to make due allowance for the *vehemence of oriental expression* as compared with our own habits of thought and language. It is a maxim in literature that an author is to be judged by the standard of his own age and time, not by the standard of our own. This is a simple principle of justice readily granted to all authors, and due certainly to the Biblical authors as well as others. An honest effort to understand the imprecatory psalms requires that we study the genius of Hebrew poetry, the spirit of the age in which David lived, and the circumstances of David at the moment when he uttered the imprecations. To understand an author, we must with pains and study reach the author's exact point of view. We must distinguish between the real meaning of the man and the color given to that meaning by his education and habits of thought. A very little study shows us that Hebrew poetry partakes of the intenseness of oriental temperament. The Oriental expresses in the language of strong passion the same meaning which to the European appears to be the dictate of reason and common sense. If the European says that God loves men, the Asiatic prophet expresses the same idea by a phrase which is almost amatory; "Thy Maker is thine husband;" "As the bridegroom rejoiceth over the bride, so shall thy God rejoice over thee." Now the sentiments of indignation are expressed with the same hyperbole. If the European merely says that justice will be done to the wicked the Oriental means the same thing, but expresses it by saying:—

"The righteous shall rejoice when he seeth the vengeance,  
He shall wash his feet in the blood of the wicked:

When the Psalmist utters a denunciation which to us seems terrific, he may have intended only to express a plain thought with ordinary vigor. A generous and certainly a thorough examiner will take the genius of the age and of the man for the background of his criticism upon the man's production; he will criticise poetry as poetry, and Oriental Poetry as a department of the art, distinct and separate in itself; he will not complain because in the poetry of Isaiah there are found some expressions which would not be pertinent to a demonstration of Euclid, nor will he expect to find in Homer the same style of expression which he looks for in Sir William Hamilton.

(iv.) Another consideration which, if not rightly understood, will confuse the reader of these psalms, is that their author identifies the enemies of God with his own enemies. The spirit of David is well expressed in his own words: "Do I not hate them, O Lord, that hate thee? I hate them with perfect hatred; I count them mine enemies;" or, in the colder language of Solomon: "The fear of the Lord is to hate evil: pride, and arrogance, and the evil way, and the froward mouth do I hate." Even Catiline had insight enough to say, "An identity of wishes and aversions, this alone is true friendship;"<sup>a</sup> and such was the friendship between David and Jehovah. So close was the union between David and his Master that intuitively David assailed the Lord's enemies as his own. The truth is that David's personal attitude towards his enemies was different from that of any other warrior in history. The cause of God was placed in his hands obviously and directly. He was called upon to uphold the cause of Jehovah against the heathen without and the house of Saul within the Jewish kingdom. He had the wrongs of Jehovah as well as his own to requite, and in requiting the wrongs of Jehovah he probably lost sight of his own altogether. During his youth, spies in the employ of Saul were around him continually, and often was he pursued by a band of furious and blood-thirsty men, who, by exterminating him, hoped to extinguish the cause of God altogether. He was situated like the English statesman who in an attack upon himself sees the crown and government to be really aimed at. Hence the terrible strength of David's retort. He replied not for himself, but for those whom he represented. His zeal for God spent itself in a tempest of fury upon God's enemies. It was when he felt God's honor to be insulted that he rose to a loftiness of vengeance all his own, and prayed:—

"That thy foot may be dipped in the blood of thine enemies,  
And the tongue of thy dogs in the same."

Unless we rise to this view, we are left to suppose that David left the vast responsibility of defending God's earthly honor, for the little work of redressing his personal wrongs. The elevation of his character above such a motive is evident from his sparing the chief of his enemies when he had him in his power, and from the generous eloquence of his lamentation when that enemy fell. David's real feeling towards his enemies he expresses thus (Ps. **xxxv.** 12, 13):—

"They rewarded me evil for good;  
My soul is made desolate (orphaned);

<sup>a</sup> "Nam item velle atque idem nolle, ea demum vera amicitia est." (Sallust, *Catiline*, 20, 4).

But as for me, when they were sick,  
My clothing was sackcloth.  
I afflicted my soul with fasting,  
And my prayer returned into mine own bosom."

David also wrote (Ps. lxxix. 24):—

"Pour out thine indignation upon them,  
And let thy wrathful anger take hold of them."

But in the one case he spoke of his own enemies, and in the other case of the enemies of God, as he shows in the very next verse:—

"For they persecute him whom thou hast smitten,  
And they talk to the grief of those whom thou hast wounded."

(v.) These considerations prepare the way for the main explanation of the Imprecatory Psalm. They express the sense of outraged justice. In the nature of things, the sense of wrong and injustice must have its rebound. There are times when forbearance ceases to be a virtue, when Heaven encourages men to express the pent-up indignation of their hearts. It is not to be supposed God intends that the saints shall bear all the Inquisitions, Saint Bartholomews, Smithfield fires of the enemy in total silence. If man is liable to oppression, he is also gifted with resistive powers, and of those powers the spirit of God only invigorates the proper use. The grace which makes men free from sin, makes them free from the earthly tyrant, and the spirit of God is the real force which inspires men to resist oppression with the pen and the sword. David was the Milton and the Cromwell of his time. With dauntless courage and determination he fought the earthly battles of the Lord, and the English poet caught the echo of his lyre, when he sang,—

"Avenge, O Lord, thy slaughtered saints, whose bones  
Lie scattered on the Alpine mountains cold."

The wicked man is not merely the foe of the one whom he injures; he is the common enemy of all mankind. While the judge and the executioner are engaged in punishing him, they may be cheered in their work by the prayer of the Christian and the song of the poet. Any government would be justly derided which showed itself unable or unwilling to punish at the proper time. Based upon this irrepressible instinct of human nature, we rise to survey the vast field of revealed doctrine, and see that the spirit of the Imprecatory Psalms is no morbid or inconsistent sentiment of the Bible; but if that spirit is necessary to a natural government, it is equally necessary to a perfect revelation. From a low moral standpoint these psalms seem to be an irregular part of the Bible; they take their place with poise and beauty in the great scheme when we rise sufficiently high to see the whole of it. If the main purpose of God's mind is love to the universal good, its alternate expression is denunciation of evil. It is but a narrow spirit which condemns, in a small portion of the Psalms, that resistance to evil, which goes forth from the throne of God to form all that is manly in human nature, and around which every other sentiment of the Bible is adjusted.

(vi.) Nearly every book of the Scriptures has a form of denouncing sin, which is peculiar to itself. The Pentateuch denounces by the severity of its laws against the wicked man; it gives that view of sin which is peculiar to the lawgiver's mind. The historical books of the Bible do not denounce sin, but they quietly show its effects. In the individ-

case they show that a bad character is naturally connected with the loss of all resources, and, generally speaking, with a miserable end. In the case of a nation, they show that its guilt is closely connected with its enslavement; for after sin has mastered the national character, the government soon loses all vigor and cohesion, and the sword of the tyrant rapidly presses through the breach which sin has made in the rampart of public virtue. This part of the Bible pictures sin as it is seen from the historic standpoint. The prophets denounce sin in a manner more rhetorical and direct, and the imprecations of David are gentle, compared with the anathemas of Isaiah, Ezekiel, Amos, and Hosea. If our Saviour had uttered no imprecations, those of David could certainly be questioned; but He did utter them with a scope, duration, and intensity of meaning which David never knew, for the greater the being the greater is his power to destroy. The very gentleness of the Saviour's character prevents any suspicion that He could have been influenced by private resentment, and gives an indescribable air of truth and justice to his threatenings. Now why is it that in a few songs of David the same spirit is so much condemned? We answer that, as far as we can judge, there is an ambiguity in the object of David's imprecation. In his case, the enemies of God and his own enemies were the same persons, and the Psalmist is accused of attacking those as his own enemies, while there is overwhelming reason to believe he attacked them only as the enemies of God. It is probably this circumstance alone which has confused the mind of the good, and exposed the Psalmist to the charge of vindictiveness.

(vii.) The revealed word is reflected in man's experience, and we remark finally that the events of history continually give the Imprecatory Psalm new meaning. Experience is their best interpreter. When the cause of truth is borne down for the moment, when the wicked oppose, and the good man is anxious, and the time-server is silent and afraid, then the soul, heated by persecution, is prepared to grasp the spirit of the Imprecatory Psalms. In the palace of God's truth these psalms hang like a sword upon the wall: in times of peace we make idle criticisms upon its workmanship and idle theories as to its use; sound the trumpet of danger, and we instinctively grasp it—it is all that we have between us and death. In the day of prosperity these psalms seem useless, in the darkness of affliction they are luminous; as a piece of fireworks has no prominence in the day-time, but it is the splendor and illumination of the night. There are times when the Christian is not to blame for having the spirit of these psalms, but he would deserve the contempt of mankind if he failed to have it. Resentment becomes the holiest of instincts when it resents the proper object. The spirit of the prophet is not dead, who was asked, "Dost thou well to be angry?" and he answered, "I do well." With wonderful wisdom the Bible provides, not only for man's present, but for his future emergencies, as the earth is stored with mine after mine which successive ages shall open. These psalms have a "springing and germinant fulfillment;" every throe and struggle of humanity comments upon them, and each generation of mankind penetrates further into their meaning. Think not that any truth is useless; the rolling wheel of time shall at length come upon it.

Such is a brief view of these celebrated composi-

tions. Truthful in delineating the human heart, Asiatic in the exuberance of their diction, marking the unity of their author's mind with God, they furnish an expression of that majestic spirit of resistance to evil, which, planted by God in the human bosom, is expressed with increasing clearness as God's revelation is disclosed, and, deriving new power from every crisis of human experience, looks forward with augmented confidence to a day of the triumph of truth and justice over all enemies.

The following writers on this subject may be mentioned: Hengstenberg, *Die Psalmen*, iv. 299-305. Tholuck, *Übersetzung u. Auslegung der Psalmen*, § 4 (transl. by J. I. Momberl). Hufeld, *Die Psalmen*, iv. 431 f. The article *Psalmen* by Delitzsch in Herzog's *Real-Encyk.* xi. 290, and *id.*, by Wunderlich in Zeller's *Bibl. Wörterb.* ii. 295 f. Perowne, *The Psalms of David*, Introd. lxxii., and on Ps. lxxix. Isaac Taylor, *Spirit of Hebrew Poetry*, pp. 210-217 (N. Y., 1862). B. B. Edwards, *Imprecations in the Scriptures*, in his *Life and Writings*, by E. A. Park, ii. 364 ff. Prof. J. J. Owen, *Imprecatory Psalms*, in the *Bibl. Sacra*, xiii. 551-563. Prof. E. A. Park, *Imprecatory Psalms*, in the *Bibl. Sacra*, xix. 165-210. Rev. Albert Barnes, *Commentary on the Psalms*, Introd. § 6 (1869). W. E. P.

**PSALTERY.** The psaltery was a stringed instrument of music to accompany the voice. The

Hebrew נָבֵל, *nēbel*, or נְבִילָה, *nēbilā*, is so rendered in the A. V. in all passages where it occurs, except in Is. v. 12, xiv. 11, xxii. 24 marg.; Am. v. 23, vi. 5, where it is translated *viol*, following the Geneva Version, which has *viola* in all cases, except 2 Sam. vi. 5; 1 K. x. 12 ("psaltery"); 2 Esdr. x. 22; Eccles. xl. 21 ("psalterion"); Is. xxii. 24 ("musicke"); and Wisd. xix. 18 ("instrument of musikē"). The ancient viol was a six-stringed guitar. "Viols had six strings, and the position of the fingers was marked on the finger-board by frets, as in the guitars of the present day" (Chappell, *Pop. Mus.* i. 246). In the Prayer Book version of the Psalms, the Hebrew word is rendered "lute." This instrument resembled the guitar, but was superior in tone, "being larger, and having a convex back, somewhat like the vertical section of a gourd, or more nearly resembling that of a pear. . . . It had virtually six strings, because, although the number was eleven or twelve, five, at least, were doubled; the first or treble, being sometimes a single string. The head in which the pegs to turn the strings were inserted, receded almost at a right angle" (Chappell, i. 102). These three instruments, the psaltery or sautry, the viol, and the lute, are frequently associated in the old English poets, and were clearly instruments resembling each other, though still different. Thus in Chaucer's *Flower and Leaf*, 337, —

"And before hem went minstreles many one,  
As harpes, pipes, lutes, and sautry;"

and again in Drayton's *Polyolbion*, iv. 356: —

"The trembling lute some touch, some strain the tra  
best."

The word *psaltery* in its present form appears to have been introduced about the end of the 16th century, for it occurs in the unmodified form *psalterion* in two passages of the Gen. Version (1560). Again, in North's Plutarch (*Them.* p. 124, ed 1595) we read that Themistocles, "being mocked

... by some that had studied humanitie, and other liberrall sciences, he was driven for reuenge and his owne defence, to answer with greate and stoute words, saying, that in deed he could no skill to tune a harpe, nor a violl, nor to play of a psalterion; but if they did put a citie into his hands that was of small name, weake, and litle, he knew wayes enough how to make it noble, strong, and great." The Greek ψαλτήριον, from which our word is derived, denotes an instrument played with the fingers instead of a plectrum or quill, the verb ψάλλειν being used (Eur. *Bucch.* 781), of twanging the bowstring (comp. ψαλμοί τρέφων, Eur. *Ion.* 173). But it only occurs in the LXX. as the rendering of the Heb. *nebel* or *nebel* in Neh. xii. 27, and Is. v. 12, and in all the passages of the Psalms, except Ps. lxxi. 22 (ψαλμός), and Ps. lxxxii. 2 (κινύρα), while in Am. v. 23, vi. 5, the general term ὄργανον is employed. In all other cases νάβλα represents *nebel* or *nebel*. These various renderings are sufficient to show that at the time the translation of the LXX. was made, there was no certain identification of the Hebrew instrument with any known to the translators. The rendering νάβλα commends itself on account of the similarity of the Greek word with the Hebrew. Josephus appears to have regarded them as equivalent, and his is the only direct evidence upon the point. He tells us (*Ant.* vii. 12, § 3) that the difference between the κινύρα (Heb. כִּנּוּרָה, *cinnôr*) and the νάβλα was, that the former had ten strings and was played with the plectrum, the latter had twelve notes and was played with the hand. Forty thousand of these instruments, he adds (*Ant.* viii. 3, § 8), were made by Solomon of electrum for the Temple choir. Rashi (on Is. v. 12) says that the *nebel* had more strings and pegs than the *cinnôr*. That *nablu* was a foreign name is evident from Strabo (x. 471), and from Athenæus (iv. 175), where its origin is said to be Sidonian. Beyond this, and that it was a stringed instrument (Ath. iv. 175), played by the hand (Ovid, *Art.* Am. iii. 327), we know nothing of it, but in these facts we have strong presumptive evidence that *nabla* and *nebel* are the same; and that the *nabla* and *psalterion* are identical appears from the Glossary of Philoxenus, where *nablio* = ψάλτης, and *nablio* = ψάλλω, and from Suidas, who makes *psalterion* and *nabla*, or *nablu*, synonymous. Of the psalter among the Greeks there appear to have been two kinds. The *πηκρίς*, which was of Persian (Athen. xiv. 636) or Lydian (*ibid.* 635) origin, and the *μαγδύς*. The former had only two (Athen. iv. 183) or three (*ibid.*) strings; the latter as many as twenty (Athen. xiv. 634), though sometimes only five (*ibid.* 637). They are sometimes said to be the same, and were evidently of the same kind. Both Isidorus (*de Orig.* iii. 21) and Cassiodorus (*Præf. in Psal.* c. iv.) describe the psalter as triangular in shape, like the Greek Δ, with the sounding-board above the strings, which were struck downwards. The latter adds that it was played with a plectrum, so that he contradicts Josephus if the psalter and *nebel* are really the same. In this case Josephus is the rather to be trusted. St. Augustine (on Ps. xxxii. xxxiii.) makes the position of the sounding-board

the point in which the cithara and psalter differ, in the former it is below, in the latter above the strings. His language implies that both were played with the plectrum. The distinction between the cithara and psalter is observed by Jerome (*Prok. in Psal.*). From these conflicting accounts it is impossible to say positively with what instrument the *nebel* of the Hebrew exactly corresponded. It was probably of various kinds, as Kinchi says in his note on Is. xxii. 24, differing from each other both with regard to the position of the pegs and the number of the strings. In illustration of the descriptions of Isidorus and Cassiodorus reference may be made to the drawings from Egyptian musical instruments given by Sir Gard. Wilkinson (*Anc. Eg.* ii. 280, 287), some one of which may correspond to the Hebrew *nebel*.<sup>a</sup> Munk (*Palestine*, plate 16, figs. 12, 13) gives an engraving of an instrument which Niebuhr saw. Its form is that of an inverted delta placed upon a round box of wood covered with skin.

The *nebel* 'ásôr (Ps. xxxiii. 2, xcii. 3 [4], cxliv. 9) appears to have been an instrument of the psalterium kind which had ten strings, and was of a trapezium shape, according to some accounts (Forkel, *Gesch. d. Mus.* i. 133). Aben Ezra (on Ps. cl. 3) says the *nebel* had ten holes. So that he must have considered it to be a kind of pipe.

From the fact that *nebel* in Hebrew also signifies a wine-bottle or skin, it has been conjectured that the term, when applied to a musical instrument, denotes a kind of bagpipe, the old English *cornamute*, Fr. *cornemuse*; but it seems clear, whatever else may be obscure concerning it, that the *nebel* was a stringed instrument. In the Mishna (*Célim*, xvi. 7) mention is made of a case (רִיקָה = *thékā*) in which it was kept.

Its first appearance in the history of the O. T. is in connection with the "string" of prophets who met Saul as they came down from the high place (1 Sam. x. 5). Here it is clearly used in a religious service, as again (2 Sam. vi. 5; 1 Chr. xiii. 8), when David brought the ark from Kirjath-jearim. In the Temple band organized by David were the players on psalteries (1 Chr. xv. 16, 20), who accompanied the ark from the house of Obededom (1 Chr. xv. 28). They played when the ark was brought into the Temple (2 Chr. v. 12); at the thanksgiving for Jehoshaphat's victory (2 Chr. xx. 28); at the restoration of the Temple under Hezekiah (2 Chr. xxix. 25), and the dedication of the walls of Jerusalem after they were rebuilt by Nehemiah (Neh. xii. 27). In all these cases, and in the passages in the Psalms where allusion is made to it, the psalter is associated with religious services (comp. Am. v. 23; 2 Esdr. x. 22). But it had its part also in private festivities, as is evident from Is. v. 12, xiv. 11, xxii. 24; Am. vi. 5, where it is associated with banquets and luxurious indulgence. It appears (Is. xiv. 11) to have had a soft plaintive note.

The psalteries of David were made of cypress (2 Sam. vi. 5), those of Solomon of alnum or almug-trees (2 Chr. ix. 11). Among the instruments of the band which played before Nebuchadnezzar's golden image on the plains of Dura, we again meet with the psaltery (נְבִילֵי דָוִד, Dan. iii.

<sup>a</sup> Abraham de Porta-Leone, the author of *Shilte Haggibborim* (c. 5), identifies the *nebel* with the Italian *liuta*, the lute, or rather with the particular kind

called *liuto chitarronato* (the Germ. *mandoline*), the thirteen strings of which were of gut or sinew, and were struck with a quill.

5, 10, 15; פְּטֹלְמָאִים, *ptōlōmā'īm*). The Chaldee word appears to be merely a modification of the Greek χαλθηριον. Attention is called to the fact that the word is singular in Gesenius (*Theo.* p. 1116), the termination פְּ corresponding to the Greek -ιον. W. A. W.

[PTOLEMÆ'US, in A. V.] PTOLEMEE and PTOLEMĒ'US (Πτολεμαῖος; *Ptolemaios*).

1. "The son of Dorymenes" (1 Macc. iii. 38; 2 Macc. iv. 45; comp. Polyb. v. 61), a courtier who possessed great influence with Antiochus Epiphanes. He was induced by a bribe to support the cause of Menelaus (2 Macc. iv. 45-50); and afterwards took an active part in forcing the Jews to apostatize (2 Macc. vi. 8, according to the true reading). When Judas had successfully resisted the first assaults of the Syrians, Ptolemy took part in the great expedition which Lysias organized against him, which ended in the defeat at Emmaus (B. C. 166), but nothing is said of his personal fortunes in the campaign (1 Macc. iii. 38).

2. The son of Agesarehus (Ath. vi. 246 C), a Megalopolitan, surnamed Macron (2 Macc. x. 12), who was governor of Cyprus during the minority of Ptol. Philometor. This office he discharged with singular fidelity (Polyb. xxvii. 12); but afterwards he deserted the Egyptian service to join Antiochus Epiphanes. He stood high in the favor of Antiochus, and received from him the government of Phenicia and Cœle-Syria (2 Macc. viii. 8, x. 11, 12). On the accession of Ant. Eupator, his conciliatory policy toward the Jews brought him into suspicion at court. He was deprived of his government, and in consequence of his disgrace he poisoned himself c. B. C. 164 (2 Macc. x. 13).

Ptol. Macron is commonly identified with Ptol. "the son of Dorymenes," and it seems likely from a comparison of 1 Macc. iii. 38 with 2 Macc. viii. 8, 9, that they were confused in the popular account of the war. But the testimony of Athenæus distinctly separates the governor of Cyprus from "the son of Dorymenes" by his parentage. It is also doubtful whether Ptol. Macron had left Cyprus as early as B. C. 170, when "the son of Dorymenes" was at Tyre (2 Macc. iv. 45), though there is no authority for the common statement that he

gave up the island into the hands of Antiochus, who did not gain it till B. C. 168.

3. The son of Abubus, who married the daughter of Simon the Maccabee. He was a man of great wealth, and, being invested with the government of the district of Jericho, formed the design of usurping the sovereignty of Judea. With this view he treacherously murdered Simon and two of his sons (1 Macc. xvi. 11-16; Joseph. *Ant.* xii. 7, § 4; 8, § 1, with some variations); but Johannes Hyrcanus received timely intimation of his design, and escaped. Hyrcanus afterwards besieged him in his stronghold of Dök, but in consequence of the occurrence of the Sabbatical year, he was enabled to make his escape to Zeno Cotylas, prince of Philadelphia (Joseph. *Ant.* xiii. 8, § 1).

4. A citizen of Jerusalem, father of Lysimachus, the Greek translator of Esther (*Esth.* xi. [LYSIMACHUS 1.] B. F. W.

PTOLEMÆ'US (in A. V. PTOL'OMEI and PTOLEMĒ'US—Πτολεμαῖος, "the warlike," πτόλεμος=πόλεμος), the dynastic names of the Greek kings of Egypt. The name, which occurs in the early legends (ll. iv. 228; Paus. x. 5), appears first in the historic period in the time of Alexander the Great, and became afterwards very frequent among the states which arose out of his conquests.

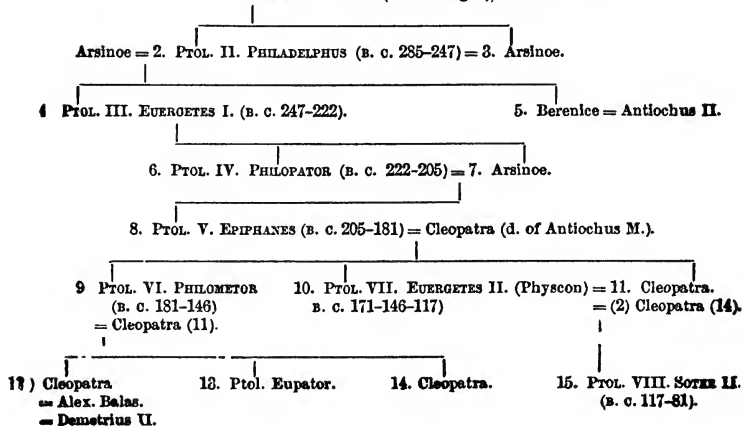

For the civil history of the Ptolemies the student will find ample references to the original authorities in the articles in the *Dictionary of Biography*, ii. 581, etc., and in Pauly's *Real-Encyclopædie*.

The literature of the subject in its religious aspects has been already noticed. [ALEXANDRIA; DISPERSION.] A curious account of the literary activity of Ptol. Philadelphus is given—by Simon de Magistris—in the *Apologia sent. Pat. de LXX. Vers.*, appended to *Daniel sec. LXX.* (Romæ, 1772), but this is not always trustworthy. More complete details of the history of the Alexandrine Libraries are given by Ritschl, *Die Alexandrinischen Bibliotheken*, Breslau, 1838; and Parthey *Das Alexandr. Museum*, Berlin, 1838.

The following table gives the descent of the royal line as far as it is connected with Biblical history. B. F. W.

GENEALOGICAL TABLE OF THE PTOLEMIES.

1. PTOLEMÆUS I. SOTER (son of Lagus), c. B. C. 323-285.

**PTOLEMÆUS I. SOTER**, known as the son of Lagus, a Macedonian of low rank, was generally supposed to have been an illegitimate son of Philip. He distinguished himself greatly during the campaigns of Alexander; at whose death, foreseeing the necessary subdivision of the empire, he secured for himself the government of Egypt, where he proceeded at once to lay the foundations of a kingdom (B. C. 323). His policy during the wars of the succession was mainly directed towards the consolidation of his power, and not to wide conquests. He maintained himself against the attacks of Perdicas (B. C. 321) and Demetrius (B. C. 312), and gained a precarious footing in Syria and Phœnicia. In B. C. 307 he suffered a very severe defeat at sea off Cyprus from Antigonos, but successfully defended Egypt against invasion. After the final defeat of Antigonos, B. C. 301, he was obliged to concede the debatable provinces of Phœnicia and Cœle-Syria to Seleucus; and during the remainder of his reign his only important achievement abroad was the recovery of Cyprus, which he permanently attached to the Egyptian monarchy (B. C. 295). He abdicated in favor of his youngest son Ptol. II. Philadelphus, two years before his death, which took place in B. C. 283.

Ptol. Soter is described very briefly in Daniel (xi. 5) as one of those who should receive part of the empire of Alexander when it was "divided toward the four winds of heaven." "*The king of the south [Egypt in respect of Judæa] shall be strong; and one of his princes [Seleucus Nicator, shall be strong]; and he [Seleucus] shall be strong above him [Ptolemy], and have dominion.*" Seleucus, who is here mentioned, fled from Babylon, where Antigonos sought his life, to Egypt in B. C. 316, and attached himself to Ptolemy. At last the decisive victory of Ipsus (B. C. 301), which was mainly gained by his services, gave him the command of an empire which was greater than any other held by Alexander's successors; and "*his dominion was a great dominion*" (Dan. i. c.).<sup>a</sup>

Ptolemy I., King of Egypt.

Pentadrachm of Ptolemy I. (Alexandrian talent). Obv. Head of king, r. f., bound with fillet. Rev. ΠΤΟΛΕΜΑΙΟΥ ΣΩΤΗΡΟΣ. Eagle, l., on thunderbolt. (Struck at Tyre.)

In one of his expeditions into Syria, probably B. C. 320, Ptolemy treacherously occupied Jerusalem on the Sabbath, a fact which arrested the attention of the heathen historian Agatharchides (*op. Joseph. c. Ap. i. 22; Ant. xii. 1*). He carried away many Jews and Samaritans captive to Alexandria; but, aware probably of the great importance of the good will of the inhabitants of Palestine in the event of a Syrian war, he gave them the full

privileges of citizenship in the new city. In the campaign of Gaza (B. C. 312) he reaped the fruits of his liberal policy; and many Jews voluntarily emigrated to Egypt, though the colony was from the first disturbed by internal dissensions (*Joseph. as above; Hecat. ap. Joseph. c. Ap. i. c.*).

B. F. W.

**PTOLEMÆUS II. PHILADELPHUS**, the youngest son of Ptol. I., was made king two years before his death, to confirm the irregular succession. The conflict between Egypt and Syria was renewed during his reign in consequence of the intrigue of his half-brother Magas. "*But in the end of years they [the kings of Syria and Egypt] joined themselves together [in friendship]. For the king's daughter of the south [Berenice, the daughter of Ptol. Philadelphus] came [as bride] to the king of the north [Antiochus II.], to make an agreement*" (Dan. xi. 6). The unhappy issue of this marriage has been noticed already [ANTIOCHUS II., vol. i. p. 115]; and the political events of the reign of Ptolemy, who, however, retained possession of the disputed provinces of Phœnicia and Cœle-Syria, offer no further points of interest in connection with Jewish history.

In other respects, however, this reign was a critical epoch for the development of Judaism, as it was for the intellectual history of the ancient world. The liberal encouragement which Ptolemy bestowed on literature and science (following out in this the designs of his father) gave birth to a new school of writers and thinkers. The critical faculty was called forth in place of the creative, and learning in some sense supplied the place of original speculation. Eclecticism was the necessary result of the concurrence and comparison of dogmas; and it was impossible that the Jew, who was now become as true a citizen of the world as the Greek, should remain passive in the conflict of opinions. The origin and influence of the translation of the LXX. will be considered in another place. [SEPTUAGINT.] It is enough now to observe the greatness of the consequences involved in the union of Greek language with Jewish thought. From this time the Jew was familiarized with the great types of Western literature, and in some degree aimed at imitating them. Ezechiel (ὁ τῶν Ἰουδαϊκῶν τραγῳδιῶν ποιητής, Clem. Alex. *Str. i. 23, § 155*) wrote a drama on the subject of the Exodus, of which considerable fragments, in fair iambic verse, remain (Euseb. *Præp. Ev. ix. 23, 29; Clem. Alex. l. c.*), though he does not appear to have adhered strictly to the laws of classical composition. An elder Philo celebrated Jerusalem in a long hexameter poem — Eusebius quotes the 14th book — of which the few corrupt lines still preserved (Euseb. *Præp. Ev. ix. 20, 24, 23*) convey no satisfactory notion. Another epic poem, "on the Jews," was written by Theodotus; and as the extant passages (Euseb. *Præp. Ev. ix. 22*) treat of the history of Sichem, it has been conjectured that he was a Samaritan. The work of ARISTOBULUS on the interpretation of the Law was a still more important result of the combination of the old faith with Greek culture, as forming the groundwork of later allegories. And while the Jews appropriated the fruits of Western science, the Greeks looked towards

<sup>a</sup> Jerome (*ad Dan. l. c.*) very strangely refers the latter clauses of the verse to Ptol. Philadelphus, whose empire surpassed that of his father." The

whole tenor of the passage requires the contrast of the two kingdoms on which the fortunes of Judæa hung.

the East with a new curiosity. The histories of Berosus and Manetho and Hecataeus opened a world as wide and novel as the conquests of Alexander. The legendary sibyls were taught to speak in the language of the prophets. The name of Orpheus, which was connected with the first rise of Greek polytheism, gave sanction to verses which set forth nobler views of the Godhead (Euseb. *Præp. Ev.* xiii. 12, &c.). Even the most famous poets were not free from interpolation (Ewald, *Gesch.* iv. 297, *note*). Everywhere the intellectual approximation of Jew and Gentile was growing closer, or at least more possible. The later specific forms of teaching to which this syncretism of East and West gave rise have been already noticed. [ALEXANDRIA, vol. i. pp. 64, 65.] A second time and in a new fashion Egypt disciplined a people of God. It first impressed upon a nation the firm unity of a family, and then in due time reconnected a matured people with the world from which it had been called out. B. F. W.

Ptolemy II.

Octodrachm of Ptolemy II. Obv. ΑΔΕΛΦΩΝ. Busts of Ptolemy II. and Arsinoe, r. Rev. ΘΕΩΝ. Busts of Ptolemy I. and Berenice, r.

### PTOLEMÆUS III. EUERGETES

was the eldest son of Ptol. Philad. and brother of Berenice, the wife of Antiochus II. The repudiation and murder of his sister furnished him with an occasion for invading Syria (c. b. C. 246). He "stood up, a branch out of her stock [sprung from the same parents] in his [father's] estate; and set himself at [the head of] his army, and came against the fortresses of the king of the north [Antiochus], and dealt against them and prevailed" (Dan. xi. 7). He extended his conquests as far as Antioch, and then eastwards to Babylon, but was recalled to Egypt by tidings of seditions which had broken out there. His success was brilliant and complete. "He carried captive into Egypt the gods [of the conquered nations] with their molten images, and with their precious vessels of silver and gold" (Dan. xi. 8). This capture of sacred trophies, which included the recovery of images taken from Egypt by Cambyses (Jerome, *ad loc.*), earned for the king the name *Euergetes* — "Benefactor" — from the superstitious Egyptians, and was specially recorded in the inscriptions which he set up at Adule in memory of his achievements (Cosmas *Ind. op.* *Clint. F. II.* 382 *note*). After his return to Egypt (cir. n. c. 743) he suffered a great part of the conquered provinces to fall again under the power of Seleucus. But the attempts which Seleucus made to attack Egypt terminated disastrously to himself. He first collected a fleet which was almost totally destroyed by a storm; and then, "as if by some judicial infatuation," "he came against the realm of the king of the south and [being defeated] returned to his own land [to Antioch]" (Dan. xi. 2; Justin. xvii. 2). After this Ptolemy "desisted

some years from [attacking] the king of the north" (Dan. xi. 8), since the civil war between Seleucus and Antiochus Hierax, which he fomented, secured him from any further Syrian invasion. The remainder of the reign of Ptolemy seems to have been spent chiefly in developing the resources of the empire, which he raised to the highest pitch of its prosperity. His policy towards the Jews was similar to that of his predecessors, and on his occupation of Syria he "offered sacrifices, after the custom of the Law, in acknowledgment of his success, in the Temple at Jerusalem, and added gifts worthy of his victory" (Joseph. c. *Ap.* ii. 1). The famous story of the manner in which Joseph the son of Tobias obtained from him the lease of the revenues of Judæa is a striking illustration both of the condition of the country and of the influence of individual Jews (Joseph. *Ant.* xii. 4). ### PTOLEMÆUS IV. PHILOPATOR.

After the death of Ptol. Euergetes the line of the Ptolemies rapidly degenerated (Strabo, xvi. 12, 13, p. 798). Ptol. Philopator, his eldest son, who succeeded him, was to the last degree sensual, effeminate, and debased. But externally his kingdom retained its power and splendor; and when circumstances forced him to action, Ptolemy himself showed ability not unworthy of his race. The description of the campaign of Raphia (n. c. 217) in the Book of Daniel gives a vivid description of his character. "The sons of Seleucus [Seleucus Ceraunus and Antiochus the Great] were stirred up and assembled a multitude of great forces; and one of them [Antiochus] came and overflowed and passed through [even to Pelusium, Polyb. v. 62]; and he returned [from Selencia, to which he had retired during a faithless truce, Polyb. v. 66]; and they [Antiochus and Ptolemy] were stirred up [in war] even to his [Antiochus'] fortress. And the king of the south [Ptol. Philopator] was moved with choler, and came forth and fought with him [at Raphia]; and he set forth a great multitude; and the multitude was given into his hand [to lead to battle]. And the multitude raised itself [proudly for the conflict], and his heart was lifted up, and he cast down ten thousands (cf. Polyb. v. 86); but he was not vigorous" [to reap the fruits of his victory] (Dan. xi. 10-12; cf. 3 Mac. i. 1-5). After this decisive success Ptol. Philopator visited the neighboring cities of Syria, and among others Jerusalem. After offering sacrifices of thanksgiving in the Temple he attempted to enter the sanctuary. A sudden paralysis hindered his design; but when he returned to Alexandria, he determined to inflict on the Alexandrine Jews the vengeance for his disappointment. In this, however, he was again hin-

Jerod; and eventually he confirmed to them the full privileges which they had enjoyed before. [3 MACCABEES.] The recklessness of his reign was further marked by the first insurrection of the native Egyptians against their Greek rulers (Polyb. v. 107). This was put down, and Ptolemy, during the remainder of his life, gave himself up to unbridled excesses. He died b. c. 205, and was succeeded by his only child, Ptol. V. Epiphanes, who was at the time only four or five years old (Jerome, *ad Dan.* xi. 10-12). B. F. W.

Ptolemy IV.

Tetradrachm of Ptolemy IV. (Egyptian talent). Obv. Bust of king, r., bound with fillet. Rev. ΠΤΟΛΕΜΑΙΟΥ ΦΙΛΟΠΑΤΡΟΣ Eagle, l., on thunderbolt. (Struck at Tyre.)

**PTOLEMÆUS V. EPIPHANES.** The reign of Ptol. Epiphanes was a critical epoch in the history of the Jews. The rivalry between the Syrian and Egyptian parties, which had for some time divided the people, came to an open rupture in the struggles which marked his minority. The Syrian faction openly declared for Antiochus the Great, when he advanced on his second expedition against Egypt; and the Jews, who remained faithful to the old alliance, fled to Egypt in great numbers, where Onias, the rightful successor to the high-priesthood, not long afterwards established the temple at Leontopolis.<sup>a</sup> [ONIAS.] In the strong language of Daniel, "*The robbers of the people exalted themselves to establish the vision*" (*Dan.* xi. 14) — to confirm by the issue of their attempt the truth of the prophetic word, and at the same time to forward unconsciously the establishment of the heavenly kingdom which they sought to anticipate. The accession of Ptolemy and the confusion of a disputed regency furnished a favorable opportunity for foreign invasion. "*Many stood up against the king of the south,*" under Antiochus the Great and Philip III. of Macedonia, who formed a league for the dismemberment of his kingdom. "*So the king of the north [Antiochus] came, and cast up a mound, and took the most fenced city [Sidon, to which Scopas, the general of Ptolemy, had fled: Jerome, *ad loc.*], and the arms of the south did not withstand*" [at Paneas, b. c. 198, where Antiochus gained a decisive victory] (*Dan.* xi. 14, 15). The interference of the Romans, to whom the regents had turned for help, checked Antiochus in his career; but in order to retain the provinces of Coele-Syria, Phœnicia, and Judæa, which he had reconquered, really under his power, while he seemed to comply with the demands of the Romans, who required them to be surrendered to Ptolemy, "*he*

*gave him [Ptolemy, his daughter Cleopatra] a young maiden*" [as his betrothed wife] (*Dan.* xi. 18). But in the end his policy only partially succeeded. After the marriage of Ptolemy and Cleopatra was consummated (b. c. 193), Cleopatra did "*not stand on his side*," but supported her husband in maintaining the alliance with Rome. The disputed provinces, however, remained in the possession of Antiochus; and Ptolemy was poisoned at the time when he was preparing an expedition to recover them from Seleucus, the unworthy successor of Antiochus, b. c. 181. B. F. W.

Ptolemy V.

Tetradrachm of Ptolemy V. (Egyptian talent). Obv. Bust of king, r., bound with fillet adorned with ears of wheat. Rev. ΒΑΣΙΛΕΩΣ ΠΤΟΛΕΜΑΙΟΥ Eagle, l., on thunderbolt.

**PTOLEMÆUS VI. PHILOMETOR.** On the death of Ptol. Epiphanes, his wife Cleopatra held the regency for her young son, Ptol. Philometor, and preserved peace with Syria till she died, b. c. 173. The government then fell into unworthy hands, and an attempt was made to recover Syria (comp. 2 Macc. iv. 21). Antiochus Epiphanes seems to have made the claim a pretext for invading Egypt. The generals of Ptolemy were defeated near Pelusium, probably at the close of b. c. 171 (Clinton, *F. H.* iii. 319; 1 Macc. i. 16 ff.); and in the next year Antiochus, having secured the person of the young king, reduced almost the whole of Egypt (comp. 2 Macc. v. 1). Meanwhile Ptol. Euergetes II., the younger brother of Ptol. Philometor, assumed the supreme power at Alexandria; and Antiochus, under the pretext of recovering the crown for Philometor, besieged Alexandria in b. c. 169. By this time, however, his selfish designs were apparent: the brothers were reconciled, and Antiochus was obliged to acquiesce for the time in the arrangement which they made. But while doing so, he prepared for another invasion of Egypt, and was already approaching Alexandria, when he was met by the Roman embassy led by C. Popillius Lænas, who, in the name of the Roman senate, insisted on his immediate retreat (b. c. 168), a command which the late victory at Pydna made it impossible to disobey.<sup>b</sup>

These campaigns, which are intimately connected with the visits of Antiochus to Jerusalem in b. c. 170, 168, are briefly described in *Dan.* xi. 25-30: "*He [Antiochus] shall stir up his power and his courage against the king of the south with a great army; and the king of the south [Ptol. Philometor] shall be stirred up to battle with a very great and mighty army; but he shall not stand: for they [the ministers, as it appears, in whom he trusted]*

<sup>a</sup> Jerome (*ad Dan.* xi. 14) places the flight of Onias to Egypt and the foundation of the temple of Leontopolis in the reign of Ptol. Epiphanes. But Onias was still a youth at the time of his father's death, *cir.* b. c. 171.

<sup>b</sup> Others reckon only three campaigns of Antiochus

against Egypt in 171, 170, 168 (Grimm on 1 Macc. i. 18). Yet the campaign of 169 seems clearly distinguished from those in the years before and after; though in the description of Daniel the campaigns of 170 and 169 are not noticed separately.

shall forecast devices against him. Yea, they that feed of the portion of his meat shall destroy him, and his army shall melt away, and many shall fall down slain. And both these kings' hearts shall be to do mischief, and they shall speak lies at one table [Antiochus shall profess falsely to maintain the cause of Philometor against his brother, and Philometor to trust in his good faith]; but it shall not prosper [the resistance of Alexandria shall preserve the independence of Egypt]; for the end shall be at the time appointed. Then shall he [Antiochus] return into his land, and his heart shall be against the holy covenant; and he shall do exploits, and return to his own land. At the time appointed he shall return and come towards the south; but it shall not be as the former so also the latter time. [His career shall be checked at once] for the ships of Chittim [comp. Num. xxiv. 24: the Roman fleet] shall come against him: therefore he shall be dismayed and return and have indignation against the holy covenant."

Ptolemy VI.

Tetradrachm of Ptolemy VI. (Egyptian talent). Obv. Head of king, r., bound with fillet. Rev. ΠΤΟΛΕΜΑΙΟΥ ΦΙΛΟΜΗΤΟΥΣ. Eagle, l., with palm-branch, on thunderbolt.

After the discomfiture of Antiochus, Philometor was for some time occupied in resisting the ambitious designs of his brother, who made two attempts to add Cyprus to the kingdom of Cyrene, which was allotted to him. Having effectually put down these attempts, he turned his attention again to Syria. During the brief reign of Antiochus Eupator he seems to have supported Philip against the regent Lysias (comp. 2 Macc. ix. 29). After the murder of Eupator by Demetrius I., Philometor espoused the cause of Alexander Balas, the rival claimant to the throne, because Demetrius had made an attempt on Cyprus; and when Alexander had defeated and slain his rival, he accepted the overtures which he made, and gave him his daughter Cleopatra in marriage (b. c. 150: 1 Macc. x. 51-58). But, according to 1 Macc. xi. 1, 10, &c., the alliance was not made in good faith, but only as a means towards securing possession of Syria. According to others, Alexander himself made a treacherous attempt on the life of Ptolemy (comp. 1 Macc. xi. 10), which caused him to transfer his support to Demetrius II., to whom also he gave his daughter, whom he had taken from Alexander. The whole of Syria was quickly subdued, and he was crowned at Antioch king of Egypt and Asia (1 Macc. xi. 13). Alexander made an effort to recover his crown, but was defeated by the forces of Ptolemy and Demetrius, and shortly afterwards put to death in Arabia. But Ptolemy did not long enjoy his success. He

fell from his horse in the battle, and died within a few days (1 Macc. xi. 18), b. c. 145.

Ptolemaeus Philometor is the last king of Egypt who is noticed in sacred history, and his reign was marked also by the erection of the temple at Leontopolis. The coincidence is worthy of notice, for the consecration of a new centre of worship placed a religious as well as a political barrier between the Alexandrine and Palestinian Jews. Henceforth the nation was again divided. The history of the temple itself is extremely obscure, but even in its origin it was a monument of civil strife. Onias, the son of Onias III.,<sup>a</sup> who was murdered at Antioch, b. c. 171, when he saw that he was excluded from the succession to the high-priesthood by mercenary intrigues, fled to Egypt, either shortly after his father's death or upon the transference of the office to Alcimus, b. c. 162 (Joseph. Ant. xii. 9, § 7). It is probable that his retirement must be placed at the later date, for he was a child (παῖς, Joseph. Ant. xii. 5, § 1) at the time of his father's death, and he is elsewhere mentioned as one of those who actively opposed the Syrian party in Jerusalem (Joseph. B. J. i. 1). In Egypt he entered the service of the king, and rose, with another Jew, Dositheus, to the supreme command. In this office he rendered important services during the war which Ptol. Physcon waged against his brother; and he pleaded these to induce the king to grant him a ruined temple of Diana (τῆς ἀγρίας Βουβάστρου) at Leontopolis, as the site of a temple, which he proposed to build "after the pattern of that at Jerusalem, and of the same dimensions." His alleged object was to unite the Jews in one body, who were at the time "divided into hostile factions, even as the Egyptians were, from their differences in religious services" (Joseph. Ant. xiii. 3, § 1). In defense of the locality which he chose, he quoted the words of Isaiah (Is. xix. 18, 19), who spoke of "an altar to the Lord in the midst of the land of Egypt," and according to one interpretation mentioned "the city of the Sun" (עִיר הַחֶמֶס), by name. The site was granted and the temple built; but the original plan was not exactly carried out. The Naos rose "like a tower to the height of sixty cubits" (Joseph. B. J. vii. 10, § 3, πύργῳ παραπλήσιον . . . εἰς ἑξήκοντα πήχεις ἀνεστηκότα). The altar and the offerings were similar to those at Jerusalem; but in place of the seven-branched candlestick, was "a single lamp of gold suspended by a golden chain." The service was performed by priests and Levites of pure descent; and the temple possessed considerable revenues, which were devoted to their support and to the adequate celebration of the divine ritual (Joseph. B. J. vii. 10, § 3; Ant. xiii. 3, § 3). The object of Ptol. Philometor in furthering the design of Onias, was doubtless the same as that which led to the erection of the "golden calves" in Israel. The Jewish residents in Egypt were numerous and powerful; and when Jerusalem was in the hands of the Syrians, it became of the utmost importance to weaken their connection with their mother city. In this respect the position of the temple on the eastern border of the kingdom was peculiarly important (Jost, Gesch. d. Juden-thums, i. 117). On the other hand, it is probable

<sup>a</sup> Josephus in one place (B. J. vii. 10, § 2) calls him "the son of Simon," and he appears under the same name in Jewish legends; but it seems certain

that this was a mere error, occasioned by the patronymic of the most famous Onias (comp. Herzfeld, Gesch. Jud. ii. 557).

hat Onias saw no hope in the Hellenized Judaism of a Syrian province; and the triumph of the Maccabees was still unachieved when the temple at Leontopolis was founded. The date of this event cannot indeed be exactly determined. Josephus says (*B. J.* vii. 10 § 4) that the temple had existed "343 years" at the time of its destruction, *cir. A. D.* 71; but the text is manifestly corrupt. Faussebius (*op. Hieron.* viii. p. 507, *ed. Migne*) notices the flight of Onias and the building of the temple under the same year (*b. c.* 162), possibly from the natural connection of the events without regard to the exact date of the latter. Some time at least must be allowed for the military service of Onias, and the building of the temple may perhaps be placed after the conclusion of the last war with Ptol. Physcon (*c. n. c.* 154), when Jonathan "began to judge the people at Machmas" (*1 Macc.* ix. 73). In Palestine the erection of this second temple was not condemned so strongly as might have been expected. A question indeed was raised in later times whether the service was not idolatrous (*Jerus. Joma* 43 *d.*, *op. Jost, Gesch. d. Judenth.* i. 119), but the Mishna, embodying without doubt the old decisions, determines the point more favorably. "Priests who had served at Leontopolis were forbidden to serve at Jerusalem; but were not excluded from attending the public services." "A vow might be discharged rightly at Leontopolis as well as at Jerusalem, but it was not enough to discharge it at the former place only" (*Menach.* 109, *a.*, *op. Jost, as above*). The circumstances under which the new temple was erected were evidently accepted as in some degree an excuse for the irregular worship. The connection with Jerusalem, though weakened in popular estimation, was not broken; and the spiritual significance of the one Temple remained unchanged for the devout believer (*Philo, de Monarch.* ii. § 1, &c.). [ALEXANDRIA, vol. i. p. 63.]

The Jewish colony in Egypt, of which Leontopolis was the immediate religious centre, was formed of various elements and at different times. The settlements which were made under the Greek sovereigns, though the most important, were by no means the first. In the later times of the kingdom of Judah many "trusted in Egypt," and took refuge there (*Jer.* xliii. 6, 7); and when Jeremiah was taken to Tahpanhes, he spoke to "all the Jews which dwell in the land of Egypt, which dwell at Migdol and Tahpanhes, and at Noph, and in the country of Pathros" (*Jer.* xlv. 1). This colony, for need against the command of God, was devoted to complete destruction (*Jer.* xlv. 27), but when the connection was once formed, it is probable that the Persians, acting on the same policy as the Ptolemies, encouraged the settlement of Jews in Egypt to keep in check the native population. After the Return the spirit of commerce must have contributed to increase the number of emigrants; but the history of the Egyptian Jews is involved in the same deep obscurity as that of the Jews of Palestine till the invasion of Alexander. There cannot, however, be any reasonable doubt as to the power and influence of the colony; and the mere fact of its existence is an important consideration

in estimating the possibility of Jewish ideas finding their way to the west. Judaism had secured in old times all the treasures of Egypt, and thus the first installment of the debt was repaid. A preparation was already made for a great work when the founding of Alexandria opened a new era in the history of the Jews. Alexander, according to the policy of all great conquerors, incorporated the conquered in his armies. Samaritans (*Joseph. Ant.* xi. 8, § 6) and Jews (*Joseph. Ant.* xi. 8, § 5; *Hecat. op. Joseph. c. Ap.* i. 22) are mentioned among his troops; and the tradition is probably true which reckons them among the first settlers at Alexandria (*Joseph. B. J.* ii. 18, § 7; *c. Ap.* ii. 4). Ptolemy Soter increased the colony of the Jews in Egypt both by force and by policy; and their numbers in the next reign may be estimated by the statement (*Joseph. Ant.* xii. 2, § 1) that Ptol. Philadelphus gave freedom to 120,000. The position occupied by Joseph (*Joseph. Ant.* xii. 4) at the court of Ptol. Euergetes I., implies that the Jews were not only numerous, but influential. As we go onwards, the legendary accounts of the persecution of Ptol. Philopator bear witness at least to the great number of Jewish residents in Egypt (*3 Macc.* iv. 15, 17), and to their dispersion throughout the Delta. In the next reign many of the inhabitants of Palestine who remained faithful to the Egyptian alliance fled to Egypt to escape from the Syrian rule (*comp. Jerome ad Dan.* xi. 14, who is, however, confused in his account). The consideration which their leaders must have thus gained, accounts for the rank which a Jew, Aristobulus, is said to have held under Ptol. Philometor, as "tutor of the king" (*βιδάσκαλος*, *2 Macc.* i. 10). The later history of the Alexandrine Jews has been noticed before (*vol. i.* p. 63). They retained their privileges under the Romans, though they were exposed to the illegal oppression of individual governors, and quietly acquiesced in the foreign dominion (*Joseph. B. J.* vii. 10, § 1). An attempt which was made by some of the fugitives from Palestine to create a rising in Alexandria after the destruction of Jerusalem, entirely failed; but the attempt gave the Romans an excuse for plundering, and afterwards (*b. c.* 71) for closing entirely the temple at Leontopolis (*Joseph. B. J.* vii. 10).

B. F. W.

#### PTOLEMAIS (Πτολεμαῖς: *Ptolemais*).

This article is merely supplementary to that on ACCHO. The name is in fact an interpolation in the history of the place. The city which was called Accho in the earliest Jewish annals, and which is again the *Akka* or *St. Jean d'Acre* of crusading and modern times, was named Ptolemais in the Macedonian and Roman periods. In the former of these periods it was the most important town upon the coast, and it is prominently mentioned in the first book of Maccabees, v. 15, 55, x. 1, 58, 60, xii. 48. In the latter its eminence was far outdone by Herod's new city of CÆSAREA.<sup>a</sup> Still in the N. T. Ptolemais is a marked point in St. Paul's travels both by land and sea. He must have passed through it on all his journeys along the great coast-road which connected Casarea and Antioch<sup>b</sup> (*Acts* xi. 30, xii. 25, xv. 2, 30, xviii. 22);

<sup>a</sup> It is worthy of notice that Herod, on his return from Italy to Syria, landed at Ptolemais (*Joseph. Ant.* div. 15, § 1).

<sup>b</sup> On the journey from Antioch to Jerusalem (*Acts* xv. 3 ff.) Paul, instead of following the coast-

road to Casarea, appears to have turned inland from Ptolemais, across the Plain of Esdraelon, since he passed on that occasion through Phœnicia and Samaria to Jerusalem.

and the distances are given both in the Antonine and Jerusalem itineraries (Wesseling, *Itin.* pp. 158, 584). But it is specifically mentioned in Acts xxi. 7, as containing a Christian community, visited for one day by St. Paul. On this occasion he came to Ptolemais by sea. He was then on his return voyage from the third missionary journey. The last harbor at which he had touched was Tyre (ver. 3). From Ptolemais he proceeded, apparently by land, to Cæsarea (ver. 8) and thence to Jerusalem (ver. 17). J. S. H.

\* PTOLEMEE, PTOLEMEUS, PTOL-OMEE, PTOLOMEUS, A. V. in Esther (Apoc.) and 1 and 2 Maccabees. [PTOLEMEUS.]

PU'Á (פּוּאָ) [= פּוּאָה]: פּוּאָה: *Phua*), properly Puvah. PHUVAH the son of Issachar (Num. xxvi. 23).

PU'AH (פּוּאָה) [*utrerance, Fürst; mouth, Ges.*]: פּוּאָה: *Phua*). 1. The father of Tola, a man of the tribe of Issachar, and judge of Israel after Abimelech (Judg. x. 1). In the Vulgate, instead of "the son of Dodo," he is called "the uncle of Abimelech;" and in the LXX. Tola is said to be "the son of Phua, the son (*υίος*) of his father's brother;" both versions endeavoring to render "Dodo" as an appellative, while the latter introduces a remarkable genealogical difficulty.

2. [Vat. *Φουε*.] The son of Issachar (1 Chr. ii. 1), elsewhere called PHUVAH and PUA.

3. (פּוּאָה) [*gracefulness, beauty, Ges., Fürst*]). One of the two midwives to whom Pharaoh gave instructions to kill the Hebrew male children at their birth (Ex. i. 15). In the A. V. they are called "Hebrew midwives," a rendering which is not required by the original, and which is doubtful, both from the improbability that the king would have intrusted the execution of such a task to the women of the nation he was endeavoring to destroy, as well as from the answer of the women themselves in ver. 19, "for the Hebrew women are not like the Egyptian women;" from which we may infer that they were accustomed to attend upon the latter, and were themselves, in all probability, Egyptians. If we translate Ex. i. 18 in this way, "And the king of Egypt said to the women who acted as midwives to the Hebrew women," this difficulty is removed. The two, Shiphrah and Puah, are supposed to have been the chief and representatives of their profession; as Aben Ezra says, "They were chiefs over all the midwives: for no doubt there were more than five hundred midwives, but these two were chiefs over them to give tribute to the king of the hire." According to Jewish tradition, Shiphrah was Jochabed, and Puah, Miriam; "because," says Rashi, "she *cried* and talked and murmured to the child, after the manner of the women that lull a weeping infant." The origin of all this is a play upon the name Puah, which is derived from a root signifying "to cry out," as in Is. xlii. 14 and used in Rabbinical writers of the bleating of sheep.

W. A. W.

\* There are some reasons for the other opinion with regard to Puah's nationality. It not being said that Pharaoh appointed the midwives, the more obvious supposition is that those who acted in this capacity among the Hebrews were women of their own race, and so much the more, as the Hebrews at this time lived apart from the Egyptians in their own separate province (see

Ex. ix. 26). The fear of God ascribed to the midwives as the motive for their humanity (Ex. i. 19) leads us to think of them as Hebrews and not Egyptians; and, further, according to the best view, the names of the women (Puah, Shiphrah) are Shemitic and not Egyptian. The rendering of the A. V. is the more obvious one (the construction like that in ver. 19), and is generally adopted. II.

PUBLICAN (*τελωνης: publicanus*). The word thus translated belongs only, in the N. T., to the three Synoptic Gospels. The class designated by the Greek word were employed as collectors of the Roman revenue. The Latin word from which the English of the A. V. has been taken was applied to a higher order of men. It will be necessary to glance at the financial administration of the Roman provinces in order to understand the relation of the two classes to each other, and the grounds of the hatred and scorn which appear in the N. T. to have fallen on the former.

The Roman senate had found it convenient, at a period as early as, if not earlier than, the second Punic war, to farm the *vectigalia* (direct taxes) and the *portoria* (customs, including the *octroi* on goods carried into or out of cities) to capitalists who undertook to pay a given sum into the treasury (*in publicum*), and so received the name of *publicani* (Liv. xxxii. 7). Contracts of this kind fell naturally into the hands of the *equites*, as the richest class of Romans. Not infrequently they went beyond the means of any individual capitalist, and a joint-stock company (*societas*) was formed, with one of the partners, or an agent appointed by them, acting as managing director (*magister; Cic. ad Div. xiii. 9*). Under this officer, who resided commonly at Rome, transacting the business of the company, paying profits to the partners and the like, were the *sub-magistri*, living in the provinces. Under them, in like manner, were the *portitores*, the actual custom-house officers (*douaniers*), who examined each bale of goods exported or imported, assessed its value more or less arbitrarily, wrote out the ticket, and enforced payment. The latter were commonly natives of the province in which they were stationed, as being brought daily into contact with all classes of the population. The word *τελωναι*, which etymologically might have been used of the *publicani* properly so called (*τέλη, ἀνέομαι*), was used popularly, and in the N. T. exclusively, of the *portitores*.

The *publicani* were thus an important section of the equestrian order. An orator wishing, for political purposes, to court that order, might describe them as "*flos equitum Romanorum, ornamentum civitatis, firmamentum Reipublicæ*" (*Cic. pro Planc. p. 9*). The system was, however, essentially a vicious one, the most detestable, perhaps, of all modes of managing a revenue (comp. Adam Smith, *Wealth of Nations*, v. 2), and it bore its natural fruits. The *publicani* were banded together to support each other's interest, and at once resented and defied all interference (Liv. xxv. 3). They demanded severe laws, and put every such law into execution. Their agents, the *portitores*, were encouraged in the most vexatious or fraudulent exactions, and a remedy was all but impossible. The popular feeling ran strong even against the equestrian capitalists. The Macedonians complained, as soon as they were brought under Roman government, that, "*ubi publicanus est, ibi aut jus publicum vanum, aut libertas sociis*

nulla" (Liv. xlv. 18). Cicero, in writing to his brother (*ad Quint.* i. 1, 11), speaks of the difficulty of keeping the *publicani* within bounds, and yet not offending them, as the hardest task of the governor of a province. Tacitus counted it as one bright feature of the ideal life of a people unlike his own, that there "nec publicianus atterit" (*Germ.* p. 29). For a moment the capricious liberalism of Nero led him to entertain the thought of sweeping away the whole system of *portoria*, but the conservatism of the senate, servile as it was in all things else, rose in arms against it, and the scheme was dropped (*Tac. Ann.* xiii. 50): and the "immodestia publicanorum" (*ibid.*) remained unchecked.

If this was the case with the directors of the company, we may imagine how it stood with the underlings. They overcharged whenever they had an opportunity (Luke iii. 13). They brought false charges of smuggling in the hope of extorting hush-money (Luke xix. 8). They detained and opened letters on mere suspicion (*Tertent. Phorm.* i. 2, 99; *Plaut. Trinumm.* iii. 3, 64). The *injuria portitorum*, rather than the *portoria* themselves, were in most cases the subject of complaint (*Cic. ad Quint.* i. 1, 11). It was the basest of all livelihoods (*Cic. de Offic.* i. 42). They were the wolves and bears of human society (Stobæus, *Serm.* ii. 34). "Πάντες τελευνάται, πάντες ἄπραγες" had become a proverb, even under an earlier régime, and it was truer than ever now (*Xeno. Comic. ap. Dicæarch.* Meineke, *Frag. Com.* iv. 596).<sup>a</sup>

All this was enough to bring the class into ill-favor everywhere. In Judæa and Galilee there were special circumstances of aggravation. The employment brought out all the besetting vices of the Jewish character. The strong feeling of many Jews as to the absolute unlawfulness of paying tribute at all made matters worse. The Scribes who discussed the question (*Matt.* xxii. 15) for the most part answered it in the negative. The followers of JUDAS of GALILEE had made this the special grievance against which they rose. In addition to their other faults, accordingly, the Publicans of the N. T. were regarded as traitors and apostates, defiled by their frequent intercourse with the heathen, willing tools of the oppressor. They were classed with sinners (*Matt.* ix. 11, xi. 19), with harlots (*Matt.* xxi. 31, 32), with the heathen (*Matt.* xviii. 17). In Galilee they consisted probably of the least reputable members of the fisherman and peasant class. Left to themselves, men of decent lives holding aloof from them, their only friends or companions were found among those who like themselves were outcasts from the world's law. Scribes and people alike hated them as priests and peasants in Ireland have hated a Roman Catholic who took service in collecting tithes or evicting tenants.

The Gospels present us with some instances of this feeling. To eat and drink "with publicans" seems to the Pharisaic mind incompatible with the character of a recognized Rabbi (*Matt.* ix. 11).

They spoke in their scorn of our Lord as the friend of publicans' (*Matt.* xi. 19). Rabbinic writings furnish some curious illustrations of the same feeling. The Chaldee Targum and R. Solomou find in "the archers who sit by the waters" of *Judg.* v. 11, a description of the τελευνάται sitting on the banks of rivers or seas in ambush for the wayfarer. The casuistry of the Talmud enumerates three classes of men with whom promises need not be kept, and the three are murderers, thieves, and publicans (*Nedar.* iii. 4). No money known to come from them was received into the alms-box of the synagogue or the Corban of the Temple (*Baba kama*, x. 1). To write a publican's ticket, or even to carry the ink for it on the Sabbath-day was a distinct breach of the commandment (*Shabb.* viii. 2). They were not fit to sit in judgment, or even to give testimony (*Sanhedr.* f. 25, 2). Some times there is an exceptional notice in their favor. It was recorded as a special excellence in the father of a Rabbi that, having been a publican for thirteen years, he had lessened instead of increasing the pressure of taxation (*ibid.*).<sup>b</sup> (The references are taken, for the most part, from Lightfoot.)

The class thus practically excommunicated furnished some of the earliest disciples both of the Baptist and of our Lord. Like the outlying, so-called "dangerous classes" of other times, they were at least free from hypocrisy. Whatever morality they had, was real and not conventional. We may think of the Baptist's preaching as having been to them what Wesley's was to the colliers of Kingswood or the Cornish miners. The publican who cried in the bitterness of his spirit, "God be merciful to me a sinner" (*Luke* xviii. 13), may be taken as the representative of those who had come under this influence (*Matt.* xxi. 32). The Galilæan fishermen had probably learnt, even before their Master taught them, to overcome their repugnance to the publicans who with them had been sharers in the same baptism. The publicans (Matthew perhaps among them) had probably gone back to their work learning to exact no more than what was appointed them (*Luke* iii. 13). However startling the choice of Matthew the publican to be of the number of the Twelve may have seemed to the Pharises, we have no trace of any perplexity or offense on the part of the disciples.

The position of ZACCHEUS as an ἀρχιτελευντής (*Luke* xix. 2) implies a gradation of some kind among the persons thus employed. Possibly the balsam trade, of which Jericho was the centre, may have brought larger profits, possibly he was one of the *sub magistri* in immediate communication with the Bureau at Rome. That it was possible for even a Jewish publican to attain considerable wealth, we find from the history of John the τελευντής (*Joseph. B. J.* ii. 14, § 4), who acts with the leading Jews and offers a bribe of eight talents to the Procurator, Gessius Florus. The fact that Jericho was at this time a city of the priests — 12,000 are said to have lived there — gives, it need hardly be said, a special significance to our Lord's preference of the house of Zacchæus. E. H. P.

<sup>a</sup> Amusing instances of the continuance of this feeling may be seen in the extracts from Chrysostom and other writers, quoted by Suicer, s. v. τελευντής. In part these are perhaps rhetorical applications of what they found in the Gospels, but it can hardly be doubted that they testify also to the never-fading dislike of the tax-payer to the tax-collector.

Their vehement denunciations stand almost on a footing with Johnson's definition of an exciseman [or rather of excise].

<sup>b</sup> We have a singular parallel to this in the statue τῷ καλῶς τελευνήσαντι, mentioned by Suetonius as erected by the cities of Asia to Sab'nus, the father of Vespasian (*Suet. Vesp.* 1).

**PUBLIUS** (Πούλιος: *Publius*). The chief man — probably the governor — of Melita, who received and lodged St. Paul and his companions on the occasion of their being shipwrecked off that island (Acts xxviii. 7). It soon appeared that he was entertaining an angel unawares, for St. Paul gave proof of his divine commission by miraculously healing the father of Publius of a fever, and afterwards working other cures on the sick who were brought unto him. Publius possessed property in Melita: the distinctive title given to him is “the first of the island;” and two inscriptions, one in Greek, the other in Latin, have been found at Città Vecchia, in which that apparently official title occurs (Alford). Publius may perhaps have been the delegate of the Roman praetor of Sicily to whose jurisdiction Melita or Malta belonged. The Roman martyrologies assert that he was the first bishop of the island, and that he was afterwards appointed to succeed Dionysius as bishop of Athens. St. Jerome records a tradition that he was crowned with martyrdom (*De Viris Illust.* ix.; Baron. i. 554). E. 11—s.

\* The best information which we can obtain respecting the situation of Malta at the time of Paul's visit, renders it doubtful, to say the least, whether the interpreters are in the right as it regards the station of Publius. In a Greek inscription of an earlier date we find mention made of two persons holding the office of *archon* or magistrate in the island. A later inscription of the times of the Emperors may be translated as follows: “Lucius Pudens, son of Claudius, of the tribe *Quirina*, a Roman eques, first [*πρωτος*, as in Acts] and patron of the Melitæans, after being magistrate and having held the post of flamen to Augustus, erected this.” Here it appears that the person named was still chief man of the island, although his magistracy had expired. From this inscription and others in Latin found at Gozzo, it is probable that the inhabitants of both islands had received the privilege of Roman citizenship, and were enrolled in the tribe *Quirina*. The magistracy was, no doubt, that of the *Duumvirs*, the usual municipal chief officers. The other titles correspond with titles to be met with on marbles relating to towns in Italy. Thus the title of *chief* corresponds to that of *princeps* in the colony of Pisa, and is probably no more a name of office than the title of *patron*. For no such officer is known to have existed in the colonies or in the *municipia*, and the *princeps coloniae* of Pisa is mentioned at a time when it is said that owing to a contention between candidates there were no magistrates. T. D. W.

**PUDENS** (Πούδης: *Pudens*), a Christian friend of Timothy at Rome. St. Paul, writing about A. D. 68, says, “Eubulus greeteth thee, and Pudens, and Linus, and Claudia” (2 Tim. iv. 21). He is commemorated in the Byzantine Church on April 14; in the Roman Church on May 19. He is included in the list of the seventy disciples given by Pseudo-Ippolytus. Papebroch, the Bollandist editor (*Acta Sanctorum*, Maii, tom. iv. p. 296), while printing the legendary histories, distinguishes between two saints of this name, both Roman senators; one the host of St. Peter and

friend of St. Paul, martyred under Nero; the other the grandson of the former, living about A. D. 150, the father of Novatus, Timothy,<sup>a</sup> Praxedis, and Pudentiana, whose house, in the valley between the Viminal hill and the Esquiline, served in his lifetime for the assembly of Roman Christians, and afterwards gave place to a church, now the Church of S. Pudenziana, a short distance at the back of the Basilica of Sta. Maria Maggiore. Earlier writers (as Baronius, *Ann.* 44, § 61; *Ann.* 59, § 18; *Ann.* 162) are disposed to believe in the existence of one Pudens only.

About the end of the 16th century it was observed (F. de Monceaux, *Ecl. Christianæ veteris Britannicæ incunabula*, Tournay, 1614; Estius, or his editor; Abp. Parker, *De Antiquit. Britann. Ecl.* 1605; M. Alford, *Annales Ecc. Brit.* 1663; Camden, *Britannia*, 1586) that Martial, the Spanish poet, who went to Rome A. D. 66, or earlier, in his 23d year, and dwelt there for nearly forty years, mentions two contemporaries, Pudens and Claudia, as husband and wife (*Epig.* iv. 13); that he mentions Pudens or Aulus Pudens in i. 32, iv. 29, v. 43, vi. 58, vii. 11, 97; Claudia or Claudia Rufina in viii. 60, xi. 53; and, it might be added, Linus, in i. 76, ii. 54, iv. 66, xi. 25, xii. 49. That Timothy and Martial should have each three friends bearing the same names at the same time and place, is at least a very singular coincidence. The poet's Pudens was his intimate acquaintance, an admiring critic of his epigrams, an immoral man if judged by the Christian rule. He was an Umbrian and a soldier: first he appears as a centurion aspiring to become a primipilus; afterwards he is on military duty in the remote north; and the poet hopes that on his return thence he may be raised to equestrian rank. His wife Claudia is described as of British birth, of remarkable beauty and wit, and the mother of a flourishing family.

A Latin inscription<sup>b</sup> found in 1723 at Chichester connects a [Pud]ens with Britain and with the Claudian name. It commemorates the erection of a temple by a guild of carpenters, with the sanction of King Tiberius Claudius Cogidubnus, the site being the gift of [Pud]ens the son of Pudentinus. Cogidubnus was a native king appointed and supported by Rome (*Tac. Agricola*, 14). He reigned with delegated power probably from A. D. 52 to A. D. 76. If he had a daughter she would inherit the name Claudia and might, perhaps as a hostage, be educated at Rome.

Another link seems to connect the Romanizing Britons of that time with Claudia Rufina and with Christianity (see Musgrave, quoted by Fabricius, *Lux Evangelii*, p. 702). The wife of Aulus Plautius, who commanded in Britain from A. D. 43 to A. D. 52, was Pomponia Græcina, and the Rufi were a branch of her house. She was accused at Rome, A. D. 57, on a capital charge of “foreign superstition;” was acquitted, and lived for nearly forty years in a state of austere and mysterious melancholy (*Tac. Ann.* xiii. 32). We know from the Epistle to the Romans (xvi. 13) that the Rufi were well represented among the Roman Christians in A. D. 58.

Modern researches among the Columbaria<sup>a</sup>

<sup>a</sup> This Timothy is said to have preached the Gospel in Britain.

<sup>b</sup> “[N]eptuno, et Minervæ templum [pr]o salute Jovis divinæ, auctoritate Tiberii Claudii [Co]gidubni regis legati augusti in Brit., [col]legium fabrorum et

qui in eo [a sacris sunt] de suo dedicaverunt, donante aream [Pud]ente, Pudentini filio.” A corner of the stone was broken off, and the letters within bracketed have been inserted on conjecture.

Some appropriated to members of the Imperial household have brought to light an inscription in which the name of Pudens occurs as that of a servant of Tiberius or Claudius (*Journal of Classical and Sacred Philology*, iv. 76).

On the whole, although the identity of St. Paul's Pudens with any legendary or heathen namesake is not absolutely proved, yet it is difficult to believe that these facts add nothing to our knowledge of the friend of Paul and Timothy. Future discoveries may go beyond them, and decide the question. They are treated at great length in a pamphlet entitled *Claudia and Pudens*, by Archdeacon Williams, Llandoverly, 1848, p. 58; and more briefly by Dean Alford, *Greek Testament*, iii. 104, ed. 1856; and by Conybeare and Howson, *Life of St. Paul*, ii. 594, ed. 1858. They are ingeniously woven into a pleasing romance by a writer in the *Quarterly Review*, vol. xxvii. pp. 100-105. See also Ussher, *Ecc. Brit. Antiquitates*, § 3, and Stillingfleet's *Antiquities*. [CLAUDIA, Amer. ed.] W. T. B.

PUHITES, THE (פְּהִיטִים) [patr.]: מִפְּהִיטִים; [Vat. Μεφιθειμι;] Alex. Ηφθειν: Aphthii. According to 1 Chr. ii. 53, the "Puhites" or "Puthites" belonged to the families of Kirjath-jearim. There is a Jewish tradition, embodied in the Targum of R. Joseph, that these families of Kirjath-jearim were the sons of Moses whom Zipporah bare him, and that from them were descended the disciples of the prophets of Zorah and Eshtaol.

PUL (פּוּל) [see below] פּוּל; some codd. פּוּל: Africa, a country or nation once mentioned, in the Masoretic text be here correct, in the Bible (Is. lxxi. 19). The name is the same as that of Pul, king of Assyria. It is spoken of with distant nations; "the nations (בְּלָשָׁנוֹן), [to] Tarshish, Pul, and Lud, that draw the bow, [to] Tubal, and Javan, [to] the isles afar off." If a Mizraite Lud be intended [LUD, LUDIM], Pul may be African. It has accordingly been compared by Bochart (*Phaleg*, iv. 26) and J. D. Michaelis (*Spicileg.* i. 256; ii. 114) with the island Phlæ, called in Coptic ΠΕΛΑΚ, ΠΥΛΑΚ, ΠΥΛΑΚΩ; the hieroglyphic name being EELEK, P-EELEK, EELEK-T. If it be not African, the identity with the king's name is to be noted, as we find Shishak (שִׁשַׁק) as the name of a king of Egypt of Babylonian or Assyrian race, and Sheshak (שֶׁשַׁק), which some rashly take to be artificially formed after the cabalistic manner from Babel (בְּבֵל), for Babylon itself, the difference in the final letter probably arising from the former name being taken from the Egyptian SHESHENK. In the line of Shishak, the name TAKELAT has been compared by Birch with forms of that of the Tigris (תִּקְלָה), Chald. דְּגֵלָה (דְּגֵלָה, دَجَلَة, دَجَلَة),

which Gesenius has thought to be identical with the first part of the name of Tiglath-Pileser (*Theo. s. v.*).

The common LXX. reading suggests that the Heb. had originally Phut (Put) in this place, although we must remember, as Gesenius observes (*Theo. s. v.* פּוּט), that ΦΟΥΤΑ could be easily changed to ΦΟΥΔΑ by the error of a copyist. Yet in three other places Put and Lud occur together (Jer. xli. 9; Ez. xxvii. 10, xxx. 5). [LUDIM.] The circumstance that this name is mentioned with names or designations of importance, makes it nearly certain that some great and well-known country or people is intended. The balance of evidence is therefore almost decisive in favor of the African Phut or Put. [PHUT.] R. S. P.

PUL (פּוּל) [see above]: Φούλ, Φαλώχ; <sup>a</sup> [Alex. in Chr. Φαλώς:] Phul was an Assyrian king, and is the first of those monarchs mentioned in Scripture. He made an expedition against Menahem, king of Israel, about B. C. 770. Menahem appears to have inherited a kingdom which was already included among the dependencies of Assyria; for as early as B. C. 884, Jehu gave tribute to Shalmaneser, the Black-Obelisk king (see vol. i. p. 188 a), and if Judæa was, as she seems to have been, a regular tributary from the beginning of the reign of b Amaziah (B. C. 838), Samaria, which lay between Judæa and Assyria, can scarcely have been independent. Under the Assyrian system the monarchs of tributary kingdoms, on ascending the throne, applied for "confirmation in their kingdoms" to the Lord Paramount, and only became established on receiving it. We may gather from 2 K. xv. 19, 20, that Menahem neglected to make any such application to his liege lord, Pul — a neglect which would have been regarded as a plain act of rebellion. Possibly, he was guilty of more overt and flagrant hostility. "Menahem smote Tiphshah" (2 K. xv. 16), we are told. Now if this Tiphshah is the same with the Tiphshah of 1 K. iv. 24, which is certainly Thapsacus, — and it is quite a gratuitous supposition to hold that there were two Tiphshahs (Winer, *Realw.* ii. 613), — we must regard Menahem as having attacked the Assyrians, and deprived them for a while of their dominion west of the Euphrates, recovering in this direction the boundary fixed for his kingdom by Solomon (1 K. iv. 24). However this may have been, it is evident that Pul looked upon Menahem as a rebel. He consequently marched an army into Palestine for the purpose of punishing his revolt, when Menahem hastened to make his submission, and having collected by means of a poll-tax, the large sum of a thousand talents of gold, he paid it over to the Assyrian monarch, who consented thereupon to "confirm" him as king. This is all that Scripture tells us of Pul. The Assyrian monuments have a king, whose name is read very doubtfully as *Vul-lush* or *Iva-lush*, at about the period when Pul must have reigned. This monarch is the grandson of Shalmaneser (the Black-Obelisk king, who warred with Ben-hadad and Hazael, and took tribute from Jehu), while he is certainly anterior to the whole line of monarchs forming the lower dynasty — Tiglath-Pileser, Shalmaneser, Sargon, etc. His probable date therefore is B. C. 806-750, while Pul, as we have seen, ruled over Assyria in B. C. 770. The Hebrew name Pul is undoubtedly curtailed; for no Assyrian name con-

<sup>a</sup> Other readings of "this name are Φουά, Φουάδ, and Φαλώς.  
<sup>b</sup> This is perhaps implied in the words "the king-

dom was confirmed in his hand" (2 K. xiv 5; comp. xv. 19).

sists of a single element. If we take the "Phalos" for "Phaloch" of the Septuagint as probably nearer to the original type, we have a form not very different from *Vul-lush* or *Iou-lush*. If, on these grounds, the identification of the Scriptural Pul with the monumental *Vul-lush* be regarded as established, we may give some further particulars of him which possess considerable interest. *Vul-lush* reigned at Calah (*Nimrud*) from about B. C. 800 to B. C. 750. He states that he made an expedition into Syria, wherein he took Damascus; and that he received tribute from the Medes, Armenians, Phœnicians, Samaritans, Damascenes, Philistines, and Edomites. He also tells us that he invaded Babylonia and received the submission of the Chaldeans. His wife, who appears to have occupied a position of more eminence than any other wife of an Assyrian monarch, bore the name of Semiramis, and is thought to be at once the Babylonian queen of Herodotus (i. 184), who lived six generations before Cyrus, and the prototype of that earlier sovereign of whom Ctesias told such wonderful stories (Diod. Sic. ii. 4-20), and who long maintained a great local reputation in Western Asia (Strab. xvi. 1, § 2). It is not improbable that the real Semiramis was a Babylonian princess whom *Vul-lush* married on his reduction of the country, and whose son Nabonassar (according to a further conjecture) he placed upon the Babylonian throne. He calls himself in one inscription "the monarch to whose son Asshur, the chief of the gods, has granted the kingdom of Babylon." He was probably the last Assyrian monarch of his race. The list of Assyrian monumental kings, which is traceable without a break and in a direct line to him from his seventh ancestor, here comes to a stand; no son of *Vul-lush* is found; and Tiglath-Pileser, who seems to have been *Vul-lush's* successor, is evidently a usurper, since he makes no mention of his father or ancestors. The circumstances of *Vul-lush's* death, and of the revolution which established the lower Assyrian dynasty, are almost wholly unknown, no account of them having come down to us upon any good authority. Not much value can be attached to the statement in Agathias (ii. 25, p. 119) that the last king of the upper dynasty was succeeded by his own gardener. G. R.

\* PULPIT, only in Neh. viii. 4, the rendering of מִנְדִּיבָל, (generally "tower" in the A. V.), a high stage or platform erected in the open space (less correctly "street," A. V.) before one of the gates at Jerusalem, from which Ezra and other Levites read and explained the Law of Moses (the Pentateuch) to the assembled people. This was after the return from the Babylonian captivity, during which the language of the Jews had changed so much that many words in the Hebrew Scriptures required interpretation and explanation. The Targum or Chaldee translations which formed so important a part of the later Jewish literature, grew out of this necessity. [VERSIONS, ANCIENT TARGUM.] Yet another object of Ezra's public recitals no doubt was to promote among the Jews a better knowledge of the Scriptures which they had too much neglected in their exile, and to reassert the authority of the Law. We may add that the word "pulpit" has come to us from the Latin *pulpitum*, which among the Romans was the part of the stage (as distinguished from the orchestra) on which the actors performed their parts. The word, as thus applied, forms an exception to the

general rule, for most of our ecclesiastical terms are derived from the Greek.

PULSE (פֻּלְסָה, זֶרְעֹתֵי, and זֶרְעֵי, זֶרַיִם, זֶרַיִם, זֶרַיִם, זֶרַיִם, זֶרַיִם; Θεοδ. σπέρματα: *leguminæ*) occurs only in the A. V. in Dan. i. 12, 16, as the translation of the above plural nouns, the literal meaning of which is "seeds" of any kind. The זֶרְעֹתֵי on which "the four children" thrived for ten days is perhaps not to be restricted to what we now understand as "pulse," i. e. the grains of leguminous vegetables: the term probably includes edible seeds in general. Gesenius translates the words "vegetables, herbs, such as are eaten in half-fast, as opposed to flesh and more delicate food." Probably the term denotes uncooked grains of any kind, whether barley, wheat, millet, vetches, etc.

W. H.

PUNISHMENTS. The earliest theory of punishment current among mankind is doubtless the one of simple retaliation, "blood for blood" [BLOOD, REVENGER OF], a view which in a limited form appears even in the Mosaic law. Viewed historically, the first case of punishment for crime mentioned in Scripture, next to the Fall itself, is that of Cain the first murderer. His punishment, however, was a substitute for the retaliation which might have been looked for from the hand of man, and the mark set on him, whatever it was, served at once to designate, protect, and perhaps correct the criminal. That death was regarded as the fitting punishment for murder appears plain from the remark of Lamech (Gen. iv. 24). In the post-diluvian code, if we may so call it, retribution by the hand of man, even in the case of an offending animal, for blood shed, is clearly laid down (Gen. ix. 5, 6); but its terms give no sanction to that "wild justice" executed even to the present day by individuals and families on their own behalf by so many of the uncivilized races of mankind. The prevalence of a feeling of retribution due for bloodshed may be remarked as arising among the brethren of Joseph in reference to their virtual fratricide (Gen. xlii. 21).

Passing onwards to Mosaic times, we find the sentence of capital punishment in the case of murder, plainly laid down in the law. The murderer was to be put to death, even if he should have taken refuge at God's altar or in a refuge city, and the same principle was to be carried out even in the case of an animal (Ex. xxi. 12, 14, 28, 36; Lev. xxiv. 17, 21; Num. xxxv. 31; Deut. xix. 11, 12; and see 1 K. ii. 28, 34).

I. The following offenses also are mentioned in the Law as liable to the punishment of death:

1. Striking, or even reviling, a parent (Ex. xxi. 15, 17).
2. Blasphemy (Lev. xxiv. 14, 16, 23; see Philo, *V. M.* iii. 25; 1 K. xxi. 10; Matt. xxvi. 65, 66).
3. Sabbath-breaking (Num. xv. 32-36; Ex. xxxi. 14, xxxv. 2).
4. Witchcraft, and false pretension to prophecy (Ex. xxii. 18; Lev. xx. 27; Deut. xiii. 5, xviii. 20; 1 Sam. xxviii. 9).
5. Adultery (Lev. xx. 10; Deut. xxii. 22; see John viii. 5, and Joseph. *Ant.* iii. 12, § 1).
6. Unchastity, (a.) previous to marriage, but detected afterwards (Deut. xxii. 21). (b.) In a betrothed woman with some one not affianced to her (*ib.* ver. 23). (c.) In a priest's daughter (Lev. xxi. 9).
7. Rape (Deut. xxii. 25).

8. Incestuous and unnatural connections (*Lev. xx. 11, 14, 15; Ex. xxii. 19.*)

9. Man-stealing (*Ex. xxi. 16; Deut. xxiv. 7.*)

10. Idolatry, actual or virtual, in any shape (*Lev. xx. 2; Deut. xii. 6, 10, 15, xvii. 2-7; see Josh. vii. and xxii. 20, and Num. xxv. 8.*)

11. False witness in certain cases (*Deut. xix. 16, 19.*)

Some of the foregoing are mentioned as being in earlier times liable to capital or severe punishment by the hand either of God or of man, as (6.) *Gen. xviii. 24; (1.) Gen. ix. 25; (8.) Gen. xix., xviii. 10; (5.) Gen. xii. 17, xx. 7, xxxix. 19.*

11. But there is a large number of offenses, some of them included in this list, which are named in the Law as involving the penalty of "cutting<sup>a</sup> off from the people." On the meaning of this expression some controversy has arisen. There are altogether thirty-six or thirty-seven cases in the Pentateuch in which this formula is used, which may be thus classified: (a.) Breach of *Moras.* (b.) Breach of Covenant. (c.) Breach of Ritual.

1. Willful sin in general (*Num. xv. 30, 31.*)

\*15 cases of incestuous or unclean connection (*Lev. xviii. 29, and xx. 9-21.*)

2. \*†Uncircumcision (*Gen. xvii. 14; Ex. iv. 24.*)

Neglect of Passover (*Num. ix. 13.*)

\*Sabbath-breaking (*Ex. xxxi. 14.*)

Neglect of Atonement-day (*Lev. xxiii. 29.*)

†Work done on that day (*Lev. xxiii. 30.*)

\*†Children offered to Molech (*Lev. xx. 3.*)

\*†Witchcraft (*Lev. xx. 6.*)

Anointing a stranger with holy oil (*Ex. xxx. 33.*)

3. Eating leavened bread during Passover (*Ex. xii. 15, 19.*)

Eating fat of sacrifices (*Lev. vii. 25.*)

Eating blood (*Lev. vii. 27, xvii. 14.*)

\*Eating sacrifice in an unclean condition (*Lev. vii. 20, 21, xxii. 3, 4, 9.*)

Offering too late (*Lev. xix. 8.*)

Making holy ointment for private use (*Ex. xxx. 32, 33.*)

Making perfume for private use (*Ex. xxx. 38.*)

Neglect of purification in general (*Num. xix. 13, 20.*)

Not bringing offering after slaying a beast for food (*Lev. xvii. 9.*)

Not slaying the animal at the tabernacle-door (*Lev. xvii. 4.*)

\*†Touching holy things illegally (*Num. iv. 15, 18, 20; and see 2 Sam. vi. 7; 2 Chr. xxvi. 21.*)

In the foregoing list, which, it will be seen, is classified according to the view supposed to be taken by the Law of the principle of condemnation, the cases marked with \* are (a) those which are expressly threatened or actually visited with death, as well as with cutting off. In those (b) marked † the hand of God is expressly named as the instrument of execution. We thus find that of (a) there are in class 1, 7 cases, all named in *Lev. xx. 9-16*, class 2, 4 cases, class 3, 2 cases,

while of (b) we find in class 2, 4 cases, of which 3 belong also to (a), and in class 3, 1 case. The question to be determined is, whether the phrase

"cut off" be likely to mean death in all cases, and to avoid that conclusion Le Clerc, Michaelis, and others, have suggested that in some of them, the ceremonial ones, it was intended to be commuted for banishment or privation of civil rights (*Mich. Laws of Moses, § 237, vol. iii. p. 436, trans.*). Rabbinical writers explained "cutting off" to mean excommunication, and laid down three degrees of severity as belonging to it (*Selden, de Syn. i. 6*) [ANATHEMA.] But most commentators agree, that, in accordance with the *primâ facie* meaning of *Heb. x. 28*, the sentence of "cutting off" must be understood to be death-punishment of some sort Saalschütz explains it to be premature death by God's hand, as if God took into his own hand such cases of ceremonial defilement as would create difficulty for human judges to decide. Knobel thinks death-punishment absolutely is meant. So Corn. à Lapide and Ewald. Jahn explains, that when God is said to cut off, an act of divine Providence is meant, which in the end destroys the family, but that "cutting off" in general means stoning to death as the usual capital punishment of the Law. Calmet thinks it means privation of all rights belonging to the Covenant. It may be remarked (a), that two instances are recorded, in which violation of a ritual command took place without the actual infliction of a death-punishment: (1.) that of the people eating with the blood (1 *Sam. xiv. 32*); (2.) that of Uzziah (2 *Chr. xxvi. 19, 21*) — and that in the latter case the offender was in fact excommunicated for life; (b), that there are also instances of the directly contrary course, namely, in which the offenders were punished with death for similar offenses, — Nadab and Abihu (*Lev. x. 1, 2*), Korah and his company (*Num. xvi. 10, 33*), who "perished from the congregation," Uzzah (2 *Sam. vi. 7*), — and further, that the leprosy inflicted on Uzziah might be regarded as a virtual death (*Num. xii. 12*). To whichever side of the question this case may be thought to incline, we may perhaps conclude that the primary meaning of "cutting off" is a sentence of death to be executed in some cases without remission, but in others voidable: (1) by immediate atonement on the offender's part; (2) by direct interposition of the Almighty, *i. e.* a sentence of death always "recorded," but not always executed. And it is also probable that the severity of the sentence produced in practice an immediate recourse to the prescribed means of propitiation in almost every actual case of ceremonial defilement (*Num. xv. 27, 28; Saalschütz, Arch. Hebr. x. 74, 75, vol. ii. 299; Knobel, Calmet, Corn. à Lapide on Gen. xvii. 13, 14; Keil, Bibl. Arch. vol. ii. 264, § 153; Ewald, Gesch. App. to vol. iii. p. 158; Jahn, Arch. Bibl. § 257.*)

III. Punishments in themselves are twofold, Capital and Secondary.

(a.) Of the former kind, the following only are prescribed by the Law. (1.) *Stoning*, which was the ordinary mode of execution (*Ex. xvii. 4; Luke xx. 6; John x. 31; Acts xiv. 5*). We find it ordered in the cases which are marked in the lists above as punishable with death; and we may remark further, that it is ordered also in the case of an offending animal (*Ex. xxi. 29, and xix. 13*). The false witness also, in a capital case, would by the law of retaliation become liable to death (*Deut. xix. 19; Maccoth, i. 1, 6*). In the case of idolatry, and it may be presumed in other cases also, the witnesses, of whom there were to be at least two, were required to cast the first stone (*Deut.*

<sup>a</sup> מַצְחֵה: ἐξολοθρεῖν.

xiii. 9, xvii. 7; John viii. 7; Acts vii. 58). The Rabbinical writers add, that the first stone was cast by one of them on the chest of the convict, and if this failed to cause death, the bystanders proceeded to complete the sentence. (*Sanhedr.* vi. 1, 3, 4; Godwyn, *Moses and Aaron*, p. 121.) The body was then to be suspended till sunset (Deut. xxi. 23; Josh. x. 26; Joseph. *Ant.* iv. 8, § 24), and not buried in the family grave (*Sanhedr.* vi. 5).

(2.) *Hangng* is mentioned as a distinct punishment (Num. xxv. 4; 2 Sam. xxi. 6, 9); but is generally, in the case of Jews, spoken of as following death by some other means.

(3.) *Burning*, in pre-Mosaic times, was the punishment for unchastity (Gen. xxxviii. 24). Under the Law it is ordered in the case of a priest's daughter (Lev. xxi. 9), of which an instance is mentioned (*Sanhedr.* vii. 2). Also in case of incest (Lev. xx. 14); but it is also mentioned as following death by other means (Josh. vii. 25), and some have thought it was never used excepting after death. A tower of burning embers is mentioned in 2 Macc. xiii. 4-8. The Rabbinical account of burning by means of molten lead poured down the throat has no authority in Scripture.

(4.) *Death by the sword or spear* is named in the Law (Ex. xix. 13, xxxii. 27; Num. xxv. 7); but two of the cases may be regarded as exceptional; but it occurs frequently in regal and post-Babylonian times (1 K. ii. 25, 34, xix. 1; 2 Chr. xxi. 4; Jer. xxvi. 23; 2 Sam. i. 15, iv. 12, xx. 22; 1 Sam. xv. 33, xxii. 18; Judg. ix. 5; 2 K. x. 7; Matt. xiv. 8, 10), a list in which more than one case of assassination, either with or without legal forms, is included.

(5.) *Strangling* is said by the Rabbins to have been regarded as the most common but least severe of the capital punishments, and to have been performed by immersing the convict in clay or mud, and then strangling him by a cloth twisted round the neck (Godwyn, *Moses and Aaron*, p. 122; Otho, *Lez. Rab. s. v.* "Supplicia;" *Sanhedr.* vii. 3; Ker Porter, *Trav.* ii. 177; C. B. Michaelis, *De Judiciis*, ap. Pott, *Syll. Comm.* iv. § 10, 12).

This Rabbinical opinion, founded, it is said, on oral tradition from Moses, has no Scripture authority.

(6.) Besides these ordinary capital punishments, we read of others, either of foreign introduction or of an irregular kind. Among the former (1.) **CRUCIFIXION** is treated alone (vol. i. p. 513), to which article the following remark may be added, that the Jewish tradition of capital punishment, independent of the Roman governor, being interdicted for forty years previous to the Destruction, appears in fact, if not in time, to be justified (John xviii. 31, with De Wette's *Comment.*; Godwyn, p. 121; Keil, ii. 264; Joseph. *Ant.* x. 9, § 1).

(2.) *Drowning*, though not ordered under the Law, was practiced at Rome, and is said by St. Jerome to have been in use among the Jews (*Cic. pro. Sezt. Rosc. Am.* 25; Jerome, *Com. on Matth.* lib. iii. p. 138; *Matt.* xviii. 6; *Mark* ix. 42). [MILL, Amer. ed.]

(3.) *Sawing asunder* or crushing beneath iron instruments. The former is said to have been practiced on Isaiah. The latter may perhaps not have always caused death, and thus have been a torture rather than a capital punishment (2 Sam. xiii. 31, and perhaps Prov. xx. 26; Heb. xi. 37; *Just. Mart. Tryph.* 120). The process of sawing

asunder, as practiced in Barbary, is described by Shaw (*Trav.* p. 254).

(4.) *Pounding in a mortar*, or *beating to death*, is alluded to in Prov. xxvii. 22, but not as a legal punishment, and cases are described (2 Macc. vi. 28, 30). Pounding in a mortar is mentioned as a Cingalese punishment by Sir E. Tennent (*Ceylon*, ii. 88).

(5.) *Precipitation*, attempted in the case of our Lord at Nazareth, and carried out in that of captives from the Edomites, and of St. James, who is said to have been cast from "the pinnacle" of the Temple. Also it is said to have been executed on some Jewish women by the Syrians (2 Macc. vi. 10; Luke iv. 29; Euseb. *H. E.* ii. 23; 2 Chr. **xv** 12).

Criminals executed by law were buried outside the city gates, and heaps of stones were flung upon their graves (Josh. vii. 25, 26; 2 Sam. xviii. 17; Jer. xxii. 19). Mohammedans to this day cast stones, in passing, at the supposed tomb of Absalom (Fabri, *Evagatorium*, i. 409; Sandys, *Trav.* p. 189; Kaumer, *Paläst.* p. 272).

(c.) *Of secondary punishments among the Jews* the original principles were, (1.) *retaliation*, "eye for eye," etc. (Ex. xxi. 24, 25; see Gell. *Noct. Att.* xx. 1).

(2.) *Compensation*, identical (restitution) or analogous: payment for loss of time or of power (Ex. xxi. 18-36; Lev. xxiv. 18-21; Deut. xix. 21). The man who stole a sheep or an ox was required to restore four sheep for a sheep and five oxen for an ox thus stolen (Ex. xxii. 1). The thief caught in the fact in a dwelling might even be killed or sold, or if a stolen animal were found alive, he might be compelled to restore double (Ex. xxii. 2-4). Damage done by an animal was to be fully compensated (*ib.* ver. 5). *Fire* caused to a neighbor's corn was to be compensated (ver. 6). A *pledge* stolen, and found in the thief's possession, was to be compensated by double (ver. 7). *All trespass* was to pay double (ver. 9). A *pledge* lost or damaged was to be compensated (vv. 12, 13). A *pledge* withheld, to be restored with 20 per cent. of the value (Lev. vi. 4, 5). The "seven-fold" of Prov. vi. 31, by its notion of completeness, probably indicates servitude in default of full restitution (Ex. xxii. 2-4). *Slunder* against a wife's honor was to be compensated to her parents by a fine of 100 shekels, and the traducer himself to be punished with stripes (Deut. xxii. 18, 19).

(3.) *Stripes*, whose number was not to exceed forty (Deut. xxv. 3); whence the Jews took care not to exceed thirty-nine (2 Cor. xi. 24; Joseph. *Ant.* iv. 8, § 21). The convict was stripped to the waist and tied in a bent position to a low pillar, and the stripes, with a whip of three thongs, were inflicted on the back between the shoulders [Acts xxii. 25]. A single stripe in excess subjected the executioner to punishment (*Maccoth*, iii. 1, 2, 3, 13, 14). It is remarkable that the Abyssinians use the same number (Wolf, *Trav.* ii. 276).

(4.) *Scourging* with thorns is mentioned Judg. viii. 16. The *stocks* are mentioned Jer. xx. 2 [Acts xvi. 24]; *passing through fire*, 2 Sam. xii. 31; *mutilation*, Judg. i. 6, 2 Macc. vii. 4, and see 2 Sam. iv. 12; *plucking out hair*, Is. l. 6; in later times, *imprisonment*, and *confiscation or exile*, *Ezr.* vii. 26; Jer. xxxvii. 15, xxxviii. 6; Acts iv. 3, v. 18, xii. 4. As in earlier times imprisonment formed no part of the Jewish system, the sentences were executed at once (see Esth vii 8-10; Selden, *De*

*Syn.* ii. c. 13. p. 888). Before death a *grad* of frankincense in a cup of wine was given to the criminal to intoxicate him (*ib.* 889). The command for witnesses to cast the first stone shows that the duty of execution did not belong to any special officer (*Deut.* xvii. 7).

Of punishments inflicted by other nations we have the following notices: In Egypt the power of life and death and imprisonment rested with the king, and to some extent also with officers of high rank (*Gen.* xl. 3, 22, xlii. 20). Death might be commuted for slavery (xlii. 19, xlv. 9, 33). The law of retaliation was also in use in Egypt, and the punishment of the bastinado, as represented in the paintings, agrees better with the Mosaic directions than with the Rabbinical (*Wilkinson, A. E.* ii. 214, 215, 217). In Egypt, and also in Babylon, the chief of the executioners, *Rab-Tabbachim*, was a great officer of state (*Gen.* xxxvii. 36, xxxix. xl.; *Dan.* ii. 14; *Jer.* xxxix. 13, xli. 10, xliii. 6, lii. 15, 16; *Michaelis*, iii. 412; *Joseph. Ant.* x. 8, § 5 [*CHERETHIM*]; *Mark* vi. 27). He was sometimes a eunuch (*Joseph. Ant.* vii. 5, § 4).

Putting out the eyes of captives, and other cruelties, as flaying alive, burning, tearing out the tongue, etc., were practiced by Assyrian and Babylonian conquerors; and parallel instances of despotism are found in abundance in both ancient and modern times in Persian and other history. The execution of Haman and the story of Daniel are

King putting out the Eyes of a Captive, who, with Others, is held Prisoner by a Hook in the Lips. Botta's *Ninive*.

pictures of summary Oriental procedure (2 K. xxv. 7; *Esth.* vii. 9, 10; *Jer.* xxix. 22; *Dan.* iii. 6, vi. 7, 24; *Her.* vii. 39, ix. 112, 113; *Chardin, Voy.* vi. 21, 118; *Layard, Nineveh*, ii. 369, 374, 377, *Nin.* § *Bab.* pp. 456, 457). And the duty of counting the numbers of the victims, which is there represented, agrees with the story of Jehu (2 K. x. 7) and with one recorded of Shah Abbas Mirza, by Ker Porter (*Travels*, ii. 524, 525; see also *Burckhardt, Syria*, p. 57; and *Malcolm, Sketches of Persia*, p. 47).

With the Romans, stripes and the stocks, *πεντε-εργον γόλον, nervus and columbar*, were in use, and imprisonment, with a chain attached to a sol-

dier. There were also the *liberæ custodiæ* in private houses [*PRISON*] (*Acts* xvi. 23, xxii. 24, xxviii. 16; *Xen. Hæc.* iii. 3, 11; *Herod.* ix. 37; *Plautus, Rud.* iii. 6, 30, 34, 38, 50; *Arist. Eq.* 1044 (ed. Bekker), *Joseph. Ant.* xviii. 6, § 7, xix. 6, § 1; *Sall. Cat.* 47; *Dict. of Antiq.* "Flagrum").

*Exposure to wild beasts* appears to be mentioned by St. Paul (1 Cor. xv. 32; 2 Tim. iv. 17), but not with any precision.

H. W. P.

\* *Striking on the mouth* (as inflicted on Paul, *Acts* xxiii. 2), was a punishment for speaking with undue liberty or insolence. It signified that the mouth must be shut which uttered such speech. Travellers report instances of this practice still in the East. "As soon as the ambassador came," says Morier (*Second Journey through Persia*, p. 8), "he punished the principal offenders by causing them to be beaten before him; and those who had spoken their minds too freely, he smote upon the mouth with a shoe." For another illustration see p. 94 of the same work.

H.

PUNITES, THE (פְּנִיטִים): *δ Φουαί: Phuvaitæ*. The descendants of Pua, or Phuvah, the son of Issachar (*Num.* xxvi. 23).

PUNON (פְּנֹן), *i. e.* Phunon [*ore-pit, Fürst; darkness (?)*, *Ges.*]; Samarit. פִּינֹן: [*Vat.* Φεινώ; [*Rom.*] Alex. Φνω; [*Ald.* Φινών: Phunon]. One of the halting-places of the Israelite host during the last portion of the Wandering (*Num.* xxxiii. 42, 43). It lay next beyond Zalmonah, between it and Oboth, and three days' journey from the mountains of Abarim, which formed the boundary of Moab.

By Eusebius and Jerome (*Onomasticon, Φινών*, "Fenon") it is identified with Pinon, the seat of the Edomite tribe of that name, and, further, with Pheno, which contained the copper-mines so notorious at that period, and was situated between Petra and Zoar. This identification is supported by the form of the name in the LXX. and Samaritan; and the situation falls in with the requirements of the Wanderings. No trace of such a name appears to have been met with by modern explorers. G.

\* Among the ruined places on the caravan road east of Mt. Seir, Seetzen's Arab guide mentioned to him a certain *Kalaat* (*i. e.* Castle) *Phenân* (*Zach's Monatl. Corr.* xvii. 137). This is conjectured by L. Völter (*Zeller's Bibl. Wörterb.* ii. 267) and others to be the Punon or Phunon referred to in Numbers, as above.

A.

PURIFICATION. The term "purification," in its legal and technical sense, is applied to the ritual observances whereby an Israelite was formally absolved from the taint of uncleanness, whether evidenced by any overt act or state, or whether connected with man's natural depravity. The cases that demanded it in the former instance are defined in the Levitical law [*UNCLEANNES*]: with regard to the latter, it is only possible to lay down the general rule that it was a fitting prelude to any nearer approach to the Deity: as, for instance, in the admission of a proselyte to the congregation [*PROSELYTE*], in the baptism (*καθαρismus*, *John* iii. 25) of the Jews as a sign of repentance [*BAPTISM*], in the consecration of priests and Levites [*PRIEST; LEVITE*], or in the performance of special religious acts (*Lev.* xvi. 4 2 Chr. xxx. 19). In the present article we are concerned solely with the former class, inasmuch as in this alone were the ritual observances of a special character

The essence of purification, indeed, in all cases, consisted in the use of water, whether by way of ablution or aspersion; but in the *majora delicta* of legal uncleanness, sacrifices of various kinds were added, and the ceremonies throughout bore an expiatory character. Simple ablution of the person was required after sexual intercourse (Lev. xv. 18; 2 Sam. xi. 4): ablution of the clothes, after touching the carcass of an unclean beast, or eating or carrying the carcass of a clean beast that had died a natural death (Lev. xi. 25, 40): ablution both of the person and of the defiled garments in cases of *gonorrhœa dormientium* (Lev. xv. 16, 17) — the ceremony in each of the above instances to take place on the day on which the uncleanness was contracted. A higher degree of uncleanness resulted from prolonged *gonorrhœa* in males, and menstruation in women: in these cases a probationary interval of seven days was to be allowed after the cessation of the symptoms; on the evening of the seventh day the candidate for purification performed an ablution both of the person and of the garments, and on the eighth offered two turtle-doves or two young pigeons, one for a sin-offering, the other for a burnt-offering (Lev. xv. 1-15, 19-30). Contact with persons in the above states, or even with clothing or furniture that had been used by them while in those states, involved uncleanness in a minor degree, to be absolved by ablution on the day of infection generally (Lev. xv. 5-11, 21-23), but in one particular case after an interval of seven days (Lev. xv. 24). In cases of childbirth the sacrifice was increased to a lamb of the first year with a pigeon or turtle-dove (Lev. xii. 6), an exception being made in favor of the poor who might present the same offering as in the preceding case (Lev. xii. 8; Luke ii. 22-24). The purification took place forty days after the birth of a son, and eighty after that of a daughter, the difference in the interval being based on physical considerations. The uncleannesses already specified were comparatively of a mild character: the more severe were connected with death, which, viewed as the penalty of sin, was in the highest degree contaminating. To this head we refer the two cases of (1) touching a corpse, or a grave (Num. xix. 16), or even killing a man in war (Num. xxxi. 19); and (2) leprosy, which was regarded by the Hebrews as nothing less than a living death. The ceremonies of purification in the first of these two cases are detailed in Num. xix. A peculiar kind of water, termed the *water of uncleanness*<sup>a</sup> (A. V. "water of separation"), was prepared in the following manner: An unblemished red heifer, on which the yoke had not passed, was slain by the eldest son of the high-priest outside the camp. A portion of its blood was sprinkled seven times towards<sup>b</sup> the sanctuary; the rest of it, and the whole of the carcass, including even its dung, were then burnt in the sight of the officiating priest, together with cedar-wood, hyssop, and scarlet. The ashes were collected by a clean man and deposited in a clean place outside the camp. Whenever occasion required, a portion of the ashes was mixed with spring water in a jar, and the unclean person was

sprinkled with it on the third, and again on the seventh day after the contraction of the uncleanness. That the water had an expiatory efficacy, is implied in the term *sin-offering*<sup>c</sup> (A. V. "purification for sin") applied to it (Num. xix. 9), and all the particulars connected with its preparation had a symbolical significance appropriate to the object sought. The sex of the victim (female, and hence life-giving), its red color (the color of blood, the seat of life), its unimpaired vigor (never having borne the yoke), its youth, and the absence in it of spot or blemish, the cedar and the hyssop (possessing the qualities, the former of incorruption, the latter of purity), and the scarlet (again the color of blood) — all these symbolized life in its fullness and freshness as the antidote of death. At the same time the extreme virulence of the uncleanness is taught by the regulations that the victim should be wholly consumed outside the camp, whereas generally certain parts were consumed on the altar, and the offal only outside the camp (Gen. ix. 11, 12); that the blood was sprinkled *towards*, and not *before* the sanctuary; that the officiating minister should be neither the high-priest, nor yet simply a priest, but the *presumptive* high-priest, the office being too impure for the first, and too important for the second; that even the priest and the person that burnt the heifer were rendered unclean by reason of their contact with the victim; and, lastly, that the purification should be effected, not simply by the use of water, but of water mixed with ashes which served as a lye, and would therefore have peculiarly cleansing qualities.

The purification of the leper was a yet more formal proceeding, and indicated the highest pitch of uncleanness. The rites are thus described in Lev. xiv. 4-32: The priest having examined the leper and pronounced him clear of his disease, took for him two birds "alive and clean," with cedar, scarlet, and hyssop. One of the birds was killed under the priest's directions over a vessel filled with spring water, into which its blood fell; the other, with the adjuncts, cedar, etc., was dipped by the priest into the mixed blood and water, and, after the unclean person had been seven times sprinkled with the same liquid, was permitted to fly away "into the open field." The leper then washed himself and his clothes, and shaved his head. The above proceedings took place outside the camp, and formed the first stage of purification. A probationary interval of seven days was then allowed, which period the leper was to pass "abroad out of his tent:"<sup>d</sup> on the last of these days the washing was repeated, and the shaving was more rigidly performed, even to the eyebrows and all his hair. The second stage of the purification took place on the eighth day, and was performed "before the LORD at the door of the tabernacle of the congregation." The leper brought thither an offering consisting of two he-lambs, a yearling ewe-lamb, fine flour mingled with oil, and a log of oil: in cases of poverty the offering was reduced to one lamb, and two turtle-doves, or two young pigeons, with a less quantity of fine flour, and a log of oil. The priest slew one of the he-lambs as a trespass-offering, and applied

<sup>a</sup> מֵי הַתְּהֵאָה.

<sup>b</sup> אֶל-יְנִיבָהּ פָּנָי. The A. V. incorrectly renders

<sup>c</sup> "directly before."

<sup>d</sup> חִטָּאת.

<sup>d</sup> The Rabbinical explanation of this was in conformity with the addition in the Chaldee version, "e non accedet ad latus uxoris sue." The words cannot however, be thus restricted: they are designed to mark the partial restoration of the leper — inside the camp but outside his tent.

portion of its blood to the right ear, right thumb, and great toe of the right foot of the leper: he next sprinkled a portion of the oil seven times before the Lord, applied another portion of it to the parts of the body already specified, and poured the remainder over the leper's head. The other he-lamb and the ewe-lamb, or the two birds, as the case might be, were then offered as a sin-offering, and a burnt-offering, together with the meat-offering. The significance of the cedar, the scarlet, and the hyssop, of the running water, and of the "alive (full of life) and clean" condition of the birds, is the same as in the case previously described. The two stages of the proceedings indicated, the first, which took place outside the camp, the re-admission of the leper to the community of men; the second, before the sanctuary, his re-admission to communion with God. In the first stage, the slaughter of the one bird and the dismissal of the other, symbolized the punishment of death deserved and fully remitted. In the second, the use of oil and its application to the same parts of the body as in the consecration of priests (Lev. viii. 23, 24) symbolized the re-dedication of the leper to the service of Jehovah.

The ceremonies to be observed in the purification of a house or a garment infected with leprosy, were identical with the first stage of the proceedings used for the leper (Lev. xiv. 33-53).

The necessity of purification was extended in the post-Babylonian period to a variety of unauthorized cases. Cups and pots, brazen vessels and couches, were washed as a matter of ritual observance (Mark vii. 4). The washing of the hands before meals was conducted in a formal manner (Mark vii. 3), and minute regulations are laid down on this subject in a treatise of the Mishna, entitled *Yadaim*. These ablutions required a large supply of water, and hence we find at a marriage feast no less than six jars containing two or three firkins apiece, prepared for the purpose (John ii. 6). We meet with references to purification after childbirth (Luke ii. 22), and after the cure of leprosy (Matt. viii. 4; Luke xvii. 14), the sprinkling of the water mixed with ashes being still retained in the latter case (Heb. ix. 13). What may have been the specific causes of uncleanness in those who came up to purify themselves before the Passover (John xi. 55), or in those who had taken upon themselves the Nazarite's vow (Acts xxi. 24, 26), we are not informed; in either case it may have been contact with a corpse, though in the latter it would rather appear to have been a general purification preparatory to the accomplishment of the vow.

In conclusion it may be observed, that the distinctive feature in the Mosaic rites of purification is their expiatory character. The idea of uncleanness was not peculiar to the Jew: it was attached by the Greeks to the events of childbirth and death

(Thucyd. iii. 104; Eurip. *Iph. in Taur.* 333), and by various nations to the case of sexual intercourse (Herod. i. 198, ii. 64; Pers. ii. 16). But with all these nations simple ablution sufficed: no sacrifices were demanded. The Jew alone was taught by the use of expiatory offerings to discern to its full extent the connection between the outward sign and the inward fount of impurity. W. L. B.

PURIM (פּוּרִים: *Φουραι*;<sup>b</sup> [in ver. 26, FA.<sup>2</sup> *Φουριμ*, *Φουρ*; ver. 31, Alex. *των Φουραια*, FA.<sup>1</sup> *των Φουρων*, FA.<sup>3</sup> *τ. Φουριμ*:] *Purim*: also, פּוּרִי, הַפּוּרִי (Esth. ix. 26, 31): *dies sortium*), the annual festival instituted to commemorate the preservation of the Jews in Persia from the massacre with which they were threatened through the machinations of Haman (Esth. ix.; Joseph. *Ant.* xi. 6, § 13). [ESTHER.] It was probably called Purim by the Jews in irony. Their great enemy Haman appears to have been very superstitious and much given to casting lots (Esth. iii. 7). They gave the name Purim, or Lots, to the commemorative festival, because he had thrown lots to ascertain what day would be auspicious for him to carry into effect the bloody decree which the king had issued at his instance (Esth. ix. 24).

The festival lasted two days, and was regularly observed on the 14th and 15th of Adar. But if the 14th happened to fall on the Sabbath, or on the second or fourth day of the week, the commencement of the festival was deferred till the next day. It is not easy to conjecture what may have been the ancient mode of observance, so as to have given the occasion something of the dignity of a national religious festival. The traditions of the Jews, and their modern usage respecting it are curious. It is stated that eighty-five of the Jewish elders objected at first to the institution of the feast, when it was proposed by Mordecai (Jerus. Gem. *Megillah* — Lightfoot on John x. 21). A preliminary fast was appointed, called "the fast of Esther," to be observed on the 13th of Adar, in memory of the fast which Esther and her maids observed, and which she enjoined, through Mordecai, on the Jews of Shushan (Esth. iv. 16). If the 13th was a Sabbath, the fast was put back to the fifth day of the week; it could not be held on the sixth day, because those who might be engaged in preparing food for the Sabbath would necessarily have to taste the dishes to prove them. According to modern custom, as soon as the stars begin to appear, when the 14th of the month has commenced, candles are lighted up in token of rejoicing, and the people assemble in the synagogue.<sup>d</sup> After a short prayer and thanksgiving, the reading of the Book of Esther commences. The book is written in a peculiar manner, on a roll called *κατ' ἐξοχήν*, "the Roll" (מִגִּילָה, *Megillah*).<sup>e</sup> The reader translates the text,

<sup>a</sup> Various opinions are held with regard to the term *συγγήμιον*. The meaning "with the fist" is in accordance with the general tenor of the Rabbinical usages; the hand used in washing the other being closed lest the palm should contract uncleanness in the act.

<sup>b</sup> The word פּוּרִי (*pur*) is Persian. In the modern language, it takes the form of *purrah*, and it is cognate with *pars* and *part* (Ges. *Thes.*). It is explained, Esth. vi. 7, and ix. 24, by the Hebrew פּוּרְלָה: *κληρονομία*.

<sup>c</sup> It can hardly be doubted that the conjecture of

the editor of the Complutensian Polyglot (approved by Grotius, in *Esth.* iii. 7, and by Schleusner, *Lex. in LXX.* s. *Φουραι*) is correct, and that the reading should be *Φουραι*. In like manner, the modern editors of Josephus have changed *Φουραιος* into *Φουραιος* (*Ant.* xi. 6, § 13). The old editors imagined that Josephus connected the word with *Φουραειν*.

<sup>d</sup> This service is said to have taken place in former times on the 15th in walled towns, but on the 14th in the country and unwalled towns, according to Esth. ix. 18, 19.

<sup>e</sup> Five books of the O. T. (Ruth, Esther, Ecclesiast

as he goes on, into the vernacular tongue of the place, and makes comments on particular passages. He reads in a histrionic manner, suiting his tones and gestures to the changes in the subject matter. When he comes to the name of Haman the whole congregation cry out, "May his name be blotted out," or "Let the name of the ungodly perish." At the same time, in some places, the boys who are present make a great noise with their hands, with rattles, and with pieces of wood or stone on which they have written the name of Haman, and which they rub together so as to obliterate the writing. When the names of the sons of Haman are read (ix. 7, 8, 9) the reader utters them with a continuous enunciation, so as to make them into one word, to signify that they were hanged all at once. When the Megillah is read through, the whole congregation exclaim, "Cursed be Haman; blessed be Mordecai; cursed be Zorash (the wife of Haman); blessed be Esther; cursed be all idolaters; blessed be all Israelites, and blessed be Harbonah who hanged Haman." The volume is then solemnly rolled up. All go home and partake of a repast said to consist mainly of milk and eggs. In the morning service in the synagogue, on the 14th, after the prayers, the passage is read from the Law (Ex. xvii. 8-16) which relates the destruction of the Amalekites, the people of Agag (1 Sam. xv. 8), the supposed ancestor of Haman (Esth. iii. 1). The Megillah is then read again in the same manner, and with the same responses from the congregation, as on the preceding evening. All who possibly can are bound to hear the reading of the Megillah — men, women, children, cripples, invalids, and even idiots — though they may, if they please, listen to it outside the synagogue (Mishna, *Rosh. Hash.* iii. 7).

The 14th of Adar,<sup>a</sup> as the very day of the deliverance of the Jews, is more solemnly kept than the 13th. But when the service in the synagogue is over, all give themselves up to merrymaking. Games of all sorts, with dancing and music, commence. In the evening a quaint dramatic entertainment, the subject of which is connected with the occasion, sometimes takes place, and men frequently put on female attire, declaring that the festivities of Purim, according to Esth. ix. 22, suspend the law of Deut. xxii. 5, which forbids one sex to wear the dress of the other. A dainty meal then follows, sometimes with a free indulgence of wine, both unmixed and mulled. According to the Gemara (*Megillah*, vii. 2), "tenetur homo in festo Purim eo usque inebriari, ut nullum discrimen norit, inter maledictionem Hamanis et benedictionem Mardocheai." <sup>b</sup>

tes, Canticles, and Lamentations) are designated by the Rabbinical writers "the Five Rolls," because, as it would seem, they used to be written in separate volumes for the use of the synagogue (Ges. *Thes. s.* פָּרָשׁוֹת). [ESTHER, BOOK OF.]

<sup>a</sup> It is called *הַמַּרְדּוֹכַאֲדָרִי הַיְמֵרָה*, 2 Macc. xv. 36.

<sup>b</sup> Buxtorf remarks on this passage: "Hoc est, nescitis supputare numerum qui ex singularum vocum literis exstruitur: nam literæ מרדכי ברוך וְהַמָּן הַזֶּה in Gematria eundem numerum constituunt. Perinde est ac si diceretur, posse illos in tantum bibere, ut quinque manus digitos numerare amplius non possint."

<sup>c</sup> See Cod. Theodos. lib. xvi. tit. viii. 18: "Judeos,

On the 15th the rejoicing is continued, and gifts consisting chiefly of sweetmeats and other eatables, are interchanged. Offerings for the poor are also made by all who can afford to do so, in proportion to their means (Esth. ix. 19, 22).

When the month Adar used to be doubled, in the Jewish leap-year, the festival was repeated on the 14th and 15th of the second Adar.

It would seem that the Jews were tempted to associate the Christians with the Persians and Amalekites in the curses of the synagogue. Hence probably arose the popularity of the feast of Purim in those ages in which the feeling of enmity was so strongly manifested between Jews and Christians. Several Jewish proverbs are preserved which strikingly show the way in which Purim was regarded, such as, "The Temple may fail, but Purim never;" "The Prophets may fail, but not the Megillah." It was said that no books would survive in the Messiah's kingdom except the Law and the Megillah. This affection for the book and the festival connected with it is the more remarkable because the events on which they are founded affected only an exiled portion of the Hebrew race, and because there was so much in them to shock the principles and prejudices of the Jewish mind.

Ewald, in support of his theory that there was in patriarchal times a religious festival at every new and full moon, conjectures that Purim was originally the full moon feast of Adar, as the Passover was that of Nisan, and Tabernacles that of Tisri.

It was suggested first by Kepler that the *εορτή των Ἰουδαίων* of John v. 1 was the feast of Purim. The notion has been confidently espoused by Petavins, Olsbhausen, Stier, Wieseler, Winer, and Anger (who, according to Winer, has proved the point beyond contradiction), and is favored by Alford and Ellicott. The question is a difficult one. It seems to be generally allowed that the opinion of Chrysostom, Cyril, and most of the Fathers, which was taken up by Erasmus, Calvin, Beza, and Bengel, that the feast was Pentecost, and that of Cocceius, that it was Tabernacles (which is countenanced by the reading of one inferior MS.), are precluded by the general course of the narrative, and especially by John iv. 35 (assuming that the words of our Lord which are there given were spoken in seed-time)<sup>d</sup> compared with v. 1. The interval indicated by a comparison of these texts could scarcely have extended beyond Nisan. The choice is thus left between Purim and the Passover.

The principal objections to Purim are, (a) that it was not necessary to go up to Jerusalem to keep

quodam festivitatis suæ solemnī, Aman, ad pœnæ quondam recordationem incendere, et crucis adsummatam speciem in contemptu Christianæ fidei sacrilegamente excurrere, Provincialium Rectores prohibent: ne locis suis fidei nostræ signum immiscant, sed ritus suos infra contemptum Christianæ legis retineant, amissuri sine dubio permissa hactenus, nisi ab illicitis temperaverint."

<sup>d</sup> This supposition does not appear to be materially weakened by our taking as a proverb *τετραμήνιος ἐστίν και ὁ θερισμός ἐρχεται*. Whether the expression was such or not, it surely adds point to our Lord's words. If we suppose the figurative language to have been suggested by what was actually going on in the fields before the eyes of Himself and his hearers

the festival (*b*), that it is not very likely that our Lord would have made a point of paying especial honor to a festival which appears to have had but a very small religious element in it, and which seems rather to have been the means of keeping alive a feeling of national revenge and hatred. It is alleged on the other hand that our Lord's attending the feast would be in harmony with his deep sympathy with the feelings of the Jewish people, which went further than his merely "fulfilling all righteousness" in carrying out the precepts of the Mosaic Law. It is further urged that the narrative of St. John is best made out by supposing that the incident at the pool of Bethesda occurred at the festival which was characterized by showing kindness to the poor, and that our Lord was induced, by the enmity of the Jews then evinced, not to remain at Jerusalem till the Passover, mentioned John vi. 4 (Stier).

The identity of the Passover with the feast in question has been maintained by Irenæus, Eusebius, and Theodoret, and, in modern times, by Luther, Scaliger, Grotius, Hengstenberg, Greswell, Neander, Tholuck, Robinson, and the majority of commentators. The principal difficulties in the way are, (*a*) the omission of the article, involving the improbability that the great festival of the year should be spoken of as "a feast of the Jews;" (*b*) that as our Lord did not go up to the Passover mentioned John vi. 4, He must have absented himself from Jerusalem for a year and a half, that is, till the feast of Tabernacles (John vii. 2). Against these points it is contended, that the application of *ἑορτή* without the article to the Passover is countenanced by Matt. xxvii. 15; Luke xxiii. 17 (comp. John xviii. 39); that it is assigned as a reason for his staying away from Jerusalem for a longer period than usual, that "the Jews sought to kill him" (John vii. 1; cf. v. 18); that this long period satisfactorily accounts for the surprise expressed by his brethren (John vii. 3), and that, as it was evidently his custom to visit Jerusalem once a year, He went up to the feast of Tabernacles (vii. 2) instead of going to the Passover.

On the whole, the only real objection to the Passover seems to be the want of the article before *ἑορτή*.<sup>a</sup> That the language of the New Testament will not justify our regarding the omission as expressing emphasis on any general ground of usage, is proved by Winer (*Grammar of the N. T. dialect*, iii. 19). It must be admitted that the difficulty is no small one, though it does not seem to be sufficient to outweigh the grave objections which lie against the feast of Purim.

The arguments on one side are best set forth by Stier and Olshausen on John v. 1, by Kepler (*Eclogæ Chronica*, Franfort, 1615), and by Anger (*de temp. in Act. Apost. i. 24*); those on the other side, by Robinson (*Harmony*, note on the *Second Passover*) and Neander, *Life of Christ*, § 143. See also Lightfoot, Kuinoel, and Tholuck, on John v. 1; and Greswell, *Diss. viii. vol. ii.*; Llicott, *Lect. p. 135*.

<sup>a</sup> Tischendorf inserts the article in his text, and Winer allows that there is much authority in its favor. But the nature of the case seems to be such, that the insertion of the article in later MSS. may be more nearly accounted for than its omission in the older ones.

\* The article is inserted in the Sinaitic and Ephrem MSS. and apparently in I, of the sixth century, which

See Carpzov, *App. Crit.* iii. 11; Reland, *Ant. iv.* 9; Schickard, *Purim sive Bacchanalia Judæorum* (*Crit. Sac.* iii. col. 1184); Buxtorf, *Syn. Jud.* xxix. The Mishnic treatise, *Megilla*, contains directions respecting the mode in which the scroll should be written out and in which it should be read, with other matters, not much to the point in hand, connected with the service of the synagogue. Stauben, *La Vie Juive en Alsace*; Mills, *British Jews*, p. 188. S. C.

\* PURPLE. [COLORS, 1.]

PURSE. The Hebrews, when on a journey, were provided with a bag (variously termed *עֵרֶב*, *tsêrôb*; and *חַרְטִי*), in which they carried their money (*Gen.* xlii. 35; *Prov.* i. 14, vii. 20; *Is.* xlvii. 6); and, if they were merchants, also their weights (*Deut.* xxv. 13; *Mic.* vi. 11). This bag is described in the N. T. by the terms *βαλάντιον* [*Tisch.* *βαλάντιον*] (peculiar to St. Luke, x. 4, xii. 33, xxii. 35, 36), and *γλωσσόκομον* (peculiar to St. John xii. 6, xiii. 29). The former is a classical term (*Plat. Conviv.* p. 190, ε, *σύσπαστα βαλάντια*): the latter is connected with the classical *γλωσσοκομείον*, which originally meant the bag in which musicians carried the mouthpieces of their instruments. In the LXX. the term is applied to the chest for the offerings at the Temple (2 Chr. xxiv. 8, 10, 11), and was hence adopted by St. John to describe the common purse carried by the disciples. The girdle also served as a purse, and hence the term *ζώνη* occurs in *Matt.* x. 9; *Mark* vi. 8. [GIRDLE.] Ladies wore ornamental purses (*Is.* iii. 23). The Rabbins forbade any one passing through the Temple with stick, shoes, and purse, these three being the indications of travelling (*Mishn. Berach.* 9, § 5). [SCRIP.]

W. L. B.

PUT, 1 Chr. i. 8; Nah. iii. 9. [PHUT.]

PUTEOLI (*Ποτλιοί*): [*Puteoli*] appears alike in Josephus (*Vit.* c. 3; *Ant.* xvii. 12, § 1, xviii. 7, § 2) and in the Acts of the Apostles (xxviii. 13) in its characteristic position under the early Roman emperors, namely, as the great landing-place of travellers to Italy from the Levant, and as the harbor to which the Alexandrian cornships brought their cargoes. These two features of the place in fact coincided; for in that day the movements of travellers by sea depended on merchant-vessels. Puteoli was at that period a place of very great importance. We cannot elucidate this better than by saying that the celebrated bay which is now "the bay of Naples," and in early times was "the bay of Cumæ," was then called "Sinus Puteolanus." The city was at the north-eastern angle of the bay. Close to it was Baïæ, one of the most fashionable of the Roman watering-places. The emperor Caligula once built a ridiculous bridge between the two towns; and the remains of it must have been conspicuous when St. Paul landed at Puteoli in the Alexandrian ship which brought him from Malta. [CASTOR AND

may be regarded as a fair offset to A B D. The uncial MSS. are about equally divided both in respect to authority and number, there being 10 on each side. The article is also added in the Sahidic and Coptic (or Thebaic and Memphitic) versions. A.

בַּיִט, and פִּיט. The last occurs only in 2 A. v. 23 "bags;" *Is.* iii. 22, A. v. "crisping-pins." The latter is supposed to refer to the long round form of the purse.

POLLUX; MELITA; RHEGIUM; SYRACUSE.] In illustration of the arrival here of the corn-ships we may refer to Seneca (*Ep.* 77) and Suetonius (*Octav.* 98).

The earlier name of Puteoli, when the lower part of Italy was Greek, was Dicæarelia; and this name continued to be used to a late period. Josephus uses it in two of the passages above referred to: in the third (*Vit.* c. 3) he speaks of himself (after the shipwreck which, like St. Paul, he had recently gone through) as *διασωθῆς εἰς τὴν Δικαιαρχίαν, ἣν Ποτιόλου Ἴταλοὶ καλοῦσιν*. So Philo, in describing the curious interview which he and his fellow Jewish ambassadors had here with Caligula, uses the old name (*Legal. ad Caium*, li. 521). The word Puteoli was a true Roman name, and arose (whether a *puteis* or a *putendo*) from the strong mineral springs which are characteristic of the place. Its Roman history may be said to have begun with the Second Punic War. It rose continually into greater importance, from the causes above mentioned. No part of the Campanian shore was more frequented. The associations of Puteoli with historical personages are very numerous. Scipio sailed from hence to Spain. Cicero had a villa (his "Puteolanum") in the neighborhood. Here Nero planned the murder of his mother. Vespasian gave to this city peculiar privileges, and here Hadrian was buried. In the 5th century Puteoli was ravaged both by Alaric and Genseric, and it never afterwards recovered its former eminence. It is now a fourth-rate Italian town, still retaining the name of *Pozzuoli*.

In connection with St. Paul's movements, we must notice its communications in Nero's reign along the mainland with Rome. The coast-road leading northwards to Sinuessa was not made till the reign of Domitian; but there was a cross-road leading to Capua, and there joining the Applan Way. [APPII FORUM; THREE TAVERNS.] The remains of this road may be traced at intervals; and thus the Apostle's route can be followed almost step by step. We should also notice the fact that there were Jewish residents at Puteoli. We might be sure of this from its mercantile importance; but we are positively informed of it by Josephus (*Ant.* xvii. 12, § 1) in his account of the visit of the pretended Herod-Alexander to Augustus; and the circumstance shows how natural it was that the Apostle should find Christian "brethren" there immediately on landing.

The remains of Puteoli are considerable. The aqueduct, the reservoirs, portions (probably) of baths, the great amphitheatre, the building called the Temple of Serapis, which affords very curious indications of changes of level in the soil, are all well worthy of notice. But our chief interest here is concentrated on the ruins of the ancient mole, which is formed of the concrete called *Pozzolana*, and sixteen of the piers of which still remain. No Roman harbor has left so solid a memorial of itself as this one at which St. Paul landed in Italy.

J. S. H.

PUTIEL (פּוּתִיֵּל [afflicted of God, Ges.]: פּוּתִיֵּל: *Phutiel*). One of the daughters of Putiel was wife of Eleazar the son of Aaron, and mother of Phinehas (*Ex.* vi. 25). Though he does not appear again in the Bible records, Putiel has some celebrity in more modern Jewish traditions. They identify him with Jethro the Midianite, "who fattened the calves for idolatrous worship" (*Targum*

Pseudojon. on *Ex.* vi. 25; *Gemara of Sota* by Wagenseil, viii. § 6). What are the grounds for the tradition or for such an accusation against Jethro is not obvious. G.

PYGARG (פִּיגָרְגּוֹס, *dishon*: πύγαργος: *pygargus*) occurs only (*Deut.* xiv. 5) in the list of clean animals as the rendering of the Heb. *dishon*, the name apparently of some species of antelope, though it is by no means easy to identify it. The Greek πύγαργος denotes an animal with a "white rump," and is used by Herodotus (*iv.* 192) as the name of some Libyan deer or antelope. Ælian (*vii.* 19) also mentions the πύγαργος, but gives no more than the name; comp. also Juvenal (*Sat.* xi. 138). It is usual to identify the *pygarg* of the Greek and Latin writers with the *addax* of North Africa, Nubia, etc. (*Addax nasomaculatus*); but we cannot regard this point as satisfactorily settled. In the first place, this antelope does not present at all the required characteristic implied by its name; and, in the second, there is much reason for believing, with Rüppell (*Atlas zu der Reise im Nörd. Afr.*, p. 21), and Hamilton Smith (*Griffith's Cuvier's Anim. King.* iv. 193), that the *Addax* is identical with the *Strepsiceros* of Pliny (*N. II.* xi. 37), which animal, it must be observed, the Roman naturalist distinguishes from the *pygargus* (*viii.* 53). Indeed we may regard the identity of the *Addax* and Pliny's *Strepsiceros* as established; for when this species was, after many years, at length rediscovered by Hemprich and Rüppell, it was found to be called by the Arabic name of *akas* or *adas*, the very name which Pliny gives as the local one of his *Strepsiceros*. The *pygargus*, therefore, must be sought for in some animal different from the *addax*. There are several antelopes which have the characteristic white croup required; many of which, however, are inhabitants of South Africa, such as the Spring-bok (*Antidorcas euchove*) and the Bonte-bok (*Damalis pygarga*). We are inclined to consider the πύγαργος, or *pygargus*, as a generic name to denote any of the white-rumped antelopes of North Africa, Syria, etc., such as the Ariel gazelle (*Antilope Arabica*, Hemprich), the Isabella gazelle (*Gazella Isabellina*); perhaps too the mohr, both of Abyssinia (*G. Soemmeringii*) and of Western Africa (*G. Mohr*), may be included under the term. Whether, however, the LXX. and Vulg. are correct in their interpretation of *dishon* is another question; but there is no collateral evidence of any kind beyond the authority of the two most important versions to aid us in our investigation of this word, of which various etymologies have been given from which nothing definite can be learnt. W. H.

\* PYRRHUS (Πυρρὸς, *red-haired*: *Pyrrhus*), father of Sopater, one of Paul's company on his journey from Greece to Asia (*Acts* xx. 4). The name in that passage is undoubtedly genuine, being found in the best copies of the text, though omitted in the *textus receptus*, and hence also in the A. V. The father was no doubt a Berean as well as the son, but whether he was a Christian or not is uncertain, unless, as some suppose. Sopater and Sospater (*Rom.* xvi. 21) were forms of the same name, and belonged in this history to the same person. In the latter case he was at Corinth when Paul wrote to the Church at Rome. The mention of the father serves to distinguish this Sopater from others of the same name. The same usage exists in modern Greek. H.

Q.

**QUAILS** (קָלִיב, *sēlāv*; but in *Keri* קָלִיב, *sēlāv*: ὀρνυγούητρα: *coturnix*). Various opinions have been held as to the nature of the food denoted by the Heb. *sēlāv*, which on two distinct occasions was supplied to the Israelites in the wilderness; see Ex. xvi. 13, on which occasion the people were between Sin and Sinai; and Num. xi. 31, 32, when at the station named, in consequence of the judgment which befell them, Kibroth-hattaavah. That the Hebrew word is correctly rendered "quails," is we think beyond a shadow of doubt, notwithstanding the different interpretations which have been assigned to it by several writers of eminence. Ludolf, for instance, an author of high repute, has endeavored to show that the *sēlāv* were locusts; see his *Dissertatio de Locustis, cum Diatriba*, etc., Franc. ad Moen. 1694. His opinion has been fully advocated and adopted by Patrick (*Comment. on Num.* xi. 31, 32); the Jews in Arabia also, as we learn from Niebuhr (*Beschreib. von Arab.* p. 172), "are convinced that the birds which the Israelites ate in such numbers were only clouds of locusts, and they laugh at those translators who suppose that they found quails where quails were never seen." Rudbeck (*Ichthyol. Bibl. Spec. l.*) has argued in favor of the *sēlāv* meaning "flying-fish," some species of the genus *Exocetus*; Michaelis at one time held the same opinion, but afterwards properly abandoned it (see Rosenmüller, *Not. ad Borchart. Hieroz.* ii. 549). A late writer, Ehrenberg (*Geograph. Zeit.* ix. 86), from having observed a number of "flying fish" (gurnards, of the genus *Trigla* of Oken, *Dactylopterus* of modern ichthyologists) lying dead on the shore near Elim, believed that *this* was the food of the Israelites in the wilderness, and named the fish "Trigla Israelitarum." Hermann von der Hardt supposed that the locust bird (*Pastor Roseus*), was intended by *sēlāv*; and recently Mr. Forster (*Voice of Israel*, p. 98) has advanced an opinion that "red geese" of the genus *Casarca* are to be understood by the Hebrew term; a similar explanation has been suggested by Stanley (*S. & P.* p. 82) and adopted by Tennent (*Ceylon*, i. 487, note): this is apparently an old conceit, for Patrick (*Numb.* xxi. 31) alludes to such an explanation, but we have been unable to trace it to its origin. Some writers, while they hold that the original word denotes "quails," are of opinion that a species of sand-grouse (*Pterocles alchata*), frequent in the Bible-lands, is also included under the term; see Winer (*Bibl. Realwörter.* ii. 772); Rosenmüller (*Not. ad Hieroz.* ii. 649); Faber (*ad Harmer*, ii. 442); Gesenius (*Thes. s. v.* קָלִיב). It is usual to refer to Hasselquist as the authority for believing that the *Kata* (sand-grouse) is denoted: this traveller, however, was rather inclined to believe, with some of the writers named above, that "locusts," and not birds, are to be understood (p. 443); and it is difficult to make out what he means by *Tetrao Israelitarum*. Linnaeus supposed he intended by it the common quail: in one paragraph he states that the Arabians call a bird "of a grayish color and less than our partridge," by the name of *Katta*. He adds "An Sclaw?" This cannot be the *Pterocles alchata*.

The view taken by Ludolf may be dismissed

with a very few words. The expression in Ps. lxxviii. 27 of "feathered fowl" (עֹרֹף כִּנָּף), which is used in reference to the *sēlāv*, clearly denotes some bird, and Ludolf quite fails to prove that it may include winged insects; again there is not a shadow of evidence to support the opinion that *sēlāv* can signify any "locust," this term being used in the Arabic and the cognate languages to denote a "quail." As to any species of "flying-fish," whether belonging to the genus *Dactylopterus*, or to that of *Exocetus*, being intended, it will be enough to state that "flying-fish" are quite unable to sustain their flight above a few hundred yards at the most, and never could have been taken in the Red Sea in numbers sufficient to supply the Israelitish host. The interpretation of *sēlāv* by "wild geese," or "wild cranes," or any "wild fowl," is a gratuitous assumption, without a particle of evidence in its favor. The *Casarca*, with which Mr. Forster identifies the *sēlāv*, is the *C. rutilla*, a bird about the size of a mallard, which can by no means answer the supposed requisite of standing three feet high from the ground. "The large red-legged cranes," of which Professor Stanley speaks, are evidently white storks (*Ciconia alba*), and would fulfill the condition as to height; but the flesh is so nauseous that no Israelite could have done more than have tasted it. With respect

*Pterocles alchata.*

to the *Pterocles alchata*, neither it nor indeed any other species of the genus can square with the Scriptural account of the *sēlāv*; the sand-grouse are birds of strong wing and of unwearied flight, and never could have been captured in any numbers by the Israelitish multitudes. We much question, moreover, whether the people would have eaten to excess — for so much the expression translated "fully satisfied" (Ps. lxxviii. 29) implies — of the flesh of this bird, for according to the testimony of travellers, from Dr. Russell (*Hist. of Aleppo*, ii. 194, 2d ed.) down to observers of to-day, the flesh of sand-grouse is hard and tasteless. It is clear, however, that the *sēlāv* of the Pentateuch and the 105th Psalm denotes the common "quail" (*Coturnix dactylisonans*) and no bird. In the first place, the Hebrew word קָלִיב is unquestionably identical with the Arabic *salwā* (سَلْوَى), a "quail." According to Schulzens (*Orig. Heb.* i. 231) the Heb. קָלִיב is derived from an Arabic root "to be fat;" the round, plump form of a quail is eminently suitable to this etymology; indeed, its fat

ness is proverbial. The objections which have been urged by Patrick and others against "quails" being intended are very easily refuted. The expression, "as if it were two cubits (high) upon the face of the earth" (Num. xi. 31) is explained by the LXX., by the Vulg., and by Josephus (*Ant.* iii. 1, § 5), to refer to the height at which quails flew above the ground, in their exhausted condition from their long flight. As to the enormous quantities which the least successful Israelite is said to have taken, namely, "ten homers," in the space of a night and two days, there is every reason for believing that the "homers" here spoken of do not denote strictly the measure of that name, but simply "a heap;" this is the explanation given by Onkelos and the Arabic version of Saadias and Erpenius, in Num. xi. 31.

*Coturnix vulgaris.*

The quail migrates in immense numbers; see Pliny (*H. N.* x. 23), and Tournefort (*Voyage*, i. 329), who says that all the islands of the Archipelago at certain seasons of the year are covered with these birds. Col. Sykes states that such quantities were once caught in Capri, near Naples, as to have afforded the bishop no small share of his revenue, and that in consequence he has been called Bishop of Quails. The same writer mentions also (*Trans. Zool. Soc.* ii.) that 160,000 quails have been netted in one season on this little island; according to Temminck 100,000 have been taken near Nettuno, in one day. The Israelites would have had little difficulty in capturing large quantities of these birds, as they are known to arrive at places sometimes so completely exhausted by their flight as to be readily taken, not in nets only, but by the hand. See Diod. Sic. (i. 82, *v. d.* Dindorf); Prosper Alpinus (*Rerum Egypt.* i. 1); Josephus (*Ant.* iii. 1, § 5). Sykes (*l. c.*) says "they arrive in spring on the shores of Prov-

ence so fatigued that for the first few days they allow themselves to be taken by the hand."<sup>a</sup> The Israelites "spread the quails round about the camp;" this was for the purpose of drying them. The Egyptians similarly prepared these birds; see Herodotus (ii. 77), and Maillet (*Lettres sur l'Égypte*, ix. 21, iv. 130). The expression "quails from the sea," Num. xi. 31, must not be restricted to denote that the birds came from the sea as their starting-point, but it must be taken to show the direction from which they were coming; the quails were, at the time of the event narrated in the sacred writings, on their spring journey of migration northwards, an interesting proof, as Col. Sykes has remarked, of the perpetuation of an instinct through some 3300 years; the flight which fed the multitudes at Kibroth-hattaavah might have started from Southern Egypt and crossed the Red Sea near Ras Mohammed, and so up the Gulf of Akabah into Arabia Petraea. It is interesting to note the time specified; "it was at even" that they began to arrive; and they no doubt continued to come all the night. Many observers have recorded that the quail migrates by night, though this is denied by Col. Montagu (*Ornithol. Dict.* art. "Quail").<sup>b</sup> The flesh of the quail, though of an agreeable quality, is said by some writers to be heating, and it is supposed by some that the deaths that occurred from eating the food in the wilderness resulted partly from these birds feeding on hellebore (Pliny, *H. N.* x. 23) and other poisonous plants; see Winer, *Bib. Reallex.* ii. 773; but this is exceedingly improbable, although the immoderate gratification of the appetite for the space of a whole month (Num. xi. 20) on such food, in a hot climate, and in the case of a people who at the time of the wanderings rarely tasted flesh, might have induced dangerous symptoms. "The plague" seems to have been directly sent upon the people by God as a punishment for their murmurings, and perhaps is not, even in a subordinate sense to be attributed to natural causes.

The quail (*Coturnix dactylisonans*), the only species of the genus known to migrate, has a very wide geographical range, being found in China, India, the Cape of Good Hope and England, and, according to Temminck, in Japan. See Col. Sykes's paper on "The Quails and Hemipodii of India" (*Trans. of Zool. Soc.* ii.).

The ὄρνυγμαῖτρα of the LXX. should not be passed over without a brief notice. It is not easy to determine what bird is intended by this term as used by Aristotle and Pliny (*ortygometra*); according to the account given of this bird by the Greek and Latin writers on Natural History just mentioned, the *ortygometra* precedes the quail in its migrations, and acts as a sort of leader to the flight. Some ornithologists, as Belon and Fleming (*Brit. Anim.* p. 98) have assigned this term to the "Landrail" (*Crex pratensis*), the Roi des

<sup>a</sup> \* In the northern parts of Persia and Armenia, according to Morier, quails are taken in great abundance, and with great ease, with the simplest possible machinery. The men stick two poles in their girdles, on which poles they so stretch a coat or pair of trousers, that the sleeves or the legs shall project like the horns of a beast. Thus disguised, they prowl about the fields with a hand-net, and the quails, simply supposing the strange object to be a horned beast, and therefore harmless to them, allow him to approach till he throws the net over them. Rude as such a contrivance seems, the Persians catch them

thus with astonishing rapidity (*Second Journey*, p. 343, as quoted by P. H. Gosse in Fairbairn's *Imperial Bible Dict.* ii. 741). For other modes of capturing these birds still practiced in the East, see Wood's *Bible Animals* (Lond. 1869), pp. 435, 436. A.

<sup>b</sup> "On two successive years I observed enormous flights of quails on the N. coast of Algeria, which arrived from the South in the night, and were at day break in such numbers through the plains, that scores of sportsmen had only to shoot as fast as they could reload" (H. B. Tristram).

Cailles of the French, Re di Quaglia of the Italians, and the Wachtel-König of the Germans, but with what reason we are unable to say; probably the LXX. use the term as a synonym of *ὄρνυξ*, or to express the good condition in which the birds were, for Hesychius explains *ὄρνυξ* by *ὄρνυξ ὑπερμεγέθης*, i. e. "a quail of large size." Thus, in point of etymology, zoölogy, history, and the authority of almost all the important old versions, we have as complete a chain of evidence in proof of the quail being the true representative of the *selâv* as can possibly be required. W. H.

\* **QUARRIES, THE** (פְּקִילִים: ἀπὸ τῶν γλυπτῶν: *ubi erant idola*) are mentioned in Judg. iii. 19, 26 (A. V.), as a place well known near Gilgal. Ehud, after having brought his present to Eglon, king of Moab, went with his attendants on their return as far as these "quarries" (A. V.), and then "turned again from them," and went back to execute the meditated murder alone. Instead of "quarries," or "quarry," the A. V. renders *vesilim* or *pesel* elsewhere (31 times in the singular and 21 times in the plural, and also, Judg. iii. 19, in the margin) by "graven" or "carved images." It is certainly unsafe, in view of such a usage, to admit an exceptional meaning in this place. See against that supposition especially Bachmann, *Das Buch der Richter*, p. 208 ff. (1868). A few make the word a proper name, *Pesilim*, with reference to some ancient idolatry there, though no longer practiced in Ehud's time.

Professor Cassel, *Richter u. Ruth*, p. 37, in Lange's *Bibelwerk* (1865), suggests another explanation. He understands that the פְּקִילִים were landmarks (consisting of pillars or heaps of stone, *στήλαι*) which marked the boundary between the territory of the Moabites on the west of the Jordan (held by them as conquerors at that time) and that of the Hebrews; and that it was from these stone heaps or pillars that Ehud turned back after parting with his servants. *Pesilim*, in this sense, would be nearly allied to that of "images," *idol-gods* (comp. Deut. vii. 25 and Isa. xlii. 8), since boundaries (*lapides sacri, termini*) were regarded as properly inviolate, consecrated. To the heathen they were hardly less than objects of religious veneration. The Hebrews would naturally speak of them with reference to the feelings of their foreign oppressors, though we need not altogether acquit the Hebrews of a similar superstition. Fürst sanctions "quarries," but as Targumic rather than Hebrew. H.

**QUARTUS** (Κούαρος [Lat. *fourth*): *Quartus*, a Christian of Corinth, whose salutations St. Paul sends to the brethren at Rome (Rom. xvi. 23). There is the usual tradition that he was one of the Seventy disciples; and it is also said that he ultimately became Bishop of Berytus (Tillemont, i. 334).<sup>a</sup> E. H.—s.

**QUATERNION** (τετραδίων: *quaternion*), a military term, signifying a guard of four soldiers, two of whom were attached to the person of a prisoner, while the other two kept watch outside the door of his cell (Vegetius, *De Re mil.* iii. 8; Polyb. vi. 33, § 7). Peter was delivered over to four such

bodies of four (Acts xii. 4), each of which took charge of him for a single watch of the night.

W. L. B.

\* Of the quaternion on guard at a given time, two may have watched at the door of the cell, and two at the gate which opened into the city. Peter, in making his escape, "passed through" (διελευθεῖν) a first and a second watch (φυλακή), which suggests the idea of more than one sentinel at each post. Walch thinks that the two soldiers to whom Peter was bound in the prison (ver. 6) did not belong to the quaternion, inasmuch as the security of Peter might not require them to be changed during the night like the others. On these details, and the archaeology of the subject generally, see especially Walch, *De vinculis Petri*, in his *Dissert. ad Acta Apost.* pp. 147-190. II.

**QUEEN** (מַלְכָּה; מַלְכָּה; מַלְכָּה). Of the three Hebrew terms cited as the equivalents of "queen" in the A. V., the first alone is applied to a queen-regnant; the first and second equally to a queen-consort, without, however, implying the dignity which in European nations attaches to that position; and the third to the queen-mother, to whom that dignity is transferred in oriental courts. The etymological force of the words accords with their application. *Malcâh* is the feminine of *mellech*, "king;" it is applied in its first sense to the queen of Sheba (1 K. x. 1), and in its second to the wives of the first rank, as distinguished from the concubines, in a royal harem (Esth. i. 9 ff., vii. 1 ff.; Cant. vi. 8): the term "princesses" is similarly used in 1 K. xi. 3. *Shégâl* simply means "wife;" it is applied to Solomon's bride (Ps. xlv. 9), and to the wives of the first rank in the harems of the Chaldee and Persian monarchs (Dan. v. 2, 3; Neh. ii. 6). *Gēbirâh*, on the other hand, is expressive of authority; it means "powerful" or "mistress." It would therefore be applied to the female who exercised the highest authority, and this, in an oriental household, is not the wife but the mother of the master. Strange as such an arrangement at first sight appears, it is one of the inevitable results of polygamy: the number of the wives, their social position previous to marriage, and the precariousness of their hold on the affections of their lord, combine to annihilate their influence, which is transferred to the mother as being the only female who occupies a fixed and dignified position. Hence the application of the term *gēbirâh* to the queen-mother, the extent of whose influence is well illustrated by the narrative of the interview of Solomon and Bathsheba, as given in 1 K. ii. 19 ff. The term is applied to Maachah, Asa's mother, who was deposed from her dignity in consequence of her idolatry (1 K. xv. 13; 2 Chr. xv. 16); to Jezebel as contrasted with Joram (2 K. x. 13, "the children of the king, and the children of the queen"); and to the mother of Jehoiachin or Jeconiah (Jer. xiii. 18; comp. 2 K. xxiv. 12; Jer. xxix. 2). In 1 K. xi. 19, the text probably requires emendation, the reading followed in the LXX., הַגְּדֹרְלָח, "the elder," according better with the context. W. L. B.

**QUEEN OF HEAVEN**. In Jer. vii. 18, xlv. 17, 18, 19, 25. the Heb. מַלְכַּת הַשָּׁמַיִם, *melleceh hashshamayim*, is thus rendered in the A. V. In the margin is given "frame or workmanship of heaven," for in twenty of Kennicott's MSS. the reading is מַלְאֲכַת, *melleceh*, of which

<sup>a</sup> \* In the Greek it is Quartus — "the brother" not indefinite, A. V.), which implies that he was well known to the Roman Christians. H

this is the translation and the same is the case in fourteen MSS. of Jer. xlv. 18, and in thirteen of Jer. xlv. 19. The latter reading is followed by the LXX. and Peshito Syriac in Jer. vii. 18, but in all the other passages the received text is adopted, as by the Vulgate in every instance. Kimchi says:

“**ש** is wanting, and it is as if **מְלִיטָה**, ‘workmanship of heaven,’ i. e. the stars; and some interpret ‘the queen of heaven,’ i. e. a great star which is in the heavens.” Rashi is in favor of the latter; and the Targum renders throughout “the star of heaven.” Kircher is in favor of some constellation, the Pleiades or Hyades. It is generally believed that the “queen of heaven” is the moon (comp. “siderum regina,” Hor. *Carm. Sec.* 35, and “regina cœli,” Apul. *Met.* xi. 657), worshipped as Ashtaroth or Astarte, to whom the Hebrew women offered cakes in the streets of Jerusalem. Hitzig (*Der Proph. Jeremja*, p. 64) says the Hebrews gave this title to the Egyptian Neith, whose name in the form Ta-nith, with the Egyptian article, appears with that of Baal Hammân, on four Carthaginian inscriptions. It is little to the purpose to inquire by what other names this goddess was known among the Phœnician colonists: the Hebrews, in the time of Jeremiah, appear not to have given her any special title. The Babylonian Venus, according to Harpoeracion (quoted by Selden, *de Dis Syris*, synt. 2, cap. 6, p. 220, ed. 1617), was also styled “the queen of heaven.” Mr. Layard identifies Hera, “the second deity mentioned by Diodorus, with Astarte, Mylitta, or Venus,” and with the “queen of heaven,” frequently mentioned in the sacred volumes. . . . The planet which bore her name was sacred to her, and in the Assyrian sculptures a star is placed upon her head. She was called Beltis, because she was the female form of the great divinity, or Baal; the two, there is reason to conjecture, having been originally but one, and androgyne. Her worship penetrated from Assyria into Asia Minor, where its Assyrian origin was recognized. In the rock tablets of Pterium she is represented, as in those of Assyria, standing erect on a lion, and crowned with a tower or mural coronet; which, we learn from Lucian, was peculiar to the Semitic figure of the goddess. This may have been a modification of the high cap of the Assyrian bas-reliefs. To the Shemites she was known under the names of Astarte, Ashtaroth, Mylitta, and Alitta, according to the various dialects of the nations amongst which her worship prevailed” (*Vineveh*, ii. 454, 456, 457). It is so difficult to separate the worship of the moon-goddess from that of the planet Venus in the Assyrian mythology when introduced among the western nations, that the two are frequently confused. Movers believes that Ash-toreth was originally the moon-goddess, while according to Rawlinson (*Herod.* i. 521) *Ish-tar* is the Babylonian Venus, one of whose titles in the Sardanapalus inscriptions is “the mistress of heaven and earth.”

With the cakes (**כֶּבֶדִּים**, *carbânim*: *carbânes*) which were offered in her honor, with incense and bations, Selden compares the *πίτυρα* (A. V. “bran”) of Ep. of Jer. 43, which were burnt by the women who sat by the wayside near the idolatrous temples for the purposes of prostitution. These *πίτυρα* were offered in sacrifice to Hecate, while invoking her aid for success in love (Theocr.

l. 33). The Targum gives **כַּרְדִּינִי**, *cardûnî*,

which elsewhere appears to be the Greek *χειρῶν-τός*, a sleeved tunic. Rashi says the cakes had the image of the god stamped upon them, and Theodoret that they contained pine-cones and raisins.

W. A. W.

\* **QUEEN OF THE SOUTH** (Luke xi 31). [SHEBA.]

\* **QUICK** (from A.-S. *cwic* or *cwac*) = living alive, Lev. xiii. 10; Num. xvi. 30; Ps. lv. 15, cxxiv. 3; Acts x. 42; 2 Tim. iv. 1; Heb. iv. 12; 1 Pet. iv. 5.

\* **QUICKEN** = to make alive (A.-S. *cwician*), Ps. cxix. 50; 1 Cor. xv. 36; Eph. ii. 1, etc. [QUICK.]

**QUICKSANDS, THE** (*ἡ Σύρτις: Syrtis*), more properly **THE SYRTIS** (Acts xxvii. 17), the broad and deep bight on the North African coast between Carthage and Cyrene. The name is derived from *Sert*, an Arabic word for a desert. For two reasons this region was an object of peculiar dread to the ancient navigators of the Mediterranean, partly because of the drifting sands and the heat along the shore itself, but chiefly because of the shallows and the uncertain currents of water in the bay. Josephus, who was himself once wrecked in this part of the Mediterranean, makes Agrippa say (*B. J.* ii. 16, § 4), *φοβεράλ καὶ τοῖς ἀκούουσι Σύρτις*. So notorious were these dangers, that they became a commonplace with the poets (see Hor. *Od.* i. 22, 5; Ov. *Fast.* iv. 499; Virgil, *Æn.* i. 111; Tibull. iii. 4, 91; Lucan, *Phars.* ix. 431). It is most to our purpose here, however, to refer to Apollonius Rhodius, who was familiar with all the notions of the Alexandrian sailors. In the 4th book of his *Argonaut.* 1232-1237, he supplies illustrations of the passage before us, in more respects than one — in the sudden violence (*ἀναρπάδην*) of the terrible north wind (*ἄλοη βορέα θύελλα*), in its long duration (*ἐννεά πάσας Νύκτας ὁμῶς καὶ τόσσα φέβ' ἤματα*), and in the terror which the sailors felt of being driven into the Syrtis (*Προσπρὸ μάλ' ἐνδοθὶ Σύρτιν, δθ' οὐκέτι νόστος ὀπίσσω Νηυσὶ πέλει*). [See CLAUDA and EUCROCLYDON.] There were properly two Syrtes, the eastern or larger, now called the *Gulf of Sidra*, and the western or smaller, now the *Gulf of Cubes*. It is the former to which our attention is directed in this passage of the Acts. The ship was caught by a northeasterly gale on the south coast of CRETE, near Mount Ida, and was driven to the island of CLAUDA. This line of drift, continued, would strike the greater Syrtis: whence the natural apprehension of the sailors. [SHIP.] The best modern account of this part of the African coast is that which is given (in his *Memoir on the Mediterranean*, pp. 87-91, 186-190) by Admiral Smyth, who was himself the first to survey this bay thoroughly, and to divest it of many of its terrors.

J. S. H.

**QUINTUS MEMMIUS**, 2 Macc. xi. 34. [See MANLIUS, T. vol. ii. p. 1779 b.]

\* **QUIRINIUS**. [CYRENIUS.]

\* **QUIT**, in the sense of *acquit*: “Quit yourselves like men” (1 Sam. iv. 9); and, “Quit you like men” (1 Cor. xvi. 13). H.

**QUIVER**. Two distinct Hebrew terms are represented by this word in the A. V.

(1) **תֵּלִי**, *thèli*. This occurs only in Gen. xxvii 3; “Take thy weapons (lit. “thy things”), thy

quiver and thy bow." It is derived (by Gesenius, *Theas.* p. 1504, and Fürst, *Handb.* ii. 528) from a root which has the force of hanging. The passage itself affords no clew to its meaning. It may therefore signify either a quiver, or a suspended weapon

Assyrian Warrior with Quiver.

— for instance, such a sword as in our own language was formerly called a "hanger." Between these two significations the interpreters are divided. The LXX., Vulgate, and Targum Pseudojon. adhere to the former; Onkelos, the Peshito and Arabic Versions, to the latter.

(2.) **אֶשְׁפָּה**, *ashpáh*. The root of this word is uncertain (Gesenius, *Theas.* p. 161). From two of its

Assyrian Chariot with Quiver.

occurrences its force would seem to be that of concealing or concealing (Ps. cxxvii. 5; Is. xlix. 2). It is connected with arrows only in Lam. iii. 13. Its other occurrences are Job xxxix. 23, Is. xxii. 6, and Jer. v. 16. In each of these the LXX. trans-

late it by "quiver" (*φαιέτρα*), with two exceptions, Job xxxix. 23, and Ps. cxxvii. 5, in the former of which they render it by "bow," in the latter by *ἐπιθουμά*.

As to the thing itself, there is nothing in the Bible to indicate either its form or material, or in what way it was carried. The quivers of the Assyrians are rarely shown in the sculptures. When they do appear they are worn at the back, with the top between the shoulders of the wearer, or hang at the side of the chariot.

The Egyptian warriors, on the other hand, wore them slung nearly horizontal, drawing out the arrows from beneath the arm (Wilkinson, *Popular Account*, i. 354). The quiver was about 4 inches diameter, supported by a belt passing over the shoulder and across the breast to the opposite side. When not in actual use, it was shifted behind.

The English word "quiver" is a variation of "cover" — from the French *couvrir*; and therefore answers to the second of the two Hebrew words. G.

\* QUOTATIONS FROM THE O. T. IN THE NEW. [OLD TESTAMENT, iii.]

R.

RA'AMAH (**רָאָמָה**) [*trembling, and man's of a horse*]: 'Ρεγμά, [Álex. Ρεγχμα.] Gen. x. 7; Ραμμά, [Vat. Ραμα, Alex. Ραγμα,] Ez. xxvii. 22:

[**רָאָמָה**]: Ρεγμά, 1 Chr. i. 9:] *Regma, Reema*). A son of Cush, and father of the Cushite Sheba and Dedan. The tribe of Raamah became afterwards renowned as traders; in Ezekiel's lamentation for Tyre it is written, "The merchants of Sheba and Raamah, they [were] thy merchants; they occupied in thy fairs with chief of all the spices, and with all precious stones and gold" (xxvii. 22). The general question of the identity, by intermarriage, etc., of the Cushite Sheba and Dedan with the Keturahites of the same names is discussed, and the 27th chapter of Ezekiel examined, in art. DEDAN. Of the settlement of Raamah on the shores of the Persian Gulf there are several indications. Traces of Dedan are very faint; but Raamah seems to be recovered, through the LXX. reading of Gen. x. 7, in the 'Ρεγμά of Ptol. vi. 7, and 'Ρῆγμα of Steph. Byzant. Of Sheba, the other son of Raamah, the writer has

found a trace in a ruined city so named (**شِبَا**, *Shebà*) on the island of Awál (Marásid, s. v.), belonging to the province of Arabia called El-Bahreyh on the shores of the gulf. [SHEBA.] This identification strengthens that of Raamah with 'Ρεγμά, and the establishment of these Cushite settlements on the Persian Gulf is of course important to the theory of the identity of these Cushite and Keturahite tribes: but, besides etymological grounds, there are the strong reasons stated in DEDAN for holding that the Cushites colonized that region, and for connecting them commercially with Palestine by the great desert route.

The town mentioned by Niebuhr called Reymeh (**رَيْمَة**, *Descr. de l'Arabie*) cannot, on etymological grounds, be connected with Raamah, as it wants an equivalent for the **א**; nor can we suppose that it is

to be probably traced three days' journey from San'a [UZAL], the capital of the Yemen. E. S. P.

**RAAMI'AH** (רַאמִיָּא) : 'Ρεελαμ; [Vat. Naamia, 2. m. *Ναεμία*;] F.A. *δαμία*; *Raamius*). One of the chiefs who returned with Zerubbabel (Neh. vii. 7). In Ezr. ii. 2 he is called REELAIAH, and the Greek equivalent of the name in the LXX. of Nehemiah appears to have arisen from a confusion of the two readings, unless, as Berrington (*General*. ii. 68) suggests, 'Ρεελαμ is an error of the copyist for Ρεελαία, the uncial letters ΛΙ having been mistaken for μ. In 1 Esdr. v. 8 the name appears as REESAIAS.

**RAAM'SES**, Ex. i. 11. [RAMESSES.]

**RAB'BAH**. The name of several ancient places, both east and west of the Jordan. The root is *rab*, meaning "multitude," and thence "greatness," of size or importance<sup>a</sup> (Gesenius, *Thest.* p. 1254; Fürst, *Handb.* ii. 347). The word survives in Arabic as a common appellative, and is also in use as the name of places — e. gr. *Rabba* on the east of the Dead Sea; *Rabbah*, a temple in the tribe of Medshidj (Freytag, ii. 107 a); and perhaps also *Rabat* in Morocco.

L. (רַבָּבָה) : <sup>b</sup> Ραββάθ, Ραβθά, ἡ Ραββά; [Rom. 'Αράθ, Josh. xiii. 25 (so Vat.); Ραββά, 1 Chr. xx. 1; ἡ πόλις τοῦ Ἀμμών, Ez. xxv. 5 (so Vat. Alex.); elsewhere Ραββάθ: — Vat. in 1 Chr. xvii. 27, Ραβαθ; 1 Chr. xx. 1, Ραββα, Ραββα; Am. i. 14, Ραββα (so Alex.); Josh. and Ez. as above; elsewhere Ραββαθ; — Alex. in Josh. xiii. 25, Am. i. 14, Ραββα; 2 Sam. xii. 26, Ραβαθ; Ez. as above; elsewhere Ραββαθ; — F.A.<sup>1</sup> Jer. xlix. 2, Ραβαθ, ver. 3, F.A. Ρεββαθ:] *Rabba*, *Rabbath*.) A very strong place on the east of Jordan, which, when its name is first introduced in the sacred records, was the chief city of the Ammonites. In five passages (Deut. iii. 11; 2 Sam. xii. 26, xvii. 27; Jer. xlix. 2; Ez. xxi. 20) it is styled at length *Rabbath bene-Ammon*, A. V. [in Deut. iii. 11, Ez. xxi. 20] *Rabbath* [elsewhere *Rabbah*] of the Ammonites, or, children of Ammon; but elsewhere (Josh. xxiii. 25; 2 Sam. xi. 1, xii. 27, 29; 1 Chr. xx. 1; Jer. xlix. 3; Ez. xxv. 5; Amos i. 14) simply **RABBAH**.

It appears in the sacred records as the single city of the Ammonites, at least no other bears any distinctive name, a fact which, as has been already remarked (vol. i. p. 84 b), contrasts strongly with the abundant details of the city life of the Moabites.

Whether it was originally, as some conjecture, the HAM of which the Zuzim were dispossessed by Chedorlaomer (Gen. xiv. 5), will probably remain forever a conjecture.<sup>c</sup> When first named, it is in the hands of the Ammonites, and is mentioned as containing the bed or sarcophagus of the giant Og (Deut. iii. 11), possibly the trophy of some successful war of the younger nation of Lot, and more recent settler in the country, against the more ancient Rephaim. With the people of Lot, their

kinsmen the Israelites had no quarrel, and *Rabbath-of-the-children-of-Ammon* remained to all appearance unmolested during the first period of the Israelite occupation. It was not included in the territory of the tribes east of Jordan; the border of Gad stops at "Aroer, which faces Rabbah" (Josh. xiii. 25). The attacks of the Bene-Ammon on Israel, however, brought these peaceful relations to an end. Saul must have had occupation enough on the west of Jordan in attacking and repelling the attacks of the Philistines and in pursuing David through the woods and ravines of Judah to prevent his crossing the river, unless on such special occasions as the relief of Jabesh. At any rate we never hear of his having penetrated so far in that direction as Rabbah. But David's armies were often engaged against both Moab and Ammon.

His first Ammonite campaign appears to have occurred early in his reign. A part of the army, under Abishai, was sent as far as Rabbah to keep the Ammonites in check (2 Sam. x. 10, 14), but the main force under Joab remained at Medeba (1 Chr. xix. 7). The following year was occupied in the great expedition by David in person against the Syrians at Helam, wherever that may have been (2 Sam. x. 15-19). After their defeat the Ammonite war was resumed, and this time Rabbah was made the main point of attack (xi. 1). Joab took the command, and was followed by the whole of the army. The expedition included Ephraim and Benjamin, as well as the king's own tribe (ver. 11); the "king's slaves" (vv. 1, 17, 24); probably David's immediate body-guard, and the thirty-seven chief captains. Uriah was certainly there, and, if a not improbable Jewish tradition may be adopted, Ittai the Gittite was there also. [ITTAI.] The ark accompanied the camp (ver. 11), the only time<sup>d</sup> that we hear of its doing so, except that memorable battle with the Philistines, when its capture caused the death of the high-priest. David alone, to his cost, remained in Jerusalem. The country was wasted, and the roving Ammonites were driven with all their property (xii. 30) into their single stronghold, as the Bedouin Kenites were driven from their tents inside the walls of Jerusalem when Judah was overrun by the Chaldeans. [RECHABITES.] The siege must have lasted nearly, if not quite, two years; since during its progress David formed his connection with Bathsheba, and the two children, that which died and Solomon, were successively born. The sallies of the Ammonites appear to have formed a main feature of the siege (2 Sam. xi. 17, &c.). At the end of that time Joab succeeded in capturing a portion of the place — the "city of waters," that is, the lower town, so called from its containing the perennial stream which rises in and still flows through it. The fact (which seems undoubted) that the source of the stream was within the lower city, explains its having held out for so long. It was also called the "royal city" (עִיר הַמְּלִיכָה), perhaps from its connection with Molech or Micom

<sup>a</sup> It is hardly necessary to point out that the title *Rabbi* is directly derived from the same root.

<sup>b</sup> In Deut. iii. 11 it is τῆ ἀκρα τῶν υἱῶν Ἀμμών in both MSS. In Josh. xiii. 25 the Vat. has Ἀραβα ἡ ἰσθμὸς κατὰ πρόσωπον Ἀράθ, where the first and last words of the sentence seem to have changed places.

<sup>c</sup> The statement of Eusebius (*Onom.* "Amman") that it was originally a city of the Rephaim, implies that it was the Ashteroth Karnaim of Gen. xiv. In

agreement with this is the fact that it was in later times known as Astarte (Steph. Byz., quoted by Ritter, p. 1155). In this case the dual ending of *Karnaim* may point, as some have conjectured in *Jerusalaim*, to the double nature of the city — a lower town and a citadel.

<sup>d</sup> On a former occasion (Num. xxxi. 6) the "holy things" only are specified; an expression which hardly seems to include the ark.

— the "king" — more probably from its containing the palace of Hanun and Nahash. But the citadel, which rises abruptly on the north side of the lower town, a place of very great strength, still remained to be taken, and the honor of this capture, Joab (with that devotion to David which runs like a bright thread through the dark web of his character) insists on reserving for the king. "I have fought," writes he to his uncle, then living at ease in the harem at Jerusalem, in all the satisfaction of the birth of Solomon — "I have fought against Rabbah, and have taken<sup>a</sup> the city of waters; but the citadel still remains: now therefore gather the rest of the people together and come; put yourself at the head of the whole army, renew the assault against the citadel, take it, and thus finish the siege which I have carried so far," and then he ends with a rough banter<sup>b</sup> — half jest, half earnest — "lest I take the city and in future it go under my name." The waters of the lower city once in the hands of the besiegers, the fate of the citadel was certain, for that fortress possessed in itself (as we learn from the invaluable notice of Josephus, *Ant.* vii. 7, § 5) but one well of limited supply, quite inadequate to the throng which crowded its walls. The provisions also were at last exhausted, and shortly after David's arrival the fortress was taken, and its inmates, with a very great booty, and the idol of Molech, with all its costly adornments, fell into the hands of David. [IRTAI; MOLECH.]

We are not told whether the city was demolished or whether David was satisfied with the slaughter of its inmates. In the time of Amos, two centuries and a half later, it had again a "wall" and "palaces," and was still the sanctuary of Molech — "the king" (*Am.* i. 14). So it was also at the date of the invasion of Nebuchadnezzar (*Jer.* xlix. 2, 3), when its dependent towns ("daughters") are mentioned, and when it is named in such terms as imply that it was of equal importance with Jerusalem (*Ez.* xxi. 20). At Rabbah, no doubt, Baalis, king of the Bene-Ammon (*Jer.* xl. 14), held such court as he could muster, and within its walls was plotted the attack of Ishmael which cost Gedaliah his life, and drove Jeremiah into Egypt. [ISHMAEL 6, vol. ii. p. 1172 b.] The denunciations of the prophets just named may have been fulfilled, either at the time of the destruction of Jerusalem, or five years afterwards, when the Assyrian armies overran the country east of Jordan on their road to Egypt (*Joseph.* *Ant.* x. 9, § 7). See Jerome, *on Amos* i. 41.

In the period between the Old and New Testaments, Rabbath-Ammon appears to have been a place of much importance, and the scene of many contests. The natural advantages of position and water supply which had always distinguished it, still made it an important citadel by turns to each side, during the contentions which raged for so long over the whole of the district. It lay on the road between Heshbon and Bosra, and was the last place at which a stock of water could be obtained for the journey across the desert, while as it stood on the confines of the richer and more civilized country, it formed an important garrison station, for repelling the incursions of the wild tribes of the desert.

<sup>a</sup> The Vulgate alters the force of the whole passage by rendering this *et capienda est urbs aquarum*, "the city of waters is about to be taken." But neither Hebrew nor LXX. will bear this interpretation.

From Ptolemy Philadelphus (n. c. 285-247) it received the name of Philadelphia (*Jerome* on *Ex.* xxv. 1), and the district either then or subsequently was called Philadelphene (*Joseph.* *B. J.* iii. 3, § 2), or Arabia Philadelphensis (*Epiphanius*, in *Ritter, Syrien*, p. 1155). In n. c. 218 it was taken from the then Ptolemy (Philopator) by Antiochus the Great, after a long and obstinate resistance from the besieged in the citadel. A communication with the spring in the lower town had been made since (possibly in consequence of) David's siege, by a long secret subterranean passage, and had not this been discovered to Antiochus by a prisoner, the citadel might have been enabled to hold out (*Polybius*, v. 17, in *Ritter, Syrien*, p. 1155). During the struggle between Antiochus the Pious (Sidetes), and Ptolemy the son-in-law of Simon Maccabæus (cir. E. c. 134), it is mentioned as being governed by a tyrant named Cotylas (*Ant.* xiii. 8, § 1). Its ancient name, though under a cloud, was still used; it is mentioned by Polybius (v. 71) under the hardly altered form of Rabbatâmana (*Ραββατᾶνα*). About the year 65 we hear of it as in the hands of Aretas (one of the Arab chiefs of that name), who retired thither from Judæa when menaced by Scæurus, Pompey's general (*Joseph.* *B. J.* i. 6, § 3). The Arabs probably held it till the year n. c. 30, when they were attacked there by Herod the Great. But the account of Josephus (*B. J.* i. 19, §§ 5, 6) seems to imply that the city was not then inhabited, and that although the citadel formed the main point of the combat, yet that it was only occupied on the instant. The water communication above alluded to also appears not to have been then in existence, for the people who occupied the citadel quickly surrendered from thirst, and the whole affair was over in six days.

At the Christian era Philadelphia formed the eastern limit of the region of Peræa (*B. J.* iii. 3, § 3). It was one of the cities of the Decapolis, and as far down as the 4th century was esteemed one of the most remarkable and strongest cities of the whole of Cœle-Syria (*Eusebius, Onom.* "Amman;" *Ammianus Marc.* in *Ritter*, p. 1157). Its magnificent theatre (said to be the largest<sup>c</sup> in Syria), temples, odeon, mausoleum, and other public buildings were probably erected during the 2d and 3d centuries, like those of *Jerash*, which they resemble in style, though their scale and design are grander (*Lindsay*). Amongst the ruins of an "immense temple" on the citadel hill, Mr. Tipping saw some prostrate columns 5 ft. diameter. Its coins are extant, some bearing the figure of Astarte, some the word *Herakleion*, implying a worship of Hercules, probably the continuation of that of Molech or Milcom. From Stephanus of Byzantium we learn that it was also called *Astarte*, doubtless from its containing a temple of that goddess. Justin Martyr, a native of Shechem, writing about A. D. 140, speaks of the city as containing a multitude of Ammonites (*Dial. with Trypho*), though it would probably not be safe to interpret this too strictly.

Philadelphia became the seat of a Christian bishop, and was one of the nineteen sees of "Palæstina tertia," which were subordinate to Bostra

<sup>b</sup> Very characteristic of Joab. See a similar strain, 2 Sam. xix. 6.

<sup>c</sup> Mr. Tipping gives the following dimensions in his journal. Breadth 240 ft.; height 42 steps; namely first row 10, second 14, third 18.

(Reland, *Pal.* p. 228.) The church still remains "in excellent preservation" with its lofty steeple (Lord Lindsay). Some of the bishops appear to have signed under the title of Bakatha; which Bakatha is by Epiphanius (himself a native of Palestine) mentioned in such a manner as to imply that it was but another name for Philadelphia, derived from an Arab tribe in whose possession it was at that time (A. D. cir. 400). But this is doubtful. (See Reland, *Pal.* p. 612; Ritter, p. 1157.)

Amman<sup>a</sup> lies about 22 miles from the Jordan at the eastern apex of a triangle, of which Heshbon and *es-Salt* form respectively the southern and northern points. It is about 14 miles from the former, and 12 from the latter. Jerash is due north more than 20 miles distant in a straight line, and 35 by the usual road (Lindsay, p. 278). It lies in a valley which is a branch, or perhaps the main course, of the *Wady Zerka*,<sup>b</sup> usually identi-

fied with the Jabbok. The *Mouet-Amma*, or water of Amman, a mere streamlet, rises within the basin which contains the ruins of the town. The main valley is a mere winter torrent, but appears to be perennial, and contains a quantity of fish, by one observer said to be trout (see Burekhardt, p. 358; G. Robinson ii. 174; "a perfect fish-pond," Tipping). The stream runs from west to east, and north of it is the citadel on its isolated hill.

When the Moslems conquered Syria they found the city in ruins (Abulfeda in Ritter, p. 1158; and in note to Lord Lindsay); and in ruins remarkable for their extent and desolation even for Syria, the "Land of ruins," it still remains. The public buildings are said to be Roman, in general character like those at *Jerash*, except the citadel, which is described as of large square stones put together without cement, and which is probably more

Amman, from the East: showing the perennial stream and part of the citadel-hill. From a sketch by Wm Tipping, Esq.

ancient than the rest. The remains of private houses scattered on both sides of the stream are very extensive. They have been visited, and described in more or less detail, by Burekhardt (*Syria*, pp. 357-360), who gives a plan; Seetzen (*Reisen*, i. 396, iv. 212-214); Irby (June 14); Buckingham, *E. Syria*, pp. 68-82; Lord Lindsay (5th ed. pp. 278-284); G. Robinson (ii. 172-178); Lord Claud Hamilton (in Keith, *Exil. of Proph.* ch. vi.). Burekhardt's plan gives a general idea of the disposition of the place, but a comparison with Mr. Tipping's sketch (on the accuracy of which every dependence may be placed) seems to show that it is not correct as to the proportions of the different parts. Two views are given by Laborde (*Vues en Syrie*), one of a tomb, the other of the theatre; but neither of these embraces the characteristic features of the place—the streamlet and the citadel. The ac-

companying view has been engraved (for the first time) from one of several careful sketches made in 1840 by William Tipping, Esq., and by him kindly placed, with some valuable information, at the disposal of the author. It is taken looking towards the east. On the right is the beginning of the citadel hill. In front is an arch (also mentioned by Burekhardt) which spans the stream. Below and in front of the arch is masonry, showing how the stream was formerly embanked or quayed in.

No inscriptions have been yet discovered. A lengthened and excellent summary of all the information respecting this city will be found in Ritter's *Erdkunde, Syrien* (pp. 1145-1159).

\* These ruins, among the most impressive in Syria, are not, with the exception of the citadel, those of the Rabbath of the Ammonites. That has vanished with the iron bedstead of the last

<sup>a</sup> عمان, essentially the same word as the Hebrew *Ammon*.

<sup>b</sup> This is distinctly stated by Abulfeda (Ritter, p. 1158, Lindsay, note 37).

giact king of Bashan. The remains of the Roman Philadelphia appear in the elaborate but mutilated Grecian sculpture with which the site is now strewed. (Tristram, *Land of Israel*, pp. 548-555, 2d ed.) S. W.

2. Although there is no trace of the fact in the Bible, there can be little doubt that the name of Rabbah was also attached in Biblical times to the chief city of Moab. Its Biblical name is AR, but we have the testimony of Eusebius (*Onomast.* "Moab") that in the 4th century it possessed the special title of Rabbath Moab, or as it appears in the corrupted orthography of Stephanus of Byzantium, the coins, and the Ecclesiastical Lists, *Rabathmoba*, *Rabbathmoma*, and *Ratba* or *Robba Moabitis* (Reland, pp. 957, 226; Seetzen, *Reisen*, iv. 227; Ritter, p. 1220). This name was for a time displaced by Areopolis, in the same manner that Rab-

bath-Ammon had been by Philadelphia: these, however, were but the names imposed by the temporary masters of the country, and employed by them in their official documents, and when they passed away, the original names, which had never lost their place in the mouths of the common people, reappeared, and *Rabba* and *Ammán* still remain to testify to the ancient appellations. *Rabba* lies on the highlands at the S. E. quarter of the Dead Sea, between *Kerak* and *Jibél Shihán*. Its ruins, which are unimportant, are described by Burckhardt (July 15), Seetzen (*Reisen*, i. 411), and De Sauley (Jan. 18).

3. (רַבִּי בִירָה, with the definite article: Σωθηβᾶ; Alex. Ἀρεββα: *Arebba*.) A city of Judah, named with Kirjath-jearim, in Josh. xv. 60 only. No trace of its existence has yet been discovered.

Coin of Philadelphia, showing the Tent or Shrine of Herakles, the Greek equivalent to Molech. Obv. AVT-KAICM-AVP-ANTONINVS, Bust of M. Aurelius, r. Rev.: ΦΙΑΚΟCYPHPAKAΛEION PMA [A. V. C. 690]. Shrine in quadriga, r. [ΦΙΑΛΑΔΕΑΦΕΩΝ ΚΟΙΑΗC CYPΙΑC ΗΡΑΚΛΕΙΟΝ].

4. In one passage (Josh. xi. 8) ZIDON is mentioned with the affix Rabbah — Zidon-rabbah. This is preserved in the margin of the A. V., though in the text it is translated "great Zidon." G.

**RAB'BATH OF THE CHILDREN OF AMMON, and R. OF THE AMMONITES.** (The former is the more accurate, the Hebrew being in both cases רַבַּת בְּנֵי עַמּוֹן: ἡ ἄκρα τῶν υἱῶν Ἀμμὼν [*Amūn*, Vat. 1], Παββᾶθ υἱῶν Ἀμμων: *Rabbath filiorum Ammon*). This is the full appellation of the place commonly given as RABBAH. It occurs only in Deut. iii. 11 and Ez. xxi. 20. The *th* is merely the Hebrew mode of connecting a word ending in *ah* with one following it. (Comp. RAMATH, GIBEATH, KIRJATH, etc.) G.

**RAB'BI** (רַבִּי: Παββί). A title of respect given by the Jews to their doctors and teachers, and often addressed to our Lord (Matt. xxiii. 7, 8, xxvi. 25, 49; Mark ix. 5, xi. 21, xiv. 45; John i. 38, 49, iii. 2, 26, iv. 31, vi. 25, ix. 2, xi. 8). The meaning of the title is interpreted in express words by St. John, and by implication in St. Matthew, to mean Master, Teacher; Διδάσκαλε, John i. 38 (compare xi. 28, xiii. 13), and Matt. xxiii. 8, where recent editors (Tischendorf, Wordsworth, Alford), on the authority of MSS., read δ διδάσκαλος, instead of δ καθηγητής of the Textus Receptus. The same interpretation is given by St. John of the kindred title RABBONI, Παββονί (John xx. 16), which also occurs in Mark x. 35, where the Textus Receptus, with less authority, spells the word Παββονί. The reading in John xx. 16 which has perhaps the greatest weight of authority,

makes an addition to the common text: "He turned herself and said unto Him, in the Hebrew tongue (Ἑβραϊστί), Rabboni; which is to say, Master." The ך which is added to these titles,

רב (*rab*) and רבון (*rabbôn*) or רבן (*rabbân*), has been thought to be the pronominal affix "My;" but it is to be noted that St. John does not translate either of these by "My Master," but simply "Master," so that the ך would seem to have lost any especial significance as a possessive pronoun intimating appropriation or endearment, and, like the "my" in titles of respect among ourselves, or in such terms as *Monseigneur*, *Monsieur*, to be merely part of the formal address. Information on these titles may be found in Lightfoot, *Harmony of the Four Evangelists*, John i. 38; *Horæ Hebraicæ et Talmulicæ*, Matt. xxiii. 7.

The Latin translation, Magister (connected with *magnus*, *magis*), is a title formed on the same principle as Rabbi, from *rab*, "great." *Rab* enters into the composition of many names of dignity and office. [RABSHAKEH; RAB-SARIS; RAB-MAG.]

The title Rabbi is not known to have been used before the reign of Herod the Great, and is thought to have taken its rise about the time of the disputes between the rival schools of Hillel and Shammai. Before that period the prophets and the men of the great synagogue were simply called by their proper names, and the first who had a title is said to be Simeon the son of Hillel, who is supposed by some to be the Simeon who took our Saviour in his arms in the Temple: he was called Rabban, and from his time such titles came to be in fashion. Rabbi was considered a higher title than Rab, and Rabban higher than Rabbi.

yet it was said in the Jewish books that greater he who was called by his own name than even he who was called Rabban. Some account of the Rabbis and the Mishnah and Talmudical writings may be found in Pridaux, *Connection*, part i. book 5, under the year b. c. 446; part ii. book 8, under the year b. c. 37; and a sketch of the history of the school of rabbinical learning at Tiberias, founded by Rabbi Judah Hakkodesh, the compiler of the Mishnah, in the second century after Christ, is given in Robinson's *Biblical Researches*, ii. 391. See also note 14 to Burton's *Bampton Lectures*, and the authorities there quoted, for instance, Brueker, vol. ii. p. 820, and Basnage, *Hist. des Juifs*, iii. 6, p. 138. E. P. E.

**RABBITH** (רַבִּית) [*the multitude*], with the def. article; [Rom. Δαβιρῶν; Vat. Δαβειρῶν; Alex. Παββωθ: *Rabboth*]. A town in the territory, perhaps on the boundary, of Issachar (Josh. xix. 20 only). It is not again mentioned, nor is anything yet known of it, or of the places named in company with it. G.

**RABBO'NI**, John xx. 16. [RABBI.]

**RAB-MAG'** (רַב־מַג) [see below]: 'Ραβ-μαγ, 'Ραβαμάχ; a *Rebmag* is found only in Jer. xxxix. 3 and 13. In both places it is a title borne by a certain Nergal-sharezzer, who is mentioned among the "princes" that accompanied Nebuchadnezzar to the last siege of Jerusalem. It has already been shown that Nergal-sharezzer is probably identical with the king, called by the Greeks Neriglissar, who ascended the throne of Babylon two years after the death of Nebuchadnezzar. [NERGAL-SHAREZZER.] This king, as well as certain other important personages, is found to bear the title in the Babylonian inscriptions. It is written indeed with a somewhat different vocalization, being read as *Rabu-Emga* by Sir H. Rawlinson. The signification is somewhat doubtful *Rabu* is most certainly "great," or "chief," an exact equivalent of the Hebrew רַב, whence Rabbi, "a great one, a doctor;" but *Mag*, or *Emga*, is an obscure term. It has been commonly identified with the word "Magus" (Gesenius, *ad voc.* מַג; Calmet, *Commentaire littéral*, vi. 203, &c.); but this identification is very uncertain, since an entirely different word — one which is read as *Magusu* — is used in that sense throughout the Behistun inscription (Oppert, *Expédition Scientifique en Mesopotamie*, ii. 209). Sir H. Rawlinson inclines to translate *emga* by "priest," but does not connect it with the Magi, who in the time of Neriglissar had no footing in Babylon. He regards this rendering, however, as purely conjectural, and thinks we can only say at present that the office was one of great power and dignity at the Babylonian court, and probably gave its possessor special facilities for obtaining the throne. G. R.

**RAB'SACES** ('Ραψάκης: *Rabsaces*). RAB-SHAKHEH (Ezech. xlvi. 18).

**RAB-SARIS** (רַב־סָרִיס) [see below]: 'Ραφίς; Vat. Ραφεις; Alex. Ραβαραιεις: *Rab-saris*). 1. An officer of the king of Assyria sent up with Tartan and Rabshakeh against Jerusalem in the time of Hezekiah (2 K. xviii. 17).

2. (Ναβουσαρελς; Alex. Ναβουσαρις: *Rab-*

a \* Rom. Vat. (as part of the preceding word) Ald. 'Ραβαμάθ; Alex. (also united with preceding word)

*sares*.) One of the princes of Nebuchadnezzar who was present at the capture of Jerusalem, b. c. 588, when Zedekiah, after endeavoring to escape, was taken and blinded and sent in chains to Babylon (Jer. xxxix. 3). Rab-saris is mentioned afterwards (ver. 13) among the other princes who at the command of the king were sent to deliver Jeremiah out of the prison.

Rab-saris is probably rather the name of an office than of an individual, the word signifying chief eunuch; in Dan. i. 3, Ashpenaz is called the master of the eunuchs (Rab-sarisim). Luther translates the word, in the three places where it occurs, as a name of office, the arch-chamberlain (der Erzkämmerer, der oberste Kämmerer). Josephus, *Ant. x. 8, § 2*, takes them as the A. V. does, as proper names. The chief officers of the court were present attending on the king; and the instance of the eunuch Narses would show that it was not impossible for Rab-saris to possess some of the qualities fitting him for a military command. In 2 K. xxv.

19, an eunuch (סָרִיס, *Sáris*, in the text of the A. V. "officer," in the margin "eunuch") is spoken of as set over the men of war; and in the sculptures at Nineveh "eunuchs are represented as commanding in war; fighting both on chariots and on horseback, and receiving the prisoners and the heads of the slain after battle" (Layard's *Nineveh*, vol. ii. p. 325).

It is not improbable that in Jeremiah xxxix. we have not only the title of the Rab-saris given, but his name also, either Sarschim (ver. 3) or (ver. 13) Nebu-shasban (worshipper of Nebo, Is. xlvi. 1), in the same way as Nergal-sharezzer is given in the same passages as the name of the Rab-mag.

E. P. E.

**RAB'SHAKHEH** (רַב־שָׁחֶה) [see below]: 'Ραψάκης, 2 K. xviii. xix.; 'Ραβσάκης, [Sin. Alex. Ραψακης.] Is. xxxvii. xxxvii.: *Rabsaces*). One of the officers of the king of Assyria sent against Jerusalem in the reign of Hezekiah. Sennacherib, having taken other cities of Judah, was now besieging Lachish, and Hezekiah, terrified at his progress, and losing for a time his firm faith in God, sends to Lachish with an offer of submission and tribute. This he strains himself to the utmost to pay, giving for the purpose not only all the treasures of the Temple and palace, but stripping off the gold plates with which he himself in the beginning of his reign had overlaid the doors and pillars of the house of the Lord (2 K. xviii. 16; 2 Chr. xxx. 3; see Rawlinson's *Bampton Lectures*, iv. 141; Layard's *Nineveh and Babylon*, p. 145). But Sennacherib, not content with this, his cupidity being excited rather than appeased, sends a great host against Jerusalem under Tartan, Rab-saris, and Rabshakeh; not so much, apparently, with the object of at present engaging in the siege of the city, as with the idea that, in its present disheartened state, the sight of an army, combined with the threats and specious promises of Rabshakeh, might induce a surrender at once.

In Es. xxxvi. xxxvii., Rabshakeh alone is mentioned, the reason of which would seem to be, that he acted as ambassador and spokesman, and came so much more prominently before the people than the others. Keil thinks that Tartan had the supreme command, inasmuch as in 2 K. he is

Ραμαβακ; Comp. 'Ραβαμάγ; the source of the form given above is not apparent. A.

mentioned first, and, according to Is. xx. 1, conducted the siege of Ashdod. In 2 Chr. xxxii., where, with the addition of some not unimportant circumstances, there is given an extract of these events, it is simply said that (ver. 9) "Sennacherib king of Assyria sent his servants to Jerusalem." Rabshakeh seems to have discharged his mission with much zeal, addressing himself not only to the officers of Hezekiah, but to the people on the wall of the city, setting forth the hopelessness of trusting to any power, human or divine, to deliver them out of the hand of "the great king, the king of Assyria," and dwelling on the many advantages to be gained by submission. Many have imagined, from the familiarity of Rabshakeh with Hebrew,<sup>a</sup> that he either was a Jewish deserter or an apostate captive of Israel. Whether this be so or not, it is not impossible that the assertion which he makes on the part of his master, that Sennacherib had even the sanction and command of the Lord Jehovah for his expedition against Jerusalem ("Am I now come up without the Lord to destroy it? The Lord said to me, Go up against this land to destroy it") may have reference to the prophecies of Isaiah (viii. 7, 8, x. 5, 6) concerning the desolation of Judah and Israel by the Assyrians, of which, in some form more or less correct, he had received information. Being unable to obtain any promise of submission from Hezekiah, who, in the extremity of his peril returning to trust in the help of the Lord, is encouraged by the words and predictions of Isaiah, Rabshakeh goes back to the king of Assyria, who had now departed from Lachish.

The English version takes Rabshakeh as the name of a person; it may, however, be questioned whether it be not rather the name of the office which he held at the court, that of chief cupbearer, in the same way as RAB-SARIS denotes the chief eunuch, and RAB-MAG possibly the chief priest.

Luther in his version is not quite consistent, sometimes (2 K. xviii. 17; Is. xxxvi. 2) giving Rabshakeh as a proper name, but ordinarily translating it as a title of office, arch-cupbearer (der Erzschenke).

The word Rab may be found translated in many places of the English version, for instance, 2 K. xxv. 8, 20; Jer. xxxix. 11; Dan. ii. 14 (רַב־טַבָּרִים), *Rab-tabbâchim*, "captain of the guard," in the margin "chief marshal," "chief of the execu-

tioners." Dan. i. 3, *Rab-sarisim*, "master of the eunuchs;" ii. 48 (רַב־סִבִּינִי), *Rab-sibnî*, "chief of the governors;" iv. 9, v. 11 (רַב־הַרְמַזְיָיִן), *Rab-chartammîn*, "master of the magicians;" Jonah i. 6 (רַב־הַחֲבֵלִים), *Rab-hachobêl*, "ship-master." It enters into the titles Rabbi, Rabboni, and the name Rabbah. [On this name see also Rawlinson's *Ancient Monarchies*, ii. 440 f.]

E. P. E.

RA'CA (Pacá), a term of reproach used by the Jews of our Saviour's age (Matt. v. 22). Critics are agreed in deriving it from the Chaldee term רַקִּיָּא with the sense of "worthless," but they differ as to whether this term should be connected with the root רַק, conveying the notion of emptiness (Gesen. *Thes.* p. 1279), or with one of the cognate roots רַקַּק (Tholuck), or רַקַּע (Ewald), conveying the notion of thinness (Olshausen, *De Wette*, on Matt. v. 22). The first of these views is probably correct. We may compare the use of רַיק, "vain," in Judg. ix. 4, xi. 3, *al.*, and of κενέ in Jam. ii. 20. W. L. B.

RACE. [GAMES, vol. i. p. 864.]

RA'CHAB (Pαχαβ: *Rahab*). RAHAB the harlot (Matt. i. 5).

RA'CHAL<sup>b</sup> (רַחֵל) [*traffic*]: [Alex. Pαχηλ; Comp. Pαχαλ: *Rachal*]. One of the places which David and his followers used to haunt during the period of his freebooting life, and to the people of which he sent a portion of the plunder taken from the Amalekites. It is named in 1 Sam. xxx. 29 only. The Vatican LXX. inserts five names in this passage between "Eshtemoa" and "the Jerahmeelites." The only one of these which has any similarity to Racial is Carmel, which would suit very well as far as position goes; but it is impossible to consider the two as identical without further evidence.<sup>c</sup> No name like Racial has been found in the south of Judah. G.

RA'CHEL (רַחֵל,<sup>d</sup> a *ewe*; the word *rahel* occurs in Gen. xxxi. 38, xxxii. 14; Cant. vi. 6; Is. liii. 7: A. V. rendered "ewe" and "sheep": Pαχηλ: *Rachel*). The younger of the daughters of Laban, the wife of Jacob, the mother of Joseph and Benjamin. The incidents of her life may be

<sup>a</sup> The difference between speaking in the Hebrew and the Aramæan, "in the Jews' language" (הִבְרִיתִי, J'hudith), and in the "Syrian language" (אַרְמִיתִי, Aramith), would be rather a matter of pronunciation and dialect than of essential difference of language. See for the "Syrian tongue," *Ezr.* iv. 7; *Dan.* ii. 4.

<sup>b</sup> In this name *ch* is sounded like hard *c*, as the representative of the Hebrew *cap*. In Rachel, on the other hand, it represents *cheth*, and should properly be pronounced like a guttural *h* (see A. V. of *Jer.* cxxi. 15).

<sup>c</sup> Thenius, with his usual rashness, says "Racial is residuum of Carmel."

<sup>d</sup> It is not obvious how our translators came to spell the name רַחֵל as they do in their final revision of 1811, namely, Rachel. Their practice—almost, if not quite, invariable—throughout the Old Test. of

that edition, is to represent ח, the hard guttural aspirate, by *h* (e. g. Halah for חַלַּח): the *ch* (hard.

of course) they reserve with equal consistency for כ. On this principle Rachel should have been given throughout "Rahel," as indeed it is in one case, retained in the most modern editions—*Jer.* xxxi. 15. And in the earlier editions of the English Bible (e. g. 1540, 1551, 1566) we find Rahel throughout. It is difficult not to suspect that Rachel (however originating) was a favorite woman's name in the latter part of the 16th and beginning of the 17th centuries, and that it was substituted for the less familiar though more accurate Rahel in deference to that fact, and in obedience to the rule laid down for the guidance of the translators, that "the names in the text are to be retained as used as may be, accordingly as they are vulgarly used."

Rachael (so common in the literature of a century ago) is a corruption as Rebecca of Rebekah G

found in Gen. xxix. - xxxiii., xxxv. The story of Jacob and Rachel has always had a peculiar interest; there is that in it which appeals to some of the deepest feelings of the human heart. The beauty of Rachel, the deep love with which she was loved by Jacob from their first meeting by the well of Haran, when he showed to her the simple courtesies of the desert life, and kissed her and told her he was Rebekah's son; the long servitude with which he patiently served for her, in which the seven years "seemed to him but a few days, for the love he had to her;" their marriage at last, after the cruel disappointment through the fraud which substituted the elder sister in the place of the younger; and the death of Rachel at the very time when in giving birth to another son her own long-delayed hopes were accomplished, and she had become still more endeared to her husband; his deep grief and ever-living regrets for her loss (Gen. xlviii. 7); these things make up a touching tale of personal and domestic history which has kept alive the memory of Rachel—the beautiful, the beloved, the untimely taken away—and has preserved to this day a reverence for her tomb; the very infidel invaders of the Holy Land having respected the traditions of the site, and erected over the spot a small rude shrine, which conceals whatever remains may have once been found of the pillar first set up by her mourning husband over her grave.

Yet from what is related to us concerning Rachel's character there does not seem much to claim any high degree of admiration and esteem. The discontented and fretful impatience shown in her grief at being for a time childless, moved even her fond husband to anger (Gen. xxx. 1, 2). She appears, moreover, to have shared all the duplicity and falsehood of her family, of which we have such painful instances in Rebekah, in Laban, and not least in her sister Leah, who consented to bear her part in the deception practiced upon Jacob. See, for instance, Rachel's stealing her father's images, and the ready dexterity and presence of mind with which she concealed her theft (Gen. xxxi.): we seem to detect here an apt scholar in her father's school of untruth. From this incident we may also infer (though this is rather the misfortune of her position and circumstances) that she was not altogether free from the superstitions and idolatry which prevailed in the land whence Abraham had been called (Josh. xxiv. 2, 14), and which still to some degree infected even those families among whom the true God was known.

The events which preceded the death of Rachel are of much interest and worthy of a brief consideration. The presence in his household of these idolatrous images, which Rachel and probably others also had brought from the East, seems to have been either unknown to or connived at by Jacob for some years after his return from Haran; till, on being reminded by the Lord of the vow which he had made at Bethel when he fled from the face of Esau, and being bidden by Him to erect an altar to the God who appeared to him there,

Jacob felt the glaring impiety of thus solemnly appearing before God with the taint of impiety cleaving to him or his, and "said to his household and all that were with him, Put away the strange gods from among you" (Gen. xxxv. 2). After thus casting out the polluting thing from his house, Jacob journeyed to Bethel, where, amidst the associations of a spot consecrated by the memories of the past, he received from God an emphatic promise and blessing, and, the name of the Supplanter being laid aside, he had given to him instead the holy name of Israel. Then it was, after his spirit had been there purified and strengthened by communion with God, by the assurance of the Divine love and favor, by the consciousness of evil put away and duties performed, then it was, as he journeyed away from Bethel, that the chastening blow fell and Rachel died. These circumstances are alluded to here not so much for their bearing upon the spiritual discipline of Jacob, but rather with reference to Rachel herself, as suggesting the hope that they may have had their effect in bringing her to a higher sense of her relations to that Great Jehovah in whom her husband, with all his faults of character, so firmly believed.

*Rachel's Tomb.*— "Rachel died and was buried in the way to Ephrath, which is Bethlehem. And Jacob set a pillar upon her grave: that is the pillar of Rachel's grave unto this day" (Gen. xxxv. 19, 20). As Rachel is the first recorded instance of death in childbearing, so this pillar over her grave is the first recorded example of the setting up of a sepulchral monument; caves having been up to this time spoken of as the usual places of burial. The spot was well known in the time of Samuel and Saul (1 Sam. x. 2); and the prophet Jeremiah, by a poetic figure of great force and beauty, represents the buried Rachel weeping for the loss and captivity of her children, as the bands of the exiles, led away on their road to Babylon, passed near her tomb (Jer. xxxi. 15-17). St. Matthew (ii. 17, 18) applies this to the slaughter by Herod of the infants at Bethlehem.

The position of the Ramah here spoken of is one of the disputed questions in the topography of Palestine; but the site of Rachel's tomb, "on the way to Bethlehem," "a little way<sup>a</sup> to come to Ephrath," "in the border of Benjamin," has never been questioned. It is about 2 miles S. of Jerusalem, and one mile N. of Bethlehem.<sup>b</sup> "It is one of the shrines which Muslims, Jews, and Christians agree in honoring, and concerning which their traditions are identical." It was visited by Maundrell, 1697. The description given by Dr. Robinson (i. 218) may serve as the representative of the many accounts, all agreeing with each other, which may be read in almost every book of eastern travel. It is "merely an ordinary Muslim Wely, or tomb of a holy person, a small square building of stone with a dome, and within it a tomb in the ordinary Mohammedan form, the whole plastered over with mortar. Of course the building is not ancient: in the seventh century there was here only a pyramid of stones. It is now neglected and falling to decay."<sup>c</sup>

<sup>a</sup> Hebrew *Cibrâh*; in the LXX. here, *xlviij. 7*, and *2 K. v. 19*, *Χαββαθά*. This seems to have been accepted as the name of the spot (Demetrius in *Eus. Pr. Er. ix 21*), and to have been actually encountered there by a traveller in the 12th cent. (Burchard de Strassburg, by Saint Genois, p. 35), who gives the Arabic name of Rachel's tomb as *Cabrata* or *Curbata*.

<sup>b</sup> The distance of Rachel's tomb is at least 5 miles from Jerusalem, and not more than half a mile from Bethlehem.

<sup>c</sup> Since Robinson's last visit, it has been enlarged by the addition of a square court on the east side with high walls and arches (*Later Researches*, 278).

though pilgrimages are still made to it by the Jews. The naked walls are covered with names in several languages, many of them in Hebrew. The general correctness of the tradition which has fixed upon this spot for the tomb of Rachel cannot well be drawn in question, since it is fully supported by the circumstances of the Scriptural narrative. It is also mentioned by the *Itin. Hieros.*, A. D. 333,

Rachel's Tomb.

and by Jerome (Ep. lxxxvi. *ad Eustoch.*, *Epitaph. Paulæ*) in the same century." a

Those who take an interest in such interpretations may find the whole story of Rachel and Leah allegorized by St. Augustine (*contra Faustum Manichæum*, xxii., li.-lviii. vol. viii. 432, etc., ed. Migne), and Justin Martyr (*Dialogue with Trypho*, c. 134, p. 360). E. P. E.

**RAD'DAI** (רדדאי) [*treading down*, Ges.]: [Vat.] Zaddai; [Rom.] Zaddai; [Alex. Paddai:] Joseph. Pάηλος: *Raddai*. One of David's brothers, fifth son of Jesse (1 Chr. ii. 14). He does not appear in the Bible elsewhere than in this list, unless he be, as Ewald conjectures (*Geschichte*, iii. 266 note), identical with REI. But this does not seem probable. Fürst (*Handb.* ii. 355 b) considers the final i of the name to be a remnant of Jah or Jehovah [= *J. is freedom*]. G.

**RA'GAU** (Ραγαυ: *Ragau*). 1. A place named only in Jud. i. 5, 15. In the latter passage the "mountains of Ragau" are mentioned. It is probably identical with RAGES.

2. One of the ancestors of our Lord, the son of Phalec (Luke iii. 35). He is the same person with REU son of Peleg; and the difference in the name arises from our translators having followed the Greek form, in which the Hebrew ר was frequently expressed by γ, as is the case in Raguel

(which once occurs for Reuel), Gomorrhah, Gōthō-liah (for Atholiah), Phogor (for Peor), etc. G.

**RA'GES** (Ράγες, Ράγοι: *Rages*) was an important city in northeastern Media, where that country bordered upon Parthia. It is not mentioned in the Hebrew Scriptures, but occurs frequently in the Book of Tobit (i. 14, v. 5, vi. 9, 12, &c.), and twice in Judith [in the form of RAGAU] (i. 5, 15) According to Tobit, it was a place to which some of the Israelitish captives taken by Shalmaneser (Enemessar) had been transported, and thither the angel Raphael conducted the young Tobiah. In the Book of Judith it is made the scene of the great battle between Nabuchodonosor and Arphaxad, wherein the latter is said to have been defeated and taken prisoner. Neither of these accounts can be regarded as historic; but the latter may conceal a fact of some importance in the history of the city.

Rages is a place mentioned by a great number of profane writers. It appears as Ragma in the Zendavesta, in Isidore, and in Stephen; as Raga in the inscriptions of Darius; Rhage in Duris of Samos (Fr. 25), Strabo (xi. 9, § 1), and Arrian (*Exp. Alex.* iii. 20); and Rhaga in Ptolemy (vi. 5). Properly speaking, Rages is a town, but the town gave name to a province, which is sometimes called Rages or Rhagæ, sometimes Rhagiana. It appears from the Zendavesta that here was one of the earliest settlements of the Aryans, who were mingled, in Rhagiara, with two other races, and were thus brought into contact with heretics (Bunsen, *Philosophy of Universal History*, iii. 485). Isidore calls Rages "the greatest city in Media" (p. 6), which

a \* For the grounds of the tradition that Rachel was buried in this place, see Dr. Robinson's argument, *Sab. Sacra*, i. 602 ff. H.

may have been true in his day; but other writers commonly regard it as much inferior to Ecbatana. It was the place to which *Fravartish* (Phraortes), the Median rebel, fled, when defeated by Darius Hystaspis, and at which he was made prisoner by one of Darius' generals (*Bch. Inscr.* col. ii. par. 13). [MEDIA.] This is probably the fact which the apocryphal writer of Judith had in his mind when he spoke of Arphaxad as having been captured at Raguel. When Darius Codomanus fled from Alexander, intending to make a final stand in Bactria, he must have passed through Rages on his way to the Caspian Gates; and so we find that Alexander arrived there in pursuit of his enemy, on the eleventh day after he quitted Ecbatana (Arrian, *Exp. Alex.* iii. 20). In the troubles which followed the death of Alexander, Rages appears to have gone to decay, but it was soon after rebuilt by Seleucus I. (Nicator), who gave it the name of Europus (Strab. xi. 13, § 6; Steph. Byz. *ad voc.*). When the Parthians took it, they called it Arsacia, after the Arsaces of the day; but it soon afterwards recovered its ancient appellation, as we see by Strabo and Isidore. That appellation it has ever since retained, with only a slight corruption, the ruins being still known by the name of *Rhey*. These ruins lie about five miles southeast of Teheran, and cover a space 4,500 yards long by 3,500 yards broad. The walls are well marked, and are of prodigious thickness; they appear to have been flanked by strong towers, and are connected with a lofty citadel at their northeastern angle. The importance of the place consisted in its vicinity to the Caspian Gates, which, in a certain sense, it guarded. Owing to the barren and desolate character of the great salt desert of Iran, every army which seeks to pass from Bactria, India, and Afghanistan to Media and Mesopotamia, or *vice versa*, must skirt the range of mountains which runs along the southern shore of the Caspian. These mountains send out a rugged and precipitous spur in about long. 52° 25' E. from Greenwich, which runs far into the desert, and can only be rounded with the extremest difficulty. Across this spur is a single pass, — the Pylæ Caspiæ of the ancients, — and of this pass the possessors of Rages must have at all times held the keys. The modern Teheran, built out of its ruins, has now superseded *Rhey*; and it is perhaps mainly from the importance of its position that it has become the Persian capital. (For an account of the ruins of *Rhey*, see Ker Porter's *Travels*, i. 357-364; and compare Fraser's *Khorassan*, p. 286.)

G. R.

RAGU'EL, or REU'EL (רַעוּאֵל [*friend of God*]: ראַגוּאֵל: *Raguel*). 1. A prince-priest of Midian, the father of Zipporah according to Ex. ii. 21, and of Hobab according to Num. x. 29. As the father-in-law of Moses is named Jethro in Ex. iii. 1, and Hobab in Judg. iv. 11, and perhaps in Num. x. 29 (though the latter passage admits of another sense), the *primâ facie* view would be that Raguel, Jethro, and Hobab were different names for the same individual. Such is probably the case with regard to the two first at all events, if not with the third. [HOBAB.] One of the names may represent an official title, but whether Jethro or Raguel, is uncertain, both being appropriately

significant: <sup>a</sup> Josephus was in favor of the former (τούτο, i. e. Ἰεθραῖος, ἦν ἐπίκλημα τῶ Ῥαγουήλω, *Ant.* ii. 12, § 1), and this is not unlikely, as the name Reuel was not an uncommon one. The identity of Jethro and Reuel is supported by the indiscriminate use of the names in the LXX. (Ex. ii. 16, 18); and the application of more than one name to the same individual was a usage familiar to the Hebrews, as instanced in Jacob and Israel, Solomon and Jedidiah, and other similar cases. Another solution of the difficulty has been sought in the loose use of terms of relationship among the Hebrews; as that *chôthên*,<sup>b</sup> in Ex. iii. 1, xviii. 1; Num. x. 29, may signify any relation by marriage, and consequently that Jethro and Hobab were brothers-in-law of Moses; or that the terms *ab c* and *bath d* in Ex. ii. 16, 21, mean *grandfather* and *granddaughter*. Neither of these assumptions is satisfactory, the former in the absence of any corroborative evidence, the latter because the omission of Jethro the father's name in so circumstantial a narrative as in Ex. ii. is inexplicable, nor can we conceive the indiscriminate use of the terms father and grandfather without good cause. Nevertheless this view has a strong weight of authority in its favor, being supported by the Targum Jonathan, Aben Ezra, Michaelis, Winer, and others.

W. L. B.

2. Another transcription of the name REUEL, occurring in Tobit, where Raguel, a pious Jew of "Ecbatana, a city of Media," is father of Sara the wife of Tobias (Tob. iii. 7, 17, &c.). The name was not uncommon, and in the book of Enoch it is applied to one of the great guardian angels of the universe, who was charged with the execution of the Divine judgments on the (material) world and the stars (cc. xx. 4, xxiii. 4, ed. Dillmann).

B. F. W.

RA'HAB, or RA'CHAB (רַחַב [*broad, large*]: ראַחַב, and ראַחַב: *Rahab*, and *Raah*), a celebrated woman of Jericho, who received the spies sent by Joshua to spy out the land, hid them in her house from the pursuit of her countrymen, was saved with all her family when the Israelites sacked the city, and became the wife of Salmon, and the ancestress of the Messiah.

Her history may be told in a few words. At the time of the arrival of the Israelites in Canaan she was a young unmarried woman, dwelling in a house of her own alone, though she had a father and mother, and brothers and sisters, living in Jericho. She was a "harlot," and probably combined the trade of lodging-keeper for wayfaring men. She seems also to have been engaged in the manufacture of linen and the art of dyeing, for which the Phœnicians were early famous; since we find the flat roof of her house covered with stalks of flax put there to dry, and a stock of scarlet or crimson (צַרְבָּת) line in her house: a circumstance which, coupled with the mention of Babylonish garments at Josh. vii. 21, as among the spoils of Jericho, indicates the existence of a trade in such articles between Phœnicia and Mesopotamia. Her house was situated on the wall, probably near the town gate so as to be convenient for persons coming in and going out of the city. Traders coming from Mesopotamia or Egypt to Phœnicia would frequently

<sup>a</sup> Jethro = "preëminent," from יְתָר, "to excel,"

and Raguel = "friend of God," from רַעוּאֵל.

<sup>b</sup> חוֹתֵן.

<sup>c</sup> אָב.

<sup>d</sup> בַּת.

pass through Jericho, situated as it was near the fords of the Jordan; and of these many would report to the house of Rahab. Rahab therefore had been well informed with regard to the events of the Exodus. She had heard of the passage through the Red Sea, of the utter destruction of Sihon and Og, and of the irresistible progress of the Israelitish host. The effect upon her mind had been what one would not have expected in a person of her way of life. It led her to a firm faith in Jehovah as the true God, and to the conviction that He purposed to give the land of Canaan to the Israelites. When therefore the two spies sent by Joshua came to her house, they found themselves under the roof of one who, alone probably of the whole population, was friendly to their nation. Their coming, however, was quickly known; and the king of Jericho, having received information of it while at supper, according to Josephus, sent that very evening to require her to deliver them up. It is very likely that, her house being a public one, some one who resorted there may have seen and recognized the spies, and gone off at once to report the matter to the authorities. But not without awakening Rahab's suspicions; for she immediately hid the men among the flax-stalks which were piled on the flat roof of her house, and, on the arrival of the officers sent to search her house, was ready with the story that two men, of what country she knew not, had, it was true, been to her house, but had left it just before the gates were shut for the night. If they pursued them at once, she added, they would be sure to overtake them. Misled by the false information, the men started in pursuit to the fords of the Jordan, the gates having been opened to let them out, and immediately closed again. When all was quiet, and the people were gone to bed, Rahab stole up to the house-top, told the spies what had happened, and assured them of her faith in the God of Israel, and her confident expectation of the capture of the whole land by them; an expectation, she added, which was shared by her countrymen, and had produced a great panic amongst them. She then told them her plan for their escape. It was to let them down by a cord from the window of her house which looked over the city wall, and that they should flee into the mountains which bounded the plains of Jericho, and lie hid there for three days, by which time the pursuers would have returned, and the fords of the Jordan be open to them again. She asked, in return for her kindness to them, that they should swear by Jehovah, that when their countrymen had taken the city they would spare her life, and the lives of her father and mother, brothers and sisters, and all that belonged to them. The men readily consented, and it was agreed between them that she should hang out her scarlet line at the window from which they had escaped, and bring all her family under her roof. If any of her kindred went out of doors into the street, his blood would be upon his own head, and the Israelites in that case would be guiltless. The event proved the wisdom of her precautions. The pursuers returned to Jericho after a fruitless search, and the spies got safe back to the Israelitish camp. The news they brought of the terror of the Canaanites doubtless inspired Israel with fresh courage, and, within three days of their return,

the passage of the Jordan was effected. In the utter destruction of Jericho which ensued, Joshua gave the strictest orders for the preservation of Rahab and her family; and accordingly, before the city was burnt, the two spies were sent to her house, and they brought out her, her father and mother, and brothers, and kindred, and all that she had, and placed them in safety in the Israelitish camp. The narrator adds, "and she dwelleth in Israel unto this day;" not necessarily implying that she was alive at the time he wrote, but that the family of strangers of which she was reckoned the head, continued to dwell among the children of Israel. May not the 345 "children of Jericho," mentioned in Ezr. ii. 34, Neh. vii. 36, and "the men of Jericho" who assisted Nehemiah in rebuilding the walls of Jerusalem (Neh. iii. 2), have been their posterity? Their continued sojourn among the Israelites, as a distinct family, would be exactly analogous to the cases of the Kenites, the house of Rechab, the Gibeonites, the house of Caleb, and perhaps others.

As regards Rahab herself, we learn from Matt. i. 5, that she became the wife of Salmon the son of Naasson, and the mother of Boaz, Jesse's grandfather. The suspicion naturally arises that Salmon may have been one of the spies whose life she saved, and that gratitude for so great a benefit led in his case to a more tender passion, and obliterated the memory of any past disgrace attaching to her name. We are expressly told that the spies were "young men" (Josh. vi. 23), νεανίσκους, ii. 1, LXX.; and the example of the former spies who were sent from Kadesh-Barnea, who were all "heads of Israel" (Num. xiii. 3), as well as the importance of the service to be performed, would lead one to expect that they would be persons of high station. But, however this may be, it is certain, on the authority of St. Matthew, that Rahab became the mother of the line from which sprung David, and eventually Christ; and there can be little doubt that it was so stated in the public archives from which the Evangelist extracted our Lord's genealogy, in which only four women are named, namely, Thamar, Rachab, Ruth, and Bathsheba, who were all apparently foreigners, and named for that reason. [BIBLICAL.] For that the Rahab mentioned by St. Matthew is Rahab the harlot, is as certain as that David in the genealogy is the same person as David in the books of Samuel. The attempts that have been made to prove Rachab different from Rahab,<sup>a</sup> in order to get out of the chronological difficulty, are singularly absurd, and all the more so, because, even if successful, they would not diminish the difficulty, as long as Salmon remains as the son of Naasson and the father of Boaz. However, as there are still found<sup>b</sup> those who follow Outhov in his opinion, or at least speak doubtfully, it may be as well to call attention, with Dr. Mill (p. 131), to the exact coincidence in the age of Salmon, as the son of Nahshon, who was prince of the children of Judah in the wilderness, and Rahab the harlot; and to observe that the only conceivable reason for the mention of Rachab in St. Matthew's genealogy is, that she was a remarkable and well-known person, as Tamar, Ruth, and Bathsheba were.<sup>c</sup> The mention of an utterly un-

<sup>a</sup> Chiefly by Outhov, a Dutch professor, in the *Biblioth. Bremens.* The earliest expression of any doubt is by Theophylact in the 11th century.

<sup>b</sup> Valpy's Greek Test. with Eng. notes, on Matt. i. 5; Burlington, *On the Genealogies*, i. 192-4, &c.; Kuinoel on Matt. i. 5; Olshausen, *ib.*

<sup>c</sup> There does not seem to be any force in Bengel's

known Rahab in the line would be absurd. The allusions to "Rahab the harlot" in Heb. xi. 31, Jam. ii. 25, by classing her among those illustrious for their faith, make it still more impossible to suppose that St. Matthew was speaking of any one else. The four successive generations, Nahshon, Salmon, Boaz, Obed, are consequently as certain as words can make them.

The character of Rahab has much and deep interest. Dismissing as inconsistent with truth, and with the meaning of  $\text{רַבֵּיב}$  and  $\text{πορνή}$ , the attempt to clear her character of stain by saying that she was only an innkeeper, and not a harlot ( $\text{πανδοκευρία}$ , Chrysostom and Chald. Vers.), we may yet notice that it is very possible that to a woman of her country and religion such a calling may have implied a far less deviation from the standard of morality than it does with us ("vitæ genus vile magis quam flagitiosum" Grotius), and, moreover, that with a purer faith she seems to have entered upon a pure life.

As a case of casuistry, her conduct in deceiving the king of Jericho's messengers with a false tale, and, above all, in taking part against her own countrymen, has been much discussed. With regard to the first, strict truth, either in Jew or heathen, was a virtue so utterly unknown before the promulgation of the Gospel, that, as far as Rahab is concerned, the discussion is quite superfluous. The question as regards ourselves, whether in any case a falsehood is allowable, say to save our own life or that of another, is different, but need not be argued here.<sup>a</sup> With regard to her taking part against her own countrymen, it can only be justified, but is fully justified, by the circumstance that fidelity to her country would in her case have been infidelity to God, and that the higher duty to her Maker eclipsed the lower duty to her native land. Her anxious provision for the safety of her father's house shows how alive she was to natural affections, and seems to prove that she was not influenced by a selfish insensibility, but by an enlightened preference for the service of the true God over the abominable pollutions of Canaanite idolatry. If her own life of shame was in any way connected with that idolatry, one can readily understand what a further stimulus this would give, now that her heart was purified by faith, to her desire for the overthrow of the nation to which she belonged by birth, and the establishment of that to which she wished to belong by a community of faith and hope. Anyhow, allowing for the difference of circumstances, her feelings and conduct were analogous to those of a Christian Jew in St. Paul's time, who should have preferred the triumph of the Gospel to the triumph of the old Judaism; or to those of a converted Hindoo in our own days, who should side with Christian Englishmen against the attempts of his own countrymen to establish the supremacy either of Brahma or Mohammed.

This view of Rahab's conduct is fully borne out by the references to her in the N. T. The author of the Epistle to the Hebrews tells us that "by faith

the harlot Rahab perished not with them that believed not, when she had received the spies with peace" (Heb. xi. 31); and St. James fortifies his doctrine of justification by works, by asking, "Was not Rahab the harlot justified by works, when she had received the messengers, and had sent them out another way?" (Jam. ii. 25.) And in like manner Clement of Rome says, "Rahab the harlot was saved for her faith and hospitality" (*ad Corinth. xii.*).

The Fathers generally (miro consensu, *Jacobson*) consider the deliverance of Rahab as typical of salvation, and the scarlet line hung out at her window as typical of the blood of Jesus, in the same way as the ark of Noah and the blood of the paschal lamb were; a view which is borne out by the analogy of the deliverances, and by the language of Heb. xi. 31 ( $\text{τοῖς ἀπειθήσασιν}$ , "the disobedient"), compared with 1 Pet. iii. 20 ( $\text{ἀπειθήσασιν ποτε}$ ). Clement (*ad Corinth. xii.*) is the first to do so. He says that by the symbol of the scarlet line it was "made manifest that there shall be redemption through the blood of the Lord to all who believe and trust in God;" and adds, that Rahab in this was a prophetic as well as a believer, a sentiment in which he is followed by Origen (*in lib. Jes., Hom. iii.*). Justin Martyr in like manner calls the scarlet line "the symbol of the blood of Christ, by which those of all nations, who once were harlots and unrighteous, are saved;" and in a like spirit Irenæus draws from the story of Rahab the conversion of the Gentiles, and the admission of publicans and harlots into the kingdom of heaven through the symbol of the scarlet line, which he compares with the Passover and the Exodus. Ambrose, Jerome, Augustine (who, like Jerome and Cyril, takes Ps. lxxxvii. 4 to refer to Rahab the harlot), and Theodoret, all follow in the same track; but Origen, as usual, carries the allegory still further. Irenæus makes the singular mistake of calling the spies *three*, and makes them symbolical of the Trinity! The comparison of the scarlet line with the scarlet thread which was bound round the hand of Zarah is a favorite one with them.<sup>b</sup>

The Jews, as might perhaps be expected, are embarrassed as to what to say concerning Rahab. They praise her highly for her conduct; but some Rabbis give out that she was not a Canaanite, but of some other Gentile race, and was only a sojourner in Jericho. The Gemara of Babylon mentions a tradition that she became the wife of Joshua, a tradition unknown to Jerome (*adv. Jovin.*), and eight persons who were both priests and prophets sprung from her, and also Huldah the prophetess, mentioned 2 K. xxii. 14 (see Patrick, *ad loc.*). Josephus describes her as an innkeeper, and her house as an inn ( $\text{καταγώγιον}$ ), and never applies to her the epithet  $\text{πόρνη}$ , which is the term used by the LXX.

Rahab is one of the not very numerous cases of the calling of Gentiles before the coming of Christ; and her deliverance from the utter destruction which fell upon her countrymen is so beautifully illustrative of the salvation revealed in the Gospel

emark, adopted by Olshausen, that the article ( $\text{ἐκ τῆς Παχάβ}$ ) proves that Rahab of Jericho is meant, seeing that all the proper names in the genealogy, which are in the oblique case, have the article, though many of them occur nowhere else; and that it is omitted before  $\text{Μαρία}$  in ver. 16.

<sup>a</sup> The question, in reference both to Rahab and to

Christians, is well discussed by Augustine *contr. Mendacium* (*Opp. vi.* 33, 34: comp. Bullinger, *5d Dec. Serm. iv.*).

<sup>b</sup> Bullinger (*5th Dec. Serm. vi.*) views the line as sign and seal of the covenant between the Israelites and Rahab.

that it is impossible not to believe that it was in the fullest sense a type of the redemption of the world by Jesus Christ.

**RAHAB** (רַהַב) [in Ps. lxxxvii. 4] ראב: *Rahab* [Job xxvi. 12, τὸ κήρος, Ps. lxxxix. 10, δπερήφανος; Is. li. 9, LXX. omit: *superbus*], a poetical name of Egypt. The name signifies "fierceness, insolence, pride;" if Hebrew, when applied to Egypt, it would indicate the national character of the inhabitants. Gesenius thinks it was probably of Egyptian origin, but accommodated to Hebrew, although no likely equivalent has been found in Coptic, or, we may add, in ancient Egyptian (*Theo. s. v.*). That the Hebrew meaning is alluded to in connection with the proper name, does not seem to prove that the latter is Hebrew, but this is rendered very probable by its apposite character, and its sole use in poetical books.

This word occurs in a passage in Job, where it is usually translated, as in the A. V., instead of being treated as a proper name. Yet if the passage be compared with parallel ones, there can scarcely be a doubt that it refers to the Exodus, "He divideth the sea with His power, and by His understanding He smiteth through the proud" [or "Rahab"] (xxvi. 12). The prophet Isaiah calls on the arm of the Lord, "[Art] not thou it that hath cut Rahab [and] wounded the dragon? [Art] not thou it which hath dried the sea, the waters of the great deep; that hath made the depths of the sea a way for the ransomed to pass over?" (li. 9, 10; comp. 15). In Ps. lxxiv. the division of the sea is mentioned in connection with breaking the heads of the dragons and the heads of the leviathan (13, 14). So too in Ps. lxxxix. God's power to subdue the sea is spoken of immediately before a mention of his having "broken Rahab in pieces" (9, 10). Rahab, as a name of Egypt, occurs once only without reference to the Exodus: this is in Psalm lxxxvii., where Rahab, Babylon, Philistia, Tyre, and Cush are compared with Zion (4, 5). In one other passage the name is alluded to, with reference to its Hebrew signification, where it is prophesied that the aid of the Egyptians should not avail those who sought it, and this sentence follows: רַהַב הֵם שִׁבְרָה, "Insolence [i. e. the insolent], they sit still" (Is. xxx. 7), as Gesenius says, considering it to be undoubtedly a proverbial expression.

R. S. P.

**RAHAM** (רַחַם) [*womb, maiden*]: ראם: [Vat. *Psalm.*] *Raham*). In the genealogy of the descendants of Caleb the son of Hezron (1 Chr. ii. 44), Raham is described as the son of Shema and father

of Jorkoam. Rashi and the author of the *Quest. in Paral.*, attributed to Jerome, regard Jorkoam as a place, of which Raham was founder and prince.

**RAHEL** (רַחֵל) [*ewe, sheep*]: ראחל: *Rachel*. The more accurate form of the familiar name elsewhere rendered RACHEL. In the older English versions it is employed throughout, but survives in the Authorized Version of 1611, and in our present Bibles, in Jer. xxxi. 15 only. G.

**RAIN**. מָטָר (*mâtâr*), and also גֶּשֶׁם (*geshem*), which, when it differs from the common word מָטָר, signifies a more violent rain; it is also used as a generic term, including the early and latter rain (Jer. v. 24; Joel ii. 23).

**EARLY RAIN**, the rains of the autumn, יוֹרֵה (*yôreh*), part. subst. from יָרָה, "he scattered" (Deut. xi. 14; Jer. v. 24); also the hiphil part. מוֹרֵה (Joel ii. 23): *ὄρετος πρώϊμος*, LXX.

**LATTER RAIN**, the rain of spring, מְלִיקוֹשׁ (*mîkôsh*) (Prov. xvi. 15; Job xxix. 23; Jer. iii. 3; Hos. vi. 3; Joel ii. 23; Zech. x. 1); *ὄρετος ὄψϊμος*. The early and latter rains are mentioned together (Deut. xi. 14; Jer. v. 24; Joel ii. 23; Hos. vi. 3; James v. 7).

Another word, of a more poetical character, is רִבִּיבִים (*rebîbîm*, a plural form, connected with *rab*, "many," from the multitude of the drops), translated in our version "showers" (Deut. xxxii. 2; Jer. iii. 3, xiv. 22; Mic. v. 7 (Heb. 6); Ps. lxx. 10 (Heb. 11), lxxii. 6). The Hebrews have also the word זֶרֶם (*zêrem*), expressing violent rain, storm, tempest, accompanied with hail — in Job xxiv. 8, the heavy rain which comes down on mountains; and the word סַגְרִיר (*sagrîr*), which occurs only in Prov. xxvii. 15, continuous and heavy rain, *ἐν ἡμέρᾳ χειμερινῇ*.

In a country comprising so many varieties of elevation as Palestine, there must of necessity occur corresponding varieties of climate; an account that might correctly describe the peculiarities of the district of Lebanon, would be in many respects inaccurate when applied to the deep depression and almost tropical climate of Jericho. In any general statement, therefore, allowance must be made for not inconsiderable local variations. Compared with England, Palestine would be a country in which rain would be much less frequent than with ourselves; contrasted with the districts most familiar to the children of Israel before their settlement in the land of promise, Egypt and the Desert, rain might be spoken of as one of its distinguishing characteristics (Deut. xi. 10, 11; Herodotus iii. 10). For six months in the year no rain falls, and the harvests are gathered in without any of the anxiety with which we are so familiar lest the work be interrupted by unseasonable storms. In this respect at least the climate has remained unchanged since the time when Boaz slept by his heap of corn; and the sending thunder and rain in wheat harvest was a miracle which filled the people with fear and wonder (1 Sam. xii. 16-18); and Solomon could speak of "rain in harvest" as the most forcible expression for conveying the idea of something utterly out of place and unnatural (Prov. xxvi. 1). There are, however, very considerable, and perhaps more than compensating, disadvantages occasi ned

by this long absence of rain: the whole land becomes dry, parched, and brown, the cisterns are empty, the springs and fountains fail, and the autumnal rains are eagerly looked for to prepare the earth for the reception of the seed. These, the early rains, commence about the latter end of October or beginning of November, in Lebanon the year earlier: not suddenly but by degrees; the husbandman has thus the opportunity of sowing his fields of wheat and barley. The rains come mostly from the west or southwest (Luke xii. 54), continuing for two or three days at a time, and falling chiefly during the night; the wind then shifts round to the north or east, and several days of fine weather succeed (Prov. xxv. 23). During the months of November and December the rains continue to fall heavily, but at intervals; afterwards they return, only at longer intervals, and are less heavy; but at no period during the winter do they entirely cease. January and February are the coldest months, and snow falls sometimes to the depth of a foot or more, at Jerusalem, but it does not lie long; it is very seldom seen along the coast and in the low plains. Thin ice occasionally covers the pools for a few days, and while Porter was writing his Handbook, the snow was eight inches deep at Damascus, and the ice a quarter of an inch thick. Rain continues to fall more or less during the month of March; it is very rare in April, and even in Lebanon the showers that occur are generally light. In the valley of the Jordan the barley harvest begins as early as the middle of April, and the wheat a fortnight later; in Lebanon the grain is seldom ripe before the middle of June. (See Robinson, *Biblical Researches*, i. 429; and Porter, *Handbook*, p. xlviii.) [PALESTINE, p. 2318.]

With respect to the distinction between the early and the latter rains, Robinson observes that there are not at the present day "any particular periods of rain or succession of showers, which might be regarded as distinct rainy seasons. The whole period from October to March now constitutes only one continued season of rain without any regularly intervening term of prolonged fine weather. Unless, therefore, there has been some change in the climate, the early and the latter rains for which the husbandman waited with longing, seem rather to have implied the first showers of autumn which revived the parched and thirsty soil and prepared it for the seed; and the later showers of spring which continued to refresh and forward both the ripening crops and the vernal products of the fields." (James v. 7; Prov. xvi. 15).

In April and May the sky is usually serene; showers occur occasionally, but they are mild and refreshing. On the 1st of May Robinson experienced showers at Jerusalem, and "at evening there was thunder and lightning (which are frequent in winter), with pleasant and reviving rain. The 6th of May was also remarkable for thunder and for several showers, some of which were quite heavy. The rains of both these days extended far to the north, . . . but the occurrence of rain so late in the season was regarded as a very unusual circum-

stance." (*Bibl. Res.* i. 430: he is speaking of the year 1838.)

In 1856, however, "there was very heavy rain accompanied with thunder all over the region of Lebanon, extending to Beirut and Damascus, on the 28th and 29th of May; but the oldest inhabitant had never seen the like before, and it created, says Porter (*Handbook*, xlviii.), almost as much astonishment as the thunder and rain which Samuel brought upon the Israelites during the time of wheat harvest."

During Dr. Robinson's stay at Beirut on his second visit to Palestine, in 1852, there were heavy rains in March, once for five days continuously, and the weather continued variable, with occasional heavy rain, till the close of the first week in April. The "latter rains" thus continued this season for nearly a month later than usual, and the result was afterwards seen in the very abundant crops of winter grain (Robinson, *Bibl. Res.* iii. 9).<sup>a</sup>

These details will, it is thought, better than any generalized statement, enable the reader to form his judgment on the "former" and "latter" rains of Scripture, and may serve to introduce a remark or two on the question, about which some interest has been felt, whether there has been any change in the frequency and abundance of the rain in Palestine, or in the periods of its supply. It is asked whether "these stony hills, these deserted valleys," can be the land flowing with milk and honey; the land which God cared for; the land upon which were always the eyes of the Lord, from the beginning of the year to the end of the year (Deut. xi. 12). As far as relates to the other considerations which may account for diminished fertility, such as the decrease of population and industry, the neglect of terrace-culture and irrigation, and husbanding the supply of water, it may suffice to refer to the article on AGRICULTURE, and to Stanley (*Sinai and Palestine*, pp. 120-123). With respect to our more immediate subject, it is urged that the very expression "flowing with milk and honey" implies abundant rains to keep alive the grass for the pasture of the numerous herds supplying the milk, and to nourish the flowers clothing the now bare hill-sides, from whence the bees might gather their stores of honey. It is urged that the supply of rain in its due season seems to be promised as contingent upon the fidelity of the people (Deut. xi. 13-15; Lev. xxvi. 3-5) and that as from time to time, to punish the people for their transgressions, "the showers have been withholden, and there hath been no latter rain" (Jer. iii. 3; 1 K. xvii. xviii.), so now, in the great and long-continued apostasy of the children of Israel, there has come upon even the land of their forfeited inheritance a like long-continued withdrawal of the favor of God, who claims the sending of rain as one of His special prerogatives (Jer. xiv. 22).

The early rains, it is urged, are by comparison scanty and interrupted, the latter rains have altogether ceased, and hence, it is maintained, the curse has been fulfilled, "Thy heaven that is over thy head shall be brass, and the earth that is under

<sup>a</sup> \* For a diary of the weather at Beirut from April, 1842, to May, 1843, by Dr. De Forest, see *Climatology of Palestine* in the *Fibl. Sacra*, i. 221-224. The months of greatest rain were November, December, and January, and of least, June, July, August, and September. Of the climate of Nazareth in this and other

respects, Tobler gives full information in his *Nazareth in Palastina*, pp. 6-11. Thomson mentions (*Land and Book*, ii. 66) that in Palestine the rain frequently falls very unequally, so as to water one city or field and pass over the next (comp. Am. iv. 7, 8). M.

these shall be iron. The Lord shall make the rain of thy land powder and dust" (Deut. xxviii. 23, 24; Lev. xxvi. 19). Without entering here into the consideration of the justness of the interpretation which would assume these predictions of the withholding of rain to be altogether different in the manner of their infliction from the other calamities denounced in these chapters of threatening, it would appear that, as far as the question of fact is concerned, there is scarcely sufficient reason to imagine that any great and marked changes with respect to the rains have taken place in Palestine. In early days, as now, rain was unknown for half the year; and if we may judge from the allusions in Prov. xvi. 15, Job xxix. 23, the latter rain was even then, while greatly desired and longed for, that which was somewhat precarious, by no means to be absolutely counted on as a matter of course. If we are to take as correct our translation of Joel ii. 23, "the latter rain in the first (month <sup>a</sup>)," i. e. Nisan or Abib, answering to the latter part of March and the early part of April, the times of the latter rain in the days of the prophets would coincide with those in which it falls now. The same conclusion would be arrived at from Amos iv. 7 "I have withholden the rain from you when there were yet three months to the harvest." The rain here spoken of is the latter rain, and an interval of three months between the ending of the rain and the beginning of harvest would seem to be in an average year as exceptional now as it was when Amos noted it as a judgment of God. We may infer also from the Song of Solomon ii. 11-13, where is given a poetical description of the bursting forth of vegetation in the spring, that when the "winter" was past, the rain also was over and gone: we can hardly, by any extension of the term "winter," bring it down to a later period than that during which the rains still fall. [See PALESTINE, p. 2318.]

It may be added that travellers have, perhaps unconsciously, exaggerated the barrenness of the land, from confining themselves too closely to the southern portion of Palestine; the northern portion, Galilee, of such peculiar interest to the readers of the Gospels, is fertile and beautiful (see Stanley, *Sinai and Palestine*, chap. x., and Van de Velde, there quoted), and in his description of the valley of *Nablus*, the ancient Shechem, Robinson (*Bibl. Res.* ii. 275) becomes almost enthusiastic: "Here a scene of luxuriant and almost unparalleled verdure burst upon our view. The whole valley was filled with gardens of vegetables and orchards of all kinds of fruits, watered by several fountains, which burst forth in various parts and flow westward in refreshing streams. It came upon us suddenly, like a scene of fairy enchantment. We saw nothing like it in all Palestine." The account given by a recent lady traveller (*Egyptian Sepulchres and Syrian Shrines*, by Miss Beauport) of the luxuriant fruit-trees and vegetables which she saw at Meshullam's farm in the valley of *Urtas*, a little south of *Bethlhem* (possibly the site of Solomon's gardens, Eccl. ii. 4-6),

<sup>a</sup> The word "month" is supplied by our translators, and their rendering is not supported by either the *LXX.* (*καθὼς ἐμπροσθεν*) or the *Vulg.* (*sicut in principio*). Another interpretation is indeed equally probable; but the following passages, Gen. viii. 13, Num. ix. 5, Ez. cxix. 17, xlv. 18, 21, justify the rendering *בְּרִאשִׁית* 'at the first (m: nth

may serve to prove how much now, as ever, may be effected by irrigation.<sup>b</sup>

Rain frequently furnishes the writers of the Old Testament with forcible and appropriate metaphors, varying in their character according as they regard it as the beneficent and fertilizing shower, or the destructive storm pouring down the mountain-side and sweeping away the labor of years. Thus Prov. xxviii. 3, of the poor that oppresseth the poor; Ez. xxxviii. 22, of the just punishments and righteous vengeance of God (compare Ps. xi. 6; Job xx. 23). On the other hand, we have it used of speech wise and fitting, refreshing the souls of men; of words earnestly waited for and heedfully listened to (Deut. xxxii. 2; Job xxix. 23); of the cheering favor of the Lord coming down once more upon the penitent soul; of the gracious presence and influence for good of the righteous king among his people; of the blessings, gifts, and graces of the reign of the Messiah (Hos. vi. 3; 2 Sam. xxiii. 4; Ps. lxxii. 6). E. P. E.

**RAINBOW** (קִּוְיָרָה) (i. e. a bow with which to shoot arrows), Gen. ix. 13-16; Ez. i. 28: *εὐχρύς*, so *Ecclus.* xliii. 11: *arcus*. In N. T., Rev. iv. 3, κ. 1, *ἵρις*). The token of the covenant which God made with Noah when he came forth from the ark, that the waters should no more become a flood to destroy all flesh. With respect to the covenant itself, as a charter of natural blessings and mercies ("the World's covenant, not the Church's"), re-establishing the peace and order of Physical Nature, which in the flood had undergone so great a convulsion, see Davison *On Prophecy*, lect. iii. pp. 76-80. With respect to the token of the covenant, the right interpretation of Gen. ix. 13 seems to be that God took the rainbow, which had hitherto been but a beautiful object shining in the heavens when the sun's rays fell on falling rain, and consecrated it as the sign of His love and the witness of His promise.

The following passages, Num. xiv. 4; 1 Sam. xii. 13; 1 K. ii. 35, are instances in which *נָתַן* (*nāthan*, lit. "give"), the word used in Gen. ix. 13, "I do set my bow in the cloud," is employed in the sense of "constitute," "appoint." Accordingly there is no reason for concluding that ignorance of the natural cause of the rainbow occasioned the account given of its institution in the Book of Genesis. [SIGNS, Amer. ed.]

The figurative and symbolical use of the rainbow as an emblem of God's mercy and faithfulness must not be passed over. In the wondrous vision shown to St. John in the Apocalypse (Rev. iv. 3), it is said that "there was a rainbow round about the throne, in sight like unto an emerald:" amidst the awful vision of surpassing glory is seen the symbol of Hope, the bright emblem of Mercy and of Love. "Look upon the rainbow," saith the son of Sirach (*Ecclus.* xliii. 11, 12), "and praise Him that made it: very beautiful it is in the brightness thereof; it compasseth the heaven about with a glorious circle, and the hands of the Most High have bended it." E. P. E.

<sup>b</sup> The discovery of a single fountain, and the removal of rubbish which had choked up the soil, effected the transformation. The writer was told on the ground, that five different crops of vegetables may be raised there one after another in a single season (see *Illustr. of Scripture*, p. 156 f.). H.

## RAISINS. [VINE.]

**RA'KEM** (רַקֵּם, in pause רַקֵּם [flower garden]: 'Ροκόμ; om. in [Vat. and] Alex.; [Comp. Ald. Ρακάμ:] *Recen.*). Among the descendants of Machir the son of Manasseh, by his wife Maachah, are mentioned Ulam and Rakem, who are apparently the sons of Sheresh (1 Chr. vii. 16). Nothing is known of them. [In Hebrew this name and Rekem (which see) are the same, out of pause. — H.]

**RAK'KATH** (רַקֵּת [shore]: [Ἰμαθα]δακέθ: Alex. Ρεκαθ: *Reccath.*). One of the fortified towns of Naphtali, named between HAMMATH and CHINNERETH (Josh. xix. 35). Hammath was probably at the hot springs of Tiberias; but no trace of the name of Rakkath has been found in that or any other neighborhood. [See *Rob. Bibl. Res.* iii. 266.] The nearest approach is *Kerak*, formerly *Tarichæa*, three miles further down the shore

## RAM, BATTERING

of the lake, close to the embouchure of the Jordan.

**RAK'KON** (רַקֵּקֹן, with the def article [the temple (of the head), Ges.; a well watered place, Fürst]: 'Ιερράκων; [Comp. ('Ιερακῶν καλ, 'Ηρακκῶν:] *Areccon.*). One of the towns in the inheritance of Dan (Josh. xix. 46), apparently not far distant from Joppa. The LXX. (both MSS.) give only one name (that quoted above) for this and Me-jarkon, which in the Hebrew text precedes it. This fact, when coupled with the similarity of the two names in Hebrew, suggests that the one may be merely a repetition of the other. Neither has been yet discovered.

**RAM** (רָם [high, exalted]: 'Αράμ; [Vat.] Alex. *Arran* in Ruth; [Vat. *Oram* and *Arran*, Alex.] *Oram* and *Arām* in 1 Chr.: *Arām*). 1. Son of Hezron and father of Amminadab. He was born in Egypt after Jacob's migration there, as

Battering Ram.

his name is not mentioned in Gen. xlv. 4. He first appears in Ruth iv. 19. The genealogy in 1 Chr. ii. 9, 10, 25, adds no further information concerning him, except that he was the *second* son of Hezron, Jerahmeel being the first-born. He appears in the N. T. only in the two lists of the ancestry of Christ (Matt. i. 3, 4; Luke iii. 33), where he is called ARAM, after the LXX. and Vulgate. [AMMINADAB; NAHSHON.] A. C. H.

2. ('Ράμ; [Vat. *Pav*, *Arām*; Alex. in ver. 25, *Arav*:] *Ram*). The first-born of Jerahmeel, and therefore nephew of the preceding (1 Chr. ii. 25, 27). He had three sons, Maaz, Jamin, and Eker.

3. [Rom. Vat. Sin. 'Ράμ; Alex. *Ραμα*: *Ram*.] Elihu, the son of Barachel the Buzite, is described as "of the kindred of Ram" (Job xxxii. 2). Rashi's note on the passage is curious: "'of the family of Ram;' Abraham, for it is said, 'the greatest man among the Anakim' (Josh. xiv.); this

[is] Abraham.'" Ewald identifies Ram with Aram, mentioned in Gen. xxii. 21 in connection with Huz and Buz (*Gesch.* i. 414). Elihu would thus be a collateral descendant of Abraham, and this may have suggested the extraordinary explanation given by Rashi. W. A. W.

## RAM. [SHEEP; SACRIFICES.]

**RAM, BATTERING** (רָם: βελόστασις, χάραξ: *aries*). This instrument of ancient siege operations is twice mentioned in the O. T. (Ez. iv 2, xxi. 22 [27]); and as both references are to the battering-rams in use among the Assyrians and Babylonians, it will only be necessary to describe those which are known from the monuments to have been employed in their sieges. With regard to the meaning of the Hebrew word there is but little doubt. It denotes an engine of war which was called a ram, either because it had an iron head

shaped like that of a ram, or because when used for battering down a wall, the movement was like the butting action of a ram.

In attacking the walls of a fort or city, the first step appears to have been to form an inclined plane or bank of earth (comp. Ez. iv. 2, "cast a mound against it"), by which the besiegers could bring their battering-rams and other engines to the foot of the walls. "The battering-rams," says Mr. Layard, "were of several kinds. Some were joined to movable towers which held warriors and armed men. The whole then formed one great temporary building, the top of which is represented in sculptures as on a level with the walls, and even turrets, of the besieged city. In some bas-reliefs the battering-ram is without wheels; it was then perhaps constructed upon the spot, and was not intended to be moved. The movable tower was probably sometimes unprovided with the ram, but I have not met with it so represented in the sculptures. . . . When the machine containing the battering-ram was a simple framework, and did not form an artificial tower, a cloth or some kind of drapery, edged with fringes and otherwise ornamented, appears to have been occasionally thrown over it. Sometimes it may have been covered with hides. It moved either on four or on six wheels, and was provided with one ram or with two. The mode of working the rams cannot be determined from the representations in the bas-reliefs that they were partly suspended by a rope fastened to the outside of the machine, and that men directed and impelled them from within. Such was the plan adopted by the Egyptians, in whose paintings the warriors working the ram may be seen through the frame. Sometimes this engine was ornamented by a carved or painted figure of the presiding divinity, kneeling on one knee and drawing a bow. The artificial tower was usually occupied by two warriors; one discharged his arrows against the besieged, whom he was able, from his lofty position, to harass more effectually than if he had been below; the other held up a shield for his companion's defense. Warriors are not unfrequently represented as stepping from the machine to the battlements. . . .

Archers on the walls hurled stones from slings, and discharged their arrows against the warriors in the artificial towers; whilst the rest of the besieged were no less active in endeavoring to frustrate the attempts of the assailants to make breaches in their walls. By dropping a doubled chain or rope from the battlements, they caught the ram, and could either destroy its efficacy altogether, or break the force of its blows. Those below, however, by placing hooks over the engine, and throwing their whole weight upon them, struggled to retain it in its place. The besieged, if unable to displace the battering-ram, sought to destroy it by fire, and threw lighted torches or firebrands upon it; but water was poured upon the flames through pipes attached to the artificial tower" (*Nineveh and its Remains*, ii. 367-370).

W. A. W.

**RA'MA** (רָמָה; *Rama*), Matt. ii. 18, referring to Jer. xxxi. 15. The original passage alludes to a massacre of Benjamites or Ephraimites (comp. ver. 9, 18), at the Ramah in Benjamin or in Mount Ephraim. This is seized by the Evangelist and turned into a touching reference to the slaughter of the Innocents at Bethlehem, near to which was (and is) the sepulchre of Rachel. The name of Rama is alleged to have been lately discovered attached to a spot close to the sepulchre. If it existed there in St. Matthew's day, it may have prompted his allusion, though it is not necessary to suppose this, since the point of the quotation does not lie in the name Ramah, but in the lamentation of Rachel for the children, as is shown by the change of the *וִיּוֹסִים* of the original to *τὴν ἐκείνην*.  
G.

**RA'MAH** (רָמָה), with the definite article [*the height*], excepting a few cases named below). A word which in its simple or compound shape forms the name of several places in the Holy Land; one of those which, like Gibeah, Geba, Gibeon, or Mizpeh, betrays the aspect of the country. The lexicographers with unanimous consent derive it from a root which has the general sense of elevation — a root which produced the name of Aram,<sup>a</sup> "the high lands," and the various modifications of Ram, Ramah, Ramath, Ramoth, Remeth, Ramathaim, Arimathæa, in the Biblical records. As an appellative it is found only in one passage (Ez. xvi. 24-39), in which it occurs four times, each time rendered in the A. V. "high place." But in later Hebrew *ramtha* is a recognized word for a hill, and as such is employed in the Jewish versions of the Pentateuch for the rendering of Pisgah.

1. (*Ῥαμὰ*; [Neh. vii. 30, 'Ῥαμὰ; Vat. also *Ῥαμ,*] *Ραμια, Βαμα, etc.*; [Jer. xl. 1, Vat. FA. *Δαμαν*]; Alex. *Ῥαμα, Ραμμαν*, [*Ραμια,*] *Ραμα: Rama*.) One of the cities of the allotment of Benjamin (Josh. xviii. 25), a member of the group which contained Gibeon and Jerusalem. Its place in the list is between Gibeon and Beeroth. There is a more precise specification of its position in the invaluable catalogue of the places north of Jerusalem which are enumerated by Isaiah as disturbed by the gradual approach of the king of Assyria (Is. x. 28-32). At Michmash he crosses the ravine; and then successively dislodges or alarms Geba, Ramah, and Gibeah of Saul. Each of these may be recognized with almost absolute certainty at the present day. Geba is *Jeba*, on the south brink of the great valley; and a mile and a half beyond it, directly between it and the main road to the city, is *er-Râm* (its name the exact equivalent of ha-Râmah) on the elevation which its ancient name implies.<sup>b</sup> Its distance from the city is two hours, *i. e.* five English or six Roman miles, in perfect accordance with the notice of Eusebius and Jerome in the *Onomasticon* ("Rama"),<sup>c</sup> and nearly agreeing with that of Josephus (*Ant.* viii. 12, § 3), who places it 40 stadia north of Jerusalem.

Its position is also in close agreement with the notices of the Bible. The palm-tree of Deborah (Judg. iv. 5) was "between Ramah<sup>d</sup> and Bethel,"

<sup>a</sup> So Sir H. C. Rawlinson, in *Athenæum*, No. 1799, 590.

<sup>b</sup> Its place in the list of Joshua (mentioned above), namely, between Gibeon and Beeroth, suits the present *Sam-Atlah*; but the considerations named in the text make it very difficult to identify any other site with *er-Râm*.

<sup>c</sup> In his commentary on Hos. v. 8, Jerome mentions Rama as "juxta Gabaa in septimo lapide a Ierosolymis sita."

<sup>d</sup> The Targum on this passage substitutes for the Palm of Deborah. Ataroth-Deborah, no doubt referring to the town of Ataroth. This has everything in its favor, since *Atara* is still found on the left hand of

In one of the sultry valleys inclosed in the limestone hills which compose this district. The Levite and his concubine in their journey from Bethlehem to Ephraim passed Jerusalem, and pressed on to Gibeah, or even if possible beyond it to Ramah (Judg. xix. 13). In the struggles between north and south, which followed the disruption of the kingdom, Ramah, as a frontier town, the possession of which gave absolute command of the north road from Jerusalem (1 K. xv. 17), was taken, fortified, and retaken (*ibid.* 21, 22; 2 Chr. xvi. 1, 5, 6).

After the destruction of Jerusalem it appears to have been used as the depot for the prisoners (Jer. xl. 1); and, if the well-known passage of Jeremiah (xxx. 15), in which he introduces the mother of the tribe of Benjamin weeping over the loss of her children, alludes to this Ramah, and not to one nearer to her sepulchre at Bethlehem, it was probably also the scene of the slaughter of such of the captives as from age, weakness, or poverty, were not worth the long transport across the desert to Babylon [RAMA.] Its proximity to Gibeah is implied in 1 Sam. xxii. 6<sup>a</sup>; Hos. v. 8; Ezr. ii. 26; Neh. vii. 30: the last two of which passages show also that its people returned after the Captivity. The Ramah in Neh. xi. 33 occupies a different position in the list, and may be a distinct place situated further west, nearer the plain. (This and Jer. xxxi. 15 are the only passages in which the name appears without the article.) The LXX. find an allusion to Ramah in Zech. xiv. 10, where they render the words which are translated in the A. V. "and shall be lifted up (רָמָה), and inhabited in her place," by "Ramah shall remain upon her place."

*Er-Ram* was not unknown to the mediæval travellers, by some of whom (*e. g.* Brocardus, *Descr.* ch. vii.) it is recognized as Ramah, but it was reserved for Dr. Robinson to make the identification certain and complete (*Bibl. Res.* i. 576). He describes it as lying on a high hill, commanding a wide prospect—a miserable village of a few half-deserted houses, but with remains of columns, squared stones, and perhaps a church, all indicating former importance.

In the catalogue of 1 Esdr. v. (20) the name appears as *CIRAMA*.

2. (Ῥαμαθαίμ in both MSS., except only 1 Sam. xxv. 1, xxviii. 3, where the Alex. has Παμα [and 1 Sam. xix. 19, 22, 23, xx. 1, where Rom. Vat. Alex. have the same: *Ramatha*].) The home of Elkana, Samuel's father (1 Sam. i. 19, ii. 11), the birth-place of Samuel himself, his home and official residence, the site of his altar (vii. 17, viii. 4, xv. 34, xvi. 13, xix. 18), and finally his burial-place (xxv. 1, xxviii. 3). In the present instance it is a contracted form of RAMATHAIM-ZOPHIM, which in the existing Hebrew text is given at length but once, although the LXX. exhibit *Armathaim* on every occasion.

All that is directly said as to its situation is

that it was in Mount Ephraim (1 Sam. i. 1), and this would naturally lead us to seek it in the neighborhood of Shechem. But the whole tenor of the narrative of the public life of Samuel (in connection with which alone this Ramah is mentioned) is so restricted to the region of the tribe of Benjamin, and to the neighborhood of Gibeah the residence of Saul, that it seems impossible not to look for Samuel's city in the same locality. It appears from 1 Sam. vii. 17 that his annual functions as prophet and judge were confined to the narrow round of Bethel, Gilgal, and Mizpeh—the first the north boundary of Benjamin, the second near Jericho at its eastern end, and the third on the ridge in more modern times known as Scopos, overlooking Jerusalem, and therefore near the southern confines of Benjamin. In the centre of these was Gibeah of Saul, the royal residence during the reign of the first king, and the centre of his operations. It would be doing a violence to the whole of this part of the history to look for Samuel's residence outside these narrow limits.

On the other hand, the boundaries of Mount Ephraim are nowhere distinctly set forth. In the mouth of an ancient Hebrew the expression would mean that portion of the mountainous district which was at the time of speaking in the possession of the tribe of Ephraim. "Little Benjamin" was for so long in close alliance with and dependence on its more powerful kinsman, that nothing is more probable than that the name of Ephraim may have been extended over the mountainous region which was allotted to the younger son of Rachel. Of this there are not wanting indications. The palm-tree of Deborah was "in Mount Ephraim," between Bethel and Ramah, and is identified with great plausibility by the author of the Targum on Judg. iv. 5 with Ataroth, one of the landmarks on the south boundary of Ephraim, which still survives in *'Atara*, 2½ miles north of Ramah of Benjamin (*er-Ram*). Bethel itself, though in the catalogue of the cities of Benjamin (Josh. xviii. 22), was appropriated by Jeroboam as one of his idol sanctuaries, and is one of the "cities of Mount Ephraim" which were taken from him by Baasha and restored by Asa (2 Chr. xiii. 19, xv. 8). Jeremiah (ch. xxxi.) connects Ramah of Benjamin with Mount Ephraim (vv. 6, 9, 15, 18).

In this district, tradition, with a truer instinct than it sometimes displays, has placed the residence of Samuel. The earliest attempt to identify it is in the *Onomasticon* of Eusebius, and was not so happy. His words are, "Armathem Seipha: the city of Helkana and Samuel; it lies near<sup>b</sup> (πλησίον) Diospolis: thence came Joseph, in the Gospels said to be from Arimathæa." Diospolis is Lydda, the modern *Lüdd*, and the reference of Eusebius is no doubt to *Ramleh*, the well-known modern town two miles from *Lüdd*. But there is a fatal obstacle to this identification, in the fact that *Ramleh* ("the sandy") lies on the open face of the maritime plain, and cannot in any sense be said to be in Mount

the north road, very nearly midway between *er-Ram* and *Beitn*.

<sup>a</sup> This passage may either be translated (with Julius, Michaelis, De Wette, and Bunsen), "Saul abode in Gibeah under the tamarisk on the height" (in which case it will add one to the scanty number of cases in which the word is used otherwise than as a proper name), or it may imply that Ramah was included within the precincts of the king's city. The LXX.

read Bama for Ramah, and render the words "on the hill under the field in Bama." Eusebius, in the *Onomasticon* (*Paμá*), characterizes Ramah as the "city of Saul."

<sup>b</sup> Jerome agrees with Eusebius in his translation of this passage; but in the *Epitaphium Paulæ* (Epist. cviii.) he connects Ramleh with Arimathæa only, and places it *haud procul a Lyddâ*.

Ephraim, or any other mountain district. Eusebius possibly refers to another Ramah named in Neh. xi. 33 (see below, No. 6).

But there is another tradition, that just alluded to, common to Moslems, Jews, and Christians, up to the present day, which places the residence of Samuel on the lofty and remarkable eminence of *Nebv Samuël*, which rises four miles to the N. W. of Jerusalem, and which its height (greater than that of Jerusalem itself), its commanding position, and its peculiar shape, render the most conspicuous object in all the landscapes of that district, and make the names of Ramah and Zophim exceedingly appropriate to it. The name first appears in the travels of Arculf (A. D. cir. 700), who calls it Saint Samuel. Before that date the relics of the Prophet had been transported from the Holy Land to Thrace by the emperor Arcadius (see Jerome *contr. Vigilantium*, § 5), and Justinian had enlarged or completed "a well and a wall" for the sanctuary (Procopius, *de Edif.* v. cap. 9). True, neither of these notices names the spot, but they imply that it was well known, and so far support the placing it at *Nebv Samuël*. Since the days of Arculf the tradition appears to have been continuous (see the quotations in Robinson, *Bibl. Res.* i. 459; Toller, p. 881, &c.). The modern village, though miserable even among the wretched collections of hovels which crown the hills in this neighborhood, bears marks of antiquity in cisterns and other traces of former habitation. The mosque is said to stand on the foundations of a Christian church, probably that which Justinian built or added to. The ostensible tomb is a mere wooden box; but below it is a cave or chamber, apparently excavated, like that of the patriarchs at Hebron, from the solid rock of the hill, and, like that, closed against all access except by a narrow aperture in the top, through which devotees are occasionally allowed to transmit their lamps and petitions to the sacred vault below.

Here, then, we are inclined, in the present state of the evidence, to place the Ramah of Samuel. And there probably would never have been any resistance to the traditional identification if it had not been thought necessary to make the position of Ramah square with a passage with which it does not seem to the writer to have necessarily any connection. It is usually assumed that the city in which Saul was anointed by Samuel (1 Sam. ix., x.) was Samuel's own city Ramah. Josephus certainly (*Ant.* vi. 4, § 1) does give the name of the city as Armathem, and in his version of the occurrence implies that the Prophet was at the time in his own house; but neither the Hebrew nor the LXX. contains any statement which confirms this, if we except the slender fact that the "land of Zuph" (ix. 5) may be connected with the Zophim of Ramathaim-zophim. The words of the maidens (ver. 12) may equally imply either that Samuel had just entered one of his cities of circuit, or that he had just returned to his own house. But, however this may be, it follows from the minute specification

of Saul's route in 1 Sam. x. 2, that the city in which the interview took place was near the sepulchre of Rachel, which, by Gen. xxxv. 16, 19, and other reasons, appears to be fixed with certainty as close to Bethlehem. And this supplies a strong argument against its being Ramathaim-zophim, since, while Mount Ephraim, as we have endeavored already to show, extended to within a few miles north of Jerusalem, there is nothing to warrant the supposition that it ever reached so far south as the neighborhood of Bethlehem. Saul's route will be most conveniently discussed under the head of SAUL; but the question of both his outward and his homeward journey, minutely as they are detailed, is beset with difficulties, which have been increased by the assumptions of the commentators. For instance, it is usually taken for granted that his father's house, and therefore the starting-point of his wanderings, was Gibeath. True, Saul himself, after he was king, lived at Gibeath; but the residence of Kish would appear to have been at ZELA<sup>b</sup> where his family sepulchre was (2 Sam. xxi. 14), and of Zela no trace has yet been found. The Authorized Version has added to the difficulty by introducing the word "meet" in x. 3 as the translation of the term which they have more accurately rendered "find" in the preceding verse. Again, where was the "hill of God," the *gibeath-Elohim*, with the *netsib* of the Philistines? A *netsib* of the Philistines is mentioned later in Saul's history (1 Sam. xiii. 3) as at Geba opposite Michmash. But this is three miles north of Gibeath of Saul, and does not at all agree with a situation near Bethlehem for the anointing of Saul. The Targum interprets the "hill of God" as "the place where the ark of God was," meaning Kirjath-jearim.

On the assumption that Ramathaim-zophim was the city of Saul's anointing, various attempts have been made to find a site for it in the neighborhood of Bethlehem. (a.) Gesenius (*Thes.* p. 1276 a) suggests the *Jebel Fureidis*, four miles southeast of Bethlehem, the ancient Herodium, the "Frank mountain" of more modern times. The drawback to this suggestion is that it is not supported by any hint or inference either in the Bible, Josephus (who was well acquainted with the Herodian), or more recent authority. (b.) Dr. Robinson (*Bibl. Res.* ii. 8) proposes *Söba*, in the mountains six miles west of Jerusalem, as the possible representative of Zophim; but the hypothesis has little besides its ingenuity to recommend it, and is virtually given up by its author in a foot-note to the passage. (c.) Van de Velde (*Syr. & Pal.* ii. 50), following the lead of Wolcott, argues for *Rameh* (or *Rameh el-Khalil*, Rob. i. 216), a well-known site of ruins about two and a half miles north of Hebron. His main argument is that a castle of S. Samuel is mentioned by F. Fabri in 1483<sup>d</sup> (apparently) as north of Hebron; that the name *Rameh* is identical with Ramah; and that its position suits the requirements of 1 Sam. x. 2-5. This is also supported by Stewart (*Tent and Khan*, p. 247). (d.)

Stewart, *Tent and Khan*, p. 247; Van de Velde, *Moïr* etc., etc.).

c The meaning of this word is uncertain. It may signify a garrison, an officer, or a commemoration column — a trophy.

d In the time of Benjamin of Tudela it was known as the "house of Abraham" (*B. of T.*, ed. Asher, ii. 98).

a "Beth-horon and her suburbs" were allotted to the Kohathite Levites, of whom Samuel was one by descent. Perhaps the village on the top of *Nebv Samuël* may have been dependent on the more regularly fortified Beth-horon (1 K. ix. 17).

b Zela (צלא) is quite a distinct name from Zelzach (צלצח), with which some would identify it (e. g.

Dr. Bonar (*Land of Promise*, pp. 178, 554) adopts *er-Ram*, which he places a short distance north of Bethlehem, east of Rachel's sepulchre. Eusebius (*Onom.* 'Ραβεθε) says that "Ramah of Benjamin" is near (περὶ) Bethlehem, where the "voice in Rama was heard;" and in our times the name is mentioned, besides Dr. Bonar, by Prokesch and Salzbacher (cited in *Rob. Bibl. Res.* ii. 8 note), but this cannot be regarded as certain, and Dr. Stewart has pointed out that it is too close to Rachel's monument to suit the case.

Two suggestions in an opposite direction must be noticed:—

(α.) That of Ewald (*Geschichte*, ii. 550), who places Ramathaim-zophim at *Ram-Allah*, a mile west of *el-Bireh*, and nearly five north of *Neby Samuil*. The chief ground for the suggestion appears to be the affix *Allah*, as denoting that a certain sanctity attaches to the place. This would be more certainly within the limits of Mount Ephraim, and merits investigation. It is mentioned by Mr. Williams (*Dict. of Geogr.* "Ramatha") who, however, gives his decision in favor of *Neby Samuil*.

(β.) That of Schwarz (pp. 152-158), who, starting from Gibeah-of-Saul as the home of Kish, fixes upon *Rameh*, north of Samaria and west of *Samur*, which he supposes also to be Ramoth or Jarmuth, the Levitical<sup>a</sup> city of Issachar. Schwarz's arguments must be read to be appreciated.

\* The site of this Ramah, Dean Stanley pronounces "without exception the most complicated and disputed problem of sacred topography." The writer, with others, has devoted many fruitless hours to its solution; and the difficulties of the case, inherent and apparently ineradicable, may be briefly stated. (1.) The Ramah of Samuel's birth was in Mount Ephraim (see above). (2.) The Ramah of his residence and burial was the Ramah of his birth (see above). "The inference is direct and stringent, that the two were identical." Robinson's *Bibl. Sacra*, p. 506 (1843). (3.) The Ramah of his interview with Saul was the Ramah of his residence (see above). "It is hardly possible to avoid identifying them. This, which is not stated expressly in the Old Testament [though fairly implied], is taken for granted by Josephus" (Dr. Stanley, *S. of P.* p. 220). Josephus, without doubt, was familiar with all the localities, and would know whether his statement was compatible with the sacred narrative. (4.) The Ramah in which Saul was anointed by Samuel was so situated that, in

<sup>a</sup> But Ramoth was allotted to the Gershonites, while Samuil was a Kohathite.

<sup>b</sup> \* The German missionary, Pastor Valentner, regards the Ramah in Isaiah's vision (No. 1 above) and the Ramah of Samuel (No. 2) as the same, namely, the present *Er-Ram*, about 6 miles north of Jerusalem on the traveller's right in going to Bethel and Shechem. Samuel's father, Elkana (as he maintains), is said to be "a man of Ramathaim-zophim, of Mount Ephraim" (1 Sam. i. 1, &c.), not because he lived there at the time of Samuel's birth, but because he dwelt there originally, and afterwards migrated to Ramah in Benjamin. Further, he considers it unnecessary (so also Stanley, *Jewish Church*, i. 454, Keil on 1 Sam. ix. 6 ff. and others) to identify the Ramah of Samuel with the nameless city of Saul's interview with Samuel as related 1 Sam. ix. 1 ff. Among his positive reasons for this identification of Ramah with *Er-Ram* are that it lies fairly within the territory of Benjamin; that it forms the central point of Samael's judicial

passing from it to his home in Benjamin, he would pass by the tomb of Rachel (see above).

Neither of these four points can yet be disproved, and on every proposed site of the Ramah of the prophet, some one of them directly impinges; and the prospect now is, that the question will remain inexplicable.<sup>b</sup>

S. W.

3. (Ἀραμῆ; ὁ Alex. Ραμα: *Arama*.) One of the nineteen fortified places of Naphtali (*Josh. xix. 36*) named between Adamah and Hazor. It would appear, if the order of the list may be accepted to have been in the mountainous country N. W. of the Lake of Gennesaret. In this district a place bearing the name of *Rameh* has been discovered by Dr. Robinson (*Bibl. Res.* iii. 78), which is not improbably the modern representative of the Ramah in question. It lies on the main track between *Akka* and the north end of the Sea of Galilee, and about eight miles E. S. E. of *Safed*. It is, perhaps, worth notice that, though the spot is distinguished by a very lofty brow, commanding one of the most extensive views in all Palestine (*Rob. Bibl. Res.* iii. 78), and answering perfectly to the name of Ramah, yet that the village of *Rameh* itself is on the lower slope of the hill.

4. (Ραμῆ: *Horra*.) One of the landmarks on the boundary (A. V. "coast") of Asher (*Josh. xix. 29*), apparently between Tyre and Zidon. It does not appear to be mentioned by the ancient geographers or travellers, but two places of the same name have been discovered in the district allotted to Asher: the one east of Tyre, and within about three miles of it (*Van de Velde, Map, Memoir*) the other more than ten miles off, and southeast of the same city (*Van de Velde, Map; Robinson, Bibl. Res.* iii. 64). The specification of the boundary of Asher is very obscure, and nothing can yet be gathered from it; but, if either of these places represent the Ramah in question, it certainly seems safer to identify it with that nearest to Tyre and the sea-coast.

5. (Ρεμμῶθ; Alex. Ραμωθ; [in 2 Chr. xxii. 6, *Rom. Vat. Ραμωθ*, Alex. Ραμα:] *Ramoth*.) By this name in 2 K. viii. 29 and 2 Chr. xxii. 6, only, is designated RAMOTH-GILEAD. The abbreviation is singular, since, in both cases, the full name occurs in the preceding verse.

6. [*Rom. Vat. Alex. FA*<sup>1</sup> omit; *FA*<sup>3</sup> *Comp. Ραμῆ: Rama*.] A place mentioned in the catalogue of those reinhabited by the Benjamites after their return from the Captivity (*Neh. xi. 33*). It may be the Ramah of Benjamin (above, No. 1) or the

circuit (Gilgal on the east, Bethel on the north, and Mizpeh (= *Neby Samuil*) on the west, 1 Sam. vii. 16); and that the vicinity of Saul's Gibeah to this Ramah (= *Er-Ram*) tallies well with the local relations of Gibeah and Ramah to each other in the narrative, 1 Sam. cc. xix. and xx. It follows from this view that Ramah No. 1 and Ramah No. 2 may be the same place. The difficulties, whatever they may be, as to ZUPH and the course of Saul's journey in search of the lost asses encumber any one hypothesis of the Ramah question as well as another. See Valentner's art. *Beitrag zur Topographie des Stammes Benjamin*, in the *Zeitschr. der deutsch. M. Gesellsch.* xii. 161-170.

Prof. Graf in like manner (*Lage von Bethel, Rama u. Gilgal*, in the *Stud. u. Krit.* 1854, pp. 851-902) recognizes only one Ramah, which he identifies with *Er-Ram*, but he distinguishes Ramathaim-zophim and Ramah from each other.

ii.

<sup>c</sup> For the preceding name — Adamah — they give Ἀραμῶθ.

Ramah of Samuel, but its position in the list (remote from Geha, Michmash, Bethel, ver. 31, comp. Ezr. ii. 26, 28) seems to remove it further west, to the neighborhood of Lod, Hadid, and Ono. There is no further notice in the Bible of a Ramah in this direction, but Eusebius and Jerome allude to one, though they may be at fault in identifying it with Ramathaim and Arimathæa (*Onom.* "Armatha Sophim;" and the remarks of Robinson, *Bibl. Res.* ii. 239). The situation of the modern *Ramleh* agrees very well with this, a town too important and too well placed not to have existed in the ancient times.<sup>a</sup> The consideration that *Rameh* signifies "sand," and Ramah "a height," is not a valid argument against the one being the legitimate successor of the other. If so, half the identifications of modern travellers must be reversed. *Beit-ur* can no longer be the representative of Beth-horon, because *ur* means "eye," while *horon* means "caves;" *n-ṭ Beit-lyhm*, of Bethlehem, because *lyhm* is "flesh," and *lehem* "bread;" nor *el-Aul*, of Elealeh, because *el* is in Arabic the article, and in Hebrew the name of God. In these cases the tendency of language is to retain the sound at the expense of the meaning. G.

RAMATH-LEHI (רַמַּת לְהִי) [see below]: *Ἀναψεις σταγῶνος: Ramathlechi, quod interpretatur elevatio maxillæ.* The name which purports to have been bestowed by Samson on the scene of his slaughter of the thousand Philistines with the jaw-bone (*Judg.* xv. 17). "He cast away the jaw-bone out of his hand, and called that place 'Ramath-lehi,'"—as if "heaving of the jaw-bone." In this sense the name (wisely left untranslated in the A. V.) is rendered by the LXX. and Vulgate (as above). But Gesenius has pointed out (*Theis.* p. 752 a) that to be consistent with this the vowel points should be altered, and the words become רַמַּת לְהִי; and that as they at present stand they are exactly parallel to Ramath-mizpeh and Ramath-negeb, and mean the "height of Lechi." If we met with a similar account in ordinary history we should say that the name had already been Ramath-lehi, and that the writer of the narrative, with that fondness for *paronomasia* which distinguishes these ancient records, had indulged himself in connecting the name with a possible exclamation of his hero. But the fact of the positive statement in this case may make us hesitate in coming to such a conclusion in less authoritative records. [See LEHI, note e, vol. ii. p. 1627.] G.

RAMATH-MIZPEH (רַמַּת מִצְפֶּה), with def. article [*height of the watch-tower*]: *Ἀραβὼθ κατὰ τὴν Μασσηφά:* Alex. *Ραμωθ*<sup>b</sup> κ τ. *Μασφα: Ramath, Masphe*. A place mentioned, in *Josh.* xiii. 26 only, in the specification of the territory of Gad, apparently as one of its northern landmarks, Heshbon being the limit on the south. But of this our ignorance of the topography east of the Jordan forbids us to speak at present with any certainty.

There is no reason to doubt that it is the same

place with that early sanctuary at which Jacob and Laban set up their cairn of stones, and which received the names of MIZPEH, Galeed, and Jegar Sahadutha: and it seems very probable that all these are identical with Ramoth-Gilead, so notorious in the later history of the nation. In the Books of Maccabees it probably appears in the garb of Maspha (1 Macc. v. 35), but no information is afforded us in either Old Test. or Apocrypha as to its position. The lists of places in the districts north of *es-Salt*, collected by Dr. Eli Smith, and given by Dr. Robinson (*Bibl. Res.* 1st edit. App. to vol. iii.), contain several names which may retain a trace of Ramath, namely, *Rameimîn* (167 b), *Reimîn* (166 a), *Rumrâna* (165 a), but the situation of these places is not accurately known, and it is impossible to say whether they are appropriate to Ramath-Mizpeh or not. G.

#### RAMATH OF THE SOUTH (רַמַּת הַיָּם)

רַמַּת הַיָּם: Βαμὲθ κατὰ λίβα; Alex. by double transl. *θερηπραμωθ . . . ιαμεθ κ. λ.: Ramath contra australem playam*, more accurately Ramah of the South. One of the towns in the allotment of Simeon (*Josh.* xix. 8), apparently at its extreme south limit. It appears from this passage to have been another name for BAALATH-BEER. Ramath is not mentioned in the list of Judah (comp. *Josh.* xv. 21–32), nor in that of Simeon in 1 Chr. iv. 28–33, nor is it mentioned by Eusebius and Jerome. Van de Velde (*Memoir*, p. 342) takes it as identical with Ramath-lehi, which he finds at *Tell el-Lekiyeh*; but this appears to be so far south as to be out of the circle of Samson's adventures, and at any rate must wait for further evidence.

It is in all probability the same place as SOUTH RAMOTH (1 Sam. xxx. 27), and the towns in company with which we find it in this passage confirm the opinion given above that it lay very much to the south. G.

#### RAMATHAIM-ZOPHIM (רַמַּתַּיִם זֹפִיִּים)

זֹפִיִּים [see below]: *Ἀρμαθαίμ [Σφά, Vat.] Σειφα; Alex. A. Σωφίμ: Ramathaim Sophim*. The full form of the name of the town in which Elkanah, the father of the prophet Samuel, resided. It is given in its complete shape in the Hebrew text and A. V. but once (1 Sam. i. 1). Elsewhere (i. 19, ii. 11, vii. 17, viii. 4, xv. 34, xvi. 13, xix. 18, 19, 22, 23, xx. 1, xxv. 1, xxviii. 3) it occurs in the shorter form of Ramah. [RAMAH, 2.] The LXX., however (in both MSS.), give it throughout as Armathaim, and insert it in i. 3 after the words "his city," where it is wanting in the Hebrew and A. V.

Ramathaim, if interpreted as a Hebrew word, is dual—"the double eminence." This may point to a peculiarity in the shape or nature of the place, or may be an instance of the tendency familiar to all students, which exists in language to force an archaic or foreign name into an intelligible form. This has been already remarked in the case of Jerusalem (vol. ii. p. 1272 a); and, like that, the present name appears in the form of RAMATHIEM, as well as that of Ramathaim.

<sup>a</sup> This is evidenced by the attempts of Benjamin of Tudela and others to make out Ramleh to be Gath, Gezer, etc.

<sup>b</sup> This reading of Ramoth for Ramath is countenanced by one Hebrew MS. collated by Kennicott. It is also followed by the Vulgate, which gives *Ramoth*,

*Masphe* (the reading in the text is from the Benedictine Edition of the *Bibliotheca Divina*). On the other hand, there is no warrant whatever for separating the two words, as if belonging to distinct places, as is done in both the Latin texts.

Of the force of "Zophim" no feasible explanation has been given. It was an ancient name on the east of Jordan (Num. xxiii. 14), and there, as here, was attached to an eminence. In the Targum of Jonathan, Ramathaim-zophim is rendered "Ramatha of the scholars of the prophets;" but this is evidently a late interpretation, arrived at by regarding the prophets as watchmen (the root of *zophim*, also that of *mizpeh*, having the force of looking out afar), coupled with the fact that at Naioth in Ramah there was a school of prophets. It will not escape observation that one of the ancestors of Elkannah was named Zophai or Zuph (1 Chr. vi. 26, 35), and that when Saul approached the city in which he encountered Samuel he entered the land of Zuph; but no connection between these names and that of Ramathaim-zophim has yet been established.

Even without the testimony of the LXX. there is no doubt, from the narrative itself, that the Ramah of Samuel — where he lived, built an altar, died, and was buried — was the same place as the Ramah or Ramathaim-Zophim in which he was born. It is implied by Josephus, and affirmed by Eusebius and Jerome in the *Onomasticon* ("Armathem Seipha"), nor would it ever have been questioned had there not been other Ramahs mentioned in the sacred history.

Of its position nothing, or next to nothing, can be gathered from the narrative. It was in Mount Ephraim (1 Sam. i. 1). It had apparently attached to it a place called נַאִיּוֹת, at which the "company" (or "school," as it is called in modern times) of the sons of the prophets was maintained (xix. 18, &c., xx. 1); and it had also in its neighborhood (probably between it and Gibeah-of-Saul) a great well known as the well of Has-Sechu (xix. 22). [SECHU.] But unfortunately these scanty particulars throw no light on its situation. Naioth and Sechu have disappeared, and the limits of Mount Ephraim are uncertain. In the 4th century Ramathaim-Zophim (*Onomasticon*, "Armatha-sophim") was located near Diospolis (Lydda), probably at Ramleh; but that is quite untenable, and quickly disappeared in favor of another, probably older, certainly more feasible tradition, which placed it on the lofty and remarkable hill four miles N.W. of Jerusalem, known to the early pilgrims and Crusaders as Saint Samuel and Mount Joye. It is now universally designated *Nebby Samuil* — the "Prophet Samuel;" and in the mosque which crowns its long ridge (itself the successor of a Christian church), his sepulchre is still revered alike by Jews, Moslems, and Christians.

There is no trace of the name of Ramah or Zophim having ever been attached to this hill since the Christian era, but it has borne the name of the great prophet certainly since the 7th century, and not improbably from a still earlier date. It is not too far south to have been within the limits of Mount Ephraim. It is in the heart of the district where Saul resided, and where the events in which Samuel took so large a share occurred. It completes the circle of the sacred cities to which the prophet was in the habit of making his annual circuit, and which lay — Bethel on the north, Mizpeh<sup>a</sup> on the south, Gilgal on the east, and (if we accept this identification) Ramathaim-zophim on

the west — round the royal city of Gibeah, in which the king resided who had been anointed to his office by the prophet amid such universal expectation and good augury. Lastly, as already remarked, it has a tradition in its favor of early date and of great persistence. It is true that even these grounds are but slight and shifting, but they are more than can be brought in support of any other site; and the task of proving them fallacious must be undertaken by those who would disturb a tradition so old, and which has the whole of the evidence, slight as that is, in its favor.

This subject is examined in greater detail, and in connection with the reasons commonly alleged against the identification, under RAMAH, No. 2. G.

RAM'ATHEM (Ραθαμειν, Mai [Sin.] and Alex.; [Rom. Ραμαθήμε;] Joseph. Ραμαθδ: Ramathan). One of the three "governments" (νομοι and ταραρχιαι) which were added to Judaea by king Demetrius Nicator, out of the country of Samaria (1 Macc. xi. 34); the others were Apherema and Lydda. It no doubt derived its name from a town of the name of RAMATHAIM, probably that renowned as the birthplace of Samuel the Prophet, though this cannot be stated with certainty. G.

RAMATHITE, THE (רַמְתִּיתִי [patr.]: δ εκ Ραηλ; Alex. ο Ραμαθαιος: Komathites). Shimei the Ramathite had charge of the royal vineyards of king David (1 Chr. xxvii. 27). The name implies that he was native of a place called Ramah, but of the various Ramahs mentioned none is said to have been remarkable for vines, nor is there any tradition or other clew by which the particular Ramah to which this worthy belonged can be identified. G.

RAMESES (רַעַמְסֵס [see below]: Ραμεσση; [Vat. in Num., Ραμεσσων, Ραμεσσης:] *Rameses*), or RAAM'SES (רַעַמְסֵס: Ραμεσση; *Rameses*), a city and district of Lower Egypt. There can be no reasonable doubt that the same city is designated by the Rameses and Raameses of the Hebrew text, and that this was the chief place of the land of Rameses, all the passages referring to the same region. The name is Egyptian, the same as that of several kings of the empire, of the XVIIIth, XIXth, and XXth dynasties. In Egyptian it is written RA-MESES or RA-MSES, it being doubtful whether the short vowel understood occurs twice or once: the first vowel is represented by a sign which usually corresponds to the Heb. **Y**, in Egyptian transcriptions of Hebrew names, and Hebrew, of Egyptian.

The first mention of Rameses is in the narrative of the settling by Joseph of his father and brethren in Egypt, where it is related that a possession was given them "in the land of Rameses" (Gen. xlvii.

11). This land of Rameses, רַעַמְסֵס, either corresponds to the land of Goshen, or was a district of it, more probably the former, as appears from a comparison with a parallel passage (6). The name next occurs as that of one of the two cities built for the Pharaoh who first oppressed the children of Israel. "And they built for Pharaoh treasure cities (רַעַמְסֵס, פִּתּוֹם), Pitom and Raameses" (Ex. i. 11). So in the A. V. The LXX

<sup>a</sup> On the ridge of Scopos, according to the opinion of the writer (see MIZPAH, p. 1976 f.).

however, reads *πόλεις ὄχυράς*, and the Vulg. *urbes tabernaculorum*, as if the root had been *יָצַן*.

The signification of the word *מִצְפְּנֵי* is decided by its use for storehouses of corn, wine, and oil, which Hezekiah had (2 Chr. xxiii. 28). We should therefore here read store-cities, which may have been the meaning of our translators. The name of PITHOM indicates the region near Heliopolis, and therefore the neighborhood of Goshen or that tract itself, and there can therefore be no doubt that Raameses is Rameses in the land of Goshen. In the narrative of the Exodus we read of Rameses as the starting point of the journey (Ex. xii. 37; see also Num. xxxiii. 3, 5).

If then we suppose Rameses or Raameses to have been the chief town of the land of Rameses, either Goshen itself or a district of it, we have to endeavor to determine its situation. Lepsius supposes that Aboo-Kesheyd is on the site of Rameses (see Map, vol. i. p. 794). His reasons are, that in the LXX. Heroöpolis is placed in the land of Rameses (*καθ' Ἡρώων πόλιν, ἐν γῆ Ῥαμεσσῆ, ἢ εἰς γῆν Ῥαμεσσῆ*), in a passage where the Hebrew only mentions "the land of Goshen" (Gen. xlvi. 28), and that there is a monolithic group at Aboo-Kesheyd representing Tum, and Ra, and, between them, Rameses II., who was probably there worshipped. There would seem therefore to be an indication of the situation of the district and city from this mention of Heroöpolis, and the statue of Rameses might mark a place named after that king. It must, however, be remembered (a) that the situation of Heroöpolis is a matter in great doubt, and that therefore we can scarcely take any proposed situation as an indication of that of Rameses; (b) that the land of Rameses may be that of Goshen, as already remarked, in which case the passage would not afford any more precise indication of the position of the city Rameses than that it was in Goshen, as is evident from the account of the Exodus; and (c) that the mention of Heroöpolis in the LXX. would seem to be a gloss. It is also necessary to consider the evidence in the Biblical narrative of the position of Rameses, which seems to point to the western part of the land of Goshen, since two full marches, and part at least of a third, brought the Israelites from this town to the Red Sea; and the narrative appears to indicate a route for the chief part directly towards the sea. After the second day's journey they "encamped in Etham, in the edge of the wilderness" (Ex. xiii. 20), and on the third day they appear to have turned. If, however, Rameses was where Lepsius places it, the route would have been almost wholly through the wilderness, and mainly along the tract bordering the Red Sea in a southerly direction, so that they would have turned almost at once. If these difficulties are not thought insuperable, it must be allowed that they render Lepsius's theory extremely doubtful, and the one fact that Aboo-Kesheyd is within about eight miles of the ancient head of the gulf, seems to us fatal to his identification. Even could it be proved that it was anciently called Rameses, the case would not be made out, for there is good reason to suppose that many cities in Egypt bore this name. Apart from the ancient evidence, we may mention that there is now a place called "Remsees" or "Ramsees" in the Boheyreh (the great province on the west of the Rosetta branch of the Nile) mentioned in the list of towns and villages of Egypt in

De Sacy's "*Abd-attif*," p. 664. It gave to its district the name of "Hóf-Remsees" or "Ramsees." This "Hóf" must not be confounded with the "Hof" commonly known, which was in the district of Billeys.

An argument for determining under what dynasty the Exodus happened has been founded on the name Rameses, which has been supposed to indicate a royal builder. This argument has been stated elsewhere: here we need only repeat that the highest date to which Rameses I. can be reasonably assigned is consistent alone with the Rabbinical date of the Exodus, and that we find a prince of the same name two centuries earlier, and therefore at a time perhaps consistent with Ussher's date, so that the place might have taken its name either from this prince, or a yet earlier king or prince Rameses. [CHRONOLOGY; EGYPT; PHARAON.] R. S. P.

RAMESSE (*Ῥαμεσσῆ*: om. in Vulg.) = RAMESSES (Jud. i. 9).

RAMYAH (*רַמְיָה*) [*Jehovah exalted*]: *Ῥαμία*: *Remeïa*. A layman of Israel, one of the sons of Parosh, who put away his foreign wife at Ezra's command (Ezr. x. 25). He is called *HIERMAS* in 1 Esdr. ix. 26.

RAMOTH (*רַמּוֹת*) [*heights*]: *ῆ Ῥαμώθ*; [Vat. Alex.<sup>2</sup> omit:] *Ramoth*. One of the four Levitical cities of Issachar according to the catalogue in 1 Chr. (vi. 73). In the parallel list in Joshua (xxi. 28, 29), amongst other variations, *Jarmuth* appears in place of Ramoth. It appears impossible to decide which is the correct reading; or whether *aga* *RAMETH*, a town of Issachar, is distinct from them, or one and the same. No place has yet been discovered which can be plausibly identified with either. G.

RAMOTH (*רַמּוֹת*) [*heights*]: [Vat.] *Μημων*; [FA. *Μημων*; Rom.] *Alex. Ρημων*: *Ramoth*. An Israelite layman, of the sons of Bani, who had taken a strange wife, and at Ezra's instigation agreed to separate from her (Ezr. x. 29). In the parallel passage of 1 Esdras (ix. 30) the name is given as *HIEREMOTH*. G.

RAMOTH GILEAD (*רַמּוֹת גִּלְעָד*) [see below]: *Ῥεμμώθ*, *Ῥεμμώθ*, and *Ῥαμώθ*, [also 1 Chr. vi. 80, *Ῥαμμώθ* (Vat. *Ῥαμμων*), 1 K. iv. 13, *Ῥαβώθ*,] *Γαλαάδ*; [2 Chr. xviii. 2, 3, *Ῥαμώθ τῆς Γαλααδίτιδος* (Vat. *-δειτ-*); Vat. in 1 K. iv. 13,] *Ῥεμαθγαλααθ*; [in 2 Chr. xxii. 5, *Ῥαμυγαλααθ*;] *Alex. Ῥαμμωθ*, [and several other forms;] *Joseph. Ῥαμαθ*: *Ramoth Galaad*, the "heights of Gilead." One of the great fastnesses on the east of Jordan, and the key to an important district, as is evident not only from the direct statement of 1 K. iv. 13, that it commanded the regions of Argob and of the towns of Jair, but also from the obstinacy with which it was attacked and defended by the Syrians and Jews in the reigns of Ahab, Ahaziah, and Joram.

It seems probable that it was identical with *Ramath-Mizpeh*, a name which occurs but once (Josh. xiii. 26), and which again there is every reason to believe occupied the spot on which Jacob had made his covenant with Laban by the simple rite of piling up a heap of stones, which heap is expressly stated to have borne the names of both *GILEAD* and *MIZPEH*, and became the great sanctuary of the regions east of Jordan. The variation

of Ramoth and Ramath is quite feasible. Indeed, it occurs in the case of a town of Judah. Probably from its commanding position in the territory of Gad, as well as its sanctity and strength, it was chosen by Moses as the City of Refuge for that tribe. It is in this capacity that its name is first introduced (Deut. iv. 43; Josh. xx. 8, xxi. 38). We next encounter it as the residence of one of Solomon's commissariat officers, Ben-geber, whose authority extended over the important region of Argob, and the no less important district occupied by the towns of Jair (1 K. iv. 13).

In the second Syrian war Ramoth-Gilead played a conspicuous part. During the invasion related in 1 K. xv. 20, or some subsequent incursion, this important place had been seized by Benhadad I. from Omri (Joseph. *Ant.* viii. 15, § 3). Ahab had been too much occupied in repelling the attacks of Syria on his interior to attempt the recovery of a place so distant, but as soon as these were at an end and he could secure the assistance of Jehoshaphat, the great and prosperous king of Judah, he planned an attack (1 K. xxii.; 2 Chr. xviii.). The incidents of the expedition are well known: the attempt failed, and Ahab lost his life. [JEZREEL; MICAH; NAAMAN; ZEDEKIAH.]

During Abaziah's short reign we hear nothing of Ramoth, and it probably remained in possession of the Syrians till the suppression of the Moabite rebellion gave Joram time to renew the siege. He allied himself for the purpose as his father had done, and as he himself had done on his late campaign, with his relative the king of Judah. He was more fortunate than Ahab. The town was taken by Israel (Joseph. *Ant.* ix. 6, § 1), and held in spite of all the efforts of Hazael (who was now on the throne of Damascus) to regain it (2 K. ix. 14). During the encounter Joram himself narrowly escaped the fate of his father, being (as we learn from the LXX. version of 2 Chr. xxii. 6, and from Josephus) wounded by one of the Syrian arrows, and that so severely as to necessitate his leaving the army and retiring to his palace at Jezreel (2 K. viii. 28, ix. 15; 2 Chr. xxii. 6). The fortress was left in charge of Jehu. But he was quickly called away to the more important and congenial task of rebelling against his master. He drove off from Ramoth-Gilead as if on some errand of daily occurrence, but he did not return, and does not appear to have revisited the place to which he must mainly have owed his reputation and his advancement.

Henceforward Ramoth-Gilead disappears from our view. In the account of the Gileadite campaign of the Maccabees it is not recognizable, unless it be under the name of Maspha (Mizpeh). Arnaim appears to have been the great sanctuary of the district at that time, and contained the sacred close (*τέμενος*) of Ashtaroth, in which fugitives took refuge (1 Macc. v. 43).

Eusebius and Jerome specify the position of Ramoth as 15 miles from Philadelphia (*Ammān*).

<sup>a</sup> *Es-Salt* appears to be an Arabic appropriation of the ecclesiastical name *Saltan hieraticon* — the sacred forest — which occurs in lists of the episcopal cities on the east of Jordan (Reland, *Pal.* pp. 315, 317). It has now, as is usual in such cases, acquired a new meaning of its own — "the broad Star." (Compare *BLEALEH*.)

<sup>b</sup> In this connection it is curious that the Jews should derive Jerash (which they write גֵּרָשׁ), by

Their knowledge of the country on that side of the Jordan was, however, very imperfect, and in this case they are at variance with each other, Eusebius placing it west, and Jerome east of Philadelphia. The latter position is obviously untenable. The former is nearly that of the modern town of *es-Salt*,<sup>a</sup> which Gesenius (notes to Burckhardt, p. 1061) proposes to identify with Ramoth-Gilead. Ewald (*Gesch.* iii. 500, *note*), indeed, proposes a site further north as more probable. He suggests *Reimun*, on the northern slopes of the *Jebel Ajlūn*, a few miles west of *Jerash*, and between it and the well-known fortress of *Kulāt er-Rubud*. The position assigned to it by Eusebius answers tolerably well for a site bearing the name of *Jelād* (جَلْعَاد), exactly identical with the ancient Hebrew *Gilead*, which is mentioned by Seetzen (*Reisen*, March 11, 1806), and marked on his map (*Ibid.*, iv.) and that of Van de Velde (1858) as four or five miles north of *es-Salt*. And probably this situation is not very far from the truth. If Ramoth-Gilead and Ramath-Mizpeh are identical, a more northern position than *es-Salt* would seem inevitable, since Ramath-Mizpeh was in the northern portion of the tribe of Gad (Josh. xiii. 26). This view is supported also by the Arabic version of the Book of Joshua, which gives *Ramah el-Jeresh*, i. e. the Gerasa of the classical geographers, the modern *Jerash*; with which the statement of the careful Jewish traveller Parci agrees, who says that "Gilead is at present <sup>b</sup> Djerash" (Zunz in Asher's *Benjamin*, p. 405). Still the fact remains that the name of *Jebel Jilād*, or Mount Gilead, is attached to the mass of mountain between the *Wady Sho'eib* on the south, and *Wady Zerka* on the north, the highest part, the Ramoth, of which, is the *Jebel Osha*. G.

\* Tristram assumes the identity of the site of Ramoth-Gilead with *es-Salt*, about six hours N. E. of *Ammān*. He found there a flourishing modern town with few traces of antiquity (*Land of Israel*, pp. 552-555, 2d ed.). S. W.

RAMOTH IN GILEAD (רָמֹת בְּגִלְעָד) [*heights in Gilead*]: ἡ Ῥαμὸθ ἐν Γαλαὰδ, Ἀρημὸθ [ἐν τῇ Γ.], Ῥεμμὰθ Γαλαὰδ; Alex. Ραμμωθ, Ραμωθ: *Ramoth in Gilead*, Deut. iv. 43; Josh. xx. 8, xxi. 38; 1 K. xxii. 3.<sup>c</sup> Elsewhere the shorter form, RAMOTH GILEAD, is used.

RAMS' HORNS. [CORNET; JUBILEE.]

RAMS' SKINS DYED RED (עֹרֹת)

עֹרֹת הַיָּלִים מְדֹדָאֲמִם, 'ôrôth elim mēdōdātm: δέσματα κριῶν ἡρυθροδανομένα: *pelles arietum rubricatae*) formed part of the materials that the Israelites were ordered to present as offerings for the making of the Tabernacle (Ex. xxv. 5); of which they served as one of the inner coverings, there being above the rams' skins an outer covering of badgers' skins. [See BADGER.]

There is no doubt that the A. V., following the

contraction, from גֵּרָשׁוֹרָה, Jegar Sahadūna, one of the names conferred on Mizpeh (Zunz, as above).

<sup>c</sup> The "in" in this last passage (though not distinguished by italics) is a mere interpolation of the translator; the Hebrew words do not contain the preposition, as they do in the three other passages, but are exactly those which elsewhere are rendered "Ramoth-Gilead."

**LXX.** and Vulgate, and the Jewish interpreters, is correct. The original words, it is true, admit of being rendered thus — “skins of red rams,” in which case *mēōklāmim* agrees with *ēlim* instead of *’ōrōth* (see Ewald, *Gr.* § 570). The red ram is by Ham. Smith (Kitto, *Cycl.* s. v.) identified with the Aoudad sheep (*Ammotragus Tragelaphus*; see a figure in vol. i. p. 411), “whose normal color is red, from bright chestnut to rufous chocolate.” It is much more probable, however, that the skins were those of the domestic breed of rams, which, as Rashi says, “were dyed red after they were prepared.” W. H.

\* **RANGES.** The rendering of קִירִים in *Lev.* vi. 35, explained by Keil (*in loc.*) as a pot or pan with its cover (hence the dual); but by Fürst as a cooking furnace, consisting of two ranges of stones so laid as to form an angle. [POT.] It is the rendering also of שִׁרְרָה in 2 K. xi. 8, 15, and 2 Chr. xxiii. 14. As applied there it refers to the long array of armed soldiers through whose ranks Jehoiada ordered Athaliah the queen to be dragged out of the Temple, and, according to Josephus (*Ant.* ix. 7, § 4) out of the city, so as not to pollute the holy places with blood, before putting her to death. For a graphic picture of the scene, see Stanley’s *Lectures on the Jewish Church*, ii. 437 ff. [ATHALLAH.] H.

\* **RANSOM.** [PUNISHMENTS; SAVIOUR; SLAVE.]

**RAPHA** (רָפָא [quiet, silent; or perh. high, tall]: *Ῥαφαία*; [Vat. *Ραφαι*; Comp. *Ῥαφά*:] *Rapha*). Son of Binea, among the descendants of Saul and Jonathan (1 Chr. viii. 37). He is called *REPHALAH* in 1 Chr. ix. 43.

**RAPHAEL** (*Ῥαφαήλ* = רָפָאֵל, “the divine healer.” [*Raphael*]). “One of the seven holy angels which . . . go in and out before the glory of the Holy One” (Tob. xii. 15). According to another Jewish tradition, Raphael was one of the four angels which stood round the throne of God (Michael, Uriel, Gabriel, Raphael). His place is said to have been behind the throne, by the standard of Ephraim (comp. Num. ii. 18), and his name was interpreted as foreshadowing the healing of the schism of Jeroboam, who arose from that tribe (1 K. xi. 26; Buxtorf, *Lex. Rabb.* p. 47). In Tobit he appears as the guide and counsellor of Tobias. By his help Sara was delivered from her plague (vi. 16, 17), and Tobit from his blindness (xi. 7, 8). In the book of Enoch he appears as “the angel of the spirits of men” (xx. 3; comp. Dillmann, *ad loc.*). His symbolic character in the apocryphal narrative is clearly indicated when he describes himself as “Azarias the son of Ananias” (Tob. v. 12), the messenger of the Lord’s help, springing from the Lord’s mercy. [TOBIT.] The name occurs in 1 Chr. xxvi. 7 as a simple proper name. [REPHAEL.]

B. F. W.

**RAPHA’IM** ([Rom. omits; Alex.] *Ῥαφαιμ* [Sin. *Ραφαιμ*] = רָפָאִים, *Raphaim*). The name of an ancestor of Judith (Jud. viii. 1). In some MSS. this name, with three others, is omitted.

B. F. W.

**RAPHON** ([Mai] *Ῥαφειδν*; [Rom. Sin.] *lex.* and Joseph. *Ῥαφόν*; Pesh. *رَافُون*: *Raphon*).

A city of Gilead, under the walls of which Judas Maccabæus defeated Timotheus (1 Macc. v. 37 only). It appears to have stood on the eastern side of an important wady, and at no great distance from Carnaim — probably Ashteroth-Karnaim. It may have been identical with Raphana, which is mentioned by Pliny (*H. N.* v. 16) as one of the cities of the Decapolis, but with no specification of its position. Nor is there anything in the narrative of 1 Macc., of 2 Macc. (xii.), or of Josephus (*Ant.* xii. 8, § 3), to enable us to decide whether the torrent in question is the *Hieromaz* the *Zurka*, or any other.

In Kiepert’s map accompanying Wetzstein’s *Hauran*, etc. (1860), a place named *Er-Râfe* is marked, on the east of *Wady Hrêr*, one of the branches of the *Wady Mandhur*, and close to the great road leading to *Sanamein*, which last has some claims to be identified with Ashteroth-Karnaim. But in our present ignorance of the district this can only be taken as mere conjecture. If *Er-Râfe* be Raphana we should expect to find large ruins. G.

**RAPHU** (רָפְהִי [healed]: *Ῥαφου*: *Raphu*). The father of Palti, the spy selected from the tribe of Benjamin (Num. xiii. 9).

**RASSES. CHILDREN OF** (*ῥασῶν* *Ῥασῶν*; [Vat. Sin. Ald. *Ῥασσῆν*:] *filii Tharsis*). One of the nations whose country was ravaged by Holofernes in his approach to Judea (Jud. ii. 23 only). They are named next to Lud (Lydia), and apparently south thereof. The old Latin version reads *Thiras et Rasis*, with which the Peshito was probably in agreement before the present corruption of its text. Wolf (*Das Buch Judith*, 1861, pp. 95, 96) restores the original Chaldee text of the passage as Thars and Rosos, and compares the latter name with Rhosus, a place on the Gulf of Issus, between the *Itas el-Khanzir* (Rhosiscus scopulus) and *Iskenderin*, or Alexandretta. If the above restoration of the original text is correct, the interchange of Meshech and Rosos, as connected with Thar or Thiras (see Gen. x. 2), is very remarkable; since if Meshech be the original of Muscovy, Rosos can hardly be other than that of Russia. [ROSH.] G.

**RATHUMUS** [or RATHU’MUS] (*Ῥάθυμος*; Alex. [in ver. 16] *Ῥαθος*: *Rathimus*). “Rathumus the story writer” of 1 Esdr. ii. 16, 17, 25, 30, is the same as “RENUM the chancellor” of Ezr. iv. 8, 9, 17, 23.

**RAVEN** (רָעַב, *’ōrēb*: *κόραξ*: *corvus*), the well-known bird of that name which is mentioned in various passages in the Bible. There is no doubt that the Heb. *’ōrēb* is correctly translated, the old versions agreeing on the point, and the etymology, from a root signifying “to be black,” favoring this rendering. A raven was sent out by Noah from the ark to see whether the waters were abated (Gen. viii. 7). This bird was not allowed as food by the Mosaic law (Lev. xi. 15): the word *’ōrēb* is doubtless used in a generic sense, and includes other species of the genus *Corvus*, such as the crow (*C. corone*), and the hooded crow (*C. cornix*). Ravens were the means, under the Divine command, of supporting the prophet Elijah at the brook Cherith (1 K. xvii. 4, 6). They are expressly mentioned as instances of God’s protecting love and goodness (Job xxxviii. 41; Luke xii. 24; Ps. cxlvii. 9). They are enumerated with the owl, the bittern, etc.,

marking the desolation of Edom (Is. xxxiv. 11). "The locks of the beloved" are compared to the glossy blackness of the raven's plumage (Cant. v. 11). The raven's carnivorous habits, and especially his readiness to attack the eye, are alluded to in Prov. xxx. 17.

The LXX. and Vulg. differ materially from the Hebrew and our Authorized Version in Gen. viii. 7, for whereas in the Hebrew we read "that the raven went forth to and fro [from the ark] until the waters were dried up," in the two old versions named above, together with the Syriac, the raven is represented as "not returning until the water was dried from off the earth." On this subject the reader may refer to Houbigant (*Not. Crit.* i. 12), Bochart (*Hieroz.* ii. 801), Rosenmüller (*Schol. in V. T.*), Kalisch (*Genesis*), and Patrick (*Commentary*), who shows the manifest incorrectness of the LXX. in representing the raven as keeping away from the ark while the waters lasted, but as returning to it when they were dried up. The expression "to and fro" clearly proves that the raven must have returned to the ark at intervals. The bird would doubtless have found food in the floating carcasses of the deluge, but would require a more solid resting-ground than they could afford.

The subject of Elijah's sustenance at Cherith by means of ravens has given occasion to much fanciful speculation. It has been attempted to show that the 'ōrebīm ("ravens") were the people of Orbo, a small town near Cherith; this theory has been well answered by Reland (*Palest.* ii. 913). Others have found in the ravens merely merchants; while Michaelis has attempted to show that Elijah merely plundered the ravens' nests of hares and other game! Keil (*Comment in K.* xvii.) makes the following just observation: "The text knows nothing of bird-catching and nest-robbing, but acknowledges the Lord and Creator of the creatures, who commanded the ravens to provide his servant with bread and flesh." [CHERITH, Amer. ed.]

Jewish and Arabian writers tell strange stories of this bird and its cruelty to its young; hence, say some, the Lord's express care for the young ravens, after they had been driven out of the nests by the parent birds; but this belief in the raven's want of affection to its young is entirely without foundation. To the fact of the raven being a common bird in Palestine, and to its habit of flying restlessly about in constant search for food to satisfy its voracious appetite, may perhaps be traced the reason for its being selected by our Lord and the inspired writers as the especial object of God's providing care. The raven belongs to the order *Insectores*, family *Corvidæ*. W. H.

RA'ZIS ([Rom. Παζις; Alex.] Παζεις: *Razias*). "One of the elders of Jerusalem," who killed himself under peculiarly terrible circumstances, that he might not fall "into the hands of the wicked" (2 Macc. xiv. 37-46). In dying he is reported to have expressed his faith in a resurrection (ver. 46) — a belief elsewhere characteristic of the Maccabæan conflict. This act of suicide,

א 1. מִרְדָּה: σίδηρος, ξύρον: *novacula, ferrum*: from מִרְדָּה, "scrape," or "sweep." Gesenius connects it with the root מִרָּת, "to fear" (*Thes* p. 819).

2. מִצֵּר: ῥομφαία: *gladius*.

which was wholly alien to the spirit of the Jewish law and people (Ewald, *Alterth.* 198; John viii. 22 comp. Grot. *De Jure Belli*, ii. xix. 5), has been the subject of considerable discussion. It was quoted by the Donatists as the single fact in Scripture which supported their fanatical contempt of life (Aug. *Ep.* 104, 6). Augustine denies the fitness of the model, and condemns the deed as that of a man "non eligendæ mortis sapiens, sed ferendæ humilitatis impatiens" (Aug. *l. c.*; comp. *c. Gaul.* i. 36-39). At a later time the favor with which the writer of 2 Macc. views the conduct of Razis — a fact which Augustine vainly denies — was urged rightly by Protestant writers as an argument against the inspiration of the book. Indeed, the whole narrative breathes the spirit of pagan heroism, or of the later zealots (comp. *Jos. B. J.* iii. 7, iv. 1, § 10), and the deaths of Samson and Saul offer no satisfactory parallel (comp. Grimm, *ad loc.*). B. F. W.

RAZOR.<sup>a</sup> Besides other usages, the practice of shaving the head after the completion of a vow must have created among the Jews a necessity for the special trade of a barber (Num. vi. 9, 18, viii. 7; Lev. xiv. 8; Judg. xiii. 5; Is. vii. 20; Ez. v. 1, Acts xviii. 18). The instruments of his work were probably, as in modern times, the razor, the basin, the mirror, and perhaps also the scissors, such as are described by Lucian (*Adv. Indoct.* p. 395, vol. ii. ed. Amst.; see 2 Sam. xiv. 26). The process of oriental shaving, and especially of the head, is minutely described by Chardin (*Voy.* iv. 144). It may be remarked that, like the Levites, the Egyptian priests were accustomed to shave their whole bodies (Her. ii. 36, 37). H. W. P.

REA'IA (רֵאִיא) [*whom Jehovah sees*]: Ρηχά: *Reia*. A Reubenite, son of Micah, and apparently prince of his tribe (1 Chr. v. 5). The name is identical with

REA'IAH (רֵאִיָּה) [as above]: Ράδα; Alex. Ρεῖα: *Raia*. 1. A descendant of Shubal, the son of Judah (1 Chr. iv. 2).

2. (Ραῖδ, [Vat. Ρεχά], Ezr.; Ραῖδ, [Vat. FA. Ραεα], Neh.: *Raia*). The children of Reaiah were a family of Nethinim who returned from Babylon with Zerubbabel (Ezr. ii. 47; Neh. vii. 50). The name appears as AIRUS in 1 Esdr. v. 31.

\* REAPING. [AGRICULTURE; RUTH, BOOK OF.]

RE'BA (רֵבַע) [*four*]: Ροβək in Num., Ροβέ in Josh.: *Rebe*. One of the five kings of the Midianites slain by the children of Israel in their avenging expedition, when Balaam fell (Num. xxxi. 8; Josh. xiii. 21). The different equivalents for the name in the LXX. of Numbers and Joshua seem to indicate that these books were not translated by the same hand.

REBEC'CA (Ρεβέκκα: *Rebecca*). The Greek form of the name REBEKAH (Rom. ix. 10 only).

REBEK'AH (רֵבֶקָה), i. e. Ribkah [*cord with a noose*, then *ensnarer*]: Ρεβέκκα: *Rebecca*, daughter of Bethuel (Gen. xxii. 23) and sister of Laban, married to Isaac, who stood in the relation

3. רֵבַע: κουρέϊς: *tonsor* (2 Sam. xx. 8). In the Syriac Vers. of 2 Sam. xx. 8, *galobo* is "a razor" (*Ges.* p. 288).

of a first cousin to her father and to Lot. She is first presented to us in the account of the mission of Eliezer to Padan-aram (Gen. xxiv.), in which his interview with Rebekah, her consent and marriage, are related. The whole chapter has been pointed out as uniting most of the circumstances of a pattern-marriage. The sanction of parents, the guidance of God, the domestic occupation of Rebekah, her beauty, courteous kindness, willing consent and modesty, and success in retaining her husband's love. For nineteen years she was childless: then, after the prayers of Isaac and her journey to inquire of the Lord, Esau and Jacob were born, and while the younger was more particularly the companion and favorite of his mother (xxv. 19-28) the elder became a grief of mind to her (xxvi. 35). When Isaac was driven by a famine into the lawless country of the Philistines, Rebekah's beauty became, as was apprehended, a source of danger to her husband. But Abimelech was restrained by a sense of justice such as the conduct of his predecessor (xx.) in the case of Sarah would not lead Isaac to expect. It was probably a considerable time afterwards when Rebekah suggested the deceit that was practiced by Jacob on his blind father. She directed and aided him in carrying it out, foresaw the probable consequence of Esau's anger, and prevented it by moving Isaac to send Jacob away to Padan-aram (xxvii.) to her own kindred (xxix. 12). The Targum Pseudojon, states (Gen. xxxv. 8) that the news of her death was brought to Jacob at Allon-bachuth. It has been conjectured that she died during his sojourn in Padan-aram; for her nurse appears to have left Isaac's dwelling and gone back to Padan-aram before that period (compare xxiv. 59 and xxxv. 8), and Rebekah is not mentioned when Jacob returns to his father, nor do we hear of her burial till it is incidentally mentioned by Jacob on his death-bed (xlix. 31).

St. Paul (Rom. ix. 10) refers to her as being made acquainted with the purpose of God regarding her children before they were born.

For comments on the whole history of Rebekah, see Origen, *Hom. in Gen. x. and xii.*; Chrysostom, *Hom. in Genesis*, pp. 48-54. Rebekah's inquiry of God, and the answer given to her, are discussed by Deyling, *Obser. Sac. i.* 12, p. 53 seq., and in an essay by J. A. Schmid in *Nov. Thes. Theol.-Philolog. i.* 188. W. T. B.

\* RECEIPT OF CUSTOM (τελώνιον) denotes not so directly the act as the place of collecting customs. It is mentioned in the accounts of Matthew's call (Matt. ix. 9, Mark ii. 14, and Luke v. 27). Matthew was a tax-collector on the shore of the lake of Galilee, probably near Capernaum. The toll-house may have been a building or a booth merely with a seat and table. [PUBLICAN; TAXES.] H.

RE'CHAB (רֶכָב = horseman, from רָכַב, *re'cab*, "to ride": Πηχάβ: *Rechab*). Three persons bearing this name are mentioned in the O. T.

1. [Vat. in 1 Chr. Πηχα.] The father or ancestor of Jehonadab (2 K. x. 15, 23; 1 Chr. ii. 55; Jer. xxxv. 6-19), identified by some writers, but conjecturally only, with Hobab (Ariass) Tan-

mus on Judg. i.; Sanctius, quoted by Calmet, *Diss. sur les Rechabites*. [RECHABITES.]

2. One of the two "captains of bands" (ἡγεμόναι συστρεμμάτων, *principes latronum*), whom Ish-bosheth took into his service, and who, when his cause was failing, conspired to murder him (2 Sam. iv. 2). Josephus (*Ant. vii. 2, § 1*) calls him Θάννος. [BAANAH; ISH-BOSHETH, vol. ii. p. 1168.]

3. The father of Malchiah, ruler of part of Beth-hacceraim (Neh. iii. 14), named as repairing the Dung Gate in the fortifications of Jerusalem under Nehemiah. E. H. P.

RE'CHABITES (רֶכָבִים [horsemen]: Ἀρχαβείν: [Alex.] Ἀρχαβείν, [χαραβείν: Comp. Πηχαβείν, Πηχαβείμ:] *Rechabites*). The tribe thus named appears before us in one memorable scene. Their history before and after it lies in some obscurity. We are left to search out and combine some scattered notices, and to get from them what light we can.

(1.) In 1 Chr. ii. 55, the house of Rechab is identified with a section of the Kenites, who came into Canaan with the Israelites and retained their nomadic habits, and the name of Hammath is mentioned as the patriarch of the whole tribe. [KENITES: HEMATH.] It has been inferred from this passage that the descendants of Rechab belonged to a branch of the Kenites settled from the first at Jabez in Judah. [JEHONADAB.] The fact, however, that Jehonadab took an active part in the revolution which placed Jehu on the throne, seems to indicate that he and his tribe belonged to Israel rather than to Judah, and the late date of 1 Chr., taken together with other facts (*infra*), makes it more probable that this passage refers to the locality occupied by the Rechabites after their return from the Captivity. Of Rechab himself nothing is known. He may have been the father, he may have been the remote ancestor of Jehonadab. The meaning of the word makes it probable enough that it was an epithet passing into a proper name. It may have pointed, as in the robber-chief of 2 Sam. iv. 2, to a conspicuous form of the wild Bedouin life, and Jehonadab, the son of the *Rider*, may have been, in part at least, for that reason, the companion and friend of the fierce captain of Israel who drives as with the fury of madness (2 K. ix. 20).

Another conjecture as to the meaning of the name is ingenious enough to merit a disinterment from the forgotten learning of the sixteenth century. Boulduc (*De Eccles. ante Leg. iii. 10*) infers from 2 K. ii. 12, xiii. 14, that the two great prophets Elijah and Elisha were known, each of them in his time, as the chariot (רֶכָב). *Recheb*; of Israel, i. e. its strength and protection. He infers from this that the special disciples of the prophets, who followed them in all their austerity, were known as the "sons of the chariot," *B'né Recheb*, and that afterwards, when the original meaning had been lost sight of, this was taken as a patronymic, and referred to an unknown Rechab. At present, of course, the different vowel-points of the two words are sufficiently distinctive; but the strange reading of the LXX. in Judg. i. 19 (στὶ Πηχάβ διεστείλατο αὐτοῖς, where the A. V. has

• In confirmation of this view, it may be noticed that the "shearing-house" of 2 K. x. 14 was probably the known rendezvous of the nomad tribe of the

Kenites, with their flocks of sheep. [SHEARINGS HOUSE.]

"because they had *chariots* of iron") shows that one word might easily enough be taken for the other. Apart from the evidence of the name, and the obvious probability of the fact, we have the statement (*valent quantum*) of John of Jerusalem that Jehonadab was a disciple of Elisha (*De Instit. Monach.* c. 25).

(II.) The personal history of JEHOADAB has been dealt with elsewhere. Here we have to notice the new character which he impressed on the tribe, of which he was the head. As his name, his descent, and the part which he played indicate, he and his people had all along been worshippers of Jehovah, circumcised, and so within the covenant of Abraham, though not reckoned as belonging to Israel, and probably therefore not considering themselves bound by the Mosaic law and ritual. The worship of Baal introduced by Jezebel and Ahab was accordingly not less offensive to them than to the Israelites. The luxury and license of Phœnician cities threatened the destruction of the simplicity of their nomadic life (Amos ii. 7, 8, vi. 3-6). A protest was needed against both evils, and as in the case of Elijah, and of the Nazarites of Amos ii. 11, it took the form of asceticism. There was to be a more rigid adherence than ever to the old Arab life. What had been a traditional habit, was enforced by a solemn command from the sheikh and prophet of the tribe, the destroyer of idolatry, which no one dared to transgress. They were to drink no wine, nor build house, nor sow seed, nor plant vineyard, nor have any. All their days they were to dwell in tents, as remembering that they were strangers in the land (Jer. xxxv. 6, 7). This was to be the condition of their retaining a distinct tribal existence. For two centuries and a half they adhered faithfully to this rule; but we have no record of any part taken by them in the history of the period. We may think of them as presenting the same picture which other tribes, uniting the nomad life with religious austerity, have presented in later periods.

The Nabathæans, of whom Diodorus Siculus speaks (xix. 94) as neither sowing seed, nor planting fruit tree, nor using nor building house, and enforcing these transmitted customs under pain of death, give us one striking instance.<sup>a</sup> Another is found in the prohibition of wine by Mohammed (Sale's *Koran*, *Prelim. Diss.* § 5). A yet more interesting parallel is found in the rapid growth of the sect of the Wahabys during the last and present centuries. Abd-ul-Wahab, from whom the sect takes its name, reproduces the old type of character in all its completeness. Anxious to protect his countrymen from the revolting vices of the Turks, as Jehonadab had been to protect the Kenites from the like vices of the Phœnicians, the Bedouin reformer felt the necessity of returning to the old austerity of Arab life. What wine had

<sup>a</sup> The fact that the Nabathæans habitually drank "wild honey" (*μελι άγριον*) mixed with water (Diod. Sic. xix. 94), and that the Bœdouins as habitually still make locusts an article of food (Burrekhardt, *Bedouins*, p. 270), shows very strongly that the Baptist's life was fashioned after the Rechabite as well as the Nazarite type.

<sup>b</sup> It may be worth while to refer to a few authorities agreeing in the general interpretation here given, though differing as to details. Vatablus (*Crit. Sac.* in *oc.*) mentions a Jewish tradition (R. Judah, as cited by Kimchi, comp. Scaliger, *Elench. Trihaeres. Serrav.*

been to the earlier preacher of righteousness, the outward sign and incentive of a fatal corruption, opium and tobacco were to the later prophet, and, as such, were rigidly proscribed. The rapidity with which the Wahabys became a formidable party, the Puritans of Islam, presents a striking analogy to the strong political influence of Jehonadab in 2 K. x. 15, 23 (com.; Burekhardt, *Bedouins and Wahabys*, p. 283, &c.).

(III.) The invasion of Judah by Nebuchadnezzar in B. C. 607, drove the Rechabites from their tents. Possibly some of the previous periods of danger may have led to their settling within the limits of the territory of Judah. Some inferences may be safely drawn from the facts of Jer. xxxv. The names of the Rechabites show that they continued to be worshippers of Jehovah. They are already known to the prophet. One of them (ver. 3) bears the same name. Their rigid Nazarite life gained for them admission into the house of the Lord, into one of the chambers assigned to priests and Levites, within its precincts. They were received by the sons or followers of a "man of God," a prophet or devotee of special sanctity (ver. 4). Here they are tempted and are proof against the temptation, and their steadfastness is turned into a reproof for the unfaithfulness of Judah and Jerusalem. [JEREMIAH.] The history of this trial ends with a special blessing, the full import of which has, for the most part, not been adequately apprehended: "Jonadab, the son of Rechab, shall not want a man to stand before me forever" (ver. 19). Whether we look on this as the utterance of a true prophet, or as a *vatium ex eventu*, we should hardly expect at this precise point to lose sight altogether of those of whom they were spoken, even if the words pointed only to the perpetuation of the name and tribe. They have however, a higher meaning. The

words "to stand before me" (*עִמָּד לִפְנֵי*) are essentially liturgical. The tribe of Levi is chosen to "stand before" the Lord (Deut. x. 8, xvii. 5, 7). In Gen. xviii. 22; Judg. xx. 28; Ps. cxxxiv. 1; Jer. xv. 19, the liturgical meaning is equally prominent and unmistakable (comp. Gesen. *Thes.* s. v.; Grotius *in loc.*). The fact that this meaning is given ("ministering before me") in the Targum of Jonathan, is evidence (1) as to the received meaning of the phrase; (2) that this rendering did not shock the feelings of studious and devout Rabbis in our Lord's time; (3) that it was at least probable that there existed representatives of the Rechabites connected with the Temple services in the time of Jonathan. This then, was the extent of the new blessing. The Rechabites were solemnly adopted into the families of Israel, and were recognized as incorporated into the tribe of Levi.<sup>b</sup> Their purity, their faithfulness, their con-

p. 26) that the daughters of the Rechabites married Levites, and that thus their children came to minister in the Temple. Clarius (*Ibid.*) conjectures that the Rechabites themselves were chosen to sit in the great Council. Sanctius and Calmet suppose them to have ministered in the same way as the Nethinim (Calmet *Diss. sur les Rechab.* in *Com.* vi. p. xviii. 1720). Serrarius (*Trihaeres.*) identifies them with the Essenes. Scaliger (*l. c.*) with the Chasdim, in whose name the priests offered special daily sacrifices, and who, in this way, were "standing before the Lord" continually.

secrated life gained for them, as it gained for other Nazarites, that honor (comp. PRIESTS). In Lam. iv. 7, we may perhaps trace a reference to the Rechabites, who had been the most conspicuous examples of the Nazarite life in the prophet's time, and most the object of his admiration.

(IV.) It remains for us to see whether there are any traces of their after-history in the Biblical or later writers. It is believed that there are such traces, and that they confirm the statements made in the previous paragraph.

(1.) We have the singular heading of the Ps. lxxi. in the LXX. version ( $\tau\phi$  Δαυίδ, υἱῶν Ἰωνάδᾶβ, καὶ τῶν πρώτων αἰχμαλωτισθέντων), evidence, of course, of a corresponding Hebrew title in the 3d century B. C., and indicating that the "sons of Jonadab" shared the captivity of Israel, and took their place among the Levite psalmists who gave expression to the sorrows of the people.

(2.) There is the significant mention of a son of Rechab in Neh. iii. 14, as coöperating with the priests, Levites and princes in the restoration of the wall of Jerusalem.

(3.) The mention of the house of Rechab in 1 Chr. ii. 55, though not without difficulty, points, there can be little doubt, to the same conclusion.

The Rechabites have become scribes (סִפְרָיִם, *Sopherim*). They give themselves to a calling which, at the time of the return from Babylon, was chiefly if not exclusively in the hands of Levites. The other names (TIRATHITES, SHIMEATHITES, and SUCHATHITES in A. V.) seem to add nothing to our knowledge. The Vulg. rendering, however (evidence of a traditional Jewish interpretation in the time of Jerome) gives a translation based on etymologies, more or less accurate, of the proper names, which strikingly confirms the view now taken. "Cognationes quoque Scribarum habitantium in Jabes, canentes atque resonantes, et in tabernaculis commorantes." <sup>b</sup> Thus interpreted, the passage points to a resumption of the outward form of their old life and its union with their new functions. It deserves notice also that while in 1 Chr. ii. 54, 55, the Rechabites and Netophathites are mentioned in close connection, the "sons of the singers" in Neh. xii. 28 appear as coming in large numbers from the villages of the same Netophathites. The close juxtaposition of the Rechabites with the descendants of David in 1 Chr. iii. 1 shows also in how honorable an esteem they were held at the time when that book was compiled.

(4.) The account of the martyrdom of James the Just, given by Hegesippus (Eus. H. E. ii. 23), brings the name of the Rechabites once more before us, and in a very strange connection. While the Scribes and Pharisees were stoning him, "one of the priests of the sons of Rachab, the son of Rechabim, who are mentioned by Jeremiah the prophet," cried out, protesting against the crime. Dr. Stanley (*Sermons and Essays on the Apostolic Age*, p. 333), struck with the seeming anomaly of a

priest "not only not of Levitical, but not even of Jewish descent," supposes the name to have been used loosely as indicating the abstemious life of James and other Nazarites, and points to the fact that Epiphanius (*Hæc.* lxxviii. 14) ascribes to Symeon the brother of James the words which Hegesippus puts into the mouth of the Rechabite, as a proof that it denoted merely the Nazarite form of life. Calmet (*Diss. sur les Rechab.* l. c.) supposes the man to have been one of the Rechabite Nethinim, whom the informant of Hegesippus took, in his ignorance, for a priest. The view which has been here taken presents, it is believed, a more satisfactory solution. It was hardly possible that a writer like Hegesippus, living at a time when the details of the Temple-services were fresh in the memories of men, should have thus spoken of the Rechabim unless there had been a body of men to whom the name was commonly applied. He uses it as a man would do to whom it was familiar, without being struck by any apparent or real anomaly. The Targum of Jonathan on Jer. xxxv. 19 indicates, as has been noticed, the same fact. We may accept Hegesippus therefore as an additional witness to the existence of the Rechabites as a recognized body up to the destruction of Jerusalem, sharing in the ritual of the Temple, partly descended from the old "sons of Jonadab," partly recruited by the incorporation into their ranks of men devoting themselves, as did James and Symeon, to the same consecrated life. The form of austere holiness presented in the life of Jonadab, and the blessing pronounced on his descendants, found their highest representatives in the two Brothers of The Lord.

(5.) Some later notices are not without interest. Benjamin of Tudela, in the 12th century (Edit. Asher, 1840, i. 112-114), mentions that near El-Jubar (= Pumbenitha) he found Jews who were named Rechabites. They tilled the ground, kept flocks and herds, abstained from wine and flesh, and gave tithes to teachers who devoted themselves to studying the Law, and weeping for Jerusalem. They were 100,000 in number, and were governed by a prince, Salomon han-Nasi, who traced his genealogy up to the house of David, and ruled over the city of Thema and Telmas. A later traveller, Dr. Wolff, gives a yet stranger and more detailed report. The Jews of Jerusalem and Yemen told him that he would find the Rechabites of Jer. xxxv. living near Mecca (*Journal*, 1829, ii. 334). When he came near Senaa he came in contact with a tribe, the Beni-Khahr, who identified themselves with the sons of Jonadab. With one of them, Mousa, Wolff conversed, and reports the dialogue as follows: "I asked him, 'Whose descendants are you?' Mousa answered, 'Come, and I will show you,' and read from an Arabic Bible the words of Jer. xxxv. 5-11. He then went on. 'Come, and you will find us 60,000 in number. You see the words of the Prophet have been fulfilled, Jonadab the son of Rechab shall not want a man to stand before me forever'" (*ibid.* p. 335). In a later

<sup>a</sup> Neither Ewald nor Hengstenberg nor De Wette notices this inscription. Ewald, however, refers the Psalm to the time of the Captivity. Hengstenberg, who asserts its Davidic authorship, indicates an alphabetic relation between it and Ps. lxx., which is at least presumptive evidence of a later origin, and points, with some fair probability, to Jeremiah as the writer. (Comp. LAMENTATIONS.) It is noticed, how-

ever, by Augustine (*Enarr.* in Ps. lxx. § 2), and is referred by him to the Rechabites of Jer. xxxv.

<sup>b</sup> The etymologies on which this version rests are. It must be confessed, somewhat doubtful. Scaliger (*Elench. Tihar. Serræ.* c. 23) rejects them with scorn. Pellican and Calmet, on the other hand, defend the Vulg. rendering, and Gill (*in loc.*) does not dispute it. Most modern interpreters follow the A. V. in taking the words as proper names.

ournal (*Journ.* 1839, p. 389) he mentions a second interview with Moisa, describes them as keeping strictly to the old rule, calls them now by the name of the B'nê-Arab, and says that B'nê Israel of the tribe of Dan live with them.<sup>a</sup> E. H. P.

RE'CHAH (רְחָה) [*hinder part, recess*]: רְחָה; Alex. Ρηφα; [Comp. Ρηχαδ]: *Rechah*. In 1 Chr. iv. 12, Beth-Rapha, Paseah, and Tehinah the father, or founder, of Ir-nahash, are said to have been the "men of Rechah." In the Targum of R. Joseph they are called "the men of the great Sanhedrin," the Targumist apparently reading רְחָה.

RECORDER (רִשְׁמֵר), an officer of high rank in the Jewish state, exercising the functions, not simply of an annalist, but of chancellor or president of the privy council. The title itself may perhaps have reference to his office as adviser of the king; at all events the notices prove that he was more than an annalist, though the superintendence of the records was without doubt entrusted to him. In David's court the recorder appears among the high officers of his household (2 Sam. viii. 16, xx. 24; 1 Chr. xviii. 15). In Solomon's, he is coupled with the three secretaries, and is mentioned last, probably as being their president (1 K. iv. 3). Under Hezekiah, the recorder, in conjunction with the prefect of the palace and the secretary, represented the king (2 K. xviii. 18, 37): the patronymic of the recorder at this time, Joah the son of Asaph, makes it probable that he was a Levite. Under Josiah, the recorder, the secretary, and the governor of the city were entrusted with the superintendence of the repairs of the Temple (2 Chr. xxxiv. 8). These notices are sufficient to prove the high position held by him. [TOWN CLERK] W. L. B.

\* RED. [COLORS, 3.]

RED-HEIFER. [SIN-OFFERING.]

RED SEA. The sea known to us as the Red Sea was by the Israelites called "the sea" (יָם־הַאֲדֹמִים), Ex. xiv. 2, 9, 16, 21, 28; xv. 1, 4, 8, 10, 19; Josh. xxiv. 6, 7; and many other passages; and specially "the sea of sūph" (יָם־סוּפְהַיִם), Ex. x. 19, xiii. 18, xv. 4, 22, xxiii. 31; Num. xiv. 25, xxi. 4, xxxiii. 10, 11; Deut. i. 40, xi. 4; Josh. ii. 10, iv. 23, xxiv. 6; Judg. xi. 16; 1 K. ix. 26; Neh. ix. 9; Ps. cvi. 7, 9, 22, cxxxvi. 13, 15; Jer. xlix. 21). It is also perhaps written יָם־רֹדֶן (*Zaōb*, LXX.) in Num. xxi. 14, rendered "Red Sea" in A. V.; and in like manner, in Deut. i. 1, יָם־רֹדֶן, without יָם. The LXX. always render it ἡ ἔρυθρὰ θάλασσα

<sup>a</sup> A paper "On Recent Notices of the Rechabites," by Signor Pierotti, has been read, since the above was in type, at the Cambridge Meeting of the British Association (October, 1832). He met with a tribe calling themselves by that name near the Dead Sea, about two miles S. E. from it. They had a Hebrew Bible. and said their prayers at the tomb of a Jewish Rabbi. They told him precisely the same stories as had been old to Wolff thirty years before.

<sup>b</sup> Or, as some Arab authors say, the sea is so named from the drowning of Pharaoh's host; Kulzum being a

derivative of قَلْزَم, with this signification: or, according to others, from its being hemmed in by moun-

(except in *Juzg.* xi. 16, where רְחָה, סֵפֶה, is preserved). So too in N. T. (*Acts* vii. 36; *Ileb.* xi. 29); and this name is found in 1 Macc. iv. 9. By the classical geographers this appellation, like its Latin equivalent *Mare Rubrum* or *M. Erythræum*, was extended to all the seas washing the shores of the Arabian peninsula, and even the Indian Ocean: the Red Sea itself, or Arabian Gulf, was δ' Ἀραβίους κόλπος, or Ἀραβικὸς κ., or *Sinus Arabicus*, and its eastern branch, or the Gulf of the 'Akabeh, Αἰθιοπίας, Ἐλαινίτης, Ἐλαινιτικὸς κόλπος, *Sinus Elnites*, or *S. Elniticus*. The Gulf of Suez was specially the Heroöpolite Gulf, Ἡρωσπολίτης κόλπος, *Sinus Heroöpolites*, or *S. Heroöpoliticus*. Among the peoples of the East, the Red Sea has for many centuries lost its old names: it is now called generally by the Arabs, as it was in medieval times, Bahr El-Kulzum, "the sea of El-Kulzum," after the ancient Clysma, "the sea beach," the site of which is near, or at, the modern Suez.<sup>b</sup> In the Kur-án, part of its old name is preserved, the rare Arabic word *yamm* being used in the account of the passage of the Red Sea (see also footnote to p. 1012, *infra*, and El-Beydáwee's *Comment. on the Kur-án*, vii. 132, p. 341; and xx. 81, p. 602).<sup>c</sup>

Of the names of this sea (1) יָם־סוּפְהַיִם (Syr. ܣܘܦܗܝܝܡ) and ܣܘܦܗܝܝܡ — the latter generally "a lake;"

Hierog. YUMA; Copt. 𐩲𐩺𐩠𐩢𐩰; Arabic, یم, signifies "the sea," or any sea. It is also applied to the Nile (exactly as the Arabic *bahr* is so applied) in Nah. iii. 8, "Art thou better than populous No, that was situate among the rivers (*yeōrīm*), [that had] the waters round about it, whose rampart [was] the sea (*yām*), and her wall was from the sea (*yām*)?"<sup>e</sup>

(2.) יָם־רֹדֶן; in the Coptic version, 𐩲𐩺𐩠𐩢𐩰 𐩲𐩺𐩠𐩢𐩰. The meaning of *sūph*, and the reason of its being applied to the sea, have given rise to much learned controversy. Gesenius renders it *rush*, *reed*, *sea-weed*. It is mentioned in the O. T. almost always in connection with the sea of the Exodus. It also occurs in the narrative of the exposure of Moses in the יָם־רֹדֶן (*yeōr*); for he was laid in *sūph*, on the brink of the *yeōr* (Ex. ii. 3), where (in the *sūph*) he was found by Pharaoh's daughter (5); and in the "burden of Egypt" (Is. xix.), with the drying up of the waters of Egypt: "And the waters shall fail from the sea (*yām*), and the river (*nāhār*) shall be wasted and dried up. And they shall turn the rivers (*nāhār*, constr. pl.) far away; [and] the brooks (*yeōr*) of defense (or

tains, from the same root) El-Makreezee's *Khitat*, descr. of the Sea of El-Kulzum).

<sup>c</sup> Its general name is "the Sea of El-Kulzum;" but in different parts it is also called after the nearest coast, as "the sea of the Hījáz," etc. (Yákoob, in the *Moajam*).

<sup>d</sup> *Yamm* signifies a *bahr* of which the bottom is not reached. *Bahr* applies to a "sea" or a "great river."

<sup>e</sup> Gesenius adds Is. xix. 5, quoted below; but it is not easy to see why this should be the Nile (except from preconceived notions), instead of the ancient extension of the Red Sea. "He allows the 'tongue of the Egyptian sea (*yām*)'" in Is. xi. 15, where the river [Nile] is *nāhār*.

of Egypt?) shall be emptied and dried up: the reeds and flags (*sûph*) shall wither. The paper reeds<sup>a</sup> by the brooks (*yeôr*), by the mouth of the brooks (*yeôr*), and everything sown by the brooks (*yeôr*), shall wither, be driven away, and be no [more]. The fishers also shall mourn, and all they that cast angle into the brooks (*yeôr*) shall lament, and they that spread nets upon the waters shall languish. Moreover they that work in fine flax, and they that weave net works (white linen?) shall be confounded. And they shall be broken in the purposes thereof, all that makes sluices [and] ponds for fish" (xix. 5-10). *Sûph* only occurs in one place besides those already referred to: in Jon. ii. 5, it is written, "The waters compassed me about, [even] to the soul; the depth closed me round about, the weeds (*sûph*) were wrapped about my head." With this single exception, which shows that this product was also found in the Mediterranean, *sûph* is Egyptian, either in the Red Sea, or in the *yeôr*, and this *yeôr* in Ex. ii. was in the land of Goshen. What *yeôr* signifies here, in Is. xix., and generally, we shall examine presently. But first of *sûph*.

The signification of כֹּהַף, *sûph*, must be gathered from the foregoing passages. In Arabic, the word, with this signification (which commonly is "wool"), is found only in one passage in a rare lexicon (the *Mohkam* MS.). The author says, "Soof-el-bahr (the soof of the sea) is like the wool of sheep. And the Arabs have a proverb: 'I will come to thee when the sea ceases to wet the soof,'" i. e. never. The כֹּהַף of the יָם, it seems quite certain, is a sea-weed resembling wool. Such sea-weed is thrown up abundantly on the shores of the Red Sea. Fürst says, s. v. כֹּהַף, "Ab Æthiopicus herba quedam *supho* appellabatur, quæ in profundo maris rubri crescit, quæ rubra est, rubrumque colorem continet, pannis tingendis inservientem, teste Hieronymo de qualitate maris rubri" (p. 47, &c.). Diodorus (iii. ch. 19), Artemidorus (ap. Strabo, p. 770), and Agatharchides (ed. Müller, p. 136-37), speak of the weed of the Arabian Gulf. Ehrenberg (in Winer) enumerates *Fucus latifolius* on the shores of this sea, and at Suez *Fucus crispus*, *F. trinodis*, *F. turbinatus*, *F. papillosus*, *F. diaphanus*, etc., and the specially red weed *Trichodesmium crythraeum*. The Coptic version renders *sûph* by *shari* (see above), supposed to be the hieroglyphic "SHER" (sea?). If this be the same as the *sari* of Pliny (see next paragraph), we must conclude that *shari*, like *sûph*, was both marine and fluvial. The passage in Jonah proves it to be a marine product; and that it was found in the Red Sea, the numerous passages in which that sea is called the sea of *sûph* leave no doubt.

But כֹּהַף may have been also applied to any substance resembling wool, produced by a fluvial rush, such as the papyrus, and hence by a synecdoche to such rush itself. Golius says, s. v.

<sup>a</sup> Heb. עֲרוֹרֶת, rendered by the LXX. ἄχρα, ἄχρα.

The Greek being derived from עֲרוֹרֶת: an Egyptian word denoting "marsh-grass, reeds, bulrushes, and any verdure growing in a marsh." Gesenius renders עֲרוֹרֶת "עֲרוֹרֶת, a naked or bare place, i. e. destitute

بَرْدِي, on the authority of Ibn-Maaroof (after

explaining بَرْدِي by "papyrus herba"), "Hinc

تطن البردي [the cotton of the papyrus]

gossippium papyri, quod *lanæ* simile ex thyrso colligitur, et permixtum calci efficit tenacissimum cæmenti genus." This is curious; and it may also be observed that the papyrus, which included more than one kind of *cyperus*, grew in the marshes, and in lands on which about two feet in depth of the waters of the inundation remained (Wilkinson's *Ancient Egyptians*, iii. 61, 149, citing Pliny, xiii. 11; Strab. xvii. 550); and that this is agreeable to the position of the ancient head of the gulf, with its canals and channels for irrigation (*yeôrîm*?) connecting it with the Nile and with Lake Marcotis; and we may suppose that in this and other similar districts, the papyrus was cultivated in the *yeôrîm*: the marshes of Egypt are now in the north of the Delta and are salt lands. — As a fluvial rush, *sûph* would be found in marsh-lands as well as streams, and in brackish water as well as in sweet. It is worthy of note that a low marshy place near the ancient head of the gulf is to this day called *Ghuweybet el-Boos*, "the bed of reeds," and another place near Suez has the same name; traces perhaps of the great fields of reeds, rushes, and papyrus, which flourished here of old. See also ΠΙ-ΠΛΗ-ΡΟΤΗ, "the place where sedge grows" (?). Fresnel (*Dissertation sur le shari des Égyptiens et le souf des Hébreux, Journ. Asiat.* 4<sup>e</sup> série, xi. pp. 274, &c.) enumerates some of the reeds found in Egypt. There is no sound reason for identifying any one of these with *sûph*. Fresnel, in this curious paper, endeavors to prove that the Coptic "shari" (in the *yam shari*) was the *Arundo Ægyptiaca* of Desfontaines (in modern Arabic *boos Fârisee*, or Persian cane); but there appear to be no special grounds for selecting this variety for identification with the fluvial shari; and we must entirely dissent from his suggestion that the shari of the Red Sea was the same, and not sea-weed: apart from the evidence which controverts his arguments, they are in themselves quite inconclusive. Sir Gardiner Wilkinson's catalogue of reeds, etc., is fuller than Fresnel's, and he suggests the *Cyperus Dives* or *fastigiatus* (Arabic, *Dees*) to be the sari of Pliny. The latter says, "Fructicosi est genus sari, circa Nilum nascens, duorum fore cubitum altitudine, pollicari crassitudine, coma papyri, simileque manditur modo" (*H. N.* xiii. 23; see also Theophr. iv. 9).

The occurrence of *sûph* in the *yeôr* (Ex. ii., Isa. xix.) in the land of Goshen (Ex. ii.), brings us to a consideration of the meaning of the latter, which in other respects is closely connected with the subject of this article.

(3.) יָאֵר; (Hierog. ATUR, AUR; Copt. ΕΙΣΡΟ,

of trees. . . . here used of the grassy places on the banks of the Nile;" but this is unsatisfactory. Boothroyd says "Our translators, after others, supposed this word to signify the papyrus; but without any just authority. Kimchi explains, 'Aroth est nomen appellativum olerum et herbarum virentium.' Hence we may render, 'The marshy [sic] meadows [sic] at the mouth of the river,' etc.

אֲרוֹ, יַאֲרֻ, Memphitic dialect, יַעֲרוֹ,

Salidic) signifies "a river." It seems to apply to "a great river," or the like, and also to "an arm of the sea;" and perhaps to "a sea" absolutely; like the Arabic *bahr*. Gesenius says it is almost exclusively used of the Nile; but the passages in which it occurs do not necessarily bear out this conclusion. By far the greater number refer to the sojourn in Egypt: these are Gen. xli. 1, 2, 3, 17, 18, Pharaoh's dream; Ex. i. 22, the exposure of the male children; Ex. ii. 3, 5, the exposure of Moses; Ex. vii. 15 ff, and xvii. 5, Moses before Pharaoh and the plague of blood; and Ex. viii. 5, 7, the plague of frogs. The next most important instance is the prophecy of Isaiah, already quoted in full. Then, that of Amos (viii. 8, comp. ix. 5), where the land shall rise up wholly as a flood (*yeôr*); and shall be cast out and drowned as [by] the flood (*yeôr*) of Egypt. The great prophecy of Ezekiel against Pharaoh and against all Egypt, where Pharaoh is "the great dragon that lieth in the midst of his rivers (יַרְדֵּינִי) which hath said, My river (יַרְדֵּינִי) is mine own, and I have made [it] for myself" (xxix. 3), uses the pl. throughout, with the above exception and verse 9, "because he hath said, The river (יַרְדֵּינִי) [is] mine, and I have made it." It cannot be supposed that Pharaoh would have said of the Nile that he had made it, and the passage seems to refer to a great canal. As Ezekiel was contemporary with Pharaoh Necho, may he not here have referred to the reëxcavation of the canal of the Red Sea by that Pharaoh? That canal may have at least received the name of the canal of Pharaoh, just as the same canal when reëxcavated for the last time was "the canal of the Prince of the Faithful," and continued to be so called. *Yêôr* occurs elsewhere only in Jer. xli. 7, 8, in the prophecy against Necho; in Isa. xxiii. 10, where its application is doubtful; and in Dan. xii. 5, 6, where it is held to be the Euphrates, but may be the great canal of Babylon. The pl. *yeôr'im*, seems to be often used interchangeably with *yeôr* (as in Ez. xxix., and Nah. iii. 8); it is used for "rivers," or "channels of water;" and, while it is not restricted to Egypt, especially of those of the Nile.

From a comparison of all the passages in which it occurs there appears to be no conclusive reason for supposing that *yeôr* applies generally, if ever, to the Nile. In the passages relating to the exposure of Moses it appears to apply to the ancient extension of the Red Sea towards Tanis (ZOAN, Avaris), or to the ancient canal (see below) through which the water of the Nile passed to the "tongue of the Egyptian Sea." The water was potable (Ex. vii. 13., but so is that of the Lake of the Feiyoom to its own fishermen, though generally very brackish: and the canal must have received water from the Nile during every inundation, and then must have been sweet. During the height of the inundation, the sweet water would flow into the Red Sea. The passage of the canal was regulated by sluices, which

<sup>a</sup> The Mohammedan account of the exposure of Moses is curious. Moses, we read, was laid in the *zamm* (which is explained to be the Nile, though that river is not elsewhere so called), and the ark was carried by the current along a canal or small river (*nahr*) to a lake, at the further end of which was Pharaoh's pavilion (El-Beydawee's *Comment. on the Kur-ân*, xx. B, p. 595, and Ez-Zamakhsheer's *Comment.*, entitled the *Keshîf*). While we place no dependence on Mo-

excluded the waters of the Red Sea and sweetened by the water of the canal the salt lakes. Strabo (xvii. 1, § 25) says that they were thus rendered sweet, and in his time contained good fish and abounded with water fowl: the position of these lakes is more conveniently discussed in another part of this article, on the ancient geography of the head of the gulf. It must not be forgotten that the Pharaoh of Moses was of a dynasty residing at Tanis, and that the extension of the Red Sea, "the tongue of the Egyptian Sea," stretched in ancient times into the borders of the land of Goshen, about 50 miles north of its present head, and half-way towards Tanis. There is abundant proof of the former cultivation of this country, which must have been effected by the canal from the Nile just mentioned, and by numerous canals and channels for irrigation, the *yeôr'im*, so often mentioned with the *yeôr*. There appears to be no difficulty in Isa. xix. 6 (comp. xi. 15), for, if the Red Sea became closed at Suez or thereabout, the *sûph* left on the beaches of the *yeôr* must have dried up and rotted. The ancient beaches in the tract here spoken of, which demonstrate successive elevations, are well known.<sup>a</sup>

(4.) Ἡ ἐρυθρὰ θάλασσα. The origin of this appellation has been the source of more speculation even than the obscure *sûph*; for it lies more within the range of general scholarship. The theories advanced to account for it have been often puerile, and generally unworthy of acceptance. Their authors may be divided into two schools. The first have ascribed it to some natural phenomenon; such as the singularly red appearance of the mountains of the western coast, looking as if they were sprinkled with Havannah or Brazil snuff, or brick-dust (Bruce), or of which the redness was reflected in the waters of the sea (Gosselin, ii. 78-84); the red color of the water sometimes caused by the presence of zoöphytes (Salt; Ehrenberg); the red coral of the sea; the red sea-weed; and the red storks that have been seen in great numbers, etc. Reland (*De Mare Rubro*, *Diss. Miscell.* i. 59-117) argues that the epithet red was applied to this and the neighboring seas on account of their tropical heat; as indeed was said by Artemidorus (*ap. Strabo*, xvi. 4, 20), that the sea was called red because of the reflection of the sun. The second have endeavored to find an etymological derivation. Of these the earliest (European) writers proposed a derivation from Edom, "red," by the Greeks translated literally. Among them were N. Fuller (*Miscell. Sacr.* iv. c. 20); before him, Scaliger, in his notes to *Festus*; voce *Ægyptios*, ed. 1574; and still earlier Genebrard, *Comment. ad Ps.* 106; Bochart (*Phaleg*, iv. c. 34) adopted this theory (see Reland, *Diss. Miscell.* i. 85, ed. 1706). The Greeks and Romans tell us that the sea received its name from a great king, Erythras, who reigned in the adjacent country (Strab. xvi. 4, § 20; Pliny, *H. N.* vi. cap. 23, § 28; Agatharch. i. § 5; Philostr. iii. 15, and others);<sup>b</sup> the stories that have come down to us appear to be distortions of the tra-

hammedan relations of Biblical events, there may be here a glimmer of truth.

<sup>b</sup> Reland (*Diss. Miscell.* i. 87, &c.) is pleasantly severe on the story of king Erythras; but, with all his rare learning, he was ignorant of Arab history, which is here of the utmost value, and of the various proof of a connection between this Erythras and Himyer and the Phœnicians in language, race, and religion. Besides, Reland had a theory of his own to support.

lition that Himyer was the name of apparently the chief family of Arabia Felix, the great South-Arabian kingdom, whence the Himyerites, and Homeritæ. Himyer appears to be derived from the Arabic "ahmar," red (Himyer was so called because of the red color of his clothing, *En-Nuceyree in Caussin*, i. 54): "aaar" also signifies "red," and is the root of the names of several places in the peninsula so called on account of their redness (see *Murdsid*, 263, &c.); this may point to Ophir: *φωμῆς* is red, and the Phœnicians came from the Erythræan Sea (Herod. vii. 89). We can scarcely doubt, on these etymological grounds,<sup>a</sup> the connection between the Phœnicians and the Himyerites, or that in this is the true origin of the appellation of the Red Sea. But when the ethnological side of the question is considered, the evidence is much strengthened. The South-Arabian kingdom was a Joktanite (or Shemite) nation mixed with a Cushite. This admixture of races produced two results (as in the somewhat similar cases of Egypt, Assyria, etc.): a genius for massive architecture, and rare seafaring ability. The Southern-Arabians carried on all the commerce of Egypt, Palestine, and Arabia, with India, until shortly before our own era. It is unnecessary to insist on this Phœnician characteristic, nor on that which made Solomon call for the assistance of Hiram to build the Temple of Jerusalem. The Philistine, and early Cretan and Carian, colonists may have been connected with the South-Arabian race. If the Assyrian school would trace the Phœnicians to a Chaldaean or an Assyrian origin, it might be replied that the Cushites, whence came Nimrod, passed along the south coast of Arabia, and that Berosus (in Cory, 2d ed. p. 60) tells of an early Arab domination of Chaldaea before the Assyrian dynasty, a story also preserved by the Arabian historians (*El-Mes'oodee, Golden Meadows*, MS.). The Red Sea, therefore, was most probably the Sea of the Red men. It adds a link to the curious chain of emigration of the Phœnicians from the Yemen to Syria, Tyre, and Sidon, the shores and islands of the Mediterranean, especially the African coasts of that sea, and to Spain and the far-distant northerly ports of their commerce; as distant, and across oceans as terrible, as those reached by their Himyerite brethren in the Indian and Chinese Seas.

*Ancient Limits.*—The most important change in the Red Sea has been the drying up of its northern extremity, "the tongue of the Egyptian Sea." The land about the head of the gulf has risen, and that near the Mediterranean become depressed. The head of the gulf has consequently retired gradually since the Christian era. Thus the prophecy of Isaiah has been fulfilled: "And the Lord shall utterly destroy the tongue of the Egyptian sea" (xi. 15); "the waters shall fail from the sea" (xix. 5): the tongue of the Red Sea has dried up for a distance of at least 50 miles from its ancient head, and a cultivated and well-peopled province has been changed into a desolate wilderness. An ancient canal conveyed the waters of the Nile to the Red

Sea, flowing through the *Wâdi-t-Tumeylât* and irrigating with its system of water-channels a large extent of country; it also provided a means for conveying all the commerce of the Red Sea, once so important, by water to the Nile, avoiding the risks of the desert journey, and securing water-carriage from the Red Sea to the Mediterranean. The drying up of the head of the gulf appears to have been one of the chief causes of the neglect and ruin of this canal.

The country, for the distance above indicated, is now a desert of gravelly sand, with wide patches about the old sea-bottom, of rank marsh land, now called the "Bitter Lakes" (not those of Strabo). At the northern extremity of this salt waste is a small lake sometimes called the Lake of Heroöpolis (the city after which the Gulf of Suez was called the Heroöpolite Gulf): the lake is now *Birket et-Tinsâh*, "the lake of the Crocodile," and is supposed to mark the ancient head of the gulf. The canal that connected this with the Nile was of Pharaonic origin.<sup>b</sup> It was anciently known as the "Fossa Regum," and the "canal of Hero." Pliny, Diodorus, and Strabo, state that (up to their time) it reached only to the bitter springs (which appear to be not the present bitter lakes, but lakes west of Heroöpolis), the extension being abandoned on account of the supposed greater height of the waters of the Red Sea. According to Herod. (ii. cap. 158) it left the Nile (the Tanitic branch, now the canal of *El-Mo'izz*) at Bubastis (Pi-beseth), and a canal exists at this day in this neighborhood, which appears to be the ancient channel. The canal was four days' voyage in length, and sufficiently broad for two *triremes* to row abreast (Herod. ii. 158 or 100 cubits, Strab. xvii. 1, § 26; and 100 feet, Pliny, vi. cap. 29, § 33). The time at which the canal was extended, after the drying up of the head of the gulf, to the present head is uncertain, but it must have been late, and probably since the Mohammedan conquest. Traces of the ancient channel throughout its entire length to the vicinity of Bubastis, exist at intervals in the present day (*Descr. de l'Égypte*, E. M. xi. 37-381, and v. 153-158, 8vo ed.). The *Amnis Trajanus* (Ἰσχυρὸς ποταμὸς, pt. iv. 5, § 54), now the canal of Cairo, was probably of Pharaonic origin; it was at any rate repaired by the emperor Adrian; and it joined the ancient canal of the Red Sea between Bubastis and Heroöpolis. At the Arab conquest of Egypt, this was found to be closed, and was reopened by 'Amr by command of 'Omar, after whom it was called the "canal of the Prince of the Faithful." Country-boats sailed down it (and passed into the Red Sea to Yembo'—see "Shems ed-Deen" in *Descr. de l'Égypte*, 8vo ed. xi. 359), and the water of the Nile ran into the sea at *El-Kulzum*; but the former commerce of Egypt was not in any degree restored; the canal was opened with the intention of securing supplies of grain from Egypt in case of famine in Arabia; a feeble intercourse with the newly-important holy cities of Arabia, to provide for the wants of the pilgrims, was its principal use.

<sup>a</sup> If we concede the derivation, it cannot be held that the Greeks mistranslated the name of Himyer. (See *Reland, Diss. Miscell.* i. 101.) It is worthy of mention that the Arabs often call themselves "the red men," as distinguished from the black or negro, and the yellow or Turanian, races; though they call themselves "the black," as distinguished from the more northern races, whom they term "the red;" as this

epithet is used by them, when thus applied, as meaning both "red" and "white."

<sup>b</sup> Commenced by Sosöstris (Aristot. *Meteor.* i. 14, Strab. i. and xvii.; Plin. *Hist. Nat.* vi. 29; Herod. ii. 153; Diod. i. 83) or by Necho II., most probably the former; continued by Darius Hystaspis, and by Pto' Philadelphus. See *Encyc. Brit. art.* "Egypt."

In A. II. 105, El-Mansoor ordered it to be filled up (the *Khīat*, Descr. of the Canals), in order to cut off supplies to the Shiya'ee heretics in *El-Medeeneh*. Now it does not flow many miles beyond Cairo, but its channel is easily traceable.

The land north of the ancient head of the gulf is a plain of heavy sand, merging into marsh-land near the Mediterranean coast, and extending to Palestine. We learn from El-Makreezee that a tradition existed of this plain having been formerly well cultivated with saffron, safflower, and sugarcane, and peopled throughout, from the frontier-town of *El-'Areeeh* to *El-'Abbāseh* in *Wādī-t-Tumeylāt* (see EXODUS, THE, *Map*; *The Khīat*, s. v. *Jifār*; comp. *Marāsīd*, ib.). Doubtless the drying up of the gulf with its canal in the south, and the depression of the land in the north, have converted this once (if we may believe the tradition, though we cannot extend this fertility as far as *El-'Areeeh*) notoriously fertile tract into a proverbially sandy and parched desert. This region, including *Wādī-t-Tumeylāt*, was probably the frontier land occupied in part by the Israelites, and open to the incursions of the wild tribes of the Arabian desert; and the *ye'ār*, as we have given good reason for believing, in this application, was apparently the ancient head of the gulf or the canal of the Red Sea, with its *ye'ārīm* or water-channels, on which Goshen and much of the plain north of it depended for their fertility.

*Physical Description.*—In extreme length, the Red Sea stretches from the *Straits of Bāb el-Mendeḅ* (or rather *Rās Dāḅ el-Mendeḅ*) in lat. 12° 40' N., to the modern head of the Gulf of Suez, lat. 30' N. Its greatest width may be stated roughly at about 200 geographical miles; this is about lat. 16° 30', but the navigable channel is here really narrower than in some other portions, groups of islands and rocks stretching out into the sea, between 30 and 40 miles from the Arabian coast, and 50 miles from the African coast. From shore to shore, its narrowest part is at *Rās Benās* lat. 24°, on the African coast, to *Rās Bereedeē* opposite, a little north of *Yembo'*, the port of *El-Medeeneh* and thence northwards to *Rās Moḥammad* (i. e. exclusive of the Gulfs of Suez and the 'Akabeh), the sea maintains about the same average width of 100 geographical miles. Southwards from *Rās Benās*, it opens out in a broad reach; contracts again to nearly the above narrowness at *Jeddah* (correctly *Juddah*), lat. 21° 30', the port of *Mekkeh*; and opens to its extreme width south of the last-named port.

At *Rās Moḥammad*, the Red Sea is split by the gigantic peninsula of Sinai into two gulfs: the westernmost, or Gulf of Suez, is now about 130 geographical miles in length, with an average width of about 18, though it contracts to less than 10 miles: the easternmost, or Gulf of *El-'Akabeh*, is only about 90 miles long, from the *Straits of Tīrān*, to the 'Akabeh [ELATH], and of proportionate narrowness. The navigation of the Red Sea and Gulf of Suez, near the shores, is very difficult from the abundance of shoals, coral reefs, rocks, and small islands which render the channel intricate, and cause strong currents, often of unknown force and direction; but in mid-channel, exclusive of the Gulf of Suez, there is generally a width of 100 miles clear, except the *Dædalus* reef (Wellsted, ii. 300).—The bottom in deep soundings is in most places sand and stones, from Suez as far as *Juddah*; and thence to the Straits it is

commonly mud. The deepest sounding in the excellent Admiralty chart is 1054 fathoms, in lat. 22° 30'.

Journeying southwards from Suez, on our left is the peninsula of Sinai [SINAI]: on the right, is the desert coast of Egypt, of limestone formation like the greater part of the Nile valley in Egypt, the cliffs on the sea-margin stretching landwards in a great rocky plateau, while more inland a chain of volcanic mountains (beginning about lat. 28° 4' and running south) rear their lofty peaks at intervals above the limestone, generally about 15 miles distant. Of the most important is *Gebel Ghārib*, 6,000 feet high; and as the Straits of Jubal are passed, the peaks of the primitive range attain a height of about 4,500 to 6,900 ft., until the "Elba" group rises in a huge mass about lat. 22°. Further inland is the *Gebel-ed-Dukkhān*, the "porphyry mountain" of Ptolemy (iv. 5, § 27; M. Claudianus, see Müller, *Geogr. Min. Atlas* vii.), 6,000 ft. high, about 27 miles from the coast, where the porphyry quarries formerly supplied Rome, and where are some remains of the time of Trajan (Wilkinson's *Modern Egypt and Thebes*, ii. 383); and besides these, along this desert southwards are "quarries of various granites, serpentines, Breccia Verde, slates, and micaceous, talcose, and other schists" (id. 382). *Gebel-ez-Zeyt*, "the mountain of oil," close to the sea, abounds in petroleum (id. 385). This coast is especially interesting in a Biblical point of view, for here were some of the earliest monasteries of the Eastern Church, and in those secluded and barren mountains lived very early Christian hermits. The convent of St. Anthony (of the Thebais), "Deyr Mār Antooniyoos," and that of St. Paul, "Deyr Mār Bōlus," are of great renown, and were once important. They are now, like all Eastern monasteries, decayed; but that of St. Anthony gives, from its monks, the Patriarch of the Coptic church, formerly chosen from the Nitrian monasteries (id. 381);—South of the "Elba" chain, the country gradually sinks to a plain, until it rises to the highland of *Geeddān*, lat. 15°, and thence to the straits extend a chain of low mountains. The greater part of the African coast of the Red Sea is sterile, sandy, and thinly peopled; first beyond Suez by Bedawees chiefly of the Ma'āzee tribe. South of the Kuseyr road, are the 'Abāḅ'deh; and beyond, the Bishārees, the southern branch of which are called by Arab writers "Bejā," whose customs, language, and ethnology, demand a careful investigation, which would undoubtedly be repaid by curious results (see El-Makreezee's *Khīat*, Descr. of the Bejā, and Descr. of the Desert of *Eydhab*; Quatremère's *Essays* on these subjects, in his *Mémoires Hist. et Géogr. sur l'Égypte*, ii. pp. 134, 162; and *The Genesis of the Earth and of Man*, 2d ed. p. 109); and then, coast-tribes of Abyssinia.

The Gulf of *El-'Akabeh* (i. e. "of the Mountain-road") is the termination of the long valley of the Ghór or 'Arabah that runs northwards to the Dead Sea. It is itself a narrow valley; the sides are lofty and precipitous mountains, of entire barrenness; the bottom is a river-like sea, running nearly straight for its whole length of about 90 miles. The northerly winds rush down this gorge with uncommon fury, and render its navigation extremely perilous, causing at the same time strong counter-currents; while most of the few anchorages are open to the southerly

gales. It "has the appearance of a narrow, deep ravine, extending nearly a hundred miles in a straight direction, and the circumjacent hills rise in some places two thousand feet perpendicularly from the shore" (Wellsted, ii. 108). The western shore is the peninsula of SINAI. The Arabian chain of mountains, the continuation of the southern spurs of the Lebanon, skirt the eastern coast, and rise to about 3,500 ft., while *Gebel Teybet-Alee* near the Straits is 6,000 ft. There is no pasturage, and little fertility, except near the 'Akabeh, where are date-groves and other plantations, etc. In earlier days, this last-named place was (it is said) famous for its fertility. The Island of Graia, *Jezevel Fura'oon*, once fortified and held by the Crusaders, is near its northern extremity, on the Sinaïtic side. The sea, from its dangers, and sterile shores, is entirely destitute of boats.

The Arabian coast outside the Gulf of the 'Akabeh is skirted by the range of Arabian mountains, which in some few places approach the sea, but generally leave a belt of coast country, called *Tihâneh*, or the Ghôr, like the Sheelah of Palestine. This tract is generally a sandy, parched plain, thinly inhabited; these characteristics being especially strong in the north. (Niebuhr, *Descr.* 305; Wellsted.) The mountains of the Hejâz consist of ridges running parallel towards the interior, and increasing in height as they recede (Wellsted, ii. 242). Burckhardt remarks that the descent on the eastern side of these mountains, like the Lebanon and the whole Syrian range east of the Dead Sea, is much less than that on the western; and that the peaks, seen from the east or land side, appear mere hills (*Arabia*, p. 321 seq.). In clear weather they are visible at a distance of 40 to 70 miles (Wellsted, ii. 242). The distant ranges have a rugged, pointed outline, and are granitic; at *Wejh*, with horizontal veins of quartz; nearer the sea many of the hills are fossiliferous limestone, while the beach hills "consist of light-colored sandstone, fronted by and containing large quantities of shells and masses of coral" (Wellsted, ii. 243). Coral also "enters largely into the composition of some of the most elevated hills." The more remarkable mountains are *Jabel 'Eyn-Unnâ* (or "Eynuwunnâ," *Marâsid*, s. v. "Eyn," *Ovri* of Ptol.), 6,090 ft. high near the Straits; a little further south, and close to *Mo'eyleh*, are mountains rising from 6,330 to 7,700 ft., of which Wellsted says, "The coast . . . is low, gradually ascending with a moderate elevation to the distance of six or seven miles, when it rises abruptly to hills of great height, those near *Mowilakh* terminating in sharp and singularly-shaped peaks . . . Mr. Irwin [1777] . . . has styled them Bullock's Horns. To me the whole group seemed to bear a great resemblance to representations which I have seen of enormous icebergs" (ii. 176; see also the Admiralty Chart, and Müller's *Geogr. Min.*). A little north of *Yembo'* is a remarkable group, the pyramidal mountains of Agatharchides; and beyond, about 25 miles distant, rises *J. Radwâ*. Further south, *J. Subh* is remarkable for its magnitude and elevation, which is greater than any other between *Yembo'* and *Siddah*; and still further, but about 80 miles distant from the coast, *J. Ris-cl-Ku'* rises behind the Holy city, Mekkeh. It is of this mountain that Burckhardt writes so enthusiastically—how rarely is he enthusiastic—contrasting its verdure and cool breezes with the sandy waste of *Tihâ-*

*meh* (*Arabia*, p. 65 seq.). The chain continues the whole length of the sea, terminating in the highlands of the Yemen. The Arabian mountains are generally fertile, agreeably different from the parched plains below, and their own bare granite peaks above. The highlands and mountain summits of the Yemen. "Arabia the Happy," the *Jebel* as distinguished from the plain, are precipitous, lofty, and fertile (Niebuhr, *Descr.* 161); with many towns and villages in their valleys and on their sides.—The coast-line itself, or *Tihâneh*, "north of *Yembo'*, is of moderate elevation, varying from 50 to 100 feet, with no beach. To the southward [to *Judduh*] it is more sandy and less elevated; the inlets and harbors of the former tract may be styled coves; in the latter they are lagoons" (Wellsted, ii. 244).—The coral of the Red Sea is remarkably abundant, and beautifully colored and variegated. It is often red, but the more common kind is white; and of hewn blocks of this many of the Arabian towns are built.

The earliest navigation of the Red Sea (passing by the pre-historical Phœnicians) is mentioned by Herodotus. "Sesostris (Rameses II.) was the first who, passing the Arabian Gulf in a fleet of long vessels, reduced under his authority the inhabitants of the coast bordering the Erythræan Sea; proceeding still further, he came to a sea which, from the great number of its shoals, was not navigable;" and after another war against Ethiopia he set up a stela on the promontory of Dirâ, near the straits of the Arabian Gulf. Three centuries later Solomon's navy was built "in Ezion-geber which is beside Elath, on the shore of the Red Sea (*Yam Sâph*), in the land of Edom" (1 K. ix. 26). In the description of the Gulf of *EL-'Akabeh*, it will be seen that this narrow sea is almost without any safe anchorage, except at the island of Graia near the 'Akabeh, and about 50 miles southward, the harbor of *Edh-Dhahab*. It is possible that the sea has retired here as at Suez, and that Ezion-geber is now dry land. [See EZION-GEBER; ELATH.] Solomon's navy was evidently constructed by Phœnician workmen of Hiram, for he "sent in the navy his servants, shipmen that had knowledge of the sea, with the servants of Solomon." This was the navy that sailed to Ophir. We may conclude that it was necessary to transport wood as well as men to build and man these ships on the shores of the Gulf of the 'Akabeh, which from their natural formation cannot be supposed to have much altered, and which were besides part of the wilderness of the wandering; and the Edomites were pastoral Arabs, unlike the seafaring Himmeyrites. Jehoshaphat also "made ships of Tarshish to go to Ophir for gold; but they went not, for the ships were broken at Ezion-geber" (1 K. xxii. 48). The scene of this wreck has been supposed to be *Edh-Dhahab*, where is a reef of rocks like a "giant's backbone" (= Ezion-geber) (Wellsted, ii. 153), and this may strengthen an identification with that place. These ships of Jehoshaphat were manned by "his servants," who from their ignorance of the sea may have caused the wreck. Pharaoh-Necho constructed a number of ships in the Arabian gulf, and the remains of his works existed in the time of Herodotus (ii. 159), who also tells us that these ships were manned by Phœnician sailors.

The fashion of the ancient ships of the Red Sea.

of the Phœnician ships of Solomon, is unknown. From Pliny we learn that the ships were of papyrus and like the boats of the Nile; and this statement was no doubt in some measure correct. But the roasting craft must have been very different from those employed in the Indian trade. More precise and curious is El-Makreezee's description, written in the first half of the 15th century, of the ships that sailed from *Eydháb* on the Egyptian coast to *Juddah*. "Their 'jelebehs' (P. Lobo, *op. Quatre-mère Mémoires*, ii. 164, calls them 'gelves'), which carry the pilgrims on the coast, have not a nail used in them, but their planks are sewed together with fibre, which is taken from the cocconut-tree, and they caulk them with the fibres of the wood of the date-palm; then they 'pay' them with butter, or the oil of the palma Christi, or with the fat of the kirsh (*squalus carcharias*; Forskál, *Descr. Animalium*, p. viii. No. 19) . . . The sails of these jelebehs are of mats made of the dóm-palm" (the *Khitat*, "Desert of Eydháb"). One of the sea-going ships of the Arabs is shown

El-Basrah. From a Drawing by Colonel Chesney.

Jerome says that the navigation was extremely tedious. At the present day the voyages are periodical, and guided by the seasons; but the old skill of the seamen has nearly departed, and they are extremely timid, and rarely venture far from the coast.

The Red Sea, as it possessed for many centuries the most important sea-trade of the East, contained ports of celebrity. Of these, Elath and Ezion-geber alone appear to be mentioned in the Bible. The Heroöpolite Gulf is of the chief interest: it was near to Goshen; it was the scene of the passage of the Red Sea; and it was the "tongue of the Egyptian Sea." It was also the seat of the Egyptian trade in this sea and to the Indian Ocean. Heroöpolis is doubtless the same as Hero, and its site has been probably identified with the modern *Aboo-Kesheyl*, at the head of the old gulf. By the consent of the classics, it stood on or near the head of the gulf, and was 68 miles (according to the *Itinerary of Antoninus*) from Clysmá, by the Arabs called *El-Kulzum*, near the modern Suez, which is close to the present head. Suez is a poor town,

in the view of *El-Basrah*, from a sketch by Colonel Chesney, (from Lane's '1001 Nights'). The crews of the latter, when not exceptionally Phœnicians, as were Solomon's and Pharaoh Necho's, were without doubt generally Arabians, rather than Egyptians—those Himyrite Arabs whose ships carried all the wealth of the East either to the Red Sea or the Persian Gulf. The people of 'Omán, the southeast province of Arabia, were among the foremost of these navigators (*El-Mes'oodce's Golden Meadows*, MS., and *The Accounts of Two Mohammedan Travellers of the Ninth Century*). It was customary, to avoid probably the dangers and delays of the narrow seas, for the ships engaged in the Indian trade, to transship their cargoes at the straits of *Báb el-Mende*b to Egyptian and other vessels of the Red Sea (Agath. § 103, p. 190; *anon. Periplus* § 26, p. 277, ed. Müller). The fleets appear to have sailed about the autumnal equinox, and returned in December or the middle of January (Pliny, *H. N.* vi. cap. xxiii. § 26; comp. *Periplus passim*). **St.**

and has only an unsafe anchorage, with very shoal water. On the shore of the Heroöpolite gulf was also Arsinoë, founded by Ptolemy Philadelphus: its site has not been settled. Berenice, founded by the same, on the southern frontier of Egypt, rose to importance under the Ptolemies and the Romans; it is now of no note. On the western coast was also the anchorage of Myos Hormos, a little north of the modern town *El-Kuseyr*, which now forms the point of communication with the old route to Coptos. On the Arabian coast the principal ports are *Mu'eyleh*, *Yembo'* (the port of *El-Medeeneh*), *Juddah* (the port of *Mekkeh*), and *Mukhá*, by us commonly written *Mocha*. The Red Sea in most parts affords anchorage for country-vessels well acquainted with its intricacies, and able to creep along the coast among the reefs and islands that girt the shore. Numerous creeks on the Arabian shore (called "shuroom," sing. "sharm,") indent the land. Of these the anchorage called *Esh-Sharm*, at the southern extremity of the peninsula of Sinai, is much frequented.

The commerce of the Red Sea was, in very an-

cient times, unquestionably great. The earliest records tell of the ships of the Egyptians, the Phœnicians, and the Arabs. Although the ports of the Persian gulf received a part of the Indian traffic [DEDAN], and the Himyerite maritime cities in the south of Arabia supplied the kingdom of SHEBA, the trade with Egypt was, we must believe, the most important of the ancient world. That all this traffic found its way to the head of the Heroöpolite gulf seems proved by the absence of any important Pharaonic remains further south on the Egyptian coast. But the shoaling of the head of the gulf rendered the navigation, always dangerous, more difficult; it destroyed the former anchorages, and made it necessary to carry merchandise across the desert to the Nile. This change appears to have been one of the main causes of the decay of the commerce of Egypt. We have seen that the long-voyaging ships shifted their cargoes to Red Sea craft at the Straits; and Ptolemy Philadelphus, after founding Arsinoë and endeavoring to re-open the old canal of the Red Sea, abandoned the upper route and established the southern road from his new city Berenice on the frontier of Egypt and Nubia to Coptos on the Nile. Strabo tells us that this was done to avoid the dangers encountered in navigating the sea (xvii. 1, § 45). Though the stream of commerce was diverted, sufficient seems to have remained to keep in existence the former ports, though they have long since utterly disappeared. Under the Ptolemies and the Romans the commerce of the Red Sea varied greatly, influenced by the decaying state of Egypt and the route to Palmyra (until the fall of the latter). But even its best state at this time cannot have been such as to make us believe that the 120 ships sailing from Myos Hormos, mentioned by Strabo (ii. 5, § 12), were other than an annual convoy. The wars of Heraclius and Khosroes affected the trade of Egypt as they influenced that of the Persian gulf. Egypt had fallen low at the time of the Arab occupation, and yet it is curious to note that Alexandria even then retained the shadow of its former glory. Since the time of Mohammed the Red Sea trade has been insignificant.

E. S. P.

\* *Recent explorations.* In 1857 Th. v. Heuglin made a scientific exploration of the Red Sea, the results of which were published in Petermann's *Mittheilungen* for 1860. These researches cover the physical features of the sea and its coast, the Fauna and Flora, the meteorological and hypsometrical phenomena, etc., all which are given with much minuteness of detail. Valuable contributions to the same purport, from Th. Kinzelbach and Dr. Stendner, appear in the same geographical journal for 1864. The *Mittheilungen* for September 1860 contains the journal of Th. v. Heuglin's travels along the western coast of the Sea, from Cairo to *Qosseir*, from *Qosseir* to *Sauakin*, from *Sauakin* to *Massaua*, thence along the *Samher* coast and in the adjacent Archipelago of *Dalrak*, and thence down the *Danakil* coast to *Bab-el-Mandeb*. This journal is accompanied with an excellent map, the most minute and accurate yet published, of the Red Sea and the principal harbors on its western side. These are *Qosseir* in lat. 26° 7' N. *Sauakin*, lat. 19° 8', and *Massaua*, lat. 15° 32'. *Qosseir* was much used by the ancient Egyptians in their commerce with Arabia, serving as a port to the Theban capital, as Suez now answers to Cairo. Mention is made of this route of traffic in ancient monuments and papyri. (See in Chabas, *Voyage*

*d'un Égyptien*, p. 62.) *Qosseir* is to-day a city of 3,000 inhabitants, cleanly and well built, with a good mole and harbor. It is a port of entry, and sometimes maintains a lively traffic with pilgrims on their way to and from Mecca. Fishing and handicrafts are its principal support. The pearl-fisheries of the Red Sea are less profitable than in former times. *Sauakin*, the capital of a province of the same name, is a city of 8,000 inhabitants, with a small but well-sheltered harbor. *Massaua*, situated on an island in the Gulf of *Hurkiko*, is an important avenue of trade for Abyssinia. Its climate is hot, and the inhabitants sometimes suffer for want of water — their supply being collected in cisterns, in the rainy season. The highest mountains along the western coast range from 4,000 to 7,000 feet English, and the coast line is generally abrupt, though indented with numerous little bays. The opening of the Suez canal will more than restore the Red Sea to its ancient importance in the commerce of the world.

J. P. T.

RED SEA, PASSAGE OF. The passage of the Red Sea was the crisis of the Exodus. It was the miracle by which the Israelites left Egypt and were delivered from the oppressor. Probably on this account St. Paul takes it as a type of Christian baptism. All the particulars relating to this event, and especially those which show its miraculous character, require careful examination. The points that arise are the place of the passage, the narrative, and the importance of the event in Biblical history.

1. It is usual to suppose that the most northern place at which the Red Sea could have been crossed is the present head of the Gulf of Suez. This supposition depends upon the erroneous idea that in the time of Moses the gulf did not extend further to the northward than at present. An examination of the country north of Suez has shown, however, that the sea has receded many miles, and there can be no doubt that this change has taken place within the historical period, doubtless in fulfillment of the prophecy of Isaiah (xi. 15, xix. 5; comp. Zech. x. 11). The old bed is indicated by the *Birket-el-Timsah*, or "Lake of the Crocodile," and the more southern Bitter Lakes, the northernmost part of the former probably corresponding to the head of the gulf at the time of the Exodus. In previous centuries, it is probable that the gulf did not extend further north, but that it was deeper in its northernmost part.

It is necessary to endeavor to ascertain the route of the Israelites before we can attempt to discover where they crossed the sea. The point from which they started was *Rameses*, a place certainly in the Land of Goshen, which we identify with the *Wādī-t-Tameylāt*. [RAMESSES; GOSHEN.] After the mention that the people journeyed from *Rameses* to *Succoth*, and before that of their departure from *Succoth*, a passage occurs which appears to show the first direction of the journey, and not a change in the route. This we may reasonably infer from its tenor, and from its being followed by the statement that *Joseph's bones* were taken by *Moses* with him, which must refer to the commencement of the journey. "And it came to pass, when *Pharaoh* had let the people go, that *God* led them not [by] the way of the land of the *Philistines*, although that [was] near; for *God* said, Lest peradventure the people repent when they see war, and they return to *Egypt*: but *God* caused the people to turn

[by] the way of the wilderness of the Red Sea" (Ex. xiii. 17, 18). It will be seen by reference to the map already given [vol. i. p. 794] that, from the *Wādi-t-Tumeylāt*, whether from its eastern end or from any other part, the route to Palestine by way of Gaza through the Philistine territory is near at hand. In the Roman time the route to Gaza from Memphis and Heliopolis passed the western end of the *Wādi-t-Tumeylāt*, as may be seen by the *Itinerary of Antoninus* (Parthey, *Zur Erdkunde d. Alt. Aegyptens*, map vi.), and the chief modern route from Cairo to Syria passes along the *Wādi-t-Tumeylāt* and leads to Gaza (Wilkinson, *Handbook*, new ed. p. 209).

At the end of the second day's journey the camping-place was at Etham "in the edge of the wilderness" (Ex. xiii. 20; Num. xxxiii. 6). Here the *Wādi-t-Tumeylāt* was probably left, as it is cultivable and terminates in the desert. After leaving this place the direction seems to have changed. The first passage relating to the journey, after the mention of the encamping at Etham, is this, stating a command given to Moses: "Speak unto the children of Israel, that they turn [or 'return'] and encamp [or 'that they encamp again,' *וַיָּשׁוּבוּ וַיַּחֲנֹךְ*] before Pi-hahiroth, between Migdol and the sea, over against Baalzephon" (Ex. xiv. 2). This explanation is added: "And Pharaoh will say of the children of Israel, They [are] entangled in the land, the wilderness hath shut them in" (3). The rendering of the A. V., "that they turn and encamp," seems to us the most probable of those we have given: "return" is the closer translation, but appears to be difficult to reconcile with the narrative of the route; for the more likely inference is that the direction was changed, not that the people returned: the third rendering does not appear probable, as it does not explain the entanglement. The geography of the country does not assist us in conjecturing the direction of the last part of the journey. If we knew that the highest part of the gulf at the time of the Exodus extended to the west, it would be probable that, if the Israelites turned, they took a northerly direction, as then the sea would oppose an obstacle to their further progress. If, however, they left the *Wādi-t-Tumeylāt* at Etham "in the edge of the wilderness," they could not have turned far to the northward, unless they had previously turned somewhat to the south. It must be borne in mind that Pharaoh's object was to cut off the retreat of the Israelites: he therefore probably encamped between them and the head of the sea.

At the end of the third day's march, for each camping-place seems to mark the close of a day's journey, the Israelites encamped by the sea. The place of this last encampment, and that of the passage, on the supposition that our views as to the most probable route are correct, would be not very far from the Persepolitan monument. [See map, vol. i. p. 794.] The monument is about thirty miles to the northward of the present head of the Gulf of Suez, and not far south of the position where we suppose the head of the gulf to have been at the time of the Exodus. It is here neces-

sary to mention the arguments for and against the common opinion that the Israelites passed near the present head of the gulf. Local tradition is in its favor, but it must be remembered that local tradition in Egypt and the neighboring countries, judging from the evidence of history, is of very little value. The Muslims suppose Memphis to have been the city at which the Pharaoh of the Exodus resided before that event occurred. From opposite Memphis a broad valley leads to the Red Sea. It is in part called the *Wādi-t-Teek*, or "Valley of the Wandering." From it the traveller reaches the sea beneath the lofty *Gebel-et-Tākah*,<sup>a</sup> which rises on the north and shuts off all escape in that direction, excepting by a narrow way along the seashore, which Pharaoh might have occupied. The sea here is broad and deep, as the narrative is generally held to imply. All the local features seem suited for a great event; but it may well be asked whether there is any reason to expect that suitability that human nature seeks for and modern imagination takes for granted, since it would have been useless for the objects for which the miracle appears to have been intended. The desert-way from Memphis is equally poetical, but how is it possible to recognize in it a route which seems to have had two days' journey of cultivation, the wilderness being reached only at the end of the second day's march? The supposition that the Israelites took an upper route, now that of the Mekkeh caravan, along the desert to the north of the elevated tract between Cairo and Suez, must be mentioned, although it is less probable than that just noticed, and offers the same difficulties. It is, however, possible to suppose that the Israelites crossed the sea near Suez without holding to the traditional idea that they attained it by the *Wādi-t-Teek*. If they went through the *Wādi-t-Tumeylāt* they might have turned southward from its eastern end, and so reached the neighborhood of Suez; but this would make the third day's journey more than thirty miles at the least, which, if we bear in mind the composition of the Israelite caravan, seems quite incredible. We therefore think that the only opinion warranted by the narrative is that already stated, which supposes the passage of the sea to have taken place near the northernmost part of its ancient extension. The conjecture that the Israelites advanced to the north, then crossed a shallow part of the Mediterranean, where Pharaoh and his army were lost in the quicksands, and afterwards turned southwards towards Sinai, is so repugnant to the Scripture narrative as to amount to a denial of the occurrence of the event, and indeed is scarcely worth mentioning.

The last camping-place was before Pi-hahiroth. It appears that Migdol was behind Pi-hahiroth, and, on the other hand, Baalzephon and the sea. These neighboring places have not been identified, and the name of Pi-hahiroth (if, as we believe, rightly supposed to designate a reedy tract, and to be still preserved in the Arabic name *Ghuweybet el-boos*, "the bed of reeds"), is now found in the neighborhood of the two supposed sites of the passage, and therefore cannot be said to be identified, besides that we must not expect a natural locality still to

<sup>a</sup> In order to favor the opinion that the Israelites took the route by the *Wādi-t-Teek*, this name, *Gebel-et-Tākah* (to which it is difficult to assign a probable meaning), has been changed to *Gebel-'Atākah*, as if signifying "the Mountain of Deliverance;" though,

to have this signification, it should rather be *Gebel-et-'Atākah*, the other form deviating from general usage. *El-Tākah* and *'Atākah* in the mouth of an Arab are widely different.

retain its name. It must be remembered that the name Pi-hahiroth, since it describes a natural locality, probably does not indicate a town or other inhabited place named after such a locality, and this seems almost certain from the circumstance that it is unlikely that there would have been more than two inhabited places, even if they were only forts, in this region. The other names do not describe natural localities. The nearness of Pi-hahiroth to the sea is therefore the only sure indication of its position, and, if we are right in our supposition as to the place of the passage, our uncertainty as to the exact extent of the sea at the time is an additional difficulty. [EXODUS, THE; PI-HAHIROTH.]

From Pi-hahiroth the Israelites crossed the sea. The only points bearing on geography in the account of this event are that the sea was divided by an east<sup>a</sup> wind, whence we may reasonably infer that it was crossed from west to east, and that the whole Egyptian army perished, which shows that it must have been some miles broad. Pharaoh took at least six hundred chariots, which, three abreast, would have occupied about half a mile, and the rest of the army cannot be supposed to have taken up less than several times that space. Even if in a broad formation, some miles would have been required.<sup>b</sup> It is more difficult to calculate the space taken up by the Israelite multitude, but probably it was even greater. On the whole we may reasonably suppose about twelve miles as the smallest breadth of the sea.

2. A careful examination of the narrative of the passage of the Red Sea is necessary to a right understanding of the event. When the Israelites had departed, Pharaoh repented that he had let them go. It might be conjectured, from one part of the narrative (Ex. xiv. 1-4), that he determined to pursue them when he knew that they had encamped before Pi-hahiroth, did not what follows this imply that he set out soon after they had gone, and also indicate that the place in question refers to the pursuit through the sea, not to that from the city whence he started (5-10). This city was most probably Zoan, and could scarcely have been much nearer to Pi-hahiroth, and the distance is therefore too great to have been twice traversed, first by those who told Pharaoh, then by Pharaoh's army, within a few hours. The strength of Pharaoh's army is not further specified than by the statement that "he took six hundred chosen chariots, and [or 'even'] all the chariots of Egypt, and captains over every one of them" (7). The war-chariots of the Egyptians held each but two men, an archer and a charioteer.

The former must be intended by the word **שָׂרֵי צְבָאוֹת**, rendered in the A. V. "captains." Throughout the narrative the chariots and horsemen of Pharaoh are mentioned, and "the horse and his rider," xv. 21, are spoken of in Miriam's song, but we can scarcely hence infer that there was in Pharaoh's army a body of horsemen as well as of men in chariots, as in ancient Egyptian the chariot-force is always called HTAR or HETRA, "the horse," and these expressions may therefore be respectively ple-

onastic and poetical. There is no evidence in the records of the ancient Egyptians that they used cavalry, and, therefore, had the Biblical narrative expressly mentioned a force of this kind, it might have been thought to support the theory that the Pharaoh of the Exodus was a Shepherd-king. With this army, which, even if a small one, was mighty in comparison to the Israelite multitude, encumbered with women, children, and cattle, Pharaoh overtook the people "encamping by the sea" (9). When the Israelites saw the oppressor's army they were terrified, and murmured against Moses. "Because [there were] no graves in Egypt, hast thou taken us away to die in the wilderness?" (11). Along the bare mountains that skirt the valley of Upper Egypt are abundant sepulchral grottoes, of which the entrances are conspicuously seen from the river and the fields it waters: in the sandy slopes at the foot of the mountains are pits without number and many built tombs, all of ancient times. No doubt the plain of Lower Egypt, to which Memphis, with part of its far-extending necropolis, belonged politically though not geographically, was throughout as well provided with places of sepulture. The Israelites recalled these cities of the dead, and looked with Egyptian horror at the prospect that their carcasses should be left on the face of the wilderness. Better, they said, to have continued to serve the Egyptians than thus to perish (12). Then Moses encouraged them, bidding them see how God would save them, and telling them that they should behold their enemies no more. There are few cases in the Bible in which those for whom a miracle is wrought are commanded merely to stand by and see it. Generally the Divine support is promised to those who use their utmost exertions. It seems from the narrative that Moses did not know at this time how the people would be saved, and spoke only from a heart full of faith, for we read, "And the Lord said unto Moses, Wherefore criest thou unto me? speak unto the children of Israel that they go forward: but lift thou up thy rod, and stretch out thine hand over the sea, and divide it: and the children of Israel shall go on dry [ground] through the midst of the sea" (15, 16). That night the two armies, the fugitives and the pursuers, were encamped near together. Between them was the pillar of the cloud, darkness to the Egyptians and a light to the Israelites. The monuments of Egypt portray an encampment of an army of Rameses II., during a campaign in Syria; it is well planned and carefully guarded: the rude modern Arab encampments bring before us that of Israel on this memorable night. Perhaps in the camp of Israel the sounds of the hostile camp might be heard on the one hand, and on the other the roaring of the sea. But the pillar was a barrier and a sign of deliverance. The time was now come for the great decisive miracle of the Exodus. "And Moses stretched out his hand over the sea: and the Lord caused the sea to go [back] by a strong east wind all that night, and made the sea dry [hard], and the waters were divided. And the children of Israel went through the midst of the sea upon the dry [ground]: and the waters [were] a wall unto them on their

<sup>a</sup> The LXX. has "south," instead of "east." The Heb. **מִצְוָה**, lit. "in front," may, however, indicate the whole distance between the two extreme points of sunrise, those of the two solstices, and hence it is not limited to absolute east, agreeably with the use of the

Arabs in every case like the narrative under consideration.

<sup>b</sup> It has been calculated, that if Napoleon I. had advanced by one road into Belgium, in the Waterloo campaign, his column would have been sixty miles in length.

right hand and on their left" (21, 22, comp. 29). The narrative distinctly states that a path was made through the sea, and that the waters were a wall on either hand. The term "wall" does not appear to oblige us to suppose, as many have done, that the sea stood up like a cliff on either side, but should rather be considered to mean a barrier, as the former idea implies a seemingly needless addition to the miracle, while the latter seems to be not discordant with the language of the narrative. It was during the night that the Israelites crossed, and the Egyptians followed. In the morning watch, the last third or fourth of the night, or the period before sunrise, Pharaoh's army was in full pursuit in the divided sea, and was there miraculously troubled, so that the Egyptians sought to flee (23-25). Then was Moses commanded again to stretch out his hand, and the sea returned to its strength, and overwhelmed the Egyptians, of whom not one remained alive (26-28). The statement is so explicit that there could be no reasonable doubt that Pharaoh himself, the great offender, was at last made an example, and perished with his army, did it not seem to be distinctly stated in Psalm cxxxvi. that he was included in the same destruction (15). The sea cast up the dead Egyptians, whose bodies the Israelites saw upon the shore.

In a later passage some particulars are mentioned which are not distinctly stated in the narrative in Exodus. The place is indeed a poetical one, but its meaning is clear, and we learn from it that at the time of the passage of the sea there was a storm of rain with thunder and lightning, perhaps accompanied by an earthquake (Ps. lxxvii. 15-20). To this St. Paul may allude where he says that the fathers "were all baptized unto Moses in the cloud and in the sea" (1 Cor. x. 2); for the idea of baptism seems to involve either immersion or sprinkling, and the latter could have here occurred: the reference is evidently to the pillar of the cloud: it would, however, be impious to attempt an explanation of what is manifestly miraculous. These additional particulars may illustrate the troubling of the Egyptians, for their chariots may have been thus overturned.

Here, at the end of their long oppression, delivered finally from the Egyptians, the Israelites glorified God. In what words they sang his praise we know from the Song of Moses, which, in its vigorous brevity, represents the events of that memorable night, scarcely of less moment than the night of the Passover (Ex. xv. 1-18: ver. 19 is probably a kind of comment, not part of the song). Moses seems to have sung this song with the men, Miriam with the women also singing and dancing, or perhaps there were two choruses (20, 21). Such a picture does not recur in the history of the nation. Neither the triumphal Song of Deborah, nor the rejoicing when the Temple was recovered from the Syrians, celebrated so great a deliverance, or was joined in by the whole people. In leaving Goshen, Israel became a nation; after crossing the sea, it was free. There is evidently great significance, as we have suggested, in St. Paul's use of this mira-

cle as a type of baptism; for, to make the analogy complete, it must have been the beginning of a new period of the life of the Israelites.

3. The importance of this event in Biblical history is shown by the manner in which it is spoken of in the books of the O. T. written in later times. In them it is the chief fact of Jewish history. Not the call of Abraham, not the rule of Joseph, not the first Passover, not the conquest of Canaan, are referred to in such a manner as this great deliverance. In the Book of Job it is mentioned with the acts of creation (xxvi. 10-13). In the Psalms it is related as foremost among the deeds that God had wrought for his people. The prophet Isaiah recalls it as the great manifestation of God's interference for Israel, and an encouragement for the descendants of those who witnessed that great sight. There are events so striking that they are remembered in the life of a nation, and that, like great heights, increasing distance only gives them more majesty. So no doubt was this remembered long after those were dead who saw the sea return to its strength and the warriors of Pharaoh dead upon the shore.

It may be inquired how it is that there seems to have been no record or tradition of this miracle among the Egyptians. This question involves that of the time in Egyptian history to which this event should be assigned. The date of the Exodus according to different chronologers varies more than three hundred years; the dates of the Egyptian dynasties ruling during this period of three hundred years vary full one hundred. The period to which the Exodus may be assigned therefore virtually corresponds to four hundred years of Egyptian history. If the lowest date of the beginning of the XVIIIth dynasty be taken and the highest date of the Exodus, both which we consider the most probable of those which have been conjectured in the two cases, the Israelites must have left Egypt in a period of which monuments or other records are almost wanting. Of the XVIIIth and subsequent dynasties we have as yet no continuous history, and rarely records of events which occurred in a succession of years. We know much of many reigns, and of some we can be almost sure that they could not correspond to that of the Pharaoh of the Exodus. We can in no case expect a distinct Egyptian monumental record of so great a calamity, for the monuments only record success; but it might be related in a papyrus. There would doubtless have long remained a popular tradition of the Exodus, but if the king who perished was one of the Shepherd strangers, this tradition would probably have been local, and perhaps indistinct.<sup>a</sup>

Endeavors have been made to explain away the miraculous character of the passage of the Red Sea. It has been argued that Moses might have carried the Israelites over by a ford, and that an unusual tide might have overwhelmed the Egyptians. But no real diminution of the wonder is thus effected. How was it that the sea admitted the passing of the Israelites, and drowned Pharaoh and his army? How was it that it was shallow at

<sup>a</sup> While this article is going through the press, M. Jhabas has published a curious paper, in which he conjectures that certain laborers employed by the Pharaohs of the XIXth and XXth dynasties in the quarries and elsewhere are the Hebrews. Their name reads אֶפְרַיִם or אֶפְרַיִם, which might correspond to

"Hebrews" אֶפְרַיִם; but his finding them still in Egypt under Rameses IV., about B. C. 1200, certainly after the latest date of the Exodus, is a fatal objection to an identification with the Israelites.

the right time, and deep at the right time? This attempted explanation would never have been put forward were it not that the fact of the passage is so well attested that it would be uncritical to doubt it were it recorded on mere human authority. Since the fact is undeniable, an attempt is made to explain it away. Thus the school that pretends to the severest criticism is compelled to deviate from its usual course; and when we see that in this case it must do so, we may well doubt its wisdom in other cases, which, being differently stated, are more easily attacked.

R. S. P.

\* The opening of the Suez Canal may contribute to the solution of the problem of the route of the Israelites from Raames to the Red Sea. The sweet-water canal, which flows from the Nile eastward through *Wadi-t-Tuneyhit*, has already been restored to a region of the ancient Goshen, a degree of fertility which suggests that this may truly have been "the best of the land" in the time of the Israelites, when, under the ancient system of irrigation, it was watered with "streams, rivers, ponds, and pools," Ex. vii. 19. This canal runs from the Nile to *Ismaila*, a new town on Lake Timsah, and thence southward to Suez. It is twenty-six feet wide with an average depth of four feet, and by means of lateral sluices is made to irrigate a large area. So valuable is it for this purpose, that the Egyptian government purchased it of the Canal Company at a cost of four hundred thousand pounds, expecting to reimburse itself by the enhanced value of lands.

Unruh (*Der Zug den Israeliten aus Ägypten nach Canaan*) places the Land of Goshen in the northeastern portion of the Delta, with a sea-coast on the Mediterranean from Tanis to Avaris, and Raames in the vicinity of the latter city. He first carries the Israelites around the head of the gulf, which then extended as a reedy marsh far above the modern Suez; then leads them down upon the east side of the gulf to a point opposite Suez, where he finds a small bay or arm of the gulf projecting into the Arabian peninsula, — a little above *Ayun Musa*, — and thus he makes the scene of the crossing narrated in Exodus. At the opposite extreme, Schleiden (*Die Landenge von Sues*) places Raames in the line of the ancient canal, and near the Bitter Lakes, but first turns the course of the Israelites northward toward the Mediterranean, as the direct route to Palestine. They are overtaken on the coast of the Mediterranean, in a marshy region, lying east of Avaris upon the borders of the wilderness: having here escaped from Pharaoh, they turn southward and enter the desert of Sinai, keeping always to the east of the Gulf of Suez. But these theories equally violate the requirements of the narrative of the Exodus in respect of the successive days' marches of the Israelites. The distance from Raames to the head of the gulf was about thirty miles, and so great a caravan as the Israelites with their cattle and attendants made, would require three days for such a march. The second day would bring them to about the line between the head of the gulf and the Bitter Lakes on the edge of the great eastern desert. From this "Etham" they turned backward, and went down the western side of the gulf to the vicinity of Suez, — and at this point, probably, the crossing took place. "The miracle was wrought by natural means supernaturally applied. A strong N. E. wind acting here upon the ebb tide, would necessarily have the effect to drive out the waters from

the small arm of the sea which runs up by Suez, and also from the end of the gulf itself, leaving the shallower portions dry; while the more northern part of the arm, which was anciently broader and deeper than at present, would still remain covered with water. Thus the waters would be divided, and be a wall to the Israelites on the right hand and on the left." No better theory of the place of the crossing and the manner of the miracle has been presented than this of Dr. E. Robinson (*Researches*, i. 54-59). It harmonizes well all the details of the narrative. The arm of the gulf stretching north of Suez thus becomes a condition of the fulfillment of the miracle. J. P. T.

REED. Under this name we propose noticing the following Hebrew words: *agmôn*, *gôme*, *'arôth*, and *kâneh*.

1. *Agmôn* (אגמון: κρίκος, ἄρθρα, μικρός, τέλος: *circulus, fervens, refrenans*) occurs Job xl. 26 (A. V. xli. 2), "Canst thou put *agmôn*" (A. V. "hook") into the nose of the crocodile? Again, in xl. 12 (A. V. xli. 20), "out of his nostrils goeth smoke, as out of a seething-pot or *agmôn*" (A. V. "caldron"). In Is. ix. 14, it is said Jehovah "will cut off from Israel head and tail, branch and *agmôn*" (A. V. "rush"). The *agmôn* is mentioned also as an Egyptian plant, in a sentence similar to the last, in Is. xix. 15; while from lviii. 5 we learn that the *agmôn* had a pendulous panicle. There can be no doubt that the *agmôn* denotes some aquatic reed-like plant, whether of the Nat. order *Cyperaceæ* or that of *Graminææ*. The term is allied closely to the Hebrew *agâm* (אגם), which, like the corresponding Arabic *agam* (أجم), denotes a marshy pool or reed-bed.<sup>a</sup> (See Jer. li. 32, for this latter signification.) There is some doubt as to the specific identity of the *agmôn*, some believing that the word denotes "a rush" as well as a "reed." See Rosenmüller (*Bib. Bot.* p. 184) and Winer (*Realwörterb.* ii. 484). Celsius has argued in favor of the *Arundo phragmitis* (*Herob.* i. 465); we are inclined to adopt his opinion. That the *agmôn* denotes some specific plant is probable both from the passages where it occurs as well as from the fact that *kâneh* (קנה) is the generic term for reeds in general. The *Arundo phragmitis* (now the *Phragmites communis*), if it does not occur in Palestine and Egypt, is represented by a very closely allied species, namely, the *A. asiaca* of Delisle. The drooping panicle of this plant will answer well to the "bowing down the head" of which Isaiah speaks; but, as there are other kinds of reed-like plants to which this character also belongs, it is impossible to do more than give a probable conjecture. The expression "Canst thou put an *agmôn*" into the crocodile's nose? has been variously explained. The most probable interpretation is that which supposes allusion is made to the mode of passing a reed or a rush through the gills of fish in order to carry them home; but see the Commentaries and Notes of

<sup>a</sup> אגם. Densi frutices, arundinetum, palus \* (Freitag.)

Rosenmüller, Schultens, Lee, Cary, Mason Good, etc. The *agmōn* of Job xli. 20 seems to be derived from an Arabic root signifying to "be burning;" hence the *fervens* of the Vulg. The *Phragmites* belongs to the Nat. order *Graminaceæ*.

2. *Gōme*, (גֹּמֶה: πάπειρος, βίβλιος, ἔλος: *scirpeus*, *scirpus*, *papyrus*, *iancus*), translated "rush" and "bulrush" by the A. V., without doubt denotes the celebrated paper-reed of the ancients (*Papyrus Antiquorum*), a plant of the Sedgè family, *Cyperaceæ*, which formerly was common in some parts of Egypt. The Hebrew word is found four times in the Bible. Moses was hid in a vessel

*Papyrus antiquorum.*

made of the papyrus (Ex. ii. 3). Transit boats were made out of the same material by the Ethiopians (Is. xviii. 2); the paper-reed is mentioned together with *Kāneh*, the usual generic term for a "reed," in Is. xxxv. 7, and in Job viii. 11, where it is asked, "Can the papyrus plant grow without mire?" The modern Arabic name of this plant

is *Berdī* (بَرْدِي). According to Bruce the modern Abyssinians use boats made of the papyrus reed; Ludolf (*Hist. Æthiop.* i. 8) speaks of the Tzamic lake being navigated "monoxylis lintribus ex typha præcrassa confertis," a kind of sailing, he

says, which is attended with considerable danger to the navigators. Wilkinson (*Anc. Egypt.* ii. 96, ed. 1854) says that the right of growing and selling the papyrus plants belonged to the government, who made a profit by its monopoly, and thinks other species of the *Cyperaceæ* must be understood as affording all the various articles, such as baskets, canoes, sails, sandals, etc., which have been said to have been made from the real papyrus. Considering that Egypt abounds in *Cyperaceæ*, many kinds of which might have served for forming canoes, etc., it is improbable that the papyrus alone should have been used for such a purpose; but that the true *papyrus* was used for boats there can be no doubt, if the testimony of Theophrastus (*Hist. Pl.* iv. 8, § 4), Pliny (*H. N.* xiii. 11), Plutarch, and other ancient writers, is to be believed.

From the soft cellular portion of the stem the ancient material called papyrus was made. "Papyrus," says Sir G. Wilkinson, "are of the most remote Pharaonic periods. The mode of making them was as follows: the interior of the stalks of the plant, after the rind had been removed, was cut into thin slices in the direction of their length, and these being laid on a flat board in succession, similar slices were placed over them at right angles, and their surfaces being cemented together by a sort of glue, and subjected to a proper degree of pressure and well dried, the papyrus was completed; the length of the slices depend, of course on the breadth of the intended sheet, as that of the sheet on the number of slices placed in succession beside each other, so that though the breadth was limited the papyrus might be extended to an indefinite length." [WRITING.] The papyrus reed is not now found in Egypt; it grows, however, in Syria. Dr. Hooker saw it on the banks of Lake Tiberias, a few miles north of the town: it appears to have existed there since the days of Theophrastus and Pliny, who give a very accurate description of this interesting plant. Theophrastus (*Hist. Plant.* iv. 8, § 4) says, "The papyrus grows also in Syria around the lake in which the sweet-scented reed is found, from which Antigonus used to make cordage for his ships."<sup>a</sup> (See also Pliny, *H. N.* xiii. 11.) This plant has been found also in a small stream two miles N. of Jaffa. Dr. Hooker believes it is common in some parts of Syria: it does not occur anywhere else in Asia; it was seen by Lady Calcott on the banks of the Anapus, near Syracuse, and Sir Joseph Banks possessed paper made of papyrus from the Lake of Thrasymene (*Script. Herb.* p. 379). The Hebrew name of this plant is derived from a root which means "to absorb," compare Lucan (*Phars.* iv. 136).<sup>b</sup> The lower part of the papyrus reed was used as food by the ancient Egyptians; "those who wish to eat the byblus dressed in the most delicate way, stew it in a hot pan and then eat it" (Herod. ii. 92; see also Theophr. *Hist. Plant.* iv. 9). The statement of Theophrastus with regard to the sweetness and flavor of the sap has been confirmed by some writers; the Chevalier Landolina made papyrus from the pith of the plant, which, says Heeren (*Hist. Res. Afric. Nat.*, ii. 350, note), "is rather clearer than the Egyptian;" but other writers say the

<sup>a</sup> \* The papyrus is very abundant in a swamp at the north end of the Plain of Genesaret, and also covers many acres on the marshy shores of *Huleh*, the ancient Merom. These two places and Jaffa (see

above) are said to be the only places in Asia where this plant is known to exist at the present day (Tristram, *Nat. Hist. of the Bible*, p. 433).

<sup>b</sup> "Conseritur bibula Memphis cymba papyro."

stem is neither juicy nor agreeable. The papyrus plant (*Papyrus antiquorum*) has an angular stem from 3 to 6 feet high, though occasionally it grows to the height of 14 feet; it has no leaves; the flowers are in very small spikelets, which grow on the threadlike flowering branchlets which form a bushy crown to each stem: it is found in stagnant pools as well as in running streams, in which latter case, according to Bruce, one of its angles is always opposed to the current of the stream.

3. 'Αρόθι (אָרוֹת): τὸ ἄχι τὸ χλωρὸν πᾶν<sup>a</sup>) is translated "paper-reed" in Is. xix. 7, the only passage where the pl. noun occurs; there is not the slightest authority for this rendering of the A. V., nor is it at all probable, as Celsius (*Hierob.* ii. 230) has remarked, that the prophet who speaks of the paper-reed under the name *gôme* in the preceding chapter (xviii. 2), should in this one mention the same plant under a totally different name. "Aroth," says Kinichi, "is the name to designate pot-herbs and green plants." The LXX. translate it by "all the green herbage" (comp. אֵרֶב, Gen. xli. 2, and see FLAG). The word is derived from 'ἀρά, "to be bare," or "destitute of trees;" it probably denotes the open grassy land on the banks of the Nile; and seems to be allied to the Arabic 'arā

(عراة), *locus apertus, spatiosus*. Michaelis (*Suppl.* No. 1973), Rosenmüller (*Schol. in Jes.* xix. 7), Gesenius (*Thes.* s. v.), Maurer (*Comment.* s. v.), and Simonis (*Lex. Heb.* s. v.), are all in favor of this or a similar explanation. Vitringa (*Comment. in Isaiam*) was of opinion that the Hebrew term denoted the papyrus, and he has been followed by J. G. Unger, who has published a dissertation on this subject (*De אָרוֹת, hoc est de Papyro frutice, von der Papier-Staude*, ad Is. xiv. 7; Lips. 1731, 4to).

4. Kāneh (קָנֶה): κάλαμος, καλαμίσκος, καλάμιμος, πῆχος, ἀγκών, ζυγός, πυθμῆν: *culmus, calamus, arundo, fistula, statera*), the generic name of a reed of any kind; it occurs in numerous passages of the O. T., and sometimes denotes the "stalk" of wheat (Gen. xli. 5, 22), or the "branches" of the candlestick (Ex. xxv. and xxxvii.); in Job xxxi. 22, *kāneh* denotes the bone of the arm between the elbow and the shoulder (*os humeri*); it was also the name of a measure of length equal to six cubits (Ez. xli. 3, xl. 5). The word is variously rendered in the A. V. by "stalk," "branch," "bone," "calamus," "reed." In the N. T. *κάλαμος* may signify the "stalk" of plants (Mark xv. 36; Matt. xxvii. 48, that of the hyssop, but this is doubtful), or "a reed" (Matt. xi. 7, xii. 20; Luke vii. 24; Mark xv. 19); or "a measuring rod" (Rev. xi. 1, xxi. 15, 16); or a "pen" (3 John 13). Strand (*Flor. Palest.* pp. 28-30) gives the following names of the reed plants of Palestine: *Saccharum officinale*, *Cyperus papyrus* (*Papyrus antiquorum*), *C. rotundus*, and *C. esculentus*, and *Arundo scriptoria*; but no doubt the species are numerous. See Bové (*Voyage en Palest., Annal. des Scienc. Nat.* 1834, p. 165), "Dans les déserts qui environnent ces montagnes j'ai trouvé plusieurs

Saccharum, Milium arundinaceum et plusieurs Cypcéacé." The *Arundo donax*, the *A. Egyptiaca* (?) of Bové (*Ibid.* p. 72), is common on the banks of the Nile, and may perhaps be "the staff of the bruised reed" to which Sennacherib compared the power of Egypt (2 K. xviii. 21; Ez. xxix. 6, 7). See also Is. xlii. 3. The thick stem of this reed may have been used as walking-staves by the ancient Orientals; perhaps the measuring-reed was this plant; at present the dry culms of this huge grass are in much demand for fishing-rods, etc.

Some kind of fragrant reed is denoted by the word *kēneh* (Is. xliii. 24; Ez. xxvii. 19; Cant. iv. 14), or more fully by *kēneh bōsem* (קְנֵה בֹסֵם), see Ex. xxx. 23, or by *kāneh hattōb* (קְנֵה הַטּוֹב), Jer. vi. 20; which the A. V. renders "sweet cane," and "calamus." Whatever may be the substance denoted, it is certain that it was one of foreign importation, "from a far country" (Jer. vi. 20). Some writers (see Sprengel, *Com. in Dioscor.* i., xvii.) have sought to identify the *kāneh bōsem* with the *Acorus calamus*, the "sweet sedge," to which

Arundo donax.

they refer the *κάλαμος ἀρωματικός* of Dioscorides (i. 17), the *κάλαμος εὐώδης* of Theophrastus (*Hist. Plant.* iv. 8 § 4), which, according to this last-named writer and Pliny (*H. N.* xii. 22), formerly grew about a lake "between Libanus and another mountain of no note;" Strabo identifies this with the Lake of Gennesaret (*Geog.* xvi. p. 755, ed. Kramer). Burckhardt was unable to discover any sweet-scented reed or rush near the lake, though he saw many tall reeds there. "High reeds grow along the shore, but I found none of the aromatic reeds and rushes mentioned by Strabo" (*Syria*, p. 319); but whatever may be the "fragrant reed" intended, it is certain that it did not grow in Syria, otherwise we cannot suppose it should be spoken of as a valuable product from a far country. Dr. Royle refers the *κάλαμος ἀρωματικός* of Dioscorides to a

<sup>a</sup> It is difficult to see how the Vulg. understood the word

species of *Andropogon*, which he calls *A. calvus aromaticus*, a plant of remarkable fragrance, and a native of Central India, where it is used to mix with ointments on account of the delicacy of its odor (see Kitto's *Cycl. Art.* "Kaneh bosen;" and a fig. of this plant in Royle's *Illustrations of Himalayan Botany*, p. 425, t. 97). It is possible this may be the "reed of fragrance;" but it is hardly likely that Dioscorides, who, under the term *σχοῖνος* gives a description of the *Andropogon Schœnanthus*, should speak of a closely allied species under a totally different name. Still there is no necessity to refer the *Kēnēh bōsem* or *hattōb* to the *κάλαμος ἀρωματικός* of Dioscorides; it may be

*Andropogon Schœnanthus.*

represented by Dr. Royle's plant or by the *Andropogon Schœnanthus*, the lemon grass of India and Arabia. W. H.

REĒLIAIAH [4 syl.] רֵעְלִיָּאִיחַ [who trembles before Jehovah, Ges.]: 'Pee-liaias; [Vat. Pee-liaia:] *Rahelūia*). One of the children of the province who went up with Zerubbabel (Ezr. ii. 2). In Neh. vii. 7 he is called RAAMIAH, and in 1 Esdr. v. 8 REESALAS.

REĒLIUS ('Pee-liaias; [Vat. Βορολειας]).

אִפְּוֹר; A. V. "purely," but more properly "as with alkali."

בִּצְרָף.

עֲזָרָה.

בִּזְרָה. The term *בִּצְרָף* occurs twice only (Prov. xvii. 3, xxvii. 21; A. V. "fining-pot"). The expression in Ps. xii. 6, rendered in the A. V. "furnace of earth," is of doubtful signification, but cer-

This name occupies the place of ΒΙΓΥΑΙ in Ezr. ii. 2 (1 Esdr. v. 8). The list in the Vulgate is so corrupt that it is difficult to trace either.

REĒSĀ'IAS [4 syl.] ('Pησαίος; [Ald. 'Pηρσαίος:] *Elimens*). The same as REĒLIAIAH or RAAMIAH (1 Esdr. v. 8).

REFINER (רִפְיָן; רִפְיָן). The refiner's art was essential to the working of the precious metals. It consisted in the separation of the dross from the pure ore, which was effected by reducing the metal to a fluid state by the application of heat, and by the aid of solvents, such as alkali<sup>a</sup> (Is. i. 25) or lead (Jer. vi. 23), which, amalgamating with the dross, permitted the extraction of the unadulterated metal. The term<sup>b</sup> usually applied to refining had reference to the process of melting; occasionally, however, the effect of the process is described by a term<sup>c</sup> borrowed from the filtering of wine. The instruments required by the refiner were a crucible or furnace,<sup>d</sup> and a bellows or blow-pipe.<sup>e</sup> The workman sat at his work (Mal. iii. 3, "He shall sit as a refiner"), as represented in the cut of an Egyptian refiner already given (see vol. ii. p. 992): he was thus better enabled to watch the process, and let the metal run off at the proper moment. [MINES, p. 1939.] The notices of refining are chiefly of a figurative character, and describe moral purification as the result of chastisement (Is. i. 25; Zech. xiii. 9; Mal. iii. 2, 3). The failure of the means to effect the result is graphically depicted in Jer. vi. 29: "The bellows glow with the fire (become quite hot from exposure to the heat) the lead (used as a solvent) is expended: f the refiner melts in vain, for the refuse will not be separated." The refiner appears, from the passage whence this is quoted, to have combined with his proper business that of assaying metals: "I have set thee for an assayer" (Jb. ver. 27). W. L. B.

\* REFRAIN formerly signified to bridle, or hold in check (as in Latin *refrenare*). So in Prov. x. 19: "He that refraineth his lips is wise." H.

REFUGE, CITIES OF. [CITIES OF REFUGE.]

RE'GEM (רֵגֶם) [*friend, i. e. of God, Ges.*]: 'Pαγέμ; Alex. Ρεγεμ; *Regom*). A son of Jahdai, whose name unaccountably appears in a list of the descendants of Caleb by his concubine Ephah (1 Chr. ii. 47). Rashi considers Jahdai as the son of Ephah, but there appear no grounds for this assumption.

tainly cannot signify that. The passage may be rendered, "as silver, melted in a workshop, flowing down to the earth."

עֲפָרָה.

כִּי אֵשׁ הָיָה, כֵּרִי.

בְּרוּרִין. The A. V. adopts an incorrect punetation, and renders it "a tower."
